Thread: [Onyx's Free Designs](#)

Onyx - May 11, 2013, 11:15 am

I've been out of making signatures, avatars and so on for about a year now and wishing to get back into it after just finishing my graphic design and 3D college courses

So in other words your requests are just aiding me in improving whilst give you a piece of work at the same time, in addition

there is a certain requirement as I'm not going to spend time making a piece for a user with 10 posts who joined today and may likely not come back, sorry.

Require of atleast one the following:50 posts or more

Joined date greater than one week

Greater than or equal to 0 reputation

If you meet one or more of the requirements complete this format

Note: If my thread is locked, don't send me messages. It just means I have a sum of work to complete and closed the thread in order to catch up before taking more requests. Thank you.

Anything extra to add: I'm hoping it's possible for you to just add the text '4x4' to my current avatar which I've provided an img link for and make it animated :). Details are unimportant as long as it looks sleek and readable. Either that, or just a bad ass looking 4x4 truck with my username on it and animated.

Thanks a ton for doing this.
