Looks good now it will be detected soon because you scanned in the wrong place.
Google owns that site now.

Really? Theres still a do not distribute so i dont see why there would be a problem? Also where can i find reference of this apparent acquisition?

Edit: Wow just found <http://chk4me.com/> and it works great! Doesn't distribute either. :3
If stub gets detected because of NoVirusThanks ill just update it then rescan there. ^^
