Dont do that guys . your victim can call the police and if you dont use a vpn Good bye than..

**Rafaelinio** - June 10, 2013, 5:19 am

Nah. Too easy. You can do alot better

**TheEpicJudger** - June 10, 2013, 5:21 am

you can hide it inside a picture with binders

**Rafaelinio** - June 10, 2013, 5:23 am

Yup. This is way too obvious for someone to fall for it.

**TheEpicJudger** - June 10, 2013, 5:28 am

there are ways to hide text in a picture too this TUT is how to prank people who don't know much about computers hacking etc...

**tired-** - June 10, 2013, 5:31 am

People will fall for this if they have no knowledge of .bat files or computers in general.. AKA your average I.T class in years 1-8.

Otherwise, nope.

**Rafaelinio** - June 10, 2013, 5:37 am

You can also convert it to a .exe file using a converter and rename it to yourfriendsfavoritegame free hack or crack.exe

Nobody would call the police for this. The police also wouldn't care. It's just a prank.
