Thread: Legion | Official Hacking Group | Recruitment

?nonymous - *June 11, 2013, 2:03 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
Practical Recruitment
Below sectors are all practical, meaning you'll be questioned if accepted - don't bother lying as it'll not work out in your favour, as you'll merely be wasting your own and our time.
Sectors
Web security | Computer Forensics | Networking | Programming
Application form:
Code [b]HF UID:[/b]
[b]Sector:[/b]
[b]Any certifications:[/b]
[b]Skill level from 1-10:[/b]
[b]Proof of work or knowledge:[/b]

If you do not meet the criteria for any of the sectiors above, but are knowledgeable in some of the subjects listed below, feel free to post using the form at the bottom - remember to only post your own work.

- Defensive techniques
- Cross Site Scripting hacking
- Abusing DNS for host identification
- Evidence removal and anti-forensics
- Breaking wireless security via hacking
- Remote root vulnerability exploitation
- Data retrieval with SQL Injection Hacking
- Windows 2003 Server & Vista DNS Cache Poisoning Attacks
- Remote buffer overflow exploit lab - heap vs. stack overflow

Application form:
Code [b]HF UID:[/b]
[b]Age:[/b]
[b]Area of knowledge:[/b]
[b]Skill level from 1-10:[/b]
[b]Provide proof of knowledge:[/b]
Once you've posted your application, you wait for us to review it and if you meet our groups requirements then you'll be invited for a practical review.

FantaŠec - *June 11, 2013, 2:05 am*

Do NOT lie in your applications. I may even contact you with questions do confirm you can actually do what you claim. If you are caught lying you will be blacklisted.

Ayden™ - *June 11, 2013, 2:24 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
Ratting
Ratting has been the first thing i'v learnt to do with "Hacking". Like most people, I came to HF to learn that. I'v been ratting since I first joined the forums so back in 2010. I do not classify "Ratting" as a "Skill Set" because all it is is opening a program. But I do find the art of spreading it too many victims or getting a certain person to download your Infected server is some type of skill. It involved Social engineering sometimes but others just websites and automatic spreading.

How to mess with your friends with Facebook - https://hackforums.net/showthread.php?tid=2805966
Rainmeter PIMP OUT YOUR DESKTOP! - https://hackforums.net/showthread.php?tid=1491419
How to test your server (RAT) - https://hackforums.net/showthread.php?tid=3239037

eWhoring
eWhoring is my second skill that i'v learnt over the time of being a "Hacker". I'v eWhored quite a lot of money over the past years. I also do sell a eBook on how to eWhoring like me... But that's offtopic. Some of my profits are in other threads around HF. I don't know the exact amount of money i'v whored. Lets just say i'm a whoreer <3. I try to help out the best I can with teaching people how to eWhore. I'm going to open a free service soon to teach some people to whore like me.

Social Engineering
This is a BIG part of my skill set. I try to SE anything I can. I spend most of my time trying to SE Larger things but fail. SEing is helps me with my other skills such as "Hacking" and "eWhoring". I try to improve my social capability's by eWhoring and persuading others

Graphics and Development
Iv been doing video fx since I was 12. I'v now upped my standards and gone into GFX. Please check out my thread below.
All my GFX - https://hackforums.net/showthread.php?tid=3289556 (Very old thread <3). I try teaching my self and reading guides and learn so much. I hope to be a better artist in the future!

Gaming
I have no clue if this counts as a "Skill" but gaming does sometimes take practice, if something takes practice in my eyes it's a skill. I currently own a user group called 'The RuneScapers', we have around 35+ members.

Iv been gaming since I was 7 on my first 'Sega generation', oh the memories of blowing into the drive too get it too work and playing Sonic with mates. The past 3 years, gaming as changed a lot. Recently, Jagex have put online 07 servers, i'm currently playing that. I mostly play PS3 and PC, if you would like to contact me about my PSN name just shoot me a private message.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I think I would be a valuable asset to the group simply because of how hard i'm trying to improve my self across hackforums. I'm all ways trying to learn and teach. I would like to spread my wisdom across the forums and the groups name, because I want to get the groups fame to its maximum potentially.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: I have never set and REAL current goals... Well maybe I have. One of my current goals is to get into an Official Group. Another goal is to get my site up to scratch (HFToolz.pw). My last goal is to donate as much time to helping my mum (She has bowel cancer). I don't like setting goals mainly because I don't have the time. If i do set goals (Like I currently have) it's normally to because i'v wanted and wanting to do it for a long time.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I'm 15 and from "Australia". Many people know me by the name of "Ayden". I do have older names such as "King,Goods,Noobzrmade" (Inb4 another dox). I'v been around Hackforums for 3 years and will strive to be here longer ^_^ Lets hope Omni doesn't ban me. I love learning and teaching others, I also love helping as much as I can c: Some users like me some users hate me <3. I spend most of my time in "The Lounge" or a hacking, Gaming section.

Message me questions, don't post on the thread.

Z0mbie. - *June 11, 2013, 4:45 am*

Looking forward to questioning some of your applications.
Please do note, we will have mandatory tasks each month to stay in Legion.

?pade - *June 11, 2013, 5:23 am*

Elaborate on your skillset:

Gaming
-competition
-Xbox modification
-team playing (gamebattles)
-video gameplay + editing

Monentizing
-eBay marketing
-Adsense exchanging
-iPhone and iPod repair
-general HF product selling

Web construction
-capable of creating a website with moderate ease
-able to use simple code such as HTML,PHP and CSS
-great with organizing , and appearance

graphics
- basic use of photoshop
- can create decent looking thread designs
- confidence with making logos, banners etc.

Tell us why you would be a valuable asset:
Well, I think I would be a valuable asset to the group because I have a strong personality, strong willed person, and I Strive for nothing but the best. I don't have ass anything I do, anything I do is done with top quality, I won't settle for less. I am a very easy guy to talk to and won't let the group down, simple as that.

Elaborate on your achievements and future goals:
My future goals for hack forums and in real life would be to on stain recognition to the forum, have a deep impact on the community, and have access at everything or anything I do. As for real life goes, my future goals is to join the RCMP which I have high confidence into doing so. I'm not sure if I have made any achievements on hackforums, I mean it's really not up to me to decide that, it's the members.

Tell us about yourself:
My name is Devon, I'm 19 years old from Canada. I am a very laid back person but very logical at everything I do, not trying to sound cocky but it's true. I am entertained by helping people who need it more than me, so that's one of my biggest goals here on the forum, it's something I'm good at and enjoy doing. HF is kind of like my second life outside of real life, it's a place I can go if I need to talk to someone or to simply get something off my mind, so I make sure whatever my task is, I do it right with highest quality possible.

Alex™ - *June 11, 2013, 6:10 am*

Elaborate on your skillset:PHP/Mysql, Marketing and have helped out quite a few users with mechanical issues (cars and bikes)
Tell us why you would be a valuable asset: I can contribute and help fellow members.
Elaborate on your achievements and future goals: I have been running GalaxyJDB for at least 2/3 years combined. I am also working with someone on an alternative to LibertyReserve. We have been working on it for a very long time now and hopefully will get it up and running within the next few months.
Tell us about yourself:I am currently studying mechanical engeneering and will be for the next 2 years hopefully. I own 3 motorbikes and a car, mostly paid for by hackforums. My application might not be as elaborate as everyone elses but hopefully i have saved you some reading time and cut down from the usual bullshit people say in these applications. Feel free to pm me for proof of anything i have mentioned so far.

Regards

GammaRay - *June 11, 2013, 6:32 am*

Legion is a great group running by a great leader. Good luck with the recruitment!

Taru - *June 11, 2013, 6:35 am*
Elaborate on your skillset: I am a programmer, and a graphic design. I am a student. I won't lie about my skills, I am getting better.
Tell us why you would be a valuable asset: I am a fast learner and a hard worker.
Elaborate on your achievements and future goals: I am working on multiple projects and am looking forward to any with legion.
Tell us about yourself: I am 18. My name is Steven. I love to do programming and graphic design. I am best with Java, c++, and lua.

Flaaffy - *June 11, 2013, 9:59 am*
[img]http://img404.imageshack.us/img404/3751/lgt585cv.png[/img]

Elaborate on your skillset:
Networking
I believe that understanding networking is a essential skill to both web based exploitation and machine based exploitation and so i made it a priority to learn networking and understand it fully, i am currently studying Computing Science at a A-Level qualification and so have picked up vital knowledge from that.

Machine Based Exploitation
When i first say this many other people believe that I am simply talking about RAT'ing which would be far from the truth, as soon as i started working on networking i realised there was a whole world of exploitation out there that didn't require either installation of a malicious executable or exploitation through a web server, with a simple nmap and nessus scan you can find a whole variety of information about a system and its holes.

Web Based Exploitation
Obviously on this forum the most well spoken about and popular subject, web based exploitation is one of the most common ways of exploiting a machine, and was one of the first things I learnt about.

This allowed me a glimpse into the hacking world and i never looked back, as I said in networking, the key is understanding the system you work with so i soon decided to take my knowledge into PHP, HTML, JS and SQL so that i could not only execute and utilise commands but also understand how and why what i was doing was allowing me to gain entry.

Coding

As mentioned i have learned a few coding languages, one of them being PHP, i would say that the first language i learnt was at a CLI with simple programs in batch at the age of about 13-14, i then moved onto VB.NET which, then realising how high of a level language it was swiftly moved onto C#. this gave me an entry point for C/C++ which i am still currently learning, in the mean time i have learnt a medium level of PHP understanding and Python both i considered essential for web exploitation and machine exploitation, even though Python is still a regularly new language in the scene, in the scale of things.

Tell us why you would be a valuable asset:

Teamwork

I work great in a team/group and love being part of a selection of sub members, i can work well with anyone and even in real life i feel and have been told that i am a out going funny person. i think i can not only contribute a good discussion and debate but also provide intelligent funny dialect for the group.

Help And Knowledge

When I wrote this title I realised how pretentious it sounded and want to explain, i do not under any circumstances thing i would be teaching the Legion members from my infinite fountain of wisdom. I know there are plenty of skilled Legion members who probably have a much higher understanding of hacking and exploitation, however everyone has different skills and strengths and I feel that i can really contribute to Legion members with help whenever i can possible.

Representation

I think that representation of the group is a key thing and one that i would worry about if I was a group owner, so i want to assure you that I will not under any circumstances being bringing the groups name into disrepute. i strive to obtain a good reputation on this forum and help new members in whatever situation instead of screaming at them to use the search function, i believe i can provide high quality information to a member from any walks of life and group on this forum that can keep the group in a good light

Elaborate on your achievements and future goals:

I would say i have very little hacking exploits i would want to boast about on here, i am more of a secretive blackhat or strictly whitehat. It depends on my mood. however as I currently said, I am studying Computer Science and ICT at A-level at my school. In my GCSE result i got an A* for both Computing and ICT and was the highest in my class for Computing, being quite under pressure as very young for my year and in a grammar school I can assure you I am not an overachiever. Getting B's and C's are the norm for me and only in a few subjects will a get an A or above so i think of it as quite and achievement when i get top of my class. For my future goals i would have to put university. I hope to go to the university of Amsterdam where I can study Computational science and agian develop my skills even further. I have spoken to several teachers and ICT specialists in my school and have had definite encouragement from both them and my family. My Uncle is the head ICT Support manager at Ernst and Young, an international multi billion dollar company and I have always looked up to him when thinking about life, coming from a poor background by reading dummies guides to windows 95 and other various things he has worked his way up through the ranks to where he is now, obviously i am not expecting to come out of university and get a job as head IT manager at Cisco but i certainly hope to work for a similar company.

Tell us about yourself:

I think over the course of this application i have revealed certain parts of myself so I think this is a great place to start it off. I am a funny, confident guy who loves computer systems. from a young age i gained an interest in computers and since them have never looked back, as i have said, i am not especially rich and so appreciate the value of money and so do a lot of marketing and PPD etc, I am under no circumstances a genius or any sort of albert einstein however i do feel i have a certain knack for electronic systems which is brought out on these forums, i work hard and perform well under pressure.

Conclusion:
Thanks for reading, i know this was a bit of a long application and may have got a bit boring however i really wanted to get across myself to you and hope i have done so, i thank you for taking the time to review my application and i would like to wish everyone else who applies good luck.

-PacketMaster

Enterprise - *June 11, 2013, 10:05 am*

Elaborate on your skillset:
Marketing: I am currently learning PPD. I am a very huge economics guy and know almost everything about it. I will nto bore you with fake hacking skills though. I am also quite good with advertising. Gaming is a passion of mine but I would never call it a skill set. My main skill set it marketing though and leading. I am president of my youth group and school. I am a leader and think I could help in that aspect. Not being a leader of your group but helping the members stay on task.
Tell us why you would be a valuable asset: Currently, I am very interested in learning to hack. I learn things very quickly and really do enjoy learning them. I would become a valuable asset in the fact that I would always be there for the groups and amendments.
Elaborate on your achievements and future goals: My achievements have been numerous but also quite small. I have made a lot of money off of hackforums but have spent it all. My achievements in hacking are none. That is why I want to join this group. My friend fantasec knows me very well and he is a member of your group. My future goals, well that is easy. I want to make at least 10,000 dollars off of this site. I want to run a non profit organization or be a psychologist. HF goals: Illuminati. I have always been inerested in hacking and had a mac so it was not very compatible. Now I have a windows computer and would love to learn.
Tell us about yourself: Hello, my name is Zach. I am 17 and live in the united states. People know me on hackforums mostly for marketing. I have always been interested in learning any subject that came to mind. I think that this aspect of myself would really help me learn in your group.

X25519 - *June 11, 2013, 10:08 am*

Elaborate on your skillset: I am a web developer and general programmer. I code in many web development languages, Java, and a small amount of Python. I have developed 2+ websites as a job profession.
Tell us why you would be a valuable asset: I would like to meet and discuss with other people who understand the same things I do, and I can help around with people having problems with coding.
Elaborate on your achievements and future goals: I plan on graduating high school. Going to a technological university for computer science, and start my own business.
Tell us about yourself: I'm known as sticky. I'm 14 and I'm a freshman in high school. I am into computing, and want to have it as a profession in the future. I'm very mature as I was raised around adults, and I'm very well-mannered.

Neat? - *June 11, 2013, 10:11 am*

FantaŠec - *June 11, 2013, 11:32 am*
Just woke up, will be questioning some of you in a bit.

Jaguar - *June 11, 2013, 11:39 am*

Jaguar's Application

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]

Elaborate on your skillset:
Online Monetizing, Marketting, Writing, Making Friends.I am working as a Software Engineer in a reputable MNC and hence I have some coding skills too. I am good at earning friends too. I have a lot of friends in HF as well as in my life.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]

Tell us why you would be a valuable asset:
I joined HF 2.5 years back and I have been active in the market place from last 2 years. I have absolutely Zero Open as well as Closed scam reports against me till now and I think Legion is also a group of highly trustable and experienced members. If I am a part of this group I am sure that I'll learn many things and also I can share my knowledge as well as many giveaways and contributions.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]

Elaborate on your achievements and future goals:
As I told before, my best achievement is Zero Open & Closed scam reports in HF and my life in this 2.5 years of active life in HF market place. I am now studying PPD/CPA as I am a newbie in that stuffs.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]

Tell us about yourself:
I am a 23 year old Software Engineer and I am working at a Multi National IT firm. I joined hackforums back in 2010.I learned a lot from Hackforums and my interest to learn more made me active here in HF; And ofcourse the Market Place. I have earned around 30-50k $ from online monetizing till now. But now I am a student in Innovation group as I still think I am not a master in Online Monetizing. It's not that I am greedy. I am completely happy with what I am earning now. But I believe that Knowledge is Power!!

AptCode - *June 11, 2013, 11:47 am*

Elaborate on your skillset: I enjoy coding as well as business management. I know the two are somewhat different, but business is incorporated in nearly everything. I own a small freelance company that is focused on software design and the like. I manage the finances, employees (there are only a few), and clients myself. In short, I would say my skillset is mostly management. There are far too many people here who would like to believe their skillset is "coding" or "hacking"; I believe that HF needs more marketers, more businessmen, and I am both of those. Due to my recent join date, I have yet to release a product on these forums; however, I have had my company for almost a year now, as well as have worked in management for a few years.

Tell us why you would be a valuable asset: I can bring knowledge and suggestions to the Legion community. "Legion" refers to a large number of a group, usually a tight-knit group. This is what excites me about joining Legion. I view myself as a natural "people-person" (I have to be, especially in customer service), and I am able to get along with nearly anyone. I can bring my own releases and ideas to Legion before anywhere else, because I would greatly value the opinion of my fellow members. I also can bring insight and positive feedback to other's ideas and suggestions, in order to build a better group and name for Legion each and every day.

Elaborate on your achievements and future goals: I have worked in management for 2 years, starting with a job I got when I was 16. I started as an associate at Panera Bread, and within 6 months I was promoted to a shift manager position. I have held that position to this day. Almost a year ago, I founded a company with a friend of mine dedicated to creating quality products and providing quality customer service. Since I am still very involved with my other job, it has been that my business partner has created and sold most of our products. However, I have always managed our finances, employment, and clients from day one. I am planning on attending college for Computer Science with a minor in Hospitality Management.

Tell us about yourself: I am an easy-going guy, and I believe I can get along with most anyone. Yes, I have had my differences with a lot of people (who hasn't), but what sets me apart is that I try to work things out. For as long as I can remember, I have been put in a leadership position (whether is be in school, in my job, or whatever else I embark in); and I think I perform very well there. I would take it upon myself to lead the members of Legion in my own way, so that we can make this the greatest group on HackForums. It would be a great honor to become a part of your group, Anonymous, and I look forward to speaking with you in the future.

Ulysses S Grant™ - *June 11, 2013, 12:04 pm*

Elaborate on your skillset:

Coding - I have not completely learned any languages but I have edited many codes to my liking's and used them .

Hacking - Learned how to do XSS hacking but SQLi I easy to me so is bruteforceing the admin screen . I love botnets had one with 20 k bots till My domain and hosting was canceled !

Website Dev - I have built many websites for my friends and working on accouple other sites not to

good with html but I recently learned alot more .

Graphics - I am not as great as calibur, but I am fairly good editing names on id's and recipts for my friends !

I am very good At investigating into things , I investigate websites To find out If they are legit or scamming people. Recently I investigating The "Suicide " Of a HF Member Who Was bullied In The ub3r Skype Chat ,And I made a promise To him the night Before He supposedly committed Suicide I was linked To a article From a local news station But his recent posts Before He passed Away Seemed Very Normal Not Suicidal .
UPDATE : It was not a suicide They just drove him off of hack forums With some very mean sites made about him with his dox and inappropriate pictures .

But I am also very good at Doxing And researching into things , If you would like a dox that I performed just pm me or ask Fanta he might still have it !
Tell us why you would be a valuable asset:
I believe I would be a valuable asset because I am always thinking of new projects to do and being a member of LEGION will help me get those projects done and do them in the name of Legion !
Elaborate on your achievements and future goals:
I have been to two leadership academys I then also assisted in teaching a leadership academy. After colledge I plan on going into the Navyseals and I really have no plans after the navyseals for I see myself staying there so long I dont come back !
Tell us about yourself:
Always was good at hacking at first it was Just to be better at flash games my friends and i used to play so i used cheat engine i thought i was a badass using cheat engine on school computers in elementary school, my parents couldn't afford a quality computer so my uncle Bought me a brand new computer so i thought back then ,I look at it 2 years ago at my grandmothers house It was a stolen windows 2000 , I from there larned batch coding and stupid things of that sort it wasn't till i was about 14 that I stopped hacking for fun ,I had a big house a Nice Gameing pc I bought myself then huge financial problems i move to an apartment I started hacking to make money , Now here I am about to go into the Navy Seals Hacking for fun almost all the profit i make i donate to HF or buy stuff on HF , My new goal is to help as many people as possible On HF

cYBEROPTICS - *June 11, 2013, 12:16 pm*
I have what i believe is intermediate skill set in SQLi(Sqlmap), I am working with a sect right now PM for name. I Just started coding in C++, C#, Java, Eclipse(very beginner in all of those langues.) I also have skills in Ratting, Doxing(intermediate), and DDosing(skid level, I have never coded one, Only used booters) :
I would be a valuable candidate because, I am very set on Human rights for not only Americans, but also for foreign countries. I also have a good amount of connections to people such as radio talk hosts, and other members of different sects. :
My Goals as of now consists of Finishing up College, Joining the Military (for personal means), and continuing being a part of a group or sect that has enough leeway to get caught in the Media's eye, and then Governments. :
I am a very serious person when that time comes, and on the other hand I'm wild and crazy. I've done immature things in the past and learned from them. I used to be a rebel in my teenager ages and I suppose I am still keeping that assist with me. When doing an OP or something as simple as a Google search I am in complete tunnel vision. If you have any questions please don't refrain from asking them. Thank you.:

Z0mbie. - *June 11, 2013, 12:23 pm*
Have seen this twice already happen.
Do NOT remove or edit your post.

You've all been warned.

UTRYUDIE™ has already broken one of the requirements being not to delete your application than posting another one afterwards.

Pendragon - *June 11, 2013, 12:26 pm*

Elaborate on your skillset: Mostly web app exploitation and a bit of binary exploitation (BoF, FSE)
Tell us why you would be a valuable asset: Because I haven't seen really any Legion members (other than Phizo) active in the wfh section, I'm assuming most of you are not proficient in exploiting web apps or bins. If you check my posts you can see that over 90% of them have been made in that section. I could help change this by sharing my knowledge and teaching others in the group.
Elaborate on your achievements and future goals: Coded a few exploits, a CGI shell, and found a 0day (Not a shitty MyBB plugin one).
Tell us about yourself: I really don't know what more you want me to tell you. Feel free to PM me if you'd like to inquire more information on my background and what I've done. I can also provide proof for everything I've stated in this application, just send me a PM if you'd like to see it.

Flaaffy - *June 11, 2013, 12:27 pm*

im not going to im just wondering, why cant we add stuff in and edit the post if we want to

Terry A. Davis - *June 11, 2013, 12:33 pm*

I was going to spice things up and do a code of sorts application, and put it in C++ syntax but I guess I shouldn't edit the normal app, sure it shows creativity but I don't know.

Elaborate on your skillset: Well as you can tell by the syntax of this application I know a moderate amount of C++ and starting to learn more about the GUI side and moving towards directX. Along side that I would say I could confidently set up a network to make it run smoothly and install certain measures to stop the basic hackers gaining access. Yet again I find myself learning more and more about the computing world I've come to the conclusion that my skill set is not the biggest, but what is in my skill set I try to hone it so it good for what I use it for E.G sql mapping, XSS, Networking and programming. etc.

Tell us why you would be a valuable asset: It would bring to the table someone who knows moderate C++, someone who is currently in college studying networking. With these two skills if anyone in Legion wanted to learn these I could recommend the best places or teach them myself. Another way to put it would be to say that the skill set is rounded off as a whole since I know you are looking for the highest of the high quality members.

Elaborate on your achievements and future goals: I've found a few Cross Site Scripts, on 2 sites. Telecom.co.nz and RayWhite.co.nz are my most recent, another one would be that I got into my current college course which is networking / ICT.

Tell us about yourself: Well I'm an 18 year old guy that is obsessed with learning more and more about computers constantly I find myself looking all around HF and the internet for answers to questions I may have, I guess one can't know everything but I try to get there. By that alone you might have guessed that I seem addicted with computers, well that is the truth. You might say that I'll one day code a girlfriend, or not.. But yeah I can't list everything about me here since you find more about me by talking with me.

Hopefully I have a better chance this time, thanks for reading Anonymous enjoy the week and reading through all these.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img] Elaborate on your skillset: Social Engineering I have been doing social engineering for a few reasons. Firstly, to help me with hacking. I usually use my social engineering skills to jack Skypes, XBL's, and many other things. I also use them for when I am hacking a website for reasons like finding a cpanels username which i acually just did the other day. These skills can also come in use when doing a prank call which i do sometimes. Graphics I could consider myself decent at graphics. I have been doing graphics for about 2 years now and I have improved over the years a lot. I really started graphics just so i can edit things for myself when I need to. After that i really started to get interested in it and i got much better.

Marketing I have been doing marketing for a while now and I started off selling things off Fiverr and also sythe. After those days I join hackforums and started selling here. I have sold many things here and i am hoping to keep them up.

https://hackforums.net/showthread.php?tid=3116704
https://hackforums.net/showthread.php?tid=3413482
https://hackforums.net/showthread.php?tid=3359244

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img] Tell us why you would be a valuable asset: I would be a valuable asset to the group because I can share all of my skills with the group and help them improve in the skills i have mastered. Also I can give away free graphics, some marketing tips, and also give away some programs which I have coded. I can also help the group become more known on HF by making giveaway threads and all of my hackpacks i giveaway. Overall I can help the group a lot and i bet they can help me.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img] Elaborate on your achievements and future goals: I have many future goals and many of them revolve around marketing. I want to become a better coder and soon learn C++. Once I get better at coding I will start to sell my products and hopefully make a lot of money. Another goal i have if to become a more known member on HF and i am going to accomplish this goal by helping members like i already do and also making HQ and helpful posts.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img] Tell us about yourself: I could honestly make this go on forever but i am going to shrink it up. I live in the United States and i am 15 years old. When i was younger me and my family moved to Italy. It really changed my life because my whole school revolved around computers. When I moved to Italy I didn't even know how to download something off the internet. Now I have improved so much on computers I am better than most of the people I know. After 2 years of living in Italy i moved back to the United States. I knew pretty good Italian which improved my studies of French in my new school. I also have kept my goals when I came back to the United States and you can see those above. Now i am 15 and i have a pretty big social life. I hangout with friends 2-3 times a week but i also spend a lot of time on the computer. Probably 8-10 hours.

Tell us why you would be a valuable asset: I believe I would be a valuable asset to the group because I'm unique in my own way. I enjoy helping people and guiding them down the right path, I love to be involved in group activities and participate in community events. I'm a stand up honest guy, I try to cut to the chase, get to the point without any of the useless chatter.

Elaborate on your achievements and future goals: I haven't had many achievements but I hope that will change soon, my future goals are mastering Java, and mastering SQL Injection.

Tell us about yourself: There's not really much to tell about me, I enjoy computing, gaming, and hacking. I try my best to conquer every challenge that lies in front of me and learn whilst doing so.
I tried to keep it short and sweet, I hope you like it. If you need any more information don't hesitate to PM me.I really shouldn't have made my application at 4:30AM. ?
Never apply for a group when you're tired.

Rustler - *June 11, 2013, 2:30 pm*

Elaborate on your skillset:
Crumbs Application

Monetization:
My marketing skills are vast. I am not afraid of being brutally honest about my skills. I have a colossal sale base, currently selling on Ebay, Hack Forums, Amazon, and on the YouTube market. I sell promotional video uploads on to a wide audience YouTube channel, which is a large money

making scheme.
I can monetize quite vastly via ad sense programmes, and create schemes and small business' to take advantage of my skills. I'm proud of what I can do.

Marketing:
Currently I have largely based social websites, such as a facebook page with over 41,000 Likes, and a YouTube channel with over 30,000 subscribers, that is were I make a large sum of money every month. This is one of the main sources of income in my life, and I see myself as a self-employed businessman.

Jacking:
I currently have basic and some detailed knowledge on taking control of Instagrams, inactive YouTube channels, and oddly enough, some twitter channels. I seldom sell them on Hack Forums.

Social Engineering:
I currently SE in the attempt to obtain virtual items such as Xbox Live membership and Microsoft Points, although I don't see my activity as affecting someone as it is not damaging anyone.

Graphics (Freelance Design) & Video Editing:
Currently I use Photoshop CS6, to create graphics such as YouTube backgrounds and thumbnails (one of the main video advertising methods).
I have a little more than basic knowledge and can create posters etc, if I'm requested.
I also can edit via Sony Vegas. Once again, just above basic knowledge, although editing is possible ex. putting a video together.

Gaming:
This is being placed in my application for pure interest. I game, Xbox and it's basic. That is all.

Tell us why you would be a valuable asset:
I have vast knowledge in many areas. I can use my extensive skills & high quality assets to contribute to the group.
I would bring a sense of professionalism with my language. Although, I'll also bring a sense of joy and happiness to the group. I like to be friendly, and I dislike arrogance. That is how I see it. I see myself as an important asset towards the group.

Elaborate on your achievements and future goals:
My achievements on Hack Forums aren't extremely exorbitant, although in my real life (outside Hack Forums) I achieve high grades, and currently attend the Top Ten Colleges in the United Kingdom. (PM me for the name if you're really interested. My college pushs me for high grades. I have previously been scouted for Scunthorpe United for soccer. I have achieved many soccer awards. Basically what I'm getting at is, I'm not lazy. I don't sit staring at a screen all day, although I do thoroughly enjoy it.
Goals for me are achieving a job that I can commit my time to the internet, Including Hack Forums. I also aim to go to University. I want to grow up with a happy life.

Tell us about yourself:
I am what some would see as your average guy. But I see myself as someone who has the

potential to go far. I thrive to achieve. If you want to know my personal information, just ask.

Malevolent - *June 11, 2013, 2:40 pm*

Elaborate on your skillset: As this is a group based on networking, security, and of course freedom; I pride myself in advanced Debian knowledge. Private SSH, along with public SSH knowledge is under my belt. I work with advanced traffic viewing, and mitigation constantly; as I help run a few websites. I have used many defense (front-end) softwares, such as Cloudflare. I have intermediate graphics knowledge, and I can present something graphical, if needed. I have been working around servers for seven years now, mainly in terms of cluster node game server hosting. I have high-end operating systems, and computer hardware knowledge, as well.

Tell us why you would be a valuable asset: I feel I would be a valuable asset, as I can bring my own unique, and far fetched skill set to this amazing group. I would love working among some of you, my peers, and I would like to be able to work towards a main goal. Working at my best, alongside others like me, is my ideal group.

Elaborate on your achievements and future goals: I have run multiple semi-popular forums in the past, and I have a large amount of classy contacts including: An Atari graphics developer, many freelance programmers, many network administration firms, along with network supporters. My future goals, are to join this forum, and walk on the front ranks with you all.

Tell us about yourself: I am a teenager, who long ago, started his love for everything technology. I have a very wide scale of skills, as I have worked hard to make sure I have a little bit of everything. In real life, I work as an IT for multiple companies, and I also run multiple server nodes. These nodes are for anywhere from game servers, to crackers, and everything in between.

I have no life, so you can expect me to be around when you want me to be around.
I can generally spend upwards of six hours on the computer, almost daily.

Thank you for taking the time to read this, and look me over. I very much hope you can find a spot in your front lines for me.

~SirSloth (John)

(Jun 11, 2013 02:50 PM)communix Wrote: [CITE] Im sorry I am new

also loling @ all those applications..
why does a "hacking" group need gfx designers / marketers / gamers etc?
Also Ratting and eWhoring.. lmao
You'd be surprised, hacking groups actually need GFX designers and Marketers for the following reasons. When someone makes a product within Legion, they need someone to either sell it or setup the sales for them, Which is why they would need a Marketer. GFX designers can help present the thread by designing a thread layout, they can also help with making logos, group

signatures, etc.

Kn1gh7 - *June 11, 2013, 3:00 pm*

Elaborate on your skillset: Social Engineering and anything blackhat related. I know enough web monetizing and SEO to teach people interested in joining. I guess you could also say anything computer hardware related; enough to have a civil conversation without looking stupid. I could also provide college level education assistance for those in the Legion who are in High school or in there beginning years on College.

Tell us why you would be a valuable asset: Like I said in my first response, I can teach people on how to get started with there website and there method of making money. I could teach people about blackhat related stuff to the extent of the rules here. Anything higher than that would need a person to PM me or my Skype.

Elaborate on your achievements and future goals: I'm starting to get back into Hackforums after about 2 months of working at my old job that limited my free time. I got a newer, better job that's much more easier on me. I plan on spending more time here contribution whatever knowledge have. Along with that, I also want to learn from others which I hope the Legion can accommodate for. Particularly from people who are much more advanced in monetizing who can provide me methods and tip to further improve my skills.

Tell us about yourself: I'm 19, male, and I'm a college student attending Emory University to pursue my Bachelors in Nursing (Yes I am a man, no I'm not gay, and yes you can laugh). I joined Hackforums a couple years ago for primarily Halo and Xbox related discussion. It wasn't until a year ago when I wanted to expand my time into monetizing to get a little extra spending money in my wallet. It's my nature to help people so I'd be willing to help anyone in the range of my skillsets.

Unacknowledged - *June 11, 2013, 3:00 pm*

Reptar - *June 11, 2013, 3:07 pm*

Elaborate on your skillset: My skills are the following:ExploitingSpotify Accounts [All Members] - https://hackforums.net/showthread.php?tid=3463824 I've literally given out over 200 of these accounts. Not one of these are shared with another member, so each member gets their own account to have. I will continue to do this until my method no longer works.Skype Premium Accounts - https://hackforums.net/showthread.php?tid=3132627 Skype accounts are a perfect giveaway because you cannot card this information. This stops blackhat activity and I've shared accounts with loads of members here before. I also have given members Skype credit to go with their accounts. Reptar's Personal Netflix Giveaway - https://hackforums.net/showthread.php?tid=2875548 I've been giving out Netflix accounts the longest out of all of these other premium accounts. I hate shared Netflix accounts because the original owner always changes the password. So, every account I make is for the original owner only. I don't believe in giving people cracked accounts and I hate the giveaways that do.? Hulu + One Month Subscriptions ? -

https://hackforums.net/showthread.php?tid=3406591 Hulu took the most testing for this. I've managed to do this without carding anything and using fake information to keep the users safe. Since the new method came out with Scott to give member's one month premium it's made my giveaways easier to do. All members get an unshared account and not hacked from someone else. Social engineeringNew Method? - https://hackforums.net/showthread.php?tid=3472651 I've managed to find a way to get Microsoft to give me one month premium codes by simply exploiting their memberships. This doesn't work every time, but sometimes it works and it's nice to have one month free. I've also social engineered Olive Garden for a $50 gift card, but their food was way too expensive and didn't cover my meal anyway.Giving things away Yeah basically everything I listed above from Netflix to Spotify. People love the giveaways and I try to make them as fair as possible. There's always a new chance to learning better ways to exploit these companies, but until I learn them these will do.

Tell us why you would be a valuable asset:
I would be a valuable asset to the group because I have a large knowledge about exploiting things with Paypal, Netflix, Spotify, Hulu and Skype that I can share along with members or help members exploit themselves. I'm also very active in the forums answering messages everyday and posting to help members everyday in anyway possible bringing a positive outlook. Now lastly I'm an idealist that always has ideas to making things better or just suggesting ideas to help out.
Elaborate on your achievements and future goals:
My achievements are to join a group and become strong active and make a mark within the group. I want to work hard as hell and love it because these giveaways are hard to maintain, but I can manage them. I'm looking for a challenge and to gain/give knowledge to members who deserve it.
Tell us about yourself:
I am a very laid back person that doesn't believe that punishing you the first time is necessary. I believe in telling you straight up that you're doing something wrong and you should fix it instead of just retaliating. I love helping the members here and always have. Everything I earn online I give back to the community because maybe I am an attention whore, but I want to leave a mark and be someone instead of just being known for the moment. Lastly, I love working really hard. I'm a workaholic and I want challenges and loads of work to come to everyday instead of 1-2 tasks.

Im gone brah - *June 11, 2013, 3:26 pm*

Elaborate on your skillset:Learning Sqli
Can the basics realted to PHP,HTML,AND API
Rats "Can almost everything"
Dns knowledge
Overall problems "huge knowledge in Data"
I can things from there and here.

Tell us why you would be a valuable asset:
I'm a nice member that, are helping peoples daily, atleast 10+ guys a day.. I'm a kind person that got his moto like this: You must give to learn..
Elaborate on your achievements and future goals:I want to master Sqli and XSS, that's proberly my future goals i guess.
Tell us about yourself:My name is Linus, i'm From sweden 15 years old.. I want to expand my carrier, and get deeper into hacking.. I want a broderhood.. i want friends, that could be my only chance now..
I tried to make my application kinda simple, becuse i'm not a master.
I'm really intressed into computer stuff.

I'm above average :D, Am i accepted?

Promise i wont order pizzas with pepperonis. ?

The Hundreds® - *June 11, 2013, 7:10 pm*

Elaborate on your skillset:
My main skill set lies in coding. I currently work in the data department for a major printing company, servicing such companies as Apple, United, American Express, etc. I am proficient in VB (the code I use at my job) as well as Java (the code which I am learning in school). Of course I've learned some C, C++, SQL, and other languages, but not to the point I'm comfortable bragging about them. That being said, I'm not bragging about my previous languages, merely stating I'm confident in my abilities to make HQ programs and code.

Tell us why you would be a valuable asset:
Once I get started on a project, I never give up. I have the knowledge and confidence to attack any problem head on, and the aptitude to learn the skills needed to solve any problem. As part of the group, I would contribute giveaways, tutorials, and be an overall and all-around helpful part of the group.

Elaborate on your achievements and future goals:
In terms of achievements, I currently hold a programming position at the age of 19, while many other 19 year olds are still working at McDonalds, or somewhere else that pays minimum wage. I won state debate twice for the state of Illinois in high school, showing that I can approach any problem with a completely rational mindset. My future goals include finishing up college and receiving my degrees (majoring in System Design & Analysis, minoring in Computer Science), learning as much about SQL as I can, and landing a secure and steady job to stabilize my future.

Tell us about yourself:
I am 19 years old, going to be a sophomore in college. I currently attend a highly ranked 4 year university, where I am pursuing, as mentioned, System Design & Analysis, as well as Computer Science. I absolutely love looking at problems from different angles, and contributing everything I can to a group discussion. I'm a very rational minded thinker, and above all, a team player.

Vince - *June 11, 2013, 9:08 pm*

Elaborate on your skillset: Look, I am going to be very honest here. I have beginner to intermediate skillsets within coding and security. I am applying to have an opportunity to possibly learn and expand upon that.
Tell us why you would be a valuable asset: To be honest, there is not much I could be asset wise. I can be mature, persistent and understanding. I am never mean towards members and try to hold myself to a higher standard.
Elaborate on your achievements and future goals:
My future goals are to learn and develop a skillset that will help me start a career to build my life upon. I don't want to go into this huge story because I know A.)Its a long, boring, drawn out thing to read. and B.) There is only a few goals I have set, and I told you the most important one.
Tell us about yourself: I am a 23 year old father of 2. 1 4 year old and 1 soon to be born. I am a high school graduate looking to get back into school and to learn something new that I could make a career out of. I do not know what else I could really tell you that you would be interested in besides that.

Slut Muffin N - *June 12, 2013, 1:58 am*

Elaborate on your skillset:I am very good at learning and picking up things fast. For example, my

dream job in the future is to be something that envolves coding. So I've decided I want to learn a language to help out with that. I found a teacher and he has tought me so much in so little. To be exact, I've learned so much about python in last week it's crazy.

Tell us why you would be a valuable asset: I can learn to do just about anything if you are willing to teach/ post tutorials or send me tutorials. I will actually keep doing it over and over until I got it perfect or better then standard. I strive to be the best. So with this, I will really be worth teaching.

Elaborate on your achievements and future goals: My future goals is to learn how to target websites for example "rsps" and grab the database and sell it or do stuff with the accounts. That is what I really want to do later on after learning.

Tell us about yourself: I am a very smart person, I am very good at picking up on new things. I am 14 years old, I strive to learn more and more. To the point where I feel successful and comfortable with the subject. I've been wanting to learn to sqli and deface/target websites for a while. I've tried following dumb tutorials but none have really worked. The thing that got me wanted to learn how to do this was seeing an rsps get defaced and the people who sold db got so much stuff. This is why I want to learn. To do that one day. This is me in a short paragraph.

Good luck to everyone else who applied. I hope to be apart of something special.

(EDITED (sadly) to fix a centering mistake, was right after posting, extremely sorry).

SIM-570417 - *June 12, 2013, 3:29 am*

Elaborate on your
skillset:

Web developer/Designer: html/css/js(,jquery)/php/mysql
Programmer: C/Cpp, .NET, Python, fasm(beginner)
I mostly like coding on php.
Bad designer, photoshop beginner
I also do seo, as i own a tech blog.
Beginner cracking/malware analyzing, pentester

Tell us why you
would be a valuable asset:

I can contribute to the group, sharing my knowledge and learning also.

Elaborate on your
achievements and future goals:[/
size]

My future goals on hf are being an reputable seller as i plan on selling my tools on here, on the other side i work as a freelancer, advertiser

[size=medium]Tell us about
yourself: Im 18yo from Albania(balcan), working as a freelancer.

Ayden™ - *June 12, 2013, 7:07 am*

May everyone stop using my separators :/
- Ayden

~Tom~ - *June 12, 2013, 9:31 am*

Elaborate on your skillset:

Hacking
Unlike half the skids on hackforums and Legion in general I actually have
the ability and willingness
to learn how to properly hack and currently do so outside of hackforums.
I currently know a few methods
some include CSRF, Lfi, Rfi and even more methods.

Coding
Currently, I'm learning a few languages such as Python and finishing PHP. I currently know Html and most of PHP.
Again my willingness to learn helps me a lot with this and I enables me to devote a lot of my time to coding.
I will be learning a lot more however when I finish my exams.

Graphics Design
Throughout my time on hackforums and the internet I have develop a bit of the ability to design graphics.
I know that I'm not the best at graphics but I try to practice a lot and just with that I hope I improve.

Computing
I currently have a good knowledge of computing hardware and I'm very active within the computer section
with over 1000 post on hackforums. I also have built my computer with the help of a friend and preformed all upgrades myself.

Tell us why you would be a valuable asset:

I'm willing to learn whatever is needed, I'm really interested in learning hacking which I feel that group is meant to be
about and thus I'd be dedicated to actually learning new methods. I'm also part of the Pac Cyber EaglezOrphans
that really show's how much of a hacker I am.
I actually want to learn though and I can also help out with whateve

Elaborate on your achievements and future goals:

I really want to be able to hack without using anything else. I also feel that learning a full code language would be good achievement for me. I also feel that it would be a goal of mine to advance from the Pak Cyber Orphans to the Pack Cybe Eaglez as we have many hazxor'd websites which you can see here

Tell us about yourself:

I'm a 17 year old L33t Haxzor who will take down any website I once hacked the pentagon. I also devoted to learning new things and also like to learn so that would help with the group and help anyone inside the group and learn if anyone wanted to teach me. I can get my Pak Cyb3r FrI3nD$ to vouch for me. I'm currently in school studing I.C.T, Business Studies and Moving Image arts for A levels. I plan to develop my I.t knowledge further and thus developing a caree in the I.t sector. I feel that it would suit me well as I currently love working with computers and think it's great to gain new knowledge when working with computers. I also think that due to the state of the economy it would be a good route to choose to have something a long these lines as there's not many jobs elsewhere. I think my goal would be to get a Masters in Computer Science and from there go on and develop my networking skills and get some degrees within networking.

I appreciate that you have took time to read my application and wish you and all the members who apply and get in, the best of luck,
Thank you.
~Tom~

?ystem - *June 12, 2013, 9:38 am*

Elaborate on your skillset:

My skillsets are kind of numerous, ranging from application development all the way to philosophy. I'm knowledgeable, mostly, with computers and general sciences, especially astronomy and cosmology. As well as health regarding the human body. I'm also a very talented artist, and have been hired to develop people's tattoos for them due to my talent.

Computer repair, is another. I'm actually quite knowledgeable with computers, and have even been known to aide in bettering their service provided. Kind of brought them to shame unfortunately.

Tell us why you would be a valuable asset:

I think I'd be a valuable asset because of what I can provide to the group and all members, regardless of in Legion or not. That's something I take pride in, that I treat everyone and everything

the same. I can provide insight in things that people may experiencing issues with, from programming, computer repair, malware removal, social engineering, and pretty much anything you can necessarily imagine. Feel free to look into my past, and you'll see how vast my knowledge and help has been to others.
Personally, I'd like to think of myself as being a good teacher, and I can aide other members in the group and throughout the forums with learning how to perform certain tasks, especially in regards to social engineering, and infiltrating systems, and the knowledge of malware usage.

Elaborate on your achievements and future goals:
My future goals is to continue on with schooling and become an astronomer, or at least begin studying it more in-depth. It's my life's passion. Already I've been contacted by a few different schools who're looking to have me as a student.
My accomplishments within my life, just in general, are some of the things I'm quite proud of. Let's see. A few years ago, because I was working with mentally and physically handicapped adults, I wanted to help them out a bit more, because of how I could relate to them and make them feel better. So I took some courses and finally got the chance to become a Person Care Assistant, passing with flying colors.
In school, originally, for years and years, I seemed to struggle. Failing, or just lacking behind throughout my childhood. Then, sometime later on in the years, I went from bottom 10% to graduating top 3% of my grade. Got recognition in my earlier school years though and winning awards for my projects. Name, for one, when I was a child, I developed a prototype for how to make vehicles fly by manipulating the Earth's natural magnetic field. Only issue was the braking system...
Then, from there, I began to think more deeply in regards to things like "Who am I?", "What can I do?", and went forward with being ordained and becoming a minister. I have all the documents to prove, and have no problem giving proof.

Tell us about yourself:
Well, not taking into mind a lot of the things I've already listed, I'm a pretty easy-going and nice person. I love helping out the community and all alike. Just do. I don't watch television, and haven't for over a year now. Literally, it's just collecting dust in the corner. Although, I do spend a lot of time wither with my fiance and good friends throughout the week, but when I'm not doing that, I like to spend my time online reading or watching documentaries regarding the cosmos, meteorology, biology, and astronomy. The field I love the most actually is exoplanetology(extra-solar planets outside of our own solar system, and finding the ones in their host star's habitable zone, in specific)
I remember when I was younger, first actually trying to learn about computers, how they functioned, what they can do, and legitimately attempting to understand them. That lead me to various topics of study, especially towards their security. I've always been an intelligent person, and I like challenges. So, coincidently, this lead me into the blackhat field of study, which I thought of as being fun. Like, I found it all so fascinating, and I loved how that things always changed and that you always needed to find out new ways to do things. Like, infecting systems, finding different methods to not be traced, and that the code always needed to be re-written. Although I am knowledgeable in regards to RAT's, much like most people, that's not the extent of it, not even by a long shot.
Forgive me, I don't really feel like explaining all I can do, just due to how large the application would be. But I'd be honored if I were given the chance to show it to you.

But, as was noted in the beginning of this thread, you may be asking applicants questions just to verify whether everything they've said is the truth, and I personally welcome you to chat with me. I can provide proof of everything if you'd like. Looking forward to some feedback, and hopefully we'll be speaking soon.

H0p.e - *June 12, 2013, 2:45 pm*
Elaborate on your skillset:
Best way to tackle a skillset is, in my opinion, a list: Experienced in Social Engineering

The biggest thing I stress when it comes to manipulation is that the main person you have to trick is yourself. If you, your body, believes it - everyone else will follow. Being good at not being yourself while tricking your body to act as though this new identity is itself, that is the key.

Well versed in information gathering

Whether it be online or in person, I'm well versed at information gathering. You can only make use of the tools at hand if you know what they are. The best advice I could give to someone looking into this area would be train yourself to analyse what you can use as leverage against the problem. This advice applies to many other areas as well.

Skilled in analyzing networks

I've been studying network security for some time now. Knowledge is power. The more information you can gather about a person/organization, the more power you have. Wars have been won and lost over bits of information.

Expert in remaining anonymous

Proxies, tunneling, Tor, Whonix, you name it - I've studied it. Through extensive research into these topics and others I'm expert at concealing an identity. Information is the most dangerous thing to an individual. Sometimes the power behind it can put you at risk. In these situations, it is advantageous to get it out there without it being linked to you.

Broad knowledge of different Programming languages

Some level of understanding of HTML, CSS, Java, C++, Batch, Lua, Javascript, PHP, and many more languages. If I can't fully understand it directly, I know it enough to figure it out.

Passionate about sating both my thirst for knowledge and my need to teach

One thing I'm currently expanding my knowledge in is coding. Tackling Java now, moving to Obj-C soon. This is one of many examples of my constant growth. When I am satisfied with what I've gained in these topics, I will turn to helping those who also want to learn.

Tell us why you would be a valuable asset: I am extremely passionate concerning knowledge, especially when it comes to technology. As a member of any group I'm a part of, I yearn to soak up any information available to me. I thrive in passing that information on to those willing to learn with me, elaborating and expanding my own knowledge in a way that is easy for others to learn from. I'm an honorable human being and remain true to those standing with me.

Elaborate on your achievements and future goals: I have learned a lot here, as well in life. I consider the level of understanding of technology I have to be an achievement, but always strive to learn more. From hardware side to software, networks to 555 timer circuits, radar to PCB construction, I'm your man. My future goals are to make a career out of what I'm passionate about, whether I eventually become a teacher of some kind or have the privilege of working with electronics for a living.

Tell us about yourself: My name is Brian. I'm passionate about many things. I'm a Marine in the avionics field, and love what I do. Not the kind of individual who spices up a post with graphics, I prefer direct no-bullshit representations of oneself.

I look forward to being a part of this group, thank you for reading over my application. Best of luck to those applying alongside me.

Knuckles - *June 12, 2013, 5:14 pm*

Elaborate on your skillset: I dont have a very high Skillset as i was in the forces for 2 years as you can see im a 2009 member been here a long time when i was here before I was more into Social Engineering And RATTING and spreading and handing out services and advice for people who needed help.

Tell us why you would be a valuable asset: I always find time to make for newbies and try help out as much as possible weither it be someone has an infected system i will try my hardest to help if no ther help is being given by a more valued member of the HF Comunity.

Elaborate on your achievements and future goals: Not going to lie but I would like to try and learn

some new skillsets such as coding and learning Pearl.
Tell us about yourself:Im just a normal hardworking guy come on HF to relax and browse the forums and have a good laug with the members and try help the one out in need iI can basically get on with anyone.

Demi Lovato - *June 12, 2013, 5:20 pm*

Elaborate on your skillset: My skills i would have to say would be. Kindness. I love being kind to people by helping them with whatever they need or just being there for someone when they need it. I also have skills in gaming. I game everyday, i love playing xbox more than anything pretty much so i consider that a skill lol. another skill i have would be cars. I know my cars pretty well, i love talking about cars looking at cars and driving cars. If i am not playing video games browsing HF or sleeping i am doing something with cars lolol.
Tell us why you would be a valuable asset: I believe that i can bring i very HQ and helpful member to the family. I also believe that people will get to know me for the good :P i would love to come help out with whatever i can help out with :)
Elaborate on your achievements and future goals: I assume you mean achievements with hackforums. I guess one of them would be getting ub3r i got it not to long after i singed up. When i joinned the site i loved it and could not get off so i bought l33t. a month or two after that i bought ub3r sense then i have upgraded 1 person to ub3r and 3 to l33t. I have over 2.5k posts i also find that a good achievement.
Tell us about yourself: well my names is jon and I get out of school in two days so i will be very active on hackforums. I love playing video games and always have my whole life. I love cars so much i really cant explain it. I have had a lot of cars and i have built many too. 1 car that i built totally from scratch was a 1967 dodge cornet with a 440. me and my dad built it when i was a youngen. Now i am more into tuner cars and JDM cars if you cant tell by my signature lolol. and yeah so i love cars and video games. Another thing that i like to do is help people and listen to people. I dont know why that i do.. but i do. i have been pretty active on the site so when people pm me or try to get a hold of me somehow i will respond pretty fast. Sometimes i wont be able to because of school or a car meet or something lol but other than that i will pretty much respond fast. As you can see i am not amazing with grammer but i am from USA and i do speak English. When i was younger i blew off school and stuff so i never really learned the best grammer with typing lolol. i have good grammer when i am talking a swear.. :P

NoodleBot™ - *June 12, 2013, 10:31 pm*

NoodleBot™'s Application
Elaborate on your skillset:
I am a RAT/Keylogger/Botnet expert, Malware removal expert, some good batch knowledge, some good VB.Net knowledge, some good Java knowledge, experience in network security and IT computer repair.

Tell us why you would be a valuable asset:
I would be valuable because I am a valuable person, very friendly, helpful and easy going, treat me the same way you want to be treated as I do the same etc.

Elaborate on your achievements and future goals:
Currently salesman for Epic Java Reloaded™ educational software and new owner of Envy Miner cryptocurrency miner.

Will be opening my own VPN service pretty soon and hope to have my service sold here on HackForums soon!

Tell us about yourself:

I'm a 19 year old businessman. I work part time and have graduated high school. I am working to support my family as well as supporting myself to go to college or university. Most if not all sales profits I am making are going towards investments for other business opportunities or straight directly into my school funds or lively bills I pay monthly.

I am straight forward business, no surprise, no catches. Just business and loyalty.
I appreciate you reading my application. Good luck to all applicants. Have fun!

Spons - *June 13, 2013, 11:38 am*

Elaborate on your skillset:
My skill of predilection is the Programmation :
i first started the programmation if we can tell that by language of description like HTML/CSS at 11 year old
and when i was 13 year old i started the C++ it was hard at the beginning but know i'am really feeling well with
this language, i can do really big project in c++ with member of group if they have people interrested. Not like majority of people here i don't started hacking and after programmation i started programation before hacking.On this moment i'am programing a crypter in autoit
that is finished I can programm lots of tool it's not difficult i know too java and i can programm with it
But i'am really a shit in design. So i can code in html/css,php,c++(favorite),autoit,a bit in asm and java ?

I have knowledge on hacking but not gonna to enumerate all so if you have question ask me ?

Tell us why you would be a valuable asset:
I could share my knowledge in programmation with the group.Programm tool in the limit of the resonable to members of the group
who ask me or programm tool for the group in general.I won't be a skid i can really contribute to the group ?
Elaborate on your achievements and future goals:
Some Projects :

-I have already coded a crypter in c++ but not basic crypter with API resource ect... I was using a private injection(if we can tell that)
But i aborted it because it was taking me lots of time ,the crypter is finished i can see you the source and if someone in the group
want to pick up the project with me we can ?

-I have made a simple binder in c++

-Also started to code a really small base of game engine in c++ with OpenGl library who managed heightmap,texture,model 3d and
some others thing

-Now i'am coding a crypter in autoit totally finished with lots of features just need to make some adjustements

For my Future Goals i would really like to contribute to the community in programming public/private tools to be a coder i
n the group and programm tools for other.

Tell us about yourself:
since i'am 11 year old i'am passionated
with programmation i code on avergae 3hours a day but i'am not a unsociable guy ^^ but when i'am in my home i passed all my time on my
computer.

Thanks to take the time to read my post ?
PS:I'am not really gifted for the presentation ? And i don't have lots of post or rep but just give me a try and you will see?

Eternal. - *June 13, 2013, 11:39 am*

Good luck to any and all trying to get into Legion. Anonymous is an awesome owner and this, in my opinion, is his star group. Expect awesome things.

Flaaffy - *June 13, 2013, 11:49 am*

(Jun 13, 2013 11:39 AM)Eternal? ?? Wrote: *[CITE]* Good luck to any and all trying to get into Legion. Anonymous is an awesome owner and this, in my opinion, is his star group. Expect awesome things.
this ^^ i doubt i will get it, its such a high calibre group!

KING - *June 13, 2013, 4:24 pm*

Legion is high quality group i like it but I dont want to join it yet but Good luck all appliers.

Lil Winslo - *June 13, 2013, 5:43 pm*

Elaborate on your skillset:

Coding -
PHP
Java
HTML
CSS
SQL

Gaming -
Minecraft Builder
Play a good amount of CS:GO
I'm really into Civ (5)
I like playing video games in general

Monetizing -
Social Engineering
Several CPA/PPC setups that bring in $2-$5 a day (Not great but I don't use it as a living income)

Graphics
Pretty good with photoshop
A bit better with C4d (HDRi maps and such)

Tell us why you would be a valuable asset:
I love Hackforums and I love contributing to its Community. I like what your group aims to do and I want to be a part of it. I'm pretty good at what I do and I want to get even better.

Elaborate on your achievements and future goals:

I want to become a better Coder, Graphic artist, and Marketer. I want to make more money online so that I can put more investment into these goals and into the goals of others. In terms of Achievements, I've created a few small websites but they are no longer up due to hosting issues.

Tell us about yourself:
My name in real life is Adrian, I will keep my last name undisclosed for privacy purposes. I'm 15 years old (but I believe that I write well enough for it to not be noticeable, but that's up to you to decide). I've been trying to get into groups like this since I was kicked out of Terror because they were selling it. I think I may have tried to get into this group when I first joined HF, (January 1st by the way, contrary to what my account may say), and you guys still seem like a group of very well-composed users. I've been coding for over a year now and it's still one of my favorite things to do, as well as gaming and graphics. While the chances are slim, I do hope that I will get into this group.

With full Sincerity,
Ivysaur ?

Dedotaded Wam - *June 13, 2013, 10:38 pm*

Elaborate on your skillset:I am very good with RATs, I have my own RAT Help Desk, I closed it because it got boring and, none of my RAT Helpers where on. I am Very good at listening and getting along with others. My Motto is: "Treat others the way you want to be treated" So I tend to be more on the nice side most of the time.
Tell us why you would be a valuable asset: I would be a valuable asset of skills because I am good with RATs and if anyone needs help with them, I will set them up and take you through step by step making sure you know how to do the stuff I am doing. I also am a valuable asset of skills because, I tend to be on the nice side of things so I am usually the one who isn't being a dick to everyone.
Elaborate on your achievements and future goals: I want to be a Game Programmer or just a regular Programmer or I might get into Photoshop, because I heard that you can get a lot of money doing work for people, and I like making photos look a lot more better then the original photo and I would help the Hack Forums community in the Free Requests section, helping them with their GFX needs.
Tell us about yourself: My real name is Corbin. I am 14 years old, and im that type of guy who likes to laugh and make everybody else laugh. I play on AnonMC and I love that server.

Freddy Kru?ger - *June 14, 2013, 7:54 am*

Elaborate on your skillset:
Coding :
-Visual basic
-Learning Java and LUA
Graphics:
-Decent drawing skills
-Basic photoshop, not really interested in GFX
Gaming:
-Been gaming before I could walk
-Has A LOT of experience with modding/hacking games
-A pretty good LoL/Dota 2 player who is willing to teach (Note that i'm in bronze because I choose not to play ranked)
Computing
-I work at a PC shop that fixes computers
-Knows both windows/Linux
-Has worked a lot with iOS and Android
-Can fix small console issues

Networking
-About to start a networking course soon
-Knows a bit about backtrack and has done pretty cool shit with it
Music:
-Has been playing bass for 6 years
-Was in a death metal band for a few years and even played live once
That's all that comes to mind atm.
Tell us why you would be a valuable asset: By accepting me you'll get a nice/loving member that really wants to learn and is willing to teach what he knows.
Elaborate on your achievements and future goals: My current achievements are currently very little but I am working to change my life and achieve big things.
Tell us about yourself:My name is Ameer i'm 18, I'm from lebanon, I'm about to start uni soon and work part time at a PC store, I've been looking for a group to call home for a while and hopefully I found it, thank you for considering my application. ?

DopedUp - *June 14, 2013, 4:24 pm*
My dream group!
Unfortunately I need to build up more of my skills! But once I reach them, I will definitely apply!
~Doped

Prime - *June 15, 2013, 3:33 am*
Elaborate on your skillset:
Monetizing, VB.NET , Social Engeneering, Social Media, Network, SQL, HTML/CSS/PHP Knowledge, SEO, Being studious and very active

Tell us why you would be a valuable asset:
I would love it to share my knowledge to the community in the name of the Legion by posting helpful tutorials and assisting members when they need help. I am always interesting in expanding my knowledge and this group can motivate me a lot more to learn more and share more.

Elaborate on your achievements and future goals:
I'm planning to improve my current skillset and trying to become a master in what I can.
Tell us about yourself:
I'm 19 years old and I am a person who loves to learn. I am also an independent and confident person because I have a lot of confidence in my ability. Respect is something what means a lot to me. I respect others who respect me. ?

PuzzuS - *June 15, 2013, 6:36 am*
Elaborate on your skillset:
I know some languages:Pascal,java,objective C(basic),HTML,php(basic).
I'm not bad in: XSS , SQLi ,LFI,FPD,RFI.
Tell us why you would be a valuable asset: Well , i can share my knowledge and if anyone need some help I can help him if I'm able. If i don't know something i can learn that fast.
Elaborate on your achievements and future goals: I'm in the Microsoft's HoF and Paypal paid me for some xss. I did not want to expose myself too much so I did not do extraordinary things. In the future i want be better in web hacking and make new experiences.
Tell us about yourself:
I do not like to talk a lot so sometimes i will not speak so much. I was Antagonism for some time and now I want to have new experiences.I am a honest person.One problem is perhaps my internet connection, does not always work properly. I like pizza.

ProTech - *June 15, 2013, 8:57 am*

[Video: http://www.youtube.com/watch?v=w2fld_uM-3Q]

rfz777 - *June 15, 2013, 11:34 am*

Elaborate on your skillset: My skillset is in programming. I currently know HTML, CSS, PHP, and I am currently learning vb.net and JavaScript. I know how to make basic graphics with PhotoShop and GIMP and related programs. I have a small knowledge in security, but I had an internship last summer at a Non-Profit Organization in Washington, D.C. In this internship I helped manage databases, creating backups and restoring the databases when needed. I interned there the entire summer. The servers they ran on were Redhat Linux, so I gained knowledge in managing Redhat.

Tell us why you would be a valuable asset: I could be a valuable asset because I have a wide knowledge in many areas, so I can discuss many topics in the Group Forum. I am a perfectionist, though I may not always reach the Moon, I atleast reach the stars. I hardly start arguments, and I am good at moving into new/foreign environments.

Elaborate on your achievements and future goals: I hope to get admission into Virginia Tech, and I hope to do a major in Computer Science and a minor in Electrical Engineering. I so far have met the GPA requirements, for I have a 4.4 average.

Tell us about yourself: I'm 16, I go to Thomas Jefferson High School for Science and Technology. I have a passionate love for basketball and science. Science and maths have always been my favorite subjects. I am on the Varsity basketball team as a Sophomore, and I play point-guard. I have been learning programming since age 13, and I've gained strong knowledge in the area of web-developing. My father works for Oracle, so I've worked with ExaData machines and other super-computers. I've worked with Oracle Linux and Redhat Linux, and Solaris(Oracle's Unix). I joined hackforums around last year, and I decided to extend the ability of programming into blackhat.

Thank you for reviewing my application.

Flaaffy - *June 15, 2013, 1:34 pm*

has anyone been accepted yet? just wondering when anon wiill start approving + denying people

He's a bit flat out at the moment, but he will be contact you guys, so don't worry about that.

?nonymous - *June 16, 2013, 8:39 am*

I will not contact every single member to tell whether or not they're accepted.

I've seen quite a bit of applications with lies so far...

I'll be inviting half a dozen members and I'm waiting for a few more applications until I decide.

NoodleBot™ - *June 16, 2013, 8:29 pm*
Thanks for keeping us informed. Excited to see the results of this.

KNOWLEDGE - *June 17, 2013, 1:22 am*

Elaborate on your skillset: I'm pretty experienced within networking, how it works and how to secure the status. This is attending to DDoS, how to prevent it, etc.
Tell us why you would be a valuable asset: Any such Amplification booters out, I would be in to help, or produce my own for the group. This would expand what I could bring within the group.
Elaborate on your achievements and future goals: I wish to achieve all round respect over Hackforums. Showing HF what Legion really has to offer.
[b]Tell us about yourself: I'm just a ordinary person. I'm 16, and I take classes for networking in school. I'm looking to be an IT for corporations. I was never really experienced with Networking and stuff until I first got my computer. It was a Windows XP, 997MB of ram. Real slow, yeah? Well, I went online, got infected. Learned about it. So I built another computer, infected it aswell and learned to trace down what happened, and how it happened. This is where I got good at it, learning more about Networking, Etc. There's a little bit about me. [/b]

I Am JT - *June 17, 2013, 4:29 am*

Elaborate on your skillset:
I am a web developer & Marketer. I have worked on various web based projects and have done web design for multiple company's as well as online marketing management. I teach Innovation Students Web development to help them improve there skills and i invest for profit when i see a good opportunity

Tell us why you would be a valuable asset:
I can help with any web based projects and would always be willing to help other members out to the best of my ability. Im not going to say all the stereotypical bullshit about how i want to "Make friends" and this would be a chance for me to communicate yadda yadda yadda. But i would truly feel honored to become a part of the prestigious family known as legion

Elaborate on your achievements and future goals:
I Am currently Student in my final year of high school in Australia, I sit Advanced Computer Sciences Advanced Applied Information Technology and Business Management and enterprise. Next Year i will be doing my bachelors degree at university which will be a Bachelors of Business Majoring in Marketing and Management of information systems. if you would like to see some of my Web Design work PM Me. I ran www.InnovationHosting.org and have ran multiple forums of my own in the past. I also have another project or two in development and my only current project is www.SocialPromotions.net which i will soon be selling.

Tell us about yourself:
As i said above i am an Australian in my final year of high school (Aged at 17) I have had a extreme interest in computers and business since a young age and i know that one day i will end up working in those fields. I Do part time DJ'ing and EDM Production alongside my real life Job and all my internet projects. I am currently a member and mentor of the Innovation Group.

Thank you for taking the time to read my application

xhflhkeuhwguu34 - *June 18, 2013, 7:52 am*

[img]http://d.pr/i/LebC+[/img] [img]http://d.pr/i/mKRS+[/img]

Elaborate on your skillset:I am a very good web developer and can assist the group in creating beautiful (or crappy, your pick) websites for any products or pages.

Tell us why you would be a valuable asset:I'm one of those "pixel" people who must have every pixel right. I can create beautiful designs and code.

Elaborate on your achievements and future goals:Future goals? Not having to apply to a group again.? To work on learning JavaScript and AutoIT.

Tell us about yourself:I'm somebody that loves coding and this forum community. I have a lot of time on my hands when I'm not a counselor this summer.

Freerunning - *June 18, 2013, 9:00 am*

Elaborate on your skillset: PHP, Mysql, Web Attacks like (Sqli and Xss), Some programming language VB6, VB.NET and java, Video Editing and Photoshop.

Tell us why you would be a valuable asset: I'm a fast learner and hard working person. I don't usually give up and very resourceful too.

Elaborate on your achievements and future goals: I want to become a security analyst and currently working on my thesis right now hope I'll get the best thesis again.

Tell us about yourself: I'm Blade 21 years old from Philippines I usually spend my time in front of my computer 10+ hours a day online. If I don't answer it means I'm AFK I don't turn off my PC when I'm AFK it means I'm practicing Parkour/Freerunning. I would like to be a member of a the Legion I'm sure that it will be a great help for me to improve my skills and in exchange I will do everything I can to help my co-members.

w?rlockt - *June 18, 2013, 9:09 am*

Elaborate on your skillset:

Coding: I am experienced in basic Python and AutoHotkey, but I also know a bit PHP, Visual Basic, VB6 and JavaScript.

Graphics: I do graphics for about a year now and I also had and have a Graphics Shop, where I sell Logos, Signatures, Thread Designs, etc.

Botting: I just began working with bots and I am currently setting up a botnet which I will mostly use for DDoS.

Tell us why you would be a valuable asset:

I can help to code malware and software and maybe in questions regarding bots and botnets.

Elaborate on your achievements and future goals:

I think the biggest achievement for me was when I began to understand basic coding and programming and I got interested in how software works. I thought about how something was written and in what language and I still show this interest. I ask myself how things could work and I think about new programs every minute.

My biggest goal is to master a coding or programming language and make money with coding/programming, so the stuff I love to do.

Tell us about yourself:

I am from Germany and actually in the 10th school year (There are 12 in the region I live in.). I signed up for a coding class next year where I will learn Java.

I do coding and programming for about 2 and a half year now and the first 'language' I learned was

Batch. I wrote fake viruses and quickly got interested in real malware. Some times after I found Visual Basic and I coded some basic programs but never really got interested in it. I soon found Python and began to love it which I still do today. It is a very flexible language and I started to code malware in it, too. I made a basic RAT with basic functions which worked over Sockets but I changed it fast to HTML.
I then used some codes out of the RAT for a Bot I made some time later but I stopped working on it, because I started to interest me for AutoHotkey. I started learning it and I still do it today and I hope to release something nice in it, soon! Maybe I will study AutoHotkey a little more to get used to it and start coding malware.

Dubstep Ducks - *June 18, 2013, 10:21 am*

Elaborate on your skillset:
-Bachelor of Computer Science
-Know 5 computer languages(c, c++, flash, perl,php)
-pen testing
-Sqli
Tell us why you would be a valuable asset:
I take orders well. and have alot of free time.

Elaborate on your achievements and future goals:
well as you know i have my degree and i have a few contracts with software company
i want in the end to own my own software/Hosting company
Tell us about yourself
Name Malcolm Cleere. Age: 21 Very Out going. married.:
i will keep it short.

Target™ - *June 18, 2013, 10:53 am*

Elaborate on your skillset: Social Engineering,RATing (not the best,but i know how to spread/etc.),E-Whoring ,Gaming and Sales.
Tell us why you would be a valuable asset: I would be valuable because i am a kid who would dedicate to a project/etc,i don't like to give up and i'll try my best on whatever. I like to learn about knew things,i am a quick learner and i am always curious and willing to help. I have my own methods,my own ways of making money,and always can share it with fellow members.
Elaborate on your achievements and future goals: Well i don't know if i would consider this an achievement,but i can certainly make easy real life cash as a fifteen year old kid. I've made atleast $2,000 this year (near their). My future goal is to finish highschool and move onto college football (D3,or anything is fine.)
Tell us about yourself: I am a exicted,happy kind person. IRL i am considered one of the nicest people. I don't pick fights, i don't gloat/brag,i follow rules well and i listen. I like to lift weights,i like football and i love all types of sports. I put other people first before myself.

Bohemia - *June 19, 2013, 6:01 am*

Elaborate on your skillset:

My skillset starts from basic programming and goes till hacking and also moneytizing online, I have been into programming from the past 2years and hacking from the past 13months .. I have made around 1kUSD all in all by just basic hacking help, such as providing security to my own college website, setting up rats, helping people improve their blogs. Let me ellaborate on my skillset.
Programming

I know HTML, C, C++ well because thats what we have learned yet in college, next semester I will

be starting with java and PHP so most probably in next 6 months I will be known to that also, Iam also in the web designing and security team of my college. This is my basic skillset of programming, no bluff at all. You can PM me asking more details, Iam sorry for not having much to say.

Hacking

I have been hacking for a while now, I know basic attacks starting from sQli, XSS, Local file inclusion and also Remote file inclusion, until one day I was introduced to Rats and started Ratting, I was FAIL. Then I found how to spread on torrents and within a month I had aroun 450-500 slaves running, but then I had to move to another country for my college and lost touch with everything, but now Iam back. But again, you can PM me for any information.

Networking

Networking is one thing Iam really interested in but dont know much about Iam a n0ob you can say, but next I will be joining my CCNA classes and will start learning the basics, but I know a little about ports and routing a little bit as well, but to be honest Iam skid in this. If Iam accepted I plan on learning from PandaSec as I have seen him active in WiFi section.

Social Engineering

Well well, this is one thing Iam fully confident about .. Iam a master eWhorer and one of THE best on this forum.. you can check my threads, helpdesk and also my eBook which is highly vouched by the customers themselves, I have high level of SE skills which have earned my 800$ only via eWhoring, Please feel free to contact me for proofs.

Virus removals

I have a good knowledge on how to remove viruses and have done it a lot of times for HF members and friends as well, I know how to use malwarebytes and also analyze logs, I also have a good knowledge on how to remove crypted RATs and other trojans.

[img]http://i1.minus.com/ibgAYyubplTcOC.png[/img]
Tell us why you would be a valuable asset:
I consider myself to be a valuable asset because I have been on hackforums for more than two years and deem myself reputable because in these years I have no scam reports, no disputes, no negative reputation which shows my reputation overall on the forum and on the other hand I have quite a bit knowledge in the field of Hacking and I think it will be a good experience for me and as well as the entire group because I bring a lot of tricks to the table.

[img]http://i1.minus.com/ibgAYyubplTcOC.png[/img]
Elaborate on your achievements and future goals: Achievements

My achievements are not massive but are enough for me, Iam a college student living away from my family and pay my bills .. mind you I dont have a job or something I go to college, study and just go online. I make money myself on the internet for my expenses and I really am proud of myself on that, today Iam .. what most Hackforums members want to be, that is self dependant.

Future Goals

Right Iam trying to learn as much as I can, as you can see I have not applied to any other group before rather than Illuminati and now Legion, why? Illuminati would help me improve my income online as there are a lot of experienced online marketeres, Why legion? Iam really stunned by how much knowledge this groups holds within because I have seen members post around the forum and I can tell they what they're talking about. I just want to be a Internet Security Specialist in the future making bank.

[img]http://i1.minus.com/ibgAYyubplTcOC.png[/img] Tell us about yourself:

About myself, well Iam a professional biker as well, I own a KTM 690 which my dad gifted me when I joined college because he is happy with how I have become self dependant and reliable, I play football and go to the gym regularly, I can give good fitness tips as well. I love to fight, yes you read it right. I can teach you how to fight as well, haha. I have a big ego every friend of mine says that, but I think because of this ego itself Iam 2steps ahead of everyone, thanks for reading this I will be eagerly waiting for your response, God bless you.

[img]http://i1.minus.com/ibgAYyubplTcOC.png[/img]
Best of luck to all the applicants.

Cesar Morales - *June 19, 2013, 10:33 pm*
Elaborate on your skillset: I am (what I would say) talented at creating graphics, I have been doing graphics for a year and a half now. I am also a semi-professional vb.net coder, and I have had IT experience with my cousin and have a good, over-all passion for computers.
Tell us why you would be a valuable asset: I am always online (there are very few days or hours where I am away) I can also help in the creation of deface banners, or any other GFX need, or program needed (of course coded in vb.net)
Elaborate on your achievements and future goals: I have made hundreds of dollars in work with my cousin, I have defaced many websites, have an extreme passion for computers, and learning more and more about them. I have built my computer, and many others (i.e, for ModernWarNegro - a famous YouTuber with 200,000+ Subscribers.) As for my future goals, I hope to eventually learn from Anonymous, as I feel that this would be one of the greatest opportunities for me, and my learning.
Tell us about yourself: I am 14 years old, and I am one of the most enthusiastic people when it comes to learning about computers, and how a computer works. I have been obsessed with computers since I was 4 years old, I was once seeing my older brother and my father programming a robot with a computer, and that is where I thought that computers were just purely, awesome. I have lots of experience with Metapsloit, and other hacking tools. I have been doing graphics for roughly a year and a half now, and am great with video editing.

Thank you for taking the time to review my application,

-Astro

Batmayne - *June 19, 2013, 11:42 pm*
Elaborate on your skillset: I have a large amount of knowledge on a decent amount of blackhat activities in both real-life and online scenarios. I have a long history with Social-Engineering both people and companies for my own personal benefit. I know countless Social Engineering methods, and other blackhat methods. I am pretty good at gaming on all consoles (if that's a skill) and I've been playing games for as long as I remember. I can provide services for both doxing people and getting revenge on those who I believe deserve it. I've read a LOT about malware, and different viruses and virus removal.

Tell us why you would be a valuable asset: I can provide my blackhat and whitehat services for any

of the group members, and I always stay as safe and secure as I can. I can also help out any members looking for information on pretty much any topic regarding blackhat activities. I also always try to use correct grammar, and I respect other members of my community. Also, I want to learn as much as I can from other users as I can. Making friends is also one of my goals in applying for this usergroup.

Elaborate on your achievements and future goals: My main goals are information and profit. I like to learn as much as I can, and I like to use my knowledge to make a profit. I have gotten thousands of dollars worth of products and services for little to no charge to me. I also know a lot of people in the blackhat community, and have learned a lot from them and what they talk about. As stated in my response to the previous question, I also want to make friends and help others out.

Tell us about yourself: I am 18, and I am pretty social and open with other users of the Hackforums and other online communities. I like to talk about all subjects, and I will give my honest opinion. I hope to stand a chance of getting into this usergroup, and I appreciate that you are accepting new users. Thanks.

mikebail - *June 20, 2013, 5:36 am*

Elaborate on your skill set: I have extensive Java programing experience and I am currently learning c#. I have have knowledge on MySQL injection as well I have knowledge of navigating through MySQL. I have incredible business skills and "Social Engineering" skills that could help out with obtaining information.

Tell us why you would be a valuable asset: I believe I would be a valuable asset because I can easily pick up on things such as coding or techniques needed to do certain tasks regarding IT. I am a friendly individual that- well can be very spiteful if gotten on the wrong side of me, but who cant be.

Elaborate on your achievements and future goals: I haven't had many achievements but I hope that will change soon, my future goals are mastering Java, and mastering SQL Injection.

Tell us about yourself: There's not really much to tell about me, I enjoy computing, gaming, and hacking. I try my best to conquer every challenge that lies in front of me and learn whilst doing so.
I tried to keep it short and sweet, I hope you like it. If you need any more information don't hesitate to PM me.
[/quote]

Iced Smoke - *June 20, 2013, 11:13 am*

I have no interest to apply, but good luck to those who do.

Zap~ - *June 20, 2013, 12:39 pm*

Elaborate on your skillset:
I have been messing with computer since I was very young. Amazing my mother with my abilities to pick up on anything. Over the years I have became interested in Web Development and Program Development. I learned that PHP and C had the about the same syntax and decided to learn them.

I started with PHP. It was very easy to understand and practice. I have created multiple websites and have the ability to hack them too. A lot of people say they know how to SQL inject or XSS, but really only read a couple E-books on it. I have had to protect websites from it. So, I know how exactly it works and how websites protect from it.

I started modding Xbox, on the game GTA IV. I wanted to make my own mods. So, I learned basic C skills to implement on a mod menu. I have no yet created one, but I have the skills to, just lost

interest in GTA IV modding. I can also create graphics decently and have a knack for learning.

Tell us why you would be a valuable asset:
I will be able to help other group members and I will be able to work with people and develop each others skills. I will be able to pentest websites if asked to. I could also create quick graphics that look fairly nice.

Elaborate on your achievements and future goals:
I have created websites for some people and gotten money on the side from it. I made a website to sell GTA IV mods and it has helped people trust me on Xbox. In the future I hope to be working for myself making programs that support myself and don't have to be employed.

Tell us about yourself:
My name is Zac. My heritage is Polish/Sicilian. I am young, but don't let them stifle your opinion on me. I have always been different, not even in a bad way. People that don't know would think I am very unintelligent because of my poor image. I dress like a skater and do not have very good hygiene, but when people get to know me they learn I am very intelligent and capable. I act differently then people, too. I really want to be part of a group and do coding projects.

Disappeared - *June 20, 2013, 3:16 pm*
Elaborate on your skillset: My skillset revolves around ddosing , dosing , botnets and ratting
Tell us why you would be a valuable asset: I can supply the needed software and rats. I can also do graphics design , monitizing I have an ebook for sale now , I also have a ready to go paypal incase you need some money for a project
Elaborate on your achievements and future goals: this is to be talked about in a crypted chat
Tell us about yourself: I'm a easy going guy and a big fan of you my skillsets are alot higher than the ones I wrote above (crypted chat) I have been around ratting for 2 -3 years and ddosing isnt very new to me!!

I could explain alot more in a crypted chat

iLikePonys - *June 21, 2013, 1:40 am*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] Elaborate on your skillset:GFX Artist - I've been into the graphics since I was twelve. I currently follow a study for it and I am quite experienced in this section. I know graphics don't have alot to do with haijcking and such, but the more realistic a program looks, the more trust you gain.
Coding - You could've seen this coming, a designer also knows a bit about coding. HTML, PHP & MySQL, I am not very experienced in this since I am still learning and I was hoping some of these members would've tips or could teach me something that I don't know yet.
Respect & Kindness - You might be like 'but that's not a skill?' well actually it is, if you have respect to the people you are working with you can reach alot more then just being rude. Respect is one of the most important things, next to trust, when you are working within a group.

Tell us why you would be a valuable asset:I am not the richest guy on earth, I am not perfect in all of my skills, but when I can do is help others out when they need it. I could provide resources or even create them something they could use for their project. I hope they'd do the same thing to me.

Elaborate on your achievements and future goals:One of my achievements, when I joined HackForums was to create a booter. This was done a long time ago and since I had no other goal, I started to help others on their projects. To be completely honest, I have no future goals, when I start a project, I rather take the time to make it perfect instead of hoping that 'some day' I'll be able to 'reach that point'. I wait and see what the future brings me and go on from there.

Tell us about yourself:I'm not that good in talking about myself, which you may have seen in the 143 subforum. If not, check out the mandantory project #13 and read my post, please. I am a regular student, nothing special or different from somebody else, it's just that I go for something I really want. I'm dedicated. I hope you had a nice read.

Anli - *June 22, 2013, 5:04 am*

Elaborate on your skillset:
-Web application penetration testing
-Malware detection, analyses and tracing
-Linux/Unix environment monitoring and administrating
-python, php, c
Tell us why you would be a valuable asset:
-Well this group looks like "team" which i need for future, also i think this group will need me because all job which i will take is done with top quality.
Elaborate on your achievements and future goals:
I don't think that i have any achievements on hackforums, but in general i have one of the biggest achievement ever in my real life, she is my daughter. My future goal is to improve all of my skills.
Tell us about yourself:
Just another geek guy, nothing specific.I think so.

Marshall D. Teach - *June 22, 2013, 9:01 am*

Elaborate on your skillset:I am strong in coding. SQL fail. ddos attack and more
I am powerful in attack because I use api buy. rooter and customize
I know a moderate Amount of C + + and starting to learn more about the GUI side and moving: towards DirectX
then I want to groups to help the member
Tell us why you would be a valuable asset:parce que je peux venir en aide a votre groups a tout moment
je peut faire parler le groups le en marketing ...
Elaborate on your achievements and future goals:become me and the groups
famous level object creation and development for sale
like boot or other system
Tell us about yourself:I am a very determine
when I think of a project I never think solo
I should participate and help my colleague (groups)
I would be able to carry all my project has
I board therefore chosen legion is because groups corespond me

s0_1cy - *June 22, 2013, 10:15 am*

Elaborate on your skillset: Mostly programming, vb, c/c++, java, masm, FORTRAN, sql. I also have experience with hardware and networking, but programming is my main skill.
Tell us why you would be a valuable asset: I will do anything to create a solution.
Elaborate on your achievements and future goals: I currently work full-time as a software dev. My future goals would involve continuing software development and maybe starting my own software company.
Tell us about yourself: I am in my final year of college.

JustinH - *June 23, 2013, 5:06 am*

Elaborate on your skillset:

VB.net Coding

I have been coding for like 9 months of VB.net coding language. I really like this language and continue coding with this language I coded many programs and Im able to code many software. Im trying to improve my skills everyday to make myself a amazing coder. I would like to help others out if they need help getting started or wanna learn it. Ill teach them the basics that mostlikely much needed are.

Gaming

Im a competition gamer. I always try to win every game I play. When I lose I'm not raging but I don't like it that much :P. I play on PC & Playstation 3. I play many different games. Football or just FPS games decides what I wanna play on that day. I game since my 7th year. And I always loved it to play games and I still do.

White Hat

I know pretty much everything about software also about hardware. I know how to get hackers in or out of the pc. I know directly when some one is infected. I do try to code even my own PC scanner to keep my pc clean & smooth. Cause I have this knowledge I code stealers pretty easy cause I know where the passwords are hiden.

Tell us why you would be a valuable asset: I'm a very easy person to talk with. I wanna help the group out with people that would need help in any of my skill set. I can help over teamviewer. I can also talk with you guys over Skype / teamspeak. And I prefer to talk cause then you guys can easier understand what I mean instead of writing everything.

Elaborate on your achievements and future goals:
My future goals are. for hackforums & real life. I wanna get a good job in real life and I hope it will be something for coding. Also on hackforums I hope I will grow up to a great coder and one of the best on hackforums that's just my dream.

Tell us about yourself:
Hello. My name is Justin, I'm 18 years old from netherland. Im a very quiet person, I love to work with other people. I am not a dick that is going to yell at other people when something goes wrong. I stay calm and try to explain or help what did went wrong. In real life im a footballer already for 12 years. I love to football its in my blood.

Ghost??? - *June 23, 2013, 6:56 am*

Elaborate on your skillset: I am an extremely good social engineer, I will speak more of this over a more secure IM system. I'm good at marketing, making cash in a quick timeframe.. Also at fixing any paypal dispute as well as recovering stolen accounts from most services (social media)

Tell us why you would be a valuable asset: I can show you guys vulnerabillities that you guys could decide whether or not to act on, as well as bring my skills and share them.

Elaborate on your achievements and future goals: I have learned/developed prestigious methods to get certain accounts which lead to mass amounts of money if sold.
Tell us about yourself: I'm a young adult, and I focus on whatever my task is at hand, and my word is absolute.

Zephyros - *June 23, 2013, 9:22 am*

Elaborate on your skillset:
I'm an experienced PHP, Node.js and Delphi coder. Ofc also HTML, JS, CSS, MySQL and the

likes. I also have a bit rusty knowledge about SQL Injection and XSS. Lastly I have knowledge about law, mostly about a certain country in europe where I hail from but also a bit of international trade and other laws.

Tell us why you would be a valuable asset:
I like to help people, build interesting stuff (like new and creative malware for example), but when I have to read the complete fucktards that spam most of the programming forums in HF (and other hacking websites), I just can't be arsed to explain the birds and the bees over and over again. I hope to find some coders in this group that I can exchange with on a higher level.

Elaborate on your achievements and future goals:
I sold the gamasutra db on h4cky0u some years ago, relased some open source stuff on Opensc, Hackhound and Ic0de (under different nick tho). Mostly about Reverse Proxy, pe injection and stuff.
I don't believe in "big" goals, I just float on the river and grab oppurtunities.

Tell us about yourself:
in my twenties, wisecracker, relaxed and easygoing.

Elaborate on your skillset: When i was very young i started with VB6 (.NET didn't even exist yet). Later on i started developing in Java and creating websites in PHP. Now these days i mainly use C/C++ for most of my desktop applications.
I have some experience in exploit writing (Buffer overflows), also released a easy to exploit Remote Command Exection exploit for exim a while ago (http://www.exploit-db.com/exploits/25970/).

Tell us why you would be a valuable asset: I am willing to help other people. Contribute to the group and work as a team.
Elaborate on your achievements and future goals: I wrote a small tutorial on DLL Injection to teach other people. It can be found here: http://rdtx.eu/different-methods-of-dll-injection-32-bit/ . For the future, i don't know i shall see where the future brings me =)
Tell us about yourself: I'm 21 years old and not rly a big talker...

?Robocope - *June 23, 2013, 3:36 pm*

Elaborate on your skillset: I'm an excellent marketer, I write and create my own eBooks for Monetizing Techniques. Here is just a preview of an eBook that I made and the profits I pulled from it. I'm always here to help people when they need help with a RAT or Keylogger or anything that i can help with. I've basically mastered RAT's now and working on creating my own Keyloggers. I've recently did the stock market with investing, to try it for the first time and I tripled my profits with investing. I have been doing gaming since I was a little kid, I'm decent at games like Call Of Duty and Madden. I am also learning coding in Visual Basics. I mastered eWhoring, I have an eBook that is 65 pages and 9,800 words in it. It teaches people the basics and how to maximize their profits, and gives personal methods of mine.
[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff, and pass my knowledge on behind me to the people that need help with it. I would encourage others to try and learn and become in a high quality group like Legion itself.
[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Elaborate on your achievements and future goals: My achievements that I made aren't the greatest but they are decent. I managed the master RAT's and Keyloggers since I joined Hackforums. I have learnt monetizing, eWhoring, keyloggers, rats, and many others. I am always trying to help others that need my help. I'm always passing on my knowledge of what I have to other members. My future goals is to have my own stresser. It is currently being made as I'm writing this application. I'm planning on going to college also for coding when I graduate High School.
[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us about yourself: I am 15 years old, I'm in 10th grade. I am usually on hackforums for at least 7 hours a day, as I'm now on summer vacation. I'm always on at least once a day here. I love to play Runescape and Xbox live with friends, and go out and have some fun. I just bought a new dirt bike

with my own money I had saved back for one. I'm pretty popular in High School, I'm becoming a junior now when I go back to school. For sports I play Football, Wrestling, and Baseball for my High School team. I am pretty much a laid back person that likes to have fun with his friends.

Cellulosic - *June 23, 2013, 5:42 pm*

Cellulosic

Elaborate on your skillset: Social Engineering I am very experienced at social engineering. I use it in my day to day life.
But, when the time comes I can social engineer lots of things, in my opinion it is a very big part of my skill set.
RATTing Even though RATTing isn't the most impressive thing in the planet, I am very good at spreading and SE'ing people into downloading it.
Webmaster I am a very experienced webmaster, I can make websites and set-up botnets. I have made multiple websites for others and my own. I enjoy making websites that are easy to use and refined.
Learning Quickly I am a very fast learner and if you tell me to learn something to expand my skill set for the group and remain a active member I will do so in a quick and efficient manner.
Tell us why you would be a valuable asset: I, Cellulosic would be a valuable asset to your group because I am easy to understand, follow orders and will help you with any chance I get.

Let me elaborate:

I strive for success. I love to succeed, it's in my blood. I am a very easy to talk to and I am a good listener. I hope to be active in the community and guide everyone I can down the right path. I will not let the group down, will do everything to insure it's success and everyone around me's success.
Elaborate on your achievements and future goals:
At this current moment on HackForums I have made a tutorial for C# for HWID protection. My current goals are to learn C# and VB.NET, I've just started but I am progressing very fast. Another goal for me is to join the group 'Legion'. I think everyone can see that is one of my goals right now. I also want to leave a good impact in HF and be an active member. I also want to release lots of freeware in the hacking tools section too!
Tell us about yourself:
I am Cellulosic, I am currently new to the forums but not computing, and I am beginning my quest to become a better member for the community and the forums. I love to play video games and play sports. I am a very laid back person who strives for success. I approach things in the most logical way possible and try to fix and improve everything within my level of understanding.
Thank you for reading my application. I hope you enjoyed reading it as much as I enjoyed writing it.

Bassin - *June 23, 2013, 11:10 pm*

Elaborate on your skillset:I'm a salesman
All the time, I will go through a phase where certian things interest me. It is usually some sort of account. I will go all over the place looking for these account and buying them for dirt cheap. I ALWAYS flip whatever I buy for some sort of profit. I enjoy doing it and like everyone else, love making money.

Hardcore gamer
I may be one of the better gamers on this forum. I play mostly the Call of Duty series. I play GameBattles as well. Winning online tournaments on either GameBattles, ICONS, or CGAPro is common for me. I game with friends and would love to play with member of this group. Xbox 360 by the way, and soon to be Xbox One.

Dr. Phil
Recently, I have been finding the Innuendo very interesteing. I like going on there and trying to help people through their personal problems. It makes me feel really good. I would do this for all member of this group.

Tell us why you would be a valuable asset:
Well from some of the things I stated about, I feel like I could be a great asset in a couple different ways. From sales to personal problems, I feel like I could give my all to help in any way.
Elaborate on your achievements and future goals:
I graduated high school with honors. I am attending Tennessee Tech University as a civil engineering major. I have done great in school and I am very proud of that. I plan to get a Masters Degree and start my life. At some point, get married and have a family.
Tell us about yourself: My name is Dylan and I am 18 years old. I was a two time all district baseball player in high school. I don't know how that would relate to HF but I have gotten leadership skills and know how to work as a team because of my past experiences. I will be attending college in the fall taking 17 credit hours. I only have 3 hours going in so I need to work hard to get ahead, which is where I like to be. I am a legit person. Never scammed or stolen online or in real life. I am social and can talk to anyone. I love to have a good time, sometimes as a good kid, but there ins't anything wrong with have a few beers with friends every now and then. That is me. Calm and laid back. I would love to be in this group. Thanks for taking the time to read this.

Begginer - *June 24, 2013, 10:23 am*
Elaborate on your skillset:
Gaming
CODING!
Designing
Video Editing
Video Making
Web Development
E-Commerce
PPD/CPA
Click Bank

Tell us why you would be a valuable asset:I have a high quality, you can check this. I have a large online time, and attitude to learn and to teach others what I know. I am honest on what I say and I have mature goal.
Elaborate on your achievements and future goals: I have a lots of goals, most are personal life, but I dream of making a Huge Website, and amazing gaming YT channel
Tell us about yourself:A mature 17 Y.O person, with high coding skills, and love to work hard. I even enjoy it. I love gaming very much so that's why I do if I have free time. Thanks a lot.

rSync - *June 25, 2013, 12:47 am*
Elaborate on your skillset: First, let me say that I AM NOT AN APPLICATION DEVELOPER! I am website designer / network operator and administrator. I am dealing with PCs and internet for more than 4 years. I am skilled in exploiting websites (I was doing that when I started dealing with PCs), I am skilled in HTML/CSS/PHP/JS coding. I am skilled linux user. I am web hosting provider, got my own small hosting company witch I am running right now but I haven't promote it to HF because of risk of illegal usage and downtime that would happen if people use it for ddos.

Tell us why you would be a valuable asset: Because I would share and learn useful tips in my knowledge area (Network and web). I would giveaway free hosting to group members. I would be active and loyal to the group.

Elaborate on your achievements and future goals: My earlier achievements were when I hacked websites and defaced them. Atm, my achievements are when I develop website, when I get vouch from satisfied hosting customers... I will continue dealing with network and websites in future for sure. I will try to earn more at the future and expand my hosting business and I will find a job in network administration.

Tell us about yourself: I am just a man who loves and enjoys in what he does and bonus is that I am making profit from that. I feel little bit fishy to do a full introduction here in front of all HF users, but I will for sure do full introduction if I am accepted to the group, there in group private forum.

Dup3G00n - *June 25, 2013, 9:21 am*

Elaborate on your skillset:
Ratting
I am very experienced at ratting, I started over a year ago. I have had many slaves, and I help others learn about it too. Here is a thread where I offered my ratting tutorial services:

FREE CyberGate RAT Setup and Port Forwarding!

E-Whoring
I've been E-Whoring as long as I have been ratting, and it was my primary source of money. As sites have become saturated, I stopped doing it and moved on to better ways of monetizing, but I still have the skill and experience for it.

Graphics
I have been working with Photoshop for 5 years and I consider myself pretty good at it. I make signatures and avatars for people here on HF, including my own. I consider my avatar and signature somewhat basic, but still good looking. I love doing projects and I'm experienced in this field.

Monetizing
When I first started making money online, I relied on E-Whoring. I never really had consistent income with this. Until recently, most of my income came from Social Engineering methods. A week ago, I invested in ProBux, and am slowly making my way up the food chain. I am projected to make around $80+ dollars a day within a few months with my strategy, and so far it's flawless. Take a look at my current earnings below (my old username on HF was mrtaj37, you can verify this by going to my profile):

Spoiler (Click to View)

Now you may not call it much, but I call it progress call it progress considering I started a week ago!

I have also created a method on how to get cash from your Paypal money without a credit card or bank account, located here:

[TUTORIAL] How to turn your Paypal money into cash!!

Social Engineering
This is definitely the biggest part of my skill set. I've been SE'ing for a little over 2 months now and I have already gotten over $400 worth of items. I've gotten Starbucks coupons, free popcorn from AMC, 24 cans of Mountain Dew/Pepsi, a $50 debit card, and 4 Logitech HD Pro C920 Webcams ($99.00) each! Here are some pictures:

Starbucks coupons:
Spoiler (Click to View)

AMC Popcorn:
Spoiler (Click to View)

Mountain Dew/Pepsi:
Spoiler (Click to View)

$50 Debit Card (it hasn't arrived yet, so I'm using email as proof):
Spoiler (Click to View)

Logitech HD Pro C920 Webcams (2 of them haven't arrived, the other 2 I sold on eBay, the transactions surrounded by red boxes are eBay transactions):
Spoiler (Click to View)

So as you can see, I have been successful with these skills and I am experienced!

