Thread: [E-Whore Help Desk | The Order | Ask ANYTHING related to E-Whoring](#)

Tiki - June 3, 2013, 4:08 pm

Welcome all members of HF to The Order E-Whore help desk.

If you have any questions about E-Whoring or anything related to the subject, just post here and I will try to respond with the best and most simple answer. Always come back to check if you're question has been answered. The question will be answered within 24 hours so if it has not yet, please do not pm me asking to answer it, I will always make a response if I'm online.

Please do not PM me with questions that have already been answered here. If you feel the urgent need to PM me however please use proper English so I don't waste my time decoding your message otherwise it will be ignored.

I have made a tutorial here, <https://hackforums.net/showthread.php?tid=3743553> Check that out!

Most of my conversations are short, I keep the idea of they need to pay money upfront, here is one from today;

In a few minutes the transfer came though and I got the money.

Good luck! ?

Hello, I'm beginning in E-Whoring, And I tried to sell nudes pics, I just made 10\$ most of the time the guys says "Yes I want to buy" And after that they don't and finally don't answer :(

Maybe selling pics and sexcam show is out dated ? If yes, What kind of activity can I do to maximize my profit

Thanks you all ;)

Badnews77 - June 4, 2013, 3:25 pm

What are good prices for camshows I'm wondering

Mostly pics and camshows via a VCW. If you find some weird pedos they might even pay for talking dirty.

(Jun 4, 2013 03:25 PM)Badnews77 Wrote: [\[CITE\]](#) What are good prices for camshows I'm wondering

I usually go with \$35 if they start hesitating I might drop it to \$25 to seal the deal quickly.

I might stream in the future if my vpn wasn't being shit. There are a lot of VCWs on HackForums currently so anyone is good, the best free one is probably Tiffany however it never hurts to make your own.

You absolutely need to make a new paypal, the buyer can see a lot of information when transferring money and something you have on a personal account might get out.

Make either a Canadian account so there is no starting limit, or you could just make a business account.

Any opening line that includes "Hey babe I'm horny" will get people rushing to you. As for the show anywhere from \$20 - \$50 depending on how rich/gullable the pedo is.

LOL... E-Whoring, faking as chicks to get paid, the hell.. omfg this should be a good way to get paid.. but how do u get verified on paypal and send cash somewhere else? hmm

TheTalkingMute1 - June 5, 2013, 8:11 am

My question is how do you sucessfully ewhore on a mac? I have tried and failed. I know I could do just the pictures, but I want to just do the VCW. I downloaded crossover (program to run windows programs on mac), which allowed me to download flashplayer and get the VCW working. The only problem I have now is that for some mysterious reason on a mac, skype and ooVoo will not pick up ManyCam or CamTwist (mac specific program similar to ManyCam). After a little research I found out the the newest version of skype did not allow outside video sources, so I downgraded, but that did not work. I tried to download manycam in crossover, but that did not work. I just wanted to use skype or ooVoo, because I know they are the most popular video chat programs and it is easy to find people. Do yall know if there is another way that I can get the VCW to show on a video chat site? If so, it would be much appreciated.

You can use a VCC, but I will not discuss further for that. Also a trick is if you make a Canadian PayPal you can send money without linking it to a bank account then you just send it to your main account. Remember, PayPal isn't the only way to send money online.

Sorry, I don't have a mac so I don't have experience with these sorts of issues. It is possible to E-Whore on just pics although it is harder it is possible so all I can say is hang in there!

I have a question about Amazon Gift Cards.

Today, 3 different people sent Amazon Giftcards to my email, and I received none of them.

They showed me the receipts and everything

They were all from different countries.

So my question is, depending on where people live relative to you, do amazon giftcards take longer to receive?

Like, will the giftcards show up tomorrow? Will they even show up at all?

