Thread: [\[Looking for\] Someone to teach me how to hack WEP/WPA2 \(TeamViewer\)](#)

Zazaza69 - May 14, 2013, 9:08 am

If you are able to teach me (using teamviewer) how to hack a wifi WEP/WPA2. I will pay you.

Waiting for your offer?

serkoulik - May 14, 2013, 9:57 am

Look here: <https://hackforums.net/showthread.php?tid=2391597>
<https://hackforums.net/showthread.php?tid=3476622>

Why would you like to pay since you can learn on your own in a few hours having the right tools (backtrack, wpa wordlist, wifi adaptor).

yacked2 - May 14, 2013, 10:37 am

You can learn how to hack Wifi by yourself. It's not so hard.

Buy:

- router with Wifi
- Wifi USB adapter

then install VMware and BT5, and try to hack your own router at first

Ankush - May 15, 2013, 12:05 am

Ya u can learn it by yourself for free but I can teach if u want...PM me

TheGrayAviator - May 15, 2013, 12:24 am

Ok if you are willing to pay, buy yourself a copy of this book.

<http://www.amazon.com/BackTrack-Wireless-Penetration-Testing-Beginners/dp/1849515581>

This book taught me a lot, and I recommend it to you.

IA very nice book in deed, I highly recommend it.

Zazaza69 - May 15, 2013, 7:41 am

Thanks for your answers.

I have a wifi usb, but the problem is when I put "aimon-ng", I have that:

You know, sometimes you have to spend, if you want to learn something.

TheCyb3rAlpha - May 15, 2013, 8:24 pm

if you want to learn wireless hacking and security and if you are not willing to read any books (boring) then i would recommend you to learn from the "Wireless Videos Mega Primer Series" by Vivek Ramachandran on <http://www.securitytube.net>

He's the same guy who is the author of that book greyhat mentioned earlier :)

Its a really AWESOME series :D

I learned alot from it !

Good Luck

mtaneja2 - May 16, 2013, 10:25 am

i will explain you how to hack wifi password(WEP/WPA) using teamviewer.i hacked all the neighbours wifi pswd ,around me and i can changed their wifi pasword also.tell me how much you pay for thiis...

Zazaza69 - May 21, 2013, 10:46 am

I did the install of my Alfa AWUS036NHR. It is working. But Baktrack doesn't detect it.

When I put "airmon-ng": nothing

Do you know how to solve this problem?

Actually type ifconfig and post screeny here.

PinkPanther - May 21, 2013, 12:09 pm

You misspelled it. It's "ifconfig", for interface configuration.

leewilburn90 - May 22, 2013, 8:01 am

the info you require is free but if you still wish to pay for extra special help then pm me i am available anytime.

loco1 - May 22, 2013, 11:19 pm

I also got this problem:

I have a wifi usb, but the problem is when I put "aimon-ng", I have that:
<http://imageshack.us/photo/my-images/266...track.jpg/>

any help

thanks

any help

thanks

link dont work just tell me what it says

OnlineSpartan - May 23, 2013, 8:16 am

I believe the ifconfig readout he provided was missing a wireless interface.

loco1 - May 23, 2013, 9:48 pm

sorry here is the image <http://imageshack.us/photo/my-images/266/capturebacktrack.jpg/>

i dont have the Alfa AWUS036NHR adapter mentioned .

but i have another brand.

thanks

cryptoarmy - September 6, 2022, 5:04 am

thanks for your help bro helps a lot
