Thread: [~Direct Link~ Judoplayers !FREE! Password List \[1.5 BILLION\] \(15GB\)](#)

DiamondHacking - June 6, 2013, 3:21 am

I am releasing Judoplayer's password cracking dictionary (1,493,677,782 words, 15GB) for download.

The list contains every wordlist, dictionary, and password database leak that I could find on the internet. It also contains every word in the Wikipedia databases (pages-articles, retrieved 2010, all languages) as well as lots of books from Project Gutenberg. It also includes the passwords from some low-profile database breaches that were being sold in the underground years ago.

It is GZIP-compressed (level 9). 4.2 GiB compressed. 15 GiB uncompressed.

The format of the list is a standard text file sorted in non-case-sensitive alphabetical order. Lines are separated with a newline "\n" character.

Here's a tool for computing hashes easily: [Click Me Yo](#)

Not sure what you're trying to ask...

But the list could be used to brute force an E-mail I suppose.

eightz - June 6, 2013, 2:44 pm

I mean some logins to bruteforce require emails (netflix) instead of usernames.

No. This is a password list.

Nothing more.

Has this been scanned for duplicates?

Yes, there are no duplicates.

Feel free to do it again though.

Really? You would try and pass this word-list off as your own when someone else worked really hard to compile it? BTW The OP is leeching the word-list without giving credit, since he has not I will.

The credit goes to Defuse Security which released the wordlist used by their Crackstation project or more commonly known as crackstation.net.

Downloaded in 5 minutes.

Great stuffs, I'll test this out asap.

shockblade - June 7, 2013, 12:50 pm

I'm a newb in this matter, but when I was handling the rockyou password list I thought it was big (130mb if I recall correctly), but this is just immense. Just WOW. Thank you very much.