Either your account is limited or you set up a business account and there are certain steps to get money from your pending balance(where your money is) to your available balance(able to be transferred). I believe there are 3 things you need to do, have 5 people pay for goods or services without charging back, receive \$150 for goods or services and you also need to wait 60 days from account creation. Once those three steps are complete I believe you can transfer money. Either that or the guy didn't pay you.

Note: You can always see paypals information on this.

For pics, I usually give 2-3 teaser pics so I don't waste too much time. If they keep stalling after that I block them. If you want them to buy it you could say " I will give you proof, I will take a pic and write your name on my body", of course you need some photoshop skills for this but as soon as they see it I'm sure they will buy.

How to get paid in full security ? Please detailed answer :)

Thanks ;)

There are a few things that you might want to follow. You will want to have at least 2 fake paypal accounts. The paypals will need to have every detail fake, so adress phone number names. Then you will want a nice VPN. Then you can receive the payment on one paypal and then split up the money, one way I have heard is using online casinos. Then you can retrieve all the money to the second account and then send it to your main account.

This is really odd, I have never encountered this. How are you running the VCW, in a standalone flash player or web browser? Also, have you tried other VCWs to see if it's just that one that is causing you issues. The last thing I can think of this that you configured something weird with skype or maybe set up an accidental hotkey or something along the lines of that.

One thing to be sure of is that your phone number and other contact info is correct. Paypal will call you before taking any action on your account.

Just adding that setting your account to a business account will help too.

From personal experience I would say this is 100% true, however I don't know how craigslist operates it's flagging system. If I had to guess I would say it has a bot that searches for those key terms and ghosts them directly or flags it for staff to review. I usually avoid this by keeping the add minimal and more on email me for more information. Good luck with this!

I don't know about the paypal holder it's the safest way to keep it on your own paypal.

Just download a vwc or a picture pack you can find them on the forums and go on websites for example chatavenue to pick out your victim and have a chat with him and try to make him pay you money for a webcam show its simple.

Don't expect to make bank on your first day. If you want paypal transactions to be safe make a business account so if lots of money comes in and comes out it doesn't get held and your account wont be instantly limited.

Isn't e-whoring dead ? I was e-whoring maybe year ago and then wasn't anything like VCW (everything manually) but it was effective and easy. Now a lot of "noobs" are doing it and ruining it. I agree, the skid army has came and sort of fucked things up, however it is still a good way to make money if you know what you're doing. If you make your own VCW and find your websites it is extremely profitable.

Hello Red_Dragon.

1

Log in to your PayPal account by typing in the correct user name and password in the appropriate boxes. Use your mouse to click the "Log in" button. If the process is successful, you will be directed to your account overview page.

2

Move the cursor to the "Profile" link under the "My Account" tab and rest the cursor on the link. A menu will pop up..

3

Click on the second link from the top of the pop-up menu; it reads "Add or Edit Bank Account." This will take you to a new page that will ask for your bank account information. Enter the required information and click on the "Continue" button to verify your account.

It depends on how smooth you talk people in a chat, if you are e-whoring 4hours a day and you are

a smooth chatter you probably would make 50\$ or 20\$ a hour.

There are a lot of many good guides so i can't really pick on that.

I usually put on the cam show and go afk for a bit just to avoid risk of seeing an angry pedo in the future. If your VCW doesn't have a nude abilities then obviously you would need to block them. As for the charge backs with paypal you can create an invoice with terms of service saying they will not charge back etc. This way when they pay paypal has records agreeing to them saying they will not charge back. Alternatively you can use other payment processors that don't have a chargeback option.

Don't use words like sexy or horny but instead synonyms such as hot, this avoids being auto flagged. Also don't communicate through CL, direct them to skype asap so CL cannot monitor the conversation.

In that case I don't understand your question. It seems like you're just stating you don't have a VPN. You can set up a paypal without one but it's a tad more risky if you start pulling in some major transactions or are doing anything blackhat. Hope that helped ?

Sorry, it looks like my post got removed. To answer them, it looks like your money is lost. For VCW lag I am pretty sure there is a thread about fixing it, I'm not an expert at fixing VCWs. I can't currently recommend any site addresses because mine are currently unsaturated but adult chat rooms and dating sites are good.

