Thread: [Good provider for Minecraft Servers](#)

Xbox Live - May 26, 2013, 3:18 pm

Hello,

I am looking for a good dedicated server provider to host multiple minecraft servers with. Does anyone have any ideas? Price range \$100-\$200. ?

Thank You.

Check out Verygames.net for minecraft servers :P plus they're fast at delivering.

I use PytoHost, can find on HF. Iv never had any issues. Have you not thought of maybe getting your own VPS instead?

Checkout VenomServers we provide Dedicated servers with DDOS Protection and you can order extra DDoS Protection with a custom purchase which would cost less and be better if you have a dedicated server with us already :)

aswell as giving us the privilege to send our own firewalls and loadbalancers, etc.
