Thread: [:: Providing One Time Free FUD Crypts For Newbies ::](#)

Primera Espada - May 18, 2013, 2:37 pm

Hello , I'm offering my 1st service in this section;

My first Thread was deleted for no reason due to crypter owner. He thinks this will bring his crypter sales down. I didn't find his argument valid. Like I said this is only a One time free crypt.

I'm offering to crypt your server with a .NET dependent crypter and the output will be FUD , Scan it only on [elementscanner.net](#) and test run it on sandboxie or VM . If you want you can watch the whole process using TeamViewer or skype screen share.

Extra options I can add are:

- = Startup
- = Icon
- = Compress
- = Execution delay

SUPPORTS:

- = DarkComet
- = BlackShades
- = Cybergate
- = SpyNet
- = Insomnia
- = XtremeRAT
- = Ceraberus
- = xDoser