Flu???™ - July 2, 2013, 2:57 pm

1- What would be better (SEing the victims) in eWhoring, good proper grammar or using the short-internet-English (using the letter "u" instead of the word "you" and shortening words like "dis" instead of "this")?

2- Would you say chats are better than email? Emails might take longer but it's easier to SE and work better (at least in my opinion).

3- What are the best methods you use that you don't mind sharing?

When I E-Whore on omegle I usually use the test version and put Spoiler [\(Click to View\)](#) <https://i.imgur.com/1vjtUky.png> and just copy and paste a message like this: Spoiler [\(Click to View\)](#) Quote:hey babe :) i would like to interest you in some nudes or a private cam show :) i only accept paypal and i do NOT DO FREE SHOWS. if u r interested add my skype lexi.luv.xoxo ! don't hesitate 2 add me and ask questions :) Then I just next them and repeat. That way if they're interested and have money to spend they add you.

Thanks, 5 stars to the thread.

1. People debate over this but I personally use bad grammar and short-English.

2. Emails would be better for websites like Craig's list and dating websites and chats would be better for chatrooms and sites like omegle

3. I use adult dating sites and the one website that I will give out is cam4. With cam4 you need to have a very unsaturated VCW that works well. You want to tell all the customers that the show is not going to be done on the cam4 website and that they need to add your skype. Make sure to never say the word PayPal while on cam4's chat because you can get instantly muted and your account possibly closed.

Good luck E-Whoring man ?

For phone verification you can use an online or virtual phone. The one I use is called TextPlus for android and apple devices. It gives you your own number to use and by watching a 30 second advertisement you get 2 minutes of calling time.

I use to make a good 500-600 a week ewhoring on craigslist but now its just a pain, and im struggling to make over 50 a day, the problem is Ghosting and Phone Verification. Now phone verification is not that hard to get through, i usually just get a slave to give me the code, but still my ad wont post, i get ghosted, i have tried several things to bypass this. I bought a VPN got my neighbors wifis (but thats ghosted to now).

How can I Phone Verify on Craigslist besides getting slaves to do it?

How not to get ghosted?

Any other similar sites to Craigslist where you dont need to deal with this bs?

Again like I said, for verification and virtual phone works fine for me. As for ghosting avoid getting flagged by Craig's list keywords such as "Sex" and "Skype". There are other websites but you would probably need to put up with other verification systems.

It's better to use a canadian paypal.

If you use your personal paypal and people report you for scamming / webcamshows your paypal account will get blocked for illegal activity.

Some people I know do use their real PayPal if they have a business account so they can hide all personal information from buyers as well as hook up multiple emails. If you're using your real personal account then all your information will be displayed. If you were wondering I have currently been going on a Canadian Premier account and have yet to be limited.

If you have any mobile device, or this might even work on PC there is an application called TextPlus. That is what I use however there are many more applications that give you a phone number to use. You can also look into GoogleVoice.

If your post is getting ghosted then you need to be less upfront and careful about the words you're using. Craigslist will ghost any outright adult content.

Where I can buy cheapest/best VCW with few pics of her? She must stand, touch her nose, middle finger, blow kiss, tease, and min 20min show...

any idea?

Anonymous1596 - December 18, 2013, 6:24 pm

So I got that I should make a business paypal and use a VPN (both things I plan to do)

But I am curious of what are the repercussions if I fuck up? Is it necessary to chain paypals to mix the money or is that just adding trivial complexity to the process? I was intending to have a few ads going on Craigslist, profit, then move the money from E-whore paypal to my personal paypal which would be tied to my bank account. Is there any serious flaw in this? Should I be putting more effort into mixing the money? What would you personally suggest to a confident noobie?

Sroy - December 18, 2013, 7:12 pm

Question;

Is it more profitable too make a Good relation with your target or just simply ask them pay upfront and delete them if they dont?

