Thread: [\[Entry\] DIY Hardware USB keylogger! !](#)

Deltathree - November 12, 2008, 4:43 am

My entry for the contest!!

Kind regards,

Delta!

kivi12k - November 12, 2008, 8:38 am

Wow , so easy to use. i wanna try it out. Where is the .rar file to download??

KZi Rodrigues - November 12, 2008, 8:44 am

Wow, awesome. The link for DownLoading the .rar folder isn't up here man. Can you please put it up ASAP.

Thanks,

KZi Rodrigues

lolipop - November 12, 2008, 11:46 am

nice nice .. but no link man .. pls post link :P

and thanks

Xentric QT - November 12, 2008, 6:02 pm

its in the detials in youtube

BitzDefender - November 13, 2008, 2:44 pm

Nice video, except I get some errors. A lot of keys don't show up, I'd rate this five star, but it seems you didn't spend so much time on this project, it can turn out great.

Xentric QT - November 13, 2008, 8:46 pm

omni same here =[

Deltathree - November 13, 2008, 10:14 pm

I have to agree on you guys.

It's been a project of mine a couple of months ago, and unfortunately i lost the source code, and it's nowhere to be found. Therefore it's a discontinued project.

I might, some day, try to get it back it up again, and work it out 'till perfection. Right now this is a premature release, but it works (atleast for my setup).

Thanks for the feedback.

joshv06 - November 14, 2008, 10:14 am

Wow hey you should try making the program compatible with U3 flash drives, so the key logger will run automatically.

Thanks

Flash7475 - November 16, 2008, 8:53 am

here is the link

<http://#.com/files/131736501/explorer.rar>

WhiteFlame - November 16, 2008, 8:58 am

2:25 and vista sucks. haha yh your right there man Nice tut

Deltathree - November 16, 2008, 6:07 pm

Thanks mate! x

und3rcore - November 17, 2008, 5:16 am

To delta3 man it works perfect but it doesnt save the passwords i tried it in my pc went and logged in a page it kept the username but the pass nope only letters

Deltathree - November 18, 2008, 4:51 am

Thanks mballack.

I might look into that.

Gpizzle - February 12, 2009, 7:20 pm

hmmmm u3 would be perfect

The Source - February 21, 2009, 11:09 am

Hopefully this can be fixed. Seems like something I would try.

Video: LMFAO

When he says: Lets try it out by typing the alphabet: abcdefgh Y I mean i jk..lol

H3LL - April 4, 2009, 9:58 pm

Hey guys, check out my keylogger too. I created this but i need some feedbacks.

<https://hackforums.net/showthread.php?tid=63538>

Check it out for me.

EllipsisVX - April 4, 2009, 10:33 pm

(Nov 14, 2008 11:14 AM)joshv06 Wrote: [\[CITE\]](#) Wow hey you should try making the program compatible with U3 flash drives, so the key logger will run automatically.

Thanks

Precisely what i was going to suggest. Then as soon as you plug it in it runs like a cd. I read about a good project called something like U3 Switchblade which basically you put on a U3 compatible USB stick and it would run password grabbers, copy files, install keyloggers, etc. and then you could just unplug it a few seconds later after it was done everything and be on your way. Idk if i got the name right but it was real interesting stuff. I'll have to try to dig it up on google.

Elit3Hacker10 - April 4, 2009, 11:03 pm

I downloaded this awhile ago and it's kinda bad it doesn't even copy the letters correctly. No offense

zerovalue0 - June 8, 2009, 12:43 pm

problem is it dosnt record alot though its ok his youtube video made me join hf

girlsaregrey - June 17, 2009, 4:58 am

Heya, I downloaded the keylogger and it works great except that when you go to the notepad, its all in code so for example if i type in Notepad 1234 it comes up with 2

Does that mean that I have to find a program to decrypt whats coming up on the notepad coz i watched the tutorial and its not the same as what comes up on mine :S, dont suppose someone could help please? :S

hawk - June 21, 2009, 1:30 pm

really nice tutorial...

CyborgMutant - June 27, 2009, 10:39 pm

<http://www.youtube.com/watch?v=agXdODbMWms> is the link.. i dont understand it verywell.. it works but the words are jumbled and mixed up..

ucntt0uchdis - July 29, 2009, 11:59 pm

really nice, im going to have to try it

Blisskid - July 31, 2009, 12:43 am

<http://#.com/files/165754197/explorer.rar>

is the link to the files he is talking about

r00t0x18 - July 31, 2009, 2:02 pm

That's sweet! Will have to give it a try sometime.

`Scar - July 31, 2009, 8:07 pm

looks pretty good, logger seems to miss some keystrokes like spaces or single letters.

Spagnum - August 15, 2009, 7:35 am

yeah... it ain't all the letters it picks up on...

ogoidasuos - November 2, 2009, 1:40 pm

works perfect

can you modify the file so that notpad create a different name when there is already file with "test"????

please

my email: diogojpsousa@gmail.com

thanks

MOSH! - November 2, 2009, 1:44 pm

I already tied it + i contacted the person who made the video and he said that it was an unfinished work and only workd at some compUters

supapig - December 30, 2009, 4:44 pm

download full winrar dude :D

napst3r.one - February 15, 2011, 10:35 am

I missed that Clip ! Can you post that again ? Seems that was something Precious for me..

Thanks in Advance

?

mcdonalds - July 2, 2011, 6:55 pm

Bump. Anyone have this vid?

offsecstudent - January 30, 2013, 10:24 pm

Please reupload the video, I'm interested in seeing it. Hardware keyloggers are fucking sweet.

lzzskillszzi - August 4, 2014, 6:29 am

Cool man nice key logger!!!!!! :d GREAT

5416339 - August 26, 2014, 10:09 am

Could you please re-upload it? It seems to have been removed.

skalp - January 13, 2015, 1:12 pm

Good work useful tutorial, thanks man

Mahfuz10 - July 25, 2016, 9:06 pm

The video doesnt exist.....

lakyet1984 - August 20, 2016, 8:04 pm

nice video .. keep it up bro
