Thread: [HackForums is Lagging?](#)

SimplyTran - May 6, 2013, 11:50 pm

Is HackForums lagging? I noticed that only 375 users active in the past 3 minutes (330 members, 66 of whom are invisible, and 43 guests). are online today. Usually, there's over 500+!

Is one of CloudFlare's regional servers down or something?

I just ran a speedtest and I don't think it's my connection either.

Longpoke - May 6, 2013, 11:50 pm

I haven't noticed anything lagging.

It might just be a day where people are busy, hope so, anyway!

Really? Even when you PM people? Like sometimes it'll timeout for me.

Site has been timing out frequently, but give it sometime and everything always comes back to normal.

Yes, I'm aware we're lagging at times but we're online. It's a butthurt banned member attacking us. They think I'll unban them. LOL.
