Thread: [Setup working java drive by + Darkcomet](#)

Forthedevil - May 19, 2013, 3:26 pm

Hello.

Could someone setup a working FUD java drive by and darkcomet and make the server FUD to me. - And make that whole thing work.

In exchange i'll give you adfly account with 12\$ cash and hosting with domain maxfortum.com (It's bought for a year)

Good enough? Add me in skype. ? "Decapchas"

nitoh - May 19, 2013, 4:34 pm

Shoot me a pm with your info ill do this for free

?Noah - May 19, 2013, 4:35 pm

Sorry if I sound like a noob but does this mean you can run dark comet on your Mac?

Java drive by means: when you visit a site with a java drive by you will be prompted to download something if you like or not