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us why you would be a valuable asset:

I think I would be a valuable asset because I could help with a lot of monetizing. Social Engineering would come into play here, as well as my $80 a day method which I could share with other members of the group. Not only this, but I could help with graphics, and I could also teach about ratting. I'd be active in the group, and I think the group would benefit from having me.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Elaborate on your achievements and future goals:

My achievements, as I listed above are I SE'd a lot items, ratted people, E-Whored people, and created a money making method as well as a way to get cash from Paypal. I have helped many others achieve these things as well! My future goals are to have my money making method work so I can distribute it massively, as well as SE a Macbook Pro by the end of this summer!

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us about yourself:

I am a 14 year old boy and I'm entering my freshmen year of high school in August. I am extremely dedicated to the game of basketball, and I play on teams. I love SE'ing, graphics, and monetizing, as well as Social Networking. I spend most of my time in the Monetizing Section and the Lounge. I am really excited to send in my first application for an official group, and really hope that I am accepted! Do not hesitate to PM me if you have any questions (: Thanks!

nul?l - *June 25, 2013, 9:49 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your skillset:My skillset consists of many thing. I have skills anywhere from Monetizing all the way down the line to gaming. I have very nice skills that could be of assistance to the group and I believe that it would be appreciated if I would be able to help the group members out on certain aspects of different things.
Skills with descriptions:
Monetizing: I have been monetizing for just about a year now. I have common knowledge with CPA and PPD. I started CPA just about three months ago and I have already made around $1,300. I created my own niche and came up with my own ideas to produce this much revenue. I have had

some assistance from some good friends of mine but I came up with the methods I know, all by my self. I plan on releasing an Ebook of my own methods for free, maybe I'll release it early for Legion if accepted.
Social Engineering: Wow, I love this. All though it isn't allowed here at HF; I have been a social engineer'er for well over three years now. I think of social engineering as a game of risk. I like to take challenges and the better I get, and the more companies or people I find to SE, the more challenges I get. I first started social engineering in the summer going into Freshman year of high school. I first started to SE simple things such as; candy, movies, silverware, food and such. Over the years I started to get more dedicated and started to join forums which were made for Social Engineering. I learned how to SE bigger companies for computer accessories like, Logitech, Philips, and Razor. I can now easily SE an I-phone or a Macbook or even a Sony TV within a day or two. It takes nothing but patience. I have SE'd Cheques that are probably equal to well over $3,000 now. (Most from P&G).. My latest SE was a Movado watch.
Ratting: I do rat, and I love it. i'm not a "king of Rats" But I know the basics. I have had over 200+ slaves at once in my prime. I know some good spreading methods and such, and I can easily build a JDB if I end up getting back into Java Drive bying. #Skyline=King of Rats.
Psychology: I am taking AP Psychology and Sociology H in my school, and I have the second highest grade in Sociology, and the third highest in Psych. I am really interested in human behavior and manipulation of the mind (that is why I SE).
Bilingual: I am fluent in both Portuguese and English, I grew up in a really Portuguese family (really strict) and I have been translating for kids at my school sometimes if needed.
Malware removal: I consider my self semi-professional at malware removal. I spread rats for this reason. I can remove most malware and I do it for some friends for free often. I have also produced my own malware so I can remove it and see how difficult it is to remove.
Coding and such: I do know a bit of PHP and some java. I have created my own RSPS at one point and it went really well. I am currently learning SQLI injection. I have been doing some VB projects for reasons I may not disclose yet.
Gaming: I am a really good gamer (I believe so). I have been playing RS for years now and I know everything needed to know. I used to play with Vin all the time, but we drifted off :p. I have my own Runescape service with the most vouches which you can find here:
https://hackforums.net/showthread.php?tid=2893405

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:
I feel as though I would be a valuable asset to the Legion community because I have very interesting skills that people don't always come around. I have been a dedicated member of Hackforums for a while now, and I don't plan on leaving. I am dedicated to the groups that I am in, and that is why I was accepted. A valuable asset to me is someone who can contribute to the group. How I can contribute is by contributing sheer knowledge, dedication, love, help, and whatever I can to the group.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:
I don't have many achievements achieved besides getting into groups and being active and helping all of them, being interviewed for the HF news, and becoming a respected-well known member. My future goals for HF is to purchase my own usergroup in the near future. I hope to be a member in Legion, that is another goal of mine. I also hope to one day earn the Diamond award.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us about yourself:
I am a 16 year old male in high school. I live on the east coast of the USA and have lived here almost all my life (lived in Idaho for a couple of years.). I speak Portuguese and English both fluently. I have a girlfriend who I have been dating for 3.5 years, and she is the love of my life. I run track and I play soccer. I haven't played soccer this year due to an injury. I have built gaming rigs, multiple times and I love a challenge. A challenge to me, is better than anything. I have decent grammar and I don't think it has ever been a problem, yet. I hope to be accepted into the group, it looks wonderful, and I hope to settle down here and make it my new home. I am really outgoing and

really nice to people who are respectful. I volunteer at an animal shelter and I own two dogs.
Quality over quantity.

Ebol? - *June 29, 2013, 11:10 pm*

Elaborate on your skillset:

I have had expierence in webhacking, using various methods such as SQLi, LFI, RFI, etc. I am also a skilled programmer. I have made various applications, including a SQLi tool (to use for speed), a shell booter (windows application), chat tools, worked on a Crypter with a partner, and am in the middle of coding a RAT, which is fully functional, and I plan to release.

Tell us why you would be a valuable asset:

I believe I would be a valuable asset for many reasons. One of the most prominent reason is due to my desire to learn, and the passion for knowledge. I am always learning new things. I wish to share what I have learned over the years with the community. (:

Elaborate on your achievements and future goals:

Some of my achievements were in my first answer, but I will restate it. I have made various applications, including a SQLi tool (to use for speed), a shell booter (windows application), chat tools, worked on a Crypter with a partner. My future goal is to finish the coding of my RAT, which is fully functional, and I plan to release, as well as start making tutorials / guides on HackForums, sharing my knowledge with the community.

Tell us about yourself:

I consider myself to be a polite, helpful person. My passion is helping others. I have also been programming since I was 9 years of age. I have coded many private tools which I use, and plan on making my first official release (excluding another product which I worked on with a partner). I have a passion for learning. Every chance I get, I am reading a book / article on a subject. As you probably guessed, I was a top student at school. I actually graduated high school 2 years early.

Gan Ning - *June 29, 2013, 11:33 pm*

Elaborate on your skillset: I'm more of a beginner when it comes to hacking/coding. I have a strong will to learn anything that I can.
Tell us why you would be a valuable asset: I'm always out to help others and I'm goal oriented. I'd like to develop my skillset as much as I can
Elaborate on your achievements and future goals: Nothing relative but I've survived through thick and thin IRL and made it when I originally thought I'd be unable to.
Tell us about yourself: 21, previous college student in computer programming. Unfinished degree. The school I was attending had a very faulty program and I'd much rather expand my knowledge as much as possible without having to pay heaps of cash to do so.

Social Engineer - *June 30, 2013, 2:54 am*

Elaborate on your skillset:
Social Engineering
My username would probably already indicate this, I retired from this long ago due to some concerns and situations I was slowly getting myself into, also due to my career path it was only best that I abandoned this as early as I could. I did however learn mass amounts of informations and techniques during this period which I still use to this very date to manipulate people in person and still assist others with certain things.

eWhoring
This is quite similar to Social Engineering, just this time you're doing it as a girl and the target is usually much more vulnerable and submissive if you have the right tools and content. I didn't do for this for long, only for a few months.

Basic Graphic Design
I have basic knowledge of Photoshop and I am able to create simple graphics for personal use and for others. For example basic logos, signatures, avatars and the other thing. Also can do very basic photo manipulation.

Basic Web Design
I used to run a gaming website, I had most of my school on it at one point, it was one of them Mafia RPG games which I had modified and themed around the groups we were put in during school. (X-Band) (Y-Band) and each student which registered was assigned to whichever Group they were in and then had to compete with the other, it was quite an interesting experience.

Java Coding
This is one of my goals, as of now I'm gathering tutorials and information to help assist me during the process of learning. I don't want to jump right in and then scavenge for tutorials or material that can assist me, I want everything to be there for me already. Just a little bit more time and then everything should be out of the way, plan on starting this within 10-12 days of time.

Tell us why you would be a valuable asset:
I am able to share my experiences and help assist beginners in areas such as Social Engineering, eWhoring and maybe even assist someone if they are in need of any simple and quick graphics being done. I've always portrayed myself as someone who is of very high quality and I believe I will be able to represent your group in a very professional way. I've always been quite a smart, honest and helpful individual. I personally don't think I will ever reflect the group in a bad-manner or let the group leaders down.

Elaborate on your achievements and future goals:
I want to study Computer Science at University and wish to start working for a company where I am able to develop and create bespoke software and other types of application. Apart from this, me and a close friend have been currently planning on opening our own business, where we can work together and start it off as our own with 50/50 ownership.

Tell us about yourself:
My name is Tayyab, I know, it's probably the first time you've heard it. I'm from the United Kingdom and have lived here my entire life. I have been told often I am very helpful and one of the most mature yet immature people most people have come across. Someone who is usually around me will describe me as being someone who is serious and mature when need be, but weird and comical when chilling out, obviously to a limit. I love working in groups as in teams, as I find getting different perspectives on something is usually the best way forward. I love making new friends and involving myself within different "Cliques" or communities.

Thank you for taking the time to read this.

Understalker - *June 30, 2013, 3:36 am*

Elaborate on your skillset: RATTING ~
As this shouldn't really be considered a big thing, it does require some type of skill. You've to be willing to social engineer your target in order to be able to get them to download your link. I basically

know everything there is to know about ratting, and I have even offered some services for this before. Not only have I offered services, but I am usually around the Remote Admin Tool section helping those who are in need.

Social Engineering ~
This is a broad subject to describe your skillset about but I will go more thoroughly into it. I have SE'd a few things in my life, although I am not too fond of it. I use my skill of SE'ing when I am in need of ratting my target. Social Engineering can lead to many things whether it be a source of income(ewhoring, calling businesses, complaints, etc), or trying to get your malicious file on your target. I have been making my main source of income through SE'ing and may explain the method to either Anonymous himself, or a trusted member of Legion.

Monetizing ~
I have done several monetizing here on HF. I am very explanatory when it is needed, and have reviewed/editted several E-Books that are/were being sold in the HF Marketplace. I also am very good with Ebay marketting.

Java Coding ~
I started at basic coding, such as Python which soon led me to more interesting languages. I have just started learning Java and hope to learn much more in the near future. Although I am new to this subject, I believe I will stick the language and learn all that is needed of it.

Gaming ~
Whether this is allowed or not, I do believe gaming requires some type of skill. You will have to work as a team to accomplish what you need within the game which is why I believe it involves skill. Gaming will require you to work as a whole to win and that's why I believe it is important. I do not game too often, but I do when I have some sort of spare time which isn't too often.

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because of the fact that I am a hard-working individual. Although there are things I have not learned yet, I do know what I am doing. I am willing to share my knowledge and experiences with those within the group. I personally believe I can be considered High-Quality and I know when to represent myself in a professional standard, and when I can play around. I know four languages as well, these being Albanian, Turkish, Bosnian, English and a bit of other languages.
[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Elaborate on your achievements and future goals: My achievements here on HF haven't been too great, but they are something. I believe I know everything there is to RAT's. I have learned new methods of SE'ing, eWhoring, RAT's, monetizing and several other things. I have worked on a stresser, which is now semi-big (Phantom). I plan to help those who want to reach their achievements actually do so./align]

[img]http://hftoolz.pw/upload/efd446582608d4c9f75a.png[/img]
Tell us about yourself: I am 19 years old, and in College currently. I am on HF a lot, although currently I'm on vacation so not as much as I usually am. I enjoy being on HF as my knowledge just increases here. I have learned many things here on HF. I have been an athletic person throughout High School and played Football / Basketball a lot, although I did not carry it out much in College. I am very outgoing, and easy to get along with. Not necessarily a problem-starter as much, and do not get involved in drama.

Arrest - *June 30, 2013, 3:37 am*

[Image: 273f1a79b8ca7d803252.png]
[Image: efd446582608d4c9f75a.png]

Elaborate on your skillset:

Coding: I have good experience with HTML, VB, C# also some other very mild experience in CSS, C++, Java. These skills I have used to make various programs and little projects.

Web Development: I have used my skills in HTML, to make various websites for people for example a framework and 'legit' looking site for peoples' JDB applets and other sites for just when they needed help and a site to be quickly built.

RATing/Spreading: I don't hardly do this ever only if I need something that can't be pulled or SE'd I RAT them, but I still have alot of experience in RATing methods, crypting etc. Also how to spread very well and effectively especially with the use of eWhoring.

Social Engineering [SE]: I have alot of experience in SE and how to pull information effectively from other people on such mediums as online customer support systems and line to line systems. Also ./SET

Linux/Unix/GNU: I have alot of knowledge on Linux/Unix/GNU systems how they work and which distro you should use for specific jobs also which are the quickest/easiest/hardest/most anonymous to use.

Forums: I also have alot of experience in forums especially the MyBB system, i've been on almost every forum at some point.

[Image: efd446582608d4c9f75a.png]

Tell us why you would be a valuable asset:

With the skills I have just shown and described I could become a very valuable asset to the group as I also have many other assets that are very highly valued.

[Image: efd446582608d4c9f75a.png]

Elaborate on your achievements and future goals:

My achievements so far would be to of finished some very important programs to me such as my turboer which works perfectly. Also a few other programs but I shall not discuss on HF at this time as they maybe released in the near future.

Future goals include, finding more fast and easy exploits into IM systems, finding more methods and general information pulling exploits. Also to finish off a few little projects I have going and to get them released.

[Image: efd446582608d4c9f75a.png]

Tell us about yourself:

Abit of an oldfag, this is NOT my first hackforums account I felt I needed a fresh start as I forgot the pass to my old 2010 account so here I am, people know me by e, envy, arrest. Been around on most forums know about alot of people. Know about alot of things. I would be a great asset to the

group so consider my application.

Website design- www.iSocialHut.com | www.TrukVI.com | www.Brotherhood.nu
Graphic Design- Currently don't have my old portfolio but will edit when having so.
Gaming- Add me on Xbox (Trukfit) or PC, PM me for a gaming session.
Whitehat activities- RAT, malware, trojan ect removal.
Marketer- I have a social shop and have done some marketing on some products for a few company's.

Tell us why you would be a valuable asset:
I am able to do many tasks that are required, I don't give up and I ALWAYS up for a challenge. I will be loyal like a Legion member should.
Elaborate on your achievements and future goals:
I have graducated from secondary school with all positive qualifications, I've also done my first year in IT forensics course at College.
Oh yeah I have a Food cooking hygiene certificate.

Tell us about yourself:
I'm a chilled out guy, always been amused and intro hacking, cracking and exploiting stuff. After years of self teaching myself these skills I've decided to use my skills for the better and for good, hence why I'm whitehat.
If accepted I will be a loyal trusted member which I hope I do.

Also I didn't write shit loads because what's the point, I've told you everything you need to know :P
Thank you.

Mahdy - *June 30, 2013, 8:46 pm*

I guess my application got denied xD. This is still an awesome group.

Good luck to those applying & congrats to those who got accepted!

Elaborate on your skillset: i have a good knowable in ddos service and monitoring servers and booters
Tell us why you would be a valuable asset:i can provide some free service and help to HF members and i think its a good thing to the group
Elaborate on your achievements and future goals:i wanna be a good member on HF and make some money and help some people so i dont plan just to make money i can help too
Tell us about yourself:nothing much about me im at computer inistute i study programming and networking and web design

Gatsby - *July 1, 2013, 11:59 am*

Elaborate on your skillset:
Social Engineering. I used to be staff on Astro PID. I went to DEFCON20 with the owner. I knew the owner very well. I have a lifetime of SE skills under my belt. Along with that, I'm good at reading and assessing people. I have really good skills in psychology.

Web development. I started a few websites, just some side projects to put in my resume. I can show you them in the second interview.

Coding experience I posted the first FUD FTP Keylogger souce in VB.NET back in 2009. I've been here a long time, inactive for a long time in the past 2 years, but I'm back. If I join a group I'm hoping to bring back that coding experience. As of now I'm fucking around with PHP,HTML and Python.

In the past 6+ years of hacking, I've basically done it all. I've only listed the main three points that I think will outline my most recent ventures. But I've done it all. Doxing,Ratting,Phishing,Wardriving, etc. I'm currently an IT Tech contractor.

Tell us why you would be a valuable asset:
I might not be your regular or ideal candidate, but you won't be disappointed by adding me onto your team and I have a unique skillset.
Elaborate on your achievements and future goals:
Make money. Don't get arrested. Work with a team again.
Tell us about yourself: I used to be very active back in the day. I'm trying to get back into the scene. Sadly, I'm back at HF. I've done it all. If you want more information, feel free to PM me and we can talk over Skype. I started hacking/blackhat back in '06. I'm ~20 now.

?XilluX - *July 2, 2013, 11:39 am*

Elaborate on your skillset:-Graphics
- I have a little bit more than the Basic Photoshop Skills
- I already did over 100 GFX for Members here !

-Coding
- I can understand Basic Codes in almost every Language
- I have the Basic knowledge in C#, Java and Delphi
- Visual Basic, is my favourite and well known Programming language, i use it to make my own RAT´s, Crypters and / or any other Programms, i have the pleasure to.

-Hacking
- I know and understand the most exploits and vulnerabilitys.
- I am able to search for vulnerabilitys and exploit them.

- I can try to hack Sites or People, by scanning their vulnerabilitys, SQLi, XSS, RFI, LFI, Shell or coding a Bruteforcer.
Tell us why you would be a valuable asset: I would really like to be in a Group on HF, i also do fulfil your Requirements. Helping People and releasing my Projects freely, doing contract Coding and Hacking.
Elaborate on your achievements and future goals: I coded a Tool for somebody, he had released it here on HF, it has over 1200 Downloads and the Thread 500 Replies. That was my big achievement. My one Goal in life is coding a RAT, that can be controled by every OS, even Smart TV´s, Smartphones, Tablets and can control every OS, Smart TV´s, Smartphones and Tablets. But till there i have to learn much ! :)
Tell us about yourself:As you can read above, i really like to code, do some little hacks and GFX. In my freetime i am browsing through HF, seeking to help People or coding new Programms. I am an HQ and active Member and i am not a Noob, i never got ratted or anything similar. I am professional in what i am doing! I hope you accept me, I am looking forward to hearing from you.

Grayson :) - *July 2, 2013, 1:38 pm*
Elaborate on your skillset:
Some types of gaming, for example, I'm good with riddle types of games and games involving problem solving/memory.
Tell us why you would be a valuable asset:
I remember almost everything, I have a mind that likes to explore and learn.
Elaborate on your achievements and future goals:
I've won Science competitions at my school, and for my future goals, I have many. I like to strive.

Future goals:
Finish Highschool with a 3.5+ GPA
Graduate College
Live/Move in California
Maybe pursue an acting career
Live healthy
Just do amazing things in life, and just be happy in general.

Tell us about yourself: I'm the kind of person who likes to strive and do more with my life, but I do have some weight. I have Anxiety and Depression that brings me down, and recently I decided to see specialized Doctors and hopefully will be put on medication to help. I've also had to mature much faster based on my past, I had shitty friends, my parents divorced when I was young, my mom was depressed and I had to make all of my own meals since I was about 10, I've had to cut people out of my life, and I'm that kid who is friends with the teachers and staff workers because they are the few people who aren't pieces of shit, after that I'm still standing, and that says a lot.

Legit - *July 2, 2013, 6:37 pm*
Elaborate on your skillset: web dev,reverse dns port to port rooted servers,SQLi,defacing manual no program such as penetration into the anal part of a website (havaj)
Tell us why you would be a valuable asset: i wouldn't
Elaborate on your achievements and future goals: take down redtube forever because somebody uploaded a video of me fucking my daughter!
Tell us about yourself: me, well i'm somewhat the quiet one it tell i'm put to the test of in a bad mood/hungry/ i troll a lot because its fun, i'm older and know what i'm doing! ?

Om?nous - *July 4, 2013, 3:38 pm*

Elaborate on your skillset:
My skill set is different from most peoples. I specialise is targeted ratting for specific purposes. If i

am looking for powerful computers then i will spread using specific methods to gain them. If i am trying to get even more specific computers/networks infected to gain information then i tend to do some research into the target to gain information on how i will attempt to rat them. I have achieved what i and a lot of people would say its nuts.

I have other skills than just selected ratting, i have been interested in many different coding languages for different reasons, all of witch i have been able to grasp the basics of within hours of finding some code to toy around with. I think that if i was set a target to master one language for a specific reason i could do that in a relatively fast period of time but i just can no decide which language to learn.

I have learned how to use information and data acquired from ratting to help spread faster through out the web and i have come up with many great ideas of different tools that with the write people would work. I am very creative when it comes to most things and i believe that i could come up with a large variety of great products that i could share with the group and i could provide a lot of ideas to the group for products and different hacking methods revolving around ratting.

I try and work on different OS platforms and find some nice tricks such as creating admin accounts on just about any mac computer in a matter of minutes. I do intend on increasing my knowledge in different os platforms as i know there are so many different ones popping up with very specific uses such as for hacking/cracking.

I do have other skill sets such as money making and the other common sets of skills but i do not think they are something you will be looking for in my application as this group from what i know is mainly a hacking group but if requested i will provide the list that just about everyone can provide of other skills.

Tell us why you would be a valuable asset:

I could share my knowledge in spreading methods and teach people how to do targeted ratting, i can provide people with many ideas for tools and products that they can develop to be sold or used for the group.

Elaborate on your achievements and future goals:

Personally i would prefer not the share my achievements as i am sure many of them would not be safe posting here. I have many future goals such as learning different methods of spreading that i have not come across, i would also like to increase my knowledge of hacking and move it away from only ratting.

Some goals are to master some programming languages, some are to reach some mill stones in areas of hacking. I have a vast amount of goals that i would love to reach but i know that i will probably not for fill all of them but i will not give up on trying.

Tell us about yourself:

I am a teenager just like most of HF is, I have a rather active social life and tend to vary what i do. I don't spend my whole life on the computer but when i have nothing to do i do find my self sitting on my laptop on HF or working away at something.

I have always been interested in computers and how they work since i was little. Next year i will be studying Chemistry, physics and maths which is a good leg to stand on when i decide to go to university if i want to for fill my dreams of being a hardware or software engineer. I will go into more detail on areas that i would prefer not to share to the common eye in a private chat. Thank you for reading my application.

Hfiascfidl - *July 5, 2013, 4:29 am*

Elaborate on your skillset:

I have been around the computer scene since I was about 10. I have a good bit of knowledge regarding most major aspects of computers such as coding, security, hardware, software, and webmaster. I have ran some successful forums. I have been around the block in the Blackhat scene aswell.

Tell us why you would be a valuable asset:
I have money, I have contacts, I have the time and the will to not give up. I will not stop until I have accomplished what I wanted. I believe I can help many members and show them the rights and wrongs about things.

Elaborate on your achievements and future goals:
I have ran a few MyBB forums which did great until the new owner purchased them both (which they ended up killing them). I have done some things in the BH scene that have been valuable. I am now looking into money making online. I have a site that receives 2k hits daily and looking to see what Adsense does with that. I also plan to look into either some serious coding, hacking, or monetizing.

Tell us about yourself:
I am 22 and I currently live in the UK. I have been around computers since about 10 when I got into Runescape. Runescape put me into the technology world and since then I have not got out. In 2003 my mother bought two Runescape accounts for me and my brother. The original owner recovered them both and for 4 years I was his shadow. I had access to everything he ever had. He used to sell a RS Classic mining bot on Ebay which he had uploaded to one of his websites. I got into his site and keylogged his mining bot. So he was selling my keylogger for me and I was stealing everyones GP. I also would recover his RS accounts and access his gmail accounts on a daily basis. He eventually gave up after so long and decided to quit RS. Since then I have not messed with him. After that I got into some VB coding and looked into web design. I then designed a few personal web sites which was just a learning experience. Few years passed and I got familiar with the hardware and software part of computers. Now I have built a few websites before and sold all but one and one I am currently working on (Please PM me for the URL and you will be amazed at it, I promise). I am pursuing a Bachelors in Computer and Information Science which I am roughly 60 credits in as I go online. I spend a few hours a day on the computer and have my Samsung Note on my side 24/7 so it is never a problem for me to get on for anything. I am active even though I don't post a lot as you can tell from the "Time Online" in my profile. A lot more about me can be said in private that I think is a valuable to the group.

Social Engineering (Getting Free Stuff and For Doxing)
I have Social Engineered a ton of stuff ranging from Doritos to Computers.

[img]http://cdn1.iconfinder.com/data/icons/stilllife/48x48/apps/gksu-root-terminal.png[/img]
*nix
I am a *nix enthusiast and have used *nix for around 3 years. It is basically all I use except for gaming.
My Favorite OS's are FreeBSD, Arch, and Debian.

[img]http://cdn1.iconfinder.com/data/icons/august/PNG/Dollar%20Sign.png[/img]
Monetizing
I have a extremely successful business on Ebay that I spend a ton of time on:
Spoiler (Click to View)

[img]http://cdn1.iconfinder.com/data/icons/fatcow/32x32/script_code.png[/img]
Coding
-I know HTML (Not really a language)
-I am a beginner/intermediate python student
-I have began learning Java

Tell us why you would be a valuable asset:
I would benefit Legion by aiding others with my skill-set, giving the other members my method of

making a ridiculous amount of money on Ebay without even touching a product, and by doing a large amount of giveaways, tutorials, high quality threads, and posts in the name of Legion.

Appeareance is important; link us to where you come off as a gentleman:
I always strive to help other members out regardless of being upgraded or not.

https://hackforums.net/showthread.php...id31707035
https://hackforums.net/showthread.php...id32145985

Also check out my Rep and Posts

Elaborate on your achievements and future goals:

The first time I rooted a server was a huge accomplishment for me and has continued on today to be my favorite exploit.

After I made my first $1000 on Ebay I was incredibly thrilled and I know make a six digit income from it a year.

Getting invited to Guardians was a big deal for me because it was my first group

A few goals of mine:
-To get into university and take Computer Science or a related topic
-To one day wear this: [img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
-To expand my knowledge of web hacking
-To find my own Local Root Exploit

Tell us about yourself:
I am a 16 year old who loves computers and is constantly learning new things. My parents divorced at a young age and since then both my parents have re-married. I live with my mother full time while my dad moved to the other side of the planet to not have to pay my mother child support.

My first encounter was when I was playing Call of Duty and some people were hosting a prestige lobby. I was immediately interested and started looking things up. After I had found some Xbox modding forums I started modding my Xbox and games. After about a year or two I became bored with Xbox and wanted to find something that could make me money. That is when I discovered hacking. I had stumbled up http://www.hackthisite.org and started learning how to complete the challenges.

After I had learned a lot about how those things worked I started looking into a forum about hacking where I could learn from other people. I found hackforums and immediately fell in love with the community and was amazed at the size and the amount of knowledge on the forum. I progressively started learning more and more about hacking and have come to where I am today.

Thanks for taking the time to read and review my application.

I hope you take me under consideration and the best of luck to the other members.

Anon?M ID - *July 10, 2013, 9:26 am*

Elaborate on your skillset: Mostly Coding (VB.NET), Graphic, and SQLi
Tell us why you would be a valuable asset: i can help the group with my skills, such share more SQLi vulnerable sites, make a free graphic services, and help other member on VB.NET section.

Elaborate on your achievements and future goals: Coded a few hacking tools, got Vouch from my teacher at school for my vb project :D , i am a coder in IFC (Indonesian Fighter Cyber). my ability is scan SQLi' sites, test bug on website, and also make a logo for my community. My goal is to help many people as possible on HackForums
Tell us about yourself: I am 16 years old, i study in high vocation school (Computer and Software). i'm good in some coding skills VB.NET, PHP/Databases/C#(learner).

Paran?rmal - *July 11, 2013, 12:21 pm*

Elaborate on your skillset:

I am good at various things ranging from Gaming to Computing. A major skill that I've always had is Gaming, but I am slowly moving away from that. Over the time I've been here on HF, I have managed to make this forum a learning experience for myself. I have learned how to RAT, a few money monetizing techniques, and many others. Now that I had my time to learn a lot of these skills, I would be more than happy to begin teaching others at no cost. I say no cost because I see knowledge as priceless.

Tell us why you would be a valuable asset:

I believe that being a part of this group, I will be able to learn quite a lot from the experienced members it consists of. The experience and knowledge that this group holds would not only benefit me, but with the skills I would learn while in the group, I would teach to others of the community.

Elaborate on your achievements and future goals:

In the near future a goal I have would be to learn as much as possible with my time in Legion if accepted. I have made money from my slaves and use them to make me bank. My goal is to learn and teach information about all sorts of hacking with the knowledge I would gain in Legion.

Tell us about yourself:

I see myself as a kind, joyful, and polite young man. I love to give, not get and It's the thought that counts to me. I have never treated others with disrespect because nobody deserves to be treated in such a way. Going by the motto "Treat others the way you'd want to be treated" has kept my friends, family, and all other relationships strong. I enjoy to be social and meet new people, both off the internet and on HackForums. I also strive to keep the HF marketplace and lounges a nice place to talk and help others get along. Keeping peace on HF has also kept me going and never giving up. You go through good times, bad times, terrible times, but if you never give up, nothing can bring you down.

Thanks for the chance Anonymous!
Good luck everyone.

Basic PHP Knowledge
Marketing
I don't want to add skillsets that would look retarded on my application, but I'm able to do a lot of other things that I don't really want to post on the application. Let me know if you want to know (Anonymous/Legion Members).

Tell us why you would be a valuable asset:
I could write tutorials that people will actually use because when I was learning Linux, I learned everything outside of HF and I'd like to let people know on how to do something in Legion's name/reputation.

Elaborate on your achievements and future goals:
I've made nearly $5k off this site in 2013, it may not seem like a lot to some people but being a 16 year old teenager and having that financial ability without having to work at some shitty job 30 hours a week, is pretty awesome. I use to run Olympus Stresser which almost reached 400 active customers but had to leave due to partnership issues. I've made a new project called reBOOT,

which is starting to kick off.

In these upcoming years I want to advance my knowledge in linux, gather more knowledge within the Web Hosting area; perhaps start my own company if I make the time for it and lastly, start to gather certifications and go to college.

Tell us about yourself:
My name is Joey, I'm 16 years old and I live in Orlando, Florida. I've always loved music and still do to this very day. I hope to march Drum Corps in 2 years till I'm 22. I don't feel like giving you a life story but if you want to know more about me, simply message me.

Thanks for letting me apply to become a Member of Legion.

Temper ? - *July 12, 2013, 2:57 am*
Elaborate on your skillset:
My skillset is very basic, but I hope to join and widen my knowledge in the following areas that I currently know of.CodingJava - Java was the first language I ever learned, although I am not 100% fluent and I am very jagged when coding, I can get jobs done. I've created various Minecraft Hacked Clients in the past, each of them being private for only friends. My best piece of work was a client called "Affect" where there was a certain console command that allowed us to fly on servers that had it disabled, without being kicked for being in the air for too long. This was around the days where NoCheat was very uncommon so this worked wonders! (The command was "NOPE")
Visual Basic 2010 - I've been using this software since late 2012, I started about 2 months after I joined the forum, lurking the VB.NET section and skidding programs whilst also getting used to syntax at the same time. Small Basic has also helped me learn a lot more, even though I've only been using that for around 2 months, it's boosted my skill a lot because it explains what things do in an understandable manor. Call be a noob, but it does help.Runescape Account Stealer - I created an RS account stealer a while ago, back in the days where there was no trade limit so it was easy to clean accounts out. I made it look like a genuine Jagex LTD tool used by the staff to spawn in any item they want, most people that used it were foolish enough to actually put their main account login details in and I was able to make absolute BANK with this, in one case I scored a purple party hat.
RATing - RATing is something I am boarderline new to, I've owned BlackShades NET for about 4 months now and I've already learned a lot and made a lot of money from Runescape account jacking and selling the accounts on Powerbot.net.Spreading - I have my own ways for spreading to all different types of people. Whether it's to perverts, gamers or just to gain slaves in general, I've got my methods.
BTC Mining - With over 600 slaves, most of which having very powerful computers (gamers) I am able to mine BTC quite quickly. Tell us why you would be a valuable asset:
I feel that I would be valuable to this group because I can definitely help out in some areas I may have knowledge in, I am active and want to learn as well as share my own skills. I think it would be great to have someone like me in the group because I learn quickly and teach in a very different manor which makes the things I teach very graspable.
Elaborate on your achievements and future goals:
I kind of listed a few achievements in the first part of the application, but my future goals include creating bigger and better programs that would possibly be good enough to sell on the marketplace.
Tell us about yourself:
I'm a 16 year old Australian boy, very computer literate compared to most people that I spend my daily life with, which means people always ask me for help and that's what I enjoy doing, so I have no problem with doing so.
I find myself a very caring and sympathetic person, which isn't very ethical for a hacker/coder that wants to make money doing so, but I'd hope to learn to overcome these things and only apply sympathy and care to those that mean something to me in my life.

Thanks for reading, hope to get accepted. ?

Wonders - *July 12, 2013, 4:30 am*

Elaborate on your skillset:
Marketing
I believe I am currently somewhat of a decent marketer. I know how to make money via my websites and forums by selling many beneficial upgrade memberships, receiving donations, selling highly valued official usergroups, SEO'ing the site and more.

Social Engineering
I have been learning how to SE for a few weeks now, starting with small things such as Xbox Live accounts, Skype accounts, Hotmail accounts etc. I have been reading plenty of tutorials and guides to help better myself in the subject. In a few weeks plan I hope to move on to bigger and better things, such as laptops and other goods and appliances. Being a somewhat good writer, it helps me talk my way into things and 'bullshit', per say.

DDoS Attacks/Stressers
I understand thoroughly how DDoS attacks work. I understand how to also ping IPs, flood servers etc. Some methods I know of include CHARGEN, UDP, UDPLAG, SSYN, CSSYN, ESSYN, GET, POST and many other methods. My knowledge on stressers came about after being attacked numerous times and I wanted to learn how to get revenge and drop my enemies.

Gaming
I wasn't sure whether to add this or not as I don't see how it benefits my application for a hacking group, but it's a skill of mine so I may as well add it in.

As mentioned below in the about me subheading, I am an avid gamer. I enjoy gaming both competitively/seriously as well as having fun and mucking about with my friends. I enjoy car racing games, shooter games, some adventure/strategy games and most of all, I love my sports games. I have been playing the FIFA series since FIFA 09 and have had every FIFA edition since. I own both an Xbox 360 and PlayStation 3, as well as gaming quite regularly on the computer. On the computer I enjoy games such as League of Legends and Counter-Strike: Source. I made it into a semi-professional Counter-Strike: Source league a few years ago in the Australian gaming scene. However with the release of Counter-Strike: Global Offensive, the game has died out and the scene is dead.

Website Management
I know quite a bit about what it takes to run a successful forum/website. I previously owned www.#.net (30k posts) before selling it, www.chitnchat.net (40k posts) before selling it and currently www.diversebox.net (15k posts, 350 members). I plan on taking DiverseBox as far as possible and not selling it like I have previously done with my other forums. I would be willing to explain more in detail via private, as I do not wish to share my private methods as to how I gain traffic and make money from them.

E-Whoring
Whilst not having ewhored much recently, I used to do a lot of it back in the day. I made some decent cash from it and I often found a lot of vulnerable targets. I would create a notepad with a few different identities, each with their own email, name, Paypal, Skype, Facebook and pictures attached. I would lurk around a few Tinychat lounges, adult chat sites, sites such as Omegle, adult dating sites etc. I gave them a picture or two and lured them in, getting them to give up the money. I have been planning on ewhoring more as of late, but due to running a forum, work and being a writer and reviewer on HackForums I have found it hard.

Why do I want to join?
I want to join Legion as it's a great group. I have always been in awe of Legion members as I know they are good 'hackers' and they know their shit when it comes to blackhat material. I see this is a great chance for me to better my blackhat skills and become the great 'hacker' I have always wanted to be. Of course I won't ever let that get to my head and if I learnt how to attack people, I would only ever use it if it were beneficial to me.

Tell us why you would be a valuable asset:
I believe I would an extremely valuable asset to the group as I am a fast learner. I will pick things up quickly and within a few weeks be able to assist members all throughout HackForums with tutorials, eBooks and guides. I'm always up for a challenge and I do not give up. If I can't get something at first I will continue hard at it until I finally get it right. I am a loyal member and will not give up on the group, ensuring I stick by the groups side from day one. I am a literate person and I feel as though I am competent with writing and the English language. I take the time to read guides and threads thoroughly and I always write professionally with exceptional punctuation and grammar, thus giving the group a good appearance.

Elaborate on your achievements and future goals:
Real LifeI have successfully passed and completed year 10 in high school.
I currently work full time as a first year cabinetmaker, having left school after successfully completing year 10.
I have my learners driver license and have completed almost 80 hours of driving.
I've won 3 football grand finals and 2 grand finals in basketball whilst also winning the MVP award for basketball twice.
OnlineI currently own and manage a somewhat successful forum. The forum has been up for just over a month and has already achieved 15,000 posts and 350 members. Having a slight hand from friends and members, I have done almost everything myself from advertising, development, images and more. I have already made close to $800 strictly from donations, upgrades and group sales. I have more money on the way after recently monetizing and SEO'ing the forum.
HackForums - I have hit 5,000 posts, closing in on 500 reputation, a member of 5 official groups, 2 of them being site-official groups. I am on the Writers team and I'm also apart of the Reviewers team; two roles I highly value. I am also a member of Innovation; a group quite similar to Legion as it involves coding, programming etc. I have learnt quite a bit from Innovation.
I have successfully managed to learn a few languages in regards to programming and coding. I believe I am confident in PHP, HTML and CSS. I am also currently learning Java and plan to move on to another language when I feel competent in Java.
My goals for the future would to have a successful job in something related to IT, a good house with a nice wife/girlfriend and kids, achieve 10,000 posts on HackForums, become more fluent in a lot of hacking subjects and to travel to London to see Tottenham play.

Tell us about yourself:
My name is Hayden and I am an average 17 year old male from Melbourne, Australia. I dropped out of school after year 10 and I am currently doing a first year apprenticeship as a cabinetmaker. I would like to go back to school and study IT, however I simply don't enjoy school as it simply doesn't interest me. I enjoy gaming, mainly League of Legends, the FIFA series, a bit of Call of Duty, Grand Theft Auto and Need for Speed. I also love my sport, having played basketball and football for a large majority of my life and only giving up both recently due to work commitments and not having time for training. I am a friendly person, I love to have a joke and muck about (to an extent) but at the same time I can be serious. I act professional and mature all through HF.

?Nyanbot - *July 12, 2013, 5:04 am*
Going to post a simple app because of the last two website apps created have got me no where.

Elaborate on your skillset:
I code almost fluently in VB6/VB.NET and PHP. Can also work in C# however not to the extent of VB. All self taught with the help of google and youtube.

Tell us why you would be a valuable asset:
I love to help and learn, which can only be done from an active environment. I spend at least 5 hours online a day and almost always on HF so I'd be able to help out quite a bit.

Elaborate on your achievements and future goals:
I have no notable achievements within HackForums nor anything anyone here would know about. However I hope to develop a range of programs to offer on HackForums. Also in the process of applying for special entrance to university due to me leaving school to work.

Tell us about yourself:
I'm Josh, 23 years old from New Zealand. I like waterskiing, wakeboarding and everything else along those lines. I dig getting to know people, especially over TinyChat. I have three jobs irl. Two of which are sales jobs and the other is for my mother. (Love you mum). I have 2 cats and a dog. Anything else, just ask. :3

Thankies.

Terry A. Davis - *July 12, 2013, 7:06 am*

?Nyanbot Wrote:- SNIP -
Putting it out there, just because your last apps got you nowhere doesn't mean this one won't. Sure Legion is mainly based around hacking and judging by your Skill set and our past allegiance in Innovation I might have put a hint in saying you do know your shit since I knew from there, but you let yourself down by not putting effort into it, but who knows you could still get it. It's up to the big man Anon.

Enterprise - *July 12, 2013, 7:10 am*

I see a lot of teachers have been recruited, congratulations. I have always felt vulnerable to hackers, per say, so I would like to learn how to do it, just so i am not so vulnerable.

muzzy. - *July 12, 2013, 7:51 am*

(Jul 12, 2013 04:30 AM)Wonders Wrote: *[CITE]* -snip-My personal vouch goes to this user. His webmastery and understanding of web networks is unmatched from what I've seen.

He'd make a great student; highly adaptable.

Amphibious Garbage - *July 12, 2013, 8:13 am*

Elaborate on your skill set:
Although rather basic, my skillset breaks up into the following parts:Batch / CLI
Basic SQLi
Basic XSS
Understanding of different types of DDoS attack

Batch / CLI

Although I am versed in other languages, I find understanding of the Windows command line to be the only one that could aid me in any hacking endeavour. I have attained almost complete comprehension of the language since learning it upon my arrival to hack forums.

Basic SQLi
My understanding of code injection into SQL databases is mild. I understand, at least on some level, how escape characters can be used as a basis to finding a vulnerability and injecting code into a server.

Basic XSS
Once again, my knowledge here isn't extensive. I don't understand how an XSS works at all, to be honest, but I do understand how to carry out a basic one.

Understanding of DDoS attack
This is a trait I picked up after engaging in an argument with a hack forums user. What started as something simple turned into quite an obsession, leading me to gain comprehension of the following attacks:UDP
SSYN
POST
GET
HEAD

Tell us why you would be a valuable asset: I consider myself to be smart, adaptable and a friendly face around groups. I'd be willing to share my knowledge with others, while picking up knowledge from other members of the group.

I am a good teacher. I can take my knowledge and relay it effectively to others. I'm renowned by my friends for being one to understand and then relay information without having to have full comprehension of it, this is a skill in my opinion.

In Legion, my main goal would be to help others out as much as I can. I think this would make me an asset.

Elaborate on your achievements and future goals:

GoalsAdvanced knowledge in pentesting.
Deeper understanding of SQLi and how it works internally.
To tour the world

Achievements$500 made online in a week.
Understanding of most types of DDoS attack.
Near perfect CLI comprehension.

Tell us about yourself: My name is William, but I go by the handle 'Operate'. I'm a budding webmaster, administering and staffing on any website or forum that I can find. I planned to create my own board, but personal complications forced me to abandon the project.

I've lived in the same place for my entire life. I've never left the country, and one of my biggest goals in life is to tour the world. Although I'm currently too young, I'm making money with CPA / PPD online to save funds to hopefully one day embark on my trip.

My hobbies include:Webmastery
Reading
Gaming
Soccer
Fishing

Although stereotypical, these hobbies I find are what shapes me as a person. Each of them holding a special place in my heart.

Penar - *July 12, 2013, 8:23 am*

Elaborate on your skillset:
First off, I like how you go right to the point by saying, "Elaborate on your skillset." It's assuming we have multiple skills, because this is an elite group. Anyways, I contain the following skills:Mac OS X
I've been an avid user of Mac OS X since I can remember. I've gone through so many different computers, because of all of my "tests" I would perform on them. I know the insides and outs of iMacs. I'm really into using Mac OS X, due to the simplicity of it all.

jRAT
I know you said we don't want anyone who is into RAT's, but I have a ton of knowledge in this. I feel I'd make a great asset to Legion, because of all of my iMac knowledge. I'm not only experienced in iMacs, I know a ton about PC's. I was head of plugin sales for jRAT for a while, so I've gotten to know a ton about the product. My knowledge in Java would really do good things in Legion.

Social Engineering
I've been fascinated with social engineering ever since I joined this forum. I was sad that the section closed down, because I read into that section so much. I have really became good at social engineering everywhere from small companies for a free bag of chips to large companies for a free pair of Dr. Dre Beats headphones. I would say I'm more than accomplished in this field.

CPA
I know this isn't related to hacking, but I'm very skilled in this. I make on average $50/day on one niche. I'm above average in the ranking of YouTube videos. This really is detrimental to the success of your niche.
Tell us why you would be a valuable asset:
I would be a very valuable asset to Legion for many reasons. I am so eager to learn new things, so I would become very skilled during my stay. My professionalism and dedication is above average, so I would represent Legion in the highest manner possible. I could offer my iMac knowledge to members, because I know the majority of members use PC's. Overall, I would put a ton of my time and effort into Legion, thus not only making my time here better, but your time, too.

Elaborate on your achievements and future goals:
I have many achievements throughout my Hack Forums career. I wasn't the member I was here four months ago. Four months ago I was a lounge whore, but now I'm out and helping with whatever I can. I dedicate a ton of my time to assisting people with CPA and jRAT. I enjoy helping, because you get an awesome feeling knowing you've made someone else succeed. My future goals consist of getting accepted into Legion, becoming more skilled and knowledgable in another area of hacking, and making myself an even better member around here. I know these are very vague, but if you do all of these, you hit a very broad spectrum of things. Yes there are more small goals in there, but those will fall into place as I complete the big picture goals.

Tell us about yourself:
I'm an average teenager living in the United States, who is very eager to learn. Ever since I got into the Internet, I've been so much smarter in the real world. I am so eager to dive into new things, because I am a very quick learner. I can tackle numerous projects at once if I'm interested in all of them. Overall, I'm a very intelligent person, who can bring great things to Legion.

I want to thank you for offering me this opportunity to apply for such a great group. I also want to thank you for taking the time to read over my application.

Regards,
Penar

NME. - *July 12, 2013, 1:04 pm*

Application Removed Since I already been Accepted.

Nyonic - *July 12, 2013, 1:08 pm*

Elaborate on your skillset:
I have lots of skills, but only a few of my skills can help the group in a positive way.
Some of my skills are removing viruses, I can remove a majority of viruses over teamviewer. I am not very good at explaining how to remove viruses over skype instant messaging though but I am working on that.
I can do/find XSS and I have reported them to a few schools and other websites.
I'm good at SQL Infection, but a 3 year old can do that so I don't find it a very good skill. I'm good at doxing and finding out information about people.
I am also good at social engineering, I have social engineered a few things which I will not disclose here. I can probably say my SE skills are a 8/10, they are really good.
Tell us why you would be a valuable asset: I would be a valuable asset because I am dedicated to everything I do, I have been in the Empire since September 1st and have never been kicked. I was in Rhythm for the majority of its lifespan, and I hope to do the same to Legion if I get accepted. I feel I would be a valuable asset because I have good social skills and would be able to bond with members of legion, not causing un-needed drama.
Elaborate on your achievements and future goals: Some achievements of mine are being a A/B Student which most people do not have. Other achievements of mine are being healthy, it may be sad but a majority people in the world are not healthy. Some goals of mine are to learn pentesting, join Legion, be acknowledged on any major site for reporting something, and to have a good job when I get older.
Tell us about yourself: Hello, my name is Hefto but most people call me Hefty. I'm a pretty interesting person, you'll probably never find another person like me. I enjoy learning about a majority of things it varies from religion to fixing someones computer. I enjoy debating, debating is a fairly fun thing for me to do. I like to get my debating skills better by debating. Yes. I did edit the post, here is what it was before. I fixed a little mistake and I asked Frostbite 3 about it, he said it was fine. I hope this doesn't effect me joining

blu3 - *July 12, 2013, 2:31 pm*

Elaborate on your skillset:
Rather fluent with visual basic, know HTML rather well, know my way around photoshop and can make basics, and some basic SQLi (haven't done much SQLi though, just know how)
Tell us why you would be a valuable asset: I can create banners, logos, etc. in photoshop. I can work to create HQ tutorials and giveaways. I can create simple tools in VBasic such as username checkers and fake programs, and I can do some basic HTML stuff.
Elaborate on your achievements and future goals:
Achievements: Finished getting the base for my current VBasic.NET project, StarShip HTML, working. StarShip HTML allows you to create a deface page or basic webpage with an easy to use console (working on GUI version)
Created a basic fun little tool to generate "errors" (as in message boxes) where you can customize the looks and text of it (Just for fun)
Goals:
To finish StarShip HTML and work on my next project, StarShip Keylogger.
Tell us about yourself:
I'm 14 (but very mature for my age), from Florida, love to code and game. My hobbies outside of

coding and gaming include: comic collecting, HeroClix (collectable Marvel, DC, and Star Trek minitures that have a game to go with them :D), and watching Sci-Fi shows (Star Trek, Firefly, Doctor Who, etc.).

Duk3 - *July 12, 2013, 3:23 pm*

Elaborate on your skillset:PC Gamer
Tell us why you would be a valuable asset: Truly I would not be an asset. I do not have an knowledge of anything relating to hacking or black hat. All I can say is I can edit videos but they aren't that good. If you want to see what I have done, just shoot me a PM.
Elaborate on your achievements and future goals:I would like to learn about hacking and gain knowledge in the field that you would offer me to study.
Tell us about yourself:Basically I just a normal guy, living life trying to survive the everything that is being thrown at him. I'm a relax chill person. I hate conflict but I would get heated if anyone try to mess with him and I will speak my mind.

addicted™ - *July 12, 2013, 5:07 pm*

Elaborate on your skillset: I like to Surf i Like to learn. I'm Helpful and Nice.
Tell us why you would be a valuable asset: Because i sit on the computer and learn everyday.
Elaborate on your achievements and future goals: Get my Website finished With my game... Also Create a Hosting website.
Tell us about yourself: um i like to surf in my spare time. i Work for a hydroponics store where i live. Im working on a Website and a game with 2 mates. I Like to learn im currently learning java and i wont stop until i have finished all of the coding languages.

TheEnd-cR - *July 12, 2013, 5:33 pm*

Elaborate on your Skillset
I've been in the hacking/cracking scene a long time. Skills include (but not limited to):social engineering: not the kind of social engineering HF made popular either; actual SE'ing from before it was used to manipulate companies for free products
e-whoring: having years of social engineering skills gives light to e-whoring as a skillset. it's essentially the same thing, with role-play thrown in
cracking: I have years of experience with very old cracking tools (I haven't in years) such as AccessDiver, C-Force, etc. I do know how to use/understand Sentry, Cracking Rampage, other OCR/Form tools
proxies: as a network professional, I have deep knowledge in proxies and anonymity. I've focused on providing proxies and VPNs to cracking forums for a long, long time. Experience includes FPL, Charon, ProxyFire, Bleach, etc.
game hacking: I ran a console hacking forum focused on PS3 exploitation & hacking; you can Google it to find video tutorials I've written - c0deReality; though, I closed it last year and opened a new community this January (computer security community)
management/administration: I've administered/managed a dozen forums over the years, and have deep knowledge & experience in most of today's popular forum software, including: MyBB, phpBB, IPB, vBulletin, SMF, etc.
malware: I don't want to inlcude this because of the OPs state on "kids who know how to use a RAT" but, I do know progressively how to use (to their full potential) most if not all RATs, stealers, keyloggers and the like. I also have little experience with IRC bots, tons of experience with herders and miners
If you have any further interest in my abilities, I'm also fairly good at mentoring & teaching people the ropes of just about anything I can pick up and understand; take a look at the tutorials I've written, here.
Tell us why you would be a Valuable Asset
I seem fairly qualified, and could probably teach some of you a thing or two.

Elaborate on your Achievements and Future Goals
See "Elaborate on your Skillset"
Tell us About Yourself
I'm 23. College on pause (Bachelor's in computer science). Working on CompTIA Net+, A+, Security+ certificates at the moment. I have had two job offers working in a local school district from IT professionals - but have them on old because of school (since I'm on pause though, I'm working on getting one of these jobs at the moment). I jerk off to computers on the daily, and I like to teach people things. I try to not fit the generic cliche that is the scene, and break away from it to be unique and stand out. Tutorials with a dab of humor are my specialty. ...and no, not shitty humor either.

+Pirate - *July 12, 2013, 10:35 pm*
Elaborate on your skillset: Coding in Python, Some Visual Basic, basic website designs and graphic creation. To be more specific, I was teaching members in Innovation about the language of python, dabbling in Visual Basic when a 'fake' program was needed to be created, designing the old Innovation official website (Down now) and creating multiple thread designs for members last year.

Tell us why you would be a valuable asset:
I am a dedicated person who is both willing to learn and to teach. I commit myself to projects I am involved in and see things out through the end. I am able to help people either one-on-one with a problem which they may have, or teach a small group of people something. I am always willing to learn new things and tinker with them, so if I am accepted and learn new skills, I can play around with them and then pass on the new skills to newer members if I am given that chance.

Elaborate on your achievements and future goals:
Achievements:
Runescape Mega Guide
Helping out HF by being a part of the Writ3rs group.
Leader of Innovation/Respawn
What's your stance on Homosexuality? 5th highest number of posts in a thread in the SSRP section.

Future Goals:
Hopefully be a mentor one day.
Learn how to be a 100% fluent coder
Teach many members about coding or any other topics.
Make some good friends

Tell us about yourself:
I am located in Australia where my hobbies include Sport, Movies, Books/Literature and Coding.
I joined HF nearly 3 years ago.
I own a cat and a dog.

Elaborate on your skillset:
My skillset is not the biggest or the best, but i like to learn along the way. So far my skillset is mostly on computer technical tree. my skillsets in hacking are Ratting, Website hacking and some coding, but i'm still learning about it.
Tell us why you would be a valuable asset: Well i like to share what i know with others. I'm a open

minded person, i'm always willing to consider ideas and try to work stuff out.
Elaborate on your achievements and future goals:
my biggest goal would be to finish up learning about coding. i've got alot of ideas with some friends, such as app development, peer to peer development. so that would be the main thing.
Tell us about yourself:
I'm 17 years old. i live in Denmark, i have a job at a local computer repair store, where i work 5 hours a day. i'm going to move to london to finish up getting a masters degree in computer science (sometime) i'm single but always looking to find someone. i smoke daily and i spend some time at the gym like 3-4 times a week. I have black hair, and blue eyes. (most people call me Emo, but i wouldn't see myself as that. i guess i wear alot of black. but thats just because it's my favorite color. i don't wear eyeliner or anything like that.) My main gerne in music is Metal and House.

Mr. Fedora - *July 13, 2013, 12:21 pm*

Elaborate on your skillset: HTML, Basic PHP, Doxing, Social engineering.
Tell us why you would be a valuable asset: I am a very friendly person and I love to learn in order to give.
Elaborate on your achievements and future goals: I haven't really had much achievements yet, but I am learning more everyday and will have some achievements soon. I start going to college to become a network systems administrator next year and I am starting to get into some monetizing methods to make a little bit of extra cash for college.
Tell us about yourself: I am 18 years old, I am always wanting to learn more things and when I set my mind to something I will do anything it takes to accomplish my goals. I have been a member of HF since beginning of this year and have been reading countless guides.

times558 - *July 13, 2013, 2:55 pm*

Elaborate on your skillset: I am good at Social Engineering as I know how to tell what people are thinking a lot of the time and how to become friends with them. I first came to HF to find out how to use RATs. I have learned pretty much everything there is to know and I have posted detailed threads to share my knowledge with others so they can learn how to use them. In my time of using them, I also learned how to remove them. I can definitely help people remove an infection quite easily if anyone has some malicious software on their computer. I used to be into game hacking on the Xbox and that went quite well for me. I learned everything I needed to and it is fairly common to see people asking about game hacks and how they can get into hacked lobbies and I can tell them all they need to know about the whole thing. I learned how to do gsc coding for it even though it is not that hard but I managed to teach myself just by looking at how others had done it and without looking at any guides or anything like that. I am good at picking out scammers and avoiding them.

Tell us why you would be a valuable asset: I think I would be a valuable asset because I can help in many situations. If anyone has any questions or needs any help, it is my number one priority to help people out. I can help people avoid being scammed and tell them exactly what they need to do to do certain things in good detail and I always make sure that people understand what I am saying. I can see when a person needs help and can always do it or point them into the right direction.

Elaborate on your achievements and future goals: I would like to learn more about hacking and the best ways to use hacking skills in white hat methods. Another goal of mine is to get into a good group like this one! As for my achievements so far, I dont have much. However, I feel that I have done well to teach myself how to do all of the things I can in this field without annoying anybody, and using common sense and google without posting stupid things. I also think that an achievement for me is how I have been able to help others out with their problems pretty well and how I have always managed to be friendly with people no matter what.

Tell us about yourself: I am a person that always enjoys learning new things, how to use new things

well and helping other people. I dont like using hacking for black hat activity (I have 20% warning for disallowed blackhat activity for giving away four minecraft accounts but these accounts were not hacked) and I prefer to find out ways to use them in white hat methods.

Im gone brah - *July 13, 2013, 4:16 pm*

This group is like a family! Good luck all applicants!

(Jul 11, 2013 02:21 PM)Orochimaru Wrote: *[CITE]* I want to join i am new to hackforum but i downloaded loic and hoic and can take down all websites so if you need help just pm me and give me your user bar thank!

This made me laugh! Thanks, sir!

Group: hopefully we'll get some good students here :)

Elaborate on your skillset:

- XSS

XSS(cross-site-Scripting) is the thing which i have learnt from a top Class Institute . I know each and every thing in XSS as i am trained to do . I have made total of 103$ by Reporting them to high class Website venerable .?

One of my Hand made Tutorial on Advanced XSS

-SQLi

I am a Experienced Exploiter in SQli . i can do manual Blind and manual regular exploits ! i Hacked more that 200 Website with different SQLi Techniques !

-Simple exploits

I am very experienced in Simple exploiting . i have been rewarded 50$ for a Simple exploit in filefire.org

Tell us why you would be a valuable asset:

I am a valuable asset because these day's there are pretty a few in the Internet who are actually trained for 4 years of hacking . i will be pretty much helpful in helping the legion members with there questions on XSS or SQLi or sometimes may be simple Exploits !

?

I can teach and willing to learn eagerly the thing which i don't know .

Elaborate on your achievements and future goals:

::>achievements<::

1) My First ever hacked website cotton bags.in Followed by Many late

2) Getting " best Security Annalist " for the year 2009 From IBM

3) Completed my 4 years degree on Hacking and got my Certificate by 4.7 stars/5 stars

::>Future goals <::

I want to Start a Manipulation Website by a high scale . it would make a excellence in world . i am currently saving money for it .

my salary on IBM is not enough i am going to attend the Google merit Job test t be conducted in 2013 held in Germany

Tell us about yourself:
My name is Jagadeesh Kotra . i am 22 years old . Msc + Security Degree from IIT Kanpur ! i am now living in Hyderabad, my birth place , i have 1 elder brother who is working at google right now (support agent for Picasa)

Regards,

a challage

Year? - *July 14, 2013, 2:03 am*

This Application is for the position of Student, Im learning to Expand my Knowledge
Elaborate on your skillset:Gaming, Moderate GFX, Minimual Apache and MySQL for servers. (Just acquired my first server yesterday)
Tell us why you would be a valuable asset:I going to be Completely Honest,most likely i wouldn't. my main reason for going this group is to acquire knowledge and a skill set for me to eventually give back and prosper in my future ventures.
Elaborate on your achievements and future goals:Im looking To just help, anything i learn im willing to share. Im looking to thrive on hackfourms in the future.
Tell us about yourself:My name is Diego, i go by my alias Keres. I'm 16 and live in southern California.I'm looking to expand my knowledge in anything to do with hacking and web-development. I'm pretty new (Everyone was once) and haven't really set my mind on something i want to thrive at. I've recently have bought a simple server and amp script looking to start my first booter.

DARPA - *July 14, 2013, 2:23 am*

Elaborate on your skillset: I could convince you that the sky was purple on a sunny yellow day. Then after you have given me your passwords, i would probably get stoned and not use them to maintain my inner peace. I could show you the anonhacks# links to 25,000 HF members hashed passwords. Sensing darkness in the souls of men and women across the ether we call the internet. Wondering why know one realises the Internet is a military owned device stolen from physics professors who wanted to trade valuable scientific data. Listening to Carbon Based Lifeforms while using Kali to test security all over the globe. Touching on the strength we call humanity, and hoping the world will realise that one day money is stupid, and sharing and community is of the most value.
Tell us why you would be a valuable asset: Because that's me in the mask....

Elaborate on your achievements and future goals: Networking is all i can say.
Tell us about yourself: I have a 10 inch cock. I hate the government and corporations, think that soon the global revolution will turn into a tech war that will eventually fade into a new era of super fast change.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

White Hat Help

I've my best skills in White hat security, I've been helping and very active in WHH section since I joined. Also I did helped many members by PM, TV, Skype, Helpdesks etc. I've created some HQ tutorials and mega threads related to WHH. I do have knowledge in h/w trouble shooting, diagnosis and networking. I've been mentored by Corso(Legion|Teacher) and Chief(HF MRT). I spend 80% my time in WHH and Beginner Hacking section while I logged in.
[AV, AM, AS] Security Tools Ultimate Compilation [with Rating] [Mega Thread]
[TUT] Infected ?? Tutorial to Safe Zone[TUT] [Upgrading Now]
??? [Free] Virus/RAT Removal | Error Fixing | Whitehat [PM, Skype, TV] ???

Programming

I do have interest in coding and I do possess knowledge in following programming languages.8086 Assembly (Intermediate)
C/C++ (Intermediate)
Visual Basic (Intermediate)
LISP (Beginner)
Python (Noob)
HTML (Intermediate)
PHP (Intermediate)
SQL (beginner)

Hacking

As this was the main intention for me to join Hackforums, I couldn't achieve much expertise in this area. Although I'm not an "Hacker" I learned and practiced sqli and xss with tutorials. I got the basics and I found vulns. multiple sites as well. I came to hf as a skid who wanted to deface websites but as for my experience Hackforums taught me many things including some ethics I should follow. I do know basics in server rooting, symlinking as well but to be frank I consider myself a noob. I'm really interested to learn hacking and and excited about the group(In a case if I got in).

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:

I think I would be a valuable asset to the group because I wanted to learn from other members as well as share my knowledge across this forum, I believe knowledge is meant to be shared. I'll try my best and put fourth my maximum ability to help this group and make this group the best. I'm a very

dedicated and active member, I do take my responsibilities seriously and professionally. I'm a quick learner as well as have adaptive nature.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:

Even though I joined this forum to learn hacking, I've achieved many goals such as achieving my expertise among WHH, learning a bunch of programming languages, beginner Hacking level. One of my best aim was to get in to a real hacking group which was Root(which is now decapitated) and that makes my current goal is to get into the Legion(Which is the only group that related to HF's subject.).

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:

I'm 19 and I'm from India. I'm a student in college for Comp. Sci. grad. I joined in HF on Aug 2013 and that makes me about 1 year old here. I do wander in HF like 3-4 hours a day. I like to swim, fishing, blog, code in my spare time.

Thank you for reading my application.

PS: I know it's against rules to edit our applications but I PMed Anonymous about this and he gave me permission to edit.

Darkwin - *July 14, 2013, 12:17 pm*
I want to join this group with the sole purpose of getting doxed... :3

?pth?n - *July 14, 2013, 12:17 pm*
Elaborate on your skillset:
I consider myself as a good social engineer. I am not talking about the stuff on how to get a free pizza. I am talking about how to compromise a big company. I am aware of the security risks in the internet, and how to prevent from getting tracked. Not the typical VPN stuff, but also about EM radiation, Van-Eck phreaking and this kind of stuff.

I have some knowledge on how to get into networks and how to compromise the users within.

I started learning Python a few months back. I plan to step into php/html aswell. I know the basics of VB, this is why I coded a free file pumper and decided to share it with the community.

Furthermore, I know stuff about computing, which can be quite helpful since I can help others when they are having trouble with their hardware.

Tell us why you would be a valuable asset: I am good at teaching things and spend alot of time helping other users. I guess having alot of knowledge about SE (and DOXing) could be useful aswell.

Elaborate on your achievements and future goals: For the future, I would like to "master" Python, php/html and then start learning more difficult languages like C/C++. I have some goals on what to code, and I am willing to spend alot of time achieving them.

Tell us about yourself: Since I am a social engineer, I won't tell you my life story. I am interessted in politics and I will be there when the time has come. Beeing a social guy, I enjoy real life aswell as HF ;)

Flaaffy - *July 14, 2013, 12:34 pm*

Good Luck to everyone who applies, legion is a HQ group who looks after their members

#Havoc - *July 14, 2013, 1:18 pm*

I wish to be apart of the student program.

Elaborate on your skillset: I can get into various Social Media accounts with ease and have done requests for many people on this site.
Tell us why you would be a valuable asset: I would like to learn and get to be apart of a great group.
Elaborate on your achievements and future goals: Future goals: To be able to be experienced with network security. I've tried coding so many times, but never got good / I suck horribly.
Achievements: I don't really know anything to share publicly, if you wish to know I'd pm you or you pm me.
Tell us about yourself: I'm and 18 Year Old. I smell like old grits. I wish to be in your group because I wish to better myself with security and coding.

cocksec - *July 14, 2013, 1:34 pm*

Elaborate on your skillset: I can code a ton, HTML, MYSQL, Python, Perl, Lolcode, ect. I can also hack web based, server based, FTP based, system based, and program based.
Tell us why you would be a valuable asset: I will help other members when anything web based hacking, I also hope to learn a lot from others.
Elaborate on your achievements and future goals: My future goal is to become a white hat hacker, my achievements are learning how to break into systems
Tell us about yourself: I am 16 years old, I go to a private school for IT, I got accepted so I didn't need to pay. I love learning how to break in and securing stuff.

?Robocope - *July 14, 2013, 1:54 pm*

Guys if you want in this HQ group put some time in your application, don't just slap down a few words and call it quits. The more information you provide with details, the better. Good luck everyone

Katniss Everdeen - *July 14, 2013, 2:23 pm*

Elaborate on your skillset:: Im not very skilled in network security, security development or coding but i am very skilled in learning. I would love to take part in the Student program the group offers. I am skilled in Marketing. Money is almost everything to me. I think money can bring happiness and so far in my life it has.

Tell us why you would be a valuable asset: : I am very willing to learn and follow orders. I have been mentored by Inclination for the past few weeks, Im very willing to read daily and work to become a better "hacker".

Elaborate on your achievements and future goals:Some of my achievements i have reached recently was to buy a dirtbike for myself. I worked hard everyday within my Xbox Live Shop and achieved my goal within a few weeks https://hackforums.net/showthread.php?tid=3605559 My parents also challenged me to loose weight and i also achieved that goal by loosing 15lbs in under 2 weeks. I am very proud of myself. Some of my future goals are to keep loosing weight and buy another dirtbike with my earnings.

Tell us about yourself:Im 15, 6'1 230Lbs. I live in a very small town and i love Fishing, Hunting, And Xbox. I live a very simple life and i have tons of free time and im almost always on HF, Xbox, Or browsing the internet. I can dedicate alot of time to something if given the opportuninty. I hope you take my application into consideration. Thank you

Im gone brah - *July 14, 2013, 2:33 pm*

One off my best students actually, fast learner, good luck in future.. you'll always be my husky!?

Unacknowledged - *July 14, 2013, 3:05 pm*

Elaborate on your skillset:
I'm very fond of SQL Injection. I'm also fairly good with Social Engineering, whether it's getting items sent to my address that I've SE'd or getting virtual goodies like accounts, in game money, or in game items. I've also learned a lot about encoding and decoding, but that's fairly simple as most may know. I'm currently attempting to learn Java Coding, C++, C#, Encryption, and Decryption. I'm not a very good coder, which is why I'm (attempting) to learn from these assets. Another reason why I would like to be a part of the Student Program.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I would be a valuable asset because I'm an extremely dedicated member and I ALWAYS try my hardest to achieve my goals, in this case, it would be learning more and expanding my knowledge with my current skillsets, and later on once I've become a lot more knowledgeable with my current skillsets, I can then begin learning more about other skillsets like Programming or RFI/LFI.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
My future goals, as stated above, are becoming more knowledgeable with my current skillsets and possibly mastering a few of them. Becoming a Legion Student has been one of my #1 Priorities on Hack Forums and now that I have the chance, I'm definitely going to take it.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I'm very socially inactive if you will, I don't like being around a lot of people in real life unless it's a close friend or I know the person well. I enjoy darkness, I don't play much sports anymore, I am a very dedicated Hack Forums user and learner. I'm 16 years of age, my name is Trevor, I workout (at

home) a lot, I enjoy playing video games, as well as watching television.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
What's your reason for application?:
My reason for application is to become a Legion Student and to learn and be mentored so I can master or at least achieve maximum knowledge in my skillsets that include SQL Injection, Social Engineering, Coding, Encryption, and Decryption. I'd fully understand if I'm not picked for this spot because there's far more members that deserve this spot more than me. Thank you for reading my application.

Visual Basic™ - *July 14, 2013, 4:01 pm*

Elaborate on your skillset: I don't really have any skills but I know basic c++ and vb.net . I'm still learning but I learn fast, I'm also really good at cheating at dayz. I know where there are bypass able spot's . I know some java but not a lot. I did make a minecraft client but some of it was skidded do to lack of java knowledge.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset: I think I would be valuable because I'm not some guy who know noting about coding and I could post a lot of giveaways. After I get vb.net down I could post coding tutorials and dayz tutorials.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals: My goal right now is to learn c++ and vb.net . But I always I wanted to get in legion . Maybe this week is the week :). I also had a goal to code a dayz menu but I would have to learn c++.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:I'm a 14 year old guy that spends everyday on the internet. When I wake up at 5:00pm I go on my computer till 4:00am . I also play xbox sometimes but don't really play anymore. I spend a lot of my time on hack forums every day. I sometimes go outside but not a lot.

firepower - *July 14, 2013, 6:19 pm*
Elaborate on your skillset:
Social Engineering
I have been practicing it for almost a year now and so have have been extremely successful with small things.[/size]

Marketing
I am a well known seller here and plan to further my business.

Xbox
I've been in the Xbox community for over a year now and I have a vast amount of knowledge in many things, I will keep them private due to all the views and outlooks of HF and the rules.

Tell us why you would be a valuable asset: I believe I have information and my own markets that would appeal to the entire group and might help further someone else.

Elaborate on your achievements and future goals: I have achieved many things, not sure about what would be the specifics I would need to go into on them but you can ask anything. My goals would be to get farther into marketing and further my SE skills.

Tell us about yourself: I'm an extremely laid back person and like to keep everything running smooth, I do have a life other than HF so I have off time but business usually comes first.

Clique - *July 14, 2013, 7:45 pm*
Elaborate on your skillset:

Gaming
Competitive
360/PS3/PC/Tablet
Team Player
I have the ability to record and have recorded some gaming sessions in the past

Money Making

Being a re-seller for items on Ebay/Amazon
Virtual Items
General HF services
General Computer repair and maintenance

Graphics/Photography
I can make my way around with CS6/Aperture/Gimp/Paint
A Photography Student
Decent with photo manipulation.

Website building
I've created business websites for countless clients
Shouldn't have a problem with CSS/HTMl

Tell us why you would be a valuable asset: I'd be a valuable asset in Legion, because I'm a dependable member that won't let anyone down. I put the extra 101% into everything I do on HackForums and in Real Life. I'm no quitter, no. Clique is a very easy dude to get along with. He's a persistent and loyal worker.

Elaborate on your achievements and future goals: My goal on the site is to be recognizable for what I do. I want people to be able to say 'Oh, hey there's Clique!". For some In real life goals; I want to continue to pursue my studies of becoming a photographer later on in my career. I also would like to be more technologically advanced, since, that's what I use everyday; a computer.
Tell us about yourself: I'm Clique, I love to game, take photos, and overall just chill. I like making new friends, learning, and pick up things fast. I've been on HF for a while now, and being apart of another family would be magnificent. It's hard describing myself, but I try to be modest, friendly, and have perseverance in everything I do.

“Don’t fear failure so much that you refuse to try new things. The saddest summary of life contains three descriptions: could have, might have, and should have.” - Louise E. Boone

DarkFlux™ - *July 14, 2013, 7:58 pm*
got accepted into Legion ! i am happy ! # LOV3 Legion

Mojo™ - *July 14, 2013, 8:14 pm*
Elaborate on your skillset:

I am experienced in running and maintaining botnets. I am an experienced network marketer I have been in the business for three years. I can setup RATs easily. I have a lot of patience from working as customer service for several months as well as from teaching my students guitar which I have been doing for two years. I have just started CPA/PPD and have already made a nice sum for just starting out. I am a Social Engineer, I'm good at blatantly lying. Who needs a conscience anyways? I do whatever it takes to achieve my goals no matter the cost.

Tell us why you would be a valuable asset:

I am a fast learner and can help other students. I am easy to get along with, I do not cause drama. I can offer help in any of the areas listed above. I also have money to invest in anything that I feel is worth my time.

Elaborate on your achievements and future goals:

I have been playing guitar for five years. I am only 17, graduated highschool a year early, I am already making a stable income of $120,000 a year. I haven't decided whether or not to attend college yet as I do not see a point.

Tell us about yourself:

I am a easy going, quiet kind of guy. Don't cross me, I wont cross you. Easy to get a long with unless you piss me off. I love music of all genres. I have been playing guitar for five years and teaching it for two. I only work mornings so I have tons of free time. I am a decent writer. I also like animals.

Thank you for reviewing my application. I hope you take it into consideration as I have a lot I want to learn and share with everyone. Good luck to all who apply. ?

Juks - *July 14, 2013, 8:19 pm*

Elaborate on your skillset:
Gaming
I love to game, for fun, competitively, and with friends.

Ratting
This is the first thing i learned when i came to HF

Coding
I code in Java Language for fun and the challenge as services to people who are having trouble with for example RSPS's

E-Whoring
I have E-Whoring for the past two years and have improved greatly in it over the last few months.

Tell us why you would be a valuable asset:I can bring positivity and a helping hand into the Group. I know this group has very skillful teachers that can teach me stuff that would be useful and i would like to add to my skill sets and make the list bigger.
Elaborate on your achievements and future goals:Two months ago i reached $500 dollars from E-Whoring. I want to learn more about 'Hacking' and 'Coding' and i believe this is the right group to join.
Tell us about yourself:I'm 14 and i'm a freshman in HS, I'm very social and interactive. I have been RAT'ed and they stole my HF account which caused me to get rep-fucked and banned for 1 month. I will explain the scam reports as best as i can, I bought a method that i never tested and believed the guy and made a fool out of my self and the method turns out to be bad and not working. I have payed back a few members and i'm in the process of gathering the money to pay them back as soon as possible.

I appreciate reading my application. Accepted or Denied i will still love the group and know that it's HQ.

Mahdy - *July 14, 2013, 8:19 pm*

[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Elaborate on your skillset:
Well, I have skills in multiple areas. I have the potential to learn anything and anything that I strive for. If I want to get better at something, I keep working at it until I can. I love learning (trying to) learn more about coding: including web development, especially. Graphics & hacking. I am very good with making money online. I am very professional at eWhoring, I made ton off it and with RSGP sales. I am an outgoing person and very active until my health gets me and I end up in the hospital like I have been. I'm not some legit legion hacker, but I do know when I am in groups, I make sure I stand out. I make sure I was chosen for a reason. I have the willpower and desire to learn anything and everything.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Tell us why you would be a valuable asset:
As I said before, I just love meeting new people learning new things experiencing new stuff. I feel like I can learn a lot from the group and it in quite well.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]

Elaborate on your achievements and future goals:
Honestly, my goals are nothing related to HF. I plan to minor in web development and with my stomach disease, further speciailize in GI nursing/become a GI specialist. (Gastrointestinal).
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Tell us about yourself:

Well, My name is Mahdy, I am 18, 19 in August. I have a stomach disease which has been putting me in and out the hospital the last 9 months. I have been trying my all to stay positive, fight through. I always see the good in people and feel everyone deserves a second chance. I LOVE learning new things. I am slowly trying to get better at making text signatures, signature products, threads layouts, etc. I'm learning, but its hard without tutorials. I also am trying to learn more about coding in general. I love gaming as well.
And if picked, it will not be a let down. You'll be proud. :)
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Elaborate on your skillset:
Well, I have skills in multiple areas. I have the potential to learn anything and anything that I strive for. If I want to get better at something, I keep working at it until I can. I love learning (trying to) learn more about coding: including web development, especially. Graphics & hacking. I am very good with making money online. I am very professional at eWhoring, I made ton off it and with RSGP sales. I am an outgoing person and very active until my health gets me and I end up in the hospital like I have been. I'm not some legit legion hacker, but I do know when I am in groups, I make sure I stand out. I make sure I was chosen for a reason. I have the willpower and desire to learn anything and everything.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Tell us why you would be a valuable asset:
As I said before, I just love meeting new people learning new things experiencing new stuff. I feel like I can learn a lot from the group and it in quite well.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Elaborate on your achievements and future goals:
Honestly, my goals are nothing related to HF. I plan to minor in web development and with my stomach disease, further speciailize in GI nursing/become a GI specialist. (Gastrointestinal).

soxy - *July 14, 2013, 8:49 pm*

Elaborate on your skillset:
I'm very knowledgeable on the PS3 system, how the games run, how to modify them correctly. I was the first person to modify Black Ops II and publicly release them. I was one of the first to release mods for World at War (older Call of Duty) that used only a USB. During this time, I learned PPC (Power PC), I'm not great with it, but I understand it enough to modify the game and make it run without a problem. Some of the mods are CFG mods, it's quite simple but you still need some knowledge to do it. I've also learned HTML a bit. Here's some videos of my mods. Spoiler (Click to View)Here's a video of my one of my first modded lobbies on PS3.

[Video: http://www.youtube.com/watch?v=DmaRL2DqbvE]
Here's a video of my World at War savegame mod menu.
[Video: http://www.youtube.com/watch?v=7dL7P2aKiUE]

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I can help anyone that needs help with the mods I stated above. If anyone needs help with anything I'm knowledgeable in, I'll be sure to help. I've been in their shoes before and when I asked for help, I didn't get any. I like to spread my knowledge around.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
I've been staff on a gaming forum with over 1 million members. I achieved this through my modding capabilities of the PS3. I am also the first person to release Black Ops II mods for the PlayStation 3. I would love to learn more about modding in general, learning new coding languages, etc. I find it all very interesting to learn.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:
My name is Ray, I'm 18 years old and I'm from the US. I'm dedicated to what I set my mind to, I am a friendly person and I like to learn new things. I play Playstation 3 quite often, when I'm not doing that I'm usually playing Minecraft. I try to help out around the forums, I'd say my posts are HQ, I try to keep trolling at a minimum. I don't post much because I am usually lurking. ?
I joined HackForums mainly because of the name, it sounded like something I would like and I was completely right.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

dotjuke - *July 14, 2013, 9:17 pm*
Elaborate on your skillset:
-Ewhore/Ratting
I joined HF, because the motivation in me wanted to learn how to gain profit and hack I gained lots of money over the year by ewhoring. I am willing to help and give advices to others if needed. I am active in ewhoring, if I do not gain money, I usually stay on my computer for days if needed badly, if anyone needs help PM your skype, I am glad to help. Ratting to me is not hacking, but the art of spreading victims amuses me. Social engineering is involved in all this, depending on the situation.

-Gaming
I am on Ps3 most of the time, I do not know if this is a skill, I stream on twitch with my friend, and edit gameplay videos.
Gaming is a thing I love to do all the time.

-Web development
I am capable of making basic html websites, HTML and CSS. Currently I am studying C++ and Java in ID tech camp.
Tell us why you would be a valuable asset:
I think I would be a valuable asset because I will simply not give up on learning, I shall strive though the events that are happening in society today. I am a easy guy to talk to and I believe in making a difference in this group.

Elaborate on your achievements and future goals:
My future goals in real life is to succeed throughout high school (16 years old) and have a deep impact in society. Throughout life I have been suspected of glaucoma, etc. Currently my goals are to strive through life and create a meaning for other individuals. I want to go to a great university or college majoring in Information/ Comp sci to help me succeed for who I am today. I was thinking of making a company for Antivirus, but that is just a dream....
Tell us about yourself:
My name is Kenneth, 16 years old from California. I am a calm person to talk too. Hf for me is a place where I can relax and learn the things I want too, putting aside reality. Every time I go on HF it enlightens me to meet other members, where we can share ideas we enjoy.

SIM-1206811 - *July 14, 2013, 10:18 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:
Coding
I have some knowledge in programming languages such as Visual Basics. I learned this language around 3-4 months ago
using some great tutorials and ebooks i found here at HF and other forums, and i have been using it casually since then, to make
new projects and experiment with it. I have released some of my work here at the NET section of HF such as the Periodic Table
of Elements which recieved great response from other members.
I have also looked a bit more into C++ but as of now it seems kind of advanced to me, but however i have tried it out and
have done some simple projects within it to learn the basics. But i know in order to be a succesful coder, knowing a C language
such as C++ or C# is almost necessary and i will do my best to get more experienced withing this field

Web Constructions
Over the course of several years i have been able to gain a great amount of knowledge in the field of Web Construction.
I have made many websites using different platforms, but mostly doing this casually just to try new things and get experienced.
I have good amount of knowledge and experience in Web Constructions involving WordPress, HTML, PHP and Drupal.
I am currently working on learning HTML5 for web construction, but as of now its currently in progress.
I also have good knowledge when it comes to hosting a website, and matters regarding webhosts and such.

Graphics
I have been a active Photoshop user since i first learned it around 3 years ago and i have been using it a lot in combination with Web Construction
in order to make the graphics, themes and templates for my sites. I have also been using it for other GFX related tasks such as Signatures, Avatars
Thread Designs, Logos etc.
I am also familiar with softwares such as InDesign, for making logos, and Dreamweaver, for website graphics. But i would say that im more
experienced in Photoshop than the other two.
Below are some examples of signatures i have made as requests from other members: (some from other forums)

Spoiler (Click to View)

Marketing & Monetizing
Marketing & Monetizing is probably one of my main skillsets. I know of many methods when it comes down to Marketing,
specially Social Media marketing such as FB, Twitter, YT and Website Traffic.
My Website Traffic Shop is probably one of the best available around at HF, since the method i use to obtain this website
traffic is completely unique and a private developed method which i have been using for my services for over 1 year.
But its shop is currently closed because im doing some maintenance.
Personally i have tested many traffics services both within the forum and outside but i yet havent been able to find
1 person using the same method as mine or something similar. Worthy to say that this method does not even involve
any blackhat activites.
Im also pretty experienced in the Social Medias field, i know of many methods and ways to get for example FB Likes, Twitter
Followers, YT Views etc.. some ways are known and some less known..
I have a great deal of knowledge when it comes to monetizing, for example monetizing website traffic or youtube videos.
Using different services such as Adsense and Mylikes i have been able to help out many members set up their website,
get steady traffic, and monetize their content.
I have a bit of experience in the PPD/CPA field aswell but not that much, im currently working on new niches and such and
see how they work out but as of now im not that much experienced in this field.
I have worked with networks such as FileIce, AWM and AdNooka.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:
I believe i can be a valuable asset to this group by sharing my methods and ideas, and helping out other members with their needs if it involves my fields of experience. Im also very interested in learning new ways and methods
from more experienced users such as learning how to use programming languages more efficiently and professionally.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
My biggest achievement right now got to be my Traffic Shop and the unique method i have developed for this service.
And my main goal is currently to be able to learn the C++ Language in a professional manner. I plan on coding my traffic
method into an exclusive software for sale, that webmasters can buy in order to provide unlimited traffic for their site on their own. This will require a lot of work and i will also need a lot of help from experienced coders in order
to be able to fulfill my goal. But once its done i believe it will be a revolutionary tool available to webmasters.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:
Well im a 19 year old guy from Norway and i have been around the computer scene since i was 8. I have gained most of
my knowledge in the different fields by myself and at times if i were having trouble regarding something or needed some
professional help, i have requested it on HF, this community has been really helpful and constructive. I have been a membe

of HF for around 1.5 years and i can say that these 1.5 years have been the most efficient time when it comes to me gaining
experience and knowledge within the computer field.
Other than that i can say that im a pretty relaxed guy and easy to talk to and approach, and i would love to meet some more
enthusiast within the Legion group.

Thank you for taking the time to read my application and thanks for your consideration

Wukong - *July 14, 2013, 10:48 pm*

Elaborate on your skillset:

Social Engineering-
I'm extremely experienced in this topic, I'm great at manipulating and talking to people to my advantage. I've made $250 roughly from just E-whoring by itself. I've also made $1.5k roughly on various different methods of SE'ing. This is one of many ways I make my money online.

Gaming-
I'm very competitive when it comes to gaming, I play PC and console both. I have a few YouTube channels that involves gaming, they both have around 500 legit subscribers each. On console I mainly play CoD/Halo. On PC I play Counterstrike, League of Legends, and Runescape. I've always been a gamer at the heart. ?

Cracking-
I'm mediocre when it comes to cracking, but I know more then the average person. The only reason why I crack accounts is for the practice and/or to help somebody here on HackForums. See, I give out free accounts to whomever requests it. Such as Netflix, Spotify, Hulu, and/or VPN's.

Graphics-
I'm far from the best on this topic, but I enjoy doing it. That being said, I've done a few banners/logos/thread designs for a few of my friends. I'm mostly into typography. I'm up to learn more about it.

Marketing-
I'm very good with marketing. I've ran a few successful shops here, such as a premium shop and a booter. I love money. I always have, and always will. I love the responsibility of having a successful shop. I'm a great salesman, I can even convince you in buying something you already own.?

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:

I am not the best at what I do nor am I the wealthiest. However, I'm extremely dedicated. I strive for excellence and wont expect anything less. I'm a hard worker and up to learn many different things people have to offer. I'm real generous and giving. I give everybody with the up-most respect until they take advantage of it.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
One of my greatest accomplishments is creating my booter and being able to keep it running for some time. Another big accomplishment is whenever I broke my first $1k from online marketing. I have many future goals, in real life and online.
Some of my online goals are as such:Learn how to properly use RAT's and mastering on how they work.
Learn more about html and java coding.
Learn how to sucessfully CPA/PPD.
Learn more Monetizing techniques.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:
I'm currently 15. I live in the United States. My name is Gabriel, better known as Gabe. I have a twin sister. It's not what you're thinking, we're nothing alike. She's 5'2 while I'm 6'3, it's hilarious looking at peoples reactions when we tell people. ? I'm just the average high school kid that loves making money and learning different skills. I would like to either be a chef as my profession, or something that has to do with computer engineering. I spend most of my free time here on HackForums, learning and money making.

Lastly, I realize my application might not be the longest nor the flashiest, but everything on my application is true. I hope you take my application into consideration. Thank you for your time. ?

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Mafiusa - *July 14, 2013, 10:53 pm*
Elaborate on your skillset:
Well, I have been RATing for quite some time. My total botnet size is roughly 300 people. Not much but I am proud.
Currently I am learning how to market on forums. I make a very good income in real life.
Also my friend, the D0Xist is helping me with doxing.
Tell us why you would be a valuable asset:
I have a LOT of money. So I am willing to help out when needed. Also I can help students when needed about ratting.
Elaborate on your achievements and future goals:
Join Legion.
Start a booter.
Sell dedis on HF
Become Ub3r
Become successful and well known on HF.
Be an active member on the Legion sub forum
[font=Trebu
chet MS]Tell us about yourself:[/font]
Well, I am 15 years old. I am currently a sophmore in High School. I have been hacking since 2011. But I only really got into it last month.
The reason I wanted to become a hacker is because when I was 9, my youtube channel was

hacked.
I was heartbroken. I mean I put so much effort into my channel. So I made it my goal to get the asshole back. I did. It took about 2 years but I got him hard in the ass. I doxed him and swatted him. Got his youtube hacked also. So now I am continuing to learn.

Fredo Santana - *July 14, 2013, 10:54 pm*
Just to let you guys know using the spacer or anything other fancy stuff will not improve your chances if Anonymous see's you have good intention and want to learn or be a Teacher he will most definitely give you an opportunity thought you guys should know.

Unacknowledged - *July 15, 2013, 12:55 am*
I sent Anonymous a PM earlier, are you still accepting students? I read your post on how you invited the current students and I made an application for the Legion Student program so I am only curious.

If someone has any questions regarding legion, hmu :)

Acroz - *July 15, 2013, 4:12 am*

Elaborate on your skillset: I am very experienced in Network Security including:
- All Routing and Switching
- Full Web Vulnerabilities
- How to secure and maintain a wireless network in a hostile environment.

I also have experience in Coding including:
- Python (70% learned)
- All MS/DOS (100% Learned)
- HTTP (100% Learned)
- C Languages (45% learned)

Lastly, I have a array of miscellaneous skills including:
- Blackhat (Offsite stuff)
- Operating and creating custom OS

- Marketing
- Web Development
Tell us why you would be a valuable asset: I can help not only Legion, but the entire HF community in my skill and knowledge of Networking. I ave made tutorials on HF many times, some of them very HQ (imo), including full skype security, personal anonymity, and how to browse the web anonymously. I can teach anyone my skills and would love to learn more from the group. Knowledge is unlimited and i love to learn!

Elaborate on your achievements and future goals: Below will be many of my "Achievements" and future goals:

- Graduating Offensive Sec's Full Kali Program
- Learning how to stop NSA Tracking (one of the first HF guides)
- Learning and being motivated to keep learning.

Goals:
- Become Respected on HackForums
- Learn all coding languages
- Get a masters in Networking (Working on that :D)
Tell us about yourself:
I'm a 16 year old network engineer who has spent many of his last 2 years learning the ropes of networking, security, and in most recently, Offensive Security. I strive to be always at my very best and provide the best quality possible. I have had trouble over my HF account in the past few months, and worked night and day to get it back (i was hacked). Now i'm working to restore myself as a respected Network Expert and help HF and all of the community. Joining Legion would be a great move in my "career" as i could expand my knowledge and spread my own techniques.

Thank you for your time.

- Amanda.

The Don - *July 15, 2013, 10:58 am*

Elaborate on your skillset:
Well I am a partial PHP coder, C# Coder, C++ Coder. I am a modder as well, I mod all call of dutys, MW2, MW3, BO2, Bo1. I am highly knowledgeable about stressers, i own Phantom-Stresser. For all call of duty, I code mod menus etc.. (Need proof I will take pictures of my tools and send via PM) I re-created a parameter for Bit.Convertor. When i am hosting online in 1 Day of online i made around 263$, If i had a week 7x that. I have made many C# Tools, including BO1 Stat editing, MW3 Stat editing, MW2 All Client mod menus.May I also note, I am very good with IPB, and MyBB Forums.I

am good with Recreating CSS on a specific website as well Etc..I am highly good with 'Money', anything I do, I become successful, I never quit I continue until I finish the job.
Tell us why you would be a valuable asset:
I would be a great asset for 1. I could host modded lobbies for Legion members, and members of HF. 2.I can help any member of Legion that needs help with anything involving 'Stressers', 'Servers', Basically anything involving Stressers. I am Farley good with Managing money, and creating big opportunities, for further Achievements
Elaborate on your achievements and future goals:Let me name some achievements.
1.Created a Stresser, Successful with it.
2.Self Taught my Self, C#
3.Self Taught my self, C++
4.Self Taught very little of PHP (Mostly how to fix errors etc.)
5.Made over $1000 in 1 month.
6.Great with money, i manage my money very well, don't spend money unless its a necessity.
--
What I want to Accomplish?
1.Create a Farley Large DDoS Protection Service.
2.Create a Large DDoS Service(Educational Purposes Only)
3.Of course, Become part of Legion.?
4.Working on creating 'Money' Making methods.
5.Create the First Fully DDoS Protected Hosting Company.

Tell us about yourself:
I am 17, Modder, Coder, Server Stress Testing person.
I have a love for taking things to the next level, anything I do I will have success . I love learning new things. I enjoy teaching others. I do play various sports in real life. To me the most important thing is Success.

This is my Application!

(Jul 15, 2013 07:32 AM)?nonymous Wrote: *[CITE]* Everyone prior to my previous post didn't get invited.

Everyone who posted after that will be invited with the next wave in a day or two - let the first students settle.
Thank you a lot for this information! ?

Tiki - *July 15, 2013, 12:52 pm*

Elaborate on your skillset: I would say I have 2 defined skills. I am very good at E- Whoring. From E-Whoring I have picked up on social engineering and I feel I'm very good at it. I have picked up on social engineering tips and tricks to make myself better at what I do. So those are the main two skills that I pride myself on but what are my other skills that I have you may ask? Well, I have an interest and writing and grammar is very important to me. Another skill I have would be coding, nothing to advanced as I'm a beginner but I do know some Lua as well as HTML and a bit of javascript.

Tell us why you would be a valuable asset: I would be valuable towards the group because I would

like to apply as a student. As being around group members and being taught by Flaaffy I will learn valuable knowledge. Once I gain knowledge I am able to easily share my experiences and help others. I have demonstrated this with my E-Whoring skills, I have learnt and moved on to mentoring and sharing my skills. I have given away much free content away from E-Whoring as well as set up a small mentoring program which I helped many members with and if I learn from you guys I am planning to share what I have, and what I have learnt with others to get them started.

Elaborate on your achievements and future goals:Some of my achievements are
- I have donated $23USD to tornmage to buy himself ub3r
- I have mentored 12 people to help them E-Whore
- I created my own Youtube bot which could give likes/dislikes and subscribers
- I have given away many freebies which can bee seen here Spoiler (Click to View)

Here are some of my goals, I would like to upgrade 5+ members, create a useful product that I am successful in selling. I am also planning on learning marketing in terms of CPA/PPD. I would like to learn more about hacking such as web injections. I would like to learn how to brute-force accounts for different sites such as netflix. These are goals that can be achieved by having a good teacher willing to help me out as Flaaffy mentioned.

Tell us about yourself: I am a nice guy and easily approachable. I am good at being mature when needed as well as let loose when the time is right to joke around and have fun. I almost use the computer 24/7 so I am very easy to contact. I feel it's better to learn rather to take what is available. When I say this, when I ask to learn I do not expect to just be thrown some downloads and be told "Here, use this". I also am not a big fan of learning from tutorials, I like to have a teacher or mentor there who can not spoon feed me, but give me instant feedback and correct my mistakes and provide guidance as to where to start. In conclusion I hope I am accepted, thank you for your time and a special thanks to flaaffy for helping me out.

Nuk3 - *July 15, 2013, 4:47 pm*

Elaborate on your skillset: Basic VB.NET coding, Marketing and Monetizing, That is probably my best skill, Social Engineering, Gaming, And some very basic JS coding.

Tell us why you would be a valuable asset: I am an extremely fast learner. Due to the fact that I have a bit of previous knowledge in VB.NET I feel like it would be a little easier for me to get through lessons. I speak properly so it will be easy for me to communicate with members in Legion trying to

help me. Also, I understand this is a hacking group, But if anyone needs help with Internet Marketing, I would be more than happy to help them out.
Elaborate on your achievements and future goals: One of the best feelings of my life was getting my first lead in PPD, Then hitting $30 in one day and having a nice "Blow up". One of my goals that I feel would really be amazing for me to achieve if coding a fully working VB.NET program and to learn how to secure my network and how to breach into servers, As an experiment, I don't want to ruin others fun.
Tell us about yourself: I am fourteen years old, However I am much more mature than most people assume a fourteen year old would be. As I said before, I learn fast, And you wouldn't need to wait for me to catch up, I would learn along with everyone else quite swiftly.

PuzzuS - *July 15, 2013, 5:02 pm*
Elaborate on your skillset:
I know some languages:Pascal,java,objective C(basic/medium),HTML,C++,php(basic).
I'm not bad in: XSS , SQLi ,LFI,FPD,RFI,SSI,RCE (and other web vulns).
Tell us why you would be a valuable asset: Well , i can share my knowledge and if anyone need some help I can help him if I'm able. If i don't know something i can learn that fast.
Elaborate on your achievements and future goals: I'm in the Microsoft's HoF and Paypal paid me for some xss. I did not want to expose myself too much so I did not do extraordinary things. In the future i want be better in web hacking and make new experiences.
Tell us about yourself:
English isn't my main language so sometimes i make errors.
I had experiences with iOS exploitation (from FW 1.0.1 to FW 3.1.3) . I do not like to talk a lot so sometimes i will not speak so much but I will try to be an HQ member for the group.
If you want know something more , just let me know.

Corso - *July 15, 2013, 5:03 pm*
I am not sure if I am allowed to reapply, due to my acceptance in past as full member and then having to leave due to lack of time at said acceptance date. . . However I'd like to re-apply as a student. If I can get OK'd for this, then I will happily redo my application but for now I will post it in a spoiler (mybb coding messed up as old thread = closed, and don't want to waste time on it if I am not allowed to apply).

Spoiler (Click to View)
Elaborate on your skillset:
My skill set might not be as impressive or vast as many of yours (and others) however I've only been 'computing' for 3 years, working on my 4th year now. Within that time frame I've acquired moderate to thorough knowledge in the following fields;

General Computing
For a further break down (Click to Hide)
As my jobs and a few skills listed below state, I work on computers as a living I have to understand not only the HARDWARE aspect but the SOFTWARE as well. One day I'm replacing blown/expanded capacitors, the next I'm running a full Cyber Forensics report on a breach at a local company, yet the next day I am just removing some low-level malware. As I brought Remote Managed Services and Maintenance to my current company (and past ones), I've also almost always got something up and running or creating some scripts to update features, security features, etc. So I've got a large collection of items to deal with on a daily basis, so a good general knowledge really helps.
I.T. Compliance
For a further break down (Click to Hide)
From HIPPA to PCI DSS compliance codes, I've had to study them all and create tools to help me scan for and repair/automate the set up procedures for them. I've taken multiple tests in the field,

and currently support many companies in achieving and maintaining their compliance/code at this time.

Multiple Operating Systems

For a further break down (Click to Hide)

As my first PC I had ever got was a Vista SP2 machine, I've since grown very fond of Windows systems. From tweaking them, settings up or breaking down their security, automating just about anything/everything, and so much more. Sadly, I've not done much work on anything prior to XP which I had to learn due to so many customers, businesses, etc not switching to a newer OS (can't fully blame them either, after how Vista would have been to switch to).

However, due to the level of support (and the wide range of it) we have to offer our customers - I have a bit of experience in multiple versions of Linux and so forth. My Linux knowledge fails in comparison to my Windows knowledge, however I will be going after my Linux+ certification (CompTIA, so nothing serious but gives me a better foundation) soon. Hopefully, I can learn more from the group (if accepted) as well.

Firewalls, Networking, Security Systems - Both hardware and software

For a further break down (Click to Hide)

As I have to maintain compliance codes for many businesses, this means managing ALL of their security. From firewalls, wireless systems, workstation security and server security - I've worked with it all and many 'flavors'. Hardware firewalls to software firewalls, I've had to deal with them all.

Scripting languages and Automation languages (such as AutoHotKey)

For a further break down (Click to Hide)

As many of you likely know and do yourself, scripting a file to make repetitive items much simpler - Such as editing a registry key all the way to fully automating tasks for setting up or testing security items out... This was a trait I had to get used to doing on the fly.

Coding - Primarily in C# but starting to learn C++ at this time

For a further break down (Click to Hide)

Though I am still looking to learn C# more, as well as C++, I've got a LOT of WHH and Security based software made up currently in C#. I wont say I am amazing at it by any means, as I just really started a few months ago (in between working and studying, not much time spent actually in my code but oh well).

Business Management

For a further break down (Click to Hide)

As at each of my three IT companies I've worked for, I've gone from low level tech to top 5 tech's in the companies with a year. However, due to one thing or another - I left one and got fired from the other as the president didn't realize how young I was and said I was likely just a cocky punk. Never really spoke to me, other than shaking my hand once and reading my performance reviews of the company and proposals (all of which got accepted and put into practice). Other than that, my prior job before IT was business consulting and management, in which I helped many companies triple their profits within a years time - Some in a single quarter!

Other misc. skillsets

For a further break down (Click to Hide)

Video Editing - As I used to have a few mid sized (20K, 40K, and a community page of 80K sub pages) I had a fair share of time spent editing videos

Gaming - Paired with the above item, plus my competitive spirit, I went from competitive sniping type of competitions to competing on many competitive sites (won some decent money through it as well)

Aviation - As it's been a pretty big hobby for a while, I've done a lot of flight simulators (DCS A10C = current one I am focusing on)

Though I've tried to only post items that I believe directly are involved with Legion, I've also obviously left out a lot of items that wouldn't have anything to do with the group.

Tell us why you would be a valuable asset:
Honestly, this is a bit of a touchy subject. I believe many of the members will be much more of an asset than myself, however as I am heavily into sharing the knowledge I do know and helping others (if you were to review my posts, more often than not I am helping out in the White Hat based sections)... So I know if I were to join, I would aim to help as many members out as possible - As that's just my nature really. I've joined a few groups with high hopes in the past, however none seem to really post much valid knowledge and seem to be too Lounge orientated. I've heard from a few that Legion has some pretty advanced methods and tutorials in the Sub Forum - Which would be awesome to be apart of!

Now, as that doesn't really answer much other than I'd look to help others - Maybe this will be more sufficient. As I work on many different 'fields' of computing (hardware, general computing, malware removal, security, etc) I can offer help in multiple ways, versus just being of help when it's in my one specific field. Also, I don't really believe in holding back knowledge or information to those close (such as a group that openly shares knowledge between one another). Another strong belief of mine is that a team/group can accomplish truly extraordinary feats, so working alone is something I can do of course - However I do strongly believe in joint efforts or projects. Very few people I've met truly believe in openly sharing and working on projects, as they rather keep it all to themselves. . . Granted sometimes I can completely understand, other times though - I can't find the reasoning to it. Then the last bit of value I can bring to the group is the amount of time I spend on PC's, available to other members for help or so forth. Due to my work, I am at a computer almost all day and most of it I can automate and pull away from to help a member out or what not.

Appearance is important; link us to where you come off as a gentleman:
Here are some links to some posts I've recently had. Please note I have not gone through and found my most outstanding posts, as I believe it'd be more realistic to post links to how I represent myself on a daily basis vs only my 'high' points.

Below are two of my recent, more lengthy threads/posts - Neither of which are about repairing PC's like the above ones...
Blue Snowball Microphone Giveaway (Thread)
PersonalAssistant: Automates processes+fixes grammatical items w/SourceCode (Thread)
My Tool Kit (Reply)

Elaborate on your achievements and future goals:
Let's break this down into Current/Past and then Future Goals:

Current or Past Achievements:
My achievements on Hack Forums are slim, other than being accepted into a few groups (some I have left, due to one reason or another). I've also gotten a few PM's, from members I highly respect and are well known, praising me for my knowledge and support in the forums. Lastly, I've made it to MRT's Phase 2 and from what I've been able to grasp - I did quite well on the phase 2 test, however they are not officially announcing who's made it until the 1st of next month... So no real 'bragging' rights yet. Outside of Hack Forums I've achieved much more than I thought possible. I've worked for three companies since getting into the I.T. field, though short stays at each, I've raised up from intern or low level tech' to being the Systems Administrator or higher in each company. It's an honor for companies to see my hard work, determination and loyalty - Then decide to promote me. However, each job had some unforeseen issues (boss got cancer at job 1, job2 I was told I was too

young for and due to age was called a cocky punk kid, job 3 still currently working for as VP of Ops). I've also been able to meet and earn the respect of some very well versed engineers and even get calls asking for help from my original mentors on a regular basis... Which is a very surreal feeling - As I still look up to them as my mentors, always will.

Future goals or achievements I am striving for... This is a long list but here are some key points. Let's start with items on Hack Forums. As MRT Phase 2 tests are being reviewed and decisions for the final 4-5 to make the group officially are being determined currently - That's my first goal. After this, make it or not, I plan to release a very thorough (already in the makings and is multiple pages) White Hat Hacking guide. This guide will aim to get me a Sticky Man award or at least help some members out. I also aim to finish up my 'Complete Assistance' suite in C#, might throw in some C++ applications into it if I pick up on it in time - Though unsure if that will happen at this time. Other than those, I hope to continue to be active on Hack Forums in the WHH section and even more so with Groups and Sub Forums. I've got some big plans for it all, just don't have the 'stage' yet (so to speak). Off of Hack Forums, I want to automate more of the day in and day out processes to running computer shops, including re-vamping my Web Based Point of Sale system aimed for Computer Repair shops alone. I've not yet determined if I'll sell it, keep it internally or what yet - But time will tell on this.

Tell us about yourself:
Well, I've told a fair share about my job/careers of current to past above, so I will limit this to items unrelated. I have had a rough child hood, as many have, and had to live on the streets for most of my teenage years. During this time, I sure had a few life altering instances and confrontations which has since left me to be quite crude or up front - Which some can respect or like about me, others just call me rude or a jerk. I also have pretty much distanced myself from majority of emotions most of the time, as well as become quite ignorant of physical pain. These instances/confrontations have since rendered me blind and deaf on my left side, which has taken me a while to get fully accustomed to. One particular incident sentenced me to Military School (boarding and all) for my last year of Middle School and High School. . . However, I was expelled from the school (and others) for one reason or another and ended up being a High School dropout. So currently, I am 22 with no High School degree or plans of going back to school/college (though I've had a few thoughts about it).

I feel I've written more than enough, as if I was to write anymore I'd likely be ignored (which may already happen). I've also got to save something for my 'About Me' post in the sub forum (if I were to receive an invite, though unlikely).

Please let me know if you would like me to redo a fresh app and/or if I am DQ'd or not. Thanks !
PS: To all those hopeful students/members, I wish you the best - The group has a shit ton to offer, great guys too... So good luck and if you do make it, make sure you capitalize on it !
Also to go directly to my old application click HERE

lenaos - *July 15, 2013, 5:27 pm*

Elaborate on your skillset:
--Graphics
- Graphic designer for over 2 years
-Able to make nice and sleek looking designs
- Dedication and open to criticism
I absolutely love doing design and want to do it for the rest of my life. It is my passion and would never stop doing it.

-Web construction

-Most knowledge in HTML
-Basic knowledge in CSS
-Learning PHP
Web constrution is a big part of designing because if you want to become more successful you have to know how to code a design into a website.

Coding
-Basic knowledge in VB.net
-Slim knowledge in Python

Tell us why you would be a valuable asset:
I think I could be a valuable asset because I am applying for student I could also help other members out with some problems they might have. I am also very concentrated on learning as a student in the Legion program.
Elaborate on your achievements and future goals:
- To have a future graphics shop
-To become an ub3r membe
-Get a stable job for graphic designing
-Finish learning VB.net

Tell us about yourself:
I find myself to be a kind guy and easy to get along with. I am a 16 year old sophmore in highschool. I am also 5'10 and come from Canada, I also have a french background. I am easy to get along with everyone and never dislike others. I find that coding, designing and web construction ease my mindset and make my day better. Being apart of a group would be brilliant because I have the chance to pickup new skill sets and learn more about current ones.
Thanks for reading my application.

Z0mbie. - *July 15, 2013, 7:29 pm*
Liking some of these applications.
Hoping to see alot of you guys in the group.

Juks - *July 15, 2013, 7:40 pm*
Wait a minute, Anon everyone that posted before that last post you made on page 19 didn't get accepted, so i posted on page 21 does that mean im denied or are you still reviewing.

Sorry i'm just a bit confused.

Corso - *July 15, 2013, 8:16 pm*
As some of you may have seen my prior post
(found HERE), or my old application (found HERE)from a while back (old recruitment when I got accepted but had to leave due to lack of availability/time). . . I was asked to remake my post, so here goes nothing... Elaborate on your skillset:
My skillset would range from basic computing through a rather thorough computing level. I also have started to take up programming more seriously, beyond just an 'as needed' level, in a few languages. However to really break this down I'd like to go into each major category a bit...
Hardware: Beyond the basics of hardware, I've done everything from modify my LED's, case, et cetera through repairing SMD's, soldering with irons and air guns and more. I may not know what the latest and greatest items are before they come out, but my fundamental knowledge of hardware is solid. As I have implemented hardware repair guides and policies at multiple companies I've worked for, I've also got real life experience with hardware and repairing it.
Networking: This was originally what I got into Legion for, so I believe you know quite a bit about my networking abilities. To briefly sum it up; I manage large companies IT needs, especially the

networking. So I have experience with it, plus I have certifications within Networking field.
Security: This ties into what I stated in both of the above items... I am an IT professional. I have to not only secure a single users personal machine but whole businesses. Some of which have been hacked and I run clean-up and lock down, which the prior company couldn't do. So I've got hands on experience with security platforms and solutions. Not limited to but including compliances, such as PCI DSS Compliance and HIPPA.
Coding: I've taken up coding as of 2013 primarily, so I am a 'noob' at it but have made some fairly impressive items (IMHO). I've even made some for paid projects, which was interesting and a real experience (bitch of a customer who didn't know what they wanted, lol). Languages are kind of wide, from C# to PHP to Python. I also am very experienced (again IMHO) with scripting items and automation scripting.
Business: As some of you may know, I used to work as a business consultant (not IT related but business related). My job was to go into failing businesses or businesses that were just starting and help the owners turn things around / properly plan out items and structures. So I have a good deal of experience with business, though I personally do not own my own (not yet at least).
White Hat Hacking: Although this one is likely the most apparent, due to anyone seeing me in the WHH/Computing sections or from my currently displayed userbar - Haha. However it is certainly a skillset that the above items also describe. Though it deserves it's own recognition and to be elaborated on briefly. To be a good WHH you have to know BHH methods, then be able to find solutions to them. This is basically the same mindset a BHH has, however the reason they are finding solutions to BHH exploits and such is to then be prepared for any break-fixes applied. Though this may not directly apply to my application - I feel it was needed to be said.

We'll call this quits at that, you can always reference my old post for more details too.

Tell us why you would be a valuable asset:
Beyond my activity and skillset, there is not too much more I can offer. My available time, dedication, knowledge, assistance, ideas, et cetera. However I will state that to be an asset one must be of some value, in which a student may not be of great value... However if a student grows and matures well enough, they then grow into being a huge asset and a loyal one. So keep that in mind as well. I could really elaborate on this like I did in my last application but I don't feel like beating around the bush or ass kissing.

Elaborate on your achievements and future goals:
On HackForums:Making MRT group.
Making it into Legion.
Reaching 500 rep. (Soon, though not all that useful - Still a milestone on HF)
Helping out a lot of members in the Computing sections.
Making a lot of great contacts and being able to share information between us all.
Finally deciding to push forward with learning some more 'hard' coded languages.
Et cetera . . .

Off HackForums:For only getting my first ever PC in late 2009, I've come a long way.
Achieving my first job in IT and getting promoted all the way to shop manager within 6 months.
Working for large, nation wide chains with good titles.
More work related items, but don't want to go on and on about individual items.
First custom build with a custom water cooling system.
Acquiring and setting up my current computer setup.
Getting married.
Getting my pro boxing license. (old)
Receiving my license for concealed weapon(s).
Et cetera . . .

Future Goals - On and Off HackForums:Actually reach that 500 rep goal mark through hard work and legitimate posts.
Reach the 1,00 rep mark as well.
Earn more awards through hard work and dedication.
Be accepted into one (or more) of the three remaining groups I am not apart of but consider High Quality.
Be promoted further within a new job with a national franchise.
Finish training my new puppy and have an obedient, well behaved dog.
Release some of these guides I've been working on and putting off for 'the right time'.
Finish my DLA project fully and get my payday from sponsors/companies.
Et cetera . . .
Tell us about yourself:
Well, the prior application covers the majority of it but to quickly recap it once again. I am blind and deaf on one side (left), have nerve damage from a 'freak' accident, told I was autistic at a young age, I am a high school drop out, have a lot of OCD's about things, hate repeating things in any manner, hate being wrong or in the dark about things, constantly trying to help others even if it 'damns' myself, et cetera.

I really hate to describe myself but there are some key points that 'define' me a bit.

Up until the break this post has: 7,341 Characters
Previous post had: 10,284 Characters

Believe that I've typed enough and worked long enough for today. Enjoy your night/day everyone and thank you for considering me @ Legion members and Anonymous <3

[img]http://img843.imageshack.us/img843/6669/2t3m.png[/img]
Elaborate on your skillset:
My skillset isn't evident around the community of HF, and I wish to keep it that way. But for the sake of this recruitment and my desire to join & learn in Legion, I will state them.
Basic web construction knowledge (HTML, CSS, PHP).
Graphic Design capabilities.
Ability to learn quickly & accurately.
Exceptional grammar.
Artistically inclined (Music, graffiti, graphic design)
Teamwork

Tell us why you would be a valuable asset:

I can be a valuable asset for a few reasons, one being, I am able to provide fellow members/students with everything I know. Along with me learning in Legion as well as teaching, I am able to share this knowledge throughout the community. Also, I feel as if I am a respective person and I will represent Legion in a formal way.

Elaborate on your achievements and future goals:

My future goals are evident based on my skills. I wish to base my career with something graphic/art related. I love the fact that I have an imaginative mindset and I'm extremely creative; this benefits me throughout my life. With that said, my dream job would include being a freelance graphics

designer.

My achievements are not extreme, but I am proud of them; I will try to keep my biggest achievements computer related and based on my skills.Becoming fluent with HTML, CSS for web construction
Being paid for the first time for something graphic related
Getting straight A's all through middle school (Currently in 11th grade with positive grades).
Entering several gaming tournaments and winning.
Selling my first product on the internet
Successfully creating my first song

Tell us about yourself:

I am a 16 year old kid from Pennsylvania. I am extremely independent and I think knowledge is the greatest thing to receive. I am open to learn anything, and I love being taught new things. I am currently in high-school and I've maintained a good grade average. Next year I will become a senior, after being a senior, I wish to move out and focus on my dream of becoming a freelance graphic designer.

I am an atheist, religion hasn't always been my thing. I know alot about religion, not that it's relevant. I spend most of my time here in the SRPP section. I love to debate and again, learn new things.

My hobbies include playing xbox with friends, learning new languages (coding), graphic designing, making music and surfing HF!

I hope you consider me a reasonable applicant for Legion. I really see this as an opportunity to learn and share new things. Thank you!

No sir have you even read any applications?

Milf - *July 16, 2013, 4:18 am*

Elaborate on your skillset:
Xbox Gaming
- Xbox Gaming
- Modding
- Sniper battles
- Battlefield 3 Air-Support battles

- I find my self professional and neat within these categories, each objective is easy for me to proceed or accomplish (Win). I'm a highly experienced member within the Xbox area, I've been a COD player and I was ranked Legendary online, however I have quit COD due to the lack of good players, nowadays there are no good players to play with and I won't play it in the future or any futuristic games published by Activision or Infinityward.

- I'm experienced with the category modding, I've modded several games with ISO modded discs. I'm not a owner of a JTAG console, but I'm planning to buy it in the future. I'm also experienced with iOS and Android modding.

- Sniper battles are easy to win, there are numerous of times I do 1v1 with my IRL friends and gain the victory. Sniper battles have been a easy accomplishment, but these battles are done with older games such as: Mw2 and Black Ops.

- Battlefield is one of my favorite games, I've been playing Battlefield 3 since the release date. I love Battlefield 3 and all it has to offer, I'm experienced with all the maps and areas there are to explore at BF3. I'm good at tank superiority and air support. Within the 'Tank Superiority' subject I find myself good and experienced, but within Air Support there is no mercy. I've got special tricks and tips on how to get down enemy choppers or jets, this will also include ground vehicles. I will share these tricks with fellow Legion Members if they ask for it.

Tell us why you would be a valuable asset:
- I've got alot to offer and gain for my futuristic experience with HF. I think I will contribute with quality content. I'm highly experience within the Xbox 360 area, I think student's could learn from me and share my knowledge afterwards. I believe I can do this for the members of the Legion, teaching is not a option, it's a must. I will teach until another member will take over.

Elaborate on your achievements and future goals:
- I've achieved alot in the past few weeks, I've gotten to be a HF Writ3r and a Official Member of the Brotherhood, I've never thought that I would be a part of a official HF group but I did and I accomplished with actions and words, these accomplishments are hard to gain and I accomplished it. My futuristic goals are to be a member of several other groups and share knowledge as well as acknowledge new experience's and memories.

Tell us about yourself:
- I'm a calm guy, there is no question about that. If a problem occurs I often attend to repair or find a solution. I'm 16 years old and I live in Norway. I'm a Xbox Gamer. There are numerous of things to know about me, but the most important is that I'm Loyal and Honest.

An Application By Syphox

Elaborate on your skillset:
To get straight to the point, I am a skilled .net-Coder.
I am coding various programs in Visual Basic.
Not only malware, but also very useful programs, as
mentioned in my future goals.

Also, I am very experienced in helping people with
general problems of their computers, if someone's
having any issues, I'm always there to help!

Tell us why you would be a valuable asset:
I would contribute much of my coding-experience and teach others, help them with problems and assist them with their projects. I would also assist with literally everything, if somebody needs help with anything and I am able to help him, I will do it!

Elaborate on your achievements and future goals:
As already mentioned I am going to release many programs on the Premium-Marketplace very soon, such as:

GhostCrypter (USG, Ring3-Rootkit, Botkiller, ...)
GhostLogger (Hidden Startup, 30+ Stealers, UD, ...)
GhostSkype (SkypeBot with automatic replies, scanning for keywords that the owner pre-defined before and replies with the pre-set replies made by the owner if a specific keyword is found in the received message. (Free))
GhostResolver (Lightweight Skype-Resolver (Free))

Tell us about yourself:
I am 16 years old and I'm from Germany.
I am interested in hacking & coding since I was 12 years old.
As almost everyone, I started with ratting people, but very soon this was getting very boring, so I started to learn coding, this was when I was 13 years old.
I am very active on HF and online for several (6+) hours every day. I'm very dedicated and friendly. I never scammed someone and I never will. I am trying to help the community everywhere I can, doesn't matter in which section!

Apostle - *July 16, 2013, 8:22 am*

Elaborate on your skillset: Cracking - For the most period on HF I have been cracking all sorts of accounts and making different combo/wordlists in my experience. I have cracked several steam accounts and various other types of accounts, overall I'd have to say that I love it. It was the only thing I use to do, trying to enhance my skills in this area and learning all types of things.

Remote Administrating Tools - Ever since I joined hackforums I wanted to learn how to RAT and learn the basics of Ratting and how to do it, I basically just taught myself on how to set up remote administration tools and didn't really read tutorials. I liked to explore what you could do and target accounts I wanted for benefit.

Graphics - I am not that knowledgeable but not the worst in Graphics. I am currently in Complexity in the Graphics team and loving it so far, Graphics makes me relax myself and I love to learn new things in this area, before I joined hackforums I was one of those CoD players who did graphics for channels etc, I'll provide some of my artwork below;

Spoiler (Click to View)[img]http://imageshack.us/scaled/large/51/83809117.png[/img]
Spoiler (Click to View) <- not yet finished
Social Engineering - This has been one of my many targets achieve, and I am slowly accomplishing that. I am skilled in ewhore social engineering as I can lour pedophiles into my traps and make them pay more money everytime social engineering them to give me more money.
I love to see what I can do and if I can outsmart them (Not all of them are dumb, there are smart ones)
Website Construction - I have made many websites over the past years and have moderated a-lot of websites aswell. I know how to manage them, seo, webhosts, and all the general knowledge there is too it. I have designed websites with my brother with wordpress / mybb and some have come out successful, but others failing. Here is the most recent website: www.lonerwolf.com
I am not a writer I just designed some of it.

Tell us why you would be a valuable asset:
If I get in the Student program, I would work my butt off to try and learn all sorts of things that they teach us. I want to learn all sorts of hacking and basically anything. I will be very committed to the program and will not slack/ complete all tasks if we have any by the time the deadline is over. I really want to get into this course to expend my knowledge of hacking.

Elaborate on your achievements and future goals:
My future goals will be to get into the student program and learn as much as I can, being very committed. I want finish the program knowing more about hacking and this will be an opportunity for me to expand my knowledge in it. I would be very grateful if you accept me.

Tell us about yourself:
I'm your average 17 year old teenager, I like to game a bit here and there, and have motivation to do things. I currently live in Australia after being born in Spain and living there for 2 years in the country, it was very beautiful I have to say.

My mum turned into a druggy and is an alcoholic so my grandparents took me in and I have been living with them since I was 2 years old. My mother doesn't even care about me and is always off with her friends drinking and doing what-not, no one can really help that.

I hope you've liked my application, I told you a bit about myself and all.

Thank you for reading! ~:)

Charismatic - *July 16, 2013, 8:50 am*
Elaborate on your skillset:
Social Engineering
This is by far the one thing that will set me aside from most others, I am an ex con artist, quitting at the age of 18 seems a bit early but I had been doing it from around the age of 11. Now you are probably thinking... oh great some kid who thinks he can SE because he can get a girls password on facebook. Well i can do this however I can also walk into a store and leave 30 mins later with a $1500 suit and a date with a boy and girl. :)
Web Development and Design
I have a degree in web development, HTML, CSS, JS and php of course knowledge I am a much better developer then I am a designer. I of course with this know web security, from the attacker and defender ends.
Networking
Currently doing a networking degree my knowledge is very basic so not much to talk about here I

can do troubleshooting however I am hardly advanced in it in any sense of the word.
Security
I work as a security consultant from networks>web sites>physical security. I can help with most I know my stuff rather well
Gamming:
I play games haha, League of Legends, WOW etc.. Not really a skill but every IT has to play computer games let's be honest.
Tell us why you would be a valuable asset:
Bitch please I am fabulous... But seriously I am sure that I would be one of the top SE on the site, SE section being my old main hang out until the kids ruined it. I am skilled across the board in most aspects of computing. I am your typical nerd who loves to mash on the keyboard and feed his God complex. It's true I am rather egotistic but this just means I like to feed my ego by helping people who need it.
Elaborate on your achievements and future goals:
I have a rather large and naive goal, Like any youth I feel it's my job to save the world. And of course I have set in motion a plan to do this. I know it's probably a waste of time but like they say aim for the stars... I say fuck that I will aim for the gods. My other goals are built around my main plan and although i know the chances of my main plan succeeding are low. The milestone goals i have set in place are not. My goals are to help people make the world better it's really as simple as that.
Tell us about yourself:
Well I am 19 years of age and I am kind of a hermit now days, I of course go out with friends however I don't like to due to my addiction to manipulating people. I often find myself in trouble and have been beaten to an edge of my life more than once. My Friends call me Charismatic high school nick name that just stuck being the fat whiteish, pimply asian but being able to manipulate people into doing what I want got me my nickname from my friends.
I have a rather high IQ without sounding like a Twat I will mention that is exceeds the 150 mark, I am rather egotistic but i guess that comes with my god complex and my love of manipulation.
I live in Australia for study however my home is Japan and always will be. I live in Australia with my brother and his GF and the rest of my family lives in Japan. To sum it up I am Charismatic

Rebus - *July 16, 2013, 10:12 am*

Elaborate on your skillset:

Gaming
Not sure if it counts as a 'skill' but I have been gaming a lot of my life. It is always something I have enjoyed, and been good at. I like to play games competitively. I play XBOX, I just moved over from PS3. It is a lot better in my opinion.

Social Engineering
I am not the best at this, but I can do a little. I fail with bigger items. I am not sure if this will count as a skill.

Tell us why you would be a valuable asset:

Well, I think I would be a valuable asset as I strive to learn and I am very active. I would like to join this group as a STUDENT and one day, master a skillset and teach. I would like to show the people of hack forums how good this group really is.

Elaborate on your achievements and future goals

Well, currently no achievements. But I do have goals, to one day have a skillset fully mastered, and

be able to teach, like what is happening now(if I get accepted). Also, to run a successful site helping people, with that certain skill.

Tell us about yourself:

Well, I am just a normal 15 year old teenager. I have a lot of time on my hands, and I am always willing to learn. I live in the UK. I was a student in Innovation. I love to help people in anyway shape or form.

Thanks for reading.

R?ziel - *July 16, 2013, 10:56 am*

Elaborate on your skillset:
Coder: Im into coding for half of my life. It is my passion and every day i write some lines of code, no matter if im busy or dont have anything to do the whole day, some test programs or optimizations for my existing code are a must. I focused myself on android development though i have experience in the following languages:
-Java (android)
-C# and Delphi (windows)
-PIC Basic (PIC microcontrollers, hardware)

And i should mention i have 1+ year experience with the game engine Unity3D, in which i scripted in both JS and C# (tho with time i switched and now I prefer C#)
PC Engineer: Im still a student, but im with PC's and hardware since i was 8. I have a lot of experience with both hardware and software and even earn half of a standard living in my country as a PC repairer via newspaper ads.

Cute: JUST LOOK AT MEH. nuff said.

Tell us why you would be a valuable asset:
If anyone needs anything about coding that i can provide, i will do it, no matter how hard it can be sometimes to get someone to understand something (no matter simple or not), i will provide as much help as i can provide from my knowledge. I provide all my services usually for free, but gladly accept donations.
Elaborate on your achievements and future goals:
-To polish my coding skills till the end. I know no one can now everything, but thats not a reason to stop broadening your skills.
-To make something "big". Can be some badass app which thousands of people one day will use, or it can be a new kind of spaghetti sauce which makes people fart rainbows. Both suits me.

Tell us about yourself:
18 year old coder from Bosnia and Herzegovina. Was at many competitions in coding or innovations, and got good results. I dont like to talk via skype or anything like that. Sometimes I dislike opening my mouth at all, thats why i love chatting and forums. Im a casual gamer as well, playing League of Legends with my friends to till deep into the night sometimes. Thats all you guys need to know i guess..

Alien - *July 16, 2013, 1:08 pm*

Elaborate on your skillset:

I have been coding for the past 4-5 years. I am highly proficient with the following languages: C#, VB.NET, and HTML.
I am fascinated and have spent a large amount of time studying "reverse engineering", "Packet Manipulation", "Malware removal/examination" and other exploitations. I plan on continually gaining more and more knowledge as I progress in life.

Tell us why you would be a valuable asset:

I never back down from a challenge; I AM a warrior at heart. Persistence is key to my philosophy.

Elaborate on your achievements and future goals:

One of my top priorities/goals in life is to complete college, and become a "Malware removal expert". Although I have successfully removed malware from countless infected computers; I still would like to gain more knowledge in this subject.
My greatest achievement would be: I have taught myself to play classical guitar; I have been playing for 4-5 years now. Music is my way of life. <3

Tell us about yourself:

My name is Cory; I am 15 years old.
I was born and raised in Alabama, United States.
I am a very kind-hearted person; very compassionate towards others. I enjoy learning and giving knowledge back to the community. I have always been been looked up to by others; I tend to be a role model for those around me.

Thank you, for taking the time to review my application.

CitrUs - *July 16, 2013, 3:13 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Graphics This was a main reason why I joined Hackforums, to advertise my graphics, get more sales and increase my skills in the art of
graphics. I have owned one graphics shop and I just started my second one. I have made a decent ammount of money off of it so fa
and I plan to do more graphics for the Hackforums community.

Gaming I am not sure if this counts as a "skill" but I have a passion for gaming. I love mmorpg's such as Runescape specifically. I also really
love playing First Person Shooters on Xbox 360 such as Call of Duty and some puzzle games like Portal!

Web Development I recently got into this, soon I will start up my website where I will upload all my graphics, sort of like my portfolio you could say.
Also I'm setting up my graphics forum called "Gfx Society" with a mate from HF. I hope to increase

my knowledge in web
development and teach others.

Social Engineering I have a decent amount of skill in this area. I have social engineered 4 or 5 gaming YouTube channels and I usually social engineer my
way out of getting in trouble at school. Social engineering is an amazing way to get things out of people and I hope I gain more skill in
this area.

Hacking I have a decent amount of knowledge in this area also. I know how to do SQLi through backtrack, a bit of manual, or Havij, eithe
way works. Also I guess you could say RAT's fall into this area. I know how to RAT, I have my stub set up. I just haven't had time to
spread it.

Marketing I started doing PTC but you need to have lots of referrals to make decent cash so I am working on that right now, also I got accepted
to a very nice PPD network (not allowed to mention name) recently so I will invest into PPD and hopefully make some profit. I will start eWhoring soon and I will try any other nice methods I run into.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I will be an active member and always try to be beneficial to Legion. Also I have a large skill set which I think that would benefit the
Legion community, make the group have more variety and give the Legion the most reputation on Hackforums.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
When I grow up I would like to go to college and study graphic design, I want to learn graphics to the best to my ability, I would like to work as a freelance designer and work from home. I believe I will have a good future in design since I am starting so young.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
Well, I am a person who is very fascinated by how computers work, I love learning new things everyday! Even if they aren't related to computers. There is so much knowledge in the world and it is impossible to comprehend it all but I would like to learn as much as we can contain. I am turning 14 in 4 days and I want to thank you for reading through my application. Best of luck to everyone who applied. Thank you! ?
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

AuraProducts - *July 16, 2013, 4:53 pm*
Legion Recruitment
Elaborate on your skillset: I have a keen skillset in Marketing, Graphics, and now I plan on learning the niche of Hacking.
Tell us why you would be a valuable asset: I am a hard-worker, online at least 8+ hours a day and will do any projects, giveaways, and anything I am told. I am diligent and not immature or cocky and will do what you say.
Elaborate on your achievements and future goals: Football Captain, Marketing Expert, SEO Marketer, and now I would love to be a part of Legion and become good at certain skills that Legion consists and is in need of such as hacking, etc.
Tell us about yourself: I am 20, I am not a teen or some immature kid, I am a badass and love to

make money. I am a Money-whor yet not greedy and foolish with my money. I make on average about $4,000-6,000 a month from home and yet I still work on my families rich dairy every morning here and there and know how much the value of money is.

Thanks for reading this short and sweet summarized recruitment post:).

#Reliant - *July 16, 2013, 7:47 pm*

Elaborate on your skillset:

Graphics:
I am a beginner graphic designer, And I am not the best, But I am learning along the way, I plan to advance my skills in 3D designing and C4D modeling.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Social Engineering:
I am very skilled in the SE area, I have social engineered things such as money,headsets, pretty much everything you can SE.I plan on getting better at my communication skills though.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Marketing:
I am a pretty decent marketer, I am decent with CPA/PPD, I am also an "expert" E-Whore(er) making around $5000 before PayPal blocked me for suspicious activities(E-Whoring)
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Hacking:
I am not a great hacker, And I am not scared to admit that, But I have attempted to learn the art of hacking such as SQLi,Coding.I do consider social engineering to an extent a part of hacking though.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:Well, I for one can bring the art of E-Whoring to the group and spread my knowledge with all of HF, I can also spread my knowledge of social engineering with the members of HF, I also on occasion do giveaways although that doesn't apply to hacking.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:Well, I have basically mastered E-Whoring and Social Engineering so I consider those achievements, For my future goals I wish to master web development and website hacking
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:I am a 14 year old male from the United States, I have always been fascinated by computer science, And technology in general, I also enjoy education, I love science and math, I plan on going to college at Ohio University for Computer Science.

Good luck to all people applying, And thanks for looking at my application.

~Tom~ - *July 16, 2013, 7:48 pm*
If you want to get in put some real effort into your application, show some innovation.

RussaX37 - *July 16, 2013, 8:38 pm*

Elaborate on your skillset:

expirience in php, css/html. very well with web design, graphics design, skills in programming languages like vb, perl. Also expirienced from using pc for a long time and doing business.

Tell us why you would be a valuable asset:

anytime for help, to learn you something, to show you some tutorials and also to make good business deals.
Elaborate on your achievements and future goals:

Hosting service - dragon-host available to host any sort of hacktivity. I became more active in the last time here on hf so hope for more ebooks, free tutorials, giveaways etc.
Tell us about yourself:

For sure my life is interesting story. As a former motorcycle rider when stop with my career I was starting with something different, computers. I was always been interested for computers but from 8 years until now I learned a lot and checked every hole. The story is that I'm going for informatics college and spending a lot of time for electronics and computers. My plan is to make some improve for online society. As my moto said: "Anything is possible!"
Thanks for reading my request, hope for nice future!

Tommy? - *July 17, 2013, 2:19 am*

Elaborate on your skillset: I do not have a very big one, I know some Java and I know a lot on HTML.
Tell us why you would be a valuable asset: I don't think I would have a very big use to you as of now, but if someone were to teach me, I am eager to learn. And would devote a lot of time into this.
Elaborate on your achievements and future goals:My achievements and future goals are to become a successful coder, and to achieve a high knowledge in the overall field of ethical hacking.[color=#696969][b]
[color=#696969][b][font=Trebuchet MS][size=medium]Tell us about yourself: My name is Thomas, I am from Florida U.S.A. I love technology, and I am pretty chilled out most of the time. During summers I do nothing but sit on my computer and read things about space, which is one of my favorite topics besides computers of coarse. I also like making new friends especially if we have certain things in common.

Corso - *July 17, 2013, 4:48 am*

~Tom~ Wrote:If you want to get in put some real effort into your application, show some innovation.
I'll admit mine was not the most innovative, however in total I came to almost 20K characters if you include my original post/application - Which I was accepted upon. Just sadly that point in my life was too busy, so I left before disappointing the group.

Anyway congrats on being a teacher, hopefully I can see a lot coming from all the students and such soon! Even better, hopefully I become one - Haha. (Fingers crossed, though it's unlikely).

.?cb. - *July 17, 2013, 10:43 am*

Elaborate on your skillset:

Coding Skills:
Visual Basic 6, AutoIt, Python/C++(Low level)

Hacking Skills:
I'm not very good with it, but I know about XSS, SQLi and learning basics of Pentest.

Reversing Skills:
I was learning about it few months ago, I can resolve easy/medium CrackMe's & KeyGen's. (Native Lenguages)

Easy cracking .NET App's

Malware Skills:
I know almost everything about malware ..

Tell us why you would be a valuable asset:

I can help other members with anything of my skills, also start new projects with the group.

Elaborate on your achievements and future goals:

Start in the university as software engeenering and develop serious projects.

Tell us about yourself:

When I have free time I like read ebooks, test malwares and learn new things, also I like help people with malware related.

Im gone brah - *July 17, 2013, 10:53 am*
Good luck all participants members!

Have any questions, hmu!

Rico Verhoeven - *July 17, 2013, 2:15 pm*

Elaborate on your skillset:

Coding:
~ PHP
~ HTML
~ SQL
~ C# (Still need to learn alot.)

Monetizing:
I'm currently busy alot with monetizing, got a few websites set up for PPD.
I've been putting alot time in PPD and i'm pretty happy about
what I earned so far, I hope to reach my goal of 500$ a month some time. Screenshot of what I earned so far:
[IMG]http://img834.imageshack.us/img834/984/w5vu.png[/IMG]

E-Whoring:
Lately i've been E-Whoring a lot, got a decent ammount of methods i'm currently using.
Earned around 100$ so far E-Whoring.
I'm still trying to improve the earnings of E-Whoring.

Graphics:
Graphics isn't my strongest skill, well i'm decent at it but it can be alot better.
I'm planning on spending some time in this and hopefully get better.

Gaming:
I don't really consider gaming a skill but I own a XBOX360.

Playing games like Call Of Duty, Battlefield and Medal Of Honor.

Tell us why you would be a valuable asset:

I'm friendly, helpful and love to share my knowledge with the community.
Also i'm not that kind of person that's making LQ posts.

Elaborate on your achievements and future goals:

I'm currently a student in my last year of high school, after high school i'm going to study web-development.
Later I hope to get a nice job, like helping developing a Content Management System for a company.

Tell us about yourself:

I'm a 16 year old boy, currently doing my last year of high school.
I'm spending alot of time monetizing, also I love to hang out with friends & play XBOX360.
I got 1 dog and 2 cats. Hopefully I get accepted in this groups so I can learn & share my knowledge.

Dyme???????????? - *July 17, 2013, 5:52 pm*

You might want to update your "important notes"

Quote:Do NOT apply if you aren't highly experienced in an area within hacking - we do not accept students or kids with RATs.

I've seen a lot of members with Legion | Student in their userbar.
Also that he only has 200 posts and isn't upgraded.
Maybe that's a record, Dunno any other normal members who have been in groups.

ButtholeSurfer - *July 17, 2013, 6:38 pm*

Elaborate on your skillset:
I am very skilled in the realm of graphics, I make most of my income from doing so. I also have a talent in monetizing online. I have and still am in the proccess of making moneyz on the internets not going to say amounts but quite a few. I am pretty friendly I like to get to know people so I can get to know the whole team and get along with the members :)

Tell us why you would be a valuable asset:
I could contribute to the team, giving graphics, helping members out, and completing the required projects. I could be a big help to this group in many aspects. I want to join the group as a student and be taught in the ways of hacking, I really am interested in this subject and want to expound my knowledge. I learn much better being taught from someone which is why I really want to be a student in the elite group. I hope to learn if I am chosen as a student and greatly expand my knowledge of hacking.

Elaborate on your achievements and future goals:
I have achieved many of my goals lately. A few of my goals when I first started coming online were to make a good amount of money online which I quite easily met. I then continued those skills to earn more. Another goal I had was to become a experienced graphic artist and be able to market my skills for money which I have done a good job at completing. My current goals are to become experienced in the line of coding, web design, and penetration. Its kinda been a long time goal but I have focused on making money more then anything and I would like to start something else.

Tell us about yourself:
I am a senior in highschool and will be attending running start next year (pretty excited) and I have maintained good grades throughout my high school career. I have always been very interested in technology and how it works. I joined HF 2 years ago when I got my first computer I was a complete noob then, but since then have done a good job of getting myself known around the forums. I joined HF to learn how to hack, but I was quickly distracted by graphics. I quickly got off course and got involved with the graphics artists and started teaching myself how to do graphics. I later started selling my graphics and making money from that. That led me into learning how to make money online using various methods which I started doing. I earned enough money online to buy into a group with a member on here.That is just a bit about me and I would like to thank you for reading my application into legion.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

[img]http://x.hackforums.net/uploads/ficons/windows.png[/img] Windows:

I have a wide knowledge of the Windows Operating System. I have been using Windows ever since Classic back in the day, and know my way around the machine. I know how to update a drive, remove a virus (even when there is no internet, and not taking it to the store), install and use a program correctly, I know every Windows operating system out there from XP to Vista to 7.

[img]http://x.hackforums.net/uploads/ficons/android.png[/img] Android:
I've been an android fan ever since the Samsung Galaxy SII, now I currently own the Galaxy S3. Just like Windows, I know all the basic Android knowledge, that some members don't. I know how to remove a virus, install and use an application correctly, install themes and use customisation properly and how to keep your phone updated.

[img]http://x.hackforums.net/uploads/ficons/iPhone.png[/img]iPhone:
My iPhone knowledge is exactly the same as where Android is. Despite me not owning an Apple device, I have used one. Ever since the iPod Nano 1st generation came out, to the iPod Touch.

[img]http://x.hackforums.net/uploads/ficons/world.png[/img]Grammar:
My grammatical, punctuation and spelling skills I would say are quite essential to me, and are beyond standard. I have been writing online for quite some time now, and I'm a reporter on a couple of other websites, and one day to become one on Hack Forums when the opportunity arrises.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
• I am not a member of many groups.
• I can bring tutorials and guides.
• I am an active member of Hack Forums.
• I go on Hack Forums on a daily, if not hourly basis.
• Professional.
• Easy to talk to.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I've decided to follow my Mum's footsteps into the Administration business. My goal now is to continue saving up with the money I make from work casually, and then start a course that I will study throughout the whole of next year in business. Of course whilst studying, I want to maintain a healthy and happy lifestyle that doesn't get in the way of my friends and family.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:

• Australian (Living in Sydney, Australia).
• Currently twenty years old.
• Male.
• White (Caucasian).
• Non religious.
• Has a driver's license, and a car.
• Kitchen hand is my occupation (Boring job, but good pay).
• Has OCD.
• I can touch type.
• Plays tennis as a sport, no musical instruments.

Elaborate on your skillset: Gamer, learning to code, writer.
Tell us why you would be a valuable asset: I can contribute any knowaladge I have to offer, but as in return, receiving information from the members.
Elaborate on your achievements and future goals: Acheivments: I dont have very many, I am currently developing a website with my friend which should take off soon. Future goals: I would really like to launch a gaming clan, with custom servers for garrys mod.
Tell us about yourself: Hi, my name is Jared. I am 16. I enjoy anything to do with video games weither it be coding in a spin off in ruby to make a pokemon like rpg game (rpg maker vx), or making gaming servers (I have had all sorts of servers of the years, such as minecraft servers, counter strike servers, etc. All closing after awhile but as I had them I was able to get TONS of people on them. I am really great at advertising).

I am really great at creating ideas for plots, websites, game ideas, etc.

Prince. - *July 18, 2013, 3:54 am*

Elaborate on your skillset:Currency exchanger
To Innovate
Server Management services
Monetizing (PPD/CPA)
PC Hardware-knowledge
I think and act like a business man.
Offline Marketing (Stock Market/ E-Bay Seller)
Malware Removal
RAT's
Website Administration

Tell us why you would be a valuable asset:
I can contribute and help fellow members. I will try my level best to contribute the community I have many methods of SocialEing, from getting CocaCola bottles to electronics, I currently have a huge collection of SE method pack and I planning to give them away.

Elaborate on your achievements and future goals:
Enjoy the community as much as possible, contribute, build a botnet with C++ and rails, design a booter, write an E-Book, 24k award. And Need good amount of money for this
https://hackforums.net/showthread.php?tid=3254593

Tell us about yourself:
I'm 37 years of age
I am a simple, 37 years of age quite kinda guy. I am working hard to collect some money for my

daughter's surgery. I am very respectful and very well mannered. I have no scam report as well as no -ve rep. I hope you consider my application, I am looking forward to being accepted. Good luck to all other applicants!

Rayquaza™ - *July 18, 2013, 4:46 am*

Elaborate on your skillset: I know a lot of HTML since I studied it in high school and I'm pretty fluent with C++ since I've made a few projects related to games. I also learnt quite a lot of lua since its one of those languages your good knowing.
Tell us why you would be a valuable asset: I always get stuck in on discussions and wouldn't mind helping other group members who need a little bit of help when it comes to coding in languages I am pretty fluent with.
Elaborate on your achievements and future goals: I have coded three games in C++ using my own engine, although they weren't too good the third one hit 1000 downloads and I was pretty proud. All the projects are dead now since this was back in 2010 when I was 14.
Tell us about yourself: I'm very active on HF and on XBOX. I'm a gamer and coder. I am soon to be in college studying computer science. Although I spend a lot of time online I also go clubbing every now and then with friends. I usually hang around with my friends once a day for about 5 hours.

Xpired - *July 18, 2013, 7:49 am*

i am interested .. all things about me you can find out my posts and threads

Penar - *July 18, 2013, 8:03 am*

I was apart of this for a very short time. I can assure you that if you're not qualified in the field of hacking, this is not the group for you. You will be weeded out very quickly, trust me.

Revenge - *July 18, 2013, 8:05 am*

Elaborate on your skillset:
I don't have much skills in security, coding or helping people with computer problems and I want to learn to do so. I think it's a shame that I've been here for two years and still don't know anything about these kind of things, but now I'm willing to learn and that's why I'm applying.Hardworking - I'm a very hardworking person. Anything I do, I put my all into it and I think I've shown that over my time here on Hackforums with threads that took a lot of work and group projects that do likewise. Here's one example of this: https://hackforums.net/showthread.php?tid=3359725
Loyal - I'm a very loyal person. I've always been like that and I won't ever change. It's hard to show how loyal I am, but given the chance I can easily prove it.
Good at listening and taking advice. - This is another important skill that I have. If I didn't take advice from people, I wouldn't be where I am now.
Gaming - I'm very good at games, I've been playing them for years and have a lot of knowledge on them. I don't mean to sound arrogant, but I know more than most people.

Tell us why you would be a valuable asset:
I think that I would be a valuable asset because I'd put tons of work into it and I'm not the kind to forget about where I learned so I'd be willing to help wherever I could. I think I could bring a lot to Legion, but sadly I don't know enough to help at the minute. With the knowledge I'd learn, I'd be able to help the community here on Hackforums with and I think that's what really shows when it comes to a group like this.

Elaborate on your achievements and future goals:
I'm not sure if this means in real life or on Hackforums so I'll answer for both. In real life, I've just completed school and am now doing a computers and business course in September and after that I'll move onto another section of computing/coding. On Hackforums, I've achieved quite a bit as it is, but I don't think any of it is notable so far unless you count things like ub3r etc. In the future, I hope to be able to help people with computer issues, be able to code, obtain a higher status here.

Tell us about yourself:
My name is Danny, I'm 18 years old and I'm from Ireland. I spend a lot of time on my laptop browsing Hackforums. I also play a bit of sport, maybe three days a week(It's an Irish sport). Other than that, I'll be studying Computers and Business in September. I'm a very loyal, hardworking and trustworthy person, a lot of people will know that already. In my spare time, I play a lot of video games and I've dedicated a lot of time into them which has lead me to get very good at them.

Violators - *July 18, 2013, 11:58 am*

Elaborate on your skillset:

Doxing

Over the past few months, I have discovered different methods and good ways to "Dox". Don't think I am a bad person for doing this, because I always live by one main rule; Never abuse your power. I do not Dox for fun at all, I never do anything for "fun", I use my power to expose the ones who think they are the king of the internet. Also, before you ask, of course I do not Dox HF members. I also made a Doxing eBook, which was very popular.

Ratting / Keylogging

I do have a lot of experiences with "RATing" especially in 2011. When the YouTube community was unaware of any malicious viruses etc. I had a lot of slaves. All those cocky kids on YouTube, I thought needed sorting out, so I did take some of them down. I haven't done it in a while thought, as I recently have been eWhoring and Doxing.

eWhoring

I am not going to include eWhoring into this, because I haven't actually made any money yet. I have been trying for along time, but not any results. So I decided to stop for a while.

Social Engineering

My social engineering skills link with Doxing. I do not use them to get free products, I use them to get information about a certain person. My video editing skills help me with this. I ask to join "Clans", gain their trust, and screw them over. Mainly if someone tells my mum to die of cancer. I hate it when people do this. Yes it does take time, but I have quite a bit of time at the moment.

Booters / Network Stressers

I have knowledge on Stressers. I have had booters in the past, and used them wisely. I know about shells booters, Botnets and stressers. I made my own shell booter in late 2012, but it didn't last long as I was only learning, I bought stressers in the past from here, I bought VPN's to protect myself.

VPN's

This is the topic I help most people on. Mainly the key facts of a good stresser, such as paid is better than free, free VPN's are useless, you need a no logging VPN, the securest way to go would be a layer 2 tunneling protocol (L2TP) over IPSec, which requires the installation of a computer certificate.

SQL injections

SQLi's is the next thing I am going to learn. I have done the simple admin bypass, just never defaced a website, but once I learn this, I will use my knowledge to make tutorials and help individuals on wanting to achieve the same knowledge as I will.

Tell us why you would be a valuable asset:
I would be a valuable asset to Legion because I use my skills my own way. I have my own originality. I love making tutorials to exceed the knowledge of members. The feeling I get when I post the threat is really thrilling, I just wait for the feedback, if people don't like it, I improve, and still help. If people like my feedback, I keep working to provide information on which people may not know. I will help members with lots of topics; Ratting, Doxing, Social Engineering tips,

Elaborate on your achievements and future goals:
My future goals would be to help HF as much as possible, making it easier for people to learn and obtain sources of information. I want to make sure people learn about the things they want, which is the main reason people sign upto this forum, and I know Legion would be the best place to do this as they are a tutorial based group, helping the fellow members of this community.

Tell us about yourself:
Well, I have been here since June 2011. I am very fond of my privacy. So, I am a abit of a security freak. I think this was processed into my brain in the process of learning Doxing. I would love my information to be minimal to the internet. I am 100% motivated to make sure every single one of those 376089 members of this site knows exactly what to do in the topic they are wanting to learn. I will be a great aspect to Legion, and all I want to do is help, and make friendship on the way, as I have no friends on these forums in the 2 years being on here.
Thanks for reading my application to Legion, I hope you read this thoroughly, and carefully, and feel free to proceed to ask me questions.

- ??????

Syncro - *July 18, 2013, 8:56 pm*
Elaborate on your skillset:I am really good in social engineering.
I use it a lot and I have a silver tongue.
I've done some Python, I am getting into C# and learning from fellow friends at college.
I can do pretty basic HTML, I know quite a bit about botnets and setting them up. I also know a lot about computer hardware and how it all works.

Tell us why you would be a valuable asset:I respond faithfully to commands and I am loyal, I am also aspiring to be very active on the Forums and this will be my first-step to greatness. Also, I have a close friend in Legion that I've known for multiple years. You know him by the name of Cellulosic. We have made a botnet together and have been through think and thin. We have done a lot of stuff together and he had recommended that I apply to Legion.

Elaborate on your achievements and future goals:I hope to be the best that I can, I may make some mistakes every once in a while, but if I am accepted to Legion, I will take as much knowledge as I can from it and use it to better my abilities.

Tell us about yourself:I am 20 years old and I enjoy playing games on PC and hacking. I do have a life so I won't be on for 20 hours of the day, but when I am on (after-noon and night) I have free time. If you need me while I am poppin' caps in BF3, I will hop right on and be ready to rumble.

En1gma - *July 19, 2013, 4:57 am*
Elaborate on your skillset:Ratting

My first skill would have to be rattting. I know a lot of people are going to say that but at first they fascinated me how you could control someone's computer. I struggled at first but a few members pointed me in the right direction and I was doing well. I have made well over $120 from ratting runescape gold.

Patience

One of my most important skills is patience. When I first joined HF there were a lot of members who were willing to answer my questions. I try and resemble that now by being patient with new members. This brings me onto my new point being a fast learner.

Fast learner

I think this is very important for the student program and if I'm accepted will ultimately help me along the way. Whether it is something brand new to me or something a know a bit about. I'll learn it quick, furthermore I will make necessary notes in order to help go over it in future. I would also pass the knowledge onto other members when I get good at said subject.

Gaming

This may not be relevant to Legion but it is definitely one of my skills. I was accepted into the old gaming groups "Respawn" and "Legacy", this goes to show I am an above average gamer. I used to game for about 3 hours a day, however I don't game as much at the moment as I'm focusing more on kearning. This will allow me more time to focus on Legion if I'm accepted.

Graphics

Although I'm not the best at it, I always give it a good go. The thing I love most is being able to see my work develop. I have a lot to learn in graphics, in time I would like to offer free services to HF.

Tell us why you would be a valuable asset:

I think I would be a valuable asset because of how much work I will put into the program. I am always wanting to learn and when I learn I will teach. I am very interested in hacking and I would love to learn more. I can offer Legion everything from the skills listed above and much more. I think if given the opportunity I will thrive in the group.

Elaborate on your achievements and future goals:

My future goals on HF are to learn as much as possible, HF is amazing and there is so many things to learn you just have to go out and find them. As for real life I would like to finish school with good grades and get a job to do with computing.

Tell us about yourself:

I think I am quite a laid back person and very relaxed. I am quite quiet as I like to let others speak before me to see their personality, I will speak up when needed though. I always enjoy helping people and seeing myself progress. I am an avid learner and have recently started some hacking lessons with a member of the forum. I would say I am progressing quite well. As of now I know basic LFI and basic SQLi.

Wonders - *July 19, 2013, 12:32 pm*

Good luck to all applicants. It's a shame things went down how they did, but this group has an exceptionally good sub forum along with some very talented members. Anon knows how to run a group well.

Im gone brah - *July 19, 2013, 12:59 pm*

Any questions regarding Legion, hmu and i will try to answear your questions correctly!

VRUMM - *July 19, 2013, 4:51 pm*

Elaborate on your skillset: Website Security, Websites&Forums exploit, Marketing ,and Graphic Designing. Have multiple experiences guarding forums and websites against exploits and Site Errors. I also dwell myself in the knowledge of forums hacking and vulnerable VBB Exploits. i have exploited many popular vbb forums in the past that have over 1 Million users(spam and real). My true skill lies in marketing and my hobby is graphic Designing. I also have valuable experiences in DDOSSing security for websites and servers and surely can take down any highly protective servers such as Cloudflare and venomservers

Tell us why you would be a valuable asset: You are getting someone who are very experiences in Vbb securities. VBULLEIN Is one of the most popular paid forum platform in the world. Xen_ - *July 19, 2013, 6:51 pm*

I have not been hacking long, but I think my skills are decent.

Elaborate on your skill set:
Hacking:
Basic XSS.
Cold fusion exploit.
Ddosing(I know, skiddyskidskid)
I'm able to root linux servers.
I have experience using stealers, keyloggers, botnets, and rats. (I don't have any now)
Local File Inclusion.
MySQL Injection.
Remote File Inclusion.
I can social engineer small companies and food/drink companies.

Web construction:
I can install and manage most software scripts.
I am able to make skype resolvers and tiny chat resolvers.
I have 5 years of experience moderating/owning websites, forums, and text based games.
Misc:
I have good grammar, spelling, and punctuation.

Tell us why you would be a valuable asset:
Well, I enjoy making tutorials and helping people, I may not be the best but I am always trying to learn more.

Elaborate on your achievements and future goals:
Well for my achievements:
Learning the basic hacking related things I know now.
Learning a small amount of VB.net.
Running a online game with 4k+ members.

Future goals:
Learn Python.
Learn C++.
Become a system administrator.
Join Legion. :p

Tell us about yourself:
There isn't much to tell.
I'm 17 years old.
I live in America.
I have social anxiety.
I like to fuck shit up.
I spend 80 percent of my time on my computer.

?aba Yaga - *July 19, 2013, 7:12 pm*
First I'm sorry I'm on mobile so I could have made it colorful and ECT.

Elaborate on your skillset:

Gaming
-competition (Comp Sniping)
-Xbox modification (via Jtag)
-team playing (gamebattles)

Monentizing - Social Engineering
- HF Product Selling
- Social Engineering

Web construction
-capable of creating a website with moderate ease
-able to edit html
-great with organizing , and appearance

graphics
- basic use of photoshop
- can create decent looking thread designs

Tell us why you would be a valuable asset:
Personally I think that I would be a valuable asset because I can and will provide the group with all my knowledge and will take in other people knowledge so that I can learn to make myself and other better.

Elaborate on your achievements and future goals:

Well my biggest achievement would be finally starting my clothing line and actually making my first eDollar. Myfuture goals would be to expand my brand and knowledge in HTML. Some other short term goals that leads into my future goals are to make enough sales on HF or anyplace selling my future products and purchase a sticky. HF wise I would also like to be in the HF News.
Tell us about yourself:
My name is Deonte, I'm 17 years old from America. I am a very chill person and always trying to make friends. Although I have a problem thinking I have these wonderful ideas but then turns out its not. I am a sporty person ,although I do love to be on my computer and learn new things.

DarkFlux™ - *July 20, 2013, 9:49 am*

Triads - *July 20, 2013, 1:46 pm*
Elaborate on your skillset:
I e-whore for 3 years so that is my skilset.
Tell us why you would be a valuable asset:
I got 3 years of e-whoring experience and i could help with PayPal problems in that area.
Elaborate on your achievements and future goals:
Got no achievements or future goal yet.
Tell us about yourself:
I joined HF dec 2010 but i was lurking a lot back in those days , after a while i started e-whoring and i got skilled really quick.
All i mainly do is helping people in the e-whoring section and roaming different gaming sub forums.

v?x? - *July 20, 2013, 3:56 pm*
Elaborate on your skillset:
I've got a quite unique skill range. This ranges from coding, to social engineering, to just straight up hacking. I was away from HackForums for a while and have built up my hacking knowledge in the year 1/2 away. As this group mainly focuses on the security side of things, here is my current skill set in regards to that:Union Based SQLi
Basic XSS - Often refer to cheat sheets
Basic LFI
Basic RFI
Directory Transversal
Basic RCE (ACE)
Basic NCI (Null Code Injection)
ColdFusion Exploiting version 6,7,8,9,10 (My Tut: https://hackforums.net/showthread.php?tid=3626478)
CodingVB.NET & VB6 (Strongest Languages Known)
Basics of C++
Basics of PHP
Dabbled in many many other languages
Grammar - I feel my grammatical skill is rather strong and that helps me to carry myself in a professional manner across the forum

Tell us why you would be a valuable asset:
I believe I could be a valuable asset to Legion as I have quite an extensive knowledge in regards to security and I'm always willing to help out other members as well as to learn myself. I'm always

looking to further my knowledge and I'm hoping that if I'm invited into Legion, I will be able to do so as well as help others. My knowledge has been a gradual increase over the past 4 years and I'm now wanting to share that knowledge with other people who were once like me. That being said, I feel I'm not anywhere near being good at security and would love to have the chance to further that knowledge!

Elaborate on your achievements and future goals:
My current main goal is to further my hacking/web security knowledge to be able to take this into a possible career in the distant future. I'm all about learning and helping others to learn. As for my achievements, I feel that I've come really far this year, since before then I was only able to SQL through Havij, even though I was still fairly knowledgeable about the topic surrounding it. The fact that I've came so far in this short space of time has me quite astounded and is just driving me hard to better myself.

Tell us about yourself:
I'm a 19 year old British guy, who is sick of doing nothing productive with his life and is looking for a ways to amend this. I don't particularly want to get into specifics about myself, but if you wish to know more, just go ahead and shoot me a PM!

MultipleChoice - *July 20, 2013, 7:40 pm*

Elaborate on your skillset:
I'm an excellent marketer, and love to make money. I'm always here to help people when they need help with a RAT or Keylogger or anything that i can help with. I've basically mastered RAT's now and working on creating my own Keyloggers. I've recently did the stock market with investing, to try it for the first time and I tripled my profits with investing. I have been doing gaming since I was a little kid, I'm decent at games like Call Of Duty and Madden. I am also learning coding in Visual Basics. I'm pretty good at Ewhoring also, I have made probably $4,000 from it. I would like to get into blackhat jobs also to make some extra money.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff, and pass my knowledge on behind me to the people that need help with it. I would encourage others to try and learn and become in a high quality group like Legion itself. I would like to learn from the best of the best also.

Elaborate on your achievements and future goals:
My achievements that I made aren't the greatest but they are decent. I managed the master RAT's and Keyloggers since I joined Hackforums. I have learnt monetizing, eWhoring, keyloggers, rats, and many others. I am always trying to help others that need my help. I'm always passing on my knowledge of what I have to other members. I want to create and own a stresser of my own in the future, as well. I'm planning on going to college also for coding when I graduate High School.

Tell us about yourself:
I am 16 years old, I'm in 11th grade. I love to play Runescape and Xbox live with friends, and go out and have some fun. I just bought a new dirt bike with my own money I had saved back for one. I'm pretty popular in High School, I'm becoming a junior now when I go back to school. For sports I play Football, Wrestling, and Baseball for my High School team. I am pretty much a laid back person that likes to have fun with his friends.

Visca Barca - *July 20, 2013, 11:58 pm*
Elaborate on your skillset: I am skilled with anything PC related, Im studying software engineering

and I am a very fast learner.
Tell us why you would be a valuable asset: Like I said above, I am studying software engineering, I speak 3 languages, I believe I am a valuable asset to any kind of group.
Elaborate on your achievements and future goals: Graduate and start selling my software on hackforums.
Tell us about yourself:My name is Charlie I live in Mexico, Im 23 years old, educated,I believe I also have strong values. I would love to be a part of legion.

SIM-1073426 - *July 21, 2013, 5:18 am*

Elaborate on your skillset: I can install a silent information gathering program on almost all iDevices that I have physical access to, or just install a packet sniffer and have all information that isn't encrypted over air or if that doesn't suit you install a DNS spoofing program and replacing all social media with phising pages. I know how to get things done basically. Not sure if the following is gonna help but I know how to setup a R.A.T, how to e-whore, social engineer, DoX and all the other well known methods which should be common sense on a forum created for security.

Programming Skills: I know web based programming and Linux and Windows shell script and know moderate C and Python. When it comes to web based programming I've actually made a site for payment of fuel on a flying company on my home town which then I got around $300.

Tell us why you would be a valuable asset:
I'm a friendly guy mostly, I can be hostile if I see someone making the sections I like LQ. I'm available nearly 24/7 and is not afraid to share what I know.

Elaborate on your achievements and future goals:
One of my achievements are that I made a WiFI dictionary attacker in windows shell script using basic wifi profile import and export (exporting profile and changing password value and import again and see if internet is given) An advanced A.I on Linux that were created for Home automation which is one of my many hobbies My goals are to work with either home automation, artificial intelligence or robotics.

Tell us about yourself: I'm a typical guy loving learning new things also hate throwing electrinics away since they can in most cases be re-used to alot of other things. I'm really dedicated to modern technology and can't imagine working with something that is unrelated to it.

Understalker - *July 21, 2013, 6:43 am*
If anyone has questions regarding Legion, feel free to PM me about them.

LoG?c - *July 21, 2013, 9:11 am*

Elaborate on your skillset:

HACKING
I was once a black hatter in my time being and I did help others set up their RAT and other methods also. I'm not a "professional" but I do ask for help when needed and I take that knowledge for later use on others. More about what I did: I black hatted for two games mainly - Habbo Hotel & Runescape. I don't post a whole lot in the "HACKING" section either but I do help others off-site.

SOCIAL ENGINEER
I've mainly social engineered when I needed to either get un-banned or get what I wanted from others. I have gave out tips / tricks to getting un-banned from other games etc only because I feel the need of sharing. I've done this for many, many months till this date also I have got a few free

things in real life because of my methods.

GAMING
I've been a hardcore gamer since I received my free Playstation 3. I do play with other HF members and friends online & I share my strategies with others that need it. I do mainly play Call Of Duty on the gaming console I have. I've shared my methods of "prestige glitching" on a certain game called "Black Ops 2" and mainly did it for other users if they asked.

My times of playing the game called Minecraft my knowledge in this game is over the roof I played it since BETA and helped many, many users with their servers plugins, advertising, simply setting their own server up if they didn't know how. I do have a few threads about it but I can't really find them at the moment.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:

I think I would be a valuable asset because the main three skills I have I can share my experiences & methods if anyone needs them. I'm wanting to expand in my knowledge, and get some ideas / tips from others. In all honesty I'm on all the time and I'm always up for helping others when they ask for help on anything they need and falls under my "category."

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:

I don't have any goals / achievements but I have been working towards gaining money for my gaming desktop. When it's online related I honestly am trying to learn as much as I can and learn some programming and contribute back to HF since I've not did that in a long time. I have already learned the basics of HTML and going to learn more about making a website mainly for my future Minecraft Server that I'm going to make.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
Alright, My names Jerry, I'm 17 years old and I honestly enjoy sports and being athletic but when it comes to computer / gaming I do that as a sub hobby. I've played soccer for 5-6 years as a child and honestly looking for new things to do that's why I help others off-site because I do in fact love it. Also, I'm out going, have a sense of humor & not afraid to help anyone when they need it.
--

I only edited my post because of my OCD.

Ergo - *July 21, 2013, 10:06 am*

Thank you for reading, and I look forwards to your reply.

G_Homie_G - *July 21, 2013, 3:06 pm*

Elaborate on your skillset:Gaming: I play lots of games and I love competing professionally.
Graphics: I have basic photoshop skills, can create icons and small banners.
Coding: I had lots of trouble coding in my 1st year university, but after alot of help and self learning I have become very good at java, python, C, C++ and VB6
Monentizing: I usually sell my sevices of a game called "League of Legends" and I also used to sell accounts.
Networking: I understand machine based exploitation and I have also been learning network base

exploitation, Its a very essential skill to have.
Social Engineering: I am very good with people online and on the phone, I think I can convince them to buy the product etc.

Tell us why you would be a valuable asset: I have a good knowledge in everything that the group needs and using my skills and high quality assets to contribute to make the group even more popular. Also, I think I can share ideas with the group and help members if ever need be.

Elaborate on your achievements and future goals: My achievement on hackforums since November 2008 has been great, as I have met alot of people online and made lot of income. Im currently studying Software engineering at a University and have been excelling in all my classes. I would like to have a good life.

Tell us about yourself: I have a year to go in university, have been here for 3 years non-stop (no breaks), I am a very hard working student who likes helping others and being educated by listening to other members. I would be a very active member in Legion and will be very dedicated to the group.

~Thanks for reading my application~ Please don't hesitate to pm me for more information~

Michelangel? - *July 22, 2013, 2:02 am*

Elaborate on your skillset: I do not have much skillset in hacking, i will be honest. I am looking to learn from this student program. I have some skill-set in offline marketing but other than that i am really looking forward to joining the student program so i can actually learn something that will help me in the future.
Tell us why you would be a valuable asset: I am a quick learner and i can help out in the group if it is something i can accomplish.
Elaborate on your achievements and future goals: Currently in the 11th grade plan on getting a masters in business when i go to college and maybe something to do with computer science not 100% sure.
Tell us about yourself: I am outgoing, social, and can follow all instructions. I love to laugh and i honestly love anybody who can make me have a good time. My name is Angelo and i am 16 years old from U.S. Hope i get accepted so i can finally learn some knowledge in the art of hacking.

Weary - *July 22, 2013, 4:47 pm*

Elaborate on your skillset:

Coding:
I've always had an interest in coding, and general development. I'm currently very fluent in Java. I am taking it upon myself to learn new languages, lately I've been doing a lot of jQuery, php, css, and C++. I spend more than half of my time in an IDE.

Social Engineering:
A lot of people consider social engineering to be limited to e-whoring, and stuff like that. I disagree. Being able to manipulate something or someone to do what you want, is a very valuable skill that I do have. I'm good with people, and I can get them to do what I need. I don't use this to get iPad's, or any of that. I use this on a every day basis to be honest. It just makes life easier.

Tell us why you would be a valuable asset: I saw you need some plugins developed, I can do that for sure. I also will not hesitate to help members out with any issues, especially if they're regarding programming.
Elaborate on your achievements and future goals:

In life, or online? I guess I'll do online. Online I've gotten myself a job developing things in Java for a few Minecraft servers. Plugins, specialized clients for their users to connect with, etc. I do a lot of freelance development, which gets me a steady flow of income. I pay for my clothes, hardware, and more with the money I make online. That to me is a wonderful achievement. My future goals would to be make more money, better my skill sets, and become a better rounded person in general.
Tell us about yourself:
I'm at the age of 16, and I live in Utah. I've been programming since I got my first laptop in April of 2011. I currently work as a laser technician for an art company. I basically operate 6 laser machines which automatically engrave artwork onto wood, paper, plastic, etc. I only go to half of my school days, as I take my core classes online. I find it's easier to go at my own pace. I'd like to learn more about networking & security.

Damdomy - *July 22, 2013, 4:58 pm*

Elaborate on your skillset: Passionate about web-dev, excellent in PHP, MySQL, HTML and jQuery. Moderate at CSS.
Tell us why you would be a valuable asset: I can offer my web-dev advice and help as well as other services such as useful sites i develop!
Elaborate on your achievements and future goals: In the future, i plan to learn computer security and web-site hacking. For a good use of course.
Tell us about yourself: 19 Year old dude, from the UK. I'm very passionate about web-dev and computers.

Remember me? I made #.net ;)

CommanderBoss - *July 22, 2013, 9:00 pm*

Elaborate on your skillset:
Ratting
The first thing I learned on HF, like many others, was how to rat. Ratting alone is easy but I have also learned a ton about crypters and how they work as well as a ton about security and antivirus.

Security/Antivirus/Other Viruses in General
Naturally knowledge of security comes with knowledge of viruses. I have a lot of knowledge in the area of overall security and how antiviruses in general work. I can spot fake web pages and links from a mile away, including totally legitimate looking copies of web pages and security updates. That might seem easy enough but it is a skill that too many people are lacking.

Social Engineering
If there is one thing I am, it's a people person. I am an expert at reading people, even over text. I can pick up subtle signs in their choice of diction and syntax (yes even in garbled messages) and figure out the best response. I also am a great bluffer and can convince just about anyone that I am totally correct and sure of something while actually being totally unsure. For these reasons, I am a very effective social engineer.

DoS Attacks
I have a wealth of knowledge in the area of network-based attacks and security. My guide to DoS attacks can be seen here:
https://hackforums.net/showthread.php?tid=3637730
That's just a sample of my knowledge, which also extends to booters/stressers.

Hardware
I can diagnose and repair physical problems with video game systems and computers. I can also

mod them and have been doing both for years.

Gaming
I consider myself to be a good gamer and am at least adept at just about every kind of game. Yes, including puzzle games.

Tell us why you would be a valuable asset:
I would be a valuable asset because of how much I want to increase my knowledge. I want to learn as much as possible and teach others, thus completing the student-teacher cycle. I will work hard to achieve my goals and am not discouraged by setbacks. For these reasons I would make this group proud.

Elaborate on your achievements and future goals:
I want to become more well known on HF and spread my knowledge while learning as much as possible. In real life I recently acquired a business license and want to do something involving computers; I'm trying to get off the ground. I would also love to be a game developer or hardware engineer. However, I love being in front of large groups of people and in the limelight and also love using my wits to figure things out. For these reasons I would also love to be a litigator. My achievements include fixing a ton of computer problems, building computers for myself and others, modding game systems, and legally owning a business. On HF I posted my "Ultimate Guide to DoS Attacks" and plan to do much more in future.

Tell us about yourself:
I am a 16 year old self-taught self-proclaimed computer expert from America :p I am a very outgoing, limelight-loving improviser (think Phoenix Wright) and definitely a back-slapping life-of-the-party kind of guy. Additionally, I am a dedicated, ambitious worker and always strive to improve.

D?ath - *July 23, 2013, 4:54 pm*
Hello, My name is 303315.

The reason for my name is because its a bit more unique and anonymous to be a number and not something like "CorruptedCross" or "hackerslash" or whatever. I mean it is more of a reason to attempt to keep myself gender neutral. And its is easy to type fast on a number pad.

Occupation:
Student
Major: Networking
Certification: CompTIA A+ and Security A+

My accomplishments:
Original Explanations On CLI
Released my own source from my own personal macro
Created a website
Own the most recent version of Accunetix (Not releasing how I got it)
Cracked a couple programs (Minor ones)
Created a HUGE Dork list dictionary
Managed to get 11k YT Views without using viewers and such.
SE'd a Webmaster for iFunny Servers to get Moderator Priveleges
Spoofed Authentication for Apps

Goals:
Successfully upload my own script onto a site I do not own

SQLi into a site
Bang Jesica Alba
And SE Different major companies for high quality products.

Eclipse - *July 23, 2013, 4:58 pm*

Elaborate on your skillset:
Social Engineering
I always thought human manipulation was an interesting subject so a couple years ago I actually started to get into it, I have since learned many ways to control the outcome of every situation.
It is not a subject limited to getting free things or money but a way to control your own life.

Marketing
I am extremely skilled at flipping things for a quick dollar and getting things sold. Most of this is due to my practices in SE but I have been able to use this to make quite a bit of money.

Graphics
I would say my skills are mediocre but I haven't practiced in over a year.
I am hoping to get back into it because I really enjoyed it and could see it helping further in my career.

Tell us why you would be a valuable asset:
I believe I would be a valued member because I have a lot of knowledge I can share with members and am ready to learn what everyone else has to teach as well. I can get along with almost anyone and help where I am needed.

Elaborate on your achievements and future goals:
I don't believe I can note any worth achievements other than being here 3 years and gaining a lot of knowledge I can share.
As for goals I hope to join a group that I can actually gain new skills in and just help out everyone I can here for the best.
Tell us about yourself:
I am 17 years old, I see HF as a place to meet people with similar interests and ideas. I hope to become trusted here and to further my abilities, I see Legion as the perfect team to help me do that while I add everything I can to the group myself.

I hope to hear from you soon.

Nyckel - *July 23, 2013, 6:51 pm*

Elaborate on your skillset:
Tell us why you would be a valuable asset:
Elaborate on your achievements and future goals:
Tell us about yourself:

Linux. - *July 23, 2013, 11:44 pm*

Elaborate on your skillset:
Coding: I have been coding for over 3+ years. I know a bunch of languages, including Python, C#, C, C++, PHP, Java, Javascript.

Operating Systems:
I know a good bit of Linux, and Unix. I run Chrunchbang as my main operating system.

Listening skills:
I will follow any command given to me. I have only hacked a couple of minor things, but am looking

to expand my skillsets to something more.

Tell us why you would be a valuable asset: I am willing to learn, I already know some stuff about hacking, but would love to expand my mind, and skillsets.
Elaborate on your achievements and future goals:Becoming a network analyst for a huge firm. I would love to even go to college, considering the times at hand.
Tell us about yourself:I am 17, I have no job, I love learning, games, coding, hacking, and sports. I have a loving girlfriend who I care very much for. I am with her almost all of the time. I have a bunch of friends on HF, and IRL ;) I love meeting new members, and learning new things.

Sorry if my application is shit, I just really want to learn but can't even think of words to describe it.

Cyrus - *July 24, 2013, 3:56 am*

Elaborate on your skillset:
Ratting
I have learned the basics of ratting, at first I found ratting hard (because portforwarding with my router was weird) then once I done a bit of studying on it I found it pretty easy, it's more the spreading that is the skilled side of things. Although I would still like to gain more knowledge on RAT's, Crypter's & Antiviruses ect.

Gaming
- I have been gaming ever sense I was born and I've always enjoyed and had a passion for gaming.
- I have Playstation 3 & Xbox 360 but my main platform is PS3.
- The only games I really play are all the Call Of Duty's although I do buy new games that come out but I only play them for a week if even then that's them back to COD.
- I can play competitive.
- I took a long break from gaming recently but I'm just starting to get back into it.
- I have a Custom Firmware PS3 & HD PVR.
Custom Firmware = Modified console so I can mod all COD's.
HD PVR = Capturing device as I used to do alot of recording for youtube.

Monetizing
I've only just started in PPD, CPA & PPC, I hope to increase my earnings & knowledge in this subject.

E-Whoring
I E-Whored for my first time for 1 week and made £192 via Paypal & Amazon Giftcards after that I've never earned anything else from E-Whoring.

Graphics
I use to be skilled in graphics back in my youtube days, I downloaded photoshop again a few weeks ago and was messing about with it for a while, I think I could get skilled again if I put a bit of work into it. It takes alot of time & effort in my opinion and I would rather work on other things than graphics.

Social Engineering
I've Social Engineered two items this week for my first time, I know Social Engineering is not all about getting free stuff from companies & money ect. I would really like to improve my Social Engineering skills and learn to control situations and be able to read people, I sort of can suss people out by just looking at them or the things they say/type.

Tell us why you would be a valuable asset:

I think I would be a valuable asset to the group because I'm a quick learner & I pick up on things fast. I would share any knowledge I have with the group and would try to help group members with any issues the have. Learn today, teach tomorrow. Also I'm a friendly & respectful person and I would bring a good vibe amongst the group. And when I do giveaways & contests they will be done in the name of Legion.

Elaborate on your achievements and future goals:
I hope to become experienced in topics such as marketing, coding & well mostly the things you would expect someone on HackForums to want. Maybe make a living from online.

Tell us about yourself:
I'm not sure what I could put here. If Anonymous or any other leaders have any questions feel free to PM me and I will answer them.

Thanks you for reading my application, hope it's not that bad, if it is then oh well I'll learn from my mistakes.

I just read over it, I typed 'I' far too much, also I'm not too happy with the layout of it like the long sentences and short sentences & I wrote quite little in the last 3 answer things. Sorry about this.

Kind regards,
Keyser Soze.

Decompilator - *July 24, 2013, 5:09 am*

Elaborate on your skillset:
I have been Debugging And Reverse Engineering for 4 years now.I have basic skills in SQL and web design.I am fluent in C and BV.Net.
Tell us why you would be a valuable asset:
I am respectful,honest and helpful.I help out everyone that contacts me with any problem the might have concerning evreything from hardware to realationship problems.
Elaborate on your achievements and future goals:
When I turn 24 next year I would like to own a small company here in Slovakia that distributes car parts.
Tell us about yourself:I am 23 years old and live in Slovakia.I had nothing when I was 17 and have gone a long way and started out with CPA and went on to investing and now I am in a serous realationship and we would like to get married sometime in the next 2 years.

Im gone brah - *July 24, 2013, 5:50 am*
Any questions regarding Legion? don't hesitate to pm me (:

?nonymous - *July 24, 2013, 6:16 am*
All students have now been invited. If you haven't received a PM from me, you didn't make it. Additionally it's a shame to see so many not putting any time into their applications...

Next wave of students will be invited in some days.

#Thunder - *July 24, 2013, 7:30 am*
Elaborate on your skillset:

Social Engineering:DeceivingGetting to know your victim is great. Makes your job much easier to gain intel.
SOCKSBecoming a person with common interests to your victim can gain you more authority.

Using sites such as FakeNameGenerator and creating basic information on who you and keeping that information up-to-date is another priority while creating your SOCK.

While social engineering is very broad, I also understand these topics that relate to social engineering:Footprinting
Scoping
DNS Recon
Google Dorks
Metadata

Tell us why you would be a valuable asset:

While I may not know much about 'hacking', I believe teach others about footprinting, social engineering (in ways that are not fraud related) and basics of metadata, I believe some users could gain a bit that they do not know. Unmasking criminals and crooks is always something that I have enjoyed doing.

Elaborate on your achievements and future goals:

My achievements are basic. Learning more about tracking people, intelligence gathering, and much more.

Some of my future goals would to learn more on intellgience gathering, along with a programming language/web exploiting. While I know a little bit about Google Hacking, I do not know much about web exploiting.

Tell us about yourself:

I've always been fascinated with computers, gaming, and all sorts of tech related things. This is probably one of the many reasons why I have decided to look more into knowledge and technology in general.

Age to me really does not matter, but I am fifteen, and currently am residing in a small area in Florida. There isn't much to do either. With that being said, I spend most of my time researching, forums, gaming, etc.

JaggarN™ - *July 24, 2013, 10:23 am*

Elaborate on your achievements and future goals:
Future Goals : I dont have any specific Future goals
Achivements : I have played 13-16 to a german Elite Css team.

Tell us about yourself:
*Im a socaial person
*I like to share my knowledge
*I like to learn new stuff

Ignite666 - *July 24, 2013, 10:37 am*

Elaborate on your skillset:
Penetration Testing. I started "hacking" around 2009. Since then I've always been interested in pen testing and web exploitation. I started learning basic SQLi and XSS, and then advanced to RFI/LFI, Metasploit, and other web and server exploitation. I'm currently working on creating a pen testing and teaching service here on HF, and other sites. I am also working on a C++ IRC/HTTP botnet. The bots on the IRC will also show up on the HTTP panel, meaning you can access your botnet anywhere, and from any device. Completion: 40%.

Tell us why you would be a valuable asset:
I have a lot of experience in pen testing, coding, social engineering and marketing. I could help new members learn more, and be very active in the forum.

Elaborate on your achievements and future goals:
Some of my achievements. I've had some major XSS's and dumps. For instance, i've XSS'ed TTG, Geico, and a bunch of smaller sites. I've dumped: hackforums, blackhatworld, old HF, and the most recent HF dump ;)

Tell us about yourself:
Like I said, I've been a "hacker" since 2009. I'm very dedicated to everything I do, and would be an active member of the group and in the subforum.

P.S. Sorry about the layout. I'd rather go for the information, then pretty pictures. I'm a new member, but I have some big ideas, and a lot of experience. Just give me a shot!

Contact: ignite@jabber.org

Thanks

*I like to learn new stuffpretty sure your trolling. If not what possessed you to think that was even half of an acceptable application

Federal - *July 24, 2013, 10:37 am*

Elaborate on your skillset: Ratting I specialize in ratting, not just getting slaves but setting them up for fellow hack forums members of the community. I have done a number of rat setup giveaways to members. So mainly all i do for ratting is port forwarding, 5 free updates, and set it up to make sure it works. I want to make sure that the person is ok with the setup and make sure that i can teach the basics to them and show them about ratting and the different controls that they can use.
Webconstruction
I have learned web construction to the advanced learning, i currently know PHP,CSS,HTML5 this is a great skill to me as it helps with getting allot more learned it was a great skill to have and in my opinion will carry on to be a great skill to keep as its fun, and very good for the brain to work out. Although this is not hacking related but i believe its a good skill that has been learnt.
E-Whore
I do not do this so much now as in my self, but as ratting i try to help the community with questions that they may face to do with ewhores. The programs that they may need where to download the VCW and also some simple questions that may help them to intend to complete the setup of their e-whore. Programming/Coding In my opinion this counts as a skill, but any ways i program and the current languages that i know are: AJAX,Java,PHP,HTML,CSS,JS and Java. I am currently developing my wide range of skills to learn C++ To my full potential as i know some about it and have had many projects such as 'Litecoin miners' and getting library for GPU Mining.

Tell us why you would be a valuable asset:

I think that i would be a valuable asset as i can teach and yet learn, i want to expand the knowledge that is already known and make sure that i can turn the current knowledge to a further degree. I also believe that it is a valuable fact that everyone deserves a chance to prove them selves and show other ways that they are worthy in many diffrent parts.
Elaborate on your achievements and future goals:

I have not set any goals but the only real achievement that was met was the fact i learned coding and many other hacking materials, i am currently learning SQLI and i want to achieve this goal on getting databases and exploiting forums with SQLInjections. I have also always had this goal that i have wanted to achieve with making it into one of these groups: Legion, Illuminate or another programming/hacking group. I have achieved 250 Slaves from my self spreading no one else or bought updates. Tell us about yourself:

My names Luke I am 17 years old, and living in the united kingdom. I go to college in London which im studying Business studies Diploma and ICT (Computer Science, Diploma. I love to teach and learn new things from other members. I am mainly found around, 'Marketplace','Coding','Hacking' and The lounge. I want to learn more about IRC Botnets, Network hacking Doxing and other partial things in hacking that can further my knowledge that is currently learnt and teach others how to do hacking.

Goodies - *July 25, 2013, 12:50 am*

Goodies' [img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Application Elaborate on your skillset:
Well, I have a multitude of skills. From programming in an assortment of languages to many types of hacking. I would not consider myself the greatest hacker by any means, but I do think rather quickly and 'outside of the box' and always search for extraneous solutions to a problem.

My hacking skillset lies in ethical hacking. Having a father with dozens of friends whi need security checked for their webistes and networks, I am constantly finding work with them. I have been paid for my services but I usually do them as favors. I try to learn as many hacking skills as possible to keep a broad spectrum and a large 'toolbox' if you will of attack vectors that I will be able to access anytime.

Everything from:
~ SQLi - WAF bypassing, string & integer (learning blind but it's not that useful in my life)
~ networking - small amount of switch configuration, IDSes/NIDSes as well as major ways of bypassing them.
~ rogue APs, mitm attacks, dns spoofing, payloads, cryptography, ipv6 flooding (doesn't take skill but it's fun as hell), nmap (pretty proficient with nmap and not getting caught).
~ metasploit - I love metasploit!!!!
~ Shellcode - not much skill involved in sending (I use python to send), but recently I've become interested in dis-assembly and writing shellcode. I'm just starting out, but it seems very interesting!

Tell us why you would be a valuable asset:
I would continue to dedicate my time on HF to serving others (as I try to do anyways) while shedding positive light on Legion :) I have much knowledge to humbly offer the members of HF and I am more than willing to aid anyone who needs help. I have recently been active in the hacking sections as well as the pentesting/forensics section. I also have a Hacking Help Desk which does not show my full potential, due to the

Elaborate on your achievements and future goals:
I'm not exactly clear on this, but I'll assume you mean computer-wise.

I am a long-time programmer. I learned PHP (inb4 scripting not programming) years ago and made money off of things like adding user logins or search bars to websites, protecting against SQLi, simple web apps like email/sms spammers. I also have been a long-time programmer in VB making things like Steel Miner and my Survey Builder (both sold on HF) as well as hundreds of other applications, some of which were freelance projects. I also did an intermediate certification course in Cisco networking at a community college (I was a junior in HS at the time) where we worked a lot with metasploit and IDSes. I recently bought a raspberry pi (may not be relevant) but my future goal is to do something interesting with that. I already have it so I can turn on the pins via TCP (again, python) and I do have a more-than-average conept of electronics/wiring.

Tell us about yourself:
I'm a really easy going Type B personality with the drive of Type A :) I really enjoy helping members around the forums (and trolling a bit, but who doesn't). I do get annoyed when people ask things that:
A) are just stupid like "how 2 ddos with jays booter?"
B) can be googles/hf searched like "how 2 set up tor?"
C) already have thousands of threads like "how 2 crack wep/wpa?"

Despite my computer knowledge, I'm very outdoorsy. I love hiking (hardcore 5 nights with nothing but a backpack), snowboarding (somewhat hardcore), biking, swimming (hardcore 1mi swims) but I'm pretty small for my age so I don't partake in standard sports like football, baseball, basketball. Sorry for rambling :)

Other than that, I try to be filled with humility (except on applications) and give my best efforts towards helping the community...

Leonard Hofstadter - *July 25, 2013, 1:15 am*

Elaborate on your skillset

Mobile Phones:

When it comes mobile phones (Android and iOS) I am a bit of a whiz. I am able to sort out 99% of errors and problems that occur within the OS or the device itself. I can also fix any device or give advice on how to do how, that be an iPhone 5 LCD replacement or a Galaxy S4 loud speaker. If you need any help, feel free to ask me, I will not bite.

Monetizing

There are various ways of me doing this on a day to day basis, I will include a couple of my most used methods.
eBay: I am a frequent buyer and seller on eBay with very reputrable feedback. I sell and buy a variety of items including clothing, electronics and even vehicles. I have had my run ins in the past with different members but nothing that could not be sorted by simple conversation.

Electronic Repairs: I must say that this is one of the most frequent requests I get daily. I can fix electronics ranging from Phones, Consoles, iPad/iPod and even Shavers!

Tell us why you would be a valuable asset

I would be able to bring great knowledge to the group itself and can teach any member the ins and out of what I know too. I am great on the forums and try to get involved with as much as possible, 100% of my work produced is to the highest of quality either it be an application or a simple shopping deal.

Elaborate on your achievements and future goals

To be 100% honest, online, nothing. It is in real life the achievements mean the most to me. I can say I have not had many as it happens. I can say I recently passed my exams for Business and ICT Management and never thought I would do that, so that is great for me. I am scared of heights but soon I am going to be doing a bungee jump, 300ft, not to high but for me it'll seem 1000ft, I can provide a video after doing this if you would like me to :). Hopefully I have overcome me fears by then and going to complete a skydive ;)

Tell us about yourself

My name is Nikki, I am 21 and from the UK. I am currently unemployed by actively seeking employment. I am a huge fan of the hit TV series The Big Bang Theory. Generally I am quite laid back, but that is not to say I am easy going. When stuff needs to be done, I am on it, no questions asked. If more is needed to know about me, please do not hesitate to ask.

Magician. - *July 25, 2013, 2:36 am*
Elaborate on your skillset:
Gaming
I pay PC Games and very good gamer

Pentest

I have done many pen testing and have much knowledge of it.

Linux
I have some basics knowledge about Linux

Small Hacker
I am a small hacker know much about botnet and rats

DDoS
I am very reserached about DDoS and have much knowledge about DDoS

Coding
I have learned basic coding and have knowledge about it.

Tell us why you would be a valuable asset:
I think I can many thing to this group and too much regular in this forum and I promise that the group will not fell ashamed of me.

Elaborate on your achievements and future goals:
My Future goal is to be a MSDN Delveloper nothing else :)

Tell us about yourself:
I am a 19 year collage student who do hacking and stuffs for fun nothing else.

Thank You

Depravity - *July 25, 2013, 5:53 am*

Elaborate on your skillset:

Marketing
I have founded multiple of intermediate websites for online marketing. Thus, efficiently exploiting acquired knowledge, and personal experience for self-beneficiary in terms of monetizing for revenue.

• http://dollarfiles.org/ | Redirected to my referral registration, before DollarFiles discontinued their company.
• http://rninecraft.com/ | Replica of Minecraft; minor alterations, and redirected to a custom widget to complete surveys.
• http://gameoath.com/ | Currently under development; continuing once I have sufficient funds for massive website trafficking.

Remote Administration Tool
In terms of relevance, my first experience relating to Remote Administration Tools was Keystroke Logging,
and I eventually upgraded to Remote Administration Tool(s). Throughout my 2-years of experience, I have purchased,
and experimented with CyberGate, Incognito R.A.T, Blackshades HTTP Controller & DDoSeR 3.0.
Other features
I have used to progress the spread of my infection(s) were AnonJDB, Cuber Crypter, Infinity Crypter & RazorCrypter2.

[FREE]: R.A.T. | Crypt | Port Forward [SERVICE]:
https://hackforums.net/showthread.php?tid=2617567

I have assisted dozens of HackForums' members by either encrypting their virus, generating a java drive-by applet,
manually port forwarding, sending test connections, troubleshooting difficulties, and resolving general problems.

Gathering Intelligence
In my gaming past, I collected personal intelligence via online to recover RuneScape accounts.
I was quite successful, which I eventually sold bulk amount of RuneScape accounts to profit.
I was also subscribed to Spokeo's enterprise package, costing $100.00 USD per month to optimize my search.

Basic HTML Coding
To gain experience, and knowledge, I manually revised page sources using
editor mode to alter raw format from continuously updating 'index.html'.

Tell us why you would be a valuable asset:

Throughout my career on HackForums, I've had a rough past.
Fortunately for me, I was capable of starting afresh; reduced
my immaturity, and I now strive to accomplish my objectives
by inputting acquired knowledge, proficiency, and dedication
into successfully assisting the community with ambition.

Elaborate on your achievements and future goals:

My future endeavors consists of obtaining valuable knowledge, assisting fellow HackForums' members,
and contributing to my beloved community, HackForums, in
exchange for the wisdom I have acquired.

Tell us about yourself:

My username is Depravity, and I tend to use the alias, "Pseudonymous," referring to fake name.
I am an aspired marketer, and my profession is generally in the hacking-field. Ambitious entrepreneur;
thoroughly enjoys listening to high-quality music, multi-tasking, and operating at my own pace.

Teh Afro - *July 25, 2013, 6:44 am*

Elaborate on your skillset:
I have knowledge of malware, basic application security, web design and construction, as well as marketing.

Malware
I have extensive practical knowledge of different forms of malware such as, RAT's and keyloggers. I fully understand how they work and have helped multiple users in the past to setup and test their's.

Basic Application Security
I have a general knowledge of how to secure a program for example to stop it being cracked and how to spot flaws in the security of said given program.

Web Design And Construction
I have prior knowledge of web design and construction as I've created quite a few personal small sites and landing pages. I mostly work with just pure HTML and CSS but I have ventured into other areas. At the moment I'm attempting to learn PHP so I can setup more complex sites.

Marketing
Due to me being too young to get a full-time job I rely heavily on selling things online for a source of income. One way I do this is by selling multiple social networking services on this site, five to be exact, those being Facebook, YouTube, Twitter, SoundCloud and Instagram. I also plan on launching an E-Book soon on how to earn $30 a week on PPD. It's a legit method that genuinely works as I put it into practice.

Tell us why you would be a valuable asset:
I believe with my knowledge stated above I could help out other students in the group with any of their problems. I also feel I could be a valuable asset in Legion. Although, being a student I am more interested in what Legion can offer me, which I know is an extensive amount of knowledge in an array of different fields.

Elaborate on your achievements and future goals:
I'll quickly state some of my past achievements of this year.$3000 made online.
Screenshotting application released.
Custom PC built.
HTML & CSS fully learnt.
Multiple sites published.
Started a Minecraft hosting company with the user Vazity. (Voxel Servers)

Here are some of my goals.Maths GCSE passed a year early. (I'll find this out within the next three weeks.
$5000 made online.
Learn PHP.
Learn Python.
Expand my services.
Launch several new products on the market.
Keep Voxel Servers alive.

Most of my goals are financial and educational goals. I have smaller "sub-goals" I guess you could call them but I don't find them to be important enough to be listed here.

Tell us about yourself:

I'm a 15 year old male currently studying Business and IT. I have extensive all round knowledge of PC software and general knowledge of PC hardware. In my spare time I ski and golf as well as gaming. I'm more of a PC gamer but still like to play on consoles too. I recently broke up from school for my summer holiday and thus feel I can really give this student program a shot and give it the attention it deserves, hence my late application. I didn't apply earlier as I thought if I could not give it my full attention I would be not only wasting my time but others time too.

I hope to hear back from you soon.

Thank you. ?

Bullet. - *July 25, 2013, 10:36 am*

Elaborate on your skillset: I'm an advanced Social Engineerer, I know a lot of information there is about it, how to manipulate a company, and what to say in the spur of the moment.
Tell us why you would be a valuable asset: I would be a valuable asset to the group, as I can share all my methods and knowledge on how to achieve something.
Elaborate on your achievements and future goals: My achievements I've reached so far would be making over $2,000 from Social Engineering, and learning many methods. My future goals would be learning more products.

Products successfully SE'd;Xbox 360 Slim (5 times)
40" Sony Smart TV
Kindle Fire (3 times)
APC BR1500G (Over 40 times)
Logitech headset
Playtonic
Tell us about yourself: I'm 17 years old and I play lacrosse. I'm going to be a senior in high school next year. I've learned a lot about social engineering in the past year, and has made me a very good amount of money so far.

