Thread: [504 Gateway Timeout error](#)

Websync - May 29, 2013, 12:25 pm

The forum is running very slowly for me and occasionally I receive this error and have to refresh a few times for it to dissapear.

Spoiler ([Click to View](#))

Is this a problem on my part? I'm the only one experiencing the error?
The forum is also running very slow for me, +/- 6 sec to load a page.

SoulZeh - May 29, 2013, 12:29 pm

I've had this before, you just have to be patient and refresh in a couple minutes.

ViN - May 29, 2013, 12:31 pm

Haven't had this for some time but it eventually goes away if you refresh.
You can always try clearing your browsing data/DNS flush to see if that helps at all.

Rage™ - May 29, 2013, 12:59 pm

See if refreshing a few times helps when you get this. Just waiting a few minutes seems to be the best fix though.

Vazity - May 29, 2013, 1:02 pm

This usually dissapears after a few refreshes though you could try to clean your cache, that will in most cases fix it. That was atleast what worked for me.

Here is a bit of stuff to read regarding 504 Gateway Timeout Error:
