I have been creating the blog about hacking for about 3 months and have put a lot of hard work into the site. I only thing missing is a audience for all hard work and research I've done.

FeaturesAlmost every post is accompanied with a related a picture and fact.

There is "tech definition" section on my site that contain every term I've defined by hand on my site.

Well organized content; "or at-least I try..."

Website Production

Of when creating a my blog a I used Word Press as my CMS.

I used the Bandana theme which I have customized quite a lot but I think I made a bad decisions on my theme choice because the Bandana theme does not have the responsive sizing for mobile devices.

Bandana theme for Comparison to see my customizations: <http://wp-themes.com/bandana/>

Thank you for all that took the time to look at my site.?

It looks really good. By any chance, are you looking for writers to produce more content for the site?
I'd be really interested in helping.
