Thnx for the vouches guys, i'll help you out tomorrow afternoon!
I'll help you guys when i'm back from the city guys, just in a few hours!
Crypting option is available to now guys!

Dafuq - June 10, 2013, 11:46 am

Crypting option is available? How? Where?

#Martijn - June 10, 2013, 11:54 am

@thenoobguy PM me for details bro, i know a uber member that crypts everything for people in this thread:)

Dafuq - June 10, 2013, 12:02 pm

PMd you, waiting for your response. And my thread is dead ?

KVVS - June 10, 2013, 1:16 pm

Sup NL bro :)
Question

How many slaves can i handle with this No-ip way without raising too much suspicion?

I wanna get some miners running using a RAT

Thanks again!

#Martijn - June 10, 2013, 1:31 pm

@kvvs Hey bro, you can handle many slaves with no-ip, i saw people with over 800 slaves using no-ip! If you need help with crypting or anything else, just shoot me a PM;)

rilkarz - June 10, 2013, 1:36 pm

I need help binding if possible, on Jrat

KVVS - June 10, 2013, 1:58 pm

Thanks for the quick response!

Im setting everything up now, portforwarding no problem done that before.
I would like to shoot a PM just dont have the postcount yet ?

1 more n00b question :

Im thinking about using Jrat since its FUD already, your thoughts?

rilkarz - June 10, 2013, 2:00 pm

darkcoment has better features, but i would suggests Jrat, to get DC FuD it would cost about \$20 for a crypter and for JRat the keylogger plugin is \$15 i think and is already fud, so i'd suggest jrat

#Martijn - June 10, 2013, 2:08 pm

@kvvs It really depends on you. I think JRAT is the best option, because its FUD and very stable. It has almost exactly the same functions as DC but the thing is, if you want the webcam and the keylog fuction you'll need to buy the plugin from redpois0n..

KVVS - June 10, 2013, 2:09 pm

Thanks for quick response, i was already using Jrat so will continue todo so for the moment :)

Snowfox - June 11, 2013, 1:38 am

Hi @huiskmartijn first of all thanks for making thread for helping others. I need Crypters and Binders to bind my RAT. Can you provide all good tools. And Drivehq.com blocking ftp delivery via keyloggers. Can you show some alternatives like drivehq for ftp. Tahnk you

#Martijn - June 11, 2013, 9:33 am

@nag4nethack Hey bro, sent you a PM;)

@kvvs Np bro;) Keep using jrat, the best rat if you don't have a crypter!

In a few minutes i'm online on skype guys, will help most of the people that requested

#Martijn - June 12, 2013, 10:55 am

Hey guys, PM me and post if you want help, i'm online now!

Skip The Gym - June 12, 2013, 11:39 am

Gave me some tips while we were talking about our country, vouch for this guy and his service!

Khaos1988 - June 12, 2013, 11:45 am

Can you fud rats at all?

Send me a pm if ya can much appreciated.

#Martijn - June 12, 2013, 11:57 am

@Khaos1988 I've send you a PM with the details bro!

Saint - June 12, 2013, 11:59 am

Added you on Skype, got something for you that already failed by 4 people :)

Khaos1988 - June 12, 2013, 12:13 pm

Asked a couple of questions and got super fast replies.

No BS like some other people on the site.

If I get stuck again I am coming straight back here.