I hope to learn more about other hacking ways, such as ratting and more. Thanks for taking the time to read my application.

His application may be short but I can vouch for his skills.

Loomaanaatii - *July 25, 2013, 11:47 am*

Elaborate on your skillset:I am a web developer and a PHP/HTML coder, but what I specialize in is business management, currently I have taken four business management classes through my school and will be going into the business management area at University. I know that web design and business management are on somewhat different sides of the spectrum but business is in almost everything. Currently I have owned small companies, managing the finances, employees and the clients all by myself. Currently I am working on a in-home based computer repair/upgrade business which has been a great success. I believe that I could help the HF community skills of being a successful business person since there does not seem to be a lot of it at this time. I have released many products and services on HF that have been successful and I plan to bring more to the community. Also, currently I have been running mine craft servers since mine craft was in Beta. This has been the most successful areas for me.

Tell us why you would be a valuable asset: I like to help people, my main goal of HF is to help people and to earn profits. Since legion is a epic group, I would love to bring my knowledge in and help people out. I am a very smooth talker and a great public speaker. I find it hard to find a person that I cant get along with. Some things that excite me are giveaways, and if I get accepted into Legion, my goal would be to do 1-2 giveaways per week. Overall, I feel that I would be a very valuable asset to Legion.

Elaborate on your achievements and future goals: As told before, the mine craft server and the web hosting company. These two are my greatest achievements both have been very successful. I am currently still running the mine craft server and have sold my old web hosting company and I am working on a new one as we speak. Some future goals that I have is to pay back my parents from all my investing of paypal funds. This is my main goal, to make money and also to please people.

Tell us about yourself: I'm Emerald, I'm currently 16 and I am on the IT team in my high school. I am very easy going and chill, so if any problem comes by I can solve it very calmly without making a large fuss about it. Currently I am studying business at my local school which will lead into my career. I believe that the more you help others the more you will be assisted in life, and I am excited about helping more people on HF. I would just love to become a part of your group Anonymous as I think of you as amazing and I cant wait to talk with you in the future.

Thank you so much for reading my application, it's greatly appreciated.

??D??Li?? - *July 25, 2013, 2:57 pm*

Elaborate on your skillset:

My current job is a Project Coordinator where I deal with Java and SQL information daily to ensure proper business function and etiquette is followed. I am very meticulous when it comes to putting information together in a neat and understandable fashion. I have worked in the IM field as well selling products online, as well as SEO.

Tell us why you would be a valuable asset:

I would be free to assist any members by providing key information about their app or project that they are working on. I am good at outlining resources needed, as well as appropriate time tables to keep people on track and focused. I am also good at debugging code, and working with the developer to come up with ways to improve performance, or streamline their work. I am also fairly good at marketing and advertising in general.

Elaborate on your achievements and future goals:

One of my achievements has been my ability to act as a translator between programmers, as well as the end user. I am able to successfully communicate needs and improvements between technical sides. I now help manage project expectations for 123 facilities in my area. My goal is to

learn as much as possible in regards to programming, and develop an app that can change the way people use the internet.
Tell us about yourself:
I graduated college this year with a BS in Computer Science. I was lucky to get a job right out of school because of my past experience in the IT field. I am always willing to listen, learn, and teach.

MasterShake718 - *July 25, 2013, 6:55 pm*
Elaborate on your skillset: CEH / CPT, Security+, Network+ and CCNA Certified via InfoSecInstitute.com boot-camps.
Well versed in the following tools and pentesting methodologies-
Dsniff Suite, Aircrack-ng Suite, Metasploit / Armitage OpenVAS & Nessus.
Highly efficient in Information Reconnaissance and Footprinting

Tell us why you would be a valuable asset: I will be a great benefit to the group as council in terms of troubleshooting and helping out people on HF.

Elaborate on your achievements and future goals: Broke into a corporate verizon store via an un-secure 802.11 WEP encryption, installed SSH servers on their servers and registers, went inside the store to show the Manager my findings, corrected the security defects, and was sent a letter of recognition from Verizon Corporate HQ. Future goals include finishing my studies and certificates, obtaining an LLC and starting my own private Pentesting Consulting firm.

Tell us about yourself: 26/m/NYC , DJ, 7-11 clerk, and repair tech at a local computer repair shop. My dad worked as the CIO for an energy company in NYC since birth, and always brought computers home since i was born. I was dialing into EFnet BBS systems via HyperTerminal and blue-box phreaking at age 6, and taking apart and rebuilding desktops fully from scratch by the time i was 8. My role models include Kevin Mitnick, Adrian Lamo, Edward Snowden, Julian Assange, and, of course, Richard Stallman.

I hope you look upon my application favorably. Thank you for your time and I look forward to hearing back from you guys. Take care.
EDIT: Besides linux bash scripting, i am coding illiterate. Not here to lie and show off. Just being honest and detailing my exact skillset.
EDIT #2: Catch me on irc.freenode.net as MasterShake. I'm usually hanging out in #anapnea, #darkf, and #33012013 as i took place in the 2013 Cicada 3301 recruitment exam, although to no avail.

Tell us about yourself:
I longboard, Skateboard, SE (on professional terms), jack (on professional terms), and I play many sports.

Hacking:
The few items I can hack: Skypes, Instagrams, Twitters.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Social Engineering:
I have great communication skill, I have SE'd iPhones, Xboxs, Video games, Clothing, Accessories.

Playb0y - *July 27, 2013, 1:25 am*

Tuques Application
Skill set
I have a wide variety of skills, I'm mainly focused on RAT'ing and e-whore'ing. I also am trying to start to be more active in the "White hat section". I really like to help other members with there computer problems, and getting started RAT'ing. I can also provide members with good money making strategies. I'm a successful e-whore also. I can also work my way around SQL pretty good. So I consider myself a well- rounded person that is good at what I can do. I'm also very willing to try new things and learn almost anything. Why I could be a valuable asset I think I could be a very valuable asset to this group because of the knowledge, I mentioned earlier. I can teach and assest members with anything I'm capable of. Helping people on HF is one of my favorite things to take part in. I'm a professional mature person also. I provide the group with my skill set 100%. I also

provide money to other legion members if they are in need of it for starting a service or company. I like to invest in things so I can see how they will turn out. But the only people that I would help out financialy are other legion members, because I have been scammed twice for people making booters. I'm a great person once you get to know me. I can be a great friend to anyone. I would love to make some new buddies that I can teach and or can be taught in anyway myself My accomplishments and future goals Well when I stumbled upon hack forums, I pretty much knew how to absolutely squat. I was just a person that wanted to learn. So far I have became very good at spreading, e-whore'ing, and SQL. SQL was the hardest for me though I struggled in that quite a bit, but putting hours into learning it; I have it down pretty well. Some of my future goals are to become a massive spreader, and to release some e-books for e-whoreing, SQL, and one that I have started, RAT'ing and spreading for beginners. I would also like to invest in something that actually becomes well known throughout HF, I think that would just be so satisfying being able to say, " I was a important part in founding "something" ". Tell us about yourself
Well... Where to start. I'm a normal person that loves to learn new things and to put my 100% effort into everything. I'm a very kind person, most people I get to know end up really liking me. I like to go to the towns skate park and bike. I'm decent at that since I have been into it since I was 6. I also like to spend a lot of time on the interwebz, mainly browsing HF. I'm a well tempered person, I'm also very patient and kind. Least that is what I have been told.

Well I hope you enjoyed my application
Best regards, Tuque
Sorry for the edit it got posted twice.

[img]http://img838.imageshack.us/img838/3406/ota7.jpg[/img]

Elaborate on your skillset:

I'm currently learning VB so I can code my own programs and programs for other people. I'm a pretty good doxer to be honest I can dox most people with the littlest information. I can code websites using HTML.

[img]http://img838.imageshack.us/img838/3406/ota7.jpg[/img]

Tell us why you would be a valuable asset:

I think I would be a great asset to the group because im willing, friendly and I can help with every project Legion choose to do, I'm also very active, And don't ask questions when told to do something.

[img]http://img838.imageshack.us/img838/3406/ota7.jpg[/img]

Elaborate on your achievements and future goals:

I have achieved great earnings in E-WHORE and I hope to get great earnings by using PPD. I also hope to code many programs such as a MultiTool that has a crypter, keylogger, spoofer, binder all in one program. I also hope to build a program that can change you computer fan settings with out

going to the BIAS or using a program for your fan.

[img]http://img838.imageshack.us/img838/3406/ota7.jpg[/img]

Tell us about yourself:

Im 14 years old and live in England, Many people know me as B0RNE. Everyday as a kid I used to watch my step dad on his computer he was amazing at using them, he was constantly in the Linux terminal throwing commands on there and learning new things. And I was so amazed, and ever since then I have been interested in computers, coding/hacking.

[img]http://img838.imageshack.us/img838/3406/ota7.jpg[/img]

Saurfang - *July 27, 2013, 2:53 am*

Elaborate on your skillset:
I am a security enthusiast, and have deep knowledge of occult computing, forensic combating, and anonymization. I am thoroughly invested in privacy and therefor have spent a lot of time furthering my knowledge of computer security to protect said investment; whether it be encryption, anti-forensics, anonymization tactics, or other things of that nature. I also have decent capabilities in HTML/CSS, and a beginners knowledge in Python. I am respectable in both Photoshop and video editing (in programs such as Sony Vegas). I also possess the ability to type at 80+ words per minute.

Tell us why you would be a valuable asset:
My knowledge in occult computing and digital security could prove useful if ever needed, I am capable of giving security advice or removing even the most persistent of malware from a users computer. Furthermore, I currently in the process of expanding my programming knowledge (I shall be attending college for Software Engineering), and could serve as a coder for the group in the foreseeable future. I could assist with graphical design if needed and could also assist in any cinematic editing being done.

Elaborate on your achievements and future goals:
I have created several threads containing security tutorials in attempt to help better the community, the most notable of which would be my original Anti-Forensics Guide, which has received 560 replies and 26,500 views. I am also an author at r00t3r.com. My future goals include efficiently learning all major programming languages, developing a successful website, and creating my own video game. I also plan on developing software to automate the process described in my anti-forensics guide (and endeavor I hoped I would have finished a while ago, but had to delay due to my business).

Tell us about yourself:
Outside of the forums, I attend a vocational school, where I spend every other week of my school year attending a Computer Programming and Web Development class; last year (my Freshman year) I received an award for 'Best in Class'. I will be attending this class for the next three years of my life; there I will learn languages such as Javascript, PHP, C#, C++, Java, Python, et-cetera. When I am finished I plan on attending college for Software Engineering and making a career for myself in programming.

Z0mbie. - *July 27, 2013, 5:08 am*

Alright guys , recruitment is still open and looking forward to reading some good applications.

Understalker - *July 27, 2013, 10:07 am*

If anyone has questions regarding Legion or anything related to the topic feel free to throw me a PM

and I will respond as soon as possible.

DIAMNXDS - *July 27, 2013, 2:50 pm*

Elaborate on Your Skillset:

(Graphics Design)
I am 17 years old and a graphics designer, I tend to make free designs and sometimes payed designs but at an expensive cost. I have not been on Hackforums for very long so I may not be as trusted as alot of people but I assure you my skills are top notch. I worked for a company called Privax (www.hidemyass.com) and I did alot of their websites design work. I only want to join this group to contribute my graphics for free and become alot more trusted within the Hackforums community. I specialize in Website design, GUI (Graphical User Interface), banners (signatures) and thread designs.

(Social Engineering)
To some degree I'd say I am an expert in social engineering, I have so far SE'd (Social Engineered) 4 Kindle Fires, I don't know how many meals from Fast Food shops such as Mcdonalds and a Sony VAIO laptop. The main reason I believe I'm good at social engineering is because I've studied psychology for around 1 year now and I believe to know most human responses such as hints of a lie, how the brain functions and mental states such as feeling emotionally cornered and anti social behavior. My home language is also not English so sorry if some times I don't make sense.

(E-Whoring)
I am very knowledgeable about E-Whoring though I don't use it anymore I have many paid eBooks and prior experience of e-whoring. I've currently made $650+ with E-Whoring in the past 2 years (I have only e-whored for 2 around months). The only reason I started was to make some quick cash and then I realized this could turn in to a full time job if I wanted but I would much rather have a job which paid me consistently rather than having my paycheck rely on a perverts decision on whether to pay or not. My home language is also not English so sorry if some times I don't make sense.

Tell us why you would be a valuable asset:

(Giveaways & Help)
I will be a valuable asset because I will produce free graphics and help other members within the group with graphics, I can also give away many different eBooks that will be very helpful. I will try to make giveaways every month for accounts, graphics or money once I have upgraded in the near future. I will also design graphics for Legion (free of charge). My home language is also not English so sorry if some times I don't make sense.

Elaborate on your achievements and future goals:

(Achievements)
• I designed for a large company (Privax),
• I have contributed to the Hackforums by giving them the link to a website which gives very high quality PSDs (365psds.com)

• I joined Hack Forums
• Social Engineered over $250 worth of items
• E-Whored $650
• I have applied for a High Quality Group
• Became a high quality designer

(Future Goals)
My goals and ambitions are to become an extremely trusted and high quality graphics designer. I want to create a business for my graphics on Hackforums such as Calibur has done. I want to join a high quality group like Legion and finally I want to reach 1,000 posts. My home language is also not English so sorry if some times I don't make sense.

Tell us about yourself:

My name is Zunaid, I'm 17 years old from the United Kingdom (England). I like to play Football in my spare times and I take up Graphics as my hobby, I am a very chilled out person and tend to keep my cool but I still have a lot of fun while at it. My home language is also not English so sorry if some times I don't make sense.

Thank you for reading my application!

Fiery - *July 27, 2013, 5:57 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

Ratting / Keylogging / Phishers

Although I do not do this at the moment, I have experience in ratting, phishing, and keylogging. Just over a year ago I joined this forum, I joined it for the same reason that most people did... to learn how to "hack". I started off with basic phishers that I made using templates that I found off of youtube videos. After a while, I became a lot better at them and began to make my own. I started to make programs that would be a phisher instead of just websites. When this got boring, and didn't bring in enough profit depending on what it was, I began using keyloggers. This was still pretty basic, and I would use them to keylog players of video games so that I would be able to take their things, this is where it got harder and social engineering also came into play. I learned about rats a few months later, and was really skeptical about them. I never knew how I would do it, and always thought of it being too complicated. I read a guide here on HF on how to setup a rat, and within a few hours I had my own crypter, jdb, domain name, and dark-comet all setup. I guess I got extremely lucky as I had some people from HF added on Skype, they just kind of gave me stuff for my in game currencies in games like RuneScape. I didn't have any real money at this point so I couldn't buy anything from the marketplace here on HF. Within the next week I came up with my own methods on how to successfully get the audience that I wanted on my RAT, and it brought huge profits. Around summer time last year is when I began Ratting, I would just do it casually, as everything would be setup at a friends house and I would only be able to manage it whenever I went over there. By the end of the summer I went from having nothing in the games that I played to being quite wealthy. I never went bigger than games however I had many opportunities to card, steal CC info, paypal, etc. I'm not listing this as a way to brag that I got items on a game because that doesn't really matter at all. However, throughout this whole ratting scene I became really familiar with how to set them up, the problems you will face, how to remove them, and I got a lot of knowledge on

crypters, jdb's, rats in general.

Social Engineering

This kind of ties in with ratting, keylogging, and phishing. The best way to actually get results from ratting was to social engineer people to somehow download + execute your server. Just posting a youtube video never really got you much. I don't have much skill in this as I do not social engineer companies, I have some experience in social engineering in general. Just getting people to do what you want. I made a guide for social engineering in the months when I first came to this fourm. Sadly it's not up anymore as I deleted the thread since I don't have the download link anymore, you can see the first rep's that I ever got they were from that guide. It was a guide on social engineering and just basic how to get people in games to download + execute your rat in various ways. I gave it out for free in the freebies section.

Video Editing

I used to make call of duty videos around 2 years ago till last year around December. I was into the whole trick-shotting type scene and I started to edit videos. I got pretty good at them and continued, I have some videos on my YouTube channel but I don't upload anything anymore. I have a pretty good understanding on how to use Adobe After Effects, Sony Vegas Pro, Boujou, and Cinema 4D. If you like you can PM me and I will show you the YouTube videos.

Online Money Making

I have methods of making money online. I started around mid-may, and have been busy for most of the summer, just hanging out with friends and such. But throughout Mid May - End of June I made around 1500$ online. Most of it was autopilot, and I didn't have to work that much at all. A lot of the time I would just be making money while at school doing nothing. I have an eBook that I am planning on releasing in the future here on HF around making money online, however I don't have time to manage it at the moment and will probably release it around late August.
I hope to continue making money online so that I would have enough money when I'm older and I don't need to get a part-time job like most people do around College / University time.

Gaming

I consider this more of a hobby, but I guess it could be a skill. I like to game quite a bit. My favorite games are League of Legends, Call of Duty, GTA, Bioshock: Infinite, Counter Strike 1.6, Counter Strike Source, Counter Strike Global Offensive, Minecraft. I used to trick-shot on Call of Duty on the XBOX 360, and I have my own HD PVR to record Xbox 360 game-play. I had my own clan back when I used to trick-shot, and we were going pretty good until things crashed. We only released two videos but they got around 1,000-3,000 views, hundreds of likes, a lot of comments, favorites, and we were around 500 subscribers. This was all legit and happened in the course of two weeks.

GFX

Also around when I used to trick-shot, and video edit; I did very basic GFX. I know basic concepts and am looking to expand on them during the summer, and in the future. I am just listing this because in the future I will have a larger GFX skill, however at the moment it's pretty basic.

Tell us why you would be a valuable asset:

I love being in communities, I feel that everyone benefits and this would be the case. As I expand my knowledge throughout my current skills and learning new skills, I will also be able to expand

them to the group. I see it as the group would help me grow, and as I grow I would also help the group grow if that makes sense. What I'm trying to say is that as I learn new things, I will try to give back based on what skills I have and what I can do for the group. This can be guides, general help with rats, help with removing them, social engineering, video editing if anyone is into that, and whatever else I can bring to the table.

Elaborate on your achievements and future goals:

My current achievements and goals revolve around money making, and learning new things. I see my online money making progress as an achievement. It's not much, but to me it is. I hope to continue making money online and expand so that I would have enough money to be comfortable when going to college / university, and hopefully not have to get any loans. Also maybe get a car when I'm old enough. My main goals are to learn new things whether they be online money making, coding, GFX, and anything else that I find of interest. Also my main goal is to work for Microsoft when I get older, and study Computer Science in University. I find this to be realistic because I have family there and I know exactly what I need to do to get there.

Tell us about yourself:

In short: I'm just your average 14 year old kid who likes to do stuff on the computer. I spend a lot of time on the computer but love to be social. I took an interest in computers at a young age, it just runs through the family. Everyone in my family has a job with computers. My biggest goal is to work for Microsoft after I get my degree in Computer Science in University. For now, I will keep making money online, learning new things, and expand on my skill-set to just overall be a better person.

Thanks for reading my application (:

Dialga - *July 27, 2013, 7:01 pm*

[img]http://img853.imageshack.us/img853/4854/6t3a.png[/img]
Let's start off with Hacking related skills...
DoS and DDoS - I understand how DoS and DDoS works and how it cripples networks and servers.
One of the first things I learned was how stressers and booters work. I usually don't bother with this part of hacking due to the lack of use.

RATs - RATs, the fun stuff. One of my most knowledgeable sections, I RAT every now and then but I don't do it for long periods of time due to it's lack of importance. I understand everything about RATs, I know how to set them up , keep your server stable and not loose slaves. I enjoy using them as well, especially BlackShades (my favorite RAT).

Keylogging - One of the first things I learned. I really enjoyed spreading my virus and collecting keystrokes, I used to steal FBs and e-Mails for the lulz. Skid stuff, thing of the past, although it's a good skill to have if you need to jack an enemies password or log a computers keystrokes at your school.

Website Hacking - When it comes to website hacking , I do a lot of it, mainly SQLi and some XSS.

I started doing SQLi around a year ago. I read several tutorials and even the SQLi Encyclopedia by Anonymous. When I first began hacking websites I would deface them, now whenever I do get into a site that had an SQLi Vulnrablilty I exploit it and either r00t the server or make some pages a redirect to my server or a survey page. I want to continue to learn more and more about website hacking, including LFI and RFI.

Social Engineering - I do a lot of SEing weather it involves me trying to get free stuff or manipulating people, I use social engineering as a life hacking skill and it's great. I am currently active on 2 social engineering forums as well.

e-Whoring - I do a lot of e-whoring, mainly because it's a great way to earn cash fast! I usually make about $30 a day when I work hard at it, I use private methods and a private VCW for all my e-whoring.

Linux Computing - I do a lot of computing (obviously) , I really enjoy messing around in the Linux terminal and using lot's of the tools in Linux to help me with Pentesting. I want to learn more and more about the Linux and Unix operating systems

Wifi WPA WEP Bluetooth 4G LTE Wireless Hacking - WiFi cracking is something I am new to, I just learned how to crack WEP and WPA about a month ago. I really enjoy cracking my neighbors WiFi and intercepting handshakes. Cool stuff.

Pentesting and Forensics - One of my favorite subjects. I am in the process of learning Pentesting and I find the whole idea very interesting and it's something I really want to get good at.

I am now going to transition to my non-hacking related skillset...
Website Development

HTML - Full knowledge on HTML and HTML5.

CSS - Basic knowledge how cascading style sheets work and how to use them to make your web pages better and more artistic.

Javascript - Currently learning the basics of Javascript.

Computer Overclocking, Customizing and Hardware - One of my favorite subjects, why? I love building gaming computers and Overclocking my builds. I really have a passion for hardware, whether its physical servers or computers in general.

Networking - For some reason I really enjoy learning about servers and how networks work, I took a broad Cisco course and I really got interested in networking.

[img]http://img401.imageshack.us/img401/1369/rnjo.png[/img]
The advantages that the group could have if my presence was included would be very prosperous. I am a very helpful member who is very active. On all previous groups I have been in I would post a lot and help all my fellow members. I also want to develop some HQ tutorials and e-books involving hacking and Pentesting (very important goal for my involvement in Legion).

[img]http://img832.imageshack.us/img832/1594/0i7z.png[/img]
My goals for the future are to learn as much as I can. I want to be proficient in several levels of security. I also want to learn Javascript and PHP fully. I also want to learn from others in Legion so that I can improve my existing skillset for the better, one of my major goals is to start up my web designing service which I would freelance on HF and off site. I also want to develop a good understanding of Linux and Unix systems. Another thing I want to do is start more projects on HF such as tools and e-books that will be HQ and cheap.

About Myself:

I am a very creative and hard working person, pretty much I will always put hardwork and dedication into anything I want to learn or do. I also like to excessive and perform outdoor activities just to keep my mind and body healthy and have fun. I have been on HF for a couple years and I can't express the level of knowledge I have gained through this site and the awesome people I have met. I plan on working harder and harder so that one day I can live my personal dream.

Internap. - *July 28, 2013, 12:11 am*
Elaborate on your skillset:
Web Development
> I'm not very active in the coding sections of HF but in my free time I like to make money by going on elance and completing PHP, HTML + CSS jobs for people.
> The languages I currently know are PHP, HTML, CSS, and Visual Basic. The only major things I've coded in PHP was a custom source for my upcoming stresser. Instead of utilizing the traditional SSH2 send commands it currently utilizes sockets making it easier to implement a stop button into it

and do a whole lot more while sutaining lag-free use of the attack server while attacks are sending.
> Another HUGE product that I used to sell on HF was called "iScanbox". It was a popular online scanner that scanned your files and told you if they were FUD or not.Xbox Gaming
> I've been playing Xbox LIVE for about 8 years now.
> I play Halo, Call of Duty, Source Games (TF2, Garrys Mod, CSS)
> I am amazing in Call of Duty and Halo. I've been playing Halo since H2.Stress Testing
> I have a lot of knowledge in the booter field. I know everything from greenshells to sending dos with a dedi. I started from shells and I have worked my way up to owning my own servers. I currently have 3 servers in Ecatel each sending upwards of 20Gbps each and I must say, I haven't been more impressed. I was around back when Prodigy Source was created. Let's just say I helped Prodigy le PHP noob back then :p

Tell us why you would be a valuable asset:

To start off I am 15 Years old and I think I'm very mature for my young age, I get along w/ others well and I am not judgmental. I also won't "lurk" around the group and just use the group for the bar I will constantly be try improving Legion and ensuring everyone in the group knows who I am. I actually never been in a HF group, but Legion seems like an amazing group to be in and I will be sure to contribute my listed skills to my fullest.

Elaborate on your achievements and future goals:

My future endeavors await me. In the future I hope to be able to code C++ like a boss and eventually deprecate PHP from my brain. PHP isn't really the best language to know but it's useful if you want to make money. I want to either learn C# or C++ due to the fact I'd like to try a shot at coding malware.

Tell us about yourself:

As I said previously, I'm 15 and I think I'm mature for my age. I like to play video games and code. I also like to hang out with my friends and prank call on Skype with the homies. I've been coding since I was 10 and made my first Visual Basic program. It was an Xbox LIVE account stealer LOL.

Graphic-design Tell us why you would be a valuable asset: I'm skilled and may be able to help improve the image of the group.
Elaborate on your achievements and future goals: I'm listed in Microsoft's security researcher bulletin, exploited many MyBB forums, and I'm well-known under another name.
Tell us about yourself: I'm very secretive. :3
Would you mind telling us what you're other well known name is?

Roger Waters - *July 28, 2013, 12:41 pm*

Elaborate on your skillset:
Gaming

I guess you could consider me a hardcore gamer, I'm always on Xbox playing many games such as Grand Theft Auto IV, Black Ops II,
and Halo 4. Along with just playing games I know how to modify the consoles themselves which include flashing, repairing and adding
in some LEDs in the consoles and controllers. I also compete in a tournament every now and then.

Networking and Computing

I am going into my senior year at a technical high school. My trade is Information Support Services and Networking. I this trade we learned about Windows, Linux, and Mac OS X operating systems as well as the hardware used on the computers that run on the computers that they run on. With this knowledge we learned how to troubleshoot problems that the computers had and fixed them. Along with computer hardware and software, we run the entire school's network. Using Cisco hardware (and the software on it called IOS) we programmed the network using routing and switching protocols such as RIP, EIGRP, OSPF and static routes. During my time at this school I've been student of the year twice in this because I was an outstanding student going beyond what everything else and accomplishing the tasks needed the pass the courses we took as well as the troubleshooting on our hardware and software for our PC's and Network equipment. Using this knowledge I am active in the computing section of this forum helping users on a daily basis.

Tell us why you would be a valuable asset:

I am active on a regular basis on this site and always helping those who need assistance in any way I can using prior knowledge and experience.

Elaborate on your achievements and future goals:

I am an Eagle Scout and Two time student of the year at my school.

Tell us about yourself:

I'm 17 and a gamer who is always looking to learn new things and help anyone who needs it, I am interested in computers, video games, and becoming friends with people whether it be in real life or on Hack Forums.

Puller - *July 28, 2013, 8:04 pm*

Elaborate on your skillset: Well I'm knowledgeable in sqli, xss, ssi, lfi,lfd, and graphic design. I'm interested and learning from this group more than anything as I believe my hacking and pentesting skills should be better. I'm also interested in meeting new people in this group.
Tell us why you would be a valuable asset: Well I'm a social person and can get along with others, I'm a quick learner so I'll most likely understand most of what anyone will teach me.
Elaborate on your achievements and future goals: I plan on being in the IT field and maybe minoring in cyber security in college. So far I've learned what I know from the internet and some people that I have met online.
Tell us about yourself: Well, I'm eager to learn whatever you have to offer. I hope this group can teach me new things that I don't know.

Pixeless - *July 28, 2013, 11:58 pm*

Elaborate on your skillset:I Am a expert at finding exploits on websites. I Currently have a exploit in sony, and i have found other significant exploits in big websites.
Tell us why you would be a valuable asset:I Am good at explaining/helping people who want to learn, as long as they listen and follow my direct instructions.
Elaborate on your achievements and future goals:Well achievement wise, i have exploited sites such as Viacom,Sony,Playspan, and possibly others. I Plan on creating a web based MMORPG

eventually, and i just want to see where my skills take me.
Tell us about yourself:I Am sort of a universal hacker i guess, I Just do what i am interested in. I Also Code, mostly in PHP. I Do some graphics. I Overall am all over the place, from gaming to coding.

Hazy - *July 29, 2013, 8:18 am*

Elaborate on your skillset:
I mainly focus on gathering personal information about people who can be considered a threat. I must say that I am pretty good at finding exploits in websites too. I've started using Cinema4D (3D Graphics design) approximately 1 year ago and must say that I'm pretty experienced with the tool, I mainly make 3D Signatures for friends but I can also do some modelling. I wouldn't consider Ratting as one of my skills as it doesn't take any skill to set up a Rat.

Tell us why you would be a valuable asset:
I'm a mature member and I believe you can conclude that by reading my posts. I am not a troll who makes useless posts or threads, and I will only post when necessary.
I can provide tutorials on Cinema4D and Doxing. I'll also make tutorials about things I will learn in the future.

Elaborate on your achievements and future goals:
I have learnt about most tools in Cinema4D so I can focus on other things Graphics related from now on.
I don't have much experience with Photoshop but plan on learning a lot about it in the near future.
I also plan on learning more about SQLI, XSS and Remote Exploiting in the future. I've started learning about it approximately 2 months ago.

Tell us about yourself:
I'm an 18 year old guy. I was born in Italy but I have now moved to the Netherlands. English is not my native language but my English is not bad at all. I played Soccer for 12 years until I dislocated my knee for the second time in May and was forced to quit playing. I will soon undergo surgery but my knee will never be the same.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Miami - *July 29, 2013, 8:53 am*

Elaborate on your skillset: Hmm, my skill set id have to say.. SQLi on small sites, im good with anything webdesign HTML-5 CSS-3 PHP n a little JavaS. I know many methods of making $ tho. Money is my strong spot love to make cash. All from the interwebs, 1 Trip to miami later 4,000$ Richer.

Tell us why you would be a valuable asset: i wouldn't use "Valuable" but id use "Good" i can bring funds to the group for activities, and jobs. I'm very active in small groups, i like to asses the situation and get things done.

Elaborate on your achievements and future goals: My very first achievement was coming up on 1000$ one night in Miami, (My money methods don't involve drugs.. thats a side adventure.) the first night i made a rack was a good night for me very proud of my self. But anyone with a brain knows $1000 is peanuts, so i expanded started pulling in 2-3K every Friday in Miami hella money. My future goals are to own a web design company and do small jobs on the side.

Tell us about yourself: I'm a friendly loving stoner, who gets along with everyone and will help a

friend in need when ever, Legion isent just a group it's a FAM and you always have to have your FAM's back no matter what. i love working on & with computers love finding new methods on the Internet and than using the methods to make a decent amount of cash with.

Understalker - *July 29, 2013, 1:00 pm*
Offering my assistance to those who have any questions regarding Legion or anything related to it.

Hfiascfidl - *July 29, 2013, 1:28 pm*

Elaborate on your skillset:
-RATing
I have done some RATing in my day. While I haven't it done it much recently I am still fully functional in how the system works. I have RAT'd many RS players and have aquired GP. I could set a RAT up in 5 minutes with ease as I have done it many times. I am familiar with the newest and most reliable RATs out now.

-Keylogging
I have always done keylogging as it is the most beneficial in my opinion. Best keylogging times was back in 02-04 when I was keylogging a guys "Runescape Bot" that he had uploaded to his website. I "gained" access to his site and keylogged his .exe and then he was selling/distributing my keylogger. So when people were getting jacked they thought it was him. I was making bank that time frame.

-Botnets
Botnets are very easy aswell. I used to run a few that you can't discuss here. Used HTTP because they are the easiest to maintain and checkup with while on mobile.

-Web Dev
Been developing themes and forums for awhile now. Have had successful forums (which I sold and went to crap). I am in process of making a very good one but I am not rushing it. I can setup MyBB in seconds and can help with just about anything HTML/CSS related. MyBB is my shit.

-Computing
I have been around computers since I was around 12 (10 years). I have done everything from software, hardware, troubleshooting, beginner programming, etc. I know computers like the back of my hand. Ask me anything and I will provide answers. Computers are my career and life.

-Social Engineering
This is to easy. I have made my way in multiple hosts with this. I have also done the usual BF3 SE, and other low end electronics.

-Forum Management
Been running forums for a while and I can show you how to do it the right way. No HF copies will get you anywhere. I will show you how to keep structure and stay in line.

-Forum Hacking
I may not be the best in this but I can do a few things to take down a site. I know the basics and have taken down 3-4 competing forums while creating my 2007rs.

Tell us why you would be a valuable asset:
I think I would be a valuable asset because I can help other members in all the aspects above. I can also help users in anything they need as I have great skills at learning quick and researching

problems. I am a active member who will always help other members and make sure they learn things the right way. I am always learning and I think this would be a great group to help me learn more and expand my knowledge.

Elaborate on your achievements and future goals:
My achievements have been alot with Runescape as that used to be my life for a good 6 years. I have had multiple PHAT sets which was all through the ways above. I have worked hard to create forums which I can provide through PM. I have learned a lot of things about computers in the years. I wouldn't say I am expert at one thing but I have great knowledge over everything.

My goals are to create a very huge forum that is getting hundreds of posts daily. This takes lots of hard work and I think my next forum will be that one. I also want to learn how to code Java and Obj-C very well so I can create Android and Apple apps. This would be a great money making method that would make me happy. I am going to be taking a Obj-C class in the next month which will either make or break me.

Tell us about yourself:
I started playing with computers when I was in the 11-12 age. Got hooked on Runescape Classic and that began my life. I played hardcore for hours. My mom bought a RS acc off eBay for me and I worked hard for 2 weeks straight to get a Dmed. After that the douche recovered it and lost all my work. Since then for 4 years after is where I learned my most as I was constantly attacking him with multiple ways (keylog, recovering, etc). After that I moved on to bigger things and now I am looking into monetizing. I am currently < 60 credits into a Bachelors in Computer and Information Science. I am 22 years old and have a good job.

Thank you for reading my application and I hope I can be a part of a great group.

Z??????????????eus - *July 29, 2013, 6:31 pm*

Elaborate on your skillset:
Gaming;
~ Competitive on xBox and Ps3
~ Clan battles/ team matches
~ Video editing

Web Building;
~ Basic knowledge
~ 2 years of HTML design from High School

Graphic;
~ Basic use of Photoshop
~ Still Learning some

Tell us why you would be a valuable asset:
I have maturity and can bring up members that are feeling down.

Elaborate on your achievements and future goals:
Sports;
~ Varsity Quarterback
~ Basketball and baseball "all-star"

~ Kept my team motivated during tough games and kept their heads held up when we lost

Tell us about yourself:
I am currently 17 years old, and living in the United States. I have been involved
in groups and related membership sites. Currently apart of
an Elite clan that plays xBox Live for fun. Nothing much else to add other than that I would love to join this group!

Darkwin - *July 29, 2013, 6:36 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Graphics
This was a main reason why I joined Hackforums, to advertise my graphics, get more sales and increase my skills in the art of
graphics. I have owned one graphics shop and I just started my second one. I have made a decent ammount of money off of it so fa
and I plan to do more graphics for the Hackforums community.

Gaming
I am not sure if this counts as a "skill" but I have a passion for gaming. I love mmorpg's such as Runescape specifically. I also really
love playing First Person Shooters on Xbox 360 such as Call of Duty and some puzzle games like Portal!

Web Development
I recently got into this, soon I will start up my website where I will upload all my graphics, sort of like my portfolio you could say.
Also I'm setting up my graphics forum called "Gfx Society" with a mate from HF. I hope to increase my knowledge in web
development and teach others.

Social Engineering
I have a decent amount of skill in this area. I have social engineered 4 or 5 gaming YouTube channels and I usually social engineer my
way out of getting in trouble at school. Social engineering is an amazing way to get things out of people and I hope I gain more skill in
this area.

Hacking
I have a decent amount of knowledge in this area also. I know how to do SQLi through backtrack, a bit of manual, or Havij, eithe
way works. Also I guess you could say RAT's fall into this area. I know how to RAT, I have my stub set up. I just haven't had time to
spread it.

Marketing
I started doing PTC but you need to have lots of referrals to make decent cash so I am working on that right now, also I got accepted
to a very nice PPD network (not allowed to mention name) recently so I will invest into PPD and hopefully make some profit. I will start eWhoring soon and I will try any other nice methods I run into.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I will be an active member and always try to be beneficial to Legion. Also I have a large skill set which I think that would benefit the
Legion community, make the group have more variety and give the Legion the most reputation on Hackforums.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
When I grow up I would like to go to college and study graphic design, I want to learn graphics to the best to my ability, I would like to work as a freelance designer and work from home. I believe I will have a good future in design since I am starting so young.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:
Well, I am a person who is very fascinated by how computers work, I love learning new things everyday! Even if they aren't related to computers. There is so much knowledge in the world and it is impossible to comprehend it all but I would like to learn as much as we can contain. I am turning 14 in 4 days and I want to thank you for reading through my application. Best of luck to everyone who applied. Thank you! Victoire

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
All credits go to: Citrus

gon4eva - *July 29, 2013, 7:51 pm*
Elaborate on your skillset: I personally have worked within a network security role for the last 18 months in a big global company that I contract for. I also develop software using primarily C++.

Tell us why you would be a valuable asset: I think I'd like to join this group to collaborate with others using my skill set with NetSec and software development, so in turn I hope existing members will be able to learn from me. I don't want to join a group for a fucking userbar or to post giveaways and follow 15,000 rules. I simply want to be a part of a group that represents my interests in life.

Elaborate on your achievements and future goals: Achievements so far? Hmm I guess within my work life I discovered multiple vulnerabilities within our corporate systems that gave me great recognition and a chance to get involved in exciting new projects. Within my "online" life so to speak I released my first product on Hack Forums, a ring3 RootKit that I hope becomes successful.

Tell us about yourself: My name is Sam, I'm 19 and I live in England, (not Australia). I'm not going to bullshit you and say I'm some sort of amazing guy, I have my short falls, primarily a low tolerance of drama and lying but overall I just like to learn.

I wasn't planning creating a long application with fancy graphics but this doesn't mean I don't want to join up, I look forward to hearing from the leaders and hopefully becoming a part of the group, perhaps even collaborate with some Legion members to develop products or conduct research.

Assailant - *July 29, 2013, 9:15 pm*
Elaborate on your skillset:
Computer Skills
- Fixing software conflicts

- Repairing computer hardware
- Understanding the problems of data security

YouTube/Gaming
- Basic game development
- Competitive tournaments
- Video editing and producing

Graphic Design
- Website development
- Simple HTML coding
- Precise attention to detail

Management
- Communication skills
- Critical thinking and judgements
- Project management

Tell us why you would be a valuable asset:
I personally think that I would be a valuable asset to Legion due to a numerous amount of justifications. Firstly, I'm a very confident and genuine person, I'm very open when it comes to my feelings or decisions,
if I agree or disagree with something I will say it out loud with a reason why to justify my point.

Secondly, I have the ability to speak clearly, persuasively, and forcefully in front of an audience, whether
it's an audience of 1 or of thousands.

Thirdly, I would class myself as a great salesman, I always get the most I can out of the customer also assuring
that they are happy too, a happy customer provokes an unhappy business.

Elaborate on your achievements and future goals:
My main achievements in life so far would be getting accepted onto a superb Game development course
at a local college where I live, the college has an incredible reputation for being one of the best at the current time.
An achievement on HackForums would be met if I join Legion.

I have many future long term and short term goals, but the main goal I strive to complete would be to
own my own Gaming company, developing games.

Tell us about yourself:
My name is Brad, I'm 17 and would class myself as an all round nice chap. I'm a good listener and would like to
think of myself as a good friend. I'm a very strong person, if I want something I'll do everything in my power to get it, or get to where I want to be.
Take this application as an example, Legion has always been one of the groups I've wanted to join, if I fail
to succeed this time, then I'll give it another go, and another go and just keep going until I eventually have my
target rapped up in a blanket.

I love to game, gaming has been one of my passions since I received my first ever console (Playstation 1) the
good old days.. I've moved on from just playing games, now I am in the process of creating them, I'm still on
a basic level, but with the time and effort I will conceal my goal.

Last but not least, like most members on here I love to make money. My little life on HackForums evolves
around making money, of course I enjoy talking to people on here, learning new things and helping other people
out, but making money is one of my main concerns here on HackForums.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
A little extra on the side:Thank you for reviewing my application, hope to speak soon! ?

M0dy - *July 29, 2013, 10:18 pm*

Elaborate on your skillset:

? Windows TSC
Well, I didn't know how to name this one, but I'm extremely good at troubleshooting on Windows and do general computing.
I also have a good knowledge on how to remove malwares.

? RAT
I'm very experienced when it comes to RATs and I have my ways of figuring out how to use similar hacking software.

? Graphics
I'm not a professional, but I consider myself decent at graphics. I've been doing graphics for few years now and I know my way around Photoshop.

? Coding
I'm not a very experienced programmer, but I know some things when it comes to C#. I started C# like 4 months ago, so, I'm a novice, be gentle.

? Web Development
I'm not a big fan of it, however, I know some things when it comes to web development.

Tell us why you would be a valuable asset:

I assure you that I'll be a valuable asset to the group simply because of my dedication and ambition for wonders of hacking.
I'm a quick learner, I do not spam with questions and I'd rather learn on my own than bug others for help, I'm an active member and I'm available all the time, I'm well mannered and friendly, organized and I enjoy helping others.
I'm not an extremely experienced individual, however, you can rest, assured that I'll contribute to the group in any way possible. I hope you'll take me into consideration.

Elaborate on your achievements and future goals:

I'm not a novice, but I didn't have much time to work on my projects and make them more complex. Now, I am left with no achievements that I would be proud enough to share. However, I'll keep on learning and, hopefully, one day, I'll be able to show you something I did.
My goals were unknown for sometime now, however, I extremely enjoy programming and hacking. Also, I love to learn all sorts of things and I'd love to be one of those people who would watch technology rise and become more and more complex as well as helping it evolve.

Tell us about yourself:

My alias is Mody and I'm 23. I'm a pretty normal human being. I have an auto accessories store in which I work most of the day.
As for my education, I finished two colleges. Law and Information Technology, to be precise. Sadly, none of them were what I expected.
I dislike a few things: People that lie all the time, people with ugly personalities, selfish people.
I stated most of my likes in previous answers, but I'll add some more anyway: Animals, helping, modesty etc. As for bad habits of mine, I'm trying to quit smoking.

SN?C? - *July 30, 2013, 12:31 am*

Elaborate on your skillset:
RAT It was a rough start to the start of my RAT journey.. When I first started I didn't really know what to do. After receiving a little help from some members I began playing around with them. The best RAT i've used so far is probably DarkComet, although it can be buggy I love the layout and it's easy to use.
E-Whoring This is one of my preferred ways of making money. It is quick and easy and if you have a good method you can make a fair bit of cash. The reason I prefer this method of making money is because 1. It's fun seeing who is actually stupid enough to pay for Cam Shows from someone they don't even know. 2. You give the VCW a command and then you sit back and relax.
Graphics This is not my strong point, although I am able to make a decent project. I love using the program Inventor though, I find it interesting and I am currently taking classes on how to use it. There's not really much else to say on this point.
Gaming I love to game although I don't game as much as I used to. I would like to play more games but currently i'm learning new things which is great!
SQLi In my eyes I know basic SQLi but I would love to learn more, I believe I could really excel at this if I set my mind on it.
Keylogging I never really got into the Keylogging scene, I used Project Neptune for about two days but it bored me to death with the limited options you have, this is why I like using RATs more than Keyloggers, as RATs have a lot more options than Keyloggers do.
Social Engineering This is something I see myself being quite good at, not the best but quite good. I probably use Social Engineering every day not only on the online world but in my Social life as well.
Doxing This is something I think i'm decent at, but not a master (yet haha). I have used this skill to help friends out in real life e.g :
One of my friends was being bullied by a certain someone, I found out where he worked and where he lived.. I was unable to get his phone number as it was a private number. If you would like a text document of this I would be happy to hand it over to you.
Tell us why you would be a valuable asset:
1. I am a team player.
2. I respect everyone as long as I get the same treatment.
3. I am eager to learn.

4. I am trustworthy.
Elaborate on your achievements and future goals:
I would love to advance in the coding side of things as I lack much skill when it comes to this. I am eager to learn and I want to start with html as I know very little of it.
In real life currently my goal would be getting passing grades at the end of the school year.
Tell us about yourself:
I am a male who loves to learn new/interesting things. I love to game and talk with people. I currently have no job so I have a tonne of free time and i'm on many websites trying to learn new things every day.

BguyTheKing - *July 30, 2013, 6:03 am*
Elaborate on your skillset:
I am currently an independent security researcher and look around the websites of big companies for vulnerabilities. I am listed on AT&T's Hall of Fame. On the other hand I know how to code in Java, I got a score of 5/5 on my Advanced Placement Comp Sci course. I know some marketing too, I can promote products easily with some skills that I have acquired over the years. I have also mastered the science of social engineering and can talk people into doing almost anything. I have studied computer hardware and have a great interest in troubleshooting.

Tell us why you would be a valuable asset:
I am really good at public speaking and interaction. I would be a good representative for the group as I am good with people. A mixture of my social engineering skills and strong personality has given me the skill to communicate with people efficiently. This way I can represent Legion with a positive agenda and set a good example. I can also help educate other members on behalf of Legion to increase intellectuality among out peers

Elaborate on your achievements and future goals:
I have worked with many tech companies as I live in an area with high computer corp. presence. I have helped security teams of some companies to make their systems efficient and secure. I have received acknowledgement from AT&T for my work with them and I am waiting on the reward.
My future goals include expanding my knowledge not just about Computers but about being a well-rounded human being. Gaining knowledge and helping others is a passion I have and it's something I wish to make a big part of my life.

Tell us about yourself:
I am in my late teens, living in California. I am fluent in many languages and have lived in several different countries. So, I have been exposed to different cultures which has enabled me to connect with almost anyone.

Also, you might see a -rep from some guy who accused me of sending him hacked funds. That is a complete false statement because in reality he was the one who scammed me and then -rep'd me in revenge as I got my money back.

Thanks!

DarkFlux™ - *July 30, 2013, 8:19 am*
Remember We see the Content First Then the Appearance of your post ! be sure to keep good information !

Understalker - *July 30, 2013, 8:19 am*
Great applications so far, if anyone has any questions please PM me.

Do not PM me about your application and what you should add/edit to it. You will be ignored.

Sweegy - *July 30, 2013, 1:04 pm*

Elaborate on your skillset:

Helping people
To Innovate
Monetizing (PPD/CPA)
PC Hardware-knowledge
Maturity
Malware Removal
Website Administration
eWhoring
eBooks
Web Development.

Tell us why you would be a valuable asset:

I can contribute and help fellow members. I always try my best to give back to the community as I've been here since 2009 I've seen alot of people change and get older along with myself, I can also be a valuable asset with my PPD and Monetizing skills.

Elaborate on your achievements and future goals:

My goals are to enjoy HackForums and the community and build my account to a position that I'm happy with, I also want to improve my knowledge coding, and make more profit from my services.

Tell us about yourself:

I'm 19 years old
I'm a pretty quite and friendly guy, I help people in area's that I can and always strive to improve my knowledge of situations. I have no scam reports and also only 1 -rep, for telling a guy he posted twice.

- Sorry my application isn't fancy, I don't believe in using other peoples designs for my own application.
- Good luck to all applying.

Nimbus. - *July 30, 2013, 1:27 pm*

Elaborate on your skillset: Im very good at marketing in my opinion. My ebook has made 5 sales in 1 day and a few sales per week. my marketing skills are getting better and better. i think i could be a good student in legion.
Tell us why you would be a valuable asset: im at the computer almost 6-10 hours a day. i can help with various things. i can help sell items, respond to questions, or reply to tickets. i also enjoy helping others allot and im on in different time zones which can be great thing for foreign people that need help.
Elaborate on your achievements and future goals: one of my goals is to try and make $10,000 in 2 years on hf. i also wanna start my own stresser.
Tell us about yourself: i like to learn new simple things on the internet. at the moment i like to play xbox but i switch from mmorpgs to xbox all the time. but now i like to stay on hf and read around. i always love to find interesting reads science related etc.

Sheriff - *July 30, 2013, 4:10 pm*

Elaborate on your skillset: I know a little bit in C++ and VB i also making hacks for Crossfire game

and i have a 3 years hosting management and webmastering experience too.
Tell us why you would be a valuable asset: I can help the group members in C++ and Webmastering too, i didn't apply to Legion for a userbar and things like that no but i applied because i am feeling like i want to help more members.
Elaborate on your achievements and future goals: I have many future goals like Growing up my forum and about the achievements i made a webhosting company from scratch and it was getting 50+ sales per day.
Tell us about yourself: I am an Egyptian 16 years old male who love to help members and who like to learn new things.

Project Evolution - *July 30, 2013, 9:30 pm*
Elaborate on your skillset: Stressers, Admin Templates, Bruteforcing, Firewalls, Anti-Virus, Amplification, Remote Administration Tools, Denial of Service, CHARGEN, Attack Scripts, Java Drive-By, MySQL/Database Managment, Adsence, VPN, PHP, HTML and CSS.
Tell us why you would be a valuable asset: I have a somewhat unique skillset when it comes to hacking, I personally believe hacking is more of an art than a skill. I've been learning and teaching fellow HackForums members since I registered on this forum, Answering questions in Beginner Hacking Section would be my main job on this forum, I tend to help fellow HackForums members in that section.
Elaborate on your achievements and future goals: I always have problems with this question, I don't tend to set goals in life, Though if I where to set some just for this particular application, one would be to get accepted into this group, If I happen to get denied I'll aim to get L33t or Ub3r and re-apply for Legion. I know there is no requirement to be upgraded to join Legion but I personally believe that it sure has a large impact on this particular application.
Tell us about yourself: My name is Connor, I'm currently in University studying for Bachelors of Information Technology/Science. I'm 18 years old and I've been on this forum for four years now. Although I look like a inactive member, I tend to lurk in the shadows, Often using the private message feature. I live in Australia where I go to the same university as another Legion member who I tend to speak to during break.

Although I shouldn't, I have lots of free time on my hands to do things I like, One of them being hacking and helping others on this forum and the other being working on my latest project, My new Ford.

Tom` - *July 30, 2013, 10:32 pm*
Elaborate on your skillset:
Social Engineering:
I am somewhat skilled at social engineering. This is one of the first things I picked up when I decided to start doing unorthodox things.

Web Development:
At 15, I went to university to start my IT course, with the end goal of obtaining a Diploma of Website Development. I studied for close to a year before becoming ill and having to leave. I still currently develop and design websites for small businesses.

Gaming
Some might not consider this a skill, but I think it takes at least some skill to do what I and many others do. I'm a competitive gamer on World of Warcraft (PVP) and a recreational-competitive player on Runescape.

Tell us why you would be a valuable asset: Whilst I don't have that many skills, I know a fair amount in those which I have listed, as well as having motivation to learn. I want to be in this group so I may extend my knowledge base, as well as helping others learn what I know.

Elaborate on your achievements and future goals: Within the next 12 months, I wish to have my web design/development company off the ground. I have already taken the appropriate steps to register my company in my country, I'm just waiting 6-12 months to find a few employees and save funds.
Tell us about yourself: My names Tom, I'm an 18 year old web developer/web designer from Perth, Australia. I currently pay my rent via. various online methods, as I'm not able to currently work full time due to health issues. I spend most of my time on the computer doing various things, including refining my development / programming skills.

Good luck to all. If you'd like me to elaborate on anything, feel free to PM me anonymous.

Duhoh - *July 31, 2013, 5:25 am*

Elaborate on your skillset: My knowledge is vast yet experienced. I have knowledge with a lot of programming languages such as Java, VB.net. I know C+, C++. I also know a lot about MySQL. I work a lot with Photoshop and video design, which at the moment is my main priority, seeing as I plan on going to school for that. I went to a summer computer class to learn more about Java, C+, C++, video game design, etc.
Tell us why you would be a valuable asset: I think I would be a great asset to legion to learn, yet share the things I know and can do. I want to contribute to the group just as much as the group could contribute to me. I have many tutorials to share with the group and I have plenty of knowledge to help out other users.
Elaborate on your achievements and future goals: My current achievements are that I have made an advanced website (nothing to fancy) during my time at the summer class. I have also made a miniature version of the well known game Mario. I have also done game design in Neverwinter (not the MMO). Also used things like 3ds max, etc.
Tell us about yourself: Well, if you get to know me I'm a nice person. I like to help people, I like to share what I know, and most of all, I like to learn. Learning new things each day is why I crave hack forums. The more you know, the better, and the more you know, the more you can share with other people.

Thanks for taking the time to review my application, and I hope you made the right decision.

Eaesi - *July 31, 2013, 8:19 am*

Elaborate on your skillset:
I myself am a graphic designer. Currently my main focus is on graphic designing, but I also am a web developer (fluent in XHTML, CSS, MySQL, PHP, and Javascript) and map/environmentalist developer (GTKRadiant). I have been coding/designing for over 6 years and have gone far with it. I plan to continue as well.
Tell us why you would be a valuable asset:
I think I would be a valuable asset to Legion because I can help promote and better benefit the group. I try to assist those who need it, and have also given away plenty of design templates free of charge in the graphic related sections. I'd love to assist users and give away resources in the name of Legion. I'd like to represent a group here on HackForums, and Legion is the one I find the most interesting as of now.
Elaborate on your achievements and future goals:
What I do plays a big part in my real life. It is one of my main sources of income. It plays a huge part. I am thinking of expanding and doing something bigger in real life with what I do. Honestly, I am still in the process of trying to figure out what, but I am thinking hard. Regarding my achievements, I have learned a lot. I remember when I was 13, I started my first private servers. For some reason, it was one of the first things I looked into roughly 3 months after just getting into computers in general. I started my own private server and didn't know anything. I thought, why not

learn how to code, and design, so I can manage everything myself, including the web portion of the server too! Roughly 1-2 years of practice, and I could do everything myself. My server grew and is still known to this day as one of the originals. I then moved on to a different game and that's where I got into map development. That's another story though!
Tell us about yourself:
Regarding up above, that also plays a big part in telling you about myself. I have learned so much on the internet, that it has brought me to where I am today. I am 19, and I own my own house, and I am engaged. Just 2 years ago I thought I'd be in jail and single! I am young and devoted to what I do. Yes, I have a life, but computer is a part of it. A big part. Aside from computer, I am generally an average guy. I like to party, I absolutely love xBox 360, and I smoke weed and drink probably on a bi weekly basis. ;) I'm not sure what else you'd like to know, but I surely hope this is enough. As previously stated, I love to be on HackForums and represent Legion. I'd do my best.

Thank you for reading all of this. I truly appreciate it. Now you all know a little about me!

FroStorm - *July 31, 2013, 12:18 pm*

Elaborate on your skillset:

Monetizing
I E-Whore, I have some experience with VCW's and the social engineering done in e-whoring.
I'm apart of a Premium shop inside the shop includes Steam, Netflix, VPN's, Hulu, Skype, and Spotify. The shop can be found here.
Gaming
I have been playing Minecraft since alpha.
I have been playing Call of Duty since Call of Duty 2.
GTA IV
Left 4 Dead 1 and 2
I played Runescape back in 2005-2006.
"Hacking"
I have been learning about-
RAT's
Booter's/the act of DDoS
Crypting, and encryption.
Tell us why you would be a valuable asset:

I believe I would be a good asset to Legion, because I strive to be the best that I can in any subject, whether it be hacking related or even in school. I have a great attitude towards learning. I also would like to add that I'm friendly and have a sense of humor.

Elaborate on your achievements and future goals:

My biggest goal for Hack Forums is becoming a mentor. Now as for real life, one goal I have is to make my high school's baseball team. I made it in middle school but I'm skeptical about high school.

Tell us about yourself:
First off, I'm thankful that I get this chance to join Legion. Also I would like to say I'm a loyal member, as you can see I joined a few days after 2011, and have been active ever since.

Heisenberg - *July 31, 2013, 4:18 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
Social Engineering:
Around 2 years ago I started to Social Engineer items, I was a very smooth talker, I would obtain items and sell them to my friends, and I kept doing that which allowed me to buy a lot of items I wanted. When it comes to talking my way out of bad situations, I can do it. Whenever I need to manipulate someone, well. It happens!

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Gaming:
Now, I know this isn't a skill, but it's more of a passion.
Around the age of 4, I started to play video games. I found an old N64 my brothers played and started to learn what gaming was and how to play it. Later down the road, I started playing the original xBox. I played GTA San Andreas (For my age San Andreas was terrible.) and when the Xbox 360 came around (Got it for christmas) I started playing that with Halo 3, after completing the campaign I started to play Xbox Live. From there on I learned how fun it was to game online, and online gaming became part of my life. I played everyday and it's helped me with socializing as I know how to have a decent conversation, which helped me with my skill of Social Engineering!

Graphics:

I am an okay artist when it comes to graphics.
My skills when it comes to Graphics:
Basic Use
I can make signatures/icons/thread designs.
I can use all the tools that are available.

I can cook Minute Rice in 53 seconds.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I'm a great guy, I have a great personality and when it comes to working or being a part of something I don't mess around, when I need to get something done and on time, I get it done. I can bring everything I can get to Legion, and will make sure to not half ass everything. I will respect everyone in the group regardless of if we get along or not, and the Legion will be like my family. You guys can count on me and I will NOT let you all down.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
I am pursuing a career in Graphics and I hope to learn how to code. I hope to get recognition on the forum and have a big impact on everyone (In a good way). I really do enjoy graphics, it makes me happy when people are satisfied with my work.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I'm a 14 Year old Canadian guy named Levi, I live in Canada, BC.
I enjoy graphics a lot! I do it on HF to make some extra money on the side and it makes me SUPER happy when I get compliments on my work, I'm also trying to do good. I was thinking of joining the

RCMP but do graphics as side work.

I want to be successful in my lifetime from hard work and dedication, like learning how to code programs everyone can use or just producing high quality work.

SIM-1361728 - *July 31, 2013, 7:16 pm*
Elaborate on your skillset:

graphics
- i'm not a pro but i can build a great banner
-Cinema 4D
- Adobe After Effect basic usage

Gaming
-Xbox modification
-PS3 Modification
-Wii Modification

Monentizing
-eBay France

Hacking
- Can exploit XSS, CSSRF, and other vulnerability
- Can create RAT/TROJAN/ And more
- can crypt Program

Web construction
-Can create a template
-Can build a forum, a website with css, and more

Tell us why you would be a valuable asset:
Well, i don't think if i can explain without fault, because, i'm french.
Right, i have a strong personality, i have a humour I'm someone you can trust, to listen to each one, I also like the anonymous movement. I parties to these people, the so-called Legion. Certainly this is not the United States but in France, but the movement is the same, I would also like to join as this will hold my heart, I do not want to have the reputation, but just as and more. My father was also partisant anonymous. As father, like son.
You know, we do not deserve some things without reason, and this is why I request you in all sincerity.
I am a kind, caring, which helps people who participate in transactions, short end, I have nothing else to say except that I really hope I get a positive response. Thank you in advance what may be the answer, just thank you for taking the time to read.

Elaborate on your achievements and future goals:
I would like to give an impact on this forum, I'd like to help as many people in trouble on the forum too. My plans are to work in network engineering, web development, network security, web server and I are working in hard time to my studies passionent me. I plan to live as soon as possible with my fiance who I am since the age of 8 years, more than 11 years this is my friend Petie, my fiance instead. That's all.

Tell us about yourself:
I call Alexis, I'm 19, I'm a computer enthusiast from a young age thanks to my father. Every year there enmener me the night of hack in Europe where he attended every year. The years passed and

my passion kept growing, and since it is increasing, this passion, this desire to créeer things make me "crazy". Crazy passion for computer creation.
I am currently studying (I do not mention you because it is not at all the same system in France) in network engineering, network security, web server & Web Development. I'd live with my fiance that I love so much is planned and we assemble together, I am a very helpful and sometimes too, I am a total partisant movement Anonymous, Being partisant this movement and participate in the operations, it is a need for all of us, for our private life and our freedom.
I'm not perfect, nobody is perfect. But I have a good character. =)

Thank you for reading, know that I do my best effort to know the language, but once again I'm french and it's hard for me to write perfectly, if you have a little indulgence to me for the spelling mistakes, I will be grateful.

thank you again

?harizard - *August 1, 2013, 8:25 am*
Elaborate on your skillset:

Coding:
I am not a good coder. I can code in Visual Basic, even though I probably cannot make something very useful, but I do like to make things that I will use. I can edit java code, but I cannot make my own from scratch. I can edit HTML code, however only edit. I plan on learning more.

Graphics:
I know basic photoshop, I can make pretty decent signatures, with animation. I don't want to toot my own horn, but I am what you could call an expert in ms paint. (:

Gaming

I play games competitively. Whether it is on my Xbox, or computer. I play games like red dead redemption, minecraft, grand theft auto, pokemon, skyrim, and some others. I am always open to games with others.

Tell us why you would be a valuable asset:

I think I would be valuable because I am a friendly person, I am easy to talk to. I am always open to learning. I may not be the best hacker, but I am still a fun person.

Elaborate on your achievements and future goals:
I, as much as the next l33t member want to get ub3r. I have already applied for it. I want to become a popular member here. I want to become one of those: "Oh look, there he is again!" type of members. Active in all sections, etc. I also want to learn how to hack. I only can spread tbh. I have 70 bots on my rat currently from one day of spreading.

Tell us about yourself: My name is Austin, or at least that is what I go by. I live in the state of Colorado. I enjoy playing Pokemon Showdown on my free time with some friends. I am an easily likeable person. I have a cat named Amber. She's really cute. If you want pictures, I may send you them. I have one sister, she is 17. I am a fan of Game of Thrones. I go by the saying: "Power is Power."[Video: http://www.youtube.com/watch?v=ifaRhL95HUM]

Moon Man - *August 1, 2013, 8:44 am*
Elaborate on your skillset: I'am a smart ethical person, I can code PHP, Java, and JavaScript very well. I also know ways to make money others don't. I can also use some of my social engineering

techniques to get things others cannot from others.
Tell us why you would be a valuable asset: I believe I would be a valuable asset because, I can do do things others cannot wether that be reverse engineering, social engineering, or coding. I know a lot of things about the human mind and can trick almost anyone to become my friend and then convince them to do something for me. I'am also educated in security systems, math, and computers; I know basically anything from hardware to software on a computer.
Elaborate on your achievements and future goals: I have been making steady money on my own methods, and have used my social engineering, and reverse engineering on 150+ last year. My future achievements will hopefully be for Legion and hopefully I can teach the Legion something they will remember forever.
Tell us about yourself: I'am a smart, ethical person that knows much in just about anything. I'm also a investor. I'm also really friendly and have talked to many Legion members in the past. I'm also very giving and help people whenever I can.

Sicarius - *August 1, 2013, 8:45 am*
Elaborate on your skillset:Coding:
I can code in Python, I have made a few auto clickers for things such as neobux, and a browser game bot. I recently lost all my work but if you would like to see proof I will gladly make a script. I am not the best but I can do the basics, and am currently learning.

Hardware
I built my first computer when I was about 11 years old. I done it from spare parts in my parents' internet cafe. I fidn hardware very interesting and believe that to do well in computers understanding the barebones is very important.

Computing
I have been on computers since I was 3 years old, playing strategy games etc. Ever since then I have been learning everything I can. I know a lot of little tips, tricks etc on computers and use that to my advantage.

Tell us why you would be a valuable asset:
I am a very dedicated person. When I enjoy something, or really want to learn something I will keep at it. I am always learning and I enjoy everything to do with computers.
Elaborate on your achievements and future goals:
Achievements, that's hard. I haven't got to any major milestones in my life, yet. I suppose building my first PC from scratch and learning to code basic tools in python, would be my best ones to do with computers.

Tell us about yourself:

Well, I'm your average 15 (almost 16) year old. I enjoy sleeping in 'till late, playing games etc. I just love computers. I haven't had the best time so far as a kid, my father nearly dieing, my familly having a hard time and recent events with my father being in prison and other personal issues haven't made the best of times. But I am a strong willed person and always overcome my problems/dilemas. I am very very passionate about computers, weather it be simply coding a stupid script, or learning how to crack WIFI I enjoy everything. I have never been very well accepted in real life, friends have never been my strong point. But I suppose tht's good, it means the friends I do have are good friends, I like working in a team/group. So any group projects you set would be rather fun for me, I assume.

Flaaffy - *August 1, 2013, 12:24 pm*
Anonymous is on holiday until the 6th of august, upon return he will review applications.

Sicarius - *August 1, 2013, 12:36 pm*

For gods sakes, I didn't c&p all of my post over (wrote it earlier). No editing is allowed at all right?

Why the hell didn't I think of that lol. Will delete it in a sec, thanks.

Blocked - *August 1, 2013, 1:50 pm*

Elaborate on your skillset:

Gaming-Ive been gaming since I was 8 when I got my Playstation 1, used to play Crash 24/7.

Xbox Mods: I have made my own JTAG and put custom LEDs in as well. For my controller I have made my own mod.

Gamebattles: I have been playing Gamebattles off and on for 4 years.

Communication- I have great speaking skills and listening skills I was the leader of a peer mediation group at my school. I have patience with anything I do.

Social Engineering- Ive been social engineering for about 2-3 years when I first heard about it in my Cisco curriculum. I have gotten a Xbox, speakers, shoes, beef jerky. PSP Vita.

Booters- I started "Hitting" when I was about 11. I used to use shells and think I was such a boss. The booting community has evolved so much since then, IRCs to Shells to using a VPS now the big think Stressers.

Graphics- I took a Arts class with Photoshop. I can due thread designs, not that well but I can. I mainly do photo manipulations.

Power Point- I have been doing power point for a long time. I have lots of knowledge in power point. It is fun helping my teaching with it to. They often ask me to help them with presentations.

Smart boards- I have been using smart boards for a year now this is what else my teachers ask me to help them with. They are great and I plan on getting one for my house.

Tell us why you would be a valuable asset:I think that I am a valuable assest because I can help people out where I can and I will sit there for a long period of time till I help that person solve their problem.

Elaborate on your achievements and future goals:When I was 14 I have a Cisco IT certification. I have a good head on my shoulders. My future plans for HF are to eventually get up to 1k posts and 300 rep. My real life goal I plan to go to College for studying Mental Health, I plan to get a PhD as well.

Tell us about yourself:My name is Matt and I am 16 and I have been on HF since 2011. I first came on here to sell gamertags. Then I took a liking to the Botnets and IRC section. I have expanded my knowledge with a wide variety of topics. Well im 16 I like to have fun and go fishing and ride my

Quad and listen to music.

Thanks for reading have a nice one.

alignment - *August 2, 2013, 3:04 am*
Elaborate on your skillset:

Remote Administration Tool
I know a lot about Remote Administration Tools.
I've even run multiple RAT setup/ help desks and received a lot of requests.
Rat's I am familiar with: Darkcomet, Black shades, jRat & Imminent Monitor (IM).

Marketing
I have acknowledged that the current Marketplace is a hard, hard way for beginners.
You need to pick up tips from others and develop a technique that you are the one that gets your product sold instead of the others. I am quite new but I'm learning quickly.

--

Tell us why you would be a valuable asset:
I will gain more knowledge and be able to spread/ share my knowledge later on by writing quality tutorials.

Elaborate on your achievements and future goals:
My friend and I are currently running a file protector. It takes a lot of smart tricks and moves to become successful In today's marketplace.
And I think we've managed that perfectly as of now.
We work hard for our goals, nothing but the best.
My future goals are simple, Become as perfect as overhead possible in any subject I put my time & energy in.

--

Tell us about yourself:
I am 14 1/2 soon 15, September 2nd.
I am 14 1/2 soon 15, September 2nd. I live in Norway, west coast. My name is Nicolai, Nico for short.

I live in a family of four where my dad is a successful businessman. He teaches me a lot about various things.
He owns a company within 'Shipping'.
I make $40 a day from selling stuff online and he is proud of me because he didn't even know it could work xD.

That is me in a nutshell.
Smile & nod

Thank you for reading.

Best regards

BeggFoMercy - *August 2, 2013, 2:49 pm*

Elaborate on your skillset: Website Vulnerabilities exploiting Im quite good in the most common Website Vulnerabilities exploiting Methods , I'm also good with SQL , PHP , HTML , Python and Bash .

I have been doing this for 2 years , since 2011 or so , I get to find that most of the talented/skilled Hackers in the Website vulnerability exploiting section are apart of "Legion" .

SQL(Structured Query Language) - Injection

Since i know how SQL databases work and worked with almost most of the types of the SQL databases (Oracle , MSSQL , Mysql) , And actually used to work on My own SQL database of my own Conquer online private server , So i actually know how SQL injection work and can get around its types such as (Error based , Double query , String based , Boolean based , Blind Injection , xPath , POST Sql Injection) Including WAF Bypassing , And also wrote some tutorials on Basic SQL injection , and Advanced ways to Bypass a WAF .

XSS(Cross Site Scripting)

I won't say im a super XSS researcher , But i think i know my way around XSS(Cross Site Scripting) So I can actually set my XSS Skill set to 40%~50%

LFI(Local File Inclusion)

Knowing LFI And mastering it isn't some thing that can be done/gained easily .

I know how to Launch an LFI attack by useing PHP://filter,PHP://input And LOGIN Poisoning

RFI(Remote File Inclusion)

RFI is rarely found this days , Because RFI Only works if url_allow_fopen() is allowed , And as far as security has been patched to a high level on the internet Most of the times url_allow_fopen() will be disabled , So its barely found , I also wrote a tutorial on how to exploit a RFI(Remote File Inclusion) Vulnerability .

And some other ways that i haven't mentioned/tricks yet , Ill also post some tutorials That i wrote my self from a scratch here .

Uploading shell useing MediaManager
Advanced Techniques of WAF Bypassing
How to load your shell useing RFI Vulnerability
My own Admin Page Finder done useing Python
Chain of Pentesting Tutorials - Part 1 (Introduction)
Chain of Pentesting Tutorials - Part 3 (SQLMAP)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I think that i will be valuable Because i love to teach and be taught and I will never stop learning as also nobody stops learning You will remain that student that will always learn even if your knowledge level is pretty higher than anyone . To be honest enough I'm applying in this Group because I want to learn/Teach and do some useful things to the group with the knowledge Have.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: I have alot of future-goals As so I will be studying IT&ComputerScience Because i love the field of Computing/Hacking/Programming , I'm also willing to level up my experience In the field of Security such as the Security for Website Scripts , Computers , Servers .

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: I'm the Geek guy that loves any thing that is electronic Specially Networking,Hacking,Exploiting for my own good And Security , I also spend my team looking for security breaches . Thats pretty much about me that could be told .

oz@bsd - *August 2, 2013, 3:23 pm*
Hello Legion,

My name is Cam, also known as Mint., and today I'm looking to apply for membership into your group. Legion. I'm 16 years old living in Canada attending school and this upcoming September will be the start of my first semester in grade 12. I mostly excel in Physics and Mathematics, which is no surprise consdering I come from a long line of engineers in the family. In my spare time I like to learn. Whether I'm learning that 54% of Americans drink coffee every morning, or whether I'm learning to program with a new scripting language, I enjoy it. I love most of all is talking with people, whether it's talking with people over skype, IRC, or in real life, it still interests me more then anything. I joined Hackforums recently, and hope to made a decent impact. Though it doesn't show, I am an upgraded User (Once my purchase is reviewed, hopefully not to long now).

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
As stated, I like to program and am currently learning C; I have decent knowledge with PhP, Python, and HTML/CSS, but I still want to advance to more complex programming in C/C++ as well as C#. There is no particular goal in mind when it comes to programming, only to know it, and hopefully master it and use it in a profession once I graduate from University. I guess you could say that is my goal. To graduate from university with my Masters in Computer Science. I don't know a lot about it now besides the basics, but I want to help millions of people by developing sofware, programs, aiding buisnesses and working for free. Many of you think it's stupid, but I view it as beneficial. Think of Craig, the founder of Free the children; not only is he wealthy, but he donates all his time and money to his organisation to bring clean and healthy water to third-world nations.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Currently I don't have a lot of great accomplishments yet, I made mad income off other forums trading gold I got from my botfarm for about a year, but it's now gone; wasted on future investments I had in mind or scammed from different people I've came across. One goal still remains. The goal to learn. I can't stress enough how much fun it is to learn to program, I have a mini-library in my room composed of tutorials and how-to's from networking, computing, linux, to programming.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
I have many assets I could offer legion, same with every other member here on HF, but I'll let you be the judge for what you seek. I am a very mature member, I'd say, I don't discriminate anyone, hate many people, and don't get angry very easy. I don't hide my emotions, I just deal with them in a reasonable way. In the time I joined here, I've gained 10 reputation for helping people, and being kind. Though I know a group such as yourself won't hire a member based on that, perhaps other qualities I have could be of interest. As I stated, I have a pretty decent knowledge of some programming languages, that's not where I draw the line. I'm in the process of learning Networking, Computing, Assembly, C/C++, c#, as well as my own Tutorials composed of many topics. I'd contribute a great deal of knowledge, and continue representing the userbar in a Mature way. I hope to be a huge part in not only Hack Forums, but as well as Legion.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Thank you very much Anonymous, and other members viewing my application, for not only being helpful members, but for taking the time to read my application. I wish all other future applicants the best of luck.

Plunder - *August 2, 2013, 3:34 pm*
Great group! And good luck to all whom apply!

DarkFlux™ - *August 2, 2013, 10:53 pm*
good luck with All the applications , mainly (non-upgraded Members) if you want to get accepted you have to put a lot of efforts on application then other . !

Tikii - *August 2, 2013, 11:15 pm*
Elaborate on your skillset: I do Graphics, Photography a bit of HTML and understanding of PHP, i am a peoples person, and a businessman
Tell us why you would be a valuable asset: I am always here to help, from graphics to hosting to anything computer related i always do my best. I think i have some skills that many could profit from.
Elaborate on your achievements and future goals: Current achievement is i bought a running business in real life in beginning of may (Proof can be provided if need) I hope to flip the business within 3-5 years for profit.
Tell us about yourself: Self made business man, love to do graphics and anything technology related. Making money has and will always thrive me.

EvilMinD - *August 3, 2013, 2:25 am*
Elaborate on your skillset:Bruteforcing, bit of Social Engineering, Method to get OG Instagrams.
Tell us why you would be a valuable asset:I will post tuts on how to bruteforce websites and a way to get OG Instagram, Refer https://hackforums.net/showthread.php?tid=3592407
Elaborate on your achievements and future goals:I have bypassed security on most of sites by bruteforcing em, My thread got deleted, Please look at this one https://hackforums.net/showthread.php?tid=3449571
Tell us about yourself:I am 20 years old, Electrical engineer, I love to have fun and always looking for new friends.

Business - *August 3, 2013, 11:29 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your skillset:

I am highly skilled in the fields of RATs, marketing, monetiziation. I am in charge of sales and marketing for the jRAT4 product, and I am highly skilled with most RATs on Hack Forums.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:

I carry myself with a sense a pride, and dignity. I assist members in day, teaching them my skillset, and helping them grow their talents. I am a trustworthy seller, exchanger, and businessman. I have many threads showcasing my sales, and I am releasing two new products within the next week.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:

I have successfully applied for Ub3r as of recent, and am awaiting activation. I was in Innovation, for my skills in monetization and marketing. I am looking forward to releasing many new products, including an Ebook, a website, and more from the jRAT line.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I am a businessman. That is how I see myself. I enjoy making deals on this site, and I do them professionally. As for my RAT skills, half of it is usage, and the second part is being able to answer any question anyone asks and being able to teach them how to use their product successfully. I am looking to enter a group because I enjoy assisting other users, and I want to work with members of Legion. I am willing to do business, and assist other Legion members with advertising their products.

Hackedbyak47imaskid - *August 3, 2013, 1:05 pm*

Elaborate on your skillset:

Graphics:
I've been doing graphics for almost my entire life. I've always been creative and I'm proud of saying so.
I haven't been showing them off too much on this forum, but I will in the near future.

Coding:
I've been coding for quite a while now, but I'm not sure for how long.
Usually, I keep my tools to myself, but I realized it might be good to release some of them too.

Hacking:
I would not really call myself a hacker, but I've been a member of many of those.
I was usually the coder of the group, so it wasn't really hacking.
Though, I have been Ratting and Keylogging too, but that's not really hacking either. I wouldn't call myself a hacker.

Grammar:
Not a lot of you know that I come from Sweden.
But I have an interest for the English language, so I'm trying to keep my grammar as good as possible.
A lot of people say that I have an american accent, so I think that's a good thing. I'm also learning the british accent at the moment.

Tell us why you would be a valuable asset:
I think I would be a valuable asset because of the fact that I have a lot of experience in coding.
One of the things I love is making people happy by helping them in any way.
I think I could help a lot of people with in-real-life problems, because I have a lot of experience with this.
I've been in deep depression and I was without friends for three years, but I still made it.

Elaborate on your achievements and future goals:
My future goals on HackForums is to become more of a High Quality member.
I want to share my knowledge with all the members on here.
As I said earlier, I also want to help them with problems in-real-life, as I have a lot of experience with that.

Tell us about yourself:
My name is Gustav, and I live in Sweden. I've been facing a lot of problems in my life.
I was looking for help on this website, and I got it. Thanks to HackForums, I got more confident and

now I have friends.
People would think I was different because I was programming and doing graphics instead of partying like they did.
They thought I was weird, but I thought they were weird.
For that reason, I ended up with one single friend, but he was against me quite a few times too.
When I ended up here on HackForums, I found a lot of people to talk to.
This is what I am here for - helping other people.

Nosymbols - *August 3, 2013, 4:13 pm*

Elaborate on your skillset:
At present, I have no real skill set. I am here to learn, and I have a long way to go and I am looking for some help along my journey.

Tell us why you would be a valuable asset:
Once my skillset develops I believe that is when I'll become an asset.

Elaborate on your achievements and future goals:
I haven't made any legitimate achievements yet, but give me time, and they will come. My future goals, like legion.. are many. I have a desire to learn PHP and MySQL for website building. (Learning HTML, CSS and some Java as I go along, as obviously those are often needed to.) From a hacking perspective I'm starting with learning about cracking accounts, I've managed to lay my hands on some minecraft accounts and spotify accounts, hoping to expand that cracking into a nice marketplace accounts shop. As those funds build I intend to begin learning more about/ and participate in RATing, botnets ect and have some fun doing it.

Tell us about yourself:
I'm 23 and from the UK, have always been interested in programming and <3 the interwebs. My sense of humour is often inappropriate and sometimes funny. :) but once you accept me you'll see I'm a nice chilled guy. I'm here to learn and earn some moniez to.

p.s:
Thank you for your time reading this - I look forward to hearing from you.

TronX. - *August 3, 2013, 5:05 pm*

Elaborate on your skillset: I'm quite new at the hacking part of things, and even though I have alot of projects at the moment, I'm more than willing to learn. My skillsets are all really basic, but I believe in the future, when I get the time to review them all, there's a possible master in me. I have learned quick in my past, and I've chosen to stay that way.
Ratting
I've recently been introduced to ratting which was really the 'first' step into hacking I've taken.
CPA & PPD
I've been into CPA and PPD for a while now, and I make little, but steady income.
I believe my current skillsets are nothing to be proud of, but what I'm capable and willing to learn, is what I'd like to focus on.

Tell us why you would be a valuable asset: In the future, when I have more knowledge about the different stuff, I believe I could potentionally become a good monetizer and a good coder, as those are the two things I mainly want to focus on. (I don't know what I'm capable off in the hacking section, but I'd be more than willing to look into that aswell)

Elaborate on your achievements and future goals: I have alot future goals. First and foremost, I'd be interested in becoming a great monetizer, I really want to be that guy that people know is good at making money.

I want to be able to supply myself, making money through the internet.
After that I'm going to learn how to code. My first coding language is going to be Java, and after that I'll see what languages comes next.

Tell us about yourself: I'm a guy who loves a few challenges, and can get really angry when I can't solve them. I'm more than willing to learn, I appreciate having someone to teach me or watching someone do it, as I feel I learn faster, whatever the lesson is about.

TechApp - *August 3, 2013, 7:42 pm*
Elaborate on your skillset:
Online Skills:
-Marketing: I worked for TGN for a while as a content scout recruiter for partnering YouTube channels I felt deserved it.
-Coding: I currently Know VB.Net, but I am learning Java and C++ this year.
-Computer Skills: I am certified in A+, N+, and some Cisco. I am taking computer science this year in school.
-Hacking/Dark Skills: I currently hate RAT's and keyloggers. I think they are a waste of time personally and you don't gain much besides joy from maybe getting a cute girl. I do a couple other things such PP jacking and carding. Since it's not really allowed to be talked about on here, that's all I got to say on that.

Offline Skills:
-Skateboarder
-ESPN X Games Employ for 2 years now
-In training to become a firefighter

Tell us why you would be a valuable asset:
I have always been interested in the hacking culture, and have always wanted to know more about it. I catch onto things fairly quickly and understand most computer terms already. I think I would be a perfect student in any of your courses.

Elaborate on your achievements and future goals:
Well the big achievements for me were probably getting my A+, N+, and Cisco certifications. I am going to take Computer Science I this year, so hoping to get into more of that. Other than that I don't have much to brag about online. Offline I have passed many of my Fire Science exams for becoming a fire fighter and have won a couple vert awards for skateboarding.

Tell us about yourself:
I am a pretty easy guy to get along with. I don't spend my whole life on the computer, but I don't spend it out side everyday. Every morning I go skating with my two dogs. I am currently in LA for the 2013 Summer X Games, which I staff at every year for ESPN. I have won many awards in in skateboarding and am a pretty talented person if I don't say so my self. As I said earlier, I am certified in A+, N+, and Cisco, and taking comp. science this year. Not much more to say about me. I'm a pretty cool, calm guy. Don't really have much enemies, and forgive people quicker than I wish I did. So yeah... My life. I'm 16 years old and live in Dallas, Texas.

Jinying - *August 3, 2013, 7:59 pm*
Elaborate on your skillset:

eWhoring:
When i first joined the Hack Forums i was browsing over the forums trying to find some hacking tools and saw that a lot of people had some eWhore signatures on the forums and i had no clue what it was so i decided to go find out what it was when i finally found out what it was i downloaded

my self a free vwc pack and setted it up on ManyCam i was so happy about it and decided to tell my friend about eWhoring and started we started to eWhore together we made some money out of it and bought us self some things to upgrade our eWhore skills.
It was a really great begin for me and him we started to gain a lot of money and we are still eWhoring till now.

Proof of some payments:
Spoiler (Click to View)

Gaming
I love to game with my friends we game all the time and i have my own group on the forums called " Mystery " I love to play games on my computer and Playstation 3 when i have the chance. I'm always in to play other games that people suggest to play.
I always try to have a good reputation in games and be on a good rank in games.

This is a screenshot of my clan being in the top 10.
Spoiler (Click to View)

Tell us why you would be a valuable asset:
I am an active hack forums member, I am always down to create new projects with people of the group and will do what i get told to do.
Elaborate on your achievements and future goals:
My goal is to be a member of the Legion and create projects with them.
Tell us about yourself:
My name is Jinying i am fifteen years old and live in The Netherlands.
Originally i am from China but born in The Netherlands been on vacation in China for a couple times to visit family and friends i love China and hope to be there soon again.

I enjoy hanging out with friends and making new ones.
Mostly in my free time i am with my friends or gaming , I am currently learning how to RAT and Code but i will not use that for wrong reasons.

You can call me Jinying or Cho most of my friends call me Cho because that is easier to speak out i have a lot of friends from other country's living in The Netherland to i love to learn about other cultures.

My mother is the most important thing in my life i don't know what to do without her.

Family is important to they help me with everything.
And friends are important in life i have a lot of friends but don't keep a lot close to me i watch out with what friends i hang.

My future is very important to , I see my future with a wife and kids and i hope i can make my kids happy and give them what they want.

MultipleChoice - *August 4, 2013, 11:43 am*

Elaborate on your skillset:
I'm always here to help people when they need help with a RAT or Keylogger or anything that i can

help with. I've basically mastered RAT's now and working on creating my own Keyloggers. I've recently did the stock market with investing, to try it for the first time and I tripled my profits with investing. I have been doing gaming since I was a little kid, I'm decent at games like Call Of Duty and Madden. I am also learning coding in Visual Basics. I mastered eWhoring, and have made probably around $8,000 from eWhoring alone. Coding, I learned some of it in my High School carrier and know a good portion of it. I know Html, and PHP mainly. I have done many DOX's in the past for money for people and I plan to get better at it along with SQL.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff, and pass my knowledge on behind me to the people that need help with it. I would encourage others to try and learn and become in a high quality group like Legion itself. I am hard working, motivated to learn, a gentleman, and experienced. These four building blocks right here make a very successful group.

Elaborate on your achievements and future goals:
My achievements that I made aren't the greatest but they are decent. I managed the master RAT's and Keyloggers since I joined Hackforums. I have learnt monetizing, eWhoring, keyloggers, rats, coding, html, php, stressers, and a few others. I am always trying to help others that need my help. I'm always passing on my knowledge of what I have to other members. My future goals are to have my own VPN business opened up, along with a crypter. I plan on going to college for coding, and learning everything about it.

Tell us about yourself:
I am 17 years old, I'm in 11th grade. I am on hackforums for at least 7 hours a day, since I'm now on summer vacation. I'm always on at least once a day here at hackforums. I love to play Runescape and Xbox live with friends, and go out and have some fun. I like to save my money when I earn it from doing blackhat job, eWhoring, Doxing, etc.. I'm pretty popular in High School, everyone knows me. I do Baseball, Wrestling, and Football for sports for my High School team. I am pretty much a laid back gentleman that loves to hang out with his friends and have a good time.

CatSoup - *August 4, 2013, 12:14 pm*

Elaborate on your skillset: I am great with MySQL, as well as MySQL injection. I also am great with BotNets and exploits with dedicated machines.

Tell us why you would be a valuable asset: Well, I can code CSS, JS, and Java. I am also currently learning PHP and Python. I can exploit MySQL databases which is what makes me special among the other students. I also know lots about RATS and I am currently working on creating my own RAT software with Java. I can also exploit dedicated machines with shared hosting, example: A Minecraft server host puts multiple customers on the same machine, but different servers, It is easy to exploit and upload/download others files from the same machine/daemon.

Elaborate on your achievements and future goals: One of my achievements is successfully running my Minecraft network, and as well as redirecting a servers bungeecord to my server with a simple dedicated machine exploit. The server I exploited got around 200-300 players, so that made my

server quite big. My future goal is to create my own RAT software with Java and release it on Hack Forums.

Tell us about yourself: I am a smart fast learning guy. I picked up Java in a few months and CSS in a few weeks. I like to play video games like most people on here such as Battlefield 3, Minecraft, and League of Legends. I know the ins and outs of a computer and I get recognized at school for that, it is sometimes a good thing and a bad thing. I have helped my schools IT with many projects such as the "student drive" on my schools network which is basically a cloud system for all files. I always find myself organized and I am very OCD when it comes to mess, I always clean it up in the end.

Thanks for the time, and hope your day is well ?

Understalker - *August 4, 2013, 12:21 pm*

Open for questions to those who are in need of assistance regarding the group. ?

Anyone who asks me to modify/edit/check over there application will more than likely be denied.

CueBasE - *August 4, 2013, 6:10 pm*

Elaborate on your skillset: As some of you know, I shine in the musical arts including (but not limited to) musicianship, production, teaching and composing. I'm also skilled in the electrical field and obtain a degree in Electrical Tech.
Tell us why you would be a valuable asset: I consider myself a very well rounded individual with an open mind. I have a basic knowledge in most things or I am willing to learn. I'm sure I can teach and learn from most of the members in this group.
Elaborate on your achievements and future goals: As a musician, I have played across the US. I have also had the opportunity to record with many artists of different genres. I plan to pursue a career as a traveling musician in the near future.
Tell us about yourself: I'm 22, as you know know, I'm a musician and electrician. I'm a city boy in Pittsburgh and I love the fast pace lifestyle. I love to meet new people, you never know who you might run into or what you can learn. I appreciate the simple things in life. I'm not very good at speaking about myself but I hope I've given you and idea about my personality.

Thank you for your consideration.

Canc?r - *August 4, 2013, 6:20 pm*

Elaborate on your skillset:
I have intricate knowledge in a broad area of security related practices including but not limited to:
Packet Filtering and Analysis
LAN & WAN hardening
Linux system administration
Network and Application layer pen testing
Social Engineering & Fraud
Unorthodox Hacking Methods Tell us why you would be a valuable asset:
I can teach members proper network and application layer security practices, share configurations and private exploit scanners as well as coax users with social engineering and fraud practices. I can assist with target recon and identify potential weak points in infrastructure. I'll be willing to help with anything possible when I'm available.

Elaborate on your achievements and future goals:
In 2006 I ran my first botnet, accumulating around 600 stable infections with the NZM bot and Unkn0wn IRCd(Unreal IRCd mod). In 2007-2008 I ran one of the first Xbox LIVE phishers, I gained

~15,000+ accounts. I was one of the first people to SE a password reset to an Halo 3 account with recon armor in 2008 I believe. I ran a custom net in 2012 tailored towards SSH scanning/bruting on routers and compromised ~6000 routers. I hacked a very big forum in early 2013 and dumped a few very large SQL databases. In mid 2013 I developed a TCP flood that enabled me to cripple the BlackLotus network for more than an hour with <100Mbps of data. I've taken out more than a few data centers/edge routers. I plan on continuing to learn C programming, go to college and start development on a IPS/Firewall kernel. Maybe get recruited by a large hosting company and work for them.

Tell us about yourself:
I'm Cancer, I started delving into hacking related activities when I was 12-13 years old, I'm now 19 and believe I have attained a good amount of knowledge but also have a long way to go as do we all. I like Linux and hope to learn enough about the POSIX API to truly call myself a hacker some day. ?

Z0mbie. - *August 4, 2013, 6:48 pm*

?

Syrian Electronic Army - *August 5, 2013, 11:52 am*

Elaborate on your skillset:

RATS and other hacking

I have been using RATS for the past two years, experimenting with them on various operating systems and different situations. I consider myself a decent spreader using my own methods including XAT spreader similar to Omegle spreaders just a different website. I also have used a vast array of RATS from known RATS like Cybergate and Blackshades to unknown RATS like njRAT and Bozok. I also have used BlackHole exploit pack around a year ago had around 4% infection rate, got 500-700 executions. Other then RATS I know basic SQL Injection, I really don't enjoy hacking or attempting to hack a website for no apparent reason. If I do come across a vulnerability I will and usually do report it. (I mean if you hack someones website, what have they learned? NOTHING! Tell them whats wrong, they have to figure out how to fix it.)

ATTEMTPING to code
I currently am learning VB as I feel it can be a way to get my foot in the water so to speak, I know the syntax of java from my RSPS glitching experiences (best way to glitch is to look at the underlying code, right?)

Gaming
I adapt to games very quickly and self evaluate myself as above average in COD series including playing competitive. Other then console I "play" games such as Runescape (Private Servers) not for the actual game but to find glitches and vulnerabilities in the game.

Networking
I'm currently taking Cisco courses in Highschool so I have some knowledge of networking, I will be getting my CCNA next year (Feeling pretty confident) and also am on my Highschools technology team for an internship.
Tell us why you would be a valuable asset:

I believe I would be a valuable asset because I adapt to learning very fast, no matter if I like what I am learning or not. I take knowledge in faster then average and can apply it to situations correctly. (Example: During my application for the internship I mentioned above all of the students applying had little knowledge of how the schools setup was layed out and where the server rooms are or what OS do we install when a computer needs formatting, we got a packet and had to study for 10 minutes. Then had multiple tasks throughout the school to do. I got a 85% success rate which my tasks.)
Elaborate on your achievements and future goals:

I currently am aiming to go to college for something in Security or Networking. I am aiming for a CCNA and possibly a CCNP afterwards which will help me excel. A small accomplishment recently was making a simple VB program that grabs a websites IP, Server type and whether its offline or not. I also have a Comptia A+ which is pretty simple.
Spoiler (Click to View)
Tell us about yourself:

I am currently in Highschool, and enjoy Networking and Security. I have a Comptia A+ as mentioned before and am aiming for a CCNA & CNNP. I will hopefully go to college for something related to Networking and Security.

Black Blade - *August 5, 2013, 4:38 pm*
Elaborate on your skillset: Since joining iv gained a vast knowledge of RATing, Ddosing, keeping anonymous on the internet and Spreading.

Tell us why you would be a valuable asset: I am a very driven person with a hungry to learn and have recently been looking into pentesting DNS access/spoofing and making viruses. I have currently been self educating from ebooks and Tuts (from HF and Youtube). Slowly covering all

aspects of hacking.

Elaborate on your achievements and future goals: I am hoping to broaden my knowledge within all aspects of hacking, to great depths, to then hone in on a specific skill (probably pentesting) of which I can then go on to teach people that are in my position at the minute.

Tell us about yourself:I am currently a civil engineer, from the UK. I own my own car but currently renting a flat whist saving up for a deposit for a morgauge. I am very keen on learning about different exploits and expanding my knowledge as much as possible and also returning the favours back to the community. feel free to pm me questions about any of the above.

many thanks dippy hippy :)

N?ll - *August 5, 2013, 6:57 pm*

Elaborate on your skillset:

I'm experienced in bot farming, handling very large botnets, Social Engineering, Swatting, DoXing, exploiting for RDPs (Currently have roughly 6400 Admin RDP's), Manual SQLi, Symlinking, XSS (Have found several vulns on Microsoft, latest being one concerning an exploit to view internal/MS Confidential files. (Please PM me to see proof!). I'm fluent in C# and C++, make a living off selling exploits such as 0days on sites we apparently can't talk about. I'm interested in Cryptography and I spend most of my days researching on new topics and sharpening my current skills.

Tell us why you would be a valuable asset:

As mentioned before I can provide all of the following:

Thousands of good spec RDP's.
Access to paid Person Lookups such as instantcheckmate.
Access to criminal background check, marrage checks, license checks etc.. All very good for DoXing.
Access to large private nets for DDoSing (Proper DDoSes, not shitty 5Gbps attacks).
Access to a lot of stuff that is banned on here so I'm not going to go into specifics.
I can greatly benifit by hosting TS servers, game servers, Ventrillos, basically anything.
I can also of course benefit by hacking.

Elaborate on your achievements and future goals:

Well, I'm currently in college doing my Masters in Computer Science, my future goals are to finish my Ph.D and getting a job in Software Engineering.

I've achieved a lot in my time, gotten on the Microsoft Hall of Fame already, and soon to get on it this Month.
Gotten a large sum of money in return for reporting several vulns in 6 College sites involving private student information gathering.

Tell us about yourself:

I'm 19, born and raised in a semi wealthy family, got my first computer at 8, began to program in "Scratch", quickly moved up the ladder and somehow stumbled into SQLi, I learned to do it manually

in a few hours, and within a few weeks I was fluent in several SQLi methods.

I continued to learn to program and shortly realised I could make a lot of money from finding and exploiting 0days and selling them.

I had a few phases of going from Black hat to White hat and vice versa but I've resided at "Black Hat".

I tend to take out my anger on people by Swatting them, although I know that is disallowed on HF so I'll keep it on pause for now.

I spent most of my time (18+ hours / day) on my computer, really doing whatever is interesting.

~Tom~ - *August 5, 2013, 7:01 pm*
Posting to fix the post glitch so applications cam be seen.

N?ll - *August 5, 2013, 7:03 pm*
Unfortuantley I forgot to mention in my application, I release large tutorials that people like regularly in the Hacking Tutorials Section, such as my most recent one on Finding backend IPs from CloudFlare.

Found here: https://hackforums.net/showthread.php?tid=3672202

I'm supposed to post for someone to fix post glitch, but I thought I might add this too.

J?ey - *August 5, 2013, 7:07 pm*

I can personally vouch for Null and I know what he is capable of.

