Thread: [| VB.NET | Crypter Source | Start Your Own Crypter | Limited Copies | Cheap](#)

Prox - May 9, 2013, 12:19 am

Selling my source to my crypter. It's not FUD atm, but it works 100% with many features. If you have basic knowledge in VB.net you can re-FUD it or you can pay somebody to do it and start your own service. Selling this because I really needed money soon and I'm too busy.

Works with most of the current RATs/Miners/Keyloggers/Botnets. You may NOT redistribute or leak this source!

Price will be 30\$ PP / LR for the source. Selling to a limited amount of people.

FEATURES
Binder
Icon Change
Startup(Persistence)
Melt file
Compress
Obfuscate
Assembly changer
Fake error message

So it's a complete source? I mean with a stub, or is it just GUI?

//Edit OP replied via PM, it's the full source... Might be interested, bookmarked!

xDISFIGURE - May 9, 2013, 10:48 am

You should add more feature to get some sells.

By the way, good luck with your sell dude !

I'm allowed to resell it. So I'm reselling it for 50% less than what he's selling for XP

It's not a bad source, I just don't have the time that I thought I had.

Payne. - *May 12, 2013, 2:32 pm*

I don't get what's so special about this source? It would be easier to hire someone to code you a source in C++.

eCoLoGy - *May 13, 2013, 9:37 am*

And not to mention that this doesn't work.

I've bought this exactly same source from other member here on HF and after crypting a simple "Hello World" app, it doesn't open.
