Thread: [Great idea for lowering scams.](#)

Well I don't want this to be a long thread but I suggest that people be able to load up money onto their HF account, which can be used in a transfer that is monitored by an on-site admin, or something else.

This would take down scam numbers by substantial amounts.

This would take an insane amount of coding.

Besides HF WILL NEVER get involved in the use of the Marketplace. Great idea, but it just won't happen.

It's a decent idea, but I don't see this ever happening.

Sorry OP, this won't happen. :(

I thank you for the feedback :) I am not closed minded.

That really sounds like a horrible idea. Having people upload money to a forum to do transfers, no one would want to do something like that, not to mention a thrown together payment transfer system on a hackers website sounds like a recipe for disaster.

I already asked about something like this (more advanced) but it won't happen.

You're responsible for your own deals on HF. HF aren't and won't get involved. Simple as that.

HF as an entity will not get involved in any deals between members. You take enough of a risk dealing with people you've never met before just by dealing here at all.
