Thread: [Makes a good Niche, Is this one?](#)

itsmemario - June 8, 2013, 7:20 am

The first time i seen PPD/CPA, What it all actually ment, I was thinking and thinking for a good idea, And i honestly dont know how but this "Idea" just came to my head, Nothing like Programs,Keygens all that crap, So it isnt saturated.

My question is when looking for the perfect "niche" Say i want Umm, Example (Xbox live points) Thats what your after, But your going to post a video, So it will be (Xbox live points download)

What im trying to say, For the actual Niche i shouldnt add Download on to end of the acutally niche when searching, Because when they search Xbox live Points download, If my Video is SEO/Back-linked/Featured correctly mine will come up anyway.

I didnt think my idea was that popular, <https://gyazo.com/43d41dcad56b40c50ae27d1205315bdd> Im new is that good results, that is on EXCACT not broad, But its on all country. Thanks.

Have you ticket the "[Exact]" box while searching?

itsmemario - June 8, 2013, 7:41 am

Yes i stated that the last sentence ;) I knew someone would ask after doing more searches, Its kind of something some people would want to download but they can watch/get it for free, If you know what i mean.

You type in Download it has like 60 Searches, Its a good niche but not for this, Not for PPD. Hard to explain, Its like making paper airplanes, for example people can watch it for free, But it gets alot of searches, but not alot of people would want to download guides, ect.

Well I clicked ctrl+f to search for the word "exact" because I was lazy to read the whole text. Looks like you wrote exact instead of exact XD XD
