Can it boot people?

Out of games?

imAcarrot - April 4, 2010, 12:35 pm

Very nice work GameOver*!

icebabe117 - April 4, 2010, 12:52 pm

These are 2 problems.

- 1) No virus scan.
- 2) This site is filled with weak UDP flooders like these.

Why the hell it should be a problem
look at his posts + rep

He wont do any scam shit

-mothered- - April 4, 2010, 5:58 pm

Very nice mate. Simplistic, yet an appealing GUI.
Great share Indeed :)

Do you honestly think someone wont scam because they have rep and a high post count?
Maybe I have 5000 post count and 500 rep then scam half the site, who are you gonna believe? Me
with 5k posts and 500 rep or some other kids with no rep and low post count?

is there any way to find ip and port of victum pc...?

3 olaH - April 5, 2010, 2:06 pm

thanks for the share! pretty cool and simple flooder, has a snazzy gui too.?

(Apr 5, 2010 01:36 PM)StranGer Wrote: [\[CITE\]](#) is there any way to find ip and port of victum pc...?

yes. you use packet sniffing software like cain and abel, commview, wireshark etc. these can be obtained through this site or searching on your own. also, there are tutorials on how to use these on the site, just use the search function. good luck?

I downloaded it did not work so i wouldnd't download this.

golden112 - April 17, 2010, 7:25 am

<https://hackforums.net/showthread.php?tid=371468> Ultra Box Public Dos Shell Tool connects to 10 shells sends commands to dos a ip has seconds and works alot better than this will eat up you're cpu.

101 - April 17, 2010, 7:27 am

Is this powerful enough to DDoS somebody nearly instantly? Like all i need is an ip?

BTW what port to use?

golden112 - April 17, 2010, 7:29 am

no this program would'nt proberly take down anything depends what cpu/computer base/specs you have because it just uses you're computers resources

Go here <https://hackforums.net/showthread.php?tid=354009> I made a tut.

BroKas - April 20, 2010, 12:01 pm

Dude when i open it

It says UDP Flooder by GameOver.exe stop working and it dont open

imAcarrot - April 21, 2010, 3:53 am

You must have the other file to the same folder not just the .exe

yasın45 - April 21, 2010, 3:56 am

thank you man :) :P.

Dr:):zY - May 9, 2010, 8:26 pm

Dude this is awesome great job do you hav XBL

-mothered- - May 20, 2010, 5:22 am

Okay, I can confirm that I've tested this and It's functionality and stability Is of good nature. I haven't analytically delved Into It, but from what I gathered, It's not too bad.

Now for those who're running an x64 o/s, this Isn't compatible. I've executed It on my Windows 7 64 Bit, but to no avail.

Cheers :)

well this is a bit late but if you had sandboxie that wouldn't of happened, and I scanned with 6 scanners, and my little program and no virus or back door found, he is either really, REALLY good at hideing it, or it is virus clean, either way good work, i tested on a friends diablo 2 game and worked like a charm ;)

friendstersucks - June 6, 2010, 11:22 am

can you please release a lite version of this one? i get an error mainly because of the skinrafter. thanks.

vampirictorch - June 7, 2010, 12:50 pm

yeah a friend of mine that i let test it runs same type of windows as me Win7 and he can't use this, he for some reason gets an error on it, but it works perfect for me, you could try backwards comparability but i highly doubt that would work just throwing it out there friendstersucks :P

You'll need a strong Internet connection to use this. And I suggest you if you use this to do it with your friends. I mean all of you to flood an IP at same time.

I like the GUI, thanks for sharing. :)