?S0ulSn1p3rR - *August 6, 2013, 12:55 am*
Elaborate on your skillset:
My skillset includes several things i am not too focused within one area casual coder which is only due to my lack of knowledge of the languages which if i learned more i could and surely would code many more things. I also have an extensive knowledge on how to setup rats and problems people may face when using them along with quite a bit of knowledge on my way around routers like port forwarding them or finding a way to bypass the login details on them to allow a program to access the internet not much really but yea.
Tell us why you would be a valuable asset:
I believe I would be a valuable asset because I have many skills but they have not developed entirely yet and with some help I could be a very helpful and great addition. I also have many free services I do around HF such as free crypting and creating BIN's for other members and even doing simple services such as resolving a Skype username or clicking some ads.
Elaborate on your achievements and future goals:
My achievements really have been starting up a booter/stresser and using some of my own custom scripts within it in the process and one of my future goals is starting one up that will be quite successful. Learning some minor coding and having been able to code small projects in Visual Basic and a little C# like a Rehash and Resigner a Forza 3 credit mod tool for Xbox. I also have in the past have been slightly successful in creating my own FUD crypter in which I've had to ask for help in getting it FUD or errors that I could not understand. In the future I would like to be able to learn much more of the many coding languages and code something that no one before on HF has and I would like to learn more about network security.
Tell us about yourself:
I am 15 and live in the USA I'm known most of the time by S0ulSn1p3rR and sometimes by Missile Pad or LurK Tear I'm a gamer and "hacker" by heart I love them both and spend time when I'm not gaming which is during the week after school trying to learn something new I enjoy the occasional or quite often in my case messing with people whether it be by screwing with them by sending them a

rat or prank calling them and recording it for some fun later on.

Ayxi - *August 6, 2013, 1:03 am*

Elaborate on your skillset:
Well I am trying to learn some languages right now (Html, Css). I am also returning to my graphic design profession. I am building my way up the mountain of hacking, coding and designing
Tell us why you would be a valuable asset:
First you can be my starting base, the trainers.
"You know that guy Dex?"
"Yeah of course."
"He started in Legion."
"Holy Sh*t, I'm going to go apply right now!"
Second, I would love to help out the new guys that join, teach them the ways of the way.
Elaborate on your achievements and future goals:
A few goals I have are...
To create a Social Network
Design my dream sites
Few more, you'll see
Tell us about yourself:
I am a...

Aw fuck it, Ill never get in.

SupreemJuggalo - *August 6, 2013, 5:41 am*

Elaborate on your skillset:
-basic skills in .net frame work
-would love to learn python
-have some beginner knowledge in html
-have coded a few application in .net such as a sms bomber and a list of tools others may use

Tell us why you would be a valuable asset:
- i try my best to be very helpful and HQ. will deal with posts and questions with great care.
Elaborate on your achievements and future goals:
-Love solving problems (except mathematics). love to help members,
future goals are to be a network tech, currently taking an online mit and college course in network security
Tell us about yourself:
fellow anon member, love the face of the movement.

i as well love the network fundamentals

+Reckless - *August 6, 2013, 10:51 am*

Elaborate on your skillset:
Throught my time at HF I have developed a skill set that I am proud of. It may not be huge or significant to you or others, but I have worked as hard as I can to learn as many skills as possible while on the site. I have to go to school so I cannot dedicate as much time as I would like to this, which somewhat upsets me, because I feel like I could learn so much more.

These include:Coding (C, C#, C++, Java, JS, JQ, HTML, CSS)
Video Editing
GFX
Writing (improved it)

Some of these skills I am a higher level in that others, but I am always trying new things. And am always learning.

Tell us why you would be a valuable asset:
I would be a valuable asset to the group because I follow motives, and what I call, life dedications, these are:
Dedication
Dedication for me is extremely important, without dedication nothing would get done. I always am dedicated in everything that I do. I try my best to spend as much time on something so that it is perfect. You could call me a perfectionist, but I see that as a positive attribute, not a negative one. Being dedicated would mean that within the group I would always complete tasks to the best of my ability, and would always do everything that is asked of me that I possibly can.
Respect
Respect is also very important. If you don't respect someone, then you can't learn, if you don't learn then you can't advance. I respect those who have earned respect, be it by helping others, or by just doing something truly outstanding, it doesn't matter. I like to think that those I help will respect me and because of this, I am always trying to help others, so that people's respect for me can grow. This means that I would be a great asset to the group because I am always trying to help others, no matter how big or small the task is.
Prioritization
This might seem like an odd one to some, but I think it is a very important life skill. If you can prioritize the order inwhich you do things, then you are going to be of more use to everyone, being able to manage your time means that you can meet deadlines, and help people in the most efficient way possible, which is something that I love to do, and this is why it would help within' the group.

All of these things lead down to the fact that I always want to help others, and I always do try my best to help others, which is why I would be a great asset to the group.

Elaborate on your achievements and future goals:
When I joined HF, I had an objective, and that was to be respected, because it makes me feel good inside. I will be honest, I like to be able to boast to others, and say that I am better than them, I don't think that so much anymore, but originally I wanted to get in usergroups so that I could say to my HF friends, that I was in a group and could access an area of the site that they couldn't, so I went and bought leet, and on the same day got accepted into the Minecrafters (old usergroup) I was so happy, and that was just the beginning, since that day my aim was to get into more groups, I got into RedLions and have been a member for almost 2 years. I have been a member of the Reviewers, writers, The Empire, Rhythm, Respawn, Void, TechSpurts, beacon and coders.

My future goals are to get into more usergroups, but more importantly to be a GREAT member of every group I am in, I want to be able to help people as much as possible, and for me, being in groups helps with that.

Some other goals of mine are:Learn more coding
Learn more GFX
Get respected more

Tell us about yourself:
My name is Louis, I try my best to help everyone. At school I study all the core subjects along with Computer Science, Business Studies and History. I generally enjoy my life. One thing upset me more than anything, and that was when my parents split up, it made me so sad, I cried for ages (I was 8 or 9) but I eventually got over it, and decided that I would make both of them proud, so I like to think of myself as a nice man/ boy who try's his best at all times, not only for his gain, but to make others proud.

Thanks for reading, and I hope that I get accepted into this group. I hope that you can help me to achieve my goals. Thanks.

skript jonson - *August 6, 2013, 5:53 pm*

Elaborate on your skill-set: I am a skilled graphic designer that specializes in Signatures, Avatars, Desktop Backrounds, Thread Design. I do a Graphic Service everyday and everyone I work for is always satisfied with what I bring to the table. I never get angry and "the customer is always right" in my book. keep in mind all my services are free.

Tell us why you would be a valuable asset: Because everyone on Hackforums needs graphics such as Signatures, Avatars and i'm here to supply there needs for free and fast and with much effort put into it. I do free signatures every other day for random members on Hackforums requesting nothing in return. I am rising in the graphics community every day.

Elaborate on your achievements and future goals: I plan to get into coding, ddosing, Ewhoring, and more. I also want to increase my learning's in graphic design. My main goal is to serve the community in the best way possible and make my way up to the top on Hackforums. (Keep in mind these are just goals)

Tell us about yourself: I am 14 years old designer from Michigan with a lot to offer. I am getting into coding and I specialize in the art of graphic design. I am cool to talk to and never get into fights. I feel I deserve to be recruited in Legion. I am going to start bringing out tutorials every other day ranging from Photoshop, Illustrator, and Cinema 4D.

Nitrate - *August 6, 2013, 7:06 pm*

Elaborate on your skillset:
Penetration Tester : Going through all the necessary steps in order to exploit the server.
Web-Server Exploiter (Layer 7 Attacks) : We all know a firewall is a bitch. I write my own exploit code to bypass DDoS-Firewalls and successfully bring the server down. DoSPloiT is one of my layer7 attack methods -> https://hackforums.net/showthread.php?tid=3566848 .
Social Engineering : This is how i started, I have a lot of experience in multiple fields, which makes me a good Social Engineer.
Programming : I know Basic VB.NET and Perl. Well i know how to write attacking tools with both of them ;)
Gaming : I play CoD and Minecraft - I own both a PS3 and an Xbox.

Tell us why you would be a valuable asset:
Would love to share exploits, vulnerabilities and tools with them and write them in the name of "Legion".

Elaborate on your achievements and future goals:
Wrote several layer7 attack methods.
Youngest person in my country to take CEHv8.
Discovered HUGE loads of exploits in D-Link and NETGEAR Routers.
My Future goal is to learn C and Assembly/Shellcode! i ordered some books and can't wait for them to arrive ?

Tell us about yourself:
I am a "Certified Ethical Hacker" I am the youngest person to take the course in my country - and hopefully will pass it next month ;) mish me luck!

+Aurora - *August 7, 2013, 7:01 am*

Elaborate on your skillset:
If I had to say what my skillset was it would be making game servers which includes a variety of different skills. I've been making game servers for the past 5 years and I've went into all different situations, I've had to code for the server and I've learnt a few things on the way. I've pretty much tried to learn everything but only the basics. I tried hacking and I learnt how to use and setup a RAT, I learnt what a DDoSer was and other things to know what I am talking about. I also tried to learn the basics of some programming languages, I learned a bit of Java so I tried making a Minecraft hack client. Also knowing that I can program a bit, that shows I can spend a lot of time sorting out a problem which would be good for being social. I've tried every sort of thing from being a YouTuber to cracking programs, I can help out in all sorts of situations and I'm good at making ideas for future updates. I've been on the computer since I was 8 years old and now I am 15 years old. I would say I am intelligent and I could be a valuable asset to the group.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:
I would be a valuable asset because I can provide basic knowledge of all things, I tried to make myself a little google where I would have knowledge on everything but I am not an expert on it. I think I could help out organizing things such as game servers and I could try helping make money. Game servers can be a huge money maker and I could make it happen. I can also become a part of a think tank for the group figuring out what we can put up on the marketplace and what would make the best money. I could setup an entire plans for whatever your need. I would be a valuable asset because I am intelligent and I could provide knowledge.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
My future goals and achievements are to become a game developer. I've always played games throughout my life and I still play them everyday. It would be amazing if I could achieve this. I would like to go into a company like RuneScape an old medieval RPG type game. I am planning to achieve in this group a few friends who have the same sort of plans for the future and knowledge. I think this group could help me out greatly and I could help out in return.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:
Name: Neal
Age: 15
Location: England, United Kingdom
Bio: I am a gamer I love to play games and being a gamer brought me to wanting to make games which ended up me being put onto this forum. I am happy to play games and I do it everyday.

Orgasmic - *August 7, 2013, 7:11 am*

Elaborate on your skillset: None
Tell us why you would be a valuable asset: I'm arguably the perfect man as well as the alpha male
Elaborate on your achievements and future goals: My goals include showing everyone up who is currently or has doubted me in the past. That's about it, I'm not a complex guy.
Tell us about yourself: Well, I'm pretty cool. I guess.

Cozyman - *August 7, 2013, 11:25 am*

Elaborate on your skillset: I only know how to code a little bit, not a lot of knowledge of it at the moment but I'm learning.
Tell us why you would be a valuable asset: I'm down to take time out of my day and learn what ever there is I want to know or need to know.
Elaborate on your achievements and future goals:
I want to know how to manipulate my computer to do what ever I want. I also want to be a Web Developer and I think I can do it with a little bit more effort.

Tell us about yourself: I've always wanted to learn more about "hacking" and how it was done but I always felt like I needed a teacher or a "mentor" figure to guide me the way there. I'm 15 and my name is JT I spend some of my day on my computer another on xbox and the rest with family and friends. I recently just returned to HF and I plan on staying for a good amount of time again.

Understalker - *August 7, 2013, 11:30 am*

Willing to answer questions about Legion via PM, :).

Do not PM me on what to edit for your application and so forth. You WILL be ignored.

Kinder™ - *August 7, 2013, 2:32 pm*

Elaborate on your skillset:I'm good with RATs and geting Shells i know i'm not the most L33T Hax0r lol.
Tell us why you would be a valuable asset:Because i'm a nice funny person i fully understand how a RAT works (Big woop) and i don't rage.
Elaborate on your achievements and future goals:I got 30,000 slave's! (Lost that RAT :/) And i hope to get in this group and learn and help.
Tell us about yourself:I'm just a 18 year old who found this forum sometime ago and hope to get in a group to help and even learn some stuff for my self!

ASDA - *August 7, 2013, 3:08 pm*

Elaborate on your skillset:
Developer
Freelance PHP developer. I mess around with Perl and Java quite a lot too. I have helped a lot of people in my time while being at HF. I have over 350 posts in the PHP giving reliable, working fixes and explanations to people's problems.

Tell us why you would be a valuable asset:
I believe I would be a valuable asset to the group because I am a good teacher as demonstrated in the PHP section and I am always willing to learn more at any point in time about anything.

Elaborate on your achievements and future goals:
My main goal in my cyberlife was to help as many people as possible while still remaining as informal as possible but stoll be HQ to allow the person I'm helping to feel 'connected' with me. Of course, this is a never ending goal so I'd class that as a future goal but also an achievement. I developed quite a hard-hitting Chargen reflector written in Perl too, I guess.

Tell us about yourself:
I'm a casual guy from the north-west of the UK that loves to freelance develop and in any spare time I have, game. I develop for hours and hours on end with no breaks as I try to finish before deadlines. In any freetime I have I play CoD4 and BF3 on the PC. I drink too much Coca-Cola and spend way too much time on Hackforums - nothing is going to stop this though! :)

Corleone??????????? - *August 7, 2013, 3:35 pm*

Elaborate on your skillset: I know my way around python somewhat, I'm still learning the language and have recently taken up the task of learning SQL injection. In python I can complete basic tasks with ease, but I'll be straight forward and say that anything complex will take me a bit longer to complete.

Tell us why you would be a valuable asset: I am a respectful and kind member, I am very eager to

learn, and also share any knowledge I currently have with anyone interested. I don't know much about Legions background, but I would be more than happy to participate in any activities hosted by members, and even host my own when the time has come.

Elaborate on your achievements and future goals:I have risen up in this community pretty fast since I have returned, and I'm looking to stay for good. I'm wanting to master python, and once I have that down I want to learn, and hopefully eventually "master" SQL injection as well, and take part in white hat hacking help. Other than that, I want to advance in this community as much as possible, and make a name for myself.

Tell us about yourself: I'm an ordinary guy, wanting to be better. I have a lot of experiences in a lot of different fields, but coding and website related hacking are almost completely new terrain for me. I think being in this group would help me out a lot, and I would most definitely give back what I have learned when the time has come. I'm hoping you will consider my application, thank you.

Shame - *August 7, 2013, 6:17 pm*

Elaborate on your skillset: Well, all of my skills would include:Gaming (If that can be called a skill)
Coding (At this point I know some C++, Java, and I am currently learning Python.
Average Photoshop (Meaning I can do some GFX, but I'm not that good, honestly)
Web Design (That'd probably fall under coding, but I gave it it's own category)
Music (I can play guitar and a few other instruments)
Physics (don't know if this could be considered a skill, but I am decent with physics as well as most sciences)
Social Engineering (I am not as active in the SE community as I used to be, but I can still SE a bit.)

Tell us why you would be a valuable asset: I feel I would be a valuable asset in the sense that I am willing to learn and grow. I feel like the is a necessity in joining a group like this, since a lot of people don't want to put in effort to try. I feel like my background in the bit of coding I do know, could be of help as well, especially if the assignments pertain to that.

Elaborate on your achievements and future goals: My achievements so far would be finishing High School with a decent GPA (3.8.) I also have been working to establish a small business in my state. I applied for my funding, which I view as an achievement, since I am motivated to open up shop.

My future goals would be to actually completely open the business I would like to open, and to go to college. I am already taking steps towards both of them, since I applied for funding and I also am starting college this fall. I will be taking an engineering course at CMU in Pittsburgh, and hopefully earning my degree.

Tell us about yourself: I am a 20 year old who is interested in all types of things. My main interests at the moment do include coding, music, gaming and sciences, among other things. I have been practicing most of my skills in music or gaming and even coding, for the past few years or so, dabbling every now and then. I feel like more recently, though, I started to want to learn more languages (coding) and expand my knowledge and skillset. I am working towards being proficient in several languages, even though I'm probably pretty far off.

I currently live in Harrisburg, Pennsylvania with my roommate and my kid. My kid is pretty much my life at this point, and he is probably the main reason I am going to college. I wanna provide him with a good life and childhood.

I currently work two jobs to provide for my household. I work at a shipping warehouse, doing the heavy lifting and whatnot, as well as working at a deli. I usually am at the deli more, since my hours at the warehouse are capped weekly.

That is really all there is to tell about me.

Thank you for the opportunity.

Mr C - *August 7, 2013, 6:21 pm*

Elaborate on your skillset:

PHP

I've been self-studying PHP for over a year now. I've made many different programs in the past including but not limited to: Admin Page Finder
YouTube Video Statistic Collector
Facebook Message Spoofer
CPA Website Generator (Noob friendly)

I'm currently working on developing my own stresser, however I haven't yet started on the coding (Working on mapping out the logic)

I regularly help the members of Hack Forums with PHP issues and my most active sub-forum is the PHP Development forum.

Java

I'm currently in university in London, studying Computer Science, about to go into my second year. My main interest in this course is the programming, in which I'm taught Java. I've made many basic programs in Java, as well as working with a robot (Finch). In my first year I received an A-grade in all but 3 out of 11 modules.

Social Engineering

I've often been in situations where I've needed to social engineer in order to get what I want. Although it's not the same, I enjoy making prank calls with friends, tricking the victim into thinking I'm someone else and getting them to do something funny. (Sounds childish writing it out, but it's hilarious at the time) Even the most professional individuals need time to laugh.

SEO

Although SEO is almost none existent due to Google's new algorithm updates, I always ensure that SEO has a large proportion of my time whenever I work with any Internet Marketing project.

Internet Marketing

Now that I mention it, I often do work with Internet Marketing and I have worked for a company in my home city for over a year and I often have the task of improving the internet marketing efforts of other businesses (clients).

Web Design

Although web development is my forté, I'm starting to enjoy the designing of websites, mainly with CSS/CSS3 as opposed to photoshopping designs.

Tell us why you would be a valuable asset:

Hardworking

Working on computers is part of my life every day. My work, education and play revolves around computers and more specifically, coding/web development. If that doesn't show dedication to what I do, then I don't know what will.

Helpful

I do enjoy helping people that wish to learn. If someone's working on a project and needs help to complete it, I'll do my best to make time to help them out if I can. If I don't know the exact answer, I'll research it and find the answer for myself so I can then help others with the same issue.

Professional

I try to ensure that I act in a professional manor when I'm required to. Correct grammar & spelling is something I actively check for whenever I'm communicating.

Elaborate on your achievements and future goals:

AchievementsPassed my A-Levels with 3 A's.
Passed my first year of university with 2 A+'s, 4 A's and 1 B-

GoalsTo develop my own stresser
To become a senior OOP PHP developer
To own my own software company
To pass my university course with a First Class Honors Degree.
To add this to my userbar - [img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

Tell us about yourself:

There's not much about me that I haven't already mentioned in the previous questions. I'm a friendly, active and helpful member of Hack Forums.

Anything tech related will definitely grab my interest.

I thrive to learn new things. If I'm given a task that I don't understand, I tend to do research on the tasks required, instead of asking people for help. If the research doesn't help enough, that's when I go to ask for help.

I'd love to become a member of Legion to get to know the members of this group and provide them with as much help as I can offer.

Thanks for reading, I look forward to hearing from you.

GrizzlyH4X - *August 7, 2013, 9:03 pm*

Elaborate on your skillset: Truthfully I don't want to lie, I don't really know how to do much hacking. I know simple stuff like SQLI injecting, ratting, jdb, and a little coding and what not but I do not know the advanced ways of hacking , and would like to join ur group because I want to learn.
Tell us why you would be a valuable asset: Im not shure if I would be a valuable asset, but I would carry out any task that you would ask for as long as I new how to do it :p
Elaborate on your achievements and future goals: Ive coded some gaming programs before and my future goals are to become and great hacker and be very experienced in the hacking ways. Then someday after ive learned everyone I would like to teach someone the things that I have learned. I

appreciate you for reading my application I know im not much to offer to you but eventually with a little help I will be a great service to you. Thanks GrizzlyH4X
Tell us about yourself: im 15 been hacking for about a year now , great listener, dedicated person. I enjoy hacking I like black hacking umm and im on the computer all the time.

Hidden™ - *August 8, 2013, 6:57 am*

Elaborate on your skillset:
I am mostly found around the minecraft section for fun but I do work with bots and have done more giveaways during my time here than I can count.

Tell us why you would be a valuable asset:
I do many giveaways and from time to time, post in depth tutorials throughout the forum. Everything varies, I have no one set of skills.

Elaborate on your achievements and future goals:
I plan on becoming an independent sales representative for myself. By that I mean, buying and selling things online and off.

Tell us about yourself:
I am easy to get along with and if I had
to say personally I am pretty well known throughout the community.

logging*machine - *August 8, 2013, 11:38 am*

Elaborate on your skillset:
Ratting - I'm very experienced with Rats(Remote Administration Tools) and I've helped several people with them. Knowing how to Rat isn't really a skillset, but spreading it to several individuals with ease is. I can get around 120 slaves in 2 days from one Youtube video and a twice that with torrents. I've successfully infected thousands of slaves, but the most I've had like in total at one time was around 1.2k. I know have quit ratting and have been using my knowledge on them to teach about them and pass down my knowledge to as many people as possible. I no longer RAT because I would like to take my time to learn something else, and extend my skillset. I have made several tutorials on RATs and Spreading the RAT which I will post below :

The Empire | Become a Pro Ratter | TUTORIALS | by Sunlight

The Empire ? RAT Tutorials ? Detailed by Sunlight

Sunlight's RAT Help Desk ALL QUESTIONS WILL BE ANSWERED ASK ANYTHING by Sunlight

Ask me ANYTHING about RATs by Sunlight

? Sunlight's Darkcomet Setup Service ? CRYPTING ? FULL Setup by Sunlight

Spreading with torrents | Tutorial | Super Effective by Sunlight

RAT Setup ? FREE ? Port Forwarding by Sunlight

[TUT] How to Setup a Java Drive-By [100% Free] by Sunlight

FUD Java Drive By Package ? Free ? NO POST&PM by Sunlight

Beginner RAT Help Desk | Ask anything about RATs by Sunlight

How to keep your slaves | Tutorial by Sunlight

And many more can be found here:
https://hackforums.net/search.php?action=finduserthreads&uid=1289548

SQL Injections - I'm not very experienced with SQLi, but I have successfully done it on about 7 MyBB forums(out dated plugins) and about 10 normal sites like job sites etc. I'm still learning more about SQLi and hope to learn a lot more about it to the point I can easily do it to a lot of sites. I'm also really good at finding vulnerable sites with vulnerable plugins/methods. I hope to learn more about this while in Legion. I have not mastered this yet, so I don't have tutorials on this subject.

Coding - VB.Net - I have been with vb.net for quite sometime now. I've made several tutorials/releases for this language. I can code several things, but I prefer not coding anything malacious as the language isn't very built for it and I don't want to see 'plz givveeme soruce code plx' flooding the .Net section.

Coding - Python - I'm still learning python, but I'm determined that I will learn how to code fluently in this language soon. I still have much to learn, but when I learn enough, I will learn more, then i will teach as much as possible. It is a very powerful language, and soon, you'll see a lot coming from me based on Python.

Coding threads can be found here:
https://hackforums.net/search.php?action=finduserthreads&uid=1289548

Tell us why you would be a valuable asset: I think I would be a valuable asset because I can teach members what I know and they don't so that they can learn, then soon they'll be teaching people. It'll help the group tremendously because the more we teach, the higher the overall reputation of the group will be. I can also be nice to others, if anyone has questions, I will answer them.

Elaborate on your achievements and future goals: The future goals I have is to widely known on Hack Forums and have a reputation of being helpful to the community. I guess I'm already developing on this , because people say that i'm a very helpful person. Some achievements of mine are: Getting admin access on 7 MyBB forums, Mastering RATs, Ub3r.

Tell us about yourself: My name is Aaron, I'm 15 years of age, turning 16 soon, and I love to spend time on the computer and learn new things about hacking and anonymity. I love teaching people things that I'm good at such as Ratting. If there are any projects, I'll get the job done as fast as I can. I'm good at using my time wisely instead of stupidly when I need to. I try my best to be known as a helpful guy and not some random asshole. Everything I do, I try to do it with all the quality I can.

Mahdy - *August 8, 2013, 12:12 pm*
So, my application got accepted but it got accepted when I was on a vacation ban due to my health and by the time I PM'd Anon back, he didn't reply.

Is there a way I could still get a shot to get in, or because I was banned did this like totally get messed up ;c?

Xentric QT - *August 8, 2013, 9:18 pm*
Elaborate on your skillset:Skilled in Social Engieneering, PHP/MySQL, webdevelopment, computer

security background
Tell us why you would be a valuable asset:i'm willing to help out members with anything they need and willing to learn anything to expand my current skillset
Elaborate on your achievements and future goals:i'm currently working on a social networking site to help students with homework and school life. achievements i've placed in states in BPA for computer security and microsoft network administration also will be applying at full sail university online for web design
Tell us about yourself:i'm a 21 year old college student living with his gf wanting to own his own computer security company to test network security, and physical security of companys.

pm anon about it again and explain your Situation at that time !

Sotark - *August 8, 2013, 11:16 pm*

Elaborate on your skillset:

I have some general knowledge of Java & PHP (expanding rapidly) and

would consider myself a very quick learner. I am very motivated when I

have a task at hand and generally will not stop something until it's done

to the best of my ability.

Tell us why you would be a valuable asset:

I believe I would be a valuable asset to this group as I'm always seeking

more to broaden my horizons and am more than happy to give back

whenever I feel I have enough knowledge to do so.

Elaborate on your achievements and future goals:

I don't believe I have any documented achievements on this site,

however I have accomplished a lot of personal goals. I would like to

learn programming much more in-depth than I have as of right now. A

more long term goal would be to sustain myself through online work.

Tell us about yourself:

I'm a 16 year old junior in HS. I was born & raised in Hawai'i. I'm very

hard-working, optimistic and ambitious. I hope to be a member of this

group in the near future.

Devil Dog - *August 9, 2013, 2:32 am*

Elaborate on your skillset:
I have some general knowledge in VB and know much about c#. I can also sell things very well. You name it, I can sell it. I am a salesman when it comes down to it.
Tell us why you would be a valuable asset:
I know I am not L33t or Ub3r, but I plan to upgrade very soon. I would be a valuable asset because I am very determined. If I set my mind on something then there is nothing in my way. I can accomplish tasks that are assigned to me without much help.
Elaborate on your achievements and future goals:
I don't really have many achievements, as for goals there are many. I would love to establish many achievements while in this group.
Tell us about yourself:
I recently turned 17 and started browsing this forum again, thought I would try and join an awesome group such as this one. I am from CA, and I really hope to be accepted.

DarkFlux™ - *August 9, 2013, 2:34 am*

good luck with all the application ! Some hq members will be hopefully selected !

#R00T~ - *August 9, 2013, 2:37 am*

Good luck to all users that have applied.

Uzi London ++ - *August 9, 2013, 6:13 am*

Elaborate on your skillset: I am a little above average when it comes to networking and protocols, but am still learning.
Tell us why you would be a valuable asset: I love doing things for the community and I would be a fast learner in pentesting.
Elaborate on your achievements and future goals: I have a booter :)sad it ised to bpot up to 9gbp/s until i lost half my shells. My futer goals are to becomr a lot better in pentesting, forensics and staying anonymous.Tell us about yourself: I love learning new things in hacking, whether it be whitehat or not. I am friendly and want to join Legion :>
I am sorry for misspells i am at work on my phone, i will correct spelling at home

420. - *August 9, 2013, 6:14 am*

Elaborate on your skillset:

Gaming
-I've been playing JK2 for 8 years (Jedi Knight 2)

Monentizing
-I can get shitloads of bots, I got 4000 bots in one day. I'm pretty awesome at spreading (and at all, heheheehehe)

Web construction
-capable of making good designs

graphics
-advanced photoshop skills
-ability to create great looking threads

Tell us why you would be a valuable asset:

If I want something, I will fight for it and achieve it. There is no impossible in my dictionary. I'm good at making thread designs, photoshop, and spreading/RATting. I always try my best to help people, even if I don't profit anything from it, just cause I like helping people. People find me easy to get on with, I can behave in various ways.

Elaborate on your achievements and future goals:
I want to get as many friends as possible, and sort out the fake ones. Friends are essential in life, you won't get anywhere without friends, face it. I'd like to be rich, and happy. I know how to be happy.

Tell us about yourself:
My name is Daniel. I'm from Hungary, and I'm 20 years old. I study chemistry, cause its just awesome lol and I'm kinda interested in that. I speak english quite well face-to-face and over the keyboards also. I'm very generous, if I can afford buying anything, I always share it with my friends/loved ones, NO MATTER WHAT.

LevelUp - *August 9, 2013, 6:23 am*
I'm going I ask anon if I can be the one who approves the applications, there is a repetitive pattern in the skillsets that I don't want to have in the group.

Bloodshot - *August 9, 2013, 8:33 am*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Before I go into my application, I would like to introduce myself. To start things off, my name is Jake; I have dedicated my entire time online almost to hacking/exploitation of some sort, beginning in 2010. I am very surprised I did not join HF sooner; everything that I know, and have learned over my prior experience as a hacker, was never taught to me by HF. I learned what I know today at my own pace, from my own experiences. I did not in any way use this site's tutorials, or help, at all. In fact, my first thread ever on this site to date, back when I first joined in 2012 is a coding thread. I will go into details on this shortly as I will now be going into my true application as to what the thread was about.

Elaborate on your skillset:

Coding
Coding was a very vital thing, and interesting thing for me starting in late 2010. My knowledge varies from each language, but I am very fluent in Python, Visual Basic/C#, PHP/HTML/CSS, and have a little C++ knowledge. On June 22nd, 2012, I created my very first thread. It was titled a, "Simplistic Bot Idea" in VB.NET. If you'd like to read into further detail of my thread, please visit the link located here: https://hackforums.net/showthread.php?tid=2608635

Social Engineering
This is a fundamental skill that all hackers should have knowledge with. My social engineering knowledge is not common, however. As an example, I have used many social engineering and customer service manipulation methods on AOL; I have gotten their billing department to swap the email on various original AOL/AIM accounts, most memorably crime@aol.com, filth@aol.com, melt@aol.com, and others as well, which I have sold on the market.

AOL Security
With AOL, I, and a friend of mine whom does not use this site had discovered a javascript error within AOL's password reset page. Big AOL hackers/sellers, such as James, Matt Buchanan (AIM: Dragon), Matt Mastowski (AIM: Dick), have used. The method would bypass the mandatory needs

to reset a password and simply take you to the password change page for the AOL email address. This began to get abused, and as far as I know one of the Matt's reported the exploit to AOL, which had it patched.
I also have much more knowledge with AOL, farther than just security exploits/social engineering. I along with Isolate and some others discovered a method to take back an AOL account with the account's cookies. This now since has been publicized, as Isolate posted the method on FK's website within the social medium section.

RAT'ing, keylogging, basic kid's stuff.
I have had all of these things down for such a long time. It's ridiculous. I see people in this thread actually putting this down as a skillset... If you don't agree with me, I understand. RAT'ing, keylogging, etc. has not interested me for months, if not years on end. These are not skills, and anyone can learn how to create a RAT server with DarkComet. I will not go into detail with this, this one should be short, as this group is about more than just the average kid with a RAT client.
Monetization
I have been spending a majority of my time towards monetization and gaining money from cracking & resetting social mediums (AIM's, Twitter's, YouTube's, etc.) -- which I sell within the marketplace. I applied for Illuminati as well, but I feel that this group is even better suited for me, so I thought I'd give it a shot. I have many sales threads on original items, most recently dated are the selling of the YouTube channel's Strong, Schmuck, the Twitter @Heard also. I am soon to be selling a lot more items. Currently in stock are the Twitter's @Albino, @Massacring, @Jebediah, @Investigated, YouTube's Slice, Lunatic too. I am very active within sections under the marketing tab, as it's the section that interests me most.

Tell us why you would be a valuable asset:

Activity
With this group, I feel like I would be quite active within the subforum. This matters because with no new posts and no activity under the subforum, the group and members begin to fall apart. There would be no structure without activity. I feel that I would get along with plenty users in this group, and it would feel as if it is a family full of "hackers", and with this I don't feel like I would be out of place. Being apart of the group, and bringing my knowledge, and presence is all a +1 for the group.
Diversity
I have looked through the applications here and noticed that there is not much diversity in hacking knowledge and experience. I feel that my application is in fact diverse, and my knowledge is not common; I feel that I could teach some members a thing or two about various things within my skillset, including AOL security, and private methods on social media site exploitation/social engineering/hacking/cracking/resetting. I see many applicants show no true diversity within their skillset.
Uncommon Knowledge
Some of the social engineering methods, exploits, etc. that I can preform are definitely not common knowledge. I feel that with my knowledge I could teach a few members within the subforum a thing or two when it comes to various subjects. I am very easy to work with, and I'd like to see myself as a helpful member to this community; and I feel that I would be a help to your group's subforum too.
Easy to work with
I am probably one of the nicest members you will meet. I do not judge members based on their forum status; I am almost always on HF unless I feel that I need a break, which I am usually only gone for not even a week. Even during vacation I do come on to check up on things, members, and how everyone is doing.

Elaborate on your achievements and future goals: I will make this as short as I possibly can. Achievement-wise, I have successfully exploited a large social site (AOL), as said before, many times, with various things/and outcomes. This is my largest achievement, and I am very proud of it. I

would be interested in learning SQL injection, and web-based exploitation as a future goal. I have not had the time to do so, and I have been focusing on other interests (mostly social medium related, and marketing.) I have written a tutorial on a way to make a link seem to be an image but actually it shall steal your IP address. Not a very big achievement, but it is something I can post a link to. If you'd like to look: https://hackforums.net/showthread.php?tid=2617015 -- in short, you give your victim a link, let's say http://google.com/picture.jpg -- it is actually a folder, containing a document named "index.php"; the link will redirect them to http://google.com/picture.jpg/index.php that is of course if there is not an actual *.jpg image titled "picture" under the domain's files. I am a high-school kid, and I'd like to graduate and see where I go from there. I have no interest in going to college, if I'm honest with you. College is just something that's not for me.

Tell us about yourself: I'd like to see myself as one whom is very loyal, if it interests me. In this case, this group interests me greatly. My word is not something to be taken lightly, or to be taken as a joke. I can be very serious, very competitive, but also be funny, and relaxed -- it all depends on the situation. There is a fine line between being blunt and blatant disrespect, and I am right on the line. I don't bullshit around if I'm serious with someone, nor do I take anyone else's word lightly. I'm an overall down to earth type of person. I'm agnostic/atheistic (unsure of my true religion.), and I am definitely someone you'd want in your group in my opinion. I am confident, and someone who tries their best at whatever I set my mind to. I have a couple friends in this group, and I'd hope to join them. Finally, I would like to say that I appreciate that I've received this opportunity. Thank you, Anonymous.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Understalker - *August 9, 2013, 8:35 am*
Some of these applications that are being posted are an obvious decline, although I am not the one to decide.

Some applications are amazing.

PM me for questions regarding Legion.

Elaborate on your skillset: I am a proffesional in PHP/MySQL/HTML and webdesign, my top online users at a time on my website is 800+ with a decent profit
Tell us why you would be a valuable asset: I would be happy to help members with my knowledge.
Elaborate on your achievements and future goals: Design and run a website with 1000+ active online users and a profit of $1500 a month.
Tell us about yourself: Weed

xMannyG - *August 9, 2013, 11:25 pm*

Elaborate on your skillset: RAT,KeyLogging and other Troll stuff:
The first time i joined HF I thought to myself and said that if theirs one thing i want to learn about Hack Forum it's how to troll people. Through being involved in different community activities and

learning from members i know that i can use a R.A.T and Keylogger to my full potential and teach others how to do the same.
JDB and SJDB:
I wasn't sure to put this with the RAT and KeyLogging. Anyways, I know how to use templates and post and make simple JDB sites to complex sites using clone method and just using basic HTML to make something quick and easy. I know and have expirience using generators as well for example Epic Java. I'm currently waiting for my purchase of Foxxy Java to try out the SJDB Addon since i do know how to use and can teach others how as well.
Social Engineering:
I guess i've always been good at this since childhood from talking the ice-cream man into getting free goods, to talking to Sony and getting a camcorder for a cousins birthday. I currently work as a Live-chat specialist at a Minecraft Server Hosting company and i know how to be social and talk to anyone with care and modesty. So i can ensure the best of quality to anyone talking to me about help.
EWhoring: One of my favorite things to do. Only because of how funny it is. I've been doing this for a while. Actually in 7th grade i would go and pose as a girl on facebook just to collect followers and likes, Just to get some 12 year old's horny, lol Trolololol. At the same time i have made good amount of money from eWhoring, About 450$ Which isn't very impressive but it's somethign i enjoy doing and wanted to post.
GFX/Designing:
I began to do GFX summer of my 8th grade using Adobe Photoshop and mainly focusing on Photo Manipulations and Logo Designing. Like i stated previously, I enjoy it very much and i love doing signatures for others. I also love teaching others about this because it's an amazing type of art and you can let your imagination go wild!
Minecraft:
I gave Minecraft it's own section due to how much it affects my life at the moment. Currenty i am a manager for a Minecraft Server Hosting company. I love working there and meeting new people and teaching them how to do Plugin Configurations. For example, teaching kids how to use plugins and how to make changes in the plugin config files. How to set up Minecraft plugins and helping others with running a server. I love this company and i know i can provide a benefit from it. So basically i can teach others on how to do Plugin Setups, Plugin Configurations and how to Setup servers!

Tell us why you would be a valuable asset: SocialEngineering: I feel that i am very social and can provide much assistance to other members along with the community!
Dedication: I am very dedicated in a task and in a group. I can dedicate myself to helping others and benefiting myself from the community. Even though i dont have much posts at the moment i know i can help others and in time have much more. Once i am told to do something i dont rest till it is completed and it's a habit since being a manager of a company has made me into something like this lol. I'm not trying to say that im superior since i run something. It's that im blessed with this oppurtunity to be applying to Legion.

Elaborate on your achievements and future goals: I guess a goal i have is to become a more stronger individual. Not from strength, but from friends and knowledge. Like my father says, a smaller man can defeat anyone using his mind. His common sense is a powerful weapon, and i wish to learn as much as i can and be able to teach others these things in the future. I'm currently in Highschool (last year) and i have this goal of learning as much as i can before the end of this year and moving out to college. I guess another goal is that, my father has glaucoma, And i want to become a optomologist someday and treat him. To make him see better again, the pain knowing that someone who used to take me to the cinema to see Toy Story now cant even see the end of the room. I want to cure him and one day i will.

Tell us about yourself: I'm 17 years old and a senior in highschool. I will be attending a 4 year college after this year since my acceptance and i currently am a manager for a Minecraft Server Hosting company. I've worked here for 2 years and i know how to set up Plugins, basic network and security. I am a Muslim teen who is simple to talk to and can help with whatever you need. I think i can benefit this group by helping with Minecraft help since you dont really see much of that on here and it would be cool to set something like that up. I can help with anything in my skill set and i hope i benefit from this group as well.

I Accidentally added a "[" twice when i tried to center the text. Sorry for Modifying it. it took me about an hour and a half to type so i hope it doesnt ruin my whole application..

Ch1m4zz - *August 10, 2013, 5:45 am*

Elaborate on your skillset: I have an Basic skill in Linux and Pro at Windows I Know basic Photoshop. And I play The Elder scrolls of Skyrim and Other stuff. I Dont know much about rating but Im a Good Web hacker! I can Program VB.net and some python!

Tell us why you would be a valuable asset:I can help other members And Im a Good hacker

Elaborate on your achievements and future goals:I wanna create the biggest list of Hacked Passwords in Hackforums! :)

Tell us about yourself: I'm 16 I play Skyrim I'm from Sweden Long as shit up in the north :) I got an Big skill in hacking and a pretty big hacked passwords list :D

Regulus - *August 10, 2013, 6:35 am*

Elaborate on your skillset: First of all i'm a member since February this year, which means i have not been here for a long time and might not have learned SO much, but i'm willing to learn anything and i won't give up on my goals. Now, I'm a pretty good and skilled ratter, i have been ratting for a while now, and to be honest in the beginning of my ratting "carrier" i needed much help. But now i know almost everything about it. I have Ratted people and hacked their Facebook pages, But i'm such a good person so i always give them back to the owners and give them a warning on how dangerous it can be to accept a exe file or a program file from someone you don't even know. So i can say right now i'm not a blackhat hacker. I think everyone on this planet has the same value and i love everyone<3

E-whoring: Once i started E-whoring it was very hard for me, but i learned so quick, my first earnings (After a week) was 20$. Proof: https://hackforums.net/showthread.php?tid=3426654

SE: At the beginning i was a bad SE'r but as soon as i started with E-Whoring i learned SE right away. I'm now a really good SE'r (In my own opinion, what you think about it i don't know).

HTML/PHP: I'm totally honest, and this is something i'm not good at all at, but i'm ready to learn it right away if it was a must.

Graphics: I'm not the best at Photoshop, but i know the basics in it, also ready to learn it more.

Bruteforce/Cracking: This is something i wanted to learn actually, i watched a few tutorials on HF which helped me a little bit, But many members on here also told me not to learn this as it barely never works, so i just stopped there and continued ratting instead.

Tell us why you would be a valuable asset: I'm a nice person to talk to, i am very social and i'm willing to learn other members on this forum what i can. I'm also willing to learn anything you want, and i will never ever give up if i'm starting to learn something new.

Elaborate on your achievements and future goals: First of all my future goal is to get approved for UB3R and upgrade. And also to learn CPA/PPD much more and start earning money there, once i have started and earning i'll absolutely donate to this forum the first thing i do, as i have learned a lot

of things on here in a very short time and i love every single one on this forum. I'm also ready to learn other members, beginners and new members etc what i can, and i will do my best to learn them. (Ratting for an example)

Tell us about yourself: I'm a regular boy being with friends and taking it easy, i'm never stressed, if i want to learn something new i don't care how long it takes, i'll learn it. Just turned 19, living with my mom at the moment, But i'm looking for jobs so i can start contribute with something to my mother. I was also born with a hearth disease which made them operate in a plastic palpitations into my body, so it's a miracle i'm still alive today. I'm not afraid to say i might be the kindest and most gold hearthed person on this planet, and i would never ever hurt anyone. Hope this was enough. I'm hoping to hear from you in the future Legion, and thanks for this<3

DyS- - *August 10, 2013, 7:52 am*

Elaborate on your skillset:
I have been learning VB.NET for about a year now and I can make programs such as My Minecraft Multi tool and quite a few more programs(I can show you my VB folder). I also have been a gamer since the age of 9 :P, I have played RuneScape, CoD, Battlefield, Homefront, WoW and many more. Recently I have been playing CoD and FIFA, I am also a well trusted RSGP salesmen as you can check through my rep/threads and posts. Probably one of my main skills is setting up Malware. I can set up pretty much any RAT, Botnet or keylogger, I have had up to 300+ slaves on DarkComet before which is ok I guess so I can help with spreading, crypting and pretty much anything anyone asks. I have not set up a RAT help center as there are so many and I see some people finding that annoying, but I would certainly be willing to set one up in the name of Legion and help other members develop their skills in Malware.
Tell us why you would be a valuable asset:
I believe I would be a valuable asset because I have knowledge and social skills as I have made many friends over HackForums and helped them and sometimes they have helped me too, I believe this would be a very handy skill as you can develop your skills with software and communities. I would also be willing to set up a RAT help thread or even just a Malware thread to help people with Hosting/Port Forwarding or SMTP Keylogger set-up.
Elaborate on your achievements and future goals:
My current achievements have been going from being RAT'ed to being a RAT'er in under a month. I have also been very dedicated to VB.NET going from making silly phishing tools for FIFA 12 to making Socket Chat client and PHP/SQL Login systems which I was quite proud of when I made. :P Another one of my skills could be helping people out with RuneScape as I have played that game for about 6 years(yeah, since I was 8 :o) even though I don't play it very much anymore I still can remember pretty much everything I did now as well as when I played the game.
Tell us about yourself:My name is Tom, i'm from North London and I'm 14 years old. I love coding, playing PC/XBOX games, Playing football, watching football and I would say helping others(but that sounds a bit cheesy :P). Thanks for reading this and have a nice day. :)

Worms - *August 10, 2013, 10:18 am*
Elaborate on your skillset: I know how to develop some batch stuff. I also know some basic exploits, but i would love to learn how to do them manually, i'm really into this.
Tell us why you would be a valuable asset: I can be a link between you guys and Brazil if you don't have one. Also, I like to help people and i'm very active on the forums i like.
Elaborate on your achievements and future goals: My main goal is to develop a freking awesome game in the future, but i want to learn as much as possible about computer science before doing that. I guess i just love information :P
Tell us about yourself: I live in Brazil and study Computer Science. I've been on the riots agains the government that happened now, and i am very supportive to the anonymous group. I'm also pretty a pretty respectfull member and i never rage over anyone. I also understand when people are having

difficulties with something and I take my time with them. I am very complacent to your cause, and i would love to be part of something bigger than the actual corruptive system.

P0G0 - *August 10, 2013, 6:52 pm*

Elaborate on your skillset: RAT's
Malware Removal
Malware
Stress Testing
DNS Amplification Alterations
Marketing
PPD / CPA
Computer Hardware/Software Intelligence
I own a successful, and one of the top stressers
Server Management (Linux)
Website Administration
DDoS Mitigation
Businessmen Attitude
Posting Quality Tutorials
Quality sub-forum post whoring

Tell us why you would be a valuable asset: I can contribute and help fellow members. I will try my level best to contribute the community I have many methods of SocialEing, from getting CocaCola bottles to electronics, I currently have a huge collection of SE method pack and I planning to give them away.

Elaborate on your achievements and future goals:Enjoy the community as much as possible, contribute, build a botnet with C++ and rails, design a booter, write an E-Book, 24k award. One of my top priorities/goals in life is to complete college, and become a "Malware removal expert". Although I have successfully removed malware from countless infected computers; I still would like to gain more knowledge in this subject.

Tell us about yourself:I am a very enthusiastic and hard working person. I am always up for the task and always put quality first. I am very respectful and very well mannered. I enjoy learning and giving knowledge back to the community. I have always been been looked up to by others; I tend to be a role model for those around me. I hope you consider my application, I am looking forward to being accepted. Good luck to all other applicants!

Fly By Night - *August 10, 2013, 11:53 pm*

I will be questioning some applicants further.

0BliVi0N - *August 11, 2013, 8:46 pm*

Elaborate on your skillset:
I have many skills. Including:
- Programming
- Monetizing
- Graphics (not A LOT of knowledge, but I can make some cool stuff)
- Great Social Skills
- Great Idealist
- and others.

Tell us why you would be a valuable asset:
Well, when it comes to ideas, and comming up with beneficial methods and such, I'm your guy.

Being that I'm a programmer (VB.NET), I have developed programs made to benefit others. Like a Traffic Exchanging program that supports websites like adf.ly Click Here to see it
(Thats the only thread I could find of it, with the most info, and a screen shot.)
Other than that, I have fantastic ideas for making money. And I would just love to expand my knowledge, to come up with better ideas that would benefit not me, but others as well.

Elaborate on your achievements and future goals:
Achievements
- Created a Pinterest Bot (never released)
- Made $42 in one day
- Created a small bot to view desired pages, and have had it installed on 250+ computers. Allowing me to get daily traffic to any link at any time.
- Created YouTube phishers in the past, and have gained about 100+ youtube accounts
- Developed a traffic exchange program, that supports adf.ly and other links like it.
- Came up with outstanding monetizing methods.
- Ranked a few videos in google with SEO. (Currently working on one now)
- and others
Goals
- Complete my journey to $50/day. (Has to do with my current project of ranking a video in google)
- Recreate my traffic exchanging program.
- Recreate my pinterest bot.
- Recreate my forum, and make it more successful than ever!
- Create an advertising program.
- Long term goal of $200 - $500 per day online
- Have a successful income source, and retire at the age of 35 or earlier.
- Make a living online, and never have a real job.

Tell us about yourself:
Just your average 16yr old guy with a dream to pursue and conquer haha.

CRT - *August 12, 2013, 5:00 pm*

Elaborate on your skillset:

Gaming
I compete competitively and have attended two LAN events. I play gamebattles very often also.

A few of the games I own:
Call of Duty: Black Ops 2
Call of Duty: Modern Warfare 3
Call of Duty: Black Ops
Call of Duty: Modern Warfare 2
Call of Duty: World at War
Call of Duty: Modern Warfare
Fifa 11
Fifa 12
Fifa 13
LA NOIRE
FIGHT NIGHT CHAMPION
Rainbow Six Vegas
Minecraft
GTA IV

GTA SA
Skyrim
Halo: Reach
Halo: Wars
Halo: 4
Assassins Creed III
Assassins Creed II
Assassins Creed I
Any many more.

RAT's and IRC Bots
I'm more than advanced in both. I spent a vast majority of my time in the two sections and learnt a great deal. I'd say I could setup any RAT you put infront of me within a minute. I understand all the functions on various RAT's and could give you a brief description on what a certain function does and why its used. I'm also very knowledgeable in the area of IRC bots such as but not limited to; setting up IRC Bots, using the functions. I've also owned large botnets before.

Coding/Programming
I've been coding in C# for a while now. I wouldn't say I'm the 'best' but I'm definitely fluent in the subject. I'm also fluent in XSS, SQLI and PHP.
I can also code basic things in HTML and Java. Amongst other things.

Social Engineering
I've SE'd quite a few large companies now such as;
Microsoft
Sony
Toshiba
McDonalds
Cadburys.
and a majority of 'Minor' companies.

Graphics
I'm pretty good at using Photoshop and doing things such as but not limited too; Sigs, Banners, Avatars.
Here is an example of my work;
Spoiler (Click to View)

Tell us why you would be a valuable asset:

I believe I'd be a valuable asset due to my skillset in said things above. I've also posted tutorials which have received pretty decent feedback on HF. Here are a few;
?? [Easy to follow] How To Hide .exe File's Into .jpg - Tutorial [Must see] ?? by Curt.
?? [Updated - HOT] How To Change Your IP Address - Tutorial [Easy to follow] ?? by Curt.
?? [HOT] How To Find Vulnerable Websites - Tutorial [Quick & Easy] ?? by Curt.

I also believe I would be a valuable asset to Legion due to the my willing for helping others and knowledge. I'm 18 so I'm very mature and have patience to help others. I treat everyone equally whether they're ub3r, L33t or not upgraded. I'll always be willing to make tutorials and do giveaway's in Legion's name. I'm also great when it comes to ideas and have the knack to do any given task. I'm also very active on HF so I'll be active in the sub-forum.

Elaborate on your achievements and future goals:

So far my achievements, I elaborated on above. I learnt everything I know via tutorials/myself. My future goal(s) would be to join Legion, continue learning about things I'm not the most fluent in, such as; coding in PHP, HTML, C++ and also graphics.

Tell us about yourself:
I'm 18 years young, I work an average job (In a warehouse) and spent my spare time either gaming, on HF or socializing with friends. I'm very easy to get along with and very generous. I enjoy helping members and If someone requests my help on something, I'll always try my best to satisfy them. I feel i'll be a great addition to the team, if I were to be accepted.
?

Elaborate on your skillset
(Click to View)

My skill set and what I have learned

I learned HTML when I was 8, began to program in other languages when I was about 12, I started off with Java, then went to C++, then VB.NET, then C#.
I've released 10~ applications since I was 12~.
At this present given time, I know the following programming/scripting languages (in alphabetical order):

- ASM (FASM syntax mostly)
- Bash
- Batch/DOS (a little, I never really bothered to program batch scripts)
- C++
- CSS
- HTML
- Java
- Jscript (java script)
- PHP
- Python
- VB.NET

Applications that I have developed can be found in my existing posts.

I currently favor in the art of reverse engineering the following languages:

- Java
- VB.NET

As you can clearly see, this list is very short, and thus I am still learning the art of reverse engineering.

To be completely honest, I'm not one of the most experienced users when it comes to website exploitation, although I do have the knowledge to do so.

I'm admin on a forum named "Kawaii Forums", you can see the link on the image in my signature.

Tell us why you would be a valuable asset

(Click to View)

I think the ulterior motive for attempting to join Legion would be to learn more; to fill my mind up with huge amounts of knowledge as possible. I personally don't believe that I, as a HF user stand out among the millions of users, I'm just another user, learning, but although in my position, I do have knowledge that I still need to share, and still, learn.

So, for that reason, I'm not going to say that I'm "valuable", although, I would define myself as unique in my own, small ways.

Some contributions I have made to this community (click images to be taken to the post(s)):

There would be more, if not for the maximum image capacity.

Elaborate on your achievements and future goals

(Click to View)

I have never set myself definite goals in my life, but I do have achievements I would like to cover during my lifespan:

• Develop a world known application/game

- The thought of millions/billions playing and having fun while playing/using something I have made is such motivational and seems like an amazing goal, although, this is what a lot of people also want.

• Earn thousands (maybe even millions, who knows?)

- I'm not doing what I do for any financial gain, but seeing money and income come from my effort is such a good feeling.

• Exploit one of the most protected data servers known to the world (this would feel so fucking good)
- Having internal access to one of the most highly protected data servers in the world would feel so empowering.

• Get a stable relationship (even with a friend)
- I think one of the main reasons for this goal is because I'm a fan of animated romantic comedies, I love seeing a story unfold that involves romance (and comedy), even better if the story starts off as these two hating each other, like SAO (an amazing anime).

Tell us about yourself:
(Click to View)

About me and my life

Ever since the age of 6, I've been fascinated in the world of computing, my mother & father were (and still are) computer literate. At the age of 8, I learned HTML, then at the age of 11, I got my first laptop, although I didn't really do too much activities with it. After about one year of having Windows 7 installed, I began looking into Ubuntu Linux - at this point, I didn't really understand much of anything, except the basic concepts of Windows and the interns of computers. To cut to the chase; I eventually installed Ubuntu on a separate partition from Windows 7, and thus I could dual-boot both Windows 7, and Ubuntu.
I didn't configure my Ubuntu install very much, and in fact I found it very linear and it was quite an eye-sore seeing it packed with these redundant applications and admin options, neither was the appearance too appealing either - by this time, I was hopping over from different operating systems; I found Backtrack Linux, as soon as I set eyes upon it, I burned it to a disc installed it, and I honestly thought something along the lines of:
"This is amazing, I'm going to hack so much shit."
I quickly realized that it wasn't as easy as I thought, although, despite the fact that I had no idea what I was doing, installing Backtrack was a great opportunity and a great turn in my computing life - somewhere, I believe that I wouldn't be where I am now if it weren't for installing Backtrack. I tried my hardest at that moment in time to grasp the "feel" of what I was doing - first I learned about the metasploit framework, I tried exploiting some local machines (the laptop I was exploiting ran Windows Vista), to begin with, I learned about the meterpreter shell and how it can be spawned in an executable file; I built one and ran it on my other laptop, and I saw the shell connecting to the port I had open - to be fair, I was pretty happy, but I still wanted to learn more, I wanted to dive deeper, so I done exactly that - I began learning about exploits, payloads, and vulnerabilities, sure, at the time it was all hard to comprehend, while I was still at that level of computing, but I followed through with it.
Somewhere in between doing all of this, I began to make mods for a now terrible game, and I ended up being guided here for help - without all of you here at HF, I wouldn't be where I am right now.
HF has changed me as an individual person, I myself have developed my personality and my way of thinking.

Me in a nutshell:
I am a very serious/tense person, even in casual situations.

I'm not afraid to speak my mind, nor am I afraid to disagree with other people, no matter what the outcome may be.
I'm also a lover of anime (I watch h too, but I'm not a lolicon).

Feel free to contact me inquiring my application to join Legion.
I apologize for any grammatical errors.

DarkFlux™ - *August 12, 2013, 10:12 pm*
good luck with all the Application . it is your only chance to get into Legion

R3callingE3L - *August 13, 2013, 1:46 am*
Elaborate on your skillset: I am a gamer. Xbox 360 and PC. Dota, COD, and Halo. I am good at moding in these games. I have a basic knowledge of Java and Python. I can read and write Python pretty well. I am currently learning Java and C++. I am also good at persuasion. I can convince most people to do what i want.
Tell us why you would be a valuable asset: I would be valuable because I am learning more everyday and in the long run i could be a great coder. Also, becasue of my persuasion skills.
Elaborate on your achievements and future goals: Well, i learned Python which was something I had always wanted to do. My future goals include learning more languages, create apps, become a hacker, and work as a Gray hat hacker.
Tell us about yourself: I am 14. I live in the USA, and am going to the most prestigious high school in the state. The schools specialty is programming. I own 3 dirtbikes (yes, I bought them all) and lots of electronics. I love my toys, and am always on my laptop or iPad. I am always looking for something new to learn, and I think this group will teach me many new things. I can be reached at any time for anything. PM is you need/want proof of anything that i have said.

Metalocalypse - *August 13, 2013, 2:29 am*
Elaborate on your skillset: I have a good understanding of hardware and troubleshooting.
Tell us why you would be a valuable asset: I have over 1000 posts in the Computing sections trying to help people with their hardware questions.
Elaborate on your achievements and future goals: I plan on delving into more advanced topics such as hardware architecture.
Tell us about yourself: I'm a current polytechnic student finishing a Diploma in IT specialising in IT support and Networking. I also enjoy video games and playing/writing music.

Shanks - *August 13, 2013, 3:56 am*

Elaborate on your skillset:
I could read and understand HTML/PHP/"little java", I'm currently working on VB.NET.
When I really want to do something, I do everything to complete it! That's probably the best property I have.
I have been ratting sense a couple of months ago and build up some knowledge in that.
I have been playing Runescape in 8 years, so if you want to know ANYTHING about RS just ask me :)
You can ask me about CPA/PPD aswell.
I have also used some methods on Ebay.
This is not about me.. but I have good contacts :)
[IMG]http://i.minus.com/ieF7N7WNk5zde.gif[/IMG]
Tell us why you would be a valuable asset:
I can contribute and help fellow members.
I will try my level best to contribute the community with the things I'm at, I also also try to get better in those things and other things, so I can help even more!
I will learn and teach
[IMG]http://i.minus.com/ieF7N7WNk5zde.gif[/IMG]
Elaborate on your achievements and future goals:
I will focus more on coding, learn more languages and get better on the ones I have started.
I'll try to earn as much money as I can Online basically, and on the road I'll get a lot of knowledge in

whatever I do.
[IMG]http://i.minus.com/ieF7N7WNk5zde.gif[/IMG]
Tell us about yourself: I'm studing, spending a lot of time on the computer as well..
I'm a cool guy from Sweden.

Thanks,

Shanks

Business - *August 13, 2013, 6:00 am*

Business's Application
Elaborate on your skillset:
I am extremely skilled with RATs, IRCbots, BTC/LTC Miners, keyloggers, and cracking tools (Multiforce, etc, and making the combo lists/ proxy lists for them)

I also excel in advertising and marketing.

Tell us why you would be a valuable asset:
I pride myself on my professional attitude and kind treatment to all users, and all people for that matter. Respect is earned, as is trust. I try to earn the respect and trust of all the members I come into contact with, and that makes me very valuable to your group.

Elaborate on your achievements and future goals:
I post HQ threads in the RAT Section often, I am the owner of Remote-Filehost (Simple site), I plan to release a "RAT anyone you want" service, where I will help you RAT people you know, or money back. I feel this will bring me a good amount of clients. I am planning to open an account selling shop once I store a good amount of them. (Almost there) I am going to release a few ebooks as well, on topics such as spreading. I aspire to join a group and help with some of their projects, and even start some new ones.

Looking forward to having multiple products here on Hack Forums.

Tell us about yourself:

I am a senior in High School. I am on Hack Forums most of the day, except for Saturday. I love business, which is why last year I took Business Law in school. I enjoy straight forward deals, no "ifs, ands, or buts". I do not deal with unprofessional people, and I am loyal to those with which I do.

Hope you enjoy my application, tried to be straight forward. Enjoy!

SkyRider2 - *August 13, 2013, 6:11 am*

Elaborate on your skillset:
Great socializer with our kind. I'm a programmer and have various skills in VisualBasic and PHP. I'm also an asset to thinking (Great thinker) and find a solution to everything.
Tell us why you would be a valuable asset:
I'm passionate about my fellow friends. As in being with legion i will do my best to make us strive to success and help all members in need of my knowledge.
Elaborate on your achievements and future goals:
My main achievement on this forum is to help, succeed and become someone that people stop

and look at. As that is for my goals as well i'm learning something new everything day and i'm truly grateful to be apart of the experience.
Tell us about yourself:
I'm 17 year old male, i tend to have a cheeky kick about myself and will always stick of to those who deserve. I speak the truth and don't bitch or beg. I find myself as the kind of guy that will go all the way for you if you help me out or leave you stranded if you treat me like shit. I'm out going and usually and my karizma startles people. I'm a all around fun to be around guy i've been told.

That's me ^.^

Friday1995 - *August 13, 2013, 6:32 am*
Elaborate on your skillset: I've got a vast knowledge on RAT'ing, E-Whoring and Social Engineering. Growing up just as the technology hit it's breakthrough has been a major benefit to me. I'm able to know exactly how the youth of today think, what they use, and how they use it. This enables me to E-Whore fairly well, and can get my chosen victim to open up my server within seconds of talking.

Tell us why you would be a valuable asset: I would be a valuable asset to Legion purely because of my ever-growing knowledge. I know exactly how the youth of today think, and what they use. This can be passed on to my fellow brothers for any projects or daily tasks they run into.
Elaborate on your achievements and future goals: I'm going to be honest here, I haven't run into any big achievements yet worth mentioning, but I'm hoping that joining Legion will open up even more path's to big achievements. My future goal is to have a vast knowledge within networking security, and to possibly work for the MI6 within this sector.

Tell us about yourself: I'm currently 16 years old and I live in London. My thirst for knowledge for topics within Hack Forums is completely real. In 3 week's time I'm starting a college course based on Computer Science. This will cover a vast majority of Networking Security, I'm very much looking forward to it. I'm the type of person that spends more time helping other's than I do myself, I class this as a positive and a negative.

P.S Description (Click to View)Quite a few of my negative rep's were to do with me putting in my signature that I just bought L33T, and a lot of them lied saying it was to do with something completely different when I've never spoken to them before.

Gee4rce - *August 13, 2013, 9:39 am*
A member of Legion suggested me to apply,
but honestly i have no idea on what this could be usefull for in any way... You're group description only tells (as the groups Banner allready does) that "You are Legion!".

I have no problems with giving or sharing - but on the other side i can't see any benefits a membership in Legion would have. Thus it doesn't raise any interest.

LulzCat Wrote:Please do note, we will have mandatory tasks each month to stay in Legion.
Not meant to be nasty,- but this honetly makes joining your group even more unattractive...

Greets, Gee.

Agitator - *August 13, 2013, 2:11 pm*
Elaborate on your skillset:I am a graphics designer, ranging from UI/UX all the way to website design and even some photo manipulation. I have coded multiple forum designs in the past for clients and know mybb, ipb, and vb very well. I have just started PPD/CPA and I have a very solid foundation in it, my knowledge is vast and I am a quick learner.
Tell us why you would be a valuable asset:I'd be willing to create mock up designs for any

programs created by other members in the group and would help them picture their UI for their projects
Elaborate on your achievements and future goals:I was accepted into Fly By night, then known as Graphics Masters very early in my hf career and now after a week of CPA/PPD I have made a total of 100, which is very rapidly increasing.
Tell us about yourself: I am an 18 year old off to college in a week. I love to design and anything that turns a profit. I love coding websites in a minimalistic style and love to spend time with friends, what more can I Say.

Niggz - *August 13, 2013, 2:51 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
Batch
VB.NET
RATs
C++
BoTNeTs
Xss
Backtrack 5
Swatting
Python
Delphi
C#
Exploits
Trolling
Human Manipulation
SQL Injections
GFX
Tel Net
HTML
PHP
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I think I would be a valuable asset to Legion because I know alot about hacking and I LOVE to teach my knowledge of hacking to others who want to learn it. Also I try to be as HQ as possible on HF.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I wish to make my own computer company like Microsoft when I am older.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: my name is GHOST and I love computers. I just can't stop obsessing over them. They are so cool the way that they work and everything. That is why I learned so much about them, because it sparks my interest very much.

tcatcatca - *August 13, 2013, 6:18 pm*
Elaborate on your skillset: Hello, I want to join Legion as a student, I have lots of background knowledge, and will learn easily if given the chance. I am a pretty good hacker, but I think I would improve alot with this
Tell us why you would be a valuable asset: I would be a valuable asset because I am active, and once I am taught by Legion I will be able to hack much better than I do today, and will help out with anything you need
Elaborate on your achievements and future goals: Most of my achievements are smaller, I have

basic knowledge of SQLi, Reaver, PHP, MySQL, Visual Basic 12, and have a lot of general hacking information. I am also very good with SE, Im just a naturally persuasive person
Tell us about yourself: I am 16, and take half of my classes online, half of them in-school, and ever since I started HF a few months back, I have been trying to help out as much as I can. I am a Black/Grey Hat Hacker, and like to help out with anything needed.

Hopefully you will consider my recruitment, I would appreciate getting to share knowledge with you guys.

Guide - *August 13, 2013, 7:15 pm*

Elaborate on your skillset:Gaming / Programming / Computing
Tell us why you would be a valuable asset: I talk alot
Elaborate on your achievements and future goals:I plan to become a computer programmer
Tell us about yourself:I like to go fishing , i have no friends , i stay on computer most of my life , game most of my life, I get despressed really easy.

?????? - *August 14, 2013, 4:36 am*

Elaborate on your skillset:
I am very experienced in marketing. i used to run an ebay business as well as wholesaling. and currently i run an unlicensed
small tech solutions business irl. ive also sold many things on hackforums of course. always with customers in mind.

Hacktivity of course. i dont believe in malicious acts against others unless they are well deserving. Ive used rats
and practiced spreading and social engineering to great extents. I also dabble in encryption, cracking and have
become increasingly good at doxing.

Ddos. I have been fascinated with stressers since i first learned of them when i was younger. learning everything i could
about shells and sources and scripts. I consider it a bit of a passion. i run misery booter. not for money but because
i have put so much time and so many hours into it. it was a dream come true and i consider it one of my greatest achievements
although it isnt that popular (yet).

Coding. I have learned alot about web development and can create basic websites and edit any code to my liking. most experienced
in php. i am currently learning vb also as a start in a different direction.

I also love video games and playing them online competitively. i find this off topic so i wont elaborate.

Tell us why you would be a valuable asset:
Well aside from my skills which i am willing to make use of in any beneficial way possible. I love helping. i achieve a sense of
self satisfaction when i help others and if ever i get the opportunity to teach someone something.
I am also very self motivated and driven to succeed.

Elaborate on your achievements and future goals:
well after 8 months of ups and downs i have completed misery booter and hope to only grow it from here on out.

I ran a successful crypting service and felt very appreciated for it. i consider that an achievement.
Just the fact that i earned ub3r was a great achievement for me. As far as the future goes one of
my goals is to see misery booter succeed. Also i would like to learn more so that i can create my own crypter.
Another huge goal is to get my business license and for my irl business to succeed enough to support my family better.

Tell us about yourself:
Ive gone by misery everywhere online as long as i can remember. My name is chris. i am 22 and live in the us. ive always
been extremely self driven and had a strong moral stance against tyranny and corruption especially in the government
and against certain freedoms. I am an atheist and very firm at that. With strong arguments to support my belief. Richard Dawkins
is one of my idols. I love philosophy and science. I have a family and what i like to think of as a productive life. I am fascinated with
coding and "hacking" and love to aqquire knowledge. I play alot of games to blow off steam and i am a gun enthusiast. Thank you.

Water Aura - *August 14, 2013, 6:20 pm*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Elaborate on your skillset:
I have a wide range of skillsets from
RATing, Coding(Lua,PHP,Javascript,MySQL, and HTML),
SQLi(Basic understanding) , RFI(Basic understanding), XSS(Learning in progress)
I am currently messing with PHP and XSS as they are very interesting, I've made a simple login using the PHP Sessions and using MySQL in PHP

Tell us why you would be a valuable asset:
I would be a valuable asset as I will help/contribute tutorials including helping/discussing things with other members of Legion
I am also very nice to people I speak and have conversations with, which is very hard to find in some people.

Elaborate on your achievements and future goals:
I've post very high quality threads in the RAT's section and I've mainly learned languages alone
and only use google to help me. I also want to learn how to
crack Wifi passwords or "hack" into Wifi networks as that is a very very interesting thing I want to learn, I also want to learn how to profit online so I could have enough for my future self for ordering food.

Tell us about yourself:
I am 15 years old and live in the US. I enjoy playing tennis, as well mostly coding as a hobby.
I play FPS's such as (CS:GO,MW2).
I don't play any consoles that much due to school.
I am not the coolest in school neither the most bullied either so I have a easy life.

? I hope I get accepted

xESWx DEATH - *August 14, 2013, 10:05 pm*

Elaborate on your skillset:
I am good at gaming
Learning C#/C++
I know a bit of lots of programming languages i.e python, php, js etc...

Tell us why you would be a valuable asset:

I think i would be a valuable asset to LEGION for my ability to work hard for accomplishment and offer any advice to any other members where i am broader in.

Elaborate on your achievements and future goals:

Well i plan on making my own crypter and a heavy hitting booter in the near future once i working out algorithms and network programming.

Tell us about yourself:

My name is John, I am a proud Canadian and I am planning on going into the Canadian Forces next year. I am going to take computer engineering and science course in the military's university. After i serve in the military for a few years i plan on becoming a game programmer and thats what im all about.

DarkFlux™ - *August 14, 2013, 11:21 pm*
i have seen a good HQ Applications ! good luck to all!

Bag - *August 15, 2013, 1:25 am*
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:

--Security--
-Familiar with Metasploit, Backtrack, and Kali + SET Framework
-Familiar With virus removal
-Lots of Whaling experience

--Coding--
-Understand basic concepts:
-Such as loops, functions, and data management regardless of language
-Basic knowledge of C#/VB.Net
-Moderate skill in iPhone Dev including: Unity & Objective-C

--Web Construction--
-Capable of creating a website with moderate ease
-Basic Knowledge of HTML and CSS
-Minor understanding of PHP
-Great with Organization, Layout, and Appearance
-Setup, Modified, and even Nulled scripts

--Monentizing--
-Basic understanding of Crypto Currency(Bitcoin & Blockchain.info API's)
-Have used CPA networks
-eBay marketing
-Youtube Page Ranking
-Adsense exchanging
-General HF product selling

-Lots of work with social media promotion

--Graphics--
-Moderate use of Photoshop
-Can create decent looking thread designs
-Have made many logos and themes for my own websites

--Gaming--
-Xbox Modification
-Account Unbanning
-video gameplay + editing
-Bug Abuse
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:

I would be a valuable asset to legion because I am a jack of all trades!
When I take an interest to something I will spend countless hours learning all I can about that topic.
This makes me great for groups, because I will actively participate and help other people to learn alongside me.
I have found the best way to better your understanding at something is to teach it to someone else.
As such I love helping out in any way I can. I pledge to make all my post under the legion name top quality.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:

I have learned many things since I joined HF.
I'm not sure what to consider an achievement.
Maybe learning to code or how to make my own websites.
Maybe helping out fellow members in need or sharing my personal money making methods with the community.
Ultimately I feel as though what I have learned has all just been stepping stones to what I will achieve in the future.
I am very excited to announce that I will soon be starting my own web business (not a Forum or PPD or Affiliate site).
No I'm going to be launching my very own company that has to deal with Bitcoins.
If my goals are met accordingly, then that will be my biggest achievement!
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:

My name is Gage Bachik.
I am nineteen years old and am about to attend the University Of Arizona for Business and Entrepreneurship.
I am very outgoing and friendly. I like doing things just because I feel they are right or nice, not because I expect anything in return.
Friendly members make me happy, and I do my best to be friendly to others <3

--Thank You for taking the time to read and consider my application--

This is Legion, not the Illuminati. This group is about hacking, not marketing.

Dan Smith - *August 17, 2013, 1:51 pm*

I strive to be as professional and HQ as possible (in this application). English is not my primary language and grammar mistakes may occur. Please read my application with this in mind. Thanks in advance.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Skillset:

RATs and keyloggers
Every child interested in computers starts off being a skid. When I first found out about VBScript and MS-DOS commands, I was amazed by the possibilities and felt like a really cool computer guy! I think one of the last steps in being a skid is using RATs and keyloggers. I felt the same discovering these and immediately bought some installs to play with. During my final stage as a skid, I've learned a lot about these and ultimately 'mastered' them. I'm currently reading some books on programming with C and in-depth books about internet protocols, and eventually I want to write my own HTTP RAT.

General 'hacking'
I do not consider myself a hacker (yet). Hopefully, I can proudly call myself this in the future, but I have not achieved anything that I consider actual hacking. I've 'hacked' my way into my school's network, but that was to blame on faulty security and the fact that they're still using Windows XP... (I did not use this for any personal gain, I successfully (and anonymously) reported it to my school. After several threats of posting personal info and (unencrypted) passwords of 1250 students online, they finally CHANGED THE PASSWORD...) Well, let's just continue...

One who can hack into a network, successfully rendering its security measures useless, truly understands security. I strive to be that guy one day.
And I'm not talking about brute-forcing your neighbors wifi...

Video Editing and other FX
I've been doing video editing and special FX for a long while now. It basically started with some school project, and I decided to do more with it. I've spend hours and hours watching tutorials and I've gotten pretty good at it, if I may say so myself. I may be looking to get a job in this later in life,

but for now it's just one of my primary hobbies.

Learning
I consider this one of my skills, as I see a lot of people have trouble learning. I'm an extremely quick learner, and I love to learn which helps doing it quick. Especially on the subject of computers, network security, and programming: if it interests me, I'll be listening.

(I do not consider 'Gaming' a relevant skill for this application. Do not get me wrong and think I don't consider gaming a skill at all, because I sure as hell do. I play lots and lots of games, I spend way too many time on it. Time I should spend reading and learning.)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Would I be a valuable asset?

I don't think I would be a valuable asset on short term. But on long term, I could become a very valuable one. Because of my 'learning' skills, there will be lots and lots of knowledge I can, and I want to share over time.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Achievements:
Mastered the Latin, Greek, and Russian alphabet
Made it to the age of 16
Made money out of dumbass pedo's on the interwebs
Finished elementary, skipped one year
Got to 5th grade of Gymnasium (highest possible education in high school in The Netherlands)
Learned HTML, Visual Basic
DDoS'ed a site offline
DDoS'ed a home connection offline
TL;DR: I achieved nearly nothing yet...

Goals:
Learning: C#/++, Java, PHP, Perl, Cocoa, Python
Mastering HTML
Make an actual short film with my new camera
Go to university/college
Become captain of a commercial plane
Regaining my virginity (still figuring out how...) to become the ultimate computer nerd

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

About me:
I'm probably not your average 16 year old Dutch guy. I'm in 5th grade Gymnasium, high school (Dutch system). I literally don't need to do anything at school or homework, that's how easy it is for me. I've got way too little time after school to read all my books about programming and computers, so I do it in class. I play on my PS3 too much. I get friendzoned too much. I'm a rational thinker and a science-extremist. I go to the cinema at least twice a week with friends. I love music and been to a few concerts last year including the Red Hot Chili Peppers and Coldplay. I like a party and a (few) beers every once in a while.
In real-life I'm the guy who 'helps everyone with his/her computer problems'. If my uncle, mom, or grandpa needs anything computer-related, I'm the guy they always ask for. But I guess that's the story for 9 out of 10 guys reading this.

Thanks for the consideration. If you need any information about the Dutch school system (or anything else about my application), please feel free to send me a PM. ?

#R00T~ - *August 17, 2013, 1:52 pm*
Good luck to all users that apply for Legion.

Anonymouse™ - *August 17, 2013, 3:33 pm*
Elaborate on your skillset:

Java, C#, PHP, HTML and CSS. Advanced knowledge of reverse engineering Java applications through ByteCode manipulation and the Reflection library.

Tell us why you would be a valuable asset:

I'm a passionate programmer and don't mind helping any fellow members. Also I really love teaching others the art of programming.

When i create a program then high quality is my first priority to get the users the best. By giving high quality software and help, this group will be recognized for its professionalism.

Elaborate on your achievements and future goals:

I achieve new knowledge and skill over time and i'm able to use these to my advantage. For example I've made certain cheating programs to change/read obfuscated Java code and gathering new field names with bytecode manipulation.

Tell us about yourself:

I'm currently in College 2nd year studying to become a succesful software developer, I've been programming since i was 7 years old and still going ;).

Zink - *August 17, 2013, 6:09 pm*
Tell us why you would be a valuable asset: I think I would be a valuable asset to the group because I'm always active on the forum, everyday on I try to be as active as I can and learn new things every day. I will bring more Respectful and try to increase the group popularity and services.
Elaborate on your achievements and future goals: My current Achievement on HF is getting to know more people on the forum, being able to be more interactive with the things I learn, from this site I learn more about RAT, Decrypt, Crypter, Booter, Shells, etc. My Future Goals is to try to get more aware about the forum, learn more about coding, basically just learning about everything I can. Later on in life I'm hoping to go to college in Computer Engineer and Coding because everything is very interesting and I like learning since it increase my knowledge about many thing that can help about my profession.
Tell us about yourself: I'm 16 Year old and live in the United States, people know me by the name James or Grassy, I joined HF a year ago but I made a new account early this year since I forgot my old password since I was gone for like 2 months, not really a problem. I know I will be here for a long time, I also like helping if I can on some problems, and I spent most of my time in the Hacking Section, Gaming (PS3) Section, and Minecraft Section. Sometimes if I'm selling few products I will go to the marketing place.

Hope I Get Accepted ??

H4xorFoReVeR - *August 17, 2013, 9:05 pm*

Elaborate on your skillset:
Gaming:
-Competitive
-Casual
Graphics:
-Creative and Artistic
-Currently taking Computer Graphics and Design classes in High School
Web Design:
-I know how to make a simple website.
-I know HTML, CSS,PHP, and jQuery
Coding:
-HTML,CSS,PHP, and jQuery
-Javascript
-Python
Other:
-Quick Learner
-Resourceful
Tell us why you would be a valuable asset:Like I said above I'm resourceful and a quick learner. Everything I know now about computers, programming, and things like that I've taught to myself with the help of reading forums like this one! I might not be an expert on things but I'm always learning.
Elaborate on your achievements and future goals:I'm not really big on setting goals, but if I was going for them one would be getting into an official group. I also wanna go to college to have a job that has something to do with computing. I don't know yet but Im young and I have lots of time to choose. I don't have very many achievements that I can show off or tell about, but I'm currently designing a website for my dads business that he's starting up.
Tell us about yourself: My name is Austin. I live in the United States and I'm a 14 year old freshman in High School. I love music preferably Dubstep. I'm very good at math and English is my worst subject. I like to play Xbox Live with my cousin Braden, or some of my other friends. Hack forums is where I taught myself everything I know about computers, programming, and hacking.

DarkFlux™ - *August 17, 2013, 11:48 pm*

Good luck to All the Application ! hope the good will be Accepted ! put in your efforts

Im gone brah - *August 18, 2013, 5:02 am*

Got any question regarding legion? HMU...

BisualZ - *August 18, 2013, 5:39 am*

[img]http://1.1.1.5/bmi/i.minus.com/ieF7N7WNk5zde.gif[/img] Elaborate on your skillset:

Social Engineering: Social Engineering is my ultimate skill. I am more than 2 years in the scene of SE and I have achieved to get many small and big things by "hacking" people's minds. I have stole products like MSP(2x4200), Xbox Live Gold(1 year subscription), DLCs, 1xMicrosoft Keyboard, 1xMinecraft Premium Upgrade and much more lower priced items.
Programming: I have 5 years experience in programming. I started with Visual Basic 6 at 12 years and then moved to Visual Basic .NET then to C# and know I am studying C++ and a bit of Delphi. I have made various things from malware related like rats and private crypters to text editors and HQ browsers. I want to note that I was programmer of Netrex, the company that made the best .NET Browser on the world haha (Version 1,2 is made with VB.NET and 2.5 -> 3.0 with C#). My main future goal is to learn NASM/FASM and PHP.
Graphics: I started getting into graphics and GFX this years. I am still a beginner but I am getting better day by day. I like designing animated things like banners, avatars, signatures and userbars.
Hacking And Security: I used to be a member of GHS (I can't say more from here) for 2 years but I

quite because I was near jail. I have worked for around 3 months as a System Administrator for a local company and I have setup-ED many severs. Also I like malware research and my favorite researcher is Steven K. Or Xylitol, I don't know if you have heard him.
Gaming: I play mostly FPS games like COD,BF3,CS and some others like Minecraft. I was Co-Owner on CraftVille a server with 35++ player and I had a prison server for 5 months. Also I was member of a competive sniping clan.

Tell us why you would be a valuable asset:

Well, I like helping people when I can. I can provide detailed solutions to questions related to hacking, coding, and maybe graphics. Furthermore, I am too active and I am spending around 2.5 hours per day here.
If you have 5 minutes please take your time and read my previous posts and threads because I want you to see that I am a mature and polite person.

Elaborate on your achievements and future goals:

My main goal is of course to be a member of Legion group and soon buy l33t and then ub3r. After that I am planning to open 2 sale threads in the next 5 months, one for a unique crypter which I am working on it and a silent FUD BTC miner. The last goal is to learn FASM/NASM and PHP as I have already mentioned.

Tell us about yourself:

Now as for me, I am a happy and cheerful guy. I like being perfectionist and doing my best. I will turn 18 soon and 2014 will be my first year as an Electrical Engineer (I don't how it's called in English). I listen reallll music like rock-metal-rembetika of course not pop!!
I hope that I will get accepted and soon have the legion userbar under my name, this will motivate me to become even better here, at HackForums.
I want to thanks you for your time and for giving me a chance to be a member of Legion.

Miki - *August 18, 2013, 5:43 am*

Elaborate on your skillset: I have came up with a site (damony's partner for www.anonscanner.com).
Tell us why you would be a valuable asset: I am a whitehat and prefer to do thing in a legal and quick way with profit.
Elaborate on your achievements and future goals: Continuing my hard work with AnonScanner. Additionally finish working on bitvpn.
Tell us about yourself: I am a nice guy who likes to do buisness and be happy from the goals which I set myself and achieve.

McDork - *August 18, 2013, 10:49 am*

Elaborate on your skillset:
I am an avid web developer with my own design and hosting business (http://boltdesign.co.uk) and a successful monetizer.
I also work as a networks management specialist for a medium-size company in the UK.

Tell us why you would be a valuable asset:
I would be able to create quality tutorials and be a full time web developer for anyone in the group who wishes to take up the free service I would offer. I would also share my monetizing methods with anyone in the group, as well as making regular donations/contributions to a cause you see fit.

Elaborate on your achievements and future goals:
Recently, I went on an expedition to Laos and Vietnam, and working as part of a team was an essential attribute to have. I managed to do the whole month, complete both Treks and project phase with the group. A clear sense of direction and intention is what I have. Future goals would just to be expand upon what I already have and help as many people as I can!

Tell us about yourself:
As you know, I'm a web designer - one of the things I'm working on at the moment is for a photographer, and it can be found here: http://boltdesign.co.uk/mike
I am also a musician, being able to play Piano and Bass Guitar has been a tremendous attribute, especially when given last minute gigs! I've seen incredible things, met incredible people and I want to take another step into the realms of HF.

Lukas - *August 18, 2013, 12:37 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Programming

I've programmed for 6 or 7 months, mainly focusing on HTML, C++, C, Java, and PHP.
Programming is one of the most useful, and most used things worldwide on the internet.
I'm mainly a Web Designer (GFX, and Programming wise), but sometimes I like to just mess around, and code a few programs here and there, really nothing big.
Programming is probably one of my most favorite things to do, excluding graphics.
I've coded a few websites in my time, but mainly I don't deal with customers, or anything like that, I just use my skills for personal use.

Graphics

I've done graphics for more than a year, I use to do professional graphic work for clans, such as Darth, Dare, SoaR, and a few other clans in that region.
Graphics is something that I really enjoy, because I can express my emotion, and creativeness in one picture.
Whether what I'm designing is a website template, a background for a Youtube channel, a desktop background, I can still express how I feel, and put my own touch of life, and emotion into it.
I can design anything from a website template, to a signature for a forum.

Marketing

I know this isn't a marketing group, so I will make this description short.

I've marketed for some time, and I've made a huge profit, quite amazing honestly.
My marketing skills are somewhat advanced, and I know how to work the system very well.
Marketing honestly changed my life, and turned it from shittyness, into greatness.

Social Engineering

I hardly SE anymore, but when I do, I make sure it is going to be worth my time.
Here are some products/companies that I have SE'd from:
Apple - MacBook Air
Sony - Playstation 3

Turtle Beach - X 31's
Nike - Airmax 13's
American Eagle - T-shirts
Vizio - Flatscreen HDTV 40 inch.

Gaming

I play a wide variety of games, on a variety of platforms, here are some:
Call of Duty Series - Xbox, PS3, and PC
Fifa Series - Xbox, PS3
Halo series - Xbox
MLB The Show series - PS3
Forza - Xbox
Uncharted 3 - PS3

RAT's

I don't really deal with RAT's much anymore, considering I think they're quite skiddish, but I'm very familiar with them.
I use to get a ton of slaves on my RAT, and I believe that I used Cybergate, Dark Comet, and occasionally Black Shades .
I'm fairly experienced with the overview of the programs.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I think I could be a valuable asset because I'm always willing to learn, I'm very motivated, and I always get motivated easily.
I'm easy to get along with, and I treat people with the same amount of respect, that I get treated with.
I can teach newcomers, or users who are new to hacking, some basic need-to-know tips on how to get their hacking career started.
I obviously do not know everything about hacking, so I also think this would be a great opportunity for me to learn the ways of some members, and possibly even take on a new programming language.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I graduated 2nd highest in my highschool back in the Netherlands, which is one of the highest ranked schools academically, in the Netherlands.
I excelled in all of my classes, including chemistry, which in my opinion is one of the hardest courses/classes to take.
I've made a ton of money off of marketing, I don't know how much I've earned off the top of my head, but it's definitely something that I would have never expected I would have done.
Future goals, are either something you can dream about or you can go out and achieve them.
My main goal at the moment is to finish the next 6 years of college, and finally become what I have been wanting to become my whole life.
It would honestly make me extremely happy, if I achieved my goal, which hopefully, and most likely I will, because I do not give up for anything.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I was born March 26, 1994 in Amsterdam, Netherlands, to my mom Gina.

I'm half Dutch, and half Italian. (Don't ask me how, I don't even know.)
I always struggled making friends with people because I was obese, and ugly.
Back in middle school, I got teased everyday by every kid that I saw, and even the girls made fun of me.
It followed me all the way to highschool, until I put a stop to it, and finally stood up to all the kids that have been pestering me, and bullying me my whole life, I wasn't going to let anyone take advantage of me anymore.
I decided to change my lifestyle, start eating healthy, and working out.
I got accepted to a college in Spain, and some of you may ask why you went to a college all the way in Spain, well reason being that, is because the baseball coach there, sort of just hooked me, not in a homosexual term, but he just literally was the nicest person I've ever met, and the baseball team there was phenomenal!
That's whenever I started getting into marketing, because I didn't have the money to pay for my bills to stay in college, and all, but I recently got that handled, and here I am today, living the dream my family always wanted, unfortunately my mother passed away some time ago, and it breaks my heart to know that she can't actually be here, watching me succeed in life, but I know she is watching over me, with her full guided attention. :)

Darkwin - *August 18, 2013, 3:04 pm*

Question? Does your student program teach programming? I'm interested in learning .NET if so i'm applying for the student program.

Im gone brah - *August 18, 2013, 3:09 pm*

(Aug 18, 2013 03:04 PM)Darkwin Wrote: *[CITE]* Question? Does your student program teach programming? I'm interested in learning .NET if so i'm applying for the student program.
It exist a few .net tutorials in here and teachers that can code in .Net?

Bewbs - *August 18, 2013, 6:53 pm*

Elaborate on your skillset:
I am verry High Quality Markerter,I am verry familiar with Cross Site Scripting,Sql Injection (Manual,Waf Bypassing),i know how to do some simple Stuff in visual basic, like : Fake Facebook Hacker,Booter,i am also VERRY fammilirat with ratting,did it couple of months becouse i got bored ?

Tell us why you would be a valuable asset:
I could help other users in ALOT of stuffs ,i am always online,and i am verry comunicative (easy to talk to). ?

Elaborate on your achievements and future goals:
Well,when i dont got nothing smart to do,i love to test the sites in my country on Sql Injection,if it works,i report to the webmaster,i am really not a blackhat person,more like a Grey Hat.
And i want to acomplish more,thats why i am writing this application this verry moment,i want to join you,be part of something big and meet new persons and gain new friends!

Tell us about yourself:
I am 16 Years old guy,obsessed with HackForums,obsessed with Hacking(Obsessed with Marketplace section on HF),i always try to learn more and more and more and im never getting sick of it! ? (Sometimes my head can hurt)

Ryes - *August 18, 2013, 7:00 pm*

Elaborate on your skillset: Knowledge on server hosting, photoshop, video editing
Tell us why you would be a valuable asset:I could help those in need, i could host a server if needed to, im very active on games and am willing to learn new stuff.

Elaborate on your achievements and future goals: One of my future goals is to finish creating a game i am working on, some other things would include getting a job, getting a car, license and a better computer.
Tell us about yourself: Well on the weekends i tend to spend time with my mom and during the weekdays i am at home on different forums,skype, or im just gaming and having some fun. I am also trying to find a temp job right now.

Some Skid - *August 19, 2013, 1:11 pm*

Elaborate on your skillset: Well, i'm not sure how to elaborate it properly but... i know some basic C++, PHP, MySQL among other things (i guess i don't even have to include HTML / JS). But mostly what i do is MySQLi / LFI when i'm bored, i'm also developing a private server at the moment in which i program in C++ and script in LUA, also XML included but that's basic shit, any 5 year old with a keyboard and a screen can do that.
Tell us why you would be a valuable asset: Actually, i have no good answer to this. Maybe we can all share experiences and i could problably teach some newcomer some cool tweaks.
Elaborate on your achievements and future goals: Well, i've hacked a few sites (and like every other skid i have defaced my fair share before i realised it's fucking pointless and gets me nowhere). I'm eager to learn and my future goals are to learn everything i possibly can and be one of the top coders.
Tell us about yourself: I really have to idea what to say about myself. I'm the kind of guy that can be very "trolly" and such, but if the time being requires me to be serious i will not fail that.

Im gone brah - *August 19, 2013, 1:21 pm*

Was my teacher in the start, taught me much about web-applications.

Understalker - *August 19, 2013, 5:07 pm*

Add more details to your applications, some people are just hoping they get in with a effortless application. ???

Although on the other hand, some people have have decent applications.

Daddy???????????? - *August 19, 2013, 10:01 pm*

Elaborate on your skillset: Well since this group based on Networking, Security, And Freedom, I provide myself in Knowledge of SSH knowledge, CentOS, Debian, Ubuntu. I have helped run a few Stresser's/VPN's in my past. I have used many defenses to block DDoS attacks like Cloudflare, DDoS Migration and Etc. I have been working around servers for 5 years now, The main Subjects I do in Servers are DDoS, Testing Scripts, VPN's, SSH Tunneling, Etc. I know how to Dox and do other Black Hat Activities.
Tell us why you would be a valuable asset: I feel I would be a valuable asset, As I can bring my Valuable assets to the group and release some of my methods, I would love to be able to work with

such great Users. I would love to be working at my best performance with this group and hopefully find others like me.
Elaborate on your achievements and future goals:I have done Stresser's and Blocking DDoS Attacks since 2009. I love networking since its a great subject and hopefully joining this group I can learn more techniques and such that I can use in the future.
Tell us about yourself: I am a Mature guy that loves the old Generation and as well the new Generation of technology, I started loving the different type of Technology and other cool subjects when I was 3 to 4 years old and I got on my Parents Computer and had a Blast I thought it was the most cool thing in the world and started from then to now still loving the passion. I have lots of skills on Computers and still hope to show them to the group. I hope to soon work as a IT Tech or get a Degree in Computer Science and other Computer Subjects.

I am online 15+ Hours a day so I am always Available when you need me to help I am there for you. But if I have Family or big subjects come up I can't be there all the time.

Thanks for the time reading my Application, I hope you can take a Good look at my Application and hope you can accept me. Thank you for this Opportunity. ?

Scooby Doo. - *August 19, 2013, 11:29 pm*
Elaborate on your skillset: Html, CSS, and a bit of PHP. I'm still in the beginning stage but I'm still learning for web exploitation purposes. I'll admit my skills aren't too impressive at the moment, but it will be within time :P
Tell us why you would be a valuable asset: Because I'm not your average user relying on pre made tools or trying to utilize other peoples scripts. I'm here to learn and willing to assist any of the other members with any issues they're having that I'm capable of helping with. I'm not here to impress anyone or seeking any internet fame. I won't fight with the other users or go after people for no reasons, I believe hackers should stick up for each other & have each others backs other than trying to attack each other.
Elaborate on your achievements and future goals: All of my goals are to simply study & prosper. I have no intention on posing as some l337 hecker or messing with random sites. I actually intend on turning this into a career. You know, by doing web development and helping people with their security.
Tell us about yourself: I've always told my self, the first step to learning how to be a hacker is to learn how to keep your mouth shut. Broadcasting each attack you've performed is idiotic & will eventually bite you in the ass, that along with getting too trust worthy telling people about your self...hacking is a path where only the intelligent survive.

I've heard you guys don't necessarily recruit people based off just their skill, but their determination & activeness which made me decide to give it a shot. I'm a very active guy who's online through out the entire day.

?

Please people put some effort into your applications, seriously.

Dan Smith - *August 20, 2013, 4:10 am*

How can you make such LQ applications? I worked on mine for half a week and probably still won't get accepted..

Terry A. Davis - *August 20, 2013, 4:22 am*

(Aug 20, 2013 04:10 AM)Cogitate. Wrote: *[CITE]* How can you make such LQ applications? I worked on mine for half a week and probably still won't get accepted..

Go out there and be noticed. Message a teacher and ask them to give you a challenge talk to us, get to know us, I talk to Anonymous nearly everyday like an un-offical HR consultant so if you get to know us you've got more of a chance of getting in. Show us what you can do if you know a language link some tools, if you've hacked a site show us. Message me, get to know me, Talk with me. It will pay off.

As people say for job interviews if you want to get the job, get out there. Message me I don't bite and will be able to maxamize your chances, if you only make an aplication it may not be enough.

Like me, I was going to leave HF since I had enough of doing nothing, decided to message Anonymous to see if I could make a few tuts in Legion's name before I left and hey presto I got back in for proving my dedication to the group. Why don't you do it, make some tuts in our name it shows you will wear it with pride and be HQ doing so.

Zink - *August 20, 2013, 9:49 am*

I Feel Kind Of Embarrassed about my Application that i put in, But when i reread the information that i put down, it well explained. Even though there are many people after my application with improved GFX, Forums, Textures, etc. That look way better then mine ? Even though most of the people are copying off of other Applications.

? I'm Going to take Perfect Cell Advice and Try to Get to know People in the Group, It a really good advice, people forget that you need to think and act about your applications like it a real life job.

Bewbs - *August 20, 2013, 10:09 am*

Wow,i have never ever EVER saw a asskisser like your in my whole life ???????????

IXPRO Clan - *August 20, 2013, 10:25 am*

Elaborate on your skillset: Im networking, security, social engineering, rats, keylogging, coding in ruby, python, c++, c#, f#, Vb, Sql, and more. Im very persuasive and good at dos as well.

Tell us why you would be a valuable asset: I would be willing to participate in any and everything thrown at me and even if i didn't know if i could do something i would still try to. I would be a great help in most situations as you can see from my skill set. I would also love to represent anonymous.

Elaborate on your achievements and future goals: For my goals: id love to be in legion obviously,

to learb more than i know about pc's and hacking, to go to college for either networking or hardware and software job, and to overall succeed at any hack i do. Achievements: Fully learning many coding languages/making it this far, learning as quickly as i have, creating keylogging programs, creating regular useful programs, coding servers and sqli shells, my first successful distribution of a rat to 137 slaves.

