Yea some of us do. Make sure you review whoever you plan on paying or hiring to do a job for you. alot of people on this forum are under 18 and know fucking nothing about hacking. good luck.

I don't understand your question. If you have a site and want to setup an exploit kit on it, what's stopping you?

I dont have an exploit kit. I also dont have a botnet source or miner bin

Make posts with your adf.ly link or something similar?

While doing that you could blackmail the owner into giving you money for his site back.

I can help you with that. I got a botnet and a miner. How about a share of 40/60? 60 for you, and 40 for me?

IMachavelli - May 18, 2013, 7:18 pm

I would assume [due to your questions] that you don't really have experience in ratting/botnet, so I recommend that you start with darkcomet, JDB , your traffic and go from there.

FinnTheHuman - May 18, 2013, 7:31 pm

Im a noob, lets just get that straight first. But I would try to threaten to dump the database if he doesnt give you money.
