Thread: [Wait for guys to message you? Or message them yourself?](#)

When your a member on a social network,

Do you wait for guys to message you, or do you get impatient and decide to message guys yourself to get things flowing?

You have the vagina on social networks. Guys think with their penises. They will come to you, and you have to do is wait for them.

I tend to wait for them, they all come flocking to you within 5 minutes anyway. It really just depends on what website you use.

I usually give them some time, and if they don't message me I message them.

This.

I usually don't have to wait long at all for people to start messaging me. Worst case, I start spamming friend requests to guys :D

Never message them.

It shows you are the one in desperation instead of them.
