Thread: [\[??\]\[DEFACE DESIGNS:\]? _ Text Shadowing Deface Page _ \[/PLZ RATE\]???](#)

mObile - May 19, 2013, 12:22 pm

I don't deface much anymore but I still enjoy making them. Here's a cool modified design using text shadowing.

Description:

>Gives off a cool flashlight effect as you move your mouse around the page.

>Right-Click Disable

>Cursor

>Audio

Not bad man. Unique and stylish. 8/10, if you insert some music it will be epic.

Revoke - May 19, 2013, 12:25 pm

Looks nice, I would edit the text to maybe a better font and the white text in 3D would look cool.
Good work 7/10

AnonRobot - October 13, 2014, 1:54 am

I fucking love it. it is very well done but in my opinion i think the hacked by should be in the front and mobile_x should be in the back. it just adds a whole lot more meaning. :D

H4YW1RE - October 13, 2014, 1:24 pm

I actually think it's brilliant and would give it 10/10 for design. Yes, this post is old and Im digging it up, yes my vote probably doesn't count for shit given my number of previous posts! Long time lurker - finally found my voice.

Cheers!

hackpax - January 2, 2015, 5:28 pm

cool deface style, i kinda want to learn this whole defacing thing. even looking for a tutor for pay, send me ur skype in a PM if ur intressted in teaching me.

Lexica - January 2, 2015, 8:29 pm

It's old but OP is still around, and online so hopefully they will see this. I noticed you blocked right clicking the page is that to block them from inspecting element or viewing the source? If so you should really block them from using ctrl+u as well, many defaces lack that but I find it's useful.

sonzenbi - January 4, 2015, 5:37 am

Great effects ^.^

Thanks for sharing !

RobertoCopenhagen - January 4, 2015, 5:45 am

Is there anyone who could be fresh at any hacker work?

As can figure out how to hack into websites and the like.

We can make the box together. Many thousands of euros. Has idea and abilities to it.

Missing just a hacker.