Tell us about yourself: I started looking into hacking a couple of years ago and I learned so much so fast that I decided to look for a role model which ended up being your legion. I found this site a few months ago and finally decided to sign up this month. I have had a vast amount of computer experience as well and i have taken 4 classes in school over them and i will be taking 2 more. Overall anything that is a challenge with a computer spikes my interest and makes me want to do it or learn how to.

Laksida - *August 20, 2013, 12:58 pm*

[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Elaborate on your skillset:
I code java, html, vb,rat, keylog also i do graphic designs and adobe after effects
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Tell us why you would be a valuable asset:
I feel I would be a valuable asset, as I can bring my own unique, and far fetched skill set to this amazing group. I would love working among some of you, my peers, and I would like to be able to work towards a main goal. Working at my best, alongside others like me, is my ideal group.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Elaborate on your achievements and future goals:
I have many future goals and many of them revolve around marketing. I want to become a better coder and soon learn C++. Once I get better at coding I will start to sell my products and hopefully make a lot of money. Another goal i have if to become a more known member on HF and i am going to accomplish this goal by helping members like i already do and also making HQ and helpful posts.
[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]
Tell us about yourself:
I'm fizz i'm 17 years old. Still at school. I am working to support my family as well as supporting myself to go to college or university. Most if not all sales profits I am making are going towards investments for other business opportunities or straight directly into my school funds or lively bills I pay monthly. Itry to make as much as money i'm trying different methods as ebooks, ewhoring etc.
And i try to enjoy life asmuch as possible

LevelUp - *August 20, 2013, 1:27 pm*

Elaborate on your skillset:
Exploitation:
SQL Injection (xPath/Union/String/PostgreSQL) /w Advanced knowledge of WAF bypasses and the Structured Query Language itself.
XSS/XST/Cross-Protocol XSS
RCE/PHP-CGI RCE
LFI (Methods -> Environ,Fd,Error Log Poison,Access Log Poison,Tempfile Race Condition /w phpinfo(), Session poisoning, Input Wrapper, Filter Wrapper, Data Wrapper, Expect wrapper)
RFI (Yes retards still have allow_url_fopen and allow_url_include on)
LFD
CSRF
CRLF
SSI
AFU
PHP-Object Injection

Format String Exploitation
Code and Command Injection methods
*nix Priv Escalation (Locals, SUID bins, IFS, LD_PRELOAD and SES)
Understanding of Buffer + Stack based overflows (Methods include things like ret2reg to bypass ASLR), JIT and Heap Spraying

Coding Knowledge:
Not proficient in an ENTIRETY of any one language but know a fair amount of
Perl, SQL, PHP, HMTL and some x86 AT&T ASM.

Tell us why you would be a valuable asset: Read above.
Elaborate on your achievements and future goals: I'd rather not post any achievements, due to how familiar HF is with Law Enforcement. Future goal is to keep learning :)
Tell us about yourself: Be nice to me, and I'll be nice to you. I have no problem with someone not knowing something, but I have a problem with people acting bigger than they are. Oh and I don't actually want to join Legion but I was bored.

Diligence - *August 20, 2013, 1:56 pm*

Elaborate on your skillset:

• Graphics: I enjoy creating graphics as a pass time. I've taken four graphic design classes, and have been designing for around three years.

• Social Engineering: I've made a living off of social engineering. I haven't even considered getting a job since I know I won't make as much.

• Coding: I started learning how to make simple applications a few years ago. Since then, I've continued to learn, and grow into a decent coder.

• Webmaster: I've been a owner of several small websites, and have selected to run several as well.

• Hacking: I've been into the 'hacking' scene for a few years. I've learned plenty of helpful things, and plenty of detrimental things as well.

Tell us why you would be a valuable asset:

I believe that I could learn plenty of knowledge from other members in the group.
I also feel as if I can contribute plenty of things off my skillset, and hopefully help others grow in their weak points.
I also think that I may be able to answer any questions some users may have about most subjects.

Elaborate on your achievements and future goals:

I suppose I'll start from a young age, and then progress into my current state.

• 11 - 12: From a very young age I was always into electronics. I understood, and used electronics unusually more than other children.

• 13 - 14: I stumbled upon an Xbox modding website, and immediately feel in-love with the ability to do stuff other were incapable of doing. I stumbled upon the term 'hacker' on Xbox as well. After doing some research, I was fascinated out what these hackers were capable of. I immediately began investigating, and attempted to upload my first shell to a website. Let's just say that I didn't succeed.

• 15 - 16: This is when I began experimenting with code. I learned the basics, and started moving up the tier. I also started getting back into the hacking game that I failed at. I began hacking Xbox accounts by social engineering information, and the Xbox support team. This is when I realized that I was fantastic at lying, and even better at hacking. I joined a hacking website, and began learning the in-depth world of hacking.

• 17 - 18: I was apart of dozens of communities, some hacking, some not. This is when I first stumbled upon Hack Forums. I started to attempt to hack and social engineer larger targets, and succeeded. I also began coding more intense languages, and attempted to learn about the world of PPD and CPA. I soon began earning more money from social engineering, and PPD then I would had from a real job. This is when I decided that I was going to work from home.

• Present day - Future: I ran across Hack Forums, and immediately feel in-love with the community, and the extreme amount of knowledge that was capable of being learned. I'm currently attempting to learn more about #C, and I'm attempting to create a game. I've began graphic designing more often, and am attempting to learn more. I have a thirst for knowledge, and a drive for achieving my goals. I hope to become fluent in several other languages this year, as well as learning all there is to know about hacking.

Tell us about yourself:

I'm a gamer, hacker, graphic designer, social engineer, and human.
I'm just like anybody else, I enjoy hanging out with my friends and family, and spending time with my girlfriend.
I love learning new information, and debating over social, religious, and world topics.
I'm a conspiracy theorist, and I love exploring the unexplained.
Gaming is one of my favorite outlets, and I spend several hours a week playing.
In conclusion, I'm just an average teenager with a thirst for information.

Please note that I worked extremely hard on this, and haven't copied anyone, or anything.
I created the line breakers, so if you're a user, please message me before copying.
All I can ask for is that you consider my application.
Thanks, Diligence.

MrBoolean - *August 20, 2013, 4:19 pm*

Elaborate on your skillset: PHP, MySQL, VB.NET, Html, CSS, Javascript, Java, Python, Server networking and setup, working with teams and getting things done by deadlines. Please feel free to PM me with ANY questions to prove my skill set.

Tell us why you would be a valuable asset: I'm a hard working person that is dedicated to the community. I'm constantly tinkering and learning new things. I can bring many things to the table as far as knowledge and reliability goes.

Elaborate on your achievements and future goals: I'm striving to be able to support myself through college via a fulltime job + internet marketing and other sources of income.

Tell us about yourself: I'm a Senior in High School, currently working on applying for college and other fun senior stuff. I just finished an 9 week internship at an Insurance company that employs 40,000 people. I was deep into their operations working on core system infrastructure. I love to learn new languages and recently taught myself VB.Net while in my 9 week internship and then used it to build a custom inventory system to sort through all 23,000 iPads the company owns.

Vegas - *August 20, 2013, 4:41 pm*

I've taken the liberty of making my own application:

Who are you?

Guess who back in the motherfuckin house
With a fat dick for your motherfuckin mouth
Hoes recognize, niggaz do too
Cuz when bitches get skanless and pull a voodoo
What you gon do? You really don't know
So I'd advise you not to trust that hoe
Silly of me to fall in love with a bitch
Knowin damn well, I'm too caught up with my grip
Now as the sun rotates and my game grows bigger
How many bitches wanna fuck this nigga

If you're going to do that, atleast have the respect to give me credit.
Relax mate. This isn't a graphics group.

Graybyte - *August 20, 2013, 7:59 pm*

Elaborate on your skillset: My 2 best skill would have to be Graphic and Web Design. I have been doing GFX for about 4 years and Web Design for 2. I am skilled with HTML, CSS, Basic VB, and basic Java.

Tell us why you would be a valuable asset: I feel that not only will I learn from this program, but I also feel that I could teach some people a few things about Web dev.

Elaborate on your achievements and future goals: My future goals are to learn more about Web Dev, and their exploits. I also would like to learn more about the Black Hat side of HF.

Tell us about yourself: I am from California and am currently in High School. I play the guitar(6 years) and the trumpet(8 years). Music is a very big part of my life. It helps me express things when I cant use words. I like Electronic, Metal, Alternative, and Classic Rock music. I also enjoy playing video games.

Folks - *August 20, 2013, 8:49 pm*

Elaborate on your skillset: I would have to say my skillset is not biggest but it has some things useful in there, I am pretty decent in photoshop besides not wanting to spend a lot of time in it, I picture myself as a decent social engineer as I have ratted many people off just talking to them, I have the basic java knowledge (well I wouldn't say java maybe the bukkit api?) I started out a botnet probably last year but lost my laptop and all of its settings due to my now 8 year old cousin spilling water on it.

Tell us why you would be a valuable asset: I don't know how much of an asset I could be but I am willing to learn and teach others as I have learned, I can give basic photoshop knowledge and darkcomet support.

Elaborate on your achievements and future goals: My achievements? Let me go get my collection of trophies from elementary school. (Put aside my humor if you don't like it D:) But I have always dreamed of making it big on youtube or twitch.tv, also hosting a successful buisness and/or minecraft server.

Tell us about yourself: I am from Minnesota, I used to play the piano and am trying to get back into it. Music is a huge part of my life but i could never make a decent song in Fruity loops or abelton live even with a DJ as a cousin, I use to play all sports until i dropped out of them and stuck with basketball and track, I also snowboard (I am from Minnesota, gotta make due with the winter!) wakebaord, and wakesurf, I spent majority of my time either reading or playing video games, I am not into watching tv as much but i do enjoy a good movie. I played percussion for school (Drums, mallets, and such) And live with a family of 4 but i spend a lot of time with my extensive amount of cousin.

If you wish to know more about me just ask, i don't know what else to say!

That concludes my application.

Morchid - *August 20, 2013, 9:31 pm*

I'm being told this thread is starting to glitch out, I suggest Anonymous opens another thread.

Locklyon - *August 20, 2013, 10:36 pm*

Elaborate on your skillset: I'm originally a SQL editor and I have learned skill from a online game called Silkroad, I have created a server on it which required a skill with SQL to edit the database,tables and to create new procedures etc It was really great time and fun. Also currently I'm learning PHP and marketing, I know a lot about PPD etc and I have been using it for months right now and I'm a forum creator/manager created already many forums but they were just for my games but learned a lot from editing/creating them it was a hobby for me not a job also I have built some people personal computers and actually it was great you can check my posts on "computer overclocking, customizing and hardware" personally I spend most of my time on the computer testing and learning things.

Tell us why you would be a valuable asset: I could help other members with SQLi but I'm still a beginner on it and also I'll try to learn PHP/C++/C# In the future I'll try to spend most of my time on them so I could become professional on them and I would teach other members "I'm a student"
Elaborate on your achievements and future goals: I want to learn C#/C++/Java/Html/CSS/PHP languages which would take barely 5 years at least 24/7 but I'm trying to put all my effort/time on them so I could learn them as soon as possible but right now i'm learning language by language not all at once, It would be harder If I tried learn all at once also becoming a big marketer is one of my dreams.
Tell us about yourself: I'm 18 years old from egypt, I'm a respectful,helpful and funny guy and I do really love to talk with others and I'm enjoying spending most of my time on the computer. I take everything easily, I do never flame or argue or Insult anyone.

Thanks so much, I hope you choose the right members for Legion. Its a great group and I'm glad I was one of the previous members and I'm re-applying for a second chance since every human mistakes.
Thank you again :)

NeverStopTrollin - *August 21, 2013, 5:28 am*
Elaborate on your skillset:Doxxing E-Whoring And Very Good At Social Engineering Gaming(Quick Scoping) And Basic Lua.
Tell us why you would be a valuable asset:I would be a valuable asset By, Teaching others my knowledge if they need it, Also I will help them and I also think I can really be able to help the group

Elaborate on your achievements and future goals:My future goals would be Learning more than I have already Expanding my Knowledge to the others that are just coming in the hacking community
Tell us about yourself:Well Im a Nice/Social guy once you get to meet me and I admire people with more knowledge me, And I love meeting new people Thank you ?

Understalker - *August 21, 2013, 5:29 am*
If your application has no effort put into it you will not be accepted, simple.

Please PM me if you have any questions regarding Legion itself.

CurosMJ - *August 21, 2013, 6:10 am*
Elaborate on your skillset: I'm a PHP + HTML + CSS coder. I hate JS. I love PHP. I use Bootstrap for almost all of my projects.
Tell us why you would be a valuable asset:I have a passion for coding. I feel awkward if I don't do some coding for a few days. I've learnt all of this without a teacher, all on my self, so, I do have experience in them, especially in PHP. I believe in sharing. I like to give out all that I could do to anyone who is really passionate about coding. I am a half whitehat -half blackhat hacker, i mean, i personally don't want to mess with anyone, but i like to make blackhat programs. :D . I've worked with Youtube API and Facebook API.
Elaborate on your achievements and future goals:I like to work on open source projects. As I've said before, I have worked with FB API and YT API. Here are the project links :

1. http://down-my-inbox.eu1.frbit.net/ - DownMyInbox - Helps you download your facebook inbox
2. https://github.com/CurosMJ/YTResolver - YTResolver - Complete solution to php based YT video downloading/ data fetching, etc.

I like to make programs with new ideas. I won't make a RAT with that same old concept, instead, I'd make something new, even if it is not that much effective. I want to keep coding for-the-cloud, using various APIs etc.
Tell us about yourself: I joined HF like 2 years ago, to become a "hacker". At that time, I was a

noob, damn noob. As time passed by, I learned PHP. Now I'm fluent in PHP. I don't know much about myself... LOL

Fingers Crossed ?

CommanderBoss - *August 21, 2013, 9:00 am*

Elaborate on your skillset:
Ratting
The first thing I learned on HF, like many others, was how to rat. Ratting alone is easy but I have also learned a ton about crypters and how they work as well as a ton about security and antivirus.

Security/Antivirus/Other Viruses in General
Naturally knowledge of security comes with knowledge of viruses. I have a lot of knowledge in the area of overall security and how antiviruses in general work. I can spot fake web pages and links from a mile away, including totally legitimate looking copies of web pages and security updates. That might seem easy enough but it is a skill that too many people are lacking.

Social Engineering
If there is one thing I am, it's a people person. I am an expert at reading people, even over text. I can pick up subtle signs in their choice of diction and syntax (yes even in garbled messages) and figure out the best response. I also am a great bluffer and can convince just about anyone that I am totally correct and sure of something while actually being totally unsure. For these reasons, I am a very effective social engineer.

DoS Attacks
I have a wealth of knowledge in the area of network-based attacks and security. My guide to DoS attacks can be seen here:
https://hackforums.net/showthread.php?tid=3637730
That's just a sample of my knowledge, which also extends to booters/stressers.

Hardware
I can diagnose and repair physical problems with video game systems and computers. I can also mod them and have been doing both for years.

Gaming
I consider myself to be a good gamer and am at least adept at just about every kind of game. Yes, including puzzle games.

Website Penetration
During my time in Legion, I learned more about XSS and SQLi than I ever knew before. I previously knew what they were and a little bit about how to use them, but now I am at least proficient at both.

Tell us why you would be a valuable asset:
I was kicked from the group for inactivity. If re-accepted, I would be a valuable asset because I would make sure to be more active so that I would never be considered inactive again. I would continue to learn from tutorials and spread my own knowledge, which is what the core of Legion is made of.

Elaborate on your achievements and future goals:
Most of my goals and achievements are the same as before. I would still like to become more well-known around HF. I also would like to keep learning more. My real life goals still include

expanding my new business but I now have a stronger desire to just make money in general.

Tell us about yourself:
I'm pretty much the same as before but now I'm 17. I am definitely still a life-of-the-party guy who loves the limelight and would love to be Phoenix Wright in real life. In addition, I still strive to improve. That is why I am re-applying for Legion. If given a second chance, I will learn from my mistakes and improve my activity.

Perfect - *August 21, 2013, 4:20 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

Social Engineering
I used to SE on a daily basis, I have earned lots of free stuff on these methods I have learned from messing with the corporate shops. I am looking to better my skills

Gaming
I am an active gamer, but in all honesty this group does not need gamers. I play PS3 I am trying to be "MLG" In BO2.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I think I would be a valuable asset to the group because many reasons as followed: I am a loyal member, I am willing to learn, I am wanting to learn, I have little to no hacking experience at hacking and I wish to better my self, I apply for only to learn, and I hope to have a chance.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: My only true goal in this website is to learn educational methods, CPA, money making methods, Greyhat hacking, maybe even blackhat, my intentions are pure and I just wish to learn.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I'm 18 years old, Enlisted in the U.S Army, currently going to school for Culinary Arts. Looking to better my Computer skills. My life isn't all that interesting considering I am Self-less, a trait I've earned from respect and loyalty. I wish to join this group to learn many skills in the hacking era

v???? - *August 21, 2013, 4:35 pm*
Posted in the Wrong group. Good luck with your Recruitment.

Muscles Glasses - *August 21, 2013, 4:42 pm*

Elaborate on your skillset: Evening, as an on and off active member of this famous community, I've developed particular skills.

MarketingMarketing is something I have been active in as of quite recent (the past 4months) in which I have successfully sold E-Books in a fashion of I'd see as High Quality and very rewarding. When I first registered on this forum I also had a Runescape shop with another member who ceases to exist, we sold legit Runescape memberships at a cheap price by using an exploit we found which

to date I have still not seen. Overall I have a brief sense of how the Marketplace works and how to progress sales of a High Quality and very mature nature.
RAT The first RAT I ever used was Turkojan. Since then I have used numerous RATs and to my knowledge I have successfully en devoured in a vast infection rate in the past although this is something I don't dedicate my time to, I do have extensive knowledge in this field.
Human Manipulation This was something I did a lot of in the past and I involve it in some methods of mine, whether it be profiting from someones downfall by convincing them or by gaining access to a particular program/account, I've done it. My knowledge in this field is very flexible and I am educated in several methods of executing this procedure in a successful way.
Programming Programming was one of my all time subjects to learn when I joined Hackforums. I was very fluent at one point in 2011 but now I am currently backtracking and learning it again; successfully. The language I'm talking about is VB.net, this has come in handy for many types of situations in regards to presenting a program that is realistic for a user to download; binding to programs/creating a YouTube video, I also have indulged in a little bit of java and HTML, very basic languages.
Graphics I have brief knowledge of Graphics due to Programming; where I've had to create a custom theme for my VB Program; icons & backgrounds, apart from that I don't have extensive knowledge in this field.
Information Gathering (DOX) Have always had my resources close at hand for many years. I become very determined to succeed regardless of the information available to me whether it be online or offline this doesn't matter, profiling any individual is a matter of knowing where to look and I am very experienced in this.
Gaming Typical gamer here, love to play open sandbox type games as well as XBOX 360 and on that note a very good FIFA player; have my own YouTube channel, which I've not kept up to date with but keep meaning to go back to it. More or less an old school type of guy when it comes to PC gaming ranging from early 2000s. Online gaming consists of football, Minecraft and anything Steam related.
Grammar/Writing I simply love to write E-Books or anything related in terms that the reader will understand anything; I even gave out an E-Book on how to write an E-Book due to personal opinion that most do not have the correct layout in order for the buyer/reader to extensively profit from the method to the best of it's ability.

Tell us why you would be a valuable asset: I believe I would be a valuable asset to your group in regards to contributing to the knowledge base of learning, writing E-Book guides for members who don't understand something or simply messaging them with advice that will make them come to terms with the issue and furthermore extend there own knowledge in that field. I strive to be successful and I believe I can and a long the way I want to learn other topics and expand my knowledge in the things that I currently lack logic in.

Elaborate on your achievements and future goals: My achievements on Hackforums consist of generating a second income in which I've successfully gained just over $300 in the past 3 months or so and I am looking to extend that profit margin with the help of other users as well as sharing my own. I also learned VB.net to an extent where I could write fluently and making programs wasn't that hard for me, I worked hard and learned this all from my own determination. I'd like to become better at Programming and to extend my knowledge in Marketing.

Tell us about yourself: I'd like to keep this short and sweet, I'm a very active member, dedicated, trustworthy and a man of my word. I seek knowledge and only want to strive for the best possible opportunity's as well as being kind by giving methods to users who seek the same problems I once had when I first joined Hackforums. This has been a pleasure to write and has been a tad Nostalgic in terms of reflecting on my time at Hackforums.

Thank you,

MG

Dexter ? - *August 23, 2013, 2:51 pm*

Elaborate on your skillset:

Ratting:
I know a skill like this isn't exactly immaculate as it's very common, but I am extremely confident with every aspect of ratting, I have being doing it a long time.

Social Engineering:
I am an extremely good social engineer, I'm able maneuver my way around people and get them to trust me with ease. I am also about to study human psychology in collage which is something I am extremely looking forward to doing.

Web Exploiting:
I'm able to find basic vulnerabilities in medium level websites and get access to the database. It's something I am extremely eager to learn and I'm taking it upon myself to do just that, a long with a few other things.

Coding:
Coding is something that I am also going to learn as I am intrigued by the doors that it opens.

Gaming:
I know this has next to no similarities in what I'm applying for but some areas are useful.
- Teamwork: I am able to work closely with others and can contribute to group enviroments
- Quality: I am extremely talented in all forms of gaming, Console and PC.
- Competitive: I am very competitive and make sure I do my best every time no matter what

Tell us why you would be a valuable asset:
I think I would be a great valuable asset to any group because I am very eager to learn, extremely wise and respect others who deserve respect. I strive for nothing but perfection, half finished/failure is not an option. I am a very nice guy and great to socialize with. I always look to help those who are in need of it and I'm not shy to ask for help.

Elaborate on your achievements and future goals:
My goals are to build up a reputation that people have given me, to be able to assist others with problems and aid them in fixing the problem. I want to make an impact. But before that, I want to improve my skills and knowledge in areas that I am weak/unsure in.

Tell us about yourself:
My name is Meroz. I am a very laid back but wise individual. I am motivated by the ignorance of others and challenged in helping those who seek it. I live for detail and precision, that is all.

Sajuuk - *August 23, 2013, 3:29 pm*
Well, here goes.

Elaborate on your skillset: I've been coding C++ for around five months now, and feel I have a fairly strong grip on it's base principles. My friends at school think I'm this bad ass hacker who cracks

commercial software and all that. Honestly, I'd just like to be able to legitimately change my grades.

Tell us why you would be a valuable asset: I don't like to lie about my knowledge level in the area of hacking. I believe I'd become a helpful member of HackForums in general (not just for Legion) if I was taught the ways of the hacker.

Elaborate on your achievements and future goals: I'd prefer to be able to actually do what my friends think I do. But first, let's figure out how to bypass an ASP.NET login form!

Tell us about yourself: I scripted in batch for around three years (beginning somewhere in July of 2010) before I moved on to C++ around five months ago. Even though any coding language like C++ or Java takes years to completely learn, I think I started off on the right foot. Thank you so much for opening recruitment for Legion, and have a great day!

~Obsessed

Spitfires Application

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:

E-Whoring I have been E-Whoring since early 2012, and made about $2750 in the six months I was at it. I have stopped for now, and will probably start up upon receiving my new computer by the end of this month.

Social Engineering I am an experience social engineer. I started back when I was about 8, talking store owners into free sodas or candy with my friends went we went out for a bike ride. Up to now, I have accumulated a PsP, Microsoft points, few pounds of Legos, and various other things.

RATTING and Keyloggers I have been using Darkcomet since last summer, and know my way around other programs, like Blackshades and Cybergate. I have totaled about 3k slaves so far, however I usually only keep the creeps and Pedos. I don't believe kids and stupid people deserve to be Ratted. Programming I am learning a few programming languages, mainly Java, but my abilities are not developed enough for me to list them as a "Skill". I am however confident they will soon be some of my strongest skills.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset: I wish to contribute back to the community and help the newer members just as I was helped a year and a half ago. I will be able to help members within my area of expertise, and I am online every day of the year. I also stand up for the underdog, and I am not afraid to speak my mind on a touchy subject.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:I have just finished High school, and in my final year, I took 2 game design classes. I plan on going to college for Game Design and settling in an apartment for awhile while in school. Nothing fancy. I plan on having a 2 bedroom house, a wife, maybe a kid.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself: I go by many names, but you can call me Spitfire. I am 18 years old, and an avid gamer, as I run about 3 servers and a community based around games. I play drums and make Electronic music, but since the loss of my last computer, I need to start back up. I love helping people, even if it gets me in trouble. I love messing with animation programs like C4D and flash, and make random renders, most are crap, but we all start somewhere I suppose. I hope to get the opportunity to tell you all more about me!

Tunechi815 - *August 23, 2013, 7:23 pm*

6.Hack{http://ciscocollage.com/}
7.Hack{http://www.pwogym.com}
8.Hack{http://www.khowajawelfaretrust.com/}
9.Hack 6 site

0x05-Coding Language & OTHER Skills.
1.HTML
2.CSS
3.JAVASCRIPT
4.JQUERY
5.AJEX
6.PHP
7.MYSQL
8.WORDPRESS

0x06-Design
1.Photoshop
2.Illustrator.

0x07-Web Developing & Design & Networking
I am web developer & learning web security more and more and also understand network process.
Web Design and developing that working at freelancer.com as freelance web developer.
And a lot of website i created. (15+)
Admin @ {4sector.com/forum }
Coder @ { zentrixplus.net/forum }

Tell us why you would be a valuable asset:
Well, I think I would be a valuable asset to the group because I have a strong personality,
strong willed person,I would like to meet and discuss with other people who understand the same things I do,
and I can help around with people having problems with coding and other problems.

Elaborate on your achievements and future goals:
My future goals for hack forums and in real life would be to on stain recognition to the forum, have a deep impact on the community,

and have access at everything or anything I do.I want to find vul on biggest site such as google | facebook | twitter
I also want to make improve our group.
(Real Life) I plan to build my own business about the web security consultation with web developing.
So.Now i saving money to build for this. :D

Tell us about yourself:
My name is minkoko.
i had a lot of nickname .There are Hacker625 , cyberoot , 133720 (search on google for check my skills)
I'm 25 and I'm finished Computer Science(B.C.Sc(Hons:)).
I start learning when i was 20,because i am poor man and i don't have to buy computer at this time.
when i finished University i worked at my Aunt and save money for buy computer.i got $3 one day.
I brought (acer netbook price $280)computer at my age 20 .and want to have as a web security profession in the future.
I'm right person.and I use 18hours a day in front of computer.

Thanks for reading.. ?

Superior1 - *August 23, 2013, 8:21 pm*
Elaborate on your skillset: I'm a C# programmer, soon to be learning more about C/C++. I have some coding experience with Flash and a little bit of knowledge involving XSS. Finally, social engineering, which is what just came natural to me.

Tell us why you would be a valuable asset: I would be a valuable asset to legion because, I would be a good help with C# programming as I have experience with it. ?

Elaborate on your achievements and future goals: My future goals is having to code a successful RAT and have it be sold over HF.

Tell us about yourself: I am a 18 year old programmer learning about sockets & networking, have been programming in the language C# for almost 2 years now, and slowly gaining knowledge about it. ?

Air??????? - *August 24, 2013, 5:51 am*

Elaborate on your skillset:
-RAT's
-About to learn Autoit and learn more about pentesting and forensics
-Social engineering
-Marketting
-Very competive gamer
-A good learner
-Very motivated

Tell us why you would be a valuable asset:
I really want to step into Legion's student program to learn more with the superior's of Legion and eventually become a teacher myself ?

Elaborate on your achievements and future goals:
I'd like to master some programming languages (Autoit, C# and Java) and eventually learn more

about pentesting, and eventually sell my own creations ?
Well, the most important thing for me is experience and knowledge.

Tell us about yourself:
I'm 18, and currently live in Belgium, also have recently quit school, I love to play leauge on Black ops 2 and that's about it, really nothing interesting ?

Education - *August 24, 2013, 7:35 am*

Elaborate on your skillset: Minimal knowledge. I am however, going to University for economics and marketing.
Tell us why you would be a valuable asset: I wish to learn as much as I possibly can on Hack Forums. I had spent two years on here by myself, and I hadn't learned much. With a group like this, I wish to learn.
Elaborate on your achievements and future goals:I had done many things that had helped my community and had received many scholarships because of it. I wish to learn as much as I can on Hack Forums concerning money, than I wish to share my knowledge with the community of Hack Forums.
[font=Trebuchet MS]Tell us about yourself:Here is something that sounds like me. I am very ignorant. If you tell me that I cannot do it because of lack of knowledge, you are probably right. But, that will not stop me from learning the subject and attempting it when I have the feel for it.

Thank you for reading my application. Your reviewers probably stopped reading after I had said that I have minimal knowledge, but thank you for reading.

Elaborate on your skillset: I can DDoS and rat like the rest of the members here.
Tell us why you would be a valuable asset: I can DDoS and rat like the rest of the members here.
Elaborate on your achievements and future goals: I have DDoS'd and ratted people like the rest of the members here.
Tell us about yourself: I like to DDoS and rat people like the rest of the members here.

The Prophet - *August 24, 2013, 11:55 am*

Elaborate on your skillset:
I know a fair bit of knowledge when it comes to hacking, but I obviously aren't an expert. I know just about everything when it comes to keyloggers and RAT's. I am coding my own keylogger now as I am writing this application for the market. I mastered Rats and Keyloggers about 2 years ago, and since I joined Hackforums I increased my knowledge a ton. I know basically everything to know about Rats and keyloggers. I am good with Social Engineering, as well. I always make some extra sales with Social Engineering as well as get free items, such as laptops. I have Social Engineered Samung Galaxy S4's, some items off Apple, and some other items with it. I am a master when it comes to eWhoring, I have made over $2,500 off eWhoring alone within a months time. I am working on making my own VCW's for eWhroing as well to make some money on the side. I am a

pretty good marketer, and can do anything to make a sale. I have a very successful eBook out right now on how to make money with Rat's and Keyloggers without survey lockers or any of that shit. I have made many successful exchanges in the past as well. In school I had to learn some programming, but I really didn't pay attention much as I found it some what difficult, but I was always trying to learn. I know a good portion of Visual Basics, and some of C++ but I'm no expert about it. I have done Doxing in the past and nearly successful every DOX I try. I have made my own stressers in the past with dedicated servers.

Tell us why you would be a valuable asset:
I would be a valuable asset to Legion for many reasons. I am a hard working, friendly, always willing to learn, and I have knowledge. These four building blocks right here would make an excellent group. I could pass my knowledge down to members and hopefully increase their knowledge in some of the subjects that I know. I will always help someone if they need help and would never leave anyone stranded by themselves not knowing what to do. I could make tutorials for Legion members so they can learn with ease and become wiser to not make mistakes I have done in the past.

Elaborate on your achievements and future goals:
Ever since I joined Hackforums my goal was to learn and master a RAT and Keylogger. I know this is not the biggest achievement but I made that goal become successful. I push myself to learn new things all the time to not only increase my knowledge, but to help others that do not know. I have learned a ton of information since I joined hackforums and made a decent chunk of change too. My upcoming goals are to create and run my own business. Hopefully make a top of the line crypter like DataProtector in the future.

Tell us about yourself:
I am currently 21 years old and I live by myself. I am on hackforums whenever I got free time and I'm not working. I love the forum and its community, and just everything about it in general. I play Xbox live with my friends just to have a good time and talk to them. I also play online games when I'm bored. I love to make money not only online, but offline to. I have made around $25,000 online and hopefully continue to make some profits online. I am a manager at Best Buy where I live. I sometimes buy items online for a low price and resell them for a profit. As I said I love to make money. I ride dirt bike all the time, just to get out of the house and have some fun. I am hardworking, motivated to learn, friendly, and experienced. These four building blocks right here would make an excellent group.

Ryan?? - *August 24, 2013, 5:01 pm*

Elaborate on your skillset:

I've learned a little bit of HTML, Java, and C++. Overall, I've not been able to master any language, however I am able to understand and read enough to get by. When I first started trying to learn them, I was not as capable of handling such a great amount of information and was easily flustered. I am much more mature now and have avidly been working my fundamental and essential coding skills. To be frank, I don;t think coding's for me, but it's a definitely great skill to have in my tool bag.

I also used to do competitive, as well as casual, computer gaming. I've recently been lowering my allotted video gaming after reading a few of Anonymous' threads and realizing that I need to expand my skillset in other areas. It's about time to stop being lazy and get to work on things I'll be using on a daily basis in life and in a career.

Tell us why you would be a valuable asset:

Even though my skills are not as 'sharp' as others' in Legion, I would always contribute to the group in any way I could, and aspire to become a 'teacher' and give knowledge to the future students of Legion in the way the current teachers give. I would always take part in discussions and other Legion related events and activities. I would be active, and never be "That guy" that lurks without giving much to the community.

Elaborate on your achievements and future goals:

In the online world, I've gotten access to two websites. It may not be that impressive compared to other fanatics that constantly do this, but I also UNDERSTAND what I'm doing and not just copying and pasting like your average skid. I also know many essential concepts in the areas of DDoS, networking (how some protocols work and thing sof that natre) and, of course, RATing. In the future, I hope to expand my knowledge on all kinds of hacking techniques, and computer related studies. This includes whitehat and some 'blackhat' hacking even if it's not for illegal/personal gain.

Tell us about yourself:

I've always been around people older than I. I've become more mature for my age than others ate, which is a great asset on HF so I can have much more mature and intellectual conversations with the older members of HF. I have an open mind and I'm always willing to learn something new. It doesn't matter what it is, all ears will be on the mentor so to speak and I'll keep persisting when things get difficult. In school, I've maintained a 4.0+ (with AP classes) for a reason; Even if I don't know the material, I know how to study and learn. Anything less than success will not be an option for me.

Other than that, I do plenty of activities offline (AFK if you will).

When I'm not on my computer, I'm either in the kitchen (I am one of the few people my age who enjoy cooking) or outside simply enjoying the sun :) I actually really love to cook dinners for my family and word around here is, I'm pretty good at it. I'm constantly collecting/sharing recipes with others online and elsewhere.

I have also played more than 10 years of baseball. I started when I was younger, and played all throughout high school. When the stress was greater than the fun I was having, I ended up dropping it as a sport. Though I have to admit, I regret that decision.

I'm also an avid listener of many genres of music. I like just about all genres of music ranging from recent genres, such as dubstep and some (not all) pop music, to music that's been around for hundreds of years such as classical, rock, and hip hop. I'd have to say my favorite era of music would be the 1940s music era.

I also enjoy reading comics and novels. Comics are great for rest and relaxation, but novels are great for intellectual expansion. Even though I'm not the best at writing, I not only enjoy it, but have more skill at it than the average person.

Lastly, I love to make YouTube videos and videos in general. I have 3 active YouTube channels: gaming, tutorials, and a channel I'm working on creating. If all goes well, it will be a comedy channel. I just need to think of an idea that I can build a series on. Creating something, working on it, and seeing it grow, makes me feel great and I hope to help lots of people in my time in Legion if given the chance.

Elaborate on your skillset
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

Cracking will be the primary skillset i bring to the table. I have in depth knowledge of most forms of cracking. I will discuss the different forms of cracking i have knowledge of below. For lack of a better term i'm going to call cracking accounts for different websites account cracking below.

Account cracking

This was the first kind of cracking i got knowledge off. With risk of sounding pretentious i would say i have mastered this form of cracking. I know How to find proxies without relying on websites or such. I know multiple methods of getting combos and employ them to great effect. I know how to fix common errors that appear while cracking.

RDP cracking

This is the form of cracking i got knowledge of latest. I already have a good grasp on the basics and i'm learning more quickly. I run a small rdp shop where i sell the product of my cracking.

Support

I know how to support a product and provide good customer service. I have experience from being support for TinyManipulator and from supporting my own products.

Hardware

I have a very in depth knowledge of computer hardware. I have made multiple custom builds and follow the component market very closely. I have worked as a it support for a big company helping them keep there pc's running and working smoothly. I have wide knowledge of all the general issues pc's can have.

Malware

I know how to setup a botnet and run it. I know how to setup rats, stealers and other basic malware. I'm currently looking to move out of the cracking scene and more into the malware scene so my knowledge will be increasing rapidly.

Tell us why you would be a valuable asset
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

I could spread my knowledge on cracking to the other members of legion and could help members with choosing new parts for there pc or fixing errors. I would be active by helping legion members

with there pc related issues. I am a friendly guy and i'm willing to work for my spot in legion. I really want to learn how to code and i see legion has a lot of coders so i figure joining legion would be a good step on the way.

Elaborate on your achievements and future goals
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

I am currently studying to become a web designer and network technician. I want to learn to code in some non web based languages so that is one of my main goals currently.

Tell us about yourself
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

Well i'm currently studying as said to become a network technician and so far i'm really enjoying it. I spend most of my time inside either with my desktop or my phone but when i'm outdoors i like to ride my mountain bike. I also like to hike for longer periods up to weeks on end during the summer.

Playb0y - *August 24, 2013, 11:32 pm*
Skill set

I have a wide variety of skills, I'm mainly focused on RAT'ing and e-whore'ing. I also am trying to start to be more active in the "White hat section". I really like to help other members with there computer problems, and getting started RAT'ing. I can also provide members with good money making strategies. I'm a successful e-whore also. I can also work my way around SQL pretty good. So I consider myself a well- rounded person that is good at what I can do. I'm also very willing to try new things and learn almost anything.

Why I could be a valuable asset
I think I could be a very valuable asset to this group because of the knowledge, I mentioned earlier. I can teach and assest members with anything I'm capable of. Helping people on HF is one of my favorite things to take part in. I'm a professional mature person also. I provide the group with my skill set 100%. I also provide money to other legion members if they are in need of it for starting a service or company. I like to invest in things so I can see how they will turn out. But the only people that I would help out financialy are other legion members, because I have been scammed twice for people making booters. I'm a great person once you get to know me. I can be a great friend to anyone. I would love to make some new buddies that I can teach and or can be taught in anyway myself

also upgraded one member, see him here

My accomplishments and future goals
Well when I stumbled upon hack forums, I pretty much knew how to absolutely squat. I was just a person that wanted to learn. So far I have became very good at spreading, e-whore'ing, and SQL. SQL was the hardest for me though I struggled in that quite a bit, but putting hours into learning it; I have it down pretty well. Some of my future goals are to become a massive spreader, and to release

some e-books for e-whoreing, SQL, and one that I have started, RAT'ing and spreading for beginners. I would also like to invest in something that actually becomes well known throughout HF, I think that would just be so satisfying being able to say, " I was a important part in founding "something" ".

Tell us about yourself

Well... Where to start. I'm a normal person that loves to learn new things and to put my 100% effort into everything. I'm a very kind person, most people I get to know end up really liking me. I like to go to the towns skate park and bike. I'm decent at that since I have been into it since I was 6. I also like to spend a lot of time on the interwebz, mainly browsing HF. I'm a well tempered person, I'm also very patient and kind. Least that is what I have been told.I like to focus my life on having mainly positive experiences also.

Looking forward to your thoughts on my application.
Best regards, Carpe Diem

Kiwi™ - *August 25, 2013, 2:02 pm*

Elaborate on your skillset: I am very much into Malware and want to start learning a few coding languages as i am yet to learn any, I very much enjoy helping people with computer problems for example removing malware and/or other virus', I also am a very creative thinker as i like to create methods of doing thing i like to say i think outside the box, I also have developed in social engineering.
Tell us why you would be a valuable asset: I think i would be valuable as i can help removing malware and can make eBooks, And methods for things such as spreading, Exploiting systems for example around the area of getting skype emails via facebook (Not that exact i mean stuff like that.).
Elaborate on your achievements and future goals: My biggest achievement is probably infecting 500 people in 1 day with my rat using JDB and facebook, My future goals are to be able to code in over 5 languages that are useful to my skill set and being able to earn a decent amount of money on the web.
Tell us about yourself: I love to stay fit and do outdoors activity's, I also love to spend days without sleep learning more new things about computing, Im from England and am a very generous person.

I hope you like my application.

Best regards, Kiwi

Ballinn - *August 25, 2013, 2:08 pm*

I am interested in the Student Program, if that is still being offered. I am currently taking two networking and security classes in college and I plan on doing more with that in the future while working in the IT field. I would love to have the chance to be a student in this group and learn as much as I can about networking and security. I have also started to dabble in coding, I am trying to learn Perl to get a taste for it hopefully work up to some more advanced languages.

I apologize if this was assessed in the thread or if it is no longer being offered.

Graybyte - *August 25, 2013, 3:40 pm*

Elaborate on your skillset:
GamingHardware Modification
Competative Gamplay
Recording and Video Editing

CodingHTML(Taken 3 years of Web Development)

VB.Net(Self taught for about 1 1/2 years)

Graphics and VideoPhotoshop(I have been using it for about 4 years now and have taken 2 classes)
Sony Vegas(I have been using it for about 2 years)
Adobe After Effects(1 year)

"Hacking Activities"Phishing(I code them in VB)
RATing(I had around 130 slaves, but I havent checked in about a month)
E-Whore(I make about $20 a day and I have written one E-Book)
Doxing(I have been Doxing for about 2 years)

MusicGuitar(6 years)
Trumpet(7 years)
FL Studios(2 years and I make mostly dance and hardstyle)

Tell us why you would be a valuable asset: I am a valuable asset because I am very well rounded in my skills and can fit in almost anywhere. I have been told I am a natural leader and can take major roles in a project easily.
Elaborate on your achievements and future goals: Some of my goals are:Make more friends on HF
Become advanced at coding in VB.Net
Learn some Monetizing Techniques
Teach others in graphic and web design

Tell us about yourself:
I am 16 years old and live in California. Before I was born, my father died of a heart attack. So I have never had a father figure in my life. My cousin kind of became that role when I used hang out with him everyday for about 3 years. He was the one who got me into playing guitar, being active on forums(Such as this one), and Doxing. He pretty showed me the ropes of the internet.

I enjoy listening to Metal, Techno, and Classic Rock music. I have been in 4 bands in my 6 years of playing guitar(2 metal, 1 punk, and 1 grunge).

I have been playing video games since I was 4 years old, when my mom gave me her NES. I evetually got more consoles as time went on, such as: GameCube, PS2, Wii, and Xbox 360. But now I have seen the light, I now have a gaming PC and am loving every minute of it.

And i try to enjoy life asmuch as possible
thank you for reading my application.

Werto - *August 26, 2013, 11:53 am*

Elaborate on your skillset: I wont say that im any good within hacking or coding, but I know how to RAT and I made my own little website. Im a gamer, and I am interested in learning how to earn cash, preferably not blackhat.
Im partly interested in learning HTML, as I enjoy doing it. (Not that I know alot... Mainly the basics.)

Tell us why you would be a valuable asset: I am willing to dedicate my time to learn, and try to do my best. Im interested in learning how to earn cash online, and I've heard this group know how to do this, hopefully I can learn from you.

Elaborate on your achievements and future goals: My future goals online is learning how to earn money online, preferably $20+ a week.
Maybe learn something within hacking, becoming one of the greater members on HF, have fun and make new friends.

Tell us about yourself: I am 15 years old, 16 in November. I live in Norway, and im going to school to become an electrician, or something within that branch. In my sparetime I like to play games, hang out with my friends and have fun.
Im playing some Cod, and some bf3. I was also into photoshop a while back, but I eventually got tired of it as I lost creativity.
I try to act matrue,

I know this isnt much of an application, but im not good at writing these...

Thanks for your time.

- Werto

Zombiez™ - *August 26, 2013, 1:04 pm*

Elaborate on your skillset:.
Ratting:
Ratting has been the first thing i'v learnt to do with "Hacking". Like most people, I came to HF to learn that. I've been ratting since I first joined the forums.

Social Engineering:
This is a BIG part of my skill set. I try to SE anything I can. I spend most of my time trying to SE Larger things but fail. I try to improve my social capability's by eWhoring and persuading others too purchase things.

Graphics and Development:
I've been doing graphics since I was young and I help with video editing sometimes. I am also amateur in HTML/CSS I try teaching my self by reading guides and learn so much off of reading. I hope to be a better artist in the future!

Gaming:
I have no clue if this counts as a "Skill" but gaming does sometimes take practice, if something takes practice in my eyes it's a skill worth sharing in my application.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because of how hard i'm trying to improve my self across hackforums as an HQ Member.
I'm always trying to learn and teach other users how too do things during my free time.
Elaborate on your achievements and future goals:
I have never set and REAL current goals... Well maybe I have. One of my current goals is to get into an Official Group. My last goal is to donate as much time to helping Legion. I don't like setting goals mainly because I don't have the time. If I do set goals, it's normally to because i've wanted and wanting to do it for a long time.
Tell us about yourself:
I'm 18 and i'm from the "United States". Many people know me by the name of "Bryan". I do have older names such as "TheDrunx1, and Discover™". I've been around Hackforums for 2+ Monthis and will strive to be here for a lifetime. Lets hope I never get banned "I've been banned once it was the suckiest time I have ever had." I love learning and teaching others skills that they should be aware of, I also love helping as much as I can and I am a dedicated Member. I spend most of my time in "The Lounge" or the marketplace, Graphics Section.

?Adam? - *August 26, 2013, 2:41 pm*

Elaborate on your skillset:

SPREADING

I've created my own method to spreading. It doesn't get a bunch of people, but it get's enough.

SOCIAL ENGINEERING/MANIPULATION/REVERSE PSYCHOLOGY

I've SE'd companies like:

Logitech, Apple, Audiophile, Skullcandy, Coolermaster, Green Vibrance, Microsoft, to name a few. I can trick people into giving me things I want using only my words, and their own stupidity. I have the power of SE.

WEBSITE DESIGNER (MOSTLY WORDPRESS)

I've been building websites for the past two years, without knowing any code whats so ever. I've now moved on to Wordpress, and have built many websites for my father's company, not to mention my own upcoming website, which I will only give information about to Anonymous if requested.

LEARNING VISUAL BASIC

I'm not very advanced in VB. I can do simple stuff, like making login forms. I'm determined to learning more about Visual Basic, and look forward to building more complex applications in the future.

LEARNING PENETRATION TESTING

I haven't gotten to this yet, but planning to very soon.

A BIT OF SQLi

I started learning and stopped about a month ago. I'm looking to start again in the near future.

GROUP/TEAM WORK

I love working and groups. Not only do I love it, I can do it. Being a part of a group is something I enjoy.

HELPFUL IN MY FIELDS

If you need help with something I'm good at, you can count on me to help you. I'm online a lot, andI love learning and helping.

LEARNING PPD AND KNOW BASICS

I've already setup a few videos and niches. I make my PPD programs with my Visual Basic knowledge. More on the way.

GREAT DOXer

I've never done a Doxing service before, but if I use my 'SOCIAL ENGINEERING/MANIPULATION/REVERSE PSYCHOLOGY' tactics on others, you can be damn sure I'll get some good information on them.

Tell us why you would be a valuable asset:

I believe I would be a valuable asset to Legion because of my skillset, determination, and thirst for knowledge.

I've been practising for many years. When I started, nobody was there to help me.

Since I know what it feels like to be clueless, I would like to help members of this community strive. By doing so, I would not only build a stronger, and more knowledgeable group, but I would be adding to the community.

I'm a great guy to work with, I have a good personality, and I will not bring you down. My main goals are to learn, help and achieve.

Elaborate on your achievements and future goals:

ACHIEVEMENTS:

-At the moment, I'm developing a site. Once it's done, I believe it will become very popular.

-I've almost mastered social engineering.

-As a personal acheivment, I'm happy to announce that I started taking Krav Haganah courses. It's the IDF's hand to hand combat. So soon, I'll be a ninja ?

-I have created multiple relationships and partnerships on HackForums.

-I have also joined the unofficial group, 'Intellectus'.

GOALS:

-In the future, I hope to be able to program applications for computers and mobiles. I hope to create unique products that can sell for a lot of money.

-I would like to learn at least three programming languages by the time I'm 22. (I'm 17 now.)

-I would like to have lots of expertise in application and website security. I want to (legally) be able to get into a very secure website, and then be able to fix the penetrations for large sums of money.

-I want to learn and help. Once I achieve, I'd like to teach others how to achieve as well.

-My unrealistic goal: To make my first million by the time I reach 20 years of age.

Tell us about yourself:

My name is Adam.

I'm a 17 year old from Canada. My favorite sport is Basketball, and my favorite color is Blue.

I'm a Caucasian male. I'm interested in technology (and how to exploit it), weapons, and money.

Since the age of 9, I've been interested in computers. I went to learn some programming. After programming, I went to learn some hacking, and hacking people's brains. After hacking, I tried to make money online. And here I am now, starting programming and hacking again.

I'm hoping to succeed in all I do, and live a happy, healthy and wealthy life.

Thank you very much for reading my long post. Getting accepted would mean SO much to me!

I wish good luck to all the other applicants.

Thank you!

-Adam-

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
Ratting.
Well, I'm rather new to RATting but I'm trying my best to get a good knowledge of how it works. I currently have only a small amount of slaves but I've only been RATting for a couple of weeks.
I had a few problems, but I've overcome them now.

Computing
Computing has been a massive part of my life since a young age. I got my first laptop when I was 9, and I've been interested ever since. I spend an incredible amount of time on my computer, some addiction sort of thing. I have built my first computer this year in January, which was a massive step into the new side of computing that I hadn't worked with before. Computing gives me a thrill, I'm completely in love with it, and would LOVE to do it for a job in the future.

Graphic Design
I've been experimenting with graphics for a couple of years now, but only a few months ago I actually started making some progress. I will be found in the free graphics requests section most of the time, because I do not believe my work is quality enough to be sold on, but it seems okay for free design. I love messing around with layer styles and such. Although art isn't a massive speciality for me, graphic design really made something for me.

Social Engineering
I do not have the biggest balls in the world, so I limit myself to social engineering. Although, I have made some profit from it. I've got free meals, a couple of phone cases and about 6 months of XBL from social engineering. I find it hard to lie to someone over the phone though, I guess that's just my personality.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I believe I am a kind, funny person who is easy to get on with. I am incredibly active, and love spending time on my computer like I said before. I think I will be a good student, always willing to learn, I find it hard to give up on things sometimes. My grammar is good, so I think I could be shown as a high quality member for Legion.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I'd LOVE to get into internet marketing, plus working in technology as a job. My income at the moment is terrible. I love computers as I said before, so I'd love to work with them. I'd rather enjoy my job, then absoloutely hate it.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I'm 15 (my birthday yesterday), I go to a large high school in the UK. I believe I'm mature for my age and good to get on with. I've specified all my interests beforehand in the application. All I can say really is that I'm willing to represent legion!
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Business - *August 26, 2013, 4:39 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:

I am a RAT Expert, as you can see by my award, but I will not be talking about that for obvious reasons. Besides RATs, I excel with keyloggers, other hacking tools, social engineering, monetization, marketing, business law, cracking tools, innovative website and program ideas, and much more.

I am exceptionally skilled when it comes to social engineering. I, along with my friend Understalker, run a "RAT Anyone" service where we display this skill very often. Social Engineering is the art of manipulation, and knowing how to force others to release information that you want. I am currently taking a course on Philosophy, and another on Psychology. These classes help sharpen my talent in this field.

As for cracking and miscellaneous hacking tools, they are not the hardest to use, but I yield great results. I give away Netflix accounts in the upgraded member section.

I know this group is not about marketing and monetizing, but these skills can help alongside my other skills. Not only do these skills provide me with resources to assist with projects that the group may have, but also help me maintain my own.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:

I have a newfangled mind. I am exceptionally quick with learning new skills, and teaching others mine. With my knowledge of the human mind, I am very adaptive. I am able to devout a large amount of time to teaching others about my skills, and I am also open to learning new skills.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:

I have been apart of many products here on Hack Forums. Some no longer around, but others are. My site, remote-filehost, is up and running. I also assist with running jRAT4. My skills with marketing make me a valuable asset when trying to bring in larger profits. I plan to be apart of many more projects to come.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:

I am a respectable guy. I do not cause problems, but I stand up for what I believe in. I am studying the human mind, and also the way that we use them when buying, selling, and consuming. I love helping others, and am extremely passionate about anything I take on.

?Adam? - *August 26, 2013, 5:26 pm*

Thank you kind sir, I appreciate it.

Good luck to all!

Understalker - *August 26, 2013, 5:28 pm*
I am seeing some good applications, keep up the good work guys. Anyone who is answering questions with one liners will NOT be accepted.

Duhoh - *August 26, 2013, 5:34 pm*

Elaborate on your skillset:

Remote Administration Tools
I'd like to start out with RAT'ing, explaining how experienced I am with them, what I've earned (from what I've posted on the forum), and how long I've done it. From one of the first threads I've posted (https://hackforums.net/showthread.php?tid=3639582) found there, I've developed a vast knowledge of RAT'ing. That single handed installed turned out to contain nearly 900m of 07 RS money, which, in turn, gave me nearly 2500$. Since then, I've yet to stop RAT'ing and stop vasting my knowledge into the experience. I have purchased plenty of Crypters, JDB's, and even RAT's. The current products I use today are Blackshades, Cube Cryter, Epic Java, and Silent Miner. What mainly got me into RAT'ing was the pure fact of being able to control someone elses (mainly foes) computer and to do whatever I wanted with it. Since then, I've turned my RAT'ing knowledge into marketable funds that I currently use today. Not only do I use it for funds, but I use it to supply things to others, and spread my vast knowledge to HF everyday. Forward a few weeks later, I have still worked with RAT's, and I did do a RAT setup for people (https://hackforums.net/showthread.php?tid=3671916) found there. I continue and continue every single day to try and help out users and try to be as kind as I can to everyone and let everyone else experience the journey that I'm going through. Then forward a few days after that, and my most recent, yet big, RAT turned out to be here (https://hackforums.net/showthread.php?tid=3711595).

E-Whoring
E-Whoring is something I kind of considered a hobby to me. While it wasn't my main source of income, it was something I did in my spare time, or something I did when I needed an extra buck or a few dollars. While I do have a very large vast of knowledge towards RAT's, I do also have a lot of experience with E-Whoring. E-Whoring has been something I've done before I joined HF, and something I've (or used to) practice on a lot. As of recent, it hasn't been something I've continued on with in HF, or in general. Recent E-whores have kind of satured the E-Whoring world, but when there's a will, there's a way. And I still know plenty of ways to e-whore. I've also E-Whored for installs at certain points in time, when I wasn't looking for money or a quick buck.

Gaming
Well, now let's get to a subject other then hacking, gaming. Gaming is something I do a lot in my spare time. Whether that be ESEA (esea.net) which is competitve gaming on CSS, CSGO, and a few other games. Since I was a kid, I've enjoyed gaming to the brightest. I had all the console games as a kid (PS1, PS2, Gamecube, Gameboy, Xbox, etc). Gaming is actually what brought me into HackForums, when I decided to try to boot people offline (yes, I'm sure we've all been there at one point or another). Since that point, I've experienced the greatest hacking experience of a lifetime, and I continue every single day to expand my knowledge into the world of hacking.

Tell us why you would be a valuable asset:

I think I would be a great addition to Legion. I have plenty of tutorials, stories, and good times I want

to share with the group. I want to join Legion to tell others what I've learned, and learn from others to make my HackForums experience better. I would be a valuable asset because I am not only active, but I can be helpful (as I've already been with my RAT setups, etc), I can devote all my time and lessons to help out the group and help other people in the world of hacking. I'm not the greatest and most experienced "hacker" out there, but I do have my own knowledge and I do continue to learn and strive each day at HF. I want to continue to do these things, in Legion, and share my knowledge with the entire forum to the best of my ability.

Elaborate on your achievements and future goals:

Achievements:
I have achieved a lot in my time here, but then again, there's a lot that I still want to achieve. I'll explain that below, but as per my current achievements, I have achieved full knowledge of Remote Administration Tools. I think I know everything as far as RAT'ing that there is to know. I can teach anyone anything about a RAT, as well as answer any questions straight off the bat about a RAT (hey, that rhymed). I have also achieved full knowledge of E-Whoring, now, while I might now know everything about the setup of E-whoring (setting up VCW's, getting pictures, etc) I do know a lot about the basic knowledge of it, and can teach other users well of it. I still have a lot to learn about it, but as of know, I would say I'm well knowledgable of E-Whoring. Now, as far as Gaming, I know a lot about gaming, as well as being good at it. I think I've achieved a lot of Skill in Gaming, and when it comes down to it, I'm not trying to promote myself or brag, but I think I'm a good gamer.

Goals:
My number 1 goal in all of HF is to help others with RAT'ing. Now, I know you might think "oh that's a load of bull he's saying that just to make his app look better", no. I'm saying this because the time and dedication I've spent to learning RAT'ing and the amount I've received from it is unspeakable. I've done so much in the world of Remote Administration Tools, and I'd love for others to see and experience the same things I have. I want to share my knowledge and help out so many users of HF so they can realize that it isn't very hard to learn RAT'ing, and anyone can do it. My next goal after that, is of course, to join Legion. I'd preferably like to help out many users of HF while being in Legion, and expanding OTHERS knowledge in the world of RATs.

Tell us about yourself:

I am from Philadelphia, Pennsylvania. I'm your typical hacker. I currently have a girlfriend, and have my own apartment. I'm looking in the future to be able to buy a house for me and my girlfriend to stay in, but at the moment, that isn't possible. I've had so much fun, time, dedication in my life built to not only RAT'ing, but other forms of hacking that I've done. A few occusations in my life has occured where I've gotten in trouble for these hacking utilities, and I've still brought myself back into the picture. I've been doing this for years on and off, and have a very vast knowledge of everything that I've explained. I am a kind person down at heart, and I love to help people, not only on HackForums, but in real life too. As much time as I spend on HF, I spend the same amount, if not more, with my girlfriend, and my friends. I hope to get to know everyone in Legion well, and hope I get accepted. Thank you.

?nonymous - *August 26, 2013, 5:38 pm*

I reviewed all applications up until Vigor's reply found here:
https://hackforums.net/showthread.php?tid=3542998&pid=34831282#pid34831282

Next wave of students will be in some time.

Maxorg - *August 26, 2013, 5:44 pm*

Elaborate on your skillset: I'm a php coder and at the moment I'm relearning C++, C and C#

Tell us why you would be a valuable asset: I can be a valuable asset as I can help with various coding needed and I can help with a few other projects.

Elaborate on your achievements and future goals: I'm planning on becoming a software engineer at microsoft or apple one day or even open my own company with my partner/bestfriend.

Tell us about yourself: My name is Cyborg and I'm a 18 year old programmer working his way up to success.

Same Here spent 40 mins on my app also and I really want too join :D

xVulnerable - *August 26, 2013, 5:56 pm*

Elaborate on your skillset: I am very experienced in RATs and Viruses. I know how to remove infections from a computer manually. I enjoy helping users in the Beginner Hacking and RAT sections with their problems regarding to any hacks such as DDOS, RATS, Keyloggers etc..I also know SQLi.

Tell us why you would be a valuable asset: As i am a very active user, i will be a valuable asset because i am a very helpful person, i would create more tutorials on hacking and contribute even more in the sections mentioned above.
Elaborate on your achievements and future goals:My current life goal is to increase my hacking knowledge and become a better hacker. Even the best hacker has more to learn. Also another goal is to build a good reputation on HF.
Tell us about yourself: I am 17 years old,computer addict, very sportive, play soccer and tennis. I am currently studying IT (Network) in college. I discovered the art of hacking a year and a half ago which i fell in love with, which then i found out what Hackforums has to offer which i fell even more in love with hacking. I am a hacking addict.

Thanks for reading my application, i hope you like it.
Regards, DatHax.

Zink - *August 26, 2013, 7:06 pm*

Elaborate on your skillset:

I'd Like to begin on one of my skills involve ratting, i know ratting is not a skill but i am very good at making the effort in trying to RAT someone. The biggest amount of slaves that i had was 122 slaves, off of basic spreading method but now it started to get to the point where i don't know what to do with my slaves at times and it begins to get boring. Hoping to one day get a huge amount of female slaves so i can sell them.
I'm very into malware, reason was because there are times i want to do some things to my slaves computer and files, then i started to learn about different times of Viruses and worms that were very interesting. I'm very nice, i'm able to think under stress especially when there are certain situation attacking me personally. I'm very outgoing, not afraid to talk to anyone. I'm learning HTML for website infection and developing in network secruity.
Tell us why you would be a valuable asset: I'm very smart when it comes to instruction, I've read many eBooks in the past over different methods for different category of hacking, I am a hard-worker and I'm not afraid to learn something new. I'm also good at Video Improvising and Creative Thinking because many of my associates say im getting better at Graphic Designing and Video Production.
I useSony Vegas Pro
Adobe After Effects
Adobe Photoshop
Adobe Premiere

Elaborate on your achievements and future goals:
Learning HTML Website Infection, involving RATTING over 100 of my Facebook Friends Via Chat. My future goals is after i finished with high school, i will move on to college and major in Computer engineering.
Tell us about yourself:
I love playing Sports, I try my best to make a portion of myself to fit with my schedule. I love going on different types of Games and messing around with my friends. I'm very chill person, i never get angry at anyone unless having something to do concerning my Family, I love dancing especially towards my girlfriend when she having a bad day, and I love learning about new stuff on the computer.

rfz777 - *August 26, 2013, 7:29 pm*

If I'm correct, 24 students were accepted. Apps are probably closed for the time being, knowing we have enough members as of right now.

Understalker - *August 26, 2013, 7:48 pm*

Well, that stinks, spent nearly 40 minutes writing up my app, was really hoping to get in. :/
It will be done but not until the next wave of students are planned to be invited. ?

'Soldier - *August 26, 2013, 8:00 pm*

Elaborate on your skillset:
• Cracking - For the most of my time on hackforums I have been cracking all sorts of accounts and making different combo/wordlists. It's something I really enjoying do.

• Social Engineering - I would consider myself a pretty good smooth talker and persuader, I was very good at getting stuff and selling them to other people with no problem, and I kept doing that which allowed me to buy a lot of items I wanted.

• Gaming - I started to play video games around the nintendo 64 days . After a while I started playing the original Xbox. I played Halo, GTA, etc. and when the Xbox 360 came out I got it. The main game I played was Sports games and Halo a little. After about 1 year of playing on Xbox I decided to get a PS3 also, and from PS3 online gaming became something I really enjoyed doing. I played everyday and it's helped me with socialize with people and meet tons of new friends.

Tell us why you would be a valuable asset:
I just love socializing with new people learning new things. I feel like I can learn a lot from the group, and with what I learn I can return the favor by helping anyone who is also in need of help.
Elaborate on your achievements and future goals: My future goals on hackforums are to learn as much as possible and help out around here as much as I could. After I would like to finish school with good grades and get a job to do with computing or engineering.
Tell us about yourself: Well, My name is Brian and I'm 15 years old, I live in Arizona and I'm a sophomore in high school. Some of my hobbies are gaming, football, and hanging out with friends. I really like interacting with other people and learning new stuff everyday, and helping out people in any way possible. After high school I plan on going to collage and getting into something related to

Michelangel? - *August 26, 2013, 9:57 pm*

Elaborate on your skillset: Social Engineering i think i can be pretty persuasive and

manipulative when i try hard enough and it's worked on people. I hope to

learn a lot more forms of hacking through the student program. I hopefully

plan to learn about Malware, Botnet, network security and a lot more, to be

honest i am willing to learn anything that the program is willing to offer to

the students.

Tell us why you would be a valuable asset: I am a fast learner, very dedicated to learn

how to hack (either BH or WH), I have lots of free time since i still don't

have school for a good amount of time. I also plan to open a lot of

tutorials in the name of legion and maybe a few giveaways to show my gratitude if i am invited to show my gratitude towards the group. Once i am fully taught in most forms of hacking and if anonymous finds me worthy enough i can help him with any future projects he has. I plan to solely dedicate my time while i am online to learn things from the student program and to show that i would make a great addition to the group and you won't regret adding me.

Elaborate on you
achievements and future goals: I have not had to many achievements involving hacking, unless you consider hacking a skype account an achievement. My future goals is to actually know something about hacking while im on HF so i don't feel like a complete idiot when people are talking about some sort of hack and i will hopefully understand what they are talking about after the student program is over. Another goal i have is to learn to produce music and make Gfx in the near future. I would really love to become a producer or Gfx artist and be known for my work.
My main goal is to learn the overall knowledge of hacking and i feel with the student program that anonymous has opened and given everybody a chance to join i can accomplish my future goal.

Tell us about yourself: My name is Angelo i am a 16 year old going into 11th grade in highschool. I would really like to join Legion just for the simple fact that it is ran by a very high quality person who is well respected on HF and knows tons about hacking who will be a great mentor. I have no backround story or sob story to make you guys guilt me into your group, i honestly just want to be in it so i can finally know something about

hacking and understand. I have tons to offer because i believe i have a lot

of potential if i have the right tutor or teacher. I have been trying &

Looking every where for that perfect somebody or something to teach me

in the art of hacking. I believe that this student program will help a lot of

people and i am thankful for Anonymous giving everyone the chance to

join and learn something from actual people who know the art of hacking.

I hope you enjoyed and

took the time to read my application & hopefully i am accepted.?
Spoiler (Click to View) I have personally asked Anonymous if i was allowed to re-apply and he said i could. Was also given permission to edit my post.

Diligence - *August 27, 2013, 8:31 am*

Guy, feel free to use my line-breakers in your applications.
You can also edit my layout to fit your needs.
https://hackforums.net/showthread.php?tid=3542998&pid=34731986#pid34731986

Scondy - *August 27, 2013, 9:56 am*

Elaborate on your skillset:
Gaming
-Competitive
-Tutorials
-Knowledge About Modified Xbox's

Tell us why you would be a valuable asset:
I think I would be valuable because I am always doing giveaways and helping users every chance I get. I also post tutorials on a lot of good content.

Elaborate on your achievements and future goals:
Well my goals would probably just be stay successful here on the forum and in real life.

Tell us about yourself:
I am 18 years old and love playing video games and learning new things whenever possible. I am very helpful and have a lot to offer. I also am a very good peoples person and love just chatting to others.

DrJcomplex - *August 27, 2013, 1:40 pm*

Elaborate on your skillset:-competition
-Xbox modification
-team playing (gamebattles)
-video gameplay + editing

Monentizing
-eBay marketing
-Adsense exchanging
-iPhone and iPod repair
-general HF product selling.

Tell us why you would be a valuable asset: Well, I think I would be a valuable asset to the group because I have a strong personality, strong willed person, and I Strive for nothing but the best. I don't have ass anything I do, anything I do is done with top quality, I won't settle for less. I am a very easy guy to talk to and won't let the group down, simple as that.
Elaborate on your achievements and future goals: My future goals for hack forums and in real life would be to on stain recognition to the forum, have a deep impact on the community, and have access at everything or anything I do. As for real life goes, my future is to succed in life.
Tell us about yourself:
(Edit the layout yourself, just include answers to the questions.)I am a very laid back person but very logical at everything I do, not trying to sound cocky but it's true. I am entertained by helping people who need it more than me, so that's one of my biggest goals here on the forum, it's something I'm good at and enjoy doing. HF is kind of like my second life outside of real life, it's a place I can go if I need to talk to someone or to simply get something off my mind, so I make sure whatever my task is, I do it right with highest quality possible.

Nymphetamine - *August 27, 2013, 1:48 pm*

Elaborate on your skillset: I've been programming in C for eight years on the Windows platform. I've done driver development, as well as extensive knowledge on the Win32 API. Knowledge in x86 ASM, Reverse engineering (Which mainly came from my game hacking days)
Tell us why you would be a valuable asset: I love helping people learn. Do so on a regular basis, whether it's through private messages, irc (voidptr) or even Skype. Willing to answer questions whenever necessary. I also find teaching enjoyable.
Elaborate on your achievements and future goals: Achievements involve mainly personal projects. Used to do a lot of game hacking, still have my old source codes laying around. Recieved a coder's status on Gamerzplanet forum. Recieved a trusted coder status on DarkHook. Also active on those forums. Made an encryption layer for Skype doing simple recvfrom and sendto hooks. Ring0 rootkit to protect files, and processes. If you'd like my full project list, I'd gladly show you. My future goals would involve finishing an anticheat which I have already started development on in the driver level, currently working on the IOCTL routine.
Tell us about yourself: I'm 28 years old. Even though new to this forum, I try to be active but try to produce as little as spam as possible. Hence the low post count. I love programming in C, I haven't done much C++. I understand the OOP just none of the templates part of the STL. I'm constantly programming. When I finish with one project, I move onto another. I have no problems answer questions for people.t. I don't consider my self an expert but I do have extensive knowledge in the fields I've both done on my free time, and worked in as a career.
If you'd like me to provide any proof stated above, or need more information, you can pm me or contact me in
irc: irc.voidptr.cz
chan: #bottalk , #main
nick: stdio
Thank you.

Biologic - *August 28, 2013, 3:51 am*

Elaborate on your skillset:
I understand that you want a specific skillset, but here's the thing I want to join legion to learn from you guys so I can use the skillset you teach me, to help and enhance my knowledge on the subject encase I need it in the future, to be specific subjects such as: Security Development, and coding.

Tell us why you would be a valuable asset:
I'm a great marketer and have great tactics, so if there are any products you would like marketed, I can draw so much attention and customers to all of your products and raise the percentage of your sales out of the roof if I'm accepted.

Elaborate on your achievements and future goals:
I would like to go to college for a business degree, so I can open a Shoe and apparel store, that will be bigger and better than any regular retail store today. But I'm going to start my business as an Online store before I open an actual retail store, so that is why I would like to learn coding and Website security, if Legion offers it in the student program.

Tell us about yourself:
I'm 16 years of age, Sophomore in highschool and I'm from Virginia I love sports favorite American football team is the Philadelphia Eagles. I like to Write and produce music, I'm also working on my first actually big hacking project, I'm trying to create my first Botnot IRC with my friends. In my spare time If I'm not out living life, I'm an avid marketer of my clothing line, I have made total of $10,000, selling my clothing line to people through Twitter, Instagram, and facebook.

SIM-1573279 - *August 28, 2013, 7:30 am*

Elaborate on your skillset: I have taken a class on the Java language so I understand basic-intermediate Java. I know basic Perl and of course Unix. I also have a good understanding of how to work with HTML and MySQL. My primary focus though, is Network Security. I know how to harden servers and monitor connections. I know how common DoS attacks work and ways to stop smaller attacks and weaken stronger attacks. I know how to setup protection systems for brute-force attempts and how to make sure everything ends up in a log. I know what RAT's are and how they work, along with how to get them in place. Though the actual using of the software isn't much of a 'skill', the spreading of the data is a challenge in itself. Which leads up to Social Engineering. I never truly do Social Engineering alone, as I've noticed that it's much more effective with two or more people targeting a single being. Knowing basic Psychology, I feel that I have a bit of an upper hand with understanding people. Growing as more a quiet, pariah, I relied on looking at people to identify their emotions rather than ask them straight up. I also know a good bit of Photoshop and GIMP, I can do basic editing and I could probably make nice banners or graphics if I put myself to it. Then of course, there's gaming, although I don't know if that's a worthwhile skill. Considering everything I do is on some flavor of Linux and a lot of the time, in CLI, I don't really do much gaming, at all. I believe that sums my skillset up in a nutshell.
Tell us why you would be a valuable asset: I feel that I could be of use because even with my age in mind, I have a fairly good skillset about me, and I am completely open to help others learn what I know, at the same time, learn from those above me. I'm a fun person and I can take a joke, to a logically acceptable level. I hope to take time and elaborte my skills to a much broader spectrum. At the same time, I hope to teach and learn likewise.
Elaborate on your achievements and future goals: Well being only in High School, I still have to make my way through that. I am an A student in school and I always take advanced courses, including college courses. I also plan to take online CEH and CISPA courses outside of school when I have time. My goals for college are to reach a Master's in Computer Science and a Bachelor's in Information Technology. If I have the chance after all that, I'd also like to go and get a degree in Computer Systems Analysis and Computer Systems Networking. My current, and probably future, job goal is to become a Network Architect. As a kid, I always played with hardware of computers and as I grew older, the Internet fascinated me. When I really got into it, I realized how interesting it is to be able to make this metaphorical door, that only I could allow people in and out of. It's an entire world in itself.
Tell us about yourself: Well, I am 15 years old. I am currently in High School, Sophomore. I live in Upper-East Coast US. I got my first functional computer when I was 4 which ran Windows 6.1. (I broke that after 4 1/2 weeks.) When I was 7, I took apart an old HP Pavilion computer running Windows XP and put it back together, without the case though. My home itself has a 3-computer firewall in the basement that is constantly running. I've always been by my friends and family as the 'guy who can fix anything' as I always end up in some house, some where, fixing something for someone. I've had a passion for computers and really, anything electronic, since a very young age. I continue to fuel that passion daily and I hope that Hack Forums and Legion can help me reach that

goal.

alignment - *August 28, 2013, 10:22 am*

Elaborate on your skillset:

Graphics: I am currently learning the art of graphics.
I learn from the best, and that is how I become better each time.

Hacking: I've been hacking for 1-2 years. I am still learning and still eager to do so.

Tell us why you would be a valuable asset:

I will learn alot from the experienced members in The Legion.
I will not be greedy and just take, I will also give back.
Once I become better at my skillset I will feel confident
posting tutorials, mentoring/ helping The Legion & Hackforums.

Elaborate on your achievements and future goals:

As I am very young (14 1/2) I have not acheived so much yet.
I am currently running a product with another user and it made me some money which I am very proud of. I never thought I could make money off of the internet, but I did. My goals are like a heaven full of stars, that is how many goals I have.

Tell us about yourself:

I am not the typical user who has applied to The Legion.
I am not the best at hacking, graphics, spelling but...
my thirst for pushing my limits are extraordinary, if I want something I will work hard to acheive that 'something'. I always attempt and try to become as good as I possible can become within a subject.

I never give up.

Greetings to Diligence for the amazing seperators he made and that he allowed us to use them.
I wish to say thank you to Anonymous respectively The Legion for the chanse to applicate to become an asset.

Best regards,
alignment

We are Legion.
I wish to thank Diligence for the seperators.

?Adam? - *August 28, 2013, 12:05 pm*

I waited a month before posting my application, due to some account issues.

So there is no way for me to get accepted now? No more members are being allowed in?

My application: https://hackforums.net/showthread.php?tid=3542998&pid=34853137#pid34853137

Thanks!

G_Homie_G - *August 28, 2013, 12:18 pm*

Elaborate on your skillset:Gaming: I play lots of games and I love competing professionally.
Graphics: I have basic photoshop skills, can create icons and small banners.
Coding: java, python, C, C++ and VB6
Monentizing: I usually sell my sevices of a game called "League of Legends" and I also used to sell accounts.
Networking: I understand machine based exploitation and I have also been learning network base exploitation, Its a very essential skill to have.
Social Engineering: I am very good with people online and on the phone, I think I can convince them to buy the product etc.
Music: I played the guitar for 2 years and also was a DJ on a cracking site.

Tell us why you would be a valuable asset: I have a good knowledge in everything that the group needs and using my skills and high quality assets to contribute to make the group even more popular. Also, I think I can share ideas with the group and help members if ever need be.

Elaborate on your achievements and future goals: My achievement on hackforums since November 2008 has been great, as I have met alot of people online and made lot of income. I would also like to make more friends on HF and help people around on HF. Im currently studying Software engineering at a University and have been excelling in all my classes. I would like to have a good life.

Tell us about yourself: I have a year to go in university, have been here for 3 years non-stop (no breaks), I am a very hard working student who likes helping others and being educated by listening to other members. I would be a very active member in Legion and will be very dedicated to the group.

~Thanks for reading my application~ Please don't hesitate to pm me for more information~

Wisdumb - *August 28, 2013, 12:34 pm*

Elaborate on your skillset:
Graphics: Been working with photoshop for awhile now. I have made many things and I feel as if I could help out with my GFX a little every now and then when others cannot.

Gaming: I play many games on the PC, and love to play with other members and get to know others.
- Star Wars the Old Republic
- League of Legends
- Dungeons and Dragons Online
- Minecraft

Think Tank: I'm good at coming up creative ideas, being a thinker when someone else is having a

bad day.

Adsense: I use many sites to make a little bit of money every now and then and could help others find out the best way to use them, such as...
- MyLikes
- NeoBux
- Probux

Tell us why you would be a valuable asset:
I think there are many other people that would fit a spot better than me, but with the correct training I almost guarantee I could be a perfect fit for this group, and if not then I wouldn't mind being a student.

Elaborate on your achievements and future goals:
Well right now as a person I am waiting out my days until I turn 18, which is in about 5 months, so I can join the Navy. I already have everything planned out and want to become a computer engineer. It's a goal that I intend on completing.

Tell us about yourself:
Well, my real name is Tristen. I'm just a kid that tries to do right and help others. I'm on the computer a lot, either gaming or just finding ways to make money. When I'm not on the computer I'm usually skateboarding or at the humane society volunteering to help out the animals in need (Not a sob story lmao). I'm not that interesting, so I don't know what all to put here, but thanks for reading this if you do, and good luck to everyone else that wishes to participate in this truly amazing group! :)

DoggyKong - *August 28, 2013, 3:30 pm*

Elaborate on your skillset:Ratting has been the first thing i'v learnt to do with hacking also helping people set up there rats also I am quite good at Social Engineering and basically the type of hacking that comes with persuasion and im very good at persuading people!
Tell us why you would be a valuable asset:Honestly, all I can say I could do as an asset would be either share good feedback to people i could teach people things
Elaborate on your achievements and future goals:This would be my goal to get into this group and help people and give advice
Tell us about yourself:Im 15 years lives in the UK im a causal kid im not into black hat activity im grey hat hacker and i a low profile type of person on the internet
Extra: It be an honor to be in this group to me i would love it

Toscan - *August 28, 2013, 6:04 pm*

Elaborate on your skillset:
I know HTML5, CSS3, Basic Java & C++, Dox, Social Engineering, and Decent with Photoshop/Adobe. I am also very experienced with social engineering. Over my years of making phishing sites and rating I've accumulated 5b+ over the time I've played Runescape. Finally I would like to mention my gaming skills are very high, can't wait to get victorious Elise this season so any legion member that loves gaming we will have a great time!

Tell us why you would be a valuable asset:

I hope everything I've learned over the years I can bring to the Legion members/future students of the Legion and contribute as much as I can to everyone. I would always take part in activities and other Legion related events and also discussions within the Legion . I would be very active, and always try to help our community. Social Engineering is probably one of my biggest assets I'd say

but I haven't done it in awhile.

Elaborate on your achievements and future goals:

Over my many years on the internet, I've learned a lot of key things most people should know to make their internet life easier. Such as knowing basic to advanced aspects in Photoshop/Adobe, Webdesign, Privacy, Gaming and being Competitive online. My future goals are to be very familiar with coding/designing Booters and Shells. I would also like to figure out how crypters work. I want to push myself this year and learn many new things online.

Tell us about yourself:
I'm currently 18 years old and just got out of school. I have a twin brother who looks exactly the same people find that cool and ask everywhere I go. Most of the time I am working on something productive or usually playing games. Favorite game at the moment is League of Legends. Favorite sports is obviously Football, This sport was my childhood. 8 Years of my life was nothing but Football and I don't know how I would act if I didn't learn sportsmanship/respect in this sport. Building computers is another hobby of mine and I recently had to sell my dirt bike for new tires on my truck. Thanks for taking the time to read my application, hope I can be apart of this amazing Legion.

($LOOP) - *August 28, 2013, 6:26 pm*
Elaborate on your skillset: I'm a self-taught programming with many years of experience. I'm mostly a web developer, however I know: HTML/CSS/JS PHP Java C# C++(minor, not too much) VB .NET among a few others, however they are not very important.
Tell us why you would be a valuable asset: I'm in to security, I run a blog about security and it hosts zero-day exploits, etc. I get over 1 million page views on it per month.
Elaborate on your achievements and future goals: I've developed stresser sources, live support, etc. I also operate a decent sized botnet of over 12,000 bots (rooted servers, some slaves)
Tell us about yourself: I'm just a person who likes having fun. I've given away tonnes of things on hf (free vpses, ddos protected rdps, etc) and I plan to continue.

Thanks,
Zoned

Anon™ - *August 28, 2013, 6:53 pm*
Elaborate on your skillset:
Gaming
Modify Consoles (xbox 360)
Playing game battles
Helped with XboxLiveStealth (sales wise)
Helping others with modifications (console wise)

Web Development
Basic Coding skills in HTML,CSS,PHP
Excellence in IPB,MYBB,VB
Can make Custom skins for IPB

Natural skills
Patience and Perseverance
Responsibility
Out-of-the-box thinking
Taking and maintaining good notes/documentation
Strong & certified theoretical background on Telecommunications, Networking & Security

Fast Analytical thinking
Social skills
Stress-battling/Cold-blood nature

Tell us why you would be a valuable asset:
With all my skills sets i hope to bring it into legion and help members that need help were i can assist them in. i also love to contribute in group actives , events.
i just want to give back as much as i can to anyone that would need help with my skills i hope to achieve a good in the community .

Elaborate on your achievements and future goals:
I have recently graduated from BCIT for drafting and Network Administration. This is a huge achievement for me and my family / friends. for my future goals
i hope to be working with a high Reputable and professional company. I hope to go back to BCIT for my 3rd year and get more into Graphic / Web Development courses.

Tell us about yourself:
My real name is Gordy, i am from Canada (yes the tasty bacon). I am 19 years old, some of my hobbies include hanging out with friends , playing football,hockey,soccer.
Over all im just a nice respectful guy that loves to enjoy life and hopes for surprises in life that will bring joy and excitement to everyone

Maxorg - *August 28, 2013, 11:16 pm*

Elaborate on your skillset:
Graphics:
I've been doing graphics for 4 years and I'm not planning on stopping it. I'm good with Photoshop, C4D and I can use Illustrator a bit.

Virus Removal:
I'm good with virus removal and so on, when one of my mates think they're infected they come to me so I can scan and clean for them but I'm still improving in this.

Gaming:
I've been gaming ever since I was 10 years old, over the years as gaming has been changing I've been moving along with it also. I currently play via Playstations 3 or sometimes PC. I play Minecraft, League of legends, Counter strike source, Team Fortress 2, Gta San andreas, SAMP, MTA for PC and I play GTA IV, Mw3, Mw2, Sims 3, BO2 for Ps3.

Rats:
I've been using Rats for a while now and I've learned alot about them as I continued using and I can now say that I'm very good at ratting.

Programming:
I've been doing computer programming for a while now but I'm still improving in it. I know a bit of vb, C#, C and C++ (still improving). I also know HTML, a bit of CSS and I know PHP.

Tell us why you would be a valuable asset:

I will be a valuable asset as I can help the group with any graphic needs, I can help with keeping members safe from any dirty files, I can give ratting tips and I can help with a few coding needed on projects.

Elaborate on your achievements and future goals:

I'm planning to become a software engineer at Microsoft or Apple one day or I can even open my own company with my partner / bestfriend.

Tell us about yourself:

My name is Cyborg and I am 18 years of age. I am currently a college student and I currently live in Trinidad which is located in the Caribbean. My current hobbies are Coding, Football, Graphic Designs / Video Edits and hanging out etc...

?OpDoritos - *August 28, 2013, 11:53 pm*

Elaborate on your skillset: Running Minecraft servers: I currently help run a decently large Minecraft server that makes 5-20k a month. I helped build the server from the ground up. I have used Bukkit for around a year and a half, roughly a few months after hMod died out and Bukkit became the successor.

Social Engineering: I have done quite a bit of social engineering over the years, never to get goods illegally or anything, just to get people to do what I want. It has been a useful skill to have as I can get some, not all but quite a few to get what I want to happen.

Virus Removal: I started doing virus removal a few years ago after I got got many viruses of myself ironically, I learned a lot from analyzing how people use rats and make them here on Hackforums. From there I have went on how to help protect yourself from malware, viruses, spyware etc.

Programming: I have been programming in Java for about two years, and I am currently going to school for a degree in a computer science. I am starting to learn c++, I haven't learned much really, I am just getting used to the syntax switch over as everything logically makes sense as I have been programming in Java for awhile. Aside from c++ and Java I have also dabbled a little bit in Visual Basic, Html and Css.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:I believe I would be a valuable asset to Legion, because I could help and or teach other people how to program in Java and tech others how to protect themselves from the dangers of the internet if they already do not know how to.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:Some of my achievement are achieving the rank of Eagle Scout in Boy Scouting, reaching honor roll in the 5th grade,getting honor roll every grade in middle school (6th-8th), receive multiple awards in High School based on Grade Point Average and last ,but not least receiving a scholarship for outstanding behavior, kindheartedness and citizenship. As mentioned above I am going to school for a degree in Computer Science and after I hope to get a job at a larger company such as Microsoft, Google or IBM.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:I am 18 years old, I live in California and I have had an interest in computers since the age of two, I used to stand up on the computer chair. Outside of my activities on Hackforums and the internet in general I enjoy hiking, camping and geocaching.

Thank you for reading, I hope that I get into Legion!

Xerif - *August 29, 2013, 10:28 pm*
Elaborate on your skillset:
PHP Programming
Java Programming
VB.net Programming
HTML
CSS
Javascript(I also know a little bit about the jQuery library)
MySQL (I mainly use this for websites)
C++(I know the basic syntax of this language)

Tell us why you would be a valuable asset:
I'm a fairly quick learner, and I can catch on to most concepts pretty easily(Especially if it interests

me at all). I also enjoy helping other members in need. If you need help all you have to do is ask.

I'm a pretty good programmer. I know the basics of several languages, but Java and PHP are my favorites.

Elaborate on your achievements and future goals:

This was my first big achievement when I was a noob programmer.
- https://hackforums.net/showthread.php?tid=1363565
It was one of the first publicly available Minecraft clients in the Hackforums world.

This is my current project.
- http://questionroulette.com
It is a question and answer website kind of like Yahoo Answers. The difference between my website and yahoo is whenever you answer/ask a question you get rewarded(IRL).

This is a RPG game I was working on a while ago. I stopped and started numerous times during development. This is the latest build of the game.
- https://hackforums.net/showthread.php?tid=3480877
One of the big reasons I like this game over any other game I made is the map maker that I made along with it.

Tell us about yourself:
My name is Alex. I joined HF when I was 12 which is against the rules now :D
I live in Colorado. I am 15 years old (Well, in 2 weeks I will be.). I just started school after having a nice Summer break. At the end of this semester I will take the Accuplacer test and start taking college classes at my local community college.

Ill be having a pretty busy semester with studying for the Accuplacer test and also taking a drivers ed class. When I turn 15, I will get my permit!

Tastylicous - *August 30, 2013, 4:46 am*

Elaborate on your skillset
Well, in a nutshell: I'm a VB.net-Coder, a very good one.
I am coding for a few years now and gained much experience.
I now reached the point that I will start selling my programs,
the focus is on malware. That means, a Logger and a Crypter
will be my first sold projects here in this great forum.
But I will also continue releasing free programs, said I already did.
For now it's just two programs, they can be found here:
TastyThemes | VB.net-ThemeArchive
TastyIcon | .exe-IconChanger

Tell us why you would be a valuable asset
Hm... Good question actually...
I think I would help everyone who needs help with coding.
I already know a few guys from Legion and I also know that
some of them are coding, in a very bad way to be honest...
And that's what I'd like to change! I want to share my

knowledge and my experience with everybody who needs
my help or just wants to learn something new!

Elaborate on your achievements and future goals
I don't think I have really "achieved" something here yet, but!
As I mentioned before many guys from Legion know me already and
I also helped many of them in the near past. So I would say
what I achieved is that I helped a huge bunch of people and that I'm
known as a coder. (Even if I joined this month lol)
My goals for the future are basically to create a brand in the marketplace,
I want to release a ton of products and of course make some money.
But the money isn't really priority #1, it's a side-thing.
I more or less would like to become even more known,
and create a image in peoples mind that says:
"Tasty? This is this awesome coder from HF right?"

Tell us about yourself
What could I tell you?
I am a typical teenager from Germany to be honest.
I joined HF because I good friend of mine said that this
is a great place to sell my stuff, learn more about coding,
and to meet other, more experienced coders I can talk to...
I am 16 years old and live in the so called "Ruhr-Area", which
is in the west of Germany, the best part of Germany btw.
But ontopic, my daily-life consists of going to school,
meeting friends, taking care about my girlfriend and of course:
Coding! <3
/Edited because HF-SQL-Error and accidental double-post!

Artisanal - *August 30, 2013, 8:45 am*

Elaborate on your skillset:

• Coding: I am coding Vb.NET for 2 Years now. As I think it is a very basic language I want to start learning c++ and Java. Also I have basic HTML, SQL and PHP knowledge.

• Penetration testing: I do Pentesting a little while now and began to really enjoy it. Things I enjoy the most are Stress testing and SQLi.

• Social Engineering: I do think social engineering is something you need every now and then and see it as fairly easy.

• Administrating: I was administrating a few bigger forums as well owned a few smaller gameservers Blogs and Forums.

• Malware: I am working a lot with Malware. I learned alot about how Crypters and AV's work, also have I had some quite successful botnets I mainly used for Bitcoin mining.

Tell us why you would be a valuable asset:

I'm a nice Person and love to help other people out.

The Corporation (to the Time I joined HF) was always a remarkable group and an example of how a group should be.
I do think there is still alot to learn and this group is great for doing so.

Elaborate on your achievements and future goals:

I would like to get to know other people having the same interest and I can exchange knowledge with.
I thought Legion was the right place.
In the future I would like to become a successful programmer and web designer and have the things I like to do most as a Job.

Tell us about yourself:

I like to code, game, learn new things and hang out with my friends.
I love to meet new people having the same interests as I do.
I always like to learn new stuff and expand my current knowledge.
I spend my free time on these forums and gaming.
I love music and sometimes DJ.
I enjoy bulding, upgrading and taking care of PC's.

Thank you for taking the time to read my application.
It did take me some time and effort to make this.
I would love to be in this group, but of course I can only wait and hope you consider my Membership.
Credits to Diligence for the line breakers and Layout.

Thanks, Zombay

I am a person that can come up with ideas, i can think outside the box, i can start projects up, And i am gettin learned in codin in c# c++ and further.

Elaborate on your achievements and future goals:
My goal is to become a Prof in codin for Buissines, and become a buissnes man, my goal is to learn, Java, C, Htlm, Css, Javascript, php.
Tell us about yourself:Well first im a Dane, i live with my family near the capital, im a minor, and im still in school, thats it.

Regards Y0ix.
Why would you even post on this thread knowing you do not meet the requirements?
And to top it off you hardly put any effort into it.

-zERAiT - *August 30, 2013, 4:44 pm*
Elaborate on your skillset:
Hacking:
I am quite a good Social Engineer and basically the basic stuff of web hacking. Also i do have experience with Remote Administration Tools and Botnets and know some quite good techniques on how to spread them.

Web Construction:
- HTML & Basic CSS
- Basic understanding of PHP

Graphical Desings:
I do know how to make a basic signature, or forum thread lay-out. Also i made a webdesign a couple of monts ago which i didnt code yet, but gonna do that in the future for sure.

Networks:
Basically the things that i can set-up / fix on a server are: DHCP (Dynamic Host Configuration Protocol), DNS (Domain Name System), NAT (Network Adress Translation), AD (Active Directory), Print service, Firewall, Back-ups.
Also i can set-up an VPN Server if needfull.

Gaming:
Played Battlefield 3, Runescape, Call of Juarez and Call of Duty 4 for quite a while. I am still playing Call of Duty 4 on a decent level, playing Cybergamer, ESL and quite a lot of competitive tournaments.

Tell us why you would be a valuable asset:
Honestly, im not an L33T or UB3R member. I came here like 2 weeks ago, but im willing to learn and share my knowledge with others. Also im a kind person which will always be there for others. Besides that all I can say is that i could share some Social Engineering secrets or help to strucurate the network etc.

Elaborate on your achievements and future goals:
Some of my biggest musts is finishing my school. After that im going to work for a couple of years and want to get some certificats. If i ever get the change to set-up my own company i will deffinitly do it.

Tell us about yourself:
I am currently studying Network IT and will be for the next year. After that i will get my driving licence so i can get to work withouth taking the bus everyday.

If you need any proof of my "skills" feel free to shout me a PM.

Kind Regards,
MaskedMyS

Waist - *August 30, 2013, 7:01 pm*
Elaborate on your skillset: I'm not very skilled at all, honestly. I know how to resolve, and boot (which is clearly something anyone can learn.) I know how to code a shell booter, and I know how to use computers very well, I'm very familiar with internet safety, and it's been one of the things I like to teach people, I like to let people know that there's ways that they can avoid being disconnected by an e-predator.

Tell us why you would be a valuable asset: I'm a fast and efficient learner, if I'm being taught, I listen, so it wouldn't be like talking to a rock. I'm very loyal and trust worthy, and I have no problem with being an errand boy. If I start something, I don't stop until I've finished exactly what I've started. I'm not some 12 year old kid looking to learn how to disconnect someone, I'm looking for a proper mentor to show me their ways, such as Anonymous. I'm a kind hearted person, and I've been told I'm a joy to be around.

Elaborate on your achievements and future goals: I've achieved a few things, I've become very familiar with VB and C#, but I'm still not very good at it. Some of my future goals would include: being someone on the internet, being liked/applauded for my hard work, actually learning a thing or two about actual coding, hopefully start up a small e-business with what I've learned.

Tell us about yourself: My name is Rogie, I was born in Australia but when I was 3 years old my father passed away from stage 4 spine cancer, and then my mother decided to move to Canada for a fresh start in her life, so I'm currently residing in Canada. I'm 20 years old, I'm the co-manager at a local grocery store until a couple years when I'll be going off to College. When I get back from College, I plan on starting a family with my beautiful girlfriend Audie. I usually talk big on the internet, and occasionally get DoSed, although it's only happened about twice. I play private servers for games, I have a big heart, hardworking, dedicated, and that's about it. I've always been interested in joining Anonymous, but I thought a guy like me could never be accepted under their wing, but today I grew the balls to throw myself out there and try.

Thanks guys.

Elaborate on your skillset:

• Coding: I am coding Vb.NET for 2 Years now. As I think it is a very basic language I want to start learning c++ and Java. Also I have basic HTML, SQL and PHP knowledge.

• Penetration testing: I do Pentesting a little while now and began to really enjoy it. Things I enjoy the most are Stress testing and SQLi.

• Social Engineering: I do think social engineering is something you need every now and then and see it as fairly easy.

• Administrating: I was administrating a few bigger forums as well owned a few smaller gameservers Blogs and Forums.

• Malware: I am working a lot with Malware. I learned alot about how Crypters and AV's work, also have I had some quite successful botnets I mainly used for Bitcoin mining.

Tell us why you would be a valuable asset:

I'm a nice Person and love to help other people out.
The Corporation (to the Time I joined HF) was always a remarkable group and an example of how a group should be.
I do think there is still alot to learn and this group is great for doing so.

Elaborate on your achievements and future goals:

I would like to get to know other people having the same interest and I can exchange knowledge with.
I thought Legion was the right place.
In the future I would like to become a successful programmer and web designer and have the things I like to do most as a Job.

Tell us about yourself:

I like to code, game, learn new things and hang out with my friends.
I love to meet new people having the same interests as I do.
I always like to learn new stuff and expand my current knowledge.
I spend my free time on these forums and gaming.
I love music and sometimes DJ.
I enjoy bulding, upgrading and taking care of PC's.

Thank you for taking the time to read my application.
It did take me some time and effort to make this.
I would love to be in this group, but of course I can only wait and hope you consider my Membership.
Credits to Diligence for the line breakers and Layout.

Thanks, Zombay

I like your app! Good luck, not my decision.

Viber - *August 31, 2013, 6:25 am*
Elaborate on your skillset:

Gaming
-competition
-Xbox 360

-leage play
-video edit on youtube

Monentizing
-eBay marketing
-Amazon marketing
-Jtag xbox 360's
-general HF product selling

Web construction
-have made a few websites before, (stressers,etc.)
-can code basics
-quick learner

Graphics
- basic use of photoshop
- have my own thread and sigs service
- pretty good with graphics, made a lot
- love spending time with graphics

Tell us why you would be a valuable asset:
Well, I think I would be a valuable asset to the group because I am very nice and a chill guy to talk to. I am always online and willing to help anyone who needs it. I am very trust worthy and try to be the best I can be.

