Most of us, get really frustrated when people ask the same questions over and over with out doing the research. It is ok if you are in a hurry, but if you can type one word in and get 10 billoin correct answers why not do that. it is much easier. Anyone with me on this. We don't mind helping its just that there is an easier way. And it saves time

Totally Agree, Its much faster then waiting for replies, saves time and usually gives you allot more information, But still asking for opinions thats always good.

By posting threads like "Crack MSN Passwords" I think there is allot of them threads and there doesn't need to be heaps not hard to search.

4mattc i agree with u very much.

iXy - December 27, 2007, 8:14 am

Very nice point of view.

i agree to 100% and the most people are the people who are new and this wasn't around much before but since many new people have started to come on this forum lately there are a lot of questions.

thank yall and you know what is funny most people won't read it because, it doesn't say how to steal myspace passwords, or msn or what ever that is the true irony

Don't bother me one tenth of a percent.

But, then again it's hard to get on my nerves.

Yeah, I also understand most stumble in here with a problem already in mind and see a forum with big purple and gray letters saying HACK FORUM and jump to the offer without exploring first.

I mean I did.
