Thread: [Got a Confession to make for HackForums and Omniscent](#)

Armen - June 9, 2013, 12:15 pm

Months back, you caught me trying to sell my HF account. I got negative repped for that but wasn't banned. I was really surprised why I wasn't banned for that incident because I thought you were going to run up on my ip and noticed I had 2 more other account in here. That's my confession. Man to man I had 2 more accounts in here and that makes me a multi. Now I know I broke 2 big rules but, I think this should be done and told and the right thing. Now I know I'm going to get banned for this and -rep, but I'm glad that this was told.

I really enjoyed the site and the stay that I had it was a blast.

Thank you and bye. ?

Go report this to [Factor8™](#). Your accounts will likely be merged, and him leaving a negative reputation on your profile, maybe even a temporary ban, but that's all.
