Thread: [Importing NetBeans IDE projects too Eclipse IDE](#)

mikebail - May 30, 2013, 6:35 pm

Hey guys, I started working on a game a couple days ago and as I have been doing more work with pixels I see my hate for netbeans. So I would like to bring my NetBeans project over to Eclipse.

Please help

Regards,
Mikebail ?

Taru - May 30, 2013, 6:37 pm

I'd try to make a new project, navigate to the workspace, and move the source folders from netbeans into the new eclipse project source folder? May work, may not. Good luck.

mikebail - May 30, 2013, 6:39 pm

ok thanks I will try this
Mikebail ?

It did not work :(Thank you for the suggestion though!

Possibly some one else can enlighten me with some insight.

Mikebail ?

Did you refresh Eclipse after adding the source in?

mikebail - May 30, 2013, 6:54 pm

Hey guys thanks for the input, I found a 100% tutorial of how to do this [here](#).

I will post it here so it will be archived

Code PART I - NETBEANS

- 1) Open NetBeans.
- 2) Create a java project named "ToEclipse".
- 3) Build this project.

Then, NetBeans has created several folders. The important folders to us are (in my computer):

- a) "c:\User\Almir\NetBeans\ToEclipse\dist"
- b) "c:\User\Almir\NetBeans\ToEclipse\src"

PART II - ECLIPSE

- 1) Go to Eclipse.
- 2) Create a java project in Eclipse named "ToEclipse".

Then, Eclipse has created several folders. The important folders to us are (in my computer):

- a) "c:\Users\Almir\Eclipse\ToEclipse\bin"
- b) "c:\Users\Almir\Eclipse\ToEclipse\src"

PART III - WINDOWS EXPLORER

- 1) Go to Windows Explorer.
- 2) Copy the FILE "ToEclipse.jar" at "c:\Users\Almir\Eclipse\ToEclipse\bin" folder.
- 3) Past it in "c:\Users\Almir\Eclipse\ToEclipse\bin"
- 4) Copy the FOLDER "toeclipse" at "c:\User\Almir\NetBeans\ToEclipse\src" folder.
- 5) Past it in b) "c:\Users\Almir\Eclipse\ToEclipse\src" folder.

PART IV - ECLIPSE

- 1) Go to Eclipse.
- 2) Press "f5" to refresh the view.
- 3) Verify that your project is there (under "ToEclipse/src/toeclipse").
- 4) Say "Oh! Yes! It works!".
- 5) Run the project.
- 6) Return to 3) how many times you want!