Elaborate on your achievements and future goals:
My future goals for hack forums would to be to gain as much respect and become a very trusted and valuable member. My future goals in life is to get a good education, go to college, and get a great job. It is pretty basic, but i want to have a good career. I am currently playing football and would love to go professional.

Tell us about yourself:
My name is Luke and I am from the United States. I am a very chill guy that loves to be the best I can be. I love school, sports, and my friends. But, after I come home from a hard works day, I love to spend my free time here on hack forums, always had. I just love the community and everyone on it. It is great to learn all kinds of new things you are looking for.

Golden-Scythe - *August 31, 2013, 8:21 am*
Elaborate on your skillset

Cracking and blackhat/whitehat activity will be the primary skillset i bring to the table. Im very experienced and advanced in the world of blackhat hacking and whitehat virus removal and computer fixing. im also a very experienced rdp and account cracker. im also a really fun person to talk to and love working on computers and doing custom builds :)

Account cracking

This is the seconde thing ive learned on here is how to crack/brute accounts im really experienced in this section of hacking and its basicly what i do to pass time, i consider it fun and amusing and willing to teach to everyone.

RDP cracking

im very good at cracking things espicially when it comes to vps/rdp 's im willing to teach and share my methods and help when needed.
i currently have my own little rdp shop and hoping for it to someday grow.

Malware

I know how to setup a botnet and run it. I know how to setup rats, stealers and other basic malware im also able to code my own ransom ware and keyloggers.

Gaming

i love playing games on my computer with hackforums member and i also love spending time online playing runescape (dont hate bitch)

Tell us why you would be a valuable asset

Im a very experienced in blackhat hacking rats/botnets/bankingbots and other things i would not like to talk about on here...
im also very good at HTML and i can also crack accounts and rdp's
and im willing to teach anyone in need of this for free... as everyone deserve to learn at no charge.

Elaborate on your achievements and future goals

I am currently studying to become a computer maker my current goal that i would really like to achieve is do design/make a computer that is enjoyable for evertyhing working/gaming/design and more im currently working on a platform for my computer it isnt windows or apple/mac

Tell us about yourself

im a 15 year old high school student i spend most of my time reading and learning about the internet and computers. Im one of the most advanced in my class and im currently learning how malware works (more advanced then it actually sounds) im currently working on my own computer design and malware program that will maybe be released in the future.

DougX - *August 31, 2013, 10:16 am*

Elaborate on your skillset: I am a social engineer, I will bend and twist your emotions to get what I want. I consider my self very good at it because I can get into pretty much anything I want via social engineering, I believe strongly that your security is only as strong as your emotions. I have been social engineering for about 3-4 years now and I have developed well, Real life situations or trying to SE into an account, I excel in both!

Tell us why you would be a valuable asset: I could give some pretty detailed and exclusive threads about social engineering when it comes to web/network security and give insights on my experiences when it comes to those particular subjects.

Elaborate on your achievements and future goals: I have achieved numerous things in this area, I usually social engineer and refine my skills everyday! I practice on a wide arrange of targets. (Details can be PM'd if you'd like as I don't want to go in specifics on this thread)

Tell us about yourself: My name is Doug, i'm 18, I am taking courses at a local college to sharpen my programming skills before I go to school in computer science next year. As I stated before though I am a social engineer, but I am trying to expand my skill set into network security!

HolyGates - *August 31, 2013, 10:48 am*

color=#696969]Elaborate on your skillset: Learning SQL, Can rat, social engineer and game[/color]
Tell us why you would be a valuable asset:I am keen to learn and help other people.... i am good at problem solving.
Elaborate on your achievements and future goals:how to learn a pc... but my future goal is to become decent enough to get my self a job in it.
Tell us about yourself:i am 21 years old and just want to have fun and learn

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:
I think I would be a valuable asset to legion because, I think i'm a pretty unique member and I have what It takes to join Legion. I can create signatures and possibly bring in new Monentizing strategies to the table. I would love to be able to be a part of this group as well to learn / share new things with the people I meet.
I would like to learn the basics of RAT's and Keylogs, but I can do that on my own time. Back on topic, my personality is great in my opinion, and I aim for the top, i'm pretty easy to work with and I know I have what it takes to be in Legion.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:
Well, my future goals as of now are to finish school and to move on to collage and go to UCLA and major in Business Economics or Communication Studies. I plan to own my own company and grow from there. A few of my life achievements: When I first started my company, drew out the designs, and got into to nooks and cranny's of everything. Maintaining atleast a B - A- Average, Working hard, and just having as much fun as possible.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us about yourself: I'm 16, and my name is Labron. I'm from California and I'm one of the chillest people you will ever come in contact with. I'm a fast learner and I'm willing to learn new things. I enjoy buying, selling, anything that has to do with money gain actually. I'm smart, and willing to do what It takes to join / learn from Legion, I enjoy playing football and I'm currently on my sophomore year of highschool. I'm always here to help and if I need something or I don't understand, i'll be sure to ask questions. Since I joined and was told about Hackforums I've made it a goal to stay active and strive for the best on this forum.

Thank you for taking my application into consideration ?

rfz777 - *September 1, 2013, 7:32 am*
Good luck to all applicants ?

The NSA - *September 1, 2013, 7:37 am*
Elaborate on your skillset:
I am fairly good at social engineering.
I also have experience with ratting.
I can crack many popular website accounts.

I know basic manual sqli.
I understand the basics of network stressing and how the scripts work.
Tell us why you would be a valuable asset:
I think I would be a valuable asset because i could rat,crack accounts, and deface websites. I would be able to invest much of my time into what tasks you need.I have a vast and growing knowledge. I can catch onto things and remember them easily.
Elaborate on your achievements and future goals:
I have done many off-site trades with goods I received on-site. I plan on starting a few shops once I upgrade to Uber. I also plan on learning python soon.
Tell us about yourself:
I am learning the coding language "c". I play guitar,both electric and acoustic. I have lots of free time that I usually spend online. I have in interest in studying law or computer programming when I go to college.

billy. - *September 1, 2013, 8:08 am*

Elaborate on your skillset:Marketing
This is one of the big reasons why I came to HackForums. I've been selling and buying items for over a year now. The thing that interests me about marketing is the profit. If you do it right, you could make a living off it, that's also what I'm planning to do. I have established myself in the online shops marketing, examples of those shops are CCS and MLTD, those are pretty big shops and if done right, I can make some good profit off it. I might set up an eCommerce website later.

I'm also really interested in the Original gamertag/Instagram market. Seeing that this specific market is really climbing it's way up, I see some profit in this. For example, I buy Xbox gamertags, then keep them for a while until I think the profit is good enough and then I will sell it.
Gaming
Gaming is a hobby I have. When I have some free time on my hands, I often turn on my Xbox and play some games, such as Call of Duty, Payday 2 and GTA. This helps me relax and free my mind.

Sometimes when I'm feeling competitive and I want to win, I play some Call of Duty Promod. It's competitive mod for Call of Duty 4. I always look for new techniques for each map so I can be the best. Sometimes I play Minecraft, I really like Survival, Creative and PVP. The only minigame I enjoy is Survival Games which I'm extremely good at.
Graphics designing

Right now I'm trying really hard on my graphics. I'm in fly by night's project B thing and I'm trying to get in there student program. I have a wacom bamboo pen and tablet for some of my art. Right now I'm focusing on Digital Painting which is coming out quite nice. I'm trying to do a painting a day. When I'm at school I just doodle and sketch when I finish all the easy work they give us. I'm also decent at vector illustrations. I have done quite a few nice pieces.
PPD

I also PPD right now. I'm using adworkmedia and I'm making about 10 dollars a day. I don't really focus on it much, it's just on autopilot.

Tell us why you would be a valuable asset:

I would be a valuable asset for Legion because I could learn anyone within Legion how to market and make some mad profit off it. I can also give anyone within Legion even bigger discounts than what I am already offering to all the members on HackForums.
I'm also willing to host any game nights for both PC and Xbox 360, if there aren't any within Legion.

Also, I can help and criticize on all graphic designs made by Legion members. I will tell them what they could improve, and how they can obtain that improvement.

I will do my best to represent Legion in every section on Hackforums that I'm currently active in, I would do this by doing free giveaways, tutorials and sale threads all in the name of Legion.

Elaborate on your achievements and future goals:

What I'm trying to achieve with all my skillsets is that I really want to stand out on everything I do. I want to make more profit on my sales, have better graphics (maybe design for a major company sometime!) and do paid competitive gaming.

I really want to expand my marketing, by having more stores that I could sell things from.

Tell us about yourself:
I'm not the average 16-year-old, I can tell you that much. I like to differentiate myself from the norm. I know that may sound cliche, but it's true. I like to get myself into things that no one else gets themselves into. It's not because I'm a rebel, it's because when you're different you get noticed. I take a lot of pride in the things I do. Most people where I live aren't too deep into the Internet, but I am. The Internet is just one thing that I do differently than the majority of people. Overall, I'm a really straightforward person that wants a chance in such a great group.

Liam™ - *September 1, 2013, 8:10 am*

Elaborate on your skillset::
Manage Servers (Game,VOIP,Web Hosting,Stresser)
Web Design (Booters,hosting,panels,general sites)
Code (Visual Basic, C+, Python, Perl, Shell)
Admin/Moderate (Manage Forums, Billing Sites, Booters)
Malware (Removal, Internet Problems, Hardware Problems)
Remote Administrates Tools (Ratting, Mining, Botting)

Elaborate on your achievements and future goals:
Made Forum (www.techniqueforums.com
$10k monthly. (Goal!)

Tell us about yourself:

Name: Liam Strong
Country: Untied Kingdom
TimeZone: UTC±00:00
Tell us about your self (Min 500 words):
Hey, I'm from Untied Kingdom, I have many talents regarding computers and the internet.

I can do all of these on contact, i have upgraded one user :) and willing to work any projects with any user im not of guy who getting angry or grumpy on everything and gives up on anything.

I also have amazing girlfriend :) who also has just signed up to hackforums :) Click heree.. She going be helping with love problems and emotions :) so ever need any help hit here up :).

~ Liam ?

Rayquaza™ - *September 1, 2013, 8:29 am*

Elaborate on your skillset:
Coding - I know HTML, C++ and I'm currently in college learning Computer Science training to be a game designer. This means I can be a great help to the group!

Gaming - Although this wont exactly useful in this group I am a hardcore gamer and was once in the new gaming group *#@?&%!.

RATing - Although this is very basic I have practically mastered RATing and given enough time I reckon I'd be able to develop my own RAT. I know multiple unsaturated Spreading Techniques and many methods to earn money from RATing.

Tell us why you would be a valuable asset:
I am easy to communicate with, always willing to help and have quite a unique skillset (in my mind) and would love to be part of the group so I can be taught and teach.

Elaborate on your achievements and future goals:
In total I have made $84 from RATing and had a total of 1,000 slaves. In the future I hope to learn a little more about a manual site hacking which I think this group can teach me!

Tell us about yourself:
I am 17 and have been on HF since Febuary this year, 2013. I left High School with an A in IT, B in English and B in Maths. I oncovered HF learning how to RAT and would have no problems teaching other members how to MASTER it and share new things I learn.

Thanks for this opportunity! Appreciated!

#R00T~ - *September 1, 2013, 8:37 am*

|30RNE'S LEGION RECRUITMENT APPLICATION

Elaborate on your skillset:

I am currently fluent in SQL Injection attacks and am currently learning XXS (cross site scripting) I am also learning Visual Basics and hope to learn C++ in the future, I am also very good at using RAT's and Keyloggers and setting them up, I have also earned a lot of cash through e-whoring, I have also played for a few teams on cod4, css and cs:go on pc

Tell us why you would be a valuable asset:

I think I will be a great asset to the group because I am very friendly I dont cause any arguments nor make any kind of trouble and im generally just a fun person to talk to, I will also help out with Legions upcoming/current projects, I also really enjoy helping other users/members in many subjects such as SQL Help, Setting up Rat/Keylogger and helping people with methods on spreading and e-whoring.

Elaborate on your achievements and future goals:

-I made over $100 in 2 days via e-whoring.
-I have coded a Website IP Resolver.
-I have coded a Youtube MP3 Converted with help from a legion student called Allan Ridha.

-I have hacked into multiple sites gaining the admin login.
-I have ratted/keylogged lots of people via my own personal methods.
-I have created a forum that is currently being owned by me and my friend.
-I have played in multiple competitive teams on COD4, css and cs:go.

-I hope to become a fluent visual basics/C++ coder.
-I hope to learn new methods of hacking into websites.
-I hope to make a lot more friends and meet new people.

Tell us about yourself:

Name: William Borne
Country: Untied Kingdom
Time Zone: UTC±00:00

I currently live in the United Kingdom, I have 2-3 years left at school, I have taken Public services, PE, Food and IT for my GSCE's, I currently live very close to the hf user Liam who is one of my closest friends and is in my form at school, I currently own a laptop (which I do all my hacking on) and my gaming PC (which I game on). I have been interested in computers ever since I was little because I would watch my step dad on his for hours on end, on Linux doing all sorts, I learnt so much at such a young age, I also own a Forum called "TechniqueForums" with Liam.

WhiteFlame - *September 1, 2013, 12:36 pm*

Elaborate on your skillset:
I can write in: PHP, JS, CSS(3), HTML(5), AJAX although I can put things together in a few other languages like C++, Java and German.

Server administration (command line SSH) of a CentOS server.

Experience (though in the past) of: SQLi, XSRF, XSS, Shelling (C99 R57), LFI etc.
Tell us why you would be a valuable asset:
I love to learn from other members and to share the knowledge I have built up. I'm a quick learner and like to make things the way I want (Like adding my own plugins to sublime text 2 using python). I'd really love to get involved in some groups within the forum and add my own tutorials. Anonymity interests me as a subject itself. It's one of the most interesting parts of the internet for me and I'd love to learn more and provide some information on common mistakes (or common misinformation!).
Elaborate on your achievements and future goals:
I run a company in the UK and am in charge of all technical aspects such as implementing and delivering websites, site architecture planning etc.
Tell us about yourself:
For hobbies I obviously code (and I do like electronics too). As such I have been building an RFID system with a 16X2 LCS screen to use at work for clocking in etc. I think these sorts of projects are really interesting at the weekend and I'd like to look at more way to implement both unique design in coding with custom hardware (I think that's where a lot of the new technology will come from). I'm massively unconformist… For GCSE's I got 4A*'s 6A's and a B (which is good) Then at A level (like college) I got 2 D's and and E because I spent all my time at home and at my office coding instead of going to shitty science lessons. A choice that may not have been the best I made but I wouldn't say I regret it because I am interested in computers much more than anything academic at school.

Squidward - *September 2, 2013, 11:41 am*
Greetings,

Elaborate on your skillset:

Programming
My programming skills are currently quite mediocre, but I'm learning new things everyday and I'm very passionate about learning how to program more and more everyday. I currently know HTML, CSS, and JavaScript quite well, and hope to learn more Java, which I know very little of. I plan to learn many languages over the course of the next couple years.

RATing & Spreading
I've done some RATing and spreading in the past, though I can't consider myself an expert in the field by any means. It was honestly just something to mess with, and call myself a "hacker", when in all honesty... I just felt like I was clicking some buttons and not using actual brainpower to do it - which is what I consider true 'hacking'.

Marketing
Marketing, specificaly online, is something that I have the most experience in presently. I buy, sell, and trade a lot of stuff online (both virtual items, and some non-virtual items) on a daily basis. My customer relations skills have grown exponentially in my opinion over the past few years, and I'm very proud of it.

Graphics
Graphic skill is something I quite honestly lack myself. I just don't have the creative mindset for creating art, but I am a very picky and well-spoken person which is why telling others what I envision is not a struggle for me. I prefer having someone else create graphics for me, with my instruction, but if it's something basic then I'd do it myself to both save money and time.

Social Engineering
I've social engineered a lot. From E-Whoring, to get servers and such for free. I don't typically like to partake in what seems to now be the "sterotype" of social engineering which is getting free tangible items from companies. I feel that it's quite immoral (depending on how it's done) and just generally not something that I want to waste my time on. I have of course messed around in the field, but it's not something that I can brag about at all.

Tell us why you would be a valuable asset:
I'm a good listener, and I enjoy working with people. I tend to be very dedicated with projects that I'm a part of, and try my hardest to do the best that I possibly can. I enjoy both learning and teaching people, which is why I look forward to joining an official group.

Elaborate on your achievements and future goals:
My main achievements are marketing-related, such as my stresser and so on. I've done a bunch of great deals online, and sold many products with great success. My future goals list is quite extensive, but I'd really like to learn more programming languages and learn much more about security engineering.

Tell us about yourself:
My online alias is "Squidward" but my real name is Felix. I spend a lot of my free time on the internet partaking in various activities. I have a passion for computer science, and recently security engineering. I'm gradually learning various programming languages, starting with web development (HTML, CSS, JS, PHP, etc.). Besides programming, I also spend a lot of time my time online marketing. The main place that I market online is right here on Hack Forums. I've found my comfort zone here, which is why I love doing deals here. I mainly market programs, such as my most recent product - streambot², which is a Twitch.tv fake viewer client coded by my partner. I spend a lot of time online gaming, but what interests me the most is how the games are made and learning how to do it myself, and the same applies to web applications and such (security & exploiting - SQLi, XSS, shelling, LFI, etc.), and I currently have very minimal experience with it.

Please excuse my edit - I posted too early on accident.

Regards,
Squidward

illuminatiJake - *September 2, 2013, 6:11 pm*

Elaborate on your skillset: I'm a web designer and I can script in HTML, CSS, jQuery, JS, and PHP. I have developed my own content management system, similar to WordPress. Besides being a web designer, I'm also a software developer. I use to develop software for a firm in Northern California, nearby San Francisco. I wouldn't say I'm perfect with Visual Basic, C#, and C++, but I'm proficient. Currently, I currently work for a University data center in Los Angeles as a Systems Administration (Level III).

Tell us why you would be a valuable asset: I would be a valuable asset, because I'm willing to learn and teach. I'm basically a Wikipedia page, where if I receive new information, such as lessons, I would share my knowledge with the group whenever requested. Also, I'm very passionate about learning and teaching. In fact, when I was younger, I always wanted to become a teacher.

Elaborate on your achievements and future goals: I recently started this online business that is yielding $5,000+ in monthly revenue. If proof is needed, please PM me (I can provide a TeamViewer session too). Also, I minimized my cost to the point, where my cost is almost non-existent, besides my opportunity cost.

Tell us about yourself: I'm a lot of things -- I'm a web designer and software developer, but most importantly -- I'm willing to learn and teach.

Fayz_Golden - *September 3, 2013, 3:32 pm*

Elaborate on your skillset:
I have around 4 different skillsets that I mainly focus around. One, ratting. I have been doing this as a small hobby, normally whenever I get bored since I don't really feel like acting like a 12 year old that goes, "LOL U MAD BR0000!" I mainly focus around money making, I have made just 1k in three days with about zero effort. It was greyhat, but now I can easily make a quick 100$ within 15

minutes. Another skill I am good at, is manipulation. I have manipulated lots of people, online, and in real life. I have a good way of making things believable. Spreading, another good skillset I have. I gained around 300 slaves last month by using one method, it was very efficient. eWhoring, I am very good at this after I had some practice. I could easily make money off it, I just don't have the money for it. I made around 300$ in two days on OMEGLE. Manipulation at it's finest.
Tell us why you would be a valuable asset: I believe I will be a valuable asset because of my skills of manipulation and money making. I am able to contribute and help any and all members in Legion, teaching them some of my skills I have elaborated over the past years. I am willing to help all who have trouble with things, either emotionally or in any other way. I would be valuable because I know a lot about computers and maybe this would be valuable sometime in the future.
Elaborate on your achievements and future goals: My future goals are to be a Game Designer. I have been learning on Game Designing and C++. I plan on taking College Classes when it comes to that point. I do not want to end up in jail, which is why I remain anonymous on most social networking. I try my hardest by not admitting to anything. I also want to have a family in the future, I currently have a girlfriend and we hitting it off pretty well.
Tell us about yourself: Me, I don't want to toot my own horn, but I would say I am a pretty nice guy. Most people on HF, not all, but most can be very rude at points. I try to be happy and helpful at all times. I am very social, and I would say overall I am just a nice guy, that guy you can look up to when you need something. I am currently studying Game design and marketing, which I hope will help me in the future. I am saving my money for something I have wanted to do since I was a little child, which I would rather not disclose with anyone. I have a girlfriend, and we both live in the U.S. I am American, and I can speak fluently.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

Ballinn - *September 6, 2013, 8:30 pm*

Elaborate on your skillset:
My most important skill is my ability to pick up and retain information.
I have always done well in school and anytime I went to learn new things it would usually come very easily. I also like to pay attention to details when in a serious setting.
I know the time and place to be serious or to have fun, and if the situation calls for it, I try to make sure everything I do is in order and neat.
Aside from general retention and meticulousness, I believe I have an above-average knowledge of computers and most technology, I have been working and playing with computers for a few years and I have always been interested in the inner workings of anything electronic. Since I matured some and got more acquainted with computers, I have recently been doing some odd jobs for people I know, like clearing viruses and setting up home wifi to help learn a bit more.
I feel that I've got potential to enhance my knowledge and skillset with the right setting.

Tell us why you would be a valuable asset:
I know that being a student in Legion would really help me hone my skills and introduce me to knew things, as well as provide an outlet for anything I may work on in the meantime.
I will be active in the sub-forum and try my best to learn as much as possible by doing so.
Anything that I can, I will try to offer up if needed.

Elaborate on your achievements and future goals:
Here on HackForums I have upgraded two members to L33t and I try to answer any questions that I see I know something about,
or if I don't I can sometimes point them in the right direction.
Over this past summer I tried my hand at managing a Minecraft Server, and while I had the time to put into it I made nearly $600 after splitting the profits 50/50 with my sponsor. It was fairly successful until school started and I have not had as much time to put into it.

At this moment, I am working towards an Associate's in Arts to transfer towards a B.S. in Computer Science at a four-year university. In High School I maintained at or above a 3.8 GPA and participated in multiple STEM fairs and symposiums. After I graduate from the university I want to return to my home county and work for the school system's IT department where I am an intern now. After I get some experience I may look at other companies as my next goal right now is to do some travelling through my work with IT/Computer Science.

Tell us about yourself:
Like I said earlier, I am working on finishing my core classes in an Associate's degree that I can transfer with and get a four-year degree. I work on Tuesdays, Thursdays and Fridays as an Intern with my school system's IT department where I can travel all over the county to different schools and learn a lot about day-to-day IT business and some Networking. I sometimes sit down with the head of the department and he shows me all the ins and outs of the systems server and network and how it is all laid out.
On a more personal note, I live with my mother and spend most of my time at home playing some PC games, fixing/working on computers for extra cash, and recently I have started reading up on some Perl guides to introduce myself to programming. I am laid back and fun, but also serious when need-be.
I really look forward to hearing back on my application and see this as a great opportunity to learn and make new friends on HackForums.

Thanks to Diligence for the thread breaks, he did a great job on them

Lukas - *September 7, 2013, 7:40 am*
Try and put as much effort into your application as possible. Make sure your grammar is superb, double check it if needed. Be truthful, and state everything you know, what you do not know, and what you'd like to know.

Jeremy Corbyn - *September 7, 2013, 8:13 am*
Grammar Nazi stepping in here.
First off, skillset isn't an official word, best to say skill set.
Secondly, you used passive.
Quote:Negative reputation, warning level and scam reports will be reviewed I'd use:
Quote:We will review any negative reputation, warning level, and scam reports you have .
And yours was missing the Oxford comma.

Water Aura - *September 7, 2013, 8:32 am*
Good luck to all fellow applicants.

Bloody Jay - *September 7, 2013, 8:56 am*
Elaborate on your skillset: I have done small bits of xss and sqli in the past, I am not bad at it and do not you tools like some users, but also I am not the best and I hope coming into this group will help be develop my skills and one day I may be an advanced hacked.

I have rooted a few boxes (6) in the past using public exploits. I know the basics of hacking just want to become more advanced.

Tell us why you would be a valuable asset: I will always try my hardest to learn more and to help others who know less than me. I am a friendly sociable user and would share everything that I have to share. I look up to all of the users in legion, and I have wished I could be part of it for a long time.

Elaborate on your achievements and future goals:
I have a goal to join legion believe it or not. I want to get into bigger sites and share a good

experiences with other users on the same level as me.

Tell us about yourself:

I am a 19 year old user, I play ps3 alot. I enjoy hacking and finding vulnerabilities. I have experience with metasploit and nessus. I have got into a few site in the past mainly by xss or a cookie stealer. I used to run a small botnet, with a friend.

If there is anything else feel free to pm me at anytime.

lajcik - *September 7, 2013, 1:44 pm*

Elaborate on your skillset:
- I am a VB.Net coder, and also I know basics of PHP, HTML, CSS (pretty enough to make my own websites with some pre-templated stuff)
- I used to PPD/CPA a lot in the past, I think that I am still a bit skilled in that.
Tell us why you would be a valuable asset:
- I am a nice person to talk with (I think so), I really like to improve my skills and teach other people, if I have anything to share - be sure that I am going to do so :)
Elaborate on your achievements and future goals:
- I will probably talk about real life stuff, because most of my goals are connected with real life...
My big achievement is getting into a really great high school here in Poland - I want to get a good secondary school certificate - that's my main goal right now.
And I have my driving license exam the following week, so yeah :). Those are probably my mains.
Tell us about yourself:
I am a quite young HF user, I will turn 18 on the 21st of September, I really enjoy programming and gaining new knowledge at IT and all stuff connected with that. I love watching movies, especially some good series. My favorite one is Breaking Bad (I think so, because I love many series, really! :D). I am also kinda lazy person sometimes, I can stay in my bed for a whole day! I also really enjoy working out, I am exercising for 1 year now, and I am getting better and better... :)

I could talk about those things whole day, but I think that it's not a good idea :D

Im gone brah - *September 7, 2013, 4:11 pm*

Any questions?, Feel free to message me.

CRT - *September 7, 2013, 8:52 pm*
Good luck to those applying. Great group to be apart of.

HanButler - *September 9, 2013, 1:55 pm*
Elaborate on your skillset:
My favorite pass time and best skill is programming.
HTML/css are secondary languages to me.
I currently know my way around c/c++ but once I finish up on c++ I will be moving on to other languages like java and c#.
I mostly teach myself which shows that I am motivated. .
All my friends with android phones come to me to root them.
virtualbox is my hacker playground now that I got some more ram.
My graphics skills are not the best because I didn't take photoshop in High School but then again what are tutorials for?

Tell us why you would be a valuable asset:
I have been going solo for awhile but now I need to roll with a pack. I will provide what skills I have and what I don't know shouldn't be to hard to learn for me.

Elaborate on your achievements and future goals:
Achievements

Programmed some basic programs in c/c++
used backtrack and metasploit to hack into xp in virtualbox
Gain experience with linux (ex. archlinux)
Root every android phone at my local DG

Goals

Keep on learning new stuff

Tell us about yourself:
I just turned 18. My goal is to get a computer science degree but couldn't afford it right out of high school. Then again what can they offer me that I can't learn by googling? Well if you have read this, thank you for your time.

Cartguy - *September 9, 2013, 2:27 pm*

Elaborate on your skillset:

[+] Mybb Theme Development
I've gained experience in designing and putting together Mybb themes.
I'll screenshot some of my work below.

Warning Large Images
Icarus:
Spoiler (Click to View)
[img]http://icap.me/i/d33f372830.png[/img]

Radiated Blue:
Spoiler (Click to View)
[img]http://icap.me/i/6c395466f8.png[/img]

[+] CSS
From my experience with Mybb I have knowledge using CSS and understand it pretty well.

[+] Experience
Back in High School I took as many computer oriented classes as I could.
These classes included web design, visual basic programming, java programming, and IT: Essentials 1 & 2.
After IT: Essentials 2 I took a Cisco certification test for basic IT and scored around a 90%.
Although I am certified, I cannot find my certificate to prove it, so that is only based on my word.

Tell us why you would be a valuable asset:

[+] Learn/Teaching
I'm always looking to learn weather it be new skills or improving on my current skill set.
I also am willing to help others improve in areas I have knowledge in.

Elaborate on your achievements and future goals:

Although I took classes on web design I haven't really expanded into PHP.
I only have a brief understanding of it, and wish to increase that.
I also wish to expand into more in-depth Visual Basic programming.

Tell us about yourself:
I have been around Hackforums since 2010. I have never been in an official group.
I am interested in monetizing, and recently have been focusing on that.
In the real world, I am currently un-employed (As of last week).
I am also closing in on 2 years of service in the National Guard. (Next Feb.)

Understalker - *September 9, 2013, 2:29 pm*
Next wave of students will be invited soon, applications are still being considered.

There have been a handful of decent applications that I have seen so far.

Six Below - *September 9, 2013, 3:01 pm*
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your skillset: Marketing and management is my main pursuit at this moment. I am working with a couple developers on a few different/unique projects including but not limited to my most popular being "Flash IRC Bot", and "Flash Guard". I consider this a skill mainly due to the fact that I do not only test each product expensively with the developer, but I handle each aspect of every project I am involved in. From marketing to customer service.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: Like many Legion members, I would add to the already popular slew of affiliated Legion products, although I will not be advertising anything as "Legion" (for example, "Legion IRC Bot"), I will be affiliated with the group, and always willing to help fellow members with any possible promotion. I have countless connections all around the HF community, and outside this community that I am sure would play a valuable role within the Legion community. In addition to the statement above, I already have many Legion members who I business relations with.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: I plan on not only releasing a site to sell all my affiliated products, but expand to non "hacking" related software. At the moment, I have about 10-15 projects/products related to "Flash" coming out within the next 8 months. The two products that are closing in on release are "Flash NP (No Port Forwarding) RAT" and "Flash Sniffer" an Xbox/PNS IP multi-tool, along with rejuvenating my stresser to both it's original power, and expanding to a web based booter as well.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I am currently 20 years old studying/double majoring in Business and Marketing, and Criminology. I am closing in on my associates in business, and about half way done with my Criminology associates. I work 35+ hours a week as a "full" time divisional manager for local "five star" resort. This job allows me antiquate time to both manage my up-and-coming site/projects along with going to school and making a decent living. (To be honest, it's the easiest job in the world...) I joined Hack Forums for the soul reason of creating some additional expendable cash. Please note, I do not feel comfortable disclosing specific on anything mentioned above for safety reasons. Thank you!

?nonymous - *September 10, 2013, 7:43 am*

Latest wave of students has been invited. ?

People who haven't received an invite and posted prior to this post wasn't accepted; it's allowed to post a new application if you weren't accepted - make sure you put effort into it this time.

Ballinn - *September 10, 2013, 11:55 am*

I am very happy to say that I was accepted as a student, and good luck to those who will apply again and any new applicants!

Bonfire - *September 10, 2013, 6:26 pm*

Elaborate on your skillset:
I have many skills that I can put to use. I have experience in web development, coding, networking, gaming, and among other things. I enjoy networking, and I am hoping to become a software engineer. I have pretty good knowledge when it comes to VB.NET, and I'm learning Java. I might decide to learn PHP in the future, but that hasn't been decided yet. I'm open to learn new things.

Tell us why you would be a valuable asset:
I would be a valuable asset because of what I can do, what I will do, and who I am. As stated above, I have computer and web experience, and I am not foreign to such topics. I could provide with help, and knowledge, to help further the group. You guys do some amazing giveaways, such as the recent $1000 one hosted by Anonymous. I would hope to also help other members of HF, through Legion.

Elaborate on your achievements and future goals:

Some of my achievements are that I know three spoken languages, and I might learn French later on. Not only that, but I am also always looking to learn more. As I have stated above, I know VB.NET, and some web development, and I might be looking to learn Java in the future. I hope to excel in my studies, and to get a job in a field I love. I see legion as a way to help me become a better person, by strengthening my skillset and allowing me to accomplish my goals.

Tell us about yourself:
I can speak 3 languages, I enjoy learning and education, and I am familiar with most topics. If I set my mind to do something, I'll do it. The same goes for learning. I am hoping to work in a field I like, such as networking of software engineering when I finish my studies. I'm funny when I can, but serious if needed. I've spoken to members of Legion before, such as Linklance, and have had some interesting conversations. I hope to contribute much to Legion, and to help out the group overall.

Thank you very much for reading and reviewing my application.

Fayz_Golden - *September 10, 2013, 8:57 pm*
A bit upset I wasn't accepted, but good luck to everyone else.

?ain - *September 10, 2013, 9:22 pm*
Elaborate on your skillset:
Spreading RATs
I'm particularly good at this, with a simple effective method that gets me lots of slaves.
Social Engineering
People are simply easy to manipulate, especially when they think you're their friend.
Monetizing
I'm pretty good at advertisements, utilize many social media websites, exchanging and PPC.
Tell us why you would be a valuable asset:
I'm willing to learn. It sounds cliche, but most people simply give up when it gets hard. I just want to know it all, I'm willing to help others, and share my ideas with the right people. I may not seem like much, but I'm pretty determined and raw talent leads the way for the future, so consider it if you please.
Elaborate on your achievements and future goals:
Steady stream of money through Exchanging and PPC.
A few SQLi attacks.
Coding a Cloudflare Resolver with Python.
Hacking into WPA2 wifi.
Rooting through adb and flashing ROMs of many Android phones.
Assisssting with making an Android phone custom ROM.
I'd like to learn at least a basic knowledge of the common computer languages, and get in depth with C programming, HTML, PHP, Java, Linux and whatever else becomes useful and necessary.
Tell us about yourself:
I'm 15. I get along with people, even though I may seem like I don't. I get irritated when I don't understand something, and will obsess over it occasionally til I understand it. I like computers more than people, because computers always have a solution to a problem, while people are generally stupid, gullible, and senseless. This group seems like it'd be a nice refresher from general people. Anything else, feel free to ask.

vitafortis - *September 11, 2013, 4:34 am*
What the hell, I'm bored. And just saying, if fantasec even thinks about contacting me, ignore my application.

Elaborate on your skillset: Programming. You know this Anon, I was previously in the group.

Tell us why you would be a valuable asset: Programming. I may not have the full time available to teach on a regular basis, but I can definitely answer questions and help others.
Elaborate on your achievements and future goals: I'm about to graduate with my Computer Engineering degree in 3 years total, I graduate at the end of this year. I currently have a job, but one day hope to own my own company.
Tell us about yourself: What would you like to know? It's 7:30 AM and I'm too tired to think, but feel free to ask me questions.

Natalie Portman - *September 11, 2013, 5:00 am*
Elaborate on your skillset: C/C#/C++/Python/Perl/Java, also RNP, RSP, SQLi, XSS, LFI, RFI, shellcoding

Tell us why you would be a valuable asset: I'm a damn good hacker if I do say so myself, more into the server penetration than website / wapp attacks.

Elaborate on your achievements and future goals: Hacked a couple of big name websites, future goal is a masters from MIT in computer science with a specialization in cryptanalysis. I've published a couple of tutorials on low-level hacking here, which you can find under my posted threads, though in recent months I've moved from here to lethemfind.us, which is no where near as flooded with skids and idiots as the "hacking" section here. I come back to visit every now and then.

Tell us about yourself: 18 years old, finished school this year. Australian. That's all I'll say here.

Kyte - *September 11, 2013, 5:03 am*
Would someone mind explaining the student program to me?

Dusteh - *September 11, 2013, 5:55 am*
Elaborate on your skillset:
-I am a basic Java programmer, familiar with the ease and use of web programming languages, I have been doing
graphics and design for about two years.
-I have little knowledge on the art of hacking, but I wish to expand my knowledge through the experience of others.
-I have humble knowledge on the art of human manipulation.
Tell us why you would be a valuable asset:
I am a very active and friendly person, I observe people and I share things that I seem would interest them, I look
everyone with great respect.
Elaborate on your achievements and future goals:
I could only say that my greatest achievements are my failures, it is what's keeping me moving towards my goal
I have learned quitting is not the possible option to your goal, but much as to say I have done a part I can by
helping other members as much as possible and I would possibly help more once if I am able to learn from other
members of the Legion.
Tell us about yourself:
I am a very creative and curious person, I spend most of my time learning out of my curiousity most of
the time I tinker with programs and such, I learn much from what I do, and this is what keeps me happy
finguring out how things work, through the digital domain I have aquired a new book to read and by
joining this group I would uncover another set of chapter through my journey, I wish to join the

Legion
by being a student, what I have learned I will share, and what seeks for me beyond I will uncover.

vitafortis - *September 11, 2013, 7:18 am*

Did you seriously just repost and delete your other post, to remain at the bottom of the thread?

Minnesota - *September 11, 2013, 9:42 am*

Elaborate on your skillset:
Basic Hacking
I have an knowledgeable and understandable overview of the field of "Basic Hacking" in which to my eyes is basic knowledge in various types of hacking and not digging right into each one to be a master of it, as it takes years of experience too and in which Legion can help me get their easier then to read a "Tutorial" or "eBook" about it. All of which iv discovered and spent quite a few time learning into have been SQL Injection (Manually), XSS, Bruteforce, MBA Sentry, RAT'ing (Key logging as well, but actually using the keylog provided on the RAT), Bypassing credentials, eWhoring (Possibly the one i did lease of) and using Botnet's and various private software.

Social Engineering
Social engineering is a skillset to me as of iv been some what successful int his, which has led me to quite a few items in my hands and just to name a few (Acer Monitor, x2 iPod Touches, BlackBerry phone and a new hard drive in which i run my own web server on). I find social engineering quite simple now as iv done it for quite a long time, But yet i still haven't discovered a quicker way of less then 20 minutes to SE one item.

Web Development & Hosting

One of my favorite thing's to do when i come online is to manage and create things my own way, Not using pre-hand made software and scripts. I disguise my self to do things "Old Skool" if ud use that term, Which simply means i don't use scripts to create everything for me and if anything id be creating the actual script. Iv operated and made atleast 50+ websites over the past 3 - 4 years in which few of them have led to me being successful in the "Blogging" and "Service" industry.

Hosting is something iv digged right into and managed to cope with for a extraordinary amount of time and well known to give full support and knowledge in the field. Iv created and owned a exclusive amount of companies with the knowledge i have in this, not to mention iv spent the past 4 weeks creating my own client panel for a new project in some what similar to WHMCS, Like i said i don't like to use others, My own is the best way.

Coding & Programming

Coding and Programming is pretty much second nature to me if you would want to call it that. Various amount of languages have i studied over the past years in which terminate me to enjoy the task of learning more advanced ones. Id say i have more then the general coders knowledge in HTML5, CSS, PHP, PHP contracted with MySQL, C++, Objective C and Python. Wherever it's making a basic website for a knitting service or constructing a database for a high Intel company, I can get the job done no matter what situation and ideas are thrown at my face. Give me time and i can surely get it done for you.

Writing

Writing is actually quite fun for me to be highly honest with you.. My fingers never seem to hurt nor do they ever stop moving. Iv write mainly about sport's for a very long time now including working for a extravagant amount of websites which will allow me to write free in there word. Creating tutorials or being an analysis for a sports team always seems to enlighten my day when i'm bored or got nothing to do, As it's a hard project to find what went wrong to what the main features and key's of success are and able to share it to a community to take my word for it and make sure its right every single time.

Tell us why you would be a valuable asset:

I'd like to take the chance to be a valuable asset by being a loyal member and contributing to everything that you would give me to do and not take advantage of the power of being in Legion. Im highly active on the forum and the main reason is to learn and become more knowledgeable in various areas and Legion supplies the ways in which i would like to learn which is Hacking. That's the main focus for me to join, learning from some of the best on the forum and the knowledge that this group can supply is highly regardable in the situation which i would like to participate in, Would be honored for Legion to accept me in part of their community, Would be amazing for Legion to be one first official group to be in and surely wont abuse the powers of being in such a well committed group.

Elaborate on your achievements and future goals:

Iv had quite some personal achievements out of the technical world. The best out of my whole lifetime so far has been the ability to represent my country, my state in Basketball. In November this year i will be going to Texas, USA for 4 weeks were me and a team of 12 Basketball players will be going for a USA Tour to play High School teams (Division 2 i'm quite sure) in 13 games and 2 tournaments over the first 3 weeks and the final week will be site seeing in Los Angeles and Orlando. We will also be training with the San Antonio Spurs who were in the NBA Finals last year considering that my coach's father is the teams stadium announcer.

Another achievement for me was able to do something back for the community were i was a royal lifesaver for a few beaches in my country of Australia were iv assisted and saved 5 life's from

drowning.

My lifetime goals for the future would be to be the best that i can be and able to achieve anything that i strive for, Some of those is that id like to hack a major website in the fields of revenge to the company and not to a randomized company. Being able to shut down a big network would also be amazing and an accomplishment in eyes to be able to do possibly government related.

Able to create my own products in software and hacking tools/services similar to what Legion does and possibly sell it for a decent profit, but in the mean time i would strive to advertise Legions and make it more known and noticeable to everyone.
Tell us about yourself:
My personal life is quite general in to which anyone would think of it to be, I'm from Australia and i'm currently in my senior year of High School. I don't plan on going to college next year and taking it as a gap year so i can learn via what i want to be able to do online and not in a campus, Also be able to take some time off. I'm also very athletic in that field and do spend quite amount of time in the gym and with my teammates. Coming online and hacking or programming which i generally do is more relaxant and a rest for me out of my normal life and i absolutely enjoy it. I wish to take it to the next stop and able to become more successful and hopefully sell some products which i created myself and take it on from there.

G_Homie_G - *September 11, 2013, 11:01 am*
Good luck to all applicants! Everyone is great in this group! The teaches are really helpful too!

?Fetz? - *September 11, 2013, 11:33 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

RATing: This was the first thing I learned and have rather stopped RATing due to I realized how pointless it is. Although I do use it occasionally.

Graphics + Dev: I have done quite a few GFX projects, also have an intermediate level of C++ and VB.

Social Engineering: This is one of my best tactics. I am very good at tricking people into downloading my files or doing as I ask.

Server/Program Setup: I am also good at setting up hacking programs (or any type of program or server). I have helped quite a few people here on HF set up their RATs, Keyloggers, Botnets, IRC Channels, Game servers, and more.

Defacing: I have defaced about 5-10 websites, quite a few of them being .gov, I usually deface using Webdav, although I defaced a couple times using SQLi (Without Havij ^.^)

Learning: You may be thing... "Learning, What the... thats not a skill!" Well if you really think about it, it rather is. If you have ever tried to teach someone how to do something and they act completely uninterested or as if they have no idea what you are talking about, you feel as if they are terrible at learning.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I think I would be a valuable asset because I am

always ready to teach and learn. As I said before I have helped many different members on HF, and others from Skype, IRC, etc.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:For achievements, I have sold a few website set ups to neighbors etc. Also have learned a lot about hacking, programming, computing, etc. Over the years. My current goals are to get more into "advanced" hacking, like finding vulnerabilities, coding my own botnets, etc. Also to help new hackers as much as I can.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I am a 14 year old guy from Georgia (USA) and have been interested in computing basically my whole life. As a younger child my father owned a computer repair shop. Starting at about age 10 I helped him in there a couple times a week after school... learning as much as I possibly could at that age. At about 12 years old I started programming C++ in order to become a game developer. I also worked with 3D animation using Blender and Cinema4D. At 13 I got into hacking because I thought it would be an experience to learn. As I got into it I saw that there were two sides to hacking, those who want to screw with people's computers just for lulz... and those who used peoples computers to do things to our government etc (hint hint: anonymous). I decided that screwing peoples computers over was useless and boring, so I decided to build up a botnet and join some anonymous operations. Lately I have restarted my botnet, and am at about 60 bots after 5 days. I plan to start joining anonymous operations again once i hit about 10k.

Dusteh - *September 11, 2013, 11:53 pm*

(Sep 11, 2013 07:18 AM)vitafortis Wrote: *[CITE]* Did you seriously just repost and delete your other post, to remain at the bottom of the thread?
I mistakenly duplicated my application, apologies. :(

Backwoods Cigar - *September 12, 2013, 4:33 pm*

Elaborate on your skillset:
-Gaming:
Team Battles
Co op
Video Editing

-PHP- HTML:
I Can Use basic and Advanced Html/Php.
I am able to fully complete a website.

-Design:
I can use Photoshop(Basic)
I can make Hq thread posts and Signatures.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group because I am Friendly, Outgoing. When a Project is started, I will always Complete it.
Anything I do, I will do my best at. I help Members of the HF Community.
Elaborate on your achievements and future goals:

My future goals for hack forums would be to gain knowledge and share it with others. If I learn Something new, It will be shared with the Community. Another Future goal is to be accepted into Legion, and become a Legion Student.
Tell us about yourself:

Ok, to start off, I'm a sophomore in high school(16 Years of age). I'm from Florida, I play football and I wrestle. I'm on the computer about 4 hrs after school. I'm all yours on the weekends. I also Love skateboarding and Helping People at whatever issue they may have.
Once you get to know me, you will like me.

I hope you take my application into consideration.
~Expo

Cha0 - *September 13, 2013, 6:54 am*
At0m1c's

Application [img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Shows maturity: [?]
Uses acceptable grammar: [?]
No scam reports:[?]
No trolling/flaming others:[?]
Is applying for student:[?] [img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
When I started learning about IT, I began with hardware. My computer was dusty so I decided to open it up, took everything out very carefully and screwed it back in after I cleaned it. I got it fully working again on my first try. I was 13 at the time.

I started to learn HTML and CSS short after that. I'm pretty good with those two. It's not like that's very impressive, but I thought I'd mention it.

When I learned how to create websites, I also wanted to learn how to host them. I started to play with cPanel, which was very easy. Then I learned how databases worked, what they where used for, and how to set up a basic DB. As I learned that shared hosting was limited, I wanted to know about hosting a website on a VPS. That's when I started looking into Linux, I learned the basic commands, how to change configurations, how to set up proxy servers, mostly basic stuff. I still have a lot left to learn.

One day, after being hacked on Runescape, and not understanding how that could have happened, I became interested in computer security. I started playing around with RATs, set up a few botnets, learned what (s)JDBs, exploit kits and such where, and obviously how to defend against all those.

When I realized how important computer privacy was, I started looking into different methods to keep myself anonymous. Just like everyone else I started with VPNs and even learned how to keep the DNS from leaking. Then I learned about proxies, SSH tunnels, why you don't want cookies etc etc.

I have some basic skills with Photoshop. Just enough to do the GFX I sometimes need for websites and such.

Over time I developed some nice social engineering skills. By which I mean in general, I'm not the guy who tricks Apple employees into sending them an iPad. I am however very good with people in real life. Manipulation is one of my talents.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
Well first of all, I should mention that I'd like to apply as a student. I'd like to join to learn. I'm getting a bit tired of learning all by my self.

I have absolutely zero scam reports, nor do I have any negative reputation. The reason behind this is because I always stay polite, I never resort to flaming, or any other immature behavior. I've always been able to resolve my differences with members I've had in the past.

So to simply answer the question, I would contribute to the fullest extend possible and I'd be a very active member who is completely willing to learn.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
Well I'll have to say I'm quite proud of myself for learning everything I know all by myself.
In 2011, I've managed to get myself an Aries PC Technician Certificate. (Click for proof)
It basically means that I'm able to find and fix hardware problems by the books. (The official way)

Quite some time ago, I needed a way to host a webserver anonymously on a home connection, I succeeded.
I'm not sure if I'm the first to invent this method, but I'm quite proud of it.
Obviously I don't want this method out in the open, but I'd be happy to discuss it privately.

A few months ago I planned on setting up a professional BTC mining set up. I had everything fully set up without problems (Botnet, Stratum proxy, exploit kit, etc.) but decided not to go through with it because I wanted to learn more first. I was afraid I would do something stupid that would get me caught. Even though I didn't go through with it, this has been very educational to me and I felt a great sense of accomplishment when I got everything working properly.

As for future goals, I just want to learn as much as I possibly can. I'm highly motivated.
If it's not already in the section "Elaborate on your skillset" I wish to learn it. (Talking about IT, obviously)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
Some of you might know me as Xeneroso which is my previous name.
I'm a pretty average 19 year old. I live in Amsterdam and I currently still go to school studying IT.

I've had a pretty rough childhood. I won't bore you with the details. (Unless you want me to)
But I'm not bitching about it. It made me what I am today.

I like to work out, read books (Currently reading Game of Thrones, which am I a huge fan of by the way), go out with friends, watch movies/series, (but who doesn't, right?) and play Old School Runescape every once in a while, however, I'm not taking that serious any more, I used to play hardcore from 2006 to 2012 but sold my account when EoC came out.
I'm not really a gamer. Sure, I play some of the classics every now and then but I don't even own a console, it's just too much of a waste of money and time in my opinion. (No offensive to gamers intended.)

I've been told I'm a very calm person. Who quietly listens and thinks before he speaks. You'll have to do something pretty terrible to me to get me angry.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Is there anything else you'd like to say?:
Thank you so much for giving me the opportunity to apply.
I hope you'll consider accepting me as a student. :)

Krave - *September 13, 2013, 8:46 am*

Application.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
I have a few skills, but after all I am here to learn, so I want to become a student to learn more about hacking as it interests me.

Graphics
- I was on another forum about 4 years ago when I stumbled across the graphics section on it, I started to poke around for a while and saw some people produced some amazing pieces of work and it really inspired me to get hold of the programs needed and to start my own work. I struggled at first, not knowing the correct tools and techniques to do certain tasks. I started learning from some tutorials and got the hang of some basics things, I then improved and improved mainly by watching speedarts and experimenting with the tools on Photoshop. By this time I was learning Cinema 4D and learnt how to do some pretty awesome things with 3D text and importing it onto my Photoshop graphics. I then became better and started designing more complex things like webpages/login pages etc.

Some graphics work:
Spoiler (Click to View)

http://s1132.photobucket.com/user/PhotoshopDesignz/media/LoginPageV2.png.html?sort=3&o=200

http://s1132.photobucket.com/user/PhotoshopDesignz/media/EvilStudiosWebDesign.png.html?sort=3&o=183

http://s1132.photobucket.com/user/PhotoshopDesignz/media/NommiesNewsPage2.png.html?sort=3&o=205
These are quite old but I found them in my photobucket. (Nom used to be my name on another forum)

Gaming
- I have been gaming since a very young age and have picked up multiple skills along the way. In my eyes, gaming is seen as a skill as it takes practice and practice to become good at it. I started to get into competitive gaming on consoles but found that it got very boring. I recently moved onto PC gaming which is far better and is more of my style of gaming. I have also been "speedrunning" games. Which in my eyes, is the most intense level of gaming. I try to beat multiple games as quick as possible and have actually become good. For example, I speedrun Half Life 2 and have completed Zelda: Ocarina of Time in under 24 minutes. I think you need to be a very dedicated person to speedrun games.

Social Engineering
- I have some minor knowledge of SE but want to explore and learn more. I find it very interesting and have done a couple of successful attempts before hand where I have managed to get products, but, as I'm a student I have come here to learn and find out more about certain things.

Tell us why you would be a valuable asset:
- I would be a valuable asset because I'm here to learn and take in what I am being taught. I am a

friendly, kind and helpful member who likes to chill, chat and have fun. Although I can be fun, I'm also serious when needs be so for example, when I'm doing certain tasks. I will be dedicated and will ensure to be active and post in the sub forum whenever I can.
I see myself as a very active member on HF already seeing as I spend most of my time on the PC/my phone.

Elaborate on your achievements and future goals:
Get a little bit of recognition of the forums by being a high quality and a member who people come to for help.
Learn some skills needed to earn a fair bit of money online.
Eventually be able to have a steady income online.
Learn skills to be able to exploit certain things like programs/sites.
Gain over 1,000 followers on Twitch as I love to stream speedruns there.
Learn how to do some basic hacking then move on to more advance things.

Tell us about yourself:
- I am from the United Kingdom and my name is Ryan. I have lived in southern England for my whole life and I am happy where I am. I have been really interested in computers/technology since I was around 8-9 as it has fascinated me. I am currently a student but have a lot of free time and I love to commicate with others members and be helpful! I am also a friendly, fun and nice person to talk to and will be dedicated and active in this group. This group looks truly amazing and I would love to be apart of it. If I did get accepted then it would be my very first group to join!

Thank you for reading my application, good luck to all who may apply! ?
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

-zYMTOM' - *September 14, 2013, 6:03 am*
Elaborate on your skillset:
My main skillset is webdevelopment at the moment, although I know a bit about everything, webdevelopment is my strongest side.
I know PHP, SQL, CSS, HTML, JS, vb.net, C# and Lua fairly well, I know the syntax of and a bit more of Perl, Python, C++ and a few others. Please note that I'm not advanced in the latter mentioned parts.
Other than that I have experience in monetizing, done both PPD, CPA, PTC and a bunch of others.
Tell us why you would be a valuable asset:
Because I try my best to gather as much knowledge as possible, which I would think you could take advantage of in some way.
Elaborate on your achievements and future goals:
My achievements are few, but some of them include having a stable CPA niche(I made about 10$/day for about 2-3 months), having a community which I just put a bit of money into and then managed to run on itself.
Tell us about yourself:
I am a sixteen year old guy and I currently reside in Sweden.
During days I go to school, currently in the "gymnasium" which is equal to high school I believe.
On my spare time I have my parttime job where I work in the IT department of a company called Silentium, which is one of the largest callcenter companys in Sweden.
Other than work and school, I go to the gym, hang out with my friends and my girlfriend. And when I do not do any of those things, I sit by my computer either coding, gaming or just surfing.

Freddy Kru?ger - *September 14, 2013, 6:04 am*
Just wanted to wish everyone luck with getting into the group, you won't regret it ^^

Big Poppa - *September 14, 2013, 7:14 am*

Anonymous' Legion Application
Elaborate on your skillset:Social Engineering: One thing I have always been good at was Social Engineering, ever since I was in about the eighth grade, I have been talking my way out of everything that I did and it really helped out last year when I was found on an admin account in one of my schools computer labs and talked my way out of expulsion, down to 1 detention ?. With this skill set I have been using it for personal needs online not really a business point of view, for example, getting OP if I play minecraft, every month or so, getting free accounts for Netflix, HBO Go, Spotify, so if somebody is giving out some free accounts I manage to get at least 10 so I can sell them at my school ;).

Coding: I have been learning Java mostly for about 3 years now and although I am not fluent in it, I have learned all the basics and I am more of an advanced coder. I also code in HTML with my dad, my dad helped me learn most things for HTML, and together we code websites for local business' for about $1000 per site and $100 a month to update and maintain the site, I really like sites to look simple, you don't need 100 buttons on each page because most people looking at restaurants or local stores, just want the time its open, menu's, supply lists, and such. Here are some sites I helped work on:
http://villagesocialkb.com/index.html/
http://christopherjudebuilders.com/
http://www.theevereadydiner.com/ - absolutely hate this one but this is what they insisted to have as their site.

Marketing: My dad is one of the head marketers for food network and was just offered a job to be CMO of yellow pages, so naturally I am forced to learn all the in's and out's of marketing. I have been taught constantly that you need to get your product everywhere. Even if the person doesn't see your ad, in the corner of their eye they see it self consciously, and start to become accustomed to the fact that they can trust your product. Theres a little human hypnotism lesson there ?.

E-Whoring: And lastly E-Whoring, now I'm not to proud of what I'm about to say but I don't have a computer of my own ?, yes to e-whore, I have been using my mom's laptop hahaha. So what I have been doing for HF and other things is I use my iPhone, but as you can see in my signature I have been saving up, $500 of that is from e-whoring but the other $200 is from me selling Netflix accounts at my school. What I do is I either get a bunch of Netflix accounts for free or buy them from a guy on my skype for $0.20 each. Then I sell them at my school for $5 per account and $10 for an account + a 6 month warranty on your accounts, which I just started and is working great so far, hope to get enough for a good laptop through doing this.

Tell us why you would be a valuable asset: I would be a valuable asset to Legion because I can really help with marketing Legion and Illuminati products, not only on hackforums, but irl and online as well. I know I have not been a member on hackforums for the longest time but I really admire the group and all of its work, I also have a ton of great Idea's for new products and marketing strategies. I know that my skills are limited and there are plenty of other candidates to be accepted, but I most certainly would be more fun to have around ?.
Elaborate on your achievements and future goals: Obviously my biggest goal would be to get a laptop of my own, currently I am typing all of this on my iPhone and its not the easiest thing to do. Although I know it's going to be difficult to get around $500 I currently have a job irl and my birthday is coming up so hopefully I will have a laptop soon enough ;). My goal once I have my own laptop would be to learn as many new coding languages as I can, I really love coding and would like to major in it in college so I plan to learn python and C++, all of the more useful coding languages. After I learn some new languages and become somewhat fluent in them I want to get up a botnet and get a good rat on some kids I'd like to get some revenge on and some innocent bystanders xD.

Once I have my botnet setup the possibilities are endless ?.
Tell us about yourself: I am a junior in high school as of August, and I love lacrosse and skiing outside of the computer. I have been on my schools Varsity ski team and Varsity lacrosse team for a year now and it's lots of fun, you get to meet a lot of cool people and practices get pretty crazy. I also love movies, I can review any movie for you because I go into my theater everyday and watch any movie that looks good, I don't know why but I can watch movies all day if I wanted to and it's gotten to the point where I have a reference for almost anything.

Anyway, thanks for reading my application and good luck for everyone who is applying!

Regards,
- Anonymous

rfz777 - *September 14, 2013, 7:15 am*
Good luck to everybody applying to the group! ?

I hope to see some new faces in Legion soon!

Thank you very much, Sir.
I will be looking forward to working with you.
Thanks,
~expo

Proximity. - *September 14, 2013, 1:47 pm*

Elaborate on your skillset: I know Python, of coarse HTML and I'm looking to learn more Visual basic. I know only the basic syntax so far. I'm also decent in networking.
Tell us why you would be a valuable asset: I am online everyday and I love learning especially about Programming and how things work.
Elaborate on your achievements and future goals: I have few achievements in the technology field so far. I plan to master Visual Basic learn C and C++. Possibly C#.
Tell us about yourself: That's all ?

Hitmaster - *September 14, 2013, 6:41 pm*

Elaborate on your skillset:

I'm experienced in different sort of fields such as:
Being friendly/Generous
The reason I listed this on the first place is because world would be meaningless without friends. I don't know if this can be conisdered as a skill but I'm very friendly and love to make new friends. I'm also very kindhearted and like to help everyone who seek for help.

Marketing/Sales
I'm really good when it comes to marketing. I've been running a lot of businesses on and off HF but I tend to expand it on the upcoming days. I'm also partnering with some other businessmen to bring HF some new and amazing products which I'm very thrilled about.

Cracking

I crack RDPs. I'm specialized when it comes to RDPs, no need to add anymore detail. You can check my sales thread for further details. Spoiler (Click to View)Click Here

Support
I tend to understand people when it comes to their needs. I've worked with a couple HF product owners over the years as a support staff, hence I know how to deal with customers. As I mentioned above I have my sales thread and not even one customer has been unsatisfied with my service. Spoiler (Click to View)If you're interested to know on what products I worked as a support representative please send me a PM

RATs and Keyloggers
I can't say I'm an expert when it comes to RATs/Keyloggers but I'm very
skilled. I've used RATs and Keyloggers in the past and had an amazing result when it came to spreading my server.

Social Engineering
I'm not very good at it but I can say that I'm a Social Engineer. I've SEd Microsoft, Logitech and Mostly EA. I used to sell SEd Battlefield/FIFA keys.
I have also been able to Exploit some hosting companies through Social Engineering to get free Hosting, Domains, Servers etc.

Information gathering
I can gather information very quickly when I'm intrigued about a specific thing (Mostly IRL). I can read people very well, and yet remain unsuspicious of my actions.

Video Editing
I used to do minor Video Editing for my YouTube videos and for some friends. I have experience with After Effects, Sony Vegas thus I'm not very skilled when it comes it.

Computing
I understand computers and how they work on the both sides Hardware and Software. I'm not an expert but I think I'm close. I mostly deal with
Windows Servers as they're part of my business but I can deal with Hardware too. I also have a minor knowledge on Linux based systems.

Gaming
I was a professional Counter Strike player and had a team of five members which we used to compete on local tournaments.

I have knowledge on tons of different things other than the ones listed above. I can say I'm a bit above average.
Spoiler (Click to View)HTML
SQLi
PHP
Photoshop
Monetizing
PPD
Google Adsense
White Hat (Malware Remove)
Networks
iPhone (Jailbreaking, Service)
eWhoring
Domains

CPA
Booters/Stressers
Crypters etc.
Tell us why you would be a valuable asset:
I would be a valuable asset because I'm very well diciplined, have a large span of skillset. I strive for knowledge.
As much as I like learning, I like teaching. I can help not only Legion members but all HF community. It would be my pleasure to share every thing I know
with the community.
I will mainly be willing to help with Marketing, Cracking, Social Engineering and Rats.

Elaborate on your achievements and future goals:
It's been two years since I joined this community and I can prodly say I've achieved a lot of things. I've learnt a lot, starting from my grammar. Back then
I really struggeld with english but now, it's just another fluent language I speak. I learned about Marketing, Monetiezing, Hacking, RATing etc.
My future goals are include beccoming a sucessful businessman and a Programmer which I think I will achieve with hard work and dedication.

To sum it up: HF has helped me a lot not just Online but IRL.

Tell us about yourself:
I'm currently attending high school and by next year I'll be a college freshman. I'm very social and have lots of friends. I hit the gym very hard, and
over the course of one year I've managed to transform from a skiny stick to a muscular beast (lol). Other than that, I stay on the computer mostly on Social
Networks I am a member of, HF and some other Black Hat communities. I like to watch movies, especially comedies. I'm an overall A student and a kind person
to talk to.

Thank you for reviewing my application. ?

Rob Zombie - *September 14, 2013, 9:36 pm*

Elaborate on your skillset:Well I am a young coder, trying to grow up to be a marketer and a seller. I love the marketplace section because I am somewhat good at selling stuff. My coding skills are not all that great but I am working at it. I am great at making decent looking threads, which may help in give away's. My grammar is on the "readable" side of things so people do not get annoyed. I would like to say I am a high quality member of Hackforums, because every post I make, I try my best to make it helpful and understandable.
Tell us why you would be a valuable asset: Every post I make is high quality, and I take my time. I hate people who slop things together. Anyways, I am an active poster, and an active seller, so when people buy from me, and they notice I am legit, I would think they would have a good opinion about the group as a whole. I will try my best at doing give away every now and then as well.
Elaborate on your achievements and future goals:I want to be retired, and have loads of cash. (Millionaire)
I want my business to thrive, and supply people with jobs and help the unemployment rate lower. My priority in life is to always try my hardest and to never give up. It sounds so corny, but trust me, when you fall down you must stand back up. You will never succeed without failing first.
Tell us about yourself: Some of this has been said. I am 14, male, and I am into politics and coding. I learn fast, and I love to learn. I am a straight A student and I am getting into tech classes as soon as I can. One day I WILL own my own business, that is a must for me.

w?rlockt - *September 15, 2013, 2:58 am*

Good luck to everyone applying! Legion is an awesome group to be in!

(Sep 15, 2013 11:40 AM).Neon Wrote: *[CITE]* I can't see any skill reagarding hacking. This is what the group is about.
Lol, that's a good one. Surely you're not being serious, right?

Dio Brando - *September 15, 2013, 3:15 pm*

(Sep 15, 2013 02:33 PM).Neon Wrote: *[CITE]* You can also write that. Actually RATting is also a part of hacking so why not.
Honestly i don't believe RATting is a real hacking , just my personal opinion ?

Professor Z - *September 15, 2013, 7:32 pm*

Elaborate on your skillset: I mostly do GFX and do know a little of Java. I'm pretty knowledgeable on the subject of "hacking" depending on your definition of it. (I don't mean DDoSing).
Tell us why you would be a valuable asset: I'd love to educate and inform others about what I know

about computing/graphics.
Elaborate on your achievements and future goals: One major achievement I look forward to is learning other programming languages and hopefully build some of my own programs to make profits.
Tell us about yourself: I'm very straight forward and honest. I'm a reliable and trustworthy member. I'm sure you can tell, but I don't say a lot. Like I said, I'm very straight forward. I love the Internet. To me, it's a window to express yourself like no other. I personally love deep conversations. I love Science. Graphics Designing is my main hobby. I love it. I'm pretty passionate about things.

illuminatiJake - *September 15, 2013, 7:39 pm*

(Sep 15, 2013 03:15 PM)Tayl0r $wift Wrote: *[CITE]* Honestly i don't believe RATting is a real hacking , just my personal opinion ?
A remote administration tool is just a software. It could be used for legal or otherwise illegal purposes. It is not really hacking, but it can be used for hacking, such as keylogging, etc.

At my school, the professors use a program with RAT capabilities to control our computers, such as limiting Internet access, during exams.

Dio Brando - *September 15, 2013, 9:13 pm*

I agree with your opinion , i just don't consider RATing someone for malevolent purposes "hacking"

D?sturbed - *September 16, 2013, 8:48 pm*

Elaborate on your skillset

Coding
I have been coding VB.net for quite a while although I'm still considered a beginner. I can code basic programs easily with no problems. I have been improving for a while now. I can also code a little bit of HTML and Php and also C#.

Social Engineering
I can say that I'm pretty good at social engineering. I have been always doing it. I can convince a lot of people with anything without having too much problems on my end. I have also made a lot of money from eWhoring due to my social engineering skills. I have earned a lot of my social engineering skills which I've bought Ub3r with.

Reverse Engineering & Cracking
I crack a lot of programs which I do not bother to buy and I have been pretty good at it. I can crack a lot of programs without having almost any issue. Almost of the programs I use have been cracked by me.

Monetizing
I just love monetizing and that's a thing I'm experienced in. I have been lately thinking a lot about CPA and PPD but I haven't started yet. I will be starting very soon as I'm interested in it.

Graphics

I'm okay with graphics. I can make a few graphic designs but I'm not too good at it. I'm much better off with photo manipulation. I'm still trying to improve by time.

eWhoring
My social engineering skills helps on this. I have been eWhoring for a few months now and I am buying Samsung Galaxy S4 in a few days by my earnings from eWhoring. I have developed my own methods so far and I have been earning pretty good. I have been also teaching 3 people my methods without anything in return. I have made over 800$ from eWhoring using my own method.

SQL Injection
I know basic SQL injection and I have SQL injected a few websites and I can do it again. It's an easy task for me. I would do it again if I had a request from a friend or so.

Gaming
That's something I do a lot and enjoy. I mainly play FPS games and Dota 2 and Starcraft 2 and League of Legends and ofcourse GTA V is on it's way!

—

Tell us why you would be a valuable asset:
I think I'd be a valuable asset because I can always help others out if they have a problem. I can also coach them on a specific thing I'm good with. I'm always respectful to everyone and I did a couple of giveaways and one of them remains one of the best account giveaways at the moment. I'll be doing tutorials and more giveaways soon to contribute more to the HF community. I will be also starting a Netflix and Spotify giveaway soon.

—

Elaborate on your achievements and future goals
I have always went after my goals and achievements and I have done quite a lot of them. My current goals are to contribute to the HF community and become an HQ and a useful member. I have learnt quite a lot from my stay here and I'll be willing to teach anyone who asks me. My current goal now is to make more money using PPD/CPA and marketing in general. Also one of my goals is to get accepted into Legion.

Tell us about yourself I'm very chill person. I don't get bothered easily and I always seek to help other people out. I always like everything well organized and accurate. I currently play Rugby and I do enjoy and love the sport and I started getting into Bodybuilding and doing other few things. I love to hangout with friends and partying but that's pretty much it. I'm still in high school and I will be finishing very soon.

Thanks for reading my application.

BadBoy - *September 17, 2013, 5:05 am*
Elaborate on your skillset: I have no skills in programming at the moment, that is why I wish to apply as a student and hopefully learn

Tell us why you would be a valuable asset: Mainly, it's patience. I am very patient especially when it comes to learning new things.

Elaborate on your achievements and future goals: I wish to be a pilot to be honest. But I also want to learn basic Java and once I've mastered that, I wish to move on with the next level of difficulty.

Tell us about yourself: I am 16 years old. I love playing soccer and staying on the computer, but not too long as I have a life to live. I've always wanted to learn coding and programming and monetizing, but no one wishes to teach me.

BlackFiber - *September 17, 2013, 10:01 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Elaborate on your skillset:

Coding

I love coding, i absolutely love the feel of a finished project. I can program:

VB.Net
C#
Java
PHP / HTML (Just started coding this)

I also code programs for people and sometimes make money of it.

Graphics

I make graphics for fun and sometimes for other people. I work with Adobe After Effects / Adobe Premiere Pro / Adobe Photoshop.
I can create profile pictures, logo's, intro's and all sorts of things!
I did my internship at a local TV broadcaster where I made commercials and breaks. So I learned some basic rules of editing.
I make videos with friends all the time and have created DJ Templates online for fun.

Social Engineering

I can manipulate others quiet easily by my smooth talking and common sense. I can gain trust and make them do things. Altough I don't really like hurting people or to betray them, when they deserve it I will do it.

Business

I really like starting projects and invite people to join me. I regularly sell my skills to people for all kinds of stuff. But people also work for me, I'm not a great PHP coder so when a customer wants a site I would choose someone of my contacts and add him to the conversation. I give people clients and I will get 50% of the agreed price.

Tell us why you would be a valuable asset:

1. I have a new way of looking to things.
2. I can figure out new ways and new methods to stuff.
3. I'm a great listener, I will always obey my leaders orders.
4. I love teaching and sharing my skills to others.
5. I have a large skillset with useable things.

And also very important, I'm a nice guy. :)

Elaborate on your achievements and future goals:
When I'm older i want to go to a local university and study Computer Science and Engineering. After that I might make my own company that helps people with all kinds of computer problems. I'll keep up with HF in my spare time and learn more about hacking while I become older. My goal here on HF is to be a usefull part of the community and maybe share some of my skills with others.

Tell us about yourself:
I'm 16 years old from Holland, I'm studying at highest level possible in Middle School (VWO). I'm a quiet guy, I am not a post spammer and will only post when it's usefull for the community. I'm a great learner and learn things quite quickly (Except for french and german). I like being in a leadership position because i like that people have respect for me and to help people when necessary.

G_Homie_G - *September 19, 2013, 6:36 am*
Good luck to all applicants! Was going through some of the apps, they look good ;)

Cha0 - *September 19, 2013, 7:53 am*
(Sep 19, 2013 07:52 AM)Penar Wrote: *[CITE]* This group may be the dumbest on all of Hack Forums right now.
Care to elaborate? I wonder why you think it is.

Innovation. - *September 19, 2013, 4:16 pm*
I also want to thank Legion for giving such valued members to Hackforums. Also, I did GFX this myself. Have a good one ?

rfz777 - *September 19, 2013, 4:56 pm*
I'm seeing some alright applications. Looking forward to working with some of you. Please note, you will actually have to be keeping up. We WILL have mandatory projects, and if you fail to complete it on time, you may be kicked. Please consider this before applying and wasting your own and our own time ?

other than that, good luck to all pending applicants!

Also, I'd like to vouch for Iraq. I've worked with him in the past and he's a great guy to work with. He knows his stuff in VB.NET, he isn't amazingly skilled in programming, but with a little push from Legion, I think he can gain some great knowledge from the group! ?

?Italy ? - *September 20, 2013, 5:32 am*

Elaborate on your skillset:

Social Engineering I do Social Engineering for several months and got many valuable things. At first, I did it for the things I trully desired (I don't like spending money on cheesy stuffs, I prefer to get them on free). I am quite good on what I am doing. Did several things for my computer like: mouses, keyboards, sound system, web cameras, monitors, headsets; and many more.
This occupation also provided me some pocket money. I used to social engineer products for my internet friends for 30% of their desired item's price.

eWhoring
eWhoring. I think everybody heard about this scamming method. This method requires much time and knowledge, but it's fun to do. I acquired like $300 eWhoring. I stopped eWhoring after I formatted my PC and deleted all my resources by mistake.

Gaming
Now, what occupies my whole free time is gaming. I play games like CS 1.6, FIFA 08 (is still the best from the series), WoW, DoTA 2, TF and my favorite one: League of Legends.
It is one of the most played MMORPGs at the time. I play it at school, at home, at cafes, and everywhere my laptop can go. I play League of Legends for about 3 months so I can't say I am brilliant in this game, but I know the basics and the rules of the game.

Graphics
Obviously I had to learn how to use Photoshop for my SEs. I know how to add some effects for my photos, how to edit ID's and receipts.

Tell us why you would be a valuable asset:
Apart from my experience and skills, I also believe in continuous learning, including learning from my mistakes which helps in adding
in the basket of my knowledge and makes me more efficient, thus becoming a valuable and growing asset for this group.

Elaborate on your achievements and future goals:
My greatest achievement is that I managed to gather $300 only using my computer and skill. Future goals would be that to be accepted into a custom group, learn more about
monetizing and marketing and get into Diamond division at League of Legends lol.

Tell us about yourself:
My name is George Daniel but my friends call me over my nickname Dodel. I am 16 and live in a small city of Romania named Turceni. I am in my 3rd year of highschool
and my speciality is math and biology. I won't go into details about my personal life, they are boring.

A$AP R?o??cky - *September 20, 2013, 11:31 am*

Elaborate on your skillset:
My skills consist of:
-Web Development
-PC Building
-VB and .Net
-Bruteforcing accounts
Tell us why you would be a valuable asset:
I'm currently at college doing IT.
I saw this group and thought it's interesting and high-quality, i feel i'd be an asset because i'm learning currently at college, bit by bit, and the skills i've been learning could be used to benefit this group eventually. I'd also be able to learn a lot of skills of the other group members and development my knowledge.
Elaborate on your achievements and future goals:
At present the only achievements i've had are ratting a few people and bruteforcing some accounts, which i've still got lists of accounts that i didn't sell.
I'm hopefully looking to be accepted in to this group and manage to eventually use any skills i learn to benefit the group and other people.
Tell us about yourself:

I'm an average guy. I enjoy learning and i'm always willing to learn. I'm helpful and usually well-mannered, i'm also trustworthy.
I've been in various groups on other forums and have met quite a lot of good friends.
I'm an administrator on a friends forum at the minute, his online name is antisecurityx and he's the leader of antisec.
The website i'm admin on is www.anonuniverse.com for any people that might want to check that i'm being truthful. If you happen to check just make an account and message thehelper (That's me on that forum).
I enjoy playing games like minecraft, i have an xbox 360 but rarely go on it unless i'm playing the new GTA.

Toscan - *September 20, 2013, 11:57 am*

Lo?e - *September 20, 2013, 5:10 pm*
Elaborate on your skillset:

Marketing: I am currently learning PPD. I am a very huge economics guy and know almost everything about it. I will nto bore you with fake hacking skills though. I am also quite good with advertising. Gaming is a passion of mine but I would never call it a skill set. My main skill set it marketing though and leading. I am president of my youth group and school. I am a leader and think I could help in that aspect. Not being a leader of your group but helping the members stay on task.

Tell us why you would be a valuable asset:

Currently, I am very interested in learning to hack. I learn things very quickly and really do enjoy learning them. I would become a valuable asset in the fact that I would always be there for the groups and amendments.

Elaborate on your achievements and future goals:

My achievements have been numerous but also quite small. I have made a lot of money off of hackforums but have spent it all. My achievements in hacking are none. That is why I want to join this group. My friend fantasec knows me very well and he is a member of your group. My future goals, well that is easy. I want to make at least 10,000 dollars off of this site. I want to run a non profit organization or be a psychologist. HF goals: Illuminati. I have always been inerested in hacking and had a mac so it was not very compatible. Now I have a windows computer and would love to learn.

Tell us about yourself:

Im 18 years old , Im in college, I like gaming, Money making, Graphics, working with cars , and a loyal guy when it comes to moderation

I live in Jersey City and trying to make it big in the near future

Understalker - *September 20, 2013, 7:04 pm*
I am seeing some decent applications so far. Remember not too lie on your application because they're all checked thoroughly.

Tikii - *September 21, 2013, 9:30 am*

Elaborate on your skillset:

Social Engineering

Social Engineering has always been something i was strong in. I have a good grasp of how the normal human mind works and can always turn things my way. I have yet to use this for profit, but as i have a status to keep IRL i decide not to do so.

Business Management/Marketing

I have always been a businessman ever since i got out of high-school i have been through many jobs and i knew it was not fit for me. I could not work for someone else. So a couple of years after i got out of high-school i made some loans and bought my first business. I knew it didn't matter what business i would be in. As long as i can manage it and make it grow i would be happy.

Graphics

I love Photoshop and i have done photography for 2 years, i also took some Photoshop course in college. When i have free time i do graphics for people on HF. I specialize mostly in photo-manipulation.

Tell us why you would be a valuable asset:

I think i have a great business mindset that a lot could benefit from, i also think that you can never know enough. I am always open to learn more everyday. I share my knowledge to those who are open to it and i take all the knowledge i can at the same time.

I am very active on the forum as i have my own business i can browse HF all day, which makes it very easy to communicate with me.

Elaborate on your achievements and future goals:

Latest achievements: Bought a Business in May 2013, have held over 5k for people on HF (Can provide name if required).

Future goals: Either buy another small business or flip this one i currently have a buy something bigger. Also at my point in life i also think of starting a family, having kids, a house and such.

Tell us about yourself:

My real name is Cédric, i am fully bilingual. I am an easy going guy always fun to chat with and i will always do my best to help out my friends and family as i value them a lot.

I spend over 14h a day online, i'm mostly always on skype, so if you would like to get to know me more that is probably the best way.

To conclude this application, i would like to thank you for reading it and i would like to state that i

am open to any questions i needed.

Thanks

-Tikii

CryptoExchanger - *September 21, 2013, 12:37 pm*

Elaborate on your skillset:
Skill-sets include java, python, visual basic, and c++. I have minimal experience with, file carving, masm32, ollydbg, and obfuscating code.
Tell us why you would be a valuable asset:
I feel my respect for leadership and attitude towards project put me ahead of others. I try to learn the very best i can, and love learning new things. I could contribute my knowledge of programming, a long with a brain that thinks outside the box. I have many ideas and hope to bring a bright mind to the group as either a student, or member.
Elaborate on your achievements and future goals:
Achievements: i have created encrypted chat clients in python (no longer have source as i had to wipe computer and server). As well as some simple hackme's. I understand binary operators, and can write simple programs in masm 32. My future looks like it is headed in a technological field, meaning my experience and knowledge shall continue to grow as i learn more and more.
Tell us about yourself:
I am currently a 16 year old with to much time on my hands. Between school and work i find time to mess around on my computer. My love for the computer shows in all of my work, as it is done well, and in a timely manner. I absolutely love learning new things and i am excited to program with you guys.

Stilinski - *September 21, 2013, 2:48 pm*

Elaborate on your skillset:
I know a fair bit of knowledge when it comes to hacking, but I obviously aren't an expert. I know just about everything when it comes to keyloggers and RAT's. I am coding my own keylogger now as I am writing this application for the market. I mastered Rats and Keyloggers about 2 years ago, and since I joined Hackforums I increased my knowledge a ton. I know basically everything to know about Rats and keyloggers. I am good with Social Engineering, as well. I always make some extra sales with Social Engineering as well as get free items, such as laptops. I have Social Engineered Samung Galaxy S4's, some items off Apple, and some other items with it. I am a master when it comes to eWhoring, I have made over $2,500 off eWhoring alone within a months time. I am working on making my own VCW's for eWhroing as well to make some money on the side. I am a pretty good marketer, and can do anything to make a sale. I have a very successful eBook out right now on how to make money with Rat's and Keyloggers without survey lockers or any of that shit. I have made many successful exchanges in the past as well. In school I had to learn some programming, but I really didn't pay attention much as I found it some what difficult, but I was always trying to learn. I know a good portion of Visual Basics, and some of C++ but I'm no expert about it. I have done Doxing in the past and nearly successful every DOX I try. I have made my own stressers in the past with dedicated servers.

Tell us why you would be a valuable asset:
I would be a valuable asset to Legion for many reasons. I am a hard working, friendly, always willing to learn, and I have knowledge. These four building blocks right here would make an excellent group. I could pass my knowledge down to members and hopefully increase their knowledge in some of the subjects that I know. I will always help someone if they need help and would never leave anyone stranded by themselves not knowing what to do. I could make tutorials for Legion members so they can learn with ease and become wiser to not make mistakes I have

done in the past.

Elaborate on your achievements and future goals:
Ever since I joined Hackforums my goal was to learn and master a RAT and Keylogger. I know this is not the biggest achievement but I made that goal become successful. I push myself to learn new things all the time to not only increase my knowledge, but to help others that do not know. I have learned a ton of information since I joined hackforums and made a decent chunk of change too. My upcoming goals are to create and run my own business. Hopefully make a top of the line crypter like DataProtector in the future.

Tell us about yourself:
I am currently 21 years old and I live by myself. I am on hackforums whenever I got free time and I'm not working. I love the forum and its community, and just everything about it in general. I play Xbox live with my friends just to have a good time and talk to them. I also play online games when I'm bored. I love to make money not only online, but offline to. I have made around $25,000 online and hopefully continue to make some profits online. I am a manager at Best Buy where I live. I sometimes buy items online for a low price and resell them for a profit. As I said I love to make money. I ride dirt bike all the time, just to get out of the house and have some fun. I am hardworking, motivated to learn, friendly, and experienced. These four building blocks right here would make an excellent group.

Dejlig - *September 22, 2013, 5:18 am*

Elaborate on your skillset: I'm currently working as an Art Director. If you don't know what that is, I am creating logos, cards, magasins, and lot more graphic work for companies. Therefor I think it's for me to say that I have certain skills in graphics making. But I won't say it's my only skills, I also knows how to program and code(My program skills is limited to basic sites with basic custom-coded CMS panels). Through my work as an Art Director my job is also to promote products, through TV spots, radio spots, Facebook, and more. Therefor I have also built up a certain skills on how to marketing products the right way, to the right audience.

Tell us why you would be a valuable asset: I'm finding it really hard to talk positive about myself, but I will still give it a go. I can teach members how to use programs like InDesign, Photoshop and Illustrator. It's programs I am using almost everyday, lot of people thinks that Photoshop is a main program where you creates everything, but that's wrong. The main program is actually InDesign. That's the program you uses to combine everything, Photoshop is just used to edit pictures. It's a huge surprise for lot of people, and I really wanna teach people more about it. Therefor, I think I would be a valuable asset because my knowledge in graphic making, including the programs InDesign, Photoshop and Illustrator.

Elaborate on your achievements and future goals: Well, my achievements must have been following: The person who rebranded Maersk(Worlds largest ship company), that was a very huge achievement in my life. Of course I didn't do it all by myself, but I was a huge part of the process. I also sees it as an achievement to create a HF profile, it might seems very easy, and not hard at all. But for a person like me, who never entered a dark world before, and who have lived protected by the community, it's a really big step for me to take. My future goals must be: Make my posts grow on HF, get well known, and maybe get in a group or two.

Tell us about yourself: I'm a very postive person, if you couldn't judge by my avatar. I lived my whole life in a "bubble" away from the un-secure community, I always taken the right decisions and never did anything bad. Until I turned around 18, I had to try all the stuff I never tried my whole life. I tried to smoke weed, take lot of different drugs, to try it. Nothing bad happend, and I only tried each thing a few times, I didn't really think it was anything for me. I currently works as an Art Director as I

mentioned before. My work is what I makes it to. I decides everything, I have a list of customers and what they want - then it's just up to me when I wanna make it, and who I wanna prioritize. I hope you enjoyed reading my application, and might even consider letting my join Legion.

esin - *September 22, 2013, 8:53 am*

Elaborate on your skillset:

I have a vast majority of information on the computer that I can do or can search to learn to do it. I know networking, some programming languages html,css,vb. I have ran websites and have a some knowledge on php programming just not vast, I know how to get things done that need to be done on a pc if It can be or it can't be done, I also thrive to expand my knowledge even further everyday when I just get bored I try to learn something new, I also know how to hack wifi networks and things along that nature

Tell us why you would be a valuable asset:

I would be a valuable asset to the group cause I do show good leadership and can explain myself fairly well, I love to help others and this would be a great opportunity for me here on HackForums as well of it expanding my knowledge on computer's even further

Elaborate on your achievements and future goals:

Achievement for me would be to just help other's and help them understand(it's one thing to do it for them, it's another to do it and explain it to them), I don't really have to many goals other then just to help others, and expanding my knowledge

Tell us about yourself:

I am 28 years old from Denver Colorado, I have one daughter no wifey or nothing and I get her on the weekends, she is my life. I always have been a computer freak since kindergarten using those old apple computer's with the big 5:1/4inch floppy, I enjoy life and value it highly. I'm a person that love's to help anyone and don't expect to get anything in return for it. I enjoy video games, reading, watching science show's, Sons of Anarchy(aka t.v.). I am one of 10 kids in my family number 6 to be exact and I have 14 brothers and sister's with about 18 nieces and nephews, My mom had 10 and my dad had 4 kids majority of them are Girls, I lost my brother last September 9th to cancer and it has changed me in many way's. That's pretty much a short summary of Me thank you for your time :)

#YOLO - *September 22, 2013, 7:29 pm*

Elaborate on your skillset:
Some things that I enjoy doing are:Hanging with friends
Coding(I know HTML/CSS)
Hackforums<3
Meeting new people and learning about them
I LOVE listening to music.

Tell us why you would be a valuable asset:
Some of my valuable assets would be that I am friendly, ans easy to get along with. I like to make jokes here and there, to brighten the mood when things get tough. I am active on HF, and spend many hours a day here. I almost always have a tab of HF open while I am on the computer. I am very open to learning what is taught, and I pay good attention to it. Also, if I may say so myself, I am a very trustful person. What you tell me stays with me.

Elaborate on your achievements and future goals:
I ordered my first BTC miner yesterday. I have known about bitcoins for a while now. But just yesterday, I decided that I really wanted to take it a step further and learn more about them; how mining really work, and such of that nature. I aspire to one day make a nice rig, as something about it just pulls me in. I watch YT videos on them constantly.
I also plan to get a job pretty soon, either at a local Fast Food place or at a little bike shop down the street, for some pocket cash for gas or whatever need be.

Tell us about yourself:
I live a few hours outside of LA in California. I am a Sophomore in High School. My day usually composes of waking up, going to school coming home, and chilling on the computer while talking with friends. I listen to music almost constantly. Weather it be in school or at home in my room. I like to spend my free time playing with some computers I found on my sideyard. Taking them apart, learning what the pieces do, and putting them back together. I also plan to use them as a host for a BTC mining rig later in the future.

Chemdawg - *September 23, 2013, 4:11 am*

Elaborate on your skillset:

With experience in HTML, PHP, SQL databases, Perl, C, Bash scripting, Linux operating systems (both production and development), Windows (both personal and server operating systems), general penetration testing and denial of service (specialized in reflection and amplification methods), I consider my skillset both expansive and useful. I'm always open to learning new things and having the opportunity to participate with others.

Tell us why you would be a valuable asset:

I'm very helpful and I know more than my account profile makes it seem. I can provide massive amounts of DDoS (peaking in the 100Gbps range) and various services that I can elaborate on later into my stay in Legion.

Elaborate on your achievements and future goals:

My achievements consist of various computer certifications ranging from CompTIA to Cisco and

future goals involve computer networking and networking administration. Is it too ambitious to want to found a telecommunications company? How about a data center? All things I see myself working toward as a future goal.

Tell us about yourself:

I'm a laid back guy. I like to make jokes and I'm pretty straightforward. I enjoy working with computers and I don't mind spending hours on end in front of one. I like to solve problems and help others with their own.

I hope you consider me for your group.

Local - *September 23, 2013, 5:59 am*

Elaborate on your skillset:
Graphic Design:I am experienced in Adobe Illustrator at an intermediate level. I took a semester in college for Graphic Design and photo manipulation. I am at expert level proficiency with Adobe Photoshop; I have worked with different Photoshop CS Versions over the past 6 -7 years.
Web- Development: I have over 7 years of experience with developing websites. I can make a website from scratch. I am knowledgeable with HTML, CSS , and some PHP.
Marketing: I am also knowledgeable with sales and marketing methods. This is fairly a new skill I have acquired but it is very effective.
Bilingual: I can speak both english and spanish fluently.
Hosting & Server Administration: I have over 7 years of experience with web hosting and server administration. I can also help with troubleshooting over a network.

Tell us why you would be a valuable asset:
I can be a valuable asset to your group with my various skills. Here are some examples, I can make thread designs and any design needed. I can provide support fluently in both English and Spanish. I can assist and contribute with any website development going on in the group and also teach more about webhosting, server administration, & marketing.

Elaborate on your achievements and future goals:
I was the owner and administrator of a post to host that hosted over 300 websites.
I have been a translator for multiple documents in multiple non profit organizations.
I have sold successful ebooks and maximized income with new marketing techniques.
I am a server administrator for a new start up company.
I plan to learn as much as I can so that I can be prepared when I go to college for Network security
Tell us about yourself:
I'm 18 years old and have been interested in technology at a young age. My purpose is to learn and keep learning as much as I can of anything tech-related. I have suddenly taken an interest in marketing aswell. I will not only be delighted to teach others what I know but I would also like to have the chance to learn from others in the community aswell.

PhoenixHF - *September 23, 2013, 6:21 am*

Elaborate on your skillset:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Administration/Managment
I'm skilled in administrating/managing Game Servers and Communities.I was Counter Strike Server Owner,WoW Private Server Head GameMaster,SAMP Server Owner.I was leader in multiple gaming communities.Currently I am Operator/Admin on one Minecraft Server with a good playerbase (100+ players online).I'm very social person,but I can be very serious when I am assisting players/users.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Gaming
I'm gamer since 2006/2007.I've played a lot games,I like RTS/RPG/MMO Games.I'm very good at gaming,and as stated before,I had my own game servers / communities.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Social Engineering
I have extensive experience with SE. I have good rhetorical skills,I can persuade/manipulate people.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Graphics
I have decent Photoshop,and Paint skills.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Hacking
I'm a greyhat hat.I don't hack to hack,I hack to learn.My definition of Hacking is: Using something in way it's not intended to be used.I always seeking for knowledge,I'm exploiting something,so I can understand it better.Simple,as it is.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Monetization
I'm good with monetizing,I know how to monetize website/page content with different methods such as PPD,PPC,etc.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Coding
I know only two programming languages at the moment,
Pascal and PAWNO.Pascal is very old language,I took 1st place on Pascal Coding Contest with 50 participants.I've learned PAWNO,gaming-oriented language,because I wanted to make my own Game Mode in SAMP.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
BB Code/Thread layout
I have extensive experience with BB Code,and I know how to make thread look good using HTML formatting options.
Tell us why you would be a valuable asset:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
I would be a valuable asset to Legion,because I think that my presence in the group,would increase the group's quality.I want to join the group so I can improve my skills further,I think that joining Legion will be a good learning opportunity.I strive to learn more about Coding/Hacking. Elaborate on your achievements and future goals:
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
My current achievements are that I made some useful tutorials,I also,gave a 5-6 steam accounts in Giveaways section,In future I'm going to expand my skills,and learn more programming languages (probably VB). Tell us about yourself:
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
I'm Wolf,I'm 15.I'm very intelligent,I'm going to Computers (IT) Gymnasium,my school is based on programming,and hardware.After High School,I'm going to IT university.I'm a very social person,I love to share my opinion/thoughts in Lounge section of the forums.I'm trying to help new people,and I think that I'm mature enough to become a Legion Member.I'll need help from skilled people,and Legion seems as a good,experienced group,with skilled people in it.
Thank you for reading my application,
Wolf

Kansas - *September 23, 2013, 9:17 am*
Elaborate on your skillset:
I'm a web developer. I'm fluent in HTML/CSS/PHP/JavaScript/SQL/jQuery/AJAX I can work my way

around a cPanel easily, and I'm good with keeping my scripts tight (security wise).

Tell us why you would be a valuable asset:
I can do anything you need me to do regarding web development, and script security.

Elaborate on your achievements and future goals:
My main achievement in life is teaching myself how to code at my age, instead of being just like all of my other peers and wasting their 'childhood' and/or early adulthood. My future goal (currently in progress) is to design and make a social network that I'll sell licenses for. I don't want it to be anything normal, I want it to be unique and dynamic, kind of like IPB but better.

Tell us about yourself:
My name's George and I'm in highschool. I have a social life but in all honesty I would rather be coding then hanging out with friends, its just how I am. I keep my internet life a secret to all of my real life friends, no one knows about anything I do, I don't really understand why people like to brag about being an individual, e.g. intentionally wearing a shirt to school or work that's of a really emo band and your intentionally making yourself seem stand-offish. I'm unsure about what I really want to do with my life when I have to go into college, I'm just waiting for the right circumstances to pop up telling me what the best thing to do is.

Tell us why you would be a valuable asset: I could provide some servers
Elaborate on your achievements and future goals: I want to be a network security analyst
Tell us about yourself: 17,chill personality,determined

Im gone brah - *September 25, 2013, 10:27 am*

Cmon, are you expecting to get in with a 5 minutes application?, For gods sake put atleast 15 minutes on your application in order to have.. atleast one single chance.

Monte Cristo - *September 25, 2013, 10:36 am*

Elaborate on your skillset:

Gaming:
- Bug abuse
- Hybriding
- Semi-Competitive gaming

Hacking:
- SQLi
- LFi
- Command Injection
- Ability to recognize and comprehend " Hacking " terminology
*To a beginner level, explained below.

Tell us why you would be a valuable asset:
I believe I would be a valuable asset to the group due to the fact that I am a person that is dedicated and hard working yet independent, however I am not afraid to ask for help or learn new knowledge from others.

I am also a perfectionist. I feel that everything needs to be completed to 100% the best that it can be, then I'll set back and look at it and want to make it even better. I strive to push myself and make everything I set my mind to something to be proud of.

I also take the time to make threads helping out the general hacking scene here on HackForums, an example of this is this thread here.

https://hackforums.net/showthread.php?tid=3750530

Elaborate on your achievements and future goals:
The only Achievement that is relative and that I'm proud of is my sticky man award. I have completed anything relevant and hopeful this group will make that change.

My goals are to be able to pass on my " Hacking " knowledge to others and be able to put it to use in later life. I am hoping for a job that requires the knowledge I hope to learn from Legion.
Tell us about yourself:
I was taken under the wing of HackForums member LevelUp aka Aaron, Scott Thomas and Crushed aka KMS at the beginning of June as a summer project, to transform me into one of them. I was getting lessons from each of them on a daily basis and I was able to perform SQLi, LFi and command injection to a moderate level. I was learning so much and I was having so much fun until my laptop broke. I missed out on around 1 and a half months of teaching and my knowledge is

diminishing. I have managed to work out an agreement with my friend to borrow his laptop often until I get my own computer again, and I crave to learn more about hacking in general.

Vouch for Jon Snow', seems knowledgeable and a great asset to Legion.

Good luck getting in.

REEEERRRRE - *September 25, 2013, 5:39 pm*

Okay, let me be truthful with all these applicants. I haven't seen a decent one for a while. I'm not in

the group and I don't plan on applying but the least you can do is take your time. Give it your all because you will NOT make it if you don't. Make videos, show proof, etc. Let them know you are dedicated. Good luck to all.

Dyme??????????? - *September 26, 2013, 2:18 pm*

I use HQ GFX to "stand out"

Elaborate on your skillset:
Networking
I believe that understanding networking is a essential skill to both web based exploitation and machine based exploitation and so i made it a priority to learn networking and understand it fully, i am currently studying Computing Science at a A-Level qualification and so have picked up vital knowledge from that.

Machine Based Exploitation
When i first say this many other people believe that I am simply talking about RAT'ing which would be far from the truth, as soon as i started working on networking i realised there was a whole world of exploitation out there that didn't require either installation of a malicious executable or exploitation through a web server, with a simple nmap and nessus scan you can find a whole variety of information about a system and its holes.

Web Based Exploitation
Obviously on this forum the most well spoken about and popular subject, web based exploitation is one of the most common ways of exploiting a machine, and was one of the first things I learnt about. This allowed me a glimpse into the hacking world and i never looked back, as I said in networking, the key is understanding the system you work with so i soon decided to take my knowledge into PHP, HTML, JS and SQL so that i could not only execute and utilise commands but also understand how and why what i was doing was allowing me to gain entry.