If you build a lasting fake relation, they might give you big sums instead of 20\$ ish, then milk them.? On the other hand, it's a risk wasting lots of time.

HMPF.

You go to a chatroom and look for a slave or victim.

You persuade them you are a female.

You get paid.

That is the rudimentary model, but if you are interested, then you can always modify your approach techniques, pictures, etc.

PM me if you need help.

The VPN is so that the government officials don't come after you if you do something and just a precaution in general. Also, regarding your Paypal comment, I just use my real Paypal with my whore's email linked to it. I have never had any chargebacks with some ~50 transactions I've had.

I usually give them the show a quarter of the time and the rest, I just resolve their Skype and DDoS them for an hour. And if I can't resolve them, I send them an IP logger and say "Here's some pics while I get ready for the show [link]."

the problem is that the flv file plays fine in any media player but when i load it to the easyvcw1.51.swf the clips don't play as fast as if she was real it plays slow. and i have tried over and over to fix this issue but i cant seem to. maybe you can help?

here's some info about the video that im trying to make a vcw from

check signs: all Heart, wave, blow kiss, standup, flipoff

3 chat loops but the chat loops dont show alot of typing. its just alot of sitting, not alot of mouth movement either

theres a flash of boobs and some fingering, but the fingering is minimal so youd have to loop it for extended use

video is from a random porn site tbh i think it might actually be from pornhub

i downloaded it with freemake video downloader, it was flv from download but i converted it to avi because the original flv wouldnt work in adobe media encoder
than i reconverted it back to flv using adobe media encoder, i reduced the keyframes distance to one,
the video is only 10 min long so i didnt edit it. i just loaded the flv into the easyvcw1.51 and began adding transitions
when encoding i resized video to:

WxH -320/240
framerate:same as source
bitrate encoding: cbr / custom kbps:452
keyframedistance: 1
undershoot % target 98
quality: good

the video DOES have a watermark i cant get rid of :((maybe you can help me find out how to do that, ive googled but not alot of help there
i can give you a link to the video in pm if youd like.

Chat rooms. or Omegle, but thats slow as hell.

Try KiK or Instagram, heard those work great.

I wouldn't know though, I use my phone daily.

You find a site that isn't saturated (Hasn't been used by other E-Whores) and you will find people who are willing to easily pay without much conformation.

You don't need to accept the payments through PayPal. However if you don't want to make a new account then you can set up a business account. The good thing about a business account is that you can set up a business name so that someone paying you does not have access to your name. You can also link multiple E-Mail accounts which all will feed into your balance.

It sounds like you either are just using a video clip and not a swf with buttons configured to switch to different scenes. If this is not the case you may just have a bad VCW and the creator did not set it up correctly. Try getting a different one, or confirm that you have set it up correctly.

I cannot give examples of sites for free, nor in public or else everyone will leech. You make VCWs appear through your webcam through various programs, the popular one being ManyCam.

I use it as more of a way to get traffic to my kik, spread your snap name a lot to get a few thousand views on your story and recycle through a large clean seductive picture pack to post on your story, leading to your kik username "looking for fun" or "selling tonight".

What kind of software are you working with? The old flash player was absolute ass for vcw's and a mish to work with.

My honest best advice would be if you want a vcw, find a good paid one that runs stand alone and requires 0 setup.

Use an app called Casper. Find a nice pack with some clean pictures to tease on your story directing to your kik. Get hella views then send some pics to your story with something like "Bored message me on kik"

For more in depth help shoot me a pm.

I just cant believe ur been here from 2013 doing ewhoring ? =D

Sounds like an richguy and amazingly still active!

I just recently started ewhoring, actually before 3days made so far \$30 but it doesnt go so well i would like to get some help with your fake skype girl just to see how you do and stuff, if you dont mind send me PM or something :)

much love for this support, no homo

Honestly that is up to you, people aren't willing to give out their good traffic sources. You gotta do some digging. Good luck!
