Vouch For my Buddy,
and It will also support my Crypter.

aSmoo - May 18, 2013, 5:21 am

This looks very nice.

Can you add proxy support? I mean...so I can use a proxy server to avoid getting banned.

If you add this I am going to buy it 100%

Anyway good luck with sales.

Ixaris - May 18, 2013, 5:23 am

Looks good. Good luck with sales man.

kalandershihabrocker - May 18, 2013, 5:23 am

Guys, Want a really really good miner . Then buy this one .

eefieboy12 - May 21, 2013, 2:21 pm

is it fud ? if it uses ufasoft how can it be fud? than it would be the same as silent miner

David Tennant - May 21, 2013, 3:17 pm

This looks pretty nifty. If it wasn't so expensive I'd buy it for sure! GLWS

Arkelnd??! - May 21, 2013, 3:38 pm

Our miner is very special . Other miners are dropping file to the hdd or downloading file and extract them but our miner doesnt do this . Our miner will run fully in memory without drop or download .

You just have to crypt the main executable .

It is a builder not a stub and its not expensive .

anonanon2 - May 21, 2013, 3:53 pm

When i build a miner it appears to ask for admin permissions (Windows UAC), what option needs that? i dont want it to do that as i want it silent

... here it comes... <insert Envy Protector plug here> ... haha ;)

(if you can give me a decent deal for both I'll think about it)

Arkelnd??! - May 22, 2013, 9:23 am

You can buy yourself a crypter we are not going to add a crypter function to it . And no you cannot miner LTC with GPU currently since Ufasoft isnt supporting currently .

Thank you very much, I am happy with my purchase.

Guys, if you have enough slaves, I advise you to buy this miner. It is in very profitable investment. I make profit in 2 days.

What I like in this miner

- 1) Lifetime License for 17 USD.
- 2) GPU work very well.

3) (This is what I prefer) The builder build one single file and it is this file who inject the miner, no other file drop, then you can crypte this file add your startup, bind, refud... You do what you want from this file and it is only this file that will install.

Definitely the best miner I've tested.

You cannot read the thread ? You have to use the debug mode first to check your settings after that you can test it somewhere .

GPU Intensity must NOT be more than 8 ([-10] - [+10]) .

It is probably your pool that isnt update the stats .

Vouch For This Envy Product! ?

I just bought this miner this morning and begone to test it.

The auto buy is simple and fast, I love it.

The owner always replies fast that's a plus.

Miner is fast and does what it promises.

Works great with Envy Protector(as it should lol).

Easy to setup and start and has great speeds.

Ran this on 1 slave that I know has a GPU and I'm getting a speed of 62mh/s using settings, Stratum

CPU Threads: 1

GPU Intensity: 1

GPU Max Temp: 50C

Edit: Now at 67mh/s on 1 slave

You can still optimize it because UfaMiner will disable cpu mining if there is also a gpu but you can

add a new miner (Right click on the tab) and only enable cpu mining for it . So you can reach more power with a new cpu miner . ?

Haha, this is pretty hard to understand!

Maybe try rephrasing into easier english :)

But from what I gather, you are trying to use your IP address in the settings? That is unneeded - just use the pool hot provided on their site, and the port provided on their site.

I mean like mouse movement reader. If mouse moves miner closes, then it has a timer to re-open itself again if mouse movement isnt detected to mine.
Its prolly the only thing missing atm.

Fantastic - I may be buying in a second

Arkelnd??I - May 29, 2013, 11:39 am

Updated the main post .

We accepting now Bitcoin and Litecoin .

Added a new entry in our mini changelog list .

CyNecx - May 29, 2013, 12:17 pm

I will be back on the weekend so sorry I am not able to give support currently please pm Arkeindel .

Arkelnd??I - May 29, 2013, 12:53 pm

Accepting PP, BTC and LTC . Give it a try :D

CyNecx - May 29, 2013, 1:46 pm

I will be back guys . DO NOT PM ME I AM NOT GOING TO RESPONSE YOUR QUESTIONS .

Arkelnd??I - May 29, 2013, 2:12 pm

Yes Guys this Miner is Slient .

The debug mode is for testing the current setting so you know if your settings are correct .

To Spread it whatever you are doing you should disable this mode .

CyNecx - May 29, 2013, 2:56 pm

I decided to add the idle system feature to it in the next update be prepared ;)

NZT - May 29, 2013, 2:57 pm

You two have been ing this all night haha, i look forward to getting it

avanda1121 - May 30, 2013, 1:51 am

Arkelnd??I i need help,please check inbox...

DI?E - May 30, 2013, 9:13 am

Whats the detection rates at runtime? All miners on here have high detections.

Arkelnd??I - May 30, 2013, 11:41 am

I disable the checksum feature so it will not bann you license anymore . I forgot to add the current checksums so it will tell you that you modified the assembly .

Its disabled for now .

It have probably no runtime detections because it will download nothing and also drops nothing to your hdd . Everything will be in your ram .

Our only have scantime detections but you can crypt it .

Arkelnd??! - May 30, 2013, 12:42 pm

Only accepting legit trusted paypal Accounts . Still selling this . Enjoy

DI?E - May 30, 2013, 12:58 pm

Probably no detections? Have you scanned it today? I will purchase as soon as I get some solid answers.

There is already a scan in this thread . Just go through the pages .

LISTEN, THIS MINER IS RUNTIME FUD NOT SCANTIME FUD .

if enable cpu mining is not checked does this mean it will not use it at all?
can cpu mining be throttled to say 20% in anyway?

If the miner is detecting a compatible gpu it will mine only with the gpu so you have to add a new miner to the bin that is only mining cpu .

You can only customize the threads count .

Oh I am patience ;)

Can't wait to see the total hash rate I can get with this.

Also he should have a feature to idle mine but when user is on the computer it then will only mine like 20-30% till user is idle again then switch back to 100% ?

juggalobeast - June 3, 2013, 1:41 pm

what is the detection rate for this miner?

it drops and downloads NO files at all right? so if you crypt it not just the bin will be undetected, but the whole miner?

slowhand - June 3, 2013, 2:53 pm

Can this be used with a .net crypter like sheikh crypter? (I know obviously it works with the seller's crypter but I already paid for sheikh.) If so, I'll be purchasing as soon as the idle time feature is implemented.

If you crypt this it will be fully undetect . Runtime also Scantime .

There is not a miner source that implmented all the diffrent gpu types/versions drivers, there are gpu ltc miners but no out-the-box universal solution.
