Thread: [Free Basic C++ Skype Resolver/Skype Grabber Source :: Make You Own C++ Skype Resolver](#)

SilentK - May 14, 2013, 2:04 am

Contact me for the download!

I created a basic C++ Skype resolver/grabber I included the source so you can create your own skype resolver for who ever! I have created a read me to tell you how to add your own API link to the source code.

I removed the API because it was only use for testing and wasn't mine.

Virus scan:

<https://www.virustotal.com/en/file/b24a731d82d89c112b203594845046b4fdd08381a96348a19aa3de2cc670e2e5/analysis/1368522004/>

I coded it in Visual C++ 2008.

.Coder. - May 14, 2013, 2:19 am

Looks nice and simple. All though I already have one, well done.

XxlamTheSpookxX - May 14, 2013, 2:43 am

Hey sorry i guess you have to have 10 posts to PM a user...if you see this could you message me the link/dl? Thanks appreciate it :)

SilentK - May 14, 2013, 6:33 am

I am still giving out this skype resolver source code just message me if you are interested.

Phoeni? - May 14, 2013, 6:34 am

Vouch for silentK he gave me the source, will be testing it after a while.

SilentK - May 14, 2013, 9:30 am

still up for download just send me a message for the download link.

?Ultimo - May 14, 2013, 10:43 am

If you removed the API, how will the resolver even work?

d4fuq - May 14, 2013, 1:36 pm

Looks nice, pm me please. Thanks fuck that 35 letters lmao

.Coder. - May 14, 2013, 2:29 pm

Would love the code please, not 10 posts, could you be able to PM me a paste-bin?

iDKiDC - May 14, 2013, 2:40 pm

Looks like a very promising program:)

SilentK - May 14, 2013, 8:52 pm

Just pm if you want the download link to the source code.

Theistic - May 14, 2013, 9:22 pm

Could i get this? Thanks in advance.

bassamix14 - May 14, 2013, 11:58 pm

Could i get this? Thanks in advance.

Helped - May 15, 2013, 7:26 am

Could you send me this please? Thanks in advance.

kirakiller1 - May 15, 2013, 10:21 am

this tool looks nice but aren't there already a bunch of sites WITH api's that can get you the same result? the only difference i could think of is 1 is sent out via (your pc ip) and the other is being used by the site..thus allowing maximum privacy, but of course you could always proxy. good job, thanks for the share and time you put into it.

Celeron - May 15, 2013, 2:26 pm

I'm sorry, but why bother? I'm not sure why everyone is releasing their 'version' of a Skype resolver which is no different than all the other ones and most likely uses the same free API, this is flooding this section and you people should seriously chill. One or two is good enough, but now it's every other day someone is releasing a Skype resolver they made with 1 little function, it's not even looked at as contributing anymore, you guys should just stop.

Yes I realized that but I haven't found one that was in C++ that is why I created this one.

Does this work now? Whenever I use web-based resolvers it gives me MS's Ip...

SilentK - May 5, 2014, 11:16 pm

The download is in the first post ill be updating this soon enough when I get some time.

I hope you all have learned something from my code.

savaging - May 6, 2014, 2:29 am

looks very nice dude i will test it out soon ?

Jono - May 6, 2014, 3:13 am

Looks good. Thanks for the source :)

SilentK - May 16, 2014, 10:37 pm

Glad to see everyone is using my program and finding the source is helpful. Remember that the download link is in the main post.

Nichole - May 20, 2014, 10:32 am

(May 15, 2013 03:10 PM)SilentK Wrote: [\[CITE\]](#) Yes I realized that but I haven't found one that was in

C++ that is why I created this one.

?I'm surprised no one has told you that your code is not in C++. It's .NET.

You're using a managed framework which relies on the .NET libraries. I'm assuming you've never seen actual C/C++ code making GET and POST requests with sockets, so you're assuming your code is C++.

Read about Managed C++ or C++.NET when you get a chance.

tedrocker - May 21, 2014, 6:06 pm

Looks very nice and looks to be very promising from my use.
