Thread: [hard SQLI on bangladesh gov site ~ Joomla](#)

n31ght0 - May 19, 2013, 4:21 am

false condition:

Code http://www.moind.gov.bd/index.php?option=com_easyfaq&task=view&id=1&Itemid=1
other than task=view is always give a true condition.

ex:

Code http://www.moind.gov.bd/index.php?option=com_easyfaq&task=show&id=1&Itemid=1
how to solve??

Lol ... trying to hack a .gov, when you don't even know sql injection, let alone forensics.
I doubt anyone will give you help, its just a stupid idea...

i dont want to hack it i just want to know how the injection work.

i only have this sample of case if you have non gov site that has similar case like me post here then i will change the link to non gov site.

just want to learn how it goes if you facing case like this
