Alright thanks for info, also you shouldn't claim its 100% fud when drop usage isn't 100% runtime, its kind of lying to customers. ?

Actually, if the drop is executed in memory then it is undetected and runtime FUD.

Yes thus acting as a runtime crypter does, but we all know that isn't the case here in a vb.net stealer. (Source = Drop in temp and run from resources).

Not true. Some easy modification to the file structure can be made to Japabrz's RunPE or you could write your own using common headers.

i have the keylogger activated, but the email:

[-----Initialization failure.-----]:

[-----News and Auth Info-----]:

[-----Open File - Security Warning-----]:

[-----Start-----]:

[-----Logs by Razzle's Keylogger-----]

Than a picture here, perhaps it didnt work correctly. This is the only one from the keylogger ive gotten.

I did get another email though with all his firefox stuff, got his email, msn, etc. No CD keys though.

Ive had like 20 downloads and only one victim D:

Am i perhaps doing something wrong?

It was runescape and i got two of the guys accounts, one got locked and appeal is still pending and the other one he recovered and its impossible for me to get now.

If i buy this what e-mail service do you recommend i use? I have my own hosting so i could use that to get the logs but i'd like to know whats a good one. Also am i able to export via gmail/msn or something? I'd prefer using a php based stealer but this one seems good.

darshan1994 - April 4, 2010, 2:23 am

I would vouch for this because I brought it. Although I had some problem (my fault) the Razza guy helped me out. If I was in his place I would've blocked the questionner cause I was really kinda annoying, but sorry?

Legit and really good working stealer. According to my knowledge he will be releasing update soon so I suggest you buy ?

Ok, honestly stop trashing his thread. Your Keylogger is by no means godly enough for you to be criticizing anyone and everyone who trys their hand at making one. I am sure you wouldn't like him to go into your thread saying how you don't have a PHP logger, so they should all go buy his logger.

My stealer and thread were mentioned multiple times in this 1 so I can post in here all I want, and it really should be said that it isn't runtime FUD and dropping files but whatever.

Yes they have been mentioned for the most part by you. That still doesn't excuse you to come onto his thread and say that his logger is crap just because it uses drops. At nothing it would have been fine if you mentioned it once but you seem to daily come on here and for every positive comment post about how it uses drops and can never be FUD. There is competition and then there is completely trashing.

fail usb spread.

and its using 121k mem.

Razzle says:

is it now

SequenceInitiated/Win32.HIV says:

yes

hold on ill take a Screen shot.

So. Can i get a working stub, or do i have to file for a scam report.

You stopped sharing photos

Razzle says:

?

SequenceInitiated/Win32.HIV says:

You've essentially scammed me, by selling me a non-functioning stealer. Kinda like what Vaqxine did.

Razzle says:

how doesnt it function?

SequenceInitiated/Win32.HIV says:

A) USB Spread doesn't work

B) uses exceptional mem, which can lead to a crash.

C) no logs.

Razzle says:

what exactly

is the error

SequenceInitiated/Win32.HIV says:

i sent you a screenshot.

You stopped sharing photos

it occurs when your usb spread fails

hard

I'm assuming you're not using a hook, or a detection system

Razzle says:

yes i am

its just weird

no one else has complained about it

SequenceInitiated/Win32.HIV says:

because no one can see it.

Razzle says:

and how did you get to see it?

SequenceInitiated/Win32.HIV says:

i ran it on myself

considering i've heard alot of people saying your stealer doesn't work

and that you've scammed them

The only reason i bought it was because Yin is backing it up.

Yin being a friend i trust him.

Razzle says:

i havnt scammed anybody

give me a minute
ok u want a new stub?
SequenceInitiated/Win32.HIV says:
i want a working stealer.
Well?
Razzle says:
uploadinf
SequenceInitiated/Win32.HIV says:
I also noticed that you're giving everyone the same stub aswell.
Razzle says:
yes
ok
ive updated it
u can download it agan
SequenceInitiated/Win32.HIV says:
Still a fail.
Razzle says:
same error?
SequenceInitiated/Win32.HIV says:
Yes.
Although you have knocked down some mem usage.

if you knew how to code at all, instead of these stupid youtube and twitter bots that anyone that can read and copy and paste, then tweak a few things around... You'd know that its looking for a USB Device. And since the stealer uses usb spreading, and it doesn't work. AND it uses ~100k (He lowered it to around ~60k) Mem, it'll crash if not properly threaded.

thus. a broken stealer.
