I did this smudge.

The first two were done with a stock hard brush, and believe it or not, the last one is NOT a smudge. <3 Thanks guys, I'm glad you like it. c:

Did you use liquify?
Looks a bit monotone.

Yea, I did. I saw some people do amazing things with it, so I wanted to give it a shot. It's the same colors from the render, I just wanted to warm them up a bit, to fit the lighting I had in mind. The original render was so white and bright, so I had to fix that,
