Need a Team Speak 3 Admin hack to have all permissions to all team speak 3 servers. Please tell me what I don't know Thanks

Not sure that's possible because TS uses a very long privilege key and everything is server side. You would need the key in order to have full admin access.

Its possible but not like that....

Frist you need the Server Owner His ID And IP Or a admins And replace yours with that ID and ip... After that you kinda stolen his Admin in thoery...

That's one way another way is,
You get Telenet tools (its in windows self)
Connect to that Ts3 "By typin down the Ts3 IP and Port", (Telenet is like a webpanel)
You Use a brutfroce to crack the password the Ts3 server uses and then after you got in you give your Ts3 ID Server query and..
Now yea.. you got server admin that noo one can take away only poeple that own the server...
And you can remove theyres And nothing is able to fix that cause you have acces to the main server...

Those two are the easiest ways you can do...

(THARE ARE NO SUCH HACKIN TOOLS YOU HAVE TO DO THIS ALL YOUR SELF GOOD LUCK)

EDIT:

OOo And with Replace your IP with theyres I mean Thare is ID/IP Storage on your Ts3 You Change that one not Your Real IP.
