Thread: [infected by jrat!](#)

DIOCANE - June 4, 2013, 7:07 pm

i need help , a jrat infected me... how i can remove it? please help me!

Wafflemonger - June 4, 2013, 7:16 pm

What operating system are you currently running?

Sleazy P. Martini - June 4, 2013, 7:19 pm

Jrat has a remover on there website.

[Jrat Remover](#)

How do you know you are infected with jrat for sure?

Adverse - June 4, 2013, 8:51 pm

I would download malwarebytes because you could also have other malware on your computer you can get it from here: <http://www.techspot.com/downloads/4716-m...lware.html>

run a quick scan or full scan either one works.

If you are still worried about being infected after doing that download Hitmanpro it uses 4 antivirus engines to scan your computer. You can download that from here

<http://www.surfright.nl/en/hitmanpro/>

How do you know you were infected by jRAT?

I would do some checking up before coming to this conclusion.

If you are very sure you have been infected by Jrat, run the [JRat remover](#).
