thx ! (:

The payout of \$7 per 1,000 views is pretty unrealistic. I would say it is fake.

They do pay but not the full earnings, I made over 3k in one month and they sent me only 2200. I haven't received the rest and its been over two months.

Also you will make more if you use Matomy Market instead, That is what lnx uses for earnings. I made 1300 in two days with them and they pay your earnings in full, but I would only use them if you have real traffic.

Sandikaaa - June 3, 2013, 3:05 am

there is no payout option, make sure the paypal email on your account is the correct email and it will auto payout of the first sunday of the month

Sandikaaa - June 6, 2013, 9:46 am

Thanks it seems i need to wait to next mounth :s it sucks :D

Silver Fang - July 1, 2013, 4:45 am

They don't pay you, it's a scam site... those who says they pay is lying. Show prof or stfu.

bbowser - August 21, 2013, 8:33 pm

The only reason you wouldn't get a payment is if you use proxies or bots. I said they didn't pay the full amount but they did send me a substantial amount of payments. I bet you don't even make money online so you stfu. Before you say that the payment is from April and shit that is because I stopped sending traffic because they spread malware.

They don't pay out. I've had \$45 in my account for months. They haven't even got a 'request payout'. I also emailed them months ago - no response.

Do not use.

ankitkhosya - August 22, 2013, 7:08 am
