Framed - April 5, 2010, 5:36 pm

Looks good. Might try it.

Su?ernatural - April 5, 2010, 5:39 pm

Unfortunantly it was not good enough for buyers :(

Monoxide - April 5, 2010, 5:42 pm

I am going to start using this, I like the fact that it has stealers and of course FUD. ?

Su?ernatural - April 5, 2010, 5:44 pm

Only stealer is No-IP but it has a downloader so you can add your istealer server there :D

Monoxide - April 5, 2010, 5:50 pm

I added in my RAT, but just as good. Gotta love those trojan downloaders.

Su?ernatural - April 5, 2010, 5:52 pm

Alright bro glad your using this to your advantage :)

-mothered- - April 6, 2010, 6:45 am

It looks like a good tool mate. I like the AIO options, meaning that I won't have the need for a seperate Icon changer and exe pumper when required.

Appreciate It :)

Su?ernatural - April 6, 2010, 2:03 pm

Alright I gave up on this project so this is the final release.

--Secret-- - April 6, 2010, 3:30 pm

Shareca\$h isnt workin wtf

Su?ernatural - April 6, 2010, 4:15 pm

Sorry bro must be that their getting attacked.

Anywho their up right now.

aznowned - April 6, 2010, 5:21 pm

Hey thanks for this keylogger helped me out...

Su?ernatural - April 6, 2010, 5:24 pm

Alright no problem dude.

String - April 6, 2010, 5:26 pm

I think the free version of fud

Su?ernatural - April 6, 2010, 5:30 pm

Their is no PAID version this is FREE and 100% FUD!

I decided to release it..

-=C0d3ak=- - April 6, 2010, 10:46 pm

You didn't mesh a bunch of code snippets together and try to sell this, did you?

aizen433 - April 7, 2010, 12:01 am

iz there any other Sites u can DL your KeyLogger?.

i cant DL at ShareCash cuz i it says " Not Available in your Country "

w33n - April 7, 2010, 12:55 am

Dude, upload it somewhere else but Sharecash, only 4 people actually bother downloading from there.

Su?ernatural - April 7, 2010, 2:11 pm

No Mirrors peeps.....

Oliver Hopkins - April 7, 2010, 2:23 pm

Well i can't dl cause of shareshit so yea.

Su?ernatural - April 7, 2010, 2:25 pm

Alright then kids! DO NOT FUCKING POST!..

Dam I keep reading the same and same posts..

People are saying it because it's ruining the point of making a keylogger that's "public". Personally, I would LOVE to try this out but shareshit stops me from even attempting to download it. Why say its free when you're trying to monetize your product, but when you do no one can even download it. So redundant.

Su?ernatural - April 8, 2010, 5:10 pm

Well the world does not work like that.

Kind of like free products from timeshares they ask you to sit for a 30min meeting and you get a free hotel stay etc...

DarkPHP - April 8, 2010, 11:27 pm

why always sharecash links ... i fill out several surveys but i never can download the files ...

Is theyre any alternative link ...

Su?ernatural - April 9, 2010, 2:06 pm

I'm not even going to respond to people asking for other links.....

Su?ernatural - April 11, 2010, 12:48 pm

I have 24 unique stubs available.!

if you don't think my logger is worth the download then don't download.

modhacker - April 28, 2010, 2:15 pm

i would get this but i dont do the shitcash survey's i think u losing a lot of dl's just cause it is shitcash

Su?ernatural - April 29, 2010, 2:37 pm

So you think it's good for me to get a lot of downloads and no profit?

when I can get less downloads + my program stays FUD longer + profit?

Su?ernatural - April 30, 2010, 4:41 pm

Since everyone keeps asking I have updated my first post with a mirror link!

Vhyrian - May 1, 2010, 5:00 am

1. CTRL + ALT + DELETE

2. Change to Processes

3. Look for the application for example "Keylogger.exe"

4. Cancel/Delete it

5. (This is only if it been added to startup) Go Run>msconfig (Continue) Startup and find "Keylogger.exe" Disable it, un-tick it.

6. Go to run type in regedit (Continue)

HKEY_LOCAL_MACHINE

Software

Microsoft

Shared Tool

MSconfig

startupreg

(Folder with name : "keylogger.exe" - example) - Delete it

Edit : Nice Keylogger, Looks legit will try it out :)

@everyone who says the "Test" feature does not work.
If your email is correct with password and everything.
Just hit build and test it on yourself. Hotmail.com maybe the one causing this problem due to spam protection or something of that matter.

I tried out it out today and it does not work for me. It errors up when sending the email.

Su?ernatural - May 22, 2010, 4:47 pm

What do you mean it does not work and errors out?

This was tested by myself and working 100% infact I still receive logs from the victim I infected 2 months ago.

Sage Mode - May 22, 2010, 4:56 pm

I get a NET framework error the minute after the mail is supposed to be sent, I was testing it on myself today. It does not work for me.

E.g

Interval : (minute here)

Credentials inserted

Run it on myself

In my processes

Sends the logs in email after said time

Instead of getting the logs I get a .NET framework error.

Su?ernatural - May 22, 2010, 5:00 pm

You must not be doing something right.

Did you enter correct Email & Password?

Did you enter atleast 2 minutes or more on the timer?

If the OP is willing I can take a look at it to confirm or to disprove your suspicions about his tool.

It looked like a awesome program ?It was indeed a false alarm. The builder creates no entries on the users computer other than that of the server file you create.

It's clean just that many people have used this tool and the Stub has become detected.

Thanks for verifying kamakzy56 , everyone else let me know what you think!

Su?ernatural - June 25, 2010, 2:11 pm

Well it's that time again to bump it up! :)

venu007 - June 27, 2010, 5:32 am

thanks for the logger man ,nice one

Willing2Learn - June 27, 2010, 11:10 am

Are we suppose to check the Anti-Virus's? If we don't want the victim's computer to be able to scan and delete?

Like, is it suppose to be checked, enabled.

Sorry...dumb question....but I need to know ><..

Edit: Download link doesn't work.

Su?ernatural - June 27, 2010, 2:06 pm

You can Uncheck it but It's really up to you the Anti's Just disable their AV.

Willing2Learn - June 27, 2010, 2:52 pm

So when we check it, does it get disabled or leave it uncheck?

Which option is it that would disable their AV? Checked or unchecked?

Edit: What's the meaning of "Anti's Enabled" and "Anti's Disabled"

What's the difference? I kind of get confused about this.

---k4kuzu--- - June 27, 2010, 3:12 pm

does ur kl automatically loggs keys that are pressed while using mozilla?

Su?ernatural - June 27, 2010, 3:19 pm

Yes it logs anything that the Victim types.

@Willing2Learn

Check = Disable AV

UnCheck = Nothing.
