MAKING MONEY GUARENTEED

This method is entirely new and guaranteed. However this method requires an investment, but you'll double your invested money every hour. It uses simple mathematics and odds to beat online casinos to get massive payouts:

Spoiler [\(Click to View\)](#)

Everything is covered in this book on how to always make a profit, and minimize your losses. Starting small you can make \$40 an hour using \$0.20. Eventually you can move up to making around \$150 an hour uses only a \$1 and so fourth. The more used results in higher earnings. I make a living doing this and decided to share.

Savages - May 10, 2013, 12:23 am

So it's guaranteed i'll make money or, if i don't can i get my money back?

Vegas - May 10, 2013, 12:24 am

OP are you selling a public method?

Amzo - May 10, 2013, 12:26 am

There are no refunds, however you are guaranteed to make the money. but it does require investing money. It is gambling after all. After all it's all about odds. A safe investment would be \$50, but then that is to make sure you don't lose against the odds, which would be around 1024 out of 1025. With all online gambling there is a risk. So for that reason, no refunds.

Lol smooth question.

inb4 no this method is 100% private

Amzo - May 10, 2013, 12:28 am

It's not public to my knowledge. I'll have a check just in case someone has thought of it before.

Alright, good. To clarify, it would be public if this method involved betting in doubling increments on odd/even or red/black to compensate for your previous loss.

Yeah, I googled and I found one video covering this, so it's actually is public. and here I thought I came up with a decent system. xD I'll make the book free since it is public.

JOW - May 10, 2013, 12:32 am

This method is public are you kidding?? It easy shit as well all you have to do is bet the same color if you win change colors the machine won't win more than 7 consecutive times. I highly doubt this is your own personal method. If so you should give out a vouch copy for a review.

Vegas - May 10, 2013, 12:34 am

Also, read before you post perhaps.

Thanks for being understanding OP. A LOT of people try to sell this method and only neglect that it's public when I ask. They are not long for this forum, whereas people like you may very well make it better.

I just updated the post. I didn't realize it was a public method. The book is free.

Sorry I fixed I am on my phone and it is hard to type. xD

Also I have this method so I know is not his.

Good I am glad you figured it out, I mean you can still give it away to those that want to know how to do it, also you should at least have \$50 or more to invest good luck!

Amzo - May 10, 2013, 12:40 am

I found out it is called the "Martingale" system, you can find more out about it googling.

I think he coined it, I was JUST trying to remember his name last week. There are a few variant ways to do it but they rely on the same double-compensative principle.

Amzo - May 10, 2013, 12:43 am

Here is a free website for you to try this method without using any of your own money.
