Thread: [Just Installed Win 7](#)

Linxy - May 24, 2013, 3:22 pm

It was a long install...

First when I uninstalled my old OS and then installed Win 7 it wouldn't install because my old drive was corrupted. I spent about 3 hours trying to find a spare Hard Drive and right now I'm using a 80 GB Hard Drive, which I will switch to a new one soon. Anyways I love the switch from Vista to Win7 ?

I'm thinking about switching from Win7 to Win8, is there any massive different that I'd come across?

Is it even worth it?

I was thinking to do the same, I heard 8 isn't good :/ but then again I'd like to try it out.

From every source I've heard, Windows 8 is complete crap.

Breakbeat Junkie - May 24, 2013, 3:36 pm

Get rid of w7 imo, w8 is the shizzle nowadays!

DaStyle - May 24, 2013, 3:37 pm

I am now literally so confused from the last 2 posts.

I love Windows 8. Don't listen to anyone else. There are just a bunch of new things that you need to get used to.

I still have Vista. I'm gonna buy Windows 7 soon. Congratulations on finally getting it.

scsiwindows - May 24, 2013, 8:48 pm

Vista is horrible, Windows 7 for the win :)

Enjoy your upgrade! I switched from vista to 7 also and am loving it. I actually bought a new computer, but it took quite a bit of looking to find a nice one that didn't have 8. Now I don't have to go into the registry to fix the fucking tray icons every other few days anymore lol