Coding
As mentioned i have learned a few coding languages, one of them being PHP, i would say that the first language i learnt was at a CLI with simple programs in batch at the age of about 13-14, i then moved onto VB.NET which, then realising how high of a level language it was swiftly moved onto C#. this gave me an entry point for C/C++ which i am still currently learning, in the mean time i have learnt a medium level of PHP understanding and Python both i considered essential for web exploitation and machine exploitation, even though Python is still a regularly new language in the scene, in the scale of things.

Tell us why you would be a valuable asset:
Teamwork
I work great in a team/group and love being part of a selection of sub members, i can work well with anyone and even in real life i feel and have been told that i am a out going funny person. i think i can not only contribute a good discussion and debate but also provide intelligent funny dialect for the group.

Help And Knowledge
When I wrote this title I realised how pretentious it sounded and want to explain, i do not under any circumstances thing i would be teaching the Legion members from my infinite fountain of wisdom. I know there are plenty of skilled Legion members who probably have a much higher understanding of hacking and exploitation, however everyone has different skills and strengths and I feel that i can really contribute to Legion members with help whenever i can possible.

Representation
I think that representation of the group is a key thing and one that i would worry about if I was a group owner, so i want to assure you that I will not under any circumstances being bringing the groups name into disrepute. i strive to obtain a good reputation on this forum and help new members in whatever situation instead of screaming at them to use the search function, i believe i can provide high quality information to a member from any walks of life and group on this forum that can keep the group in a good light

Elaborate on your achievements and future goals:
I would say i have very little hacking exploits i would want to boast about on here, i am more of a secretive blackhat or strictly whitehat. It depends on my mood. however as I currently said, I am studying Computer Science and ICT at A-level at my school. In my GCSE result i got an A* for both Computing and ICT and was the highest in my class for Computing, being quite under pressure as very young for my year and in a grammar school I can assure you I am not an overachiever. Getting B's and C's are the norm for me and only in a few subjects will a get an A or above so i think of it as quite and achievement when i get top of my class. For my future goals i would have to put university. I hope to go to the university of Amsterdam where I can study Computational science and agian develop my skills even further. I have spoken to several teachers and ICT specialists in my school and have had definite encouragement from both them and my family. My Uncle is the head ICT Support manager at Ernst and Young, an international multi billion dollar company and I have always looked up to him when thinking about life, coming from a poor background by reading dummies guides to windows 95 and other various things he has worked his way up through the ranks to where he is now, obviously i am not expecting to come out of university and get a job as head IT manager at Cisco but i certainly hope to work for a similar company.

Tell us about yourself:
I think over the course of this application i have revealed certain parts of myself so I think this is a great place to start it off. I am a funny, confident guy who loves computer systems. from a young age i gained an interest in computers and since them have never looked back, as i have said, i am not especially rich and so appreciate the value of money and so do a lot of marketing and PPD etc, I am under no circumstances a genius or any sort of albert einstein however i do feel i have a certain knack for electronic systems which is brought out on these forums, i work hard and perform well under pressure.

Conclusion:
Thanks for reading, i know this was a bit of a long application and may have got a bit boring however i really wanted to get across myself to you and hope i have done so, i thank you for taking the time to review my application and i would like to wish everyone else who applies good luck.

Fer? - *September 26, 2013, 8:14 pm*
Elaborate on your skillset:I have a few skills, including gaming Spoiler (Click to View)I understand this isn't a gaming group but it is one of my skills. I also have a wide variety of knowledge of some odd things due to my spare time, since I try to be versed in many things. Also I know the markets of this forum I try to help people that I can with appraisals and sales threads. I also have a small computer knowledge that I would like to expand on if I joined this group.
Tell us why you would be a valuable asset:I think I could be a valuable asset in time, as I would like to learn as I have stated before. I know small amounts of coding I reviewed it very briefly awhile ago, but I wouldn't bet anything on my skills now. I was also admin of a decent size forum nothing special.
Elaborate on your achievements and future goals:Virtual Life: I hope to become more known on this

site as a trusted member of the community, and someone a new member can come too for help. I try to stay active on here I will be donating a decent amount of money too this site soon no need to say as I find it isn't necessary.
Real Life: I hope to continue in my career on the family company I work at now and someday after doing almost every job here, I hope to be the owner. Hope to be married to my current significant other, with a family when the time is right, no need to rush.
Tell us about yourself:Well I live in the United States, I am 20 years old. Due to me working 60-80 hours a week my life is mainly work and HackForums when I am not busy with other things. I am a printer service technician Spoiler (Click to View) So if anyone needs any help with printers or copiers I'm your man it is a odd job my friends say, due to my job I drive about 35,000-40,000 miles a year so I find my self bored in the car for hours on a daily basis.

I do apologize that there are no graphics in this thread but I am not a graphics person I do not hold any interest or skill in it, so I felt it wouldn't reflect me if I included it. I appreciate the consideration for joining this group and hope I see fit too join in your eyes. Any "Legion" members or any members for that matter who want to message me about this application feel free too.

Spoiler (Click to View)To anyone reading this have a good morning, good evening, or goodnight I thank you for you time.

(Sep 25, 2013 10:36 AM)Jon Snow Wrote: *[CITE]* Spoiler (Click to View)
Elaborate on your skillset:

Gaming:
- Bug abuse
- Hybriding
- Semi-Competitive gaming

Hacking:
- SQLi
- LFi
- Command Injection
- Ability to recognize and comprehend " Hacking " terminology
*To a beginner level, explained below.

Tell us why you would be a valuable asset:
I believe I would be a valuable asset to the group due to the fact that I am a person that is dedicated and hard working yet independent, however I am not afraid to ask for help or learn new knowledge from others.

I am also a perfectionist. I feel that everything needs to be completed to 100% the best that it can be, then I'll set back and look at it and want to make it even better. I strive to push myself and make everything I set my mind to something to be proud of.

I also take the time to make threads helping out the general hacking scene here on HackForums, an example of this is this thread here.

https://hackforums.net/showthread.php?tid=3750530

Elaborate on your achievements and future goals:
The only Achievement that is relative and that I'm proud of is my sticky man award. I have

completed anything relevant and hopeful this group will make that change.

My goals are to be able to pass on my " Hacking " knowledge to others and be able to put it to use in later life. I am hoping for a job that requires the knowledge I hope to learn from Legion.
Tell us about yourself:
I was taken under the wing of HackForums member LevelUp aka Aaron, Scott Thomas and Crushed aka KMS at the beginning of June as a summer project, to transform me into one of them. I was getting lessons from each of them on a daily basis and I was able to perform SQLi, LFi and command injection to a moderate level. I was learning so much and I was having so much fun until my laptop broke. I missed out on around 1 and a half months of teaching and my knowledge is diminishing. I have managed to work out an agreement with my friend to borrow his laptop often until I get my own computer again, and I crave to learn more about hacking in general.

More applications like this would be good :)

lillix - *September 28, 2013, 4:33 pm*
Good luck to users applying. I'm going to message some applicants and see if their application speaks the truth.

Lo?e - *September 28, 2013, 7:55 pm*
Thank you for the opportunity guys?

Elaborate on your skillset

Gaming: Cs 1.6, WoW (Just botted gold on multiple accounts and sold the gold to chinese ppl:P)
Visual: Can use basics of photoshop, can create a simpel website.
Hacking: Im really new to this part, so far I only worked in my own lab, with metasploit, nmap etc...

Tell us why you would be a valuable asset: Im allways reachable, I can help with everything I know anything about.
Elaborate on your achievements and future goals: Since I graduated in networking and security my goal is to be an actual pentester.
So far my achivment goes: Hacking the school and changing my grades. That's it.

Tell us about yourself: Here comes the fun part;)
So as some of you might know Im a stoner, Im allways infront of the computer (almost),even late nights im online working in my lab or trying to do something usefull;)
Im 20 from sweden!

Dseko - *October 5, 2013, 4:58 am*

Elaborate on your skillset:

I will first start telling you which are my skills, and I will tell you more about them.

•Monetizing

I have sold a lot of things on here HF and on other marketplaces. I do like making money so that's why I'm interested in some techniques to get money. Last big time selling thing I did do here on HF was selling 07RS Gold, which made me quite lot money overall. I have been also very trusted on another forums with selling all kind of stuff.
I plan getting bigger selling guy on here too, when I get some nice new idea which would also help community, and help myself.

•Marketing

I have to know this because, like I told you I have sold a lot of things. On another forum I did need to marketing pretty much so I could get my thing more popular and get my things to sold. Marketing has been always pretty easy to me, but interesting.

•Computers (especially hardware of computers)

Just basically I do build/assemble computers hardware together. Then I do a lot of things like help with computer problems, and well I know things about remote access tools.
I also know how to edit videos. I have been very good with that too.
I basically have pretty much knowledge of computer softwares too, and so with that I'm trying to help people here on HF.

•Gaming

I have been gaming for a long time. I do have been playing on many consoles, and just PC: I have been made some content of playing to youtube, and I have received close to 1k subs.
I though closed my channel because I didn't have enough time to do vids, and I didn't feel like doing them anymore. I do have experience of FPS games, MMORPG games and well pretty much every category.
At this moment, I'm playing pretty much GTA V. Also with gaming, I'm trying to help people. So if someone need help with youtube channel, or just help with some gaming stuff he can contact me.

•Coding
I also think that I'm gonna get more in to coding stuff. I don't know yet much about coding, just some basic stuff. I'll plan to study these things on next holidays/vacations when I do have time. Not daily of course, but when I do have time.
I hope that I will maybe get somebody to help me with this thing on Legion.

Tell us why you would be a valuable asset:

I think myself I am valuable asset, because I know a lot of things. I know how to do that, and that, and that and I can also success with a lot of things. Basically with my skill to lot of things I can help people, and so on.
I hope with group I would help more people, and maybe even get some help myself if I need some on some things.

Elaborate on your achievements and future goals:

Like I said before, I wanna learn some coding. I have also sometime now, but I need more time I think and that's why I plan it on next holidays. I would like to get more into real hacking things too. Not just RAT knowledge stuff, but like more stuff which is really not easy to learn.

I would also want to get into Legion, because it has been sometime when I was in last group called "Guardians".

One of my goals too is to get bigger guy in the marketplace, and well in the whole community. That people would know that I do help people, and know that I'm nice and friendly guy.

Tell us about yourself:

I'm friendly guy, whos ready to help people. In public forum, to group forum.

I'm trying to always do the right thing.

I'm always ready to learn something new, and If I really want to learn something, I do that till I do success in it.

I have said this before, but I'm guy who knows a lot of things.

I would want to get Legion so I would get more in to community. I do need to learn some more hacking things, and why not something else too.
I do see myself potential member.

Thanks, and have a great week whole Legion group! ?

rfz777 - *October 5, 2013, 8:03 am*
I'm seeing some nice applications here. Can't wait for the new wave of students =D

Triestri - *October 5, 2013, 8:22 am*
I would like to learn about hacking etc, but I have no experience?

(Oct 5, 2013 08:22 AM)bulleN Wrote: *[CITE]* I would like to learn about hacking etc, but I have no experience?

Legion is here to teach, hence the student position. If you make a worthy application proving you would be determined to learn and not in it just for the userbar you would have a good shot.

~ Regards, Tiki.

Fluxify - *October 6, 2013, 7:26 am*

Elaborate on your skillset:
Basic hacking
I got experience with basic hacking like rats and Keyloggers. I know how to set them up and get them working.
Computers & Technology
I'm currently doing IT at university. I've experience with both software and hardware. I know how to get build a custom PC, fix hardware and software issues. I got really really basic knowledge of Linux.
Virus/Malware removal
I got some knowledge on how to remove viruses/malware and I'm definitely willing to learn more of this within the group.
Gaming
I also enjoy playing games on my Gaming PC or PS3.

Tell us why you would be a valuable asset:
I'm willing to learn and teach other members of the group things that they don't know yet or need help with.

Elaborate on your achievements and future goals:
I got my IT Essentials certification and I'm currently learning for the CCNA certification by Cisco.

Tell us about yourself:
I'm an 18 years old boy from The Netherlands, I'm always willing to learn and help where I can.

Sir Asylum - *October 6, 2013, 9:01 am*

[center]https://i.imgur.com/3FCThgk.png[/center]
Elaborate on your skillset:
I possess excellent PHP knowledge (MVC, OOP, PDO, SINGLETON, DAO, Namespaces), I am familiar with website penetration testing and whitehat website security.

Tell us why you would be a valuable asset:
I would be a valuable asset, because legion specializes in programming and penetration testing.
Since i am very familiar with working on a webserver i know where the potential loopholes might be and where you could find a way to access the server with malicious intent. I have been studying web application security for 2 years now and i would consider myself to be an asset since i can share knowledge with my fellow legion members, if i get accepted into the legion group ofcourse.

Elaborate on your achievements and future goals:
I am currently working for a big company that employs unemployed people. They got hacked like 5 times and didnt knew where the exploit was.
Luckily the company owner's son knew me from school and asked me to help them out, so i took a look at their code and fixed the vulnerability.
They were so happy and grateful. I think thats my biggest archievement so far. In the future i hope to build my own framework like laravel where companies can rapidly develop a secure system without all the hazzle.

Tell us about yourself:
Well my real name is Corniche and i live in the Netherlands. I am 20 years old and i currently study New age multi-media design. (A fancy name for webdevelopment). I really like what i do and i learn something new everyday! I currently own a baby grey redtail parrot who makes those cute noises every minute. Its really fun and your house is never boring anymore. When my study is done, i hope to become the head of development for the company where i currently work at. Thats basicly all i have to say.

Sicarius - *October 6, 2013, 9:52 am*

Elaborate on your skillset:

I can code simple apps in Java, I am still learning and am learning the basic OOP concepts in my book now, I can code a little in Python, made an auto clicker/auto typer etc. I know HTML, even though that's not a skill.

"Hacking" isn't my strong point, I know a little SQLI, I understand the concepts behind it as well as XSS. I can hack wifi(more like skid my way through with aircrack) I can maintain computers, such as removing malware, installing OS's changing hardware, etc. I can build a pc from scratch.

Tell us why you would be a valuable asset:

I am active, co-operative. I like to talk and discuss anything about computers. I like to work as a team and I follow orders well, I like to work in group projects more than anything. I will represent Leigon well around the forum.

Elaborate on your achievements and future goals:

Achievments, well not to sure to be honest. I have finally managed to set myself on Java instead of changing from language to language. Before I would spend a week on 1 language, get bored and try another. Went like that for a year. Now I have finally dedicated myself to learning Java, mainly for the reason of wanting to develop apps for PC's and Android alike, including malware for android.(in the far off future.) I have 1 major goal for the foreseeable future, to be honest: Master Java. If we included my academical goals it would be to get a Masters in software engineering.

Tell us about yourself:

I am Chris from a UK, living in Spain I am 16. I am a straightforward, to the point guy. I tell the truth no matter who it hurts and don't sugar coat everything I say. If I don't like you, I'll tell you there and then. I love learning, especially about computers. I like to play games, mainly MMORPG's, RPG'S and RTS games. I like science, and history. I enjoy chatting with fellow members and having a laugh, and like doing group projects. I have been on HF for a while now, but am not changing my attitude to the forums and the way I use it.

PS: I didn't list any bullshit in the skill section such as gaming just to make my app look longer like most others, people who say gaming is one of their skills are either pretty skill-less or just trying to make their apps look better. Gaming isn't a skill. I also did not list things such as RAT's etc etc because I do not think that is a skill either. Thanks for reviewing my application!
EDIT: I double posted so edited my app to remove the double post.

Im gone brah - *October 6, 2013, 12:58 pm*

(Oct 5, 2013 10:29 PM)Tiki Wrote: *[CITE]*

Legion is here to teach, hence the student position. If you make a worthy application proving you would be determined to learn and not in it just for the userbar you would have a good shot.

~ Regards, Tiki.

What are you exactly able to teach others?

Zapu - *October 7, 2013, 12:10 pm*

(Oct 7, 2013 11:27 AM)mad76e Wrote: *[CITE]* Elaborate on your skillset:

Social Engineering I see myself as a little above average when it comes to Social Engineering. I usually reach my goal with clever manipulation and a touch of intelligence

Generally Hacking I know my way around most of the common hacking tools. Lacking skills in SQL and I have never had any interests in botnets, DDoS (DRDoS) and such. I prefer to use commands in terminals (ex. nmap, airodump-ng, smurf6, hydra etc) and dislikes graphical programs like Fern cracker (I want to do it myself, not by pushing a button).

Coding/scripts I´m ok in bash/Shell/dos and i write my own script if i feel the need to do so. I´m average in HTML coding. I´m terrible at C++ and its here i need to evolve and study more

Skilled within the following areas Wifi - and their weakness / Hacking Wifi
Wifi antennas. Here are my webpage about cantennas. (Sadly written in Swedish language)
http://www.cantennabygge.n.nu/
I wrote a couple of nice tuts about WiFi here in HF, feel free to have a look

Pentesting I know my way around the pentesting area aswell, (scanning, exploiting and deliver a payload) but nothing i want to brag about.

Computing Using Windows 7 but more often i find myself working in linux distros as Ubuntu, Slackware, Backtrack, Xiaopan.

Hardware I build my own computers. I never buy computers at sales!
Tell us why you would be a valuable asset:
I like to help people, and that’s what I have done here since I arrived to Hackforum, i like to continue doing so and at the same time strengthen my own knowledge. One of the best ways to do so is to work in groups. As always i do my best and respect my fellow comrades and give them advice or help when they need it, and by doing so i know that if i if I needed help you will be there for me that's whats it all about!

Elaborate on your achievements and future goals:
I have achieved a lot in my past months on HackForums, I went from a regular user to a member of the group "Brotherhood" and from a regular user --> Ub3r approved in a week, and got my Ub3r three weeks later. I have learned a lot about friendship, trust and generosity. I like to contribute with my knowledge, and sees this opportunity to join Legion as a next step to help the community. The idea is to continue to be a good friend/helper, and slowly but surely becoming the one that others look up to and perhaps to be role model for others

Tell us about yourself:
Well lets call me mad76e, and i live in southern Sweden with my wife and 2 kids (married for 11 years now) Im 36 years old. I have worked a couple of years as an Network Technician and a

Network Communication and Networking architect /specialist in IP telephony both trough 3G /4G networks and modems/lines /routers before i totally changed my workplace. However I started a new job a few weeks ago when I felt I wanted to get away from the stress from the support, but already beginning to regret my choice, so I probably will shortly be back in 1 st or 2 nd line support

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Vouch for mad, this guy knows his shit.

Mr?? - *October 7, 2013, 12:16 pm*

Elaborate on your skillset: PHP/html/Java
Tell us why you would be a valuable asset: I can help members that need that kind of help. i most of the time i do my job that i need to do..
Elaborate on your achievements and future goals: I've created multiple websites for friends/requests and helped alot with setting up servers
Tell us about yourself: When i'm back at home i mostly just go right behind the computer ehm i don't own something like a car etc. etc. only a bus pass and a bike XD. But i just mostly hope i get chosen but there are already about 75 pages so...

Regards,

LeGit

Zapu - *October 7, 2013, 1:03 pm*

Extrnl's Application
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:I'm interested in various things, I am more interested in Networking. I'm fascinated with how networks work and how data is sent and received. Overall networking is my main focus point at the moment(I've learned about TCP/IP protocol, Demultiplexing, Encapsulation, UDP/TCP). I'm also interested in pentesting machines as well. I'm learning about exploiting networks over LAN with pivoting, and exploiting computers ON LAN with ports running vulnerable services. For fun I decided i'd do some website attacks as well, i'm not really good at it but I plan on being good. I plan on learning various types of exploits on various types of servers such as coldfusion. I also want to know how to do RCI, SSI, SQL(xPath, Error, Union, String, Blind etc.) RFI, LFI and CSRF. Also i'd like to be fluent in 1 programming language which would be Python as I find python an interesting language!
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:I think i'd be a valuable asset as I can help other Legion members with problems they don't understand to the best of my ability. I have the hunger for knowledge and to be proefficient in atleast 1 subject which for me is Networking. I want to be the best, but not be arrogant about it. I am always willing to help others, I almost ALWAYS give HQ advice to users in the beginner hacking section such as:

Very long reponse I've given to over 10 people

Another very long response

I also have posted a few tutorials to help new users such as:

How to install OpenVPN on Linux

Ultimate Beginner Hacking Guide for Beginners
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:I've produced various tutorials in the Beginner Hacking Section and I've even held a few

contests and do some giveaways. Here's the list of these:

https://hackforums.net/showthread.php?tid=3789355
https://hackforums.net/showthread.php?tid=3771340
https://hackforums.net/showthread.php?tid=3645883
https://hackforums.net/showthread.php?tid=3506861
https://hackforums.net/showthread.php?tid=3491248
https://hackforums.net/showthread.php?tid=3488835
https://hackforums.net/showthread.php?tid=3422824
I've also given an HF member a 9k facebook page for free.
I've also given money to all members

My future goals are to produce high quality tutorials that all revolve around hacking or something computer related. I want to also know everything about Networking as well.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:My name is Extrnl and I've been interested in computers ever since a young age, I remember if I couldn't go on the computer i'd be really sad because I wanted to play Runescape(haven't played it in over 6 years or so) so everytime I got on the computer i'd be extremely happy. I'm not addicted and dedicate my entire life to it as I have friends and social life, but that doesn't stop me from learning. I read books regarding networking almost everyday as again I strive to be the best. Hopefully you see some potential in myself and I look forward to speaking to you at some time. ?

#R00T~ - *October 7, 2013, 1:36 pm*

Elaborate on your skillset:

eWhoring

I have received great earnings in e-whoring with my own personal methods, I have also written (1) ebook on e-whoring which had great sales.

Gaming

I have taken apart in many competitive teams on both Xbox and PC on games like css cs:go and cod4

Website Hacking and Jacking

I know SQLi and XSS, I am currently becoming aa fluent as I can in both attack methods, I have hacked multiple sites with SQLi gaining admin credentials. I am also currently learning how to Root Servers and hope to learn union and error based SQLi, I can also jack both Xbox and Skype accounts.

Coding

I am a visual basics coder, learning as much as I can before moving onto a more advanced language, I have coded a fully working Email Bomber but hope to code more programs in the future for both myself and to sell, and if I ever get into Legion then I would happily code programs for the group, after visual basics I hope to learn either C++ or Delphi. I really enjoy coding which gives me alot of motivation to learn and improve and become the best at what I love.

Linux

I will not say that I am great at Linux not even good but I have a basic knowledge of Backtrack 5, my step dad is a Linux expert meaning if I ever need Linux or need to learn it then I can always get taught.

Keylogging and RAT's

I have great knowledge of both keyloggers and Rats, when I say knowledge I mean how they work and how to setup to setup, I also have great knowledge in spreading and manipulating people to download my server, I do not RAT or keylog at the moment but if I have did need to then I would be able, I am also very happy to help anyone that need helps with both keyloggers and Rats (remove administration tools)

Whitehat Help

I do not have the greatest knowledge of virus removal but I have helped my dad multiple times with his computer and removing viruses and getting the best Anit Viruses and programs that will boost his computer performance

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:

I think I will be a valuable asset to Legion because I feel I can be very useful in future/current projects and help all users with stuff that they are either learning or would like to learn, I am also a very friendly easy going person, who does not ask questions when told to do something

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:

Hacking

I hope to learn all SQL types and master them, I would also like to master rooting servers via SQLi

Coding

I hope to become a fluent visual basics coder and code as many programs that I can sell and giveaway before learning a new language and then coding more programs to either sell of giveaway

What I hope to code in the future:

Crypter
Keylogger
Anti Virus
(Other related programs)

White Hat

I hope to learn more about the computer system and learn how viruses work and how they are made, I also hope to make my own Anti Virus in the future

Linux

I hope to learn the basics of Linux

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:

I am currently living in the UK and am taking PE, Public Services (Outdoor Ed) and Food for my main subjects, I hope to become a Royal Marine when I am older, I am also studying ICT at school but it is the very basics, stuff that I knew when I was like (6) I end up getting into trouble because I just get so bored so I just talk and play games ?

Thanks For Reading, #B0RNE ?

Alsk - *October 7, 2013, 1:44 pm*

Thanks Tiki! ^-^ ? Would love to meet some members.

Sm1th???? - *October 7, 2013, 9:17 pm*

MrxxMrsSmith's Application
Elaborate on your skill set:
I am a vivid programmer and am very dedicated into what I like to do most. I have had a legitimate education in, Ajax jQuery, PHP, CSS, HTML,SQL and have taught myself Java and Objective-C. I love programming, and I constantly observe the world around me and look for improvement. Throughout my life, I have constantly been an entrepreneur and am good at making Money. I want to be part of Legion so I can release Great products, for Legion, and give Legion a good name in the quality of my products. I am very flexible and am a VERY fast learner. Although I have not really coded in obj C or Java in a LONG time, I can easily go back. My favorite language to code in ATM is PHP. I know a lot about the web in general, and am great at developing and managing web sites.

I also am currently in a digital media class, and am learning to become a much better GFX Artist, although I know how to use PS and I would say I am OK at GFX and overall design. I am always expanding my education and learning new languages, technologies, and methods of achieving certain tasks. I am Always striving to be a better me.

Tell us why you would be a valuable asset:
I constantly thrive and desire to improve the world of technology around me. I always want to make new products and make the marketplace new, Innovative items. I love working with other members, and am much more successful when I do. What I want to do is make you Money and generally improve the quality of legion products all around. One thing I am particularly interested in is improving Legion's Stresser, since I have recently been working on source for my own personal booter. Learning how to take advantage of all of the methods of attack, to me, are very interesting. My work is very professional, and what I make, is always an improvement over my past work.

Although my work is very professional and legit I am very interested in finding vulnerabilities in websites and using JDB's and other spreading methods. I love researching viruses, and spreading techniques, this is what I do most of the time on HF. Gotta say, a lot of late nights. :D

Being in Legion, to me, means being a great member, helping other people out, and Giving you (or us if this is good enough :D) a better reputation in my work and mature behavior around HF. I want to make positive connections with people all over the world, and all around HF, though Legion.

Elaborate on your achievements and future goals:
At the age of 13, I started my own business on Ebay, where I successfully marketed and advertised earning myself over $2,000 selling Custom Xbox Controllers, which I still regard as truly unique. Also, before HF, I worked at http://elance.com where I had a part-time job and earned $100 a week. One challenge I had to overcome to get this job, was competition, and had to participate in a job interview where he tested whether I was suitable for the job; I succeeded.

My MOST recent work is Link Hosting's website, where I, did not design, but coded all of it. Besides WHCMS of course. ?

One thing I have always had a love and passion for is breaking and cracking technology. Making it do things, that it couldn't normally do and making it perform tasks to ME were more valuable that vanilla. Every, some what advance device I have had, has been modded. From my ipod touch, which I developed custom cydia sources for, to my Jailbroken Wii, I love modding things. A reason why I sold controllers, because I always have had a curiosity for technology. Hell, my calculator even has NES Roms on it ?

What I want to achieve while in Legion, is to innovate and improve web-based products all around HF. I love to make things more user friendly, and overall more useful. I am always coming in with ideas to improve current products.

Tell us about yourself:
My name is Mitchell. I am a 14 year old programmer, that is obsessed with technology, and whos favorite pass time is going on HF and Building PC's. ? I have always gone to advanced schools (not private, but magnet). I have a $3,000, (paid for myself) Custom Built and Custom Looped, water cooled PC. I also am 2 years ahead in academics. I currently take Algebra 2, (9th grade). EVER since I got my first game cube, I have tried to crack things. I also love to game. Some of my favorite games to play include: Arma 2, Starcraft 2, and BF3.

My programming career and interest started when I was in the 3rd Grade, or when I was 8 years old. I got an ipod touch, and did everything I could to try and improve it. I quickly jailbroke it, (it wasn't as easy back then). Afterwards I commonly used my computer, and kept on learning. In the 7th grade, my parents bought be a Macbook Pro, which I am still using as I write this ?, I have a PC don't worry. I wanted the Macbook Pro for IOS development. Once I started maturing I grew away from my Xbox and got into PC gaming. My mac wasn't even close to as powerful as it needed to be, so I started a few business. After a year of saving up, I bought a 3770k GTX 680 Gaming PC, which I put together myself. I have found myself to be very hard working. I always strive to get what I want, and get where I want.

Conclusion:
I would absolutely LOVE to be in Legion. I want to be in a group where I can get supported by other members and be more successful. As well as help other members out and positively contribute to the group. I want to have a group of brothers I can collaborate with and learn from. I am always doing something with my life, most of the time coding of course. I hope you can tell I put a lot of effort into making this application the best it could be.

I do realize that my profile might be a bit new to be in Legion, I do spend a lot Time on HF. And even though my profile is new, I have been making products for a long time.

Thank you for reading this application. I really appreciate your time. :)

HeadAndSlinkys - *October 8, 2013, 12:16 pm*
Elaborate on your skillset:

Coding (VB, Prolog, little Ruby and Java)
Law

Tell us why you would be a valuable asset:

I have a very dummies friendly way of explaining problems and solutions. I don't sugar coat situations and get right to the point.
I can remember a great deal of information normal people don't look twice at (think that's properly some sort of medical condition; focusing on the small print)

Elaborate on your achievements and future goals:

Complete my Law degree. Become a political figure you know, the normal stuff.
Tell us about yourself:
I have a passion for everything normal people find boring (coding, reading case studies) and can generally remember a great deal.
While law is my muse my life has evolved around computing; learned intermediate pascal before I was seven; built (helped) my first computer when I was eight.

MysticParadox - *October 8, 2013, 3:29 pm*
Elaborate on your skillset:
I have experience running Minecraft servers. I enjoy playing games such as Minecraft, League of Legends, or Sid Meier's Civilization games. I'm somewhat a people's person and am decent at social engineering. I'm a pretty fast learner and enjoy doing so. I have ventured a tiny bit into SQLI but never got a firm grasp upon it but I might try to learn more about it and become more advanced at it. I have learned a bit of RobotC if that is useful for anything.
Tell us why you would be a valuable asset:
I'm a pretty fast learner, and I believe that quality is important. I might be able to help others if there's something I have that they need help with and I enjoy helping others. Overall, I want to learn as much as possible.
Elaborate on your achievements and future goals:
I don't have a ton of achievements, but I did get pretty amazing scores on my PSAT. I'm taking it again this year to hopefully qualify for the National Merit Award(I think that's what it is). My goals are to learn some programming language, get a tennis scholarship to a good school, get into the best college I can and just see where I can go from there. I'd also like to learn some good ways to make money online and then be able to mentor others. If you do accept me, I'd be able to learn a bit more about monetizing or coding.
Tell us about yourself:
There isn't a ton I haven't mentioned yet. I'm in 11th grade at the moment and really enjoy learning new things. I enjoy computers and I'm on my computer quite a bit. I enjoy making money, but I haven't quite found a method that I am good at. I believe in quality over quantity and always submit my best work. I'm a pretty good learner and I don't quite know why. Some things I just don't forget. I enjoy listening to music, being with friends, and helping others.

Thornzzz - *October 8, 2013, 9:22 pm*
Elaborate on your skillset: Marketing (I used to own 4 Minecraft servers that all made over $1,000 so I know how to balance things, sell things and overall I know what people want) I am a good Spokesmen, I was on the debate club and would speak and debate in my state almost every week so I am very comfortable with others. I am also good with solving problems, I actually had when I was 13 major stress problems (at the point of killing myself) that I dealt with and got threw by coming up with creative/fun ways to get me happy.

Tell us why you would be a valuable asset: Well, I am good at calming others down, running various game servers (Garry's mod, Minecraft, Battle Field etc.) I can fix situations very quickly and I am good under stress and pressure. I have also run various groups/clans on various games/forums so I know how I should act and what is expected of me.

Elaborate on your achievements and future goals:One of my favorite personal goal was earning my

black belt in American karate at the age of 15 (Which improved my team work and compatibility with others). Another one of my achievements was being on the honor role the first year of High school taking upper grade classes. Some of my future goals are: Well I wish to be a teacher of some sort when I grow up, I love working with people and children. I also want to get a bachelor degree in computer technology.

Tell us about yourself: I am 17, Male, and live in Illinois. I am a very hard worker, I excel at all my classes. I wish to attend the University of Ohio. I am a very open person I like it when people talk to me so I can help them and solve their problems. I am a overall good person in general and I love helping others and the community!

muzzy. - *October 8, 2013, 9:26 pm*

(Oct 8, 2013 09:26 PM)Rogue? Wrote: [CITE] My vouch goes to this user, and he is 100% legitimate. He would be a fantastic addition to the group.
Funny considering he said absolutely nothing regarding "hacking".

Cubus - *October 9, 2013, 11:53 am*

Elaborate on your skillset:
Social engineering:
I do this for a pretty long time now. I don't have much luck doing it but still I'm a little bit expierenced with this.

Graphics:
I'm learning graphics hope I would be able to teach if I get in the group, from some designers. Other then that, I've done one web-design and people told me I had to do more, It wasn't that good but there opinions

E-whoring:
This is the thing where I'm good at, I've been doing this for 5 month's now, And I earn a decent amount everyday, Altough I won't spend it on virtual stuff, Using it for my car, gas, house, food.

Tell us why you would be a valuable asset:
I'm a very chilled person, I can give things to the group, Easy to handle, I pretty much do anything that is asked I have to do as long if I agree to do it; I used to be a online worker for somebody paid me really good but then he ignored me.

Elaborate on your achievements and future goals:
My future goal is to become Ranked approved programmer, there is a place near my house and there you can apply for programming and things related to technology, I've been there as a student, and then I heard that I got approved, I'm offical a programmer, waiting till I get a higher rank and be able to teach other students/trial students.

Tell us about yourself:
Well I'm Jason, nice to meet you, I'm Programmer. Altough I don't do it much only in the acedemy, I teach soccer to kids of - 13/14. I follow program lessons, And I do graphics, Digital art, I bought some online classes, that I have to do tomorrow also. Dope lessons.

This was my application, thanks for viewing mine.

D?AKE - *October 9, 2013, 12:25 pm*

Elaborate on your skillset:
eWhoring- I have made around $400-$600 doing this, with very minimum efforts.

PPD/CPA- I have made around $1,500 on file-ice, and around $700 on AWM

Gaming- I have almost every game you can think of, and I am very good at video games.

Strongest Skill- Would have to be convincing people, I can get people to go against things that they believe in due to my communication skills.
Tell us why you would be a valuable asset:
I could help a lot of dedicated people in the group earn money like I do. I can put up a few of my private PPD/CPA methods that work very good and can help everyone start to earn.

I am a PRO at ranking youtube videos, I can teach some people how to get first page very easily.
Elaborate on your achievements and future goals:
Achievements:
- 5k+ just on the internet
- Held a real job
- Applied for the army, scored well on the test and got the job I wanted
- Have been in a 2 year long relationship, and love my girlfriend

Future Goals:
- Come back from the army after my 5 year term
- Become a police man (Good money + benefits)
- Get married, and never divorce.
Tell us about yourself:

Few things:

- I am 18
- I WILL be leaving for the army December 31st
- I am a hard worker always have been
- I workout every single day
- I love to stay up all night and game
- I spend almost every day with my girlfriend
- I have always been involved in sports
- I thought of being a body builder (My lifts are incredible) but chose the army instead.

(Oct 9, 2013 11:41 AM)Chair on Wrote: *[CITE]* Funny considering he said absolutely nothing regarding "hacking".

I might not "hack" but I do work on security development, I help secure certain gaming servers from glitches, dupes, or anything that could harm/destroy the server.

xSpectrex - *October 9, 2013, 3:50 pm*

Elaborate on your skillset:

I have taken many college level computer science, and networking classes. I have an interest in pentesting, network security, social engineering and making money.

Tell us why you would be a valuable asset:

I believe that I would be a valuable asset to your organization because of the following:

-I know the basics of pentesting and want to know more
-I have a subscription to Pentesting Magazine that I would be happy to share
-I have made $760 using online methods
-I have basic coding knowledge and an overall idea of how many attacks are carried out
-I can keep calm in rough situations and help others as well.
-I think outside the box and always keep an open mind

Elaborate on your achievements and future goals:

-I have infected a few machines, and cracked many networks through wardriving.
-I have Aced multiple computer science classes and read dozens of books on computer security
-Currently I plan on taking my Networking+ exam in December, and then I want to earn some certifications from Offensive Security.
-I do believe that learning and improving oneself is a never ending struggle, but the benefits are always great and I can always learn more from someone(knowledge is power).

Tell us about yourself:

I just turned 22 and attended Towson University. I have always had an interest in computer security, and try to learn something new when I can. I have a job installing networks and security systems for people who tend to be in the "upper class" and as I mentioned above, Im working on obtaining some certifications.

I thank you for your time and consideration, and look forward to hearing from you in the near future.

Rude? All I mentioned was that he didn't mention anything regarding "hacking" in his application for a "hacking" group. I don't see how that's an irrational or rude remark but hey, if you say so then you must be right.

Krew - *October 11, 2013, 11:08 am*
Elaborate on your skillset:

Gaming:
I am a active gamer, and I like to play competetive games such as Battlefield 3. I also like to shoot zombies.

Graphics:
I am a 7/10 with graphics. I am able to create my own graphics, ran a few graphics services, and can edit photo's and make them realistic.

Website construction:
Got basic knowledge of PHP, HTML, and making CSS files. I am capable of creating my own websites, starting from coding and getting it online.

I am also really good at gathering personal information from 'anonymous' people on the net.

Tell us why you would be a valuable asset:
I could help a lot of members in the skillsets listed above, give them tips on how to do better, and assist them if needed.

Elaborate on your achievements and future goals:
I think still being on this forum with a 4/10 community and a lot of haters, I think that counts as a big achievement. I could tell you about my real life achievements but I rather keep those to myself ?
My future goal is to learn more.

Tell us about yourself:
I am a 18 year old guy, living in the country where are all DDos-servers are hosted even though NL isn't even bulletproof. I like to do graphics in my spare time, socialize, and game.

Liam™ - *October 11, 2013, 12:00 pm*

Elaborate on your skillset:
Learned PHP
I learn't php/website design at very young age and now still coding this in recent projects or sailing my work on as i go, i have coded booters/billing/ticket systems.

Learned HTML/CSS
I learn't html/css/desgin this basically used for the design and the forms of the site then you combine another framework around it.

Learned Perl
Perl is simple script to learn, created perl ddos script (which im planning to giveaway very shortly) and coded few scripts for my servers to install stuff if i get new servers need the same software.

Learning Delphi
I'm still learning the very basic of this! not much to say here.

Learning C+
I'm still learning the very basic of this! not much to say here.

Can DOX
I have done doxing for certain members on hf (John Herbert and few others)

Can Do Networking
Networking/Servers i have studied for very long time i like the way they function and the way they work, and the way the operating system is used and functioned.

Marketer or Reseller
I can resell products or write high details reviews for products if needed to.

Tell us why you would be a valuable asset:

I would be valuable asset because i would support legion in anyway,
I would share tutorials on networking/doxing/hacking/exploiting, i would also contribute money when needed of course. And a group is good way to make friends online.

Elaborate on your achievements and future goals:

My AchievementsMade over $1k month.
Code over 50 websites in one month
Ran Hosting Company
Helped Users
10+ Giveaways
Upgraded 1 Member
Made Forum
Exploiting few top sites
Dumped a booter db.

My Future GoalsMake Product Line
Get all my GCSE's
Work for several companys
Have Family.
Maybe Make My Own OS.
Be In Legion.

Tell us about yourself:
I live in Untied Kingdom, I take BTEC PE/Business Studies at school, I only go to school to learn and that all i wanna do there. In my spare time i'm browsing hackforums with my tablet or my

computer, if im not out of course.

Kankroc - *October 11, 2013, 7:33 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset: I'm good at using Linux (Ubuntu and Debian/Kali Linux), I am becoming really good at SQL injection. Currently learning Penetration Testing and it is the reason why I want to join Legion. I'm also good with everything related to RAT (I personally don't think this is hacking but it is a skill). I can build computer from parts bought off the internet (Built my own computer). When it comes to coding I am a little bit less proud because I haven't mastered even the easiest language (I know the bases of C# and Java). I know alot about cryptocurrency (BitCoin, LiteCoin, FeatherCoin, etc).
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset: I'm more applying for a position as a student but since even a student can and have to contribute, I'd say if I can help you with anything I listed above, just PM me (or skype, or whatever chat client you're using) [img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals: Since I do not consider any RATing activities as an achievement, I'd say I did a SQL injection on a forum and I got all the username and password (I did this using SQLmap). Now my future goals, I'm going to list them all and how I think I'll reach them. First, learning how to use Metasploit/Nmap/NetCat to break into database, change informations, steal username and password (The whole blackhat thing you see?). I think I can achieve this goal by joining Legion because I'm sure at least one of your member has enough knowledge to teach me this. Second, I want to learn Java programming language from A to Z in order to make my own application for Linux. I don't think I'll achieve this goal by joining Legion since that kind of knowledge is everywhere on the internet and in books (I actually read alot). My third and last goal, would be to make money off the achievement of the precedent two goals. Basically, I want to learn how to turn my knowledge into real $ that I can use. This goal might be reached by joining Legion but since I'm planning to reached the others two before this one, I'm not really thinking about it.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: I'm a 16 year old Canadian boy. I'm born in the french part of the Canada (Quebec). I'm good at school (this may sound unusefull but you asked about my life), in math and science (Chemistery and Physics). I discovered HackForums nearly one year from now and I must say I learned more with it than in 2 years of school (Since I actually learn things at school I can't go higher than 2 years). For the rest, I'm an addicted gamer, when I get into a game (or anything in life) I become obsessive and put an impressive amout of time in it (the things is I can exploit this learn). That's pretty much it , I hope I'll get accepted.

Dialga - *October 11, 2013, 7:34 pm*

I took like 2 hours on my application and never even got a reply.

SiraBots - *October 12, 2013, 2:41 am*

SIRABOTS' APPLICATION
Elaborate on your skillset:
My skillsets are kind of numerous, ranging from application development all the way to philosophy. I'm knowledgeable, mostly, with computers and general sciences, especially astronomy and cosmology, aswell as health regarding the human body. I'm also a very talented artist, and have been hired to develop people's tattoos for them due to my talent. Computer repair, is another. I'm actually quite knowledgeable with computers, and have even been known to aide in bettering their service provided. Kind of brought them to shame unfortunately. I have been into the graphics since I was twelve aswell. I currently follow a study for it and I am quite experienced in this section. I know graphics don't have a lot to do with haijcking and such, but the more realistic a program looks, the more trust you gain. You might check out my workshop here. Together with making graphics, I am creating a dozin of amazing videos on YouTube, I am partnered with Machinima, after previously

being partnered with RPM. You might visit my YouTube channel here.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:
As a logical thinker, I could easily assist members with decisions, financial planning, perhaps some coding help and assist in research for whatever purpose. With zero scam reports, zero negative reputations and not a single LQ post or thread, I think I'd make a rather nice edition to a group with high ranking members. So I feel like I could be a great asset in a couple different ways. - from sales to personal problems, I feel like I could give my all to help in any way.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
I don't have many achievements achieved besides getting into an outstanding group and being active, helping all of them, being interviewed for the HF news and becoming a respected-well known member. My future goals for HF is to purchase my own usergroup in the near future. I hope to be a member of the Legion, that is another goal of mine.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:
I always seem to have free time, I feel that I am able to contribute more to HF than just leading assisting people around on different sections. Therefore I would be more than pleased to help out within this group, Legion.

My name is Sirajuddin, but call me Sira. I am from Drammen, a small city in Norway. I am studying application developer, pretty much just creating, coding and designing websites. I am currently studying HTML, PHP, CSS and in my next school year I will be studying Java - and much more. I have spent most of my spare time developing and scripting a dozin of unique features. Of course, I do have a job besides it. Luckily, my job is not taking much time and I can continue contribute my assistance and knowledge on Hack Forums. I am online almost twenty hours, I always cruise around to check if there is anyone seeking for help. I think this is one of the main reasons of why I am useful and a good additional in the group.
In my eyes, the group plays a big role in the community. I pretty much just want to help the community, help the group. This is why I have applied to become a member of Legion. I have therefore read more about the group and I think this might be the best way for me to show what I am made of.
My good skills and properties are that I am polite to everybody. Luckily, I am never angry, not to anyone. Most of the time, I just laugh at the situation and step aside from it. I am also willing to help where I can help, such as helping new players, give them some information and facts about this community, and so on. I do have one down point, which is that I am disinterested fast. I want to do something. I can not just sit on a chair doing nothing, which I actually am doing in-real life. If you assign me a job to do, I will do it.
To go in further on that, I am always doing my job as best as I can. If I do something wrong, tell me, and I will correct it. As I wrote above, I am a quick learner and I do in fact learn from my mistakes. Not everybody does that.

I am, in my own eyes, a responsible person. I accept the punishment for my reprehensible actions and I will acquiesce it if I made a wrong move. This is something not everybody does. Further into that, I will accomplish whatever I have to achieve, especially if I have started doing it. I do not mind to spend some extra time on getting it accomplished, as long as I get it finished. You can say that I am a fairly hard worker. I think this is one of the other reasons of why I should be a part of the team.

Everything in a nutshell:
- I am active and willing to contribute.
- I am coding HTML, PHP and CSS.
- I am a quick learner.
- I have a fair amount of spare time.
- I will do whatever I am told to do.
- I will put one hundred percent of effort in everything I am doing and everything I am going to do.

- I want to help people, so being a part of the group allows me accomplish my target.
- I am a dedicated person.

Lmao. I never said anything about how impressive it may or may not have been. All I said was that it was published. Why so much salt? I don't even know you..Chill bruh

ctrlaltdestroy_ - *October 13, 2013, 10:52 pm*

Elaborate on your skillset:

I am fluent in C (89/99) and x86 assembly. I have a fair amount of experience in reveng, mainly from gamehacking, and some cracking. I primarily focus on Windows development, although I know the cstdlib well enough to be cross-platform if I need to. I also know the typical quirks/patterns/low level shit asosciated with reveng/c/c++. I've never taken any classes at school for programming (short of a Java course I'm taking atm ? makes me want to shoot myself), so my coding style may be a little unconventional, but it's readable and effective.

Tell us why you would be a valuable asset:

My skillset isn't exactly broad, but it's precise and works. I also idle on irc a fair amount of the time so I'm active and able to share. Also, I'm not 12.

Elaborate on your achievements and future goals:

I've written a modular PE loader, hooking library, a junk code generator, a packer implementing aforementioned PE loader, and a shitton of other projects of varying complexity and interest to people other than me.

As for future goals, who knows? I plan to start attending college within the next year, and plan to go into cs. I'll start selling said packer here on HF when I get around to purchasing l33t. Chill on irc, gain knowledge, write some tutorials before I leave the scene. Typical stuff. I am rather interested in starting to learn python, however, as soon as I can find a decently cheap book (I lurve dat paper feel), due to neither c nor asm being suitable for many projects I'm going to encounter in a professional environment, and I want a prototyping language. Hmm, that or perl/ruby.

Tell us about yourself:

I'm an ~18 year old student that took up programming as a hobby back in winter 2010 to provide a deployment method for gamehacking mods, then spent two years learning reveng and programming from various online tutorials, irc chats, and just general hacking around. I'm interested in malware analysis, but in general I'd rather chat on irc and work in the quiet lulls.

Orbit. - *October 15, 2013, 10:20 am*

Elaborate on your skillset:
I am a RAT/Keylogger/Botnet expert, Malware removal expert, some good batch knowledge, some good VB.Net knowledge, some good Java knowledge, experience in network security and IT computer repair.

Tell us why you would be a valuable asset:
I would be valuable because I am a valuable person, very friendly, helpful and easy going, treat me the same way you want to be treated as I do the same etc.

Tell us about yourself:

I work part time and have graduated high school. I am working to support my family as well as supporting myself to go to college or university. Most if not all sales profits I am making are going towards investments for other business opportunities or straight directly into my school funds or lively bills I pay monthly.

I am straight forward business, no surprise, no catches. Just business and loyalty.
I appreciate you reading my application. Good luck to all applicants. Have fun!

Very HQ group! Thank you again Anonymous

1nf3c7 - *October 18, 2013, 10:24 am*

Elaborate on your skillset:Remote Administrators Tools, Keyloggers: I'm very familiar with RATS It were all where I started, I know how to set It up port forward and so on all needs to get an RAT working. I got knowledges about how I can spread my RAT and how I can get many slaves connected. I can help people with many Issues that might have problem with there RAT I often can resolve the problem and give them a correct answer of what the problem Is and help them solve It. I have also used keyloggers before I got Into RATS I found It much easier and does not need port forwarding when I had no knowledge about RATS In that time but then I switched aand found It to have a lot more features by using an RAT.

Social Engineering: I like to SE stuff and I often success, I've successfully SE'd more than 5 Items and I find It easy It's all If you read about the product you are willing to SE before starting and start with small things and then go up to the big.

Graphics: I'm not the best at graphics, but I well can use It and make myself many stuff I use Photoshop CS6 to make myself a thread design and request stuff by friends, I focus on the thing and think how sweet It will look before doing It takes a few hours till I'm done but at the end It going to be looking In a good colors and so on.

Monetizing: I well know how I can get downloads and even clicks such as PPD and PPC, I'm good with making good niches and to make them look legit.

Coding: I have been coding for years now, I've been doing web based coding In 1 and half year now and I success to design a website.

I also know how to code In VB.NET which Is programs coding, I know what codes mean and I take my time to learn new stuff that I've not knew by looking It up and following the tutorial and etc I'm not the best at that language but I can still follow an tutorial and understand codes and I can code a few stuff without following some steps.

E-Whoring: I find that eWhoring Is very easy, first you need to take control over the person and get him Into the Interests, I've earned a few money from eWhoring and always success to complete.

Gaming: I like to game with friends, I play games only on Xbox I'm not a such fan of PC gaming. I have fun and enjoy myself playing with friends and talking to each other.

Virus, Malware Removal: I can pull up where the exact virus Is located and know what for Infection It has and what It actually does and as well success to remove It.

Tell us why you would be a valuable asset:

I have some knowledges that I think meets the requirments of the group I also think that I would be a good member In the group, I love to help and teach others and learn from others too.

Elaborate on your achievements and future goals:

I like for my feature goal to be a succesfully programmer and got a lot of knowledges of that, Including having a place In the group Legion to learn and teach.

Tell us about yourself:

I like stuff that gets me busy, always keeping doing something I have much Interests Into coding which keeps me busy. I game sometimes with friends and have fun talking to each other. SE'ing Is also something that keeps me busy Including eWhoring I'm kind of chilling while doing both of these. And I also like to help and learn Including learning from mistakes.

I'm happy that I meet all the requirments to be able to apply, thank you for reading my application took me some time to write It all. I hope to hear from you soon!

Jacob Baker - *October 18, 2013, 3:52 pm*

Elaborate on your skillset: I have no skillsets, I wish to enroll in the student program and develop some.

Tell us why you would be a valuable asset: I think you could make me into a valuable asset because I am a fast learner and willing to get my hands dirty.

Elaborate on your achievements and future goals: I want to have 10,000 posts and 2,000 rep on HF

and make $10,000 online.
Tell us about yourself: My name is AJ I like to play on my computer when I'm not practicing for choir or other activities and I think I would be a good fit because I am a fast learner.

xSpectrex - *October 20, 2013, 6:08 pm*
Elaborate on your skillset:

I have taken many college level computer science, and networking classes. I have an interest in pentesting, network security, social engineering and making money.

Tell us why you would be a valuable asset:

I believe that I would be a valuable asset to your organization because of the following:

-I know the basics of pentesting and want to know more
-I have a subscription to Pentesting Magazine that I would be happy to share(just follow the link in my sig)
-I have made $760 using online methods
-I have basic coding knowledge and an overall idea of how many attacks are carried out
-I can keep calm in rough situations and help others as well.
-I think outside the box and always keep an open mind
-Im a determined individual who strives to better myself.
Elaborate on your achievements and future goals:

-I have infected a few machines, and cracked many networks through wardriving.
-I have Aced multiple computer science classes and read dozens of books on computer security
-Currently I plan on taking my Networking+ exam in December, and then I want to earn some certifications from Offensive Security.
-I do believe that learning and improving oneself is a never ending struggle, but the benefits are always great and I can always learn more from someone(knowledge is power).

Tell us about yourself:

I just turned 22 and attended Towson University. I have always had an interest in computer security, and try to learn something new when I can. I have a job installing networks and security systems for people who tend to be in the "upper class" and as I mentioned above, Im working on obtaining some certifications.

I thank you for your time and consideration, and look forward to hearing from you in the near future.

Vince - *October 20, 2013, 7:38 pm*
Elaborate on your skillset: Website Security/Exploitation: Intermediate
Social Engineering: Intermediate
Coding: Intermediate
I recently have been teaming up and learning from people outside of hack forums in terms of coding and hacking. It has allowed me to gain a more knowledge and allow me to re apply to the group. I have managed to learn advanced basics of sql injection, 0days, LFI and RFI as well as basic security tactics.
Tell us why you would be a valuable asset: To be honest, there is not much I could be asset wise. I can be mature, persistent and understanding. I am never mean towards members and try to hold myself to a higher standard.
Elaborate on your achievements and future goals:
My future goals are to learn and develop a skillset that will help me start a career to build my life

upon. I don't want to go into this huge story because I know A.)Its a long, boring, drawn out thing to read. and B.) There is only a few goals I have set, and I told you the most important one.
Tell us about yourself: I am a 23 year old father of 2. 1 4 year old and 1 soon to be born. I am a high school graduate looking to get back into school and to learn something new that I could make a career out of. I do not know what else I could really tell you that you would be interested in besides that.

I am mainly applying as a student to learn off the basis of what I have already learned. I have freed up my schedule and prior commitments to allow me to reapply and put forth effort into the group.

Understalker - *October 20, 2013, 7:41 pm*
The group is of high quality, I'd recommend everyone to put effort into their applications instead of posting an application that will never be accepted. Do not lie on your applications, you will just end up being denied instantly along with a possible blacklist from the group.

Dallas Cowboys - *October 20, 2013, 8:37 pm*
Dallas Cowboys application
Elaborate on your skillset: Currently, I know HTML, but I want to expand on my learning by finding vulnerabilities of different infrastructures among the Web. I have always been interested in finding exploits, but my skills have limited me. That is why I want to join legion so I can improve my current skills. I have made several forums, and have admittedly, gotten good at managing forums/websites.

Tell us why you would be a valuable asset: I think I could be a valuable asset through helping members, possibly creating guides and doing giveaways in the legion subforum. I love helping people that are new to hacking. I also love working as a team and hope I can meet some awesome people in legion. I do help desks all the time to help new members and so far I've helped a bunch of new members learn to rat, and just learn whatever I have knowledge in.

Elaborate on your achievements and future goals: When I was 16 I joined hack forums and learned to successfully Rat and manage websites. I want to use Other legion members as a tool to expand my learning to code PHP and java. I made my first dollar by selling a eBook, and hope to make a stresser soon. When I used to own a ps3 I jail broke it and started my own lobbies on modern warfare 2. I got paid those $20 play station cards and when the patch came everyone couldn't host them anymore. I went into a custom lobby and when I started it I was still playing on my patch and realized I could still host. I wasn't able to change the patch because they patched the software that you had to have to be able to change the patch. I eventually made a bunch of money though this.

Tell us about yourself: My name is Andrew and I'm 17 currently in high school. I live on the eastern part of the united states and love to watch american football.
My favorite football team is the Dallas cowboys, and that's why I've chosen to put my name what it is. After high school I plan on studying criminal justice and obtain my associates degree. When I turn 21 I plan on joining my local county police station as a county cop and eventually move my way up. I also love to play x box and my favorite games are grand theft auto 5 and halo 3. When I was a kid I loved to play this game called runescape. I was addicted to it for almost 10 years!

Pillows - *October 20, 2013, 10:43 pm*
Elaborate on your skillset: I am experienced in XSS but my minor skillsets are in SQLi, RFI, LFI, and other exploits that can be in PHP coding. I have experience in how to fix some vulnerabilities in code and I have knowledge in how to code as well. This includes JS, Python, and PHP.
Tell us why you would be a valuable asset: I would be a valuable asset because I already have some background in security and I have knowledge in programming.
Elaborate on your achievements and future goals: The only achievements I have been most proud of are having been listed in Apple's, Microsoft's, and Adobe's hall of fame. I once had a vulnerability

for Google but I reported it too late.
Tell us about yourself: I graduated high school recently (gives you a hint at my age) and I have background in programming plus security. Sometimes when I'm bored I either do my homework, research coding or security, or just play games.

Hern - *October 22, 2013, 4:29 am*
Elaborate on your skillset:

Social Engineering I have experience with social engineering through exploiting large businesses to give me products and money. Some may say that social engineering is not hacking but it is classified as passive reconnaissance and can be the first step in ethical hacking.

Generally Hacking I am still learning so currently use more GUI type programs such as zenmap instead of nmap ect. In the future I want to be able to use command prompts more effectively.

Skilled within the following areas Xbox exploitations throughout the years.
Social engineering
Finding open ports and using tools in back track or Kali Linux to search for specific vulnerabilities for the given OS in question.
Have used wireshark and simple programs from time to time and am familiar with them.
Graduating with a bachelor's in Network Security in the Spring and am looking to get certified for CCNA and A+ Security at first and down the road get my CISSP.

Pentesting I have recently been learning about the ethical pentesting steps so I know the process and what needs to be done but every situation is different per target and I know I have much to learn still. When dealing with XP no service packs I know it is simple to gain access but could always use more techniques and then when dealing with newer operating systems I would love to learn more private exploits since it seems very difficult to gain access to Windows 8.

Computing My main computer is run on Windows 8 but I have VMWare that runs Kali Linux, Ubuntu, and Backtrack and I am getting more familiar with all of the VM's because I know how powerful they can be.

Hardware I have built my computer about a year and a half ago and plan on upgrading it in the near future. I have pretty good knowledge about all the hardware in a computer. Here is my specs to give a rough idea what I had built.
I also have knowledge with routers, switches, and hubs. Most experience with routers though and can usually be blindfolded in the router configurations to setup a more secure and proper network for home networks anyway.

Tell us why you would be a valuable asset:
I am not currently in a group in Hackforums and have never had interest in any because I felt I would not be dedicated and active. This group is exactly what I have been looking for because I am in need of a learning environment and this group has similar interests. Once I learn more from the group I can be very helpful and a good teacher. I could easily setup skype calls to teach those that may want to learn more but I myself am in need of more knowledge before I can do that and feel comfortable. I am a quick learner but know that when dealing with computers in anyway, problems can go wrong even if you may be doing the right thing. Seeing how I almost am graduated in this field I do not plan on changing it or stop learning about this type of interest because I am in it for the long haul. I do not feel that I have more knowledge than those that have not gone to school for this because it is so easy to teach yourself this type of information on the internet now a days, however, I feel that everyone should have a mindset that you can learn from anyone and to not think you know it all and that is exactly how I am. I know that I have much to learn and just hit the top of an

iceberg for information but I believe I could help those that are in need with some questions as well. As time goes by I will continue learning more and will be able to give back to the group if they were able to help me.

Elaborate on your achievements and future goals:
Achievements that I have done in the past include:
-Club Bing Macro creator (Made thousands upon thousands taking advantage of Microsoft's search reward website, now called Club Bing and no longer exploitable)
Xbox Money Making Schemes Include:
Social engineered one of the first 10 in the world that had "Recon" armor in Halo 3 and sold for a few thousand.
Xbox game Forza money data backup. Along time ago many did not know about creating backup saves for Xbox so I would sell my Forza money on eBay and backup to my save that had the money on my account again. This granted me a few thousand dollars as well.
eWhore - Not proud but when I am in need of money this is the quickest way and only turns me 10% homo :P (Made about $2,500 through this but have not done it in the past year or so)

Tell us about yourself:

They call me Launcher, or Hern. I am 22 years old about to be 23 and I live in Eastern United States. Recently broke up with my girlfriend a few months back and found out it was a huge time waster. Since then I have really been focused on my career and looking back I really was slacking when I was with her taking up my time. That is done and over with and I am pumped to learn all I can about hacking and pentesting in general as well as any other important information. I currently work at home and do radiology transcription work for a few doctors around the states. I am in my last year at a university for Network Security and am looking at getting an internship for an IT security job in the near future or possibly full time job with training ect.
Usual day routine: Sleep, Eat, Class (Network security learning), Work, Gym, Games/Computer learning
Tend to go on websites such as HF at night time EST around 10pm-4am at the moment and if nothing interesting is going on on the sites I game it up on my xbox with some friends.

Thank you for taking the time to read my application and I hope to hear from you in the near future.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

FilmGuy - *October 22, 2013, 7:14 am*
Elaborate on your skill set:Technology figuring out how to use it. Math, Business.
Tell us why you would be a valuable asset: I have so far taken 3 years of business school, and enjoy it. I think I can definitely help you with your business side.
Elaborate on your achievements and future goals: My achievements all stem from getting around an obstacle with very little help, Im in foster care so I do this quite a lot. My goals are to go to college and study either computer sciences or business marketing. I think the 2 fields will always have a need in society.
Tell us about yourself:I am a 17 y/o male who is currently in foster care but still living life to the fullest, I am a christian and believe that you can get through anything with faith and guidance. My home life has never been stable but yet I have made it stable myself :) i.e. doing whats best for myself even if its not something I will necessarily enjoy.

ruzylo - *October 23, 2013, 5:16 pm*
Ruzylo's Legion Application
Elaborate on your skillset: Well, Social Engineering is probably the first thing i ever really started to learn, though I have not come near mastering it, I believe that my SE skills are around a

Intermediate level. I know a basic amount of html and css, and sql. I have looked into making my own RAT, though I haven't started do to still learning everything I would need to learn to Develop one. Though I am not very experienced atm in much except Social Engineering, I am still learning anything and everything I can along the way. I'm determined to at one point in my life, become fairly known for a very well used program.

Tell us why you would be a valuable asset: Well, everyone has to start somewhere, I have yet to be in any group. However I'm one of the most motivated and honest people in the world. I am very open minded, and have faith in my success in the future. I have the Financial Status to buy anything and everything I could use to help advance my knowledge. And though not enrolled atm, I will be going to the Community College this coming July for various Computer Science classes.

Elaborate on your achievements and future goals: Well my illegal side: I have taken well over $10,000 worth of items, using the idea of SE into getting information to either steal files someone else has paid for or breaking into bank account's, Social Networks and whatnot. I have developed and ran a very advanced RSPS. And am very good in management type situations which made my rsps go far. My future goals include being well known for creating a program widely used over the internet. Along with in the end working with Google or a Technology company of some sort.

Tell us about yourself: I'm 17. Senior in High School, Live in Southern California, US. And a lot more about my life which I would rather not include. Though I have been a member of Hackforums for awhile (Old accounts) I have never been involved in the communtity until now.

Thank you in advance,
Ruzylo.

.russo - *October 24, 2013, 7:11 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

Web Development
Currently, I've developed or co-developed various sites. My current website, however, is solely known as Netflix Planet. A website essentially based to give out free netflix accounts to those who want one and willing to apply for one. Thus far, I've given out about 2,382 accounts and still have a ton of request in the query. Aside from the netflix planet, I've made sites such as textbarrage, a SMS bomber completely free and also very popular and grew to become a favorite by users on here. I've even considered bring back the website in the future.

https://hackforums.net/showthread.php?tid=3555288 (textbarrage)
https://hackforums.net/showthread.php?tid=3669760 (textbarrage)
http://netflixpla.net // http://netflixplanet.com (netflixplanet)

Leadership
Just like many others, I have more of a leader personality, however still I'm able to know when to be a follower. Outside of HackForums, I participate in many groups that revolve around leadership. For example, I am a Mentor at my High School, a group which takes time out of our day each week and works with the new incoming freshmen assisting them in their transition into High School life. I'm also a card4kids, another program which assists however instead of older, more mature (I'm using that term lightly), we work with elementary students win the school directly next to my high school.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I believe I am valuable asset because I am alike others in many ways, yes, however, I do have other characteristics to set me apart from others. I feel I am proficient in many categories but no matter how skilled I consider myself, I do understand that I have many ways I could improve and learn. My desire to improve and learn is a great attribute to have I've been told and I believe having the ability to proudly say that you're apart of legion is quite an honor.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: As stated above, I look to revive my old successful website, TextBarrage. Due to insufficient funds, I had to shut it down. I've given up a lot, which isn't good, and I really want to work on being able to stick with something. I've never had issues finishing things as I've accomplished a lot, but I do have occurrences in the past where I've given up to easily. Another goal of mine is become valedictorian of my class, currently leading the "race" however another girl is close behind. I strive to achieve in school as well as HackForums and being valedictorian could definitely be an achievement id never forget.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I'm a current High School senior, I'm only 16 however will be 17 in about a month (December 5th). When I was eight, I was in a car crash resulting in major injuries to my right arm, however my mother wasn't as fortunate. So now it's just my younger sister and father, living in Boston, Mass. We moved to Boston from Berkshire over the summer, and quite frankly I love it here. I was placed in a grade ahead of my peers and currently participate in many clubs and groups. I'm student body president, right wing for my hockey team, and play second base and short stop for baseball. I am the current valedictorian "race" leader and also a mentor for elementary school students and also freshmen.

Thank you for reading my app.
(note: I typed this on my phone and plan on revising an grammatical or spelling errors ASAP)

Jacob Baker - *October 24, 2013, 7:16 am*

Elaborate on your skillset: I have the basic trojan skillset(RATing, Keylogging ect.), and I am currently looking into learning a language so I can improve other skillsets that shouldn't be discussed here.
Tell us why you would be a valuable asset: I have a vast knowledge of tricks n tips that would improve your tutorial and guide section to include some very useful things.
Elaborate on your achievements and future goals: I want to become a better hacker and grow with time, I plan to be at this for over 4 Years and I want to fully learn everything I can about hacking.
Tell us about yourself: I strive to be secure and provide professionalism and quality work to anyone I do business with.

kwak - *October 24, 2013, 8:51 am*

Elaborate on your skillset:
I'm an IT engineer developping Android, iOS and Windows 8 apps. I'm also developping websites (PHP, SQL, HTML, CSS) and I've made a bunch of hacking PoC (RATs, Botnets, Crypters and tools).

Tell us why you would be a valuable asset: I can learn a whole programing language in almost a week. I'll try to give my best as a student.
Elaborate on your achievements and future goals: I just coded my own PTC/PPD website in a full

week. I'll try to promote it and make it a valuable one.
Tell us about yourself: I'm 33 years old, working in a major international IT company. I'm earning a nice amount of money every month doing almost anything. I think out of the box to provide the best solution to a problem.

I hope to be accepted in this program as I already know some membres: Noname Fail and MrxxMrsSmith.

Thanks for your interest.

Casey Jones - *October 24, 2013, 4:18 pm*

Elaborate on your skillset:
I am good with networking and server management. I am experienced in ddos migration as well as network stress testing.
I live close to burst net and am actually renting a few U42 racks from them for my off site businesses.

Tell us why you would be a valuable asset:
I always have money to invest into projects as well as resources for web hosting or dedicated servers hosting or anything else really.

Elaborate on your achievements and future goals:
Well I just got approved for ub3r so I'm going to first upgrade then invest in a few hf businesses and try to buy some of them out.
My main goals are to utilize the market as much as i can on this forum. I plan to own a few big online businesses by December.

Tell us about yourself:
Well my name is Casey Jones, I am 21 and I own a few tanning salons in Tampa Florida.
I am currently visiting family that live near Washington DC. As well as hanging with friends from school and so on.
I am a very nice guy. You will probably never see me mad because its just not how I function.

Thanks for your consideration,

Casey Jones

Morrisons - *October 25, 2013, 3:09 am*

Elaborate on your skillset:I am good with Ratting,Crypting,Minecraft,Plugins,Marketplace and im looking to start earning some cash and i have tried many booters on the hackforums market and have been around since 2011 i have seen hackforums change alot but i have never tried to get into any type of group, and i think this would be a a good chance, i use to know lua but that was 2 year's ago and i forgot haha.

Tell us why you would be a valuable asset: I would be a valuable asset cause im starting to make cash online and i stay HQ at all moments and i would invest into legion product's or anything legion is recruting

Elaborate on your achievements and future goals:Earning cash online getting a fair decent amount and learning about botnets and other type of hackforum features also trying to get accepted as UB3R

Tell us about yourself: Im Jake and im a mature 14 year old and i like anything to do with ratting,botnet's and anything that seems very fun, i also like making project's that can turn out to get some good cash i hang out on hackforum's alot and make alot of friends on here.

Puppeteer - *October 25, 2013, 7:42 am*

ELABORATE ON YOUR SKILLSET:

Social Engineering

I've always been good at talking and writing. I have the ability to be well accepted in a new group, I study and perfectly fit the role. I can understand and comprehend my target as well as I'm able to persuade and change people mind. I can be the speaker and can switch to one of the listeners effortlessly... and that helps me to know what is attractive to the people and what is not.

Coding

I've always been fascinated by the programming field. Back when I was younger I studied pascal, Visual Basic, C++ but I unfortunately dropped everything for gaming and don't really remember much of them. I think, anyways, I'm mind-oriented to these kind of things, I now know a little of obj-c and currently learning php. Will then pickup phyton but it could change to anything I need/find interesting.

Typing

As it's one of my tasks at job place, I'm a fast and accurate typer. This comes pretty useful during transcription/live translations.

2D/3D parametric drawing.

As it's another one of my tasks at job place, I master parametric design programs, both 2D and 3D.

Photo/Video editing.

As it's another one of my tasks at job place(yes I have many), I can also edit pics and videos. I'm not talking about AE. I've had little experience with design and vectorial drawing.

Music playing.

This one isn't a task! Always been into music, I play guitar and piano and can use programs such FL studio, logic studio and similar.

Firmness

I consider it a skill. I'm determined and a hard worker. When I have a goal, I reach it and do everything to succeed.

Weird mind.

Yep, sometimes it kinda surprises me. I don't think in a straight line, it's actually the last choice for me. I'm always thinking on other ways, other methods and new stuff.

TELL US WHY YOU WOULD BE A VALUABLE ASSET:

Loyalty.

If you, like me, can't trust anyone apart from yourself, then you will find the best partner you ever had. For what it counts, said by one internet person, I think to be the most confidential and loyal person in the world. I never overstimate myself, I hate who does it, but you can trust pBit more than you would trust your own mother. This doesn't make me naive: whenever I find a betrayer I will crush it with everything I can.

Hard-working.

I put all myself in my duties and I'm a hungry and a dedicated student.

Respect.
I, unlikely most of the people today, know what respect is. You won't worry about my attitude/behavior.

ELABORATE ON YOUR ACHIEVEMENTS AND FUTURE GOALS:
I don't lie when I say I'll be rich, and my idea of "being rich" is quite demanding. Even if I'm not that experienced in internet marketing (still need some stuff to properly start my way), I'm an entrepreneur IRL and my mind is constantly looking for more ways, therefore I got the attitude.

Another goal is becoming one of the "Illuminati", can't wish more.

Also, I won't stop until I'm sated with coding languages.

TELL US ABOUT YOURSELF:
I'm a 21y guy, apparently normal, with a not normal mind. Don't get me wrong, I just think that the way my mind works isn't like the common user. There's always another way, and if I can't find it, I will make it.
Back to a normal discussion, I know my limits and won't lie about what I can do and what I cannot. If my knowledge isn't enough, be sure I will come back with more someday.
English is not my native language but I think I can understand pretty much everything, I know I make some mistakes here and there but will always get better!
Best regards!

JavaProphet - *October 25, 2013, 5:29 pm*
Elaborate on your skillset: I have most of my fun in Java, I dabble in PHP, .NET, and I dabble in C/C++/ASM. I'm trying my hardest to master photoshop, but I'm having trouble with creativity. I like networking, game design, cryptography. In the physical world, I like playing with electronics, mechanical things, etc... but I don't do that much anymore.
Tell us why you would be a valuable asset: I like to help people, and be a part of the Java community, and I'm interested in seeing what the hype about groups is. Why would I be an asset? Well, I don't know if I'm an asset, now do I?
Elaborate on your achievements and future goals: I have been working on a MITM attack tool, hopefully able to intercept HTTPS security, as well as decode, parse, display HTTP/HTTPS. It supports any range of protocols and ports, proxies, etc. I have been studying 3D game development, and hope to make a small 3D voxel indie physics simulator.
Tell us about yourself: I am a thirteen-year-old, turning fourteen near December. I live in California, and my passion is for programming. I have been down my computing path since about 8, when I first played with LUA. Since then, I've played with a plethora of scripting languages, and around my late 9s, moved onto my first programming language, VB.NET. I more or less jumped straight to Java, and hope to someday be inspired to jump to C++.

Addendum: I have no idea what exactly what groups do, I guess a group newbie, but I'd love to try... and hope I am accepted.

Maghbool - *October 25, 2013, 7:32 pm*
Elaborate on your skillset: Linux, bots, irc bots, spreading, networking, computer security, web design, exploiting, ddosing, social engineering, etc.
Tell us why you would be a valuable asset: I'm a skillful person
Elaborate on your achievements and future goals:To become the biggest military commander in history. To own and establish a huge empire.
Tell us about yourself: I am Dunya. You know the rest brother.

?o?p?q - *October 25, 2013, 7:48 pm*

My SkillSet
In the world today, technology has it's benefits and flaws. Most people on the internet use facebook, twitter or another forum of "social" engineering. This was not the same along time ago. But, what goes behind facebook, and how does it operate. Well, I don't work for facebook, but I think I have the required skillset in mind to be able to engineer a piece of work. My skills are listed below.

Networking
I am fluent in C++ and C. I know my way around proxies, VPN's and I know how to setup a private network in minutes. I install my friends routers, and I install my friends Proxies for them. I almost once got into my school router (using simpleton gateway IP's and a RAT for the password and username). I know how servers and networking servers work, and I had a chance to see and work with them

Programming.
I program. I program for fun and for joking around with my friends. I make websites, Mybb and Xenforo mods, and websites/programs. I am fluent in a dozen programming languages (HTML,CSS,PHP, java, javascript, C++, C#, ruby on rails, VB.net, ASP.NET and Python). I sometimes program things for other people and I love the thrill and excitement when I finish a code with no bugs. What a good feeling.

Social Skills.
I am somewhat social. I have a few mates, and we hang out and have fun. I can speak to girls and they can speak back. This may not be a GOOD skill, but it is an important one. For jobs and meetings you must be social to land a good meeting with the boss and not get fired.
Why would I be a valuable asset?.
Well, my skills and my social skills can prove good in this group. I can get along with everyone, no one will start fights with me, I can help out and I will be trustworthy and a good friend to others. I am somewhat good at explaining my ideas, and pretty good at teaching them to others too. My only weakness though is sometimes I take things a bit too seriously which means I obsess over them, and I cant take it off my mind. I can also help out valid members, program new software, debug and test older software, make new version and one day I hope to make my own evolutionary VPN.
My future goals .
Once I graduate highschool, I will be ready to go out to the real world. One of my goals I need is to be able to land a job in programming and server maintenance. I love everything about technology and love programming aswell. My greatest language is either C++, C# or Java. I love those, and they love me. My other goal is to make my first, fully fledge and selling program. I want to create a simple but easy to install forum RAT. Upload it to a forum and it will start ratting the forum. Looking for Database names, passwords and user passwords. These are the goals I want and I would be quite proud once I land these down
About me Im currently 17, and in my last year of highschool. I live in Toronto Canada, and I love to program. School is a big part of my life because an education is everything. I am fortunate to live where I do, because everything is so close to me and I have opportunities for everything. I chose the username Bedrok because it is my pseudo name from when the internet was still young. It has been with me ever since and I use the name for everything. My favorite thing to do is game and program, and I love the internet. My favorite company has to be Google. They are very innovative and consumer friendly.

Decentral - *October 25, 2013, 9:36 pm*

Elaborate on your skillset: I have a lot of experience with Dark Comet (like a lot of people) and I'm a beginner at SQL Injection (Haven't successfully gotten into a My SQL 4 site though, but I'm good at SQL Injection on version 5. I know how to customize and setup a router (ports and all). I'm also a

pretty decent COD player if that's considered a skill.

Tell us why you would be a valuable asset: I'm an active member on Hack Forums even though I'm pretty new I average around 5 posts per day.

Elaborate on your achievements and future goals: I RATTED a lot of people on Runescape before JAG questions then it got to annoying losing out on profit. A future goal I have is to build a successful botnet of over 10,000 slaves. I don't know how hard it would be but any help would be appreciated. :)

Tell us about yourself: I LOVE Football (NFL and NCAA, not soccer) I'm really interested in BlackHat activities. Computers are the most interesting subject to me, they're the only thing I like to learn about except sports.

Prevail. - *October 26, 2013, 12:23 am*

Elaborate on your skillset: Near next to nothing.
Tell us why you would be a valuable asset: I'm honestly just looking for a chance to join this group, as it seems like there are a lot of educated members, and I'd be able to get some guidance on where to start in terms of 'hacking' you could say... or really just figuring out what languages would be best to learn that'd fit my needs, and maybe perhaps some tutorials on these languages in the group discussion forum... I think that joining this group would most likely motivate me into making something of myself.
Elaborate on your achievements and future goals: I don't really have much in the range of achievements... but for my goals I'd love to become proficient at a language or two, and increase my skillset.
Tell us about yourself: I'm a 16 year old kid and I spent most of my time on the PC (recently mainly playing League) but I'm started to get tired of that and I'd really like to do something with my spare time other than sit around playing games. I'm not very self-motivated, although with the support and guidance of other members I'm very likely to advance.

I realize that you guys are most likely looking for more advanced members than myself, but I'd really appreciate the chance of joining the group as I know I'd benefit from it, and I'd definitely try my best to help and support everyone else in the group the best that I could. Just looking to be a student.

ada? - *October 26, 2013, 10:14 am*
Elaborate on your skillset
Cracker (hax0r elite!), can crack steam, origin, spotify, netflix, hulu, you name it..
I've made ~$900 via steam sales.
1st payment, $600 https://i.imgur.com/hw10chu.jpg
2nd payment to come, currently ~$300 https://i.imgur.com/f54mlfd.jpg
I know how how to master adsense via youtube. I've earned ~14000 SEK = ~$2000 over the past year.
https://i.imgur.com/YYreIun.png
https://i.imgur.com/V6k7qr6.png

Skilled in FPS games like counter-strike, battlefield, wasteland, DayZ etc. On PC of course, play FPS on a console? pls I'm not 12 years old.
Tell us why you would be a valuable asset

I could probably learn some people how to do things the right way. Since 99% of HF's users know

absolutly nothing at all. It's ridiculous 90% of all users are like 15 years old and think they're the l33t pr0-master-hacker2k13 and all of them have a botnet with over 100k slaves and to ddos fib.gov is an easy task for them...

Elaborate on your achievements and future goalsMake more money
Learn C++
Learn C
Learn Algebra I
Learn Algebra II
Tell us about yourself

My firstname is Adam and I'm 19 years old. I live in Sweden and like to visit the gym and smoke weed (ye the combo doesn't add up in reality hehe..). I just started studying on the Universite and I'm studying "Master of Science in Computer Security". I'm really looking forward to learn some more complex things in C++ since we just started it's just some basic shit in the beginning as always.

best regards adam.

Other

My warning level is really high atm (I know I'm a hardcore gangsta) and well the majority of the warnings have been because I've broken against the rule "post to pm" which is so fucking ridiculous. I've been giving away accounts to people and I just don't like when my inbox get flooded by messages for free shit.

peace!

??tt - *October 26, 2013, 10:33 am*

Elaborate on your skillset:
I am interested in making money and I am quite good at ewhoring. Overall, I have made around £1300 ($2100). From ewhoring I believe my social engineering skills have improved quite a lot. I am interested in coding and know a bit of python (enough to make simple programs) and I plan to learn a more advanced language in the future. I know a bit about computers and hardware, and have built a few computers.

Tell us why you would be a valuable asset:
I can learn new skills reasonably quickly, and will share any knowledge I have with the rest of the group. I will contribute as much as I can to group projects and will be respectful towards all of the other group members.

Elaborate on your achievements and future goals:Made over $2000 ewhoring
Learnt python
Hope to make more money online, either by ewhoring or any other effective methods
Hope to learn a more advanced programming language such as java or c++
Tell us about yourself:
My name is Matt, as you can probably tell by my username, and I am 16 years old and live in the UK. I study further maths, physics and chemistry at school.

Exhile - *October 26, 2013, 11:45 am*

If this recruitment open still i will defiantly apply for this group hope i get accepted

Kane306 - *October 26, 2013, 3:14 pm*

Elaborate on your skillset:Alright so one of my skills is helping out other people, I enjoy helping out

anyone who asks, I don't really mind how long it takes to help them out and I always try my best when i do, another one of my skills is working with Botnets and RATs, a big skill of mine is the fact I can listen to people and learn quickly, I don't slack off and I enjoy learning new things and meeting new people.
Tell us why you would be a valuable asset: I personally think I'd be an valuable asset because I enjoy helping out people and I am always kind to users, I never cause arguments between people and I do not have an arrogant attitude, I also am very active on my computer from around 6-12 hours a day, so about 8 hours on average, I'm also a very positive person so I would be very sociable around anyone, I also learn things very quickly and I appreciate what I am given.
Elaborate on your achievements and future goals: My achievements are learning a few coding languages, I have and am still studying a bit of web development like jQuery/HTML/CSS and more, I have also coded a few programs in VB.net, I know that isn't much of an accomplishment but at the end of the day at least I have tried something new out and I have enjoyed it. My future goals are to learn more coding languages and become fluent in at least one, another goal is to have successful business on HF, I also wouldn't mind meeting new people and improving on my speech skills in person.
Tell us about yourself: Well my name is Kane, I'm from the UK and I enjoy supporting others and I'm always there for my friends, I enjoy listening to music and watching anime and sometimes playing some games, my favorite music genres are Metal and Old school rap, my favorite artists/bands are Enter Shikari, Deftones and a few rap artists like Souls of mischief and DMX, my favorite anime shows are the Dragon Ball series including Z and GT, I also enjoy Deathnote and Full Metal Panic, my favorite games are the Fallout series and King of Fighters series, I'm always up for new things and I'm optimistic about things so i'm a positive person.

xVulnerable - *October 26, 2013, 4:13 pm*

Elaborate on your skillset: I am very experienced in RATs and Viruses. I know how to remove infections from a computer manually. I enjoy helping users in the Beginner Hacking and RAT sections with their problems regarding to any hacks such as DDOS, RATS, Keyloggers etc..I also know SQLi.
Tell us why you would be a valuable asset: As i am a very active user, i will be a valuable asset because i am a very helpful person, i would create more tutorials on hacking and contribute even more in the sections mentioned above.
Elaborate on your achievements and future goals:My current life goal is to increase my hacking knowledge and become a better hacker. Even the best hacker has more to learn. Also another goal is to build a good reputation on HF.
Tell us about yourself: I am 17 years old,computer addict, very sportive, play soccer and tennis. Being in Legion has always been my hackforums dream. I am currently studying IT (Network) in college. I have a passion for hacking. I discovered the art of hacking a year and a half ago which i fell in love with, which then i found out what Hackforums has to offer which i fell even more in love with hacking. I am a hacking addict.

Thanks for reading my application, i hope you like it.
Regards, .Anon

Fumes - *October 26, 2013, 8:50 pm*

Elaborate on your skillset: I'm not some want to be hacker. I also don't have a major skill set. I'm ok at helping set up rats, etc. I plan on learning Code, ranging from Python to Java. I'm working on it now. I also have little skill with malware removal
Tell us why you would be a valuable asset: Honestly, I'm nothing too special. Just a regular person with a small skill set.
Elaborate on your achievements and future goals: My future goals are to learn various different language of code, and malware removal.
Tell us about yourself: I'm just a kid on hackfourms, who wants people to talk to, and collaborate

with. That is all.

R3callingE3L - *October 27, 2013, 10:53 pm*

Elaborate on your skillset: Well, I am a programmer. I know Java and Python, and am currently working on learning C++ and C#.

Tell us why you would be a valuable asset: I love to learn, and i also love to help. I have a lot of time on my hands and have started to deote that time to helping others.

Elaborate on your achievements and future goals: I have made simple and more complex Java and Pythin programs. Nothing huge. But my future goals are to join or start a project and go from there.

Tell us about yourself: I am a Freshman at the best high school in the state. I love learning and have lots of time on my hands, so i started to code. I take coding classes and am a pretty good student.

Daaksin - *October 28, 2013, 11:12 pm*

Elaborate on your skillset:

I mainly focus on two areas. Penetration Testing and Programming. I have experience with exploit writing and Metasploit usage. I have performed SQL injection attacks manually and have dumped website databases (in an authorized and secure environment, of course). In my programming career I have experienced quite a few different languages and have at least learned the basic idea of each. The total list of languages I have attempted and my progress:C# (Primary - 75-80%)

C++ (Secondary - 20-25%)

Python (Exploit development - 20%)

Java (30-35%)

I regularly attempt new ideas and when they do not work, I will push to find out exactly why.

Tell us why you would be a valuable asset:

I would be a valuable asset because I have experience in multiple areas of the forum, as well as this, I am friendly and agreeable and will avoid a fight at all costs. When I log into Hackforums, I do so with the intention of creating a tutorial or assisting those in need. When requested to do so, I will try my hardest to get something done to the best of my ability. I will also do my best to broadcast discoveries regarding penetration testing or programming (with discretion, of course).

Elaborate on your achievements and future goals:

I have created quite a few different programs for both sides of the programming spectrum. These include: A fully functional (multi client) chat program, text encryption using a custom cipher, multi-threading UDP flooder with a friendly GUI and tiny C++ exploit adaptations in C#. I hope to become an all-around penetration tester. In the near future, I wish to learn the exact process of finding, leveraging and abusing glitches/bugs in any program I become interested in.

Tell us about yourself:

I am currently 23 years old and I live in Australia. I got my first computer when I was 14. I've always been switching between coding and penetration testing when one would get frustrating or boring for whatever reason, but I have never lost sight of these. I'm fascinated at how computers work and communicate and will do almost anything to understand the most complicated of theory and practical aspects.

Flask - *October 29, 2013, 12:03 am*

Elaborate on your skillset:

Coding:

I began coding basic application in Visual Studio a few years ago.

Ever since then, I've attempted to learn several languages to better enhance my coding knowledge.

Gaming:
I've been a console gamer my entire life.
Gaming started for me as a hobby, but has became a very competitive hobby.
I began experimenting with PC gaming a few months ago, and have been hooked ever since.

Graphics:
I consider graphics as one of my many passions.
I've been doing graphic design as a hobby for the past few years, but I constantly try to improve.

Hacking:
Like many users, I started as a noob wanting to simply learn about ddosing.
Once I saw the plethora of tutorials and downloads on the internet, I became hungry for knowledge.
I started researching, and soon began trying everything I could.
I've also met some of my best online friends whilst learning about hacking.

Tell us why you would be a valuable asset:

I think that I'd be a valuable asset because I believe that every person excels at something differently than someone else.
Even if you think you know everything about a subject, someone else may know something more, or in a different way.
I am also very open minded, and I constantly try to learn new things.
I think I can share what I know, and hopefully grow someone else's knowledge, as well as my own.

Elaborate on your achievements and future goals:

Achievements:
• Coded my first application.
• Made my first online check from PPD.
• Defaced my first site.
• Got my first slave.
• Learned how to dox through trial and error.
• Hacked my first Xbox account.
• SE'd my first real gaming desktop.

Future Goals:
• Dive more into the realm of program cracking.
• Learn a few more coding languages.
• Get a job as a coder.
• Create my own game.
• Become fluent in Spanish, and German.
• Learn more about philosophy.
• Join Legion.

Tell us about yourself:

My name is Kyle, I'm 19 years old, and I'm from the United States.
I like hanging out with my friends, and playing video games.
I'm obsessed with philosophical discussion, and always attempt to help anyone in need of assistance.
I thirst for knowledge, and love sharing what I know.

PsychoSexy - *October 29, 2013, 3:01 am*

Elaborate on your skillset:
Coding
I am a professional VB.NET coder. I also specialize in various other programming languages such as C#, C, C++, PHP and more. I have been coding for 8 years. I first started with BASIC and LOGO and worked my way up.
Hacking
Well, I'm here on Hackforums, so I consider myself being a hacker. I'm a blackhat when it comes to hacking. I know a lot of my stuff, from encryption/decryption to botnets and networking.
Graphics
I am also very good with graphics. I have good Photoshop skills and they've helped me a lot through my life and earned me some good money.
Linux
I know almost everything there is to know about Linux.
Fluent English
I have near-perfect English grammar and I consider it a valuable asset to have.

Tell us why you would be a valuable asset:
That's primarily your choice, but I think I could share my knowledge with other group members. I'm a big fan of everything open-source and would like to teach other members, if they want to, about open-source.

Elaborate on your achievements and future goals:
Tough one... Well, I'll just list some that I did and some I expect to do. Learned to code
Learned to design Learned how to speak and write fluent English (not my native tongue)
Mined over $20000 in Bitcoin Written my own Linux distribution

What I wish to do:
Finish college Get a job as a programmer/network admin
Move out of my country
* Join Legion

Tell us about yourself:
I said a lot about me above already...
I'm 18 years old, and I'm from Croatia. I've been coding since I was age 10 and I have really learned a lot in these 8 years. I have been a member of Hackforums since 2009 and have watched this forum change a lot. The mentality of members also changed a lot. It was quite different back in 2009.
Hope you'll enjoy reading this and consider my application. Thank you for reading :)

erik4boss - *October 29, 2013, 4:00 am*

^Very good application, I think this one should be accepted now! Good job ?Parazyd enjoy Legion.

PsychoSexy - *October 29, 2013, 4:42 am*

Thanks, but it's up to Anonymous to accept me...

?rthur - *October 29, 2013, 8:49 am*

Elaborate on your skillset:
I code a lot in PHP with MySQL. I can also code in HTML, CSS and javascript.
Sometimes I code a bit in C# but that isn't my best language to code in.
My partner and I have a game server running which sometimes needs some server administration which I do.
Usually I do things the easy way but when it isn't the best way to do something I don't go for it.
Tell us why you would be a valuable asset:
I can be a teacher for PHP, MySQL, HTML.
I am online much and willing to give out my skype so that you can contact me and get a faster response.
Elaborate on your achievements:
Learned myself how to code PHP.
As stated above I got my own game running.
Future goals:
I would like to learn C, C++ and java, because you can use these languages on multiple platforms which can be very usefull.
Tell us about yourself:
I am still going to school, which takes a lot of time.
Have been kind of freelancing for a couple of years.
Working on a new stresser source because I like to make a source that is secure and way more advanced than most of the source around here are.
I don't like to screw people over and I am trying to help / be nice.

?????Thr????? - *October 29, 2013, 10:16 pm*

Elaborate on your skillset:
To be quite honest, you can look around the forums and notice my skills with native development in C and C++, as well as C#.

Tell us why you would be a valuable asset:
I feel like I deserve more than just being in the default "leet" group here on HF. I feel like I could be a great asset to Legion by giving some advice to the ones who need help with the things I work with every day.

Elaborate on your achievements and future goals:
I honestly have one goal in my life, and that is to run a small security company, with both security software and hardware available to the general public.

Tell us about yourself:
I'm a college student, trying to get my bachelors in IT and Administration. It's quite an interesting and fun life dealing with computers. I really enjoy it and I'm good at it, so why not?
I've been dealing a lot lately with security, especially in Microsoft Windows operating systems. I've been writing a Sandbox application that will help prevent malware infections. The link to the thread containing more information about it is located at:
https://hackforums.net/showthread.php?tid=3830777

Afro Samurai - *October 30, 2013, 1:06 am*

Elaborate on your skillset:

I am good at debating I was the top debater in my state all 4 years of high school
I am good with anything music related as in mixing and perfecting music
I am good with photography and cinematography
I am currently studying business and marketing in my college
Tell us why you would be a valuable asset: I feel as if I could help and get any info or news out through my skillset and help the leaders in the group and I am available at just about anytime of day.

Elaborate on your achievements and future goals: Right now I am wanting to be a News Reporter and as I said before I was the top debater in my high school all 4 years. I want to go to Full Sail University after I am done with community college.
Tell us about yourself: well I am a Musician, Acktivist, Whistleblower and a guy who expresses thoughts on anything really. Give me a topic and I can usually go on for hours about it. I have a passion for keeping the world peaceful with such corrupt rule. I am attending the million masks march on November 5th 2013 and helping out on the Anonmobile with getting the word out the day before. Oh and 1 last thing I have a problem with calling people out on things(working on this currently).

Cyber Chief - *October 30, 2013, 12:37 pm*

SIRABOTS' APPLICATION
Elaborate on your skillset:
I have been tutoring myself quite a bit of SQL injection, and I am starting to get quite good at it, I want to improve my knowledge around this subject as I get rather interested concerning the area of SQLi, which is why I want to join Legion.
I'm currently getting educated as a web-designer, so that's a big up. What I am actually learning is different types of coding, this includes html, C+ and C# Also a bit of Photoshop.
I also know quite a lot about cryptocurrency (BTC, LTC, FeatherCoin, etc.)
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset:
I'm not sure I could tutor people yet, perhaps a little bit in the ratting scenario, but I'm not a master myself in any kind of subjects, I'm joining Legion to extend my knowledge, so in simple words; I'm applying for your 'Student' class.
I do have a skill-set of holding a team together though.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
1, E-whoring / Made around $3500 from E-Whoring in two-three months, which I find quite impressive.
2, PPD / Made around $500 my first month of PPD'ing, I kinda stopped after that mark as I didn't find it 'interesting'
3, CPA / I would like to expand my knowledge in CPA, I find it quite interesting.
4, RAT'ing / I used to RAT a lot, and I became quite successful from it, made quite some money selling bots/mining them.
This is kinda what I am 'proud' of so far, I'm hoping to deepen in and learn far more than I already do.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:
I have a lot of free time, as most of my education can be done from home, which pretty much means I can dedicate a lot of time into studying in Legion as well, and sharing my skillsets with other members inside Legion and regular members too!

I'm a grown man, let's just say in his early 20s. :P
I'm from Denmark, and I have always lived in Denmark. I have always wanted to live in something like the United Kingdom, United States of America or Canada (Pretty much only so I can speak English in a daily language)
I'm currently studying to become a web-designer, so that'll improve my knowledge in different

subjects. (My education will actually take around seven years, damn!)

This is not my GFX job. Sirabots is the maker of this GFX, I just liked a cleaner look of the application, hence I used his GFX, if he wants me to edit his GFX work out, that's totally fine.

Flask - *October 30, 2013, 2:28 pm*

Sorry for being completely off topic but to whoever is in charge of recruiting members, I would just like to point out that this user is an idiot and has open scam reports, moronic posts & lame excuses.

Sorry for crashing the thread and all, just wanted to point this out.

Sid™ - *October 30, 2013, 2:47 pm*

Elaborate on your skillset: My skillset to be honest isn't very big. I took a class on VB in junior year in highschool and a Java class in senior year. I didn't learn much from the Java class since the teacher catered to the people that really didn't know anything about programming. I am starting to self learn now and hope to improve my skills as time goes on.

Tell us why you would be a valuable asset: I am a fast learner and if given time can become a powerful asset for the group! I am willing to learn programming and find it very very interesting. I am also majoring in Computer Science in college!

Elaborate on your achievements and future goals:

Achievements:
Made $2000 using CPA over a period of 4-5 months. Looking to get back into it now and making a longer lasting niche.
Goals:
My future goals are to learn java and then maybe move on to C# and C++. I would also like to maybe move into php and more web based programming languages.

Tell us about yourself: I am an 18 year old, freshman college student. I am going to a community college right now and hoping to transfer to a university. At the moment the classes aren't very hard and I have a lot of free time on my hands.

Brooklyn - *October 30, 2013, 2:53 pm*

Elaborate on your skill set: Honestly i have no skill set at the moment.
Tell us why you would be a valuable asset: I want to learn more about White hat and Computer programming
Elaborate on your achievements and future goals: Currently I'm learning HTML and going to take C+ and C#
Tell us about yourself: Im Brooklyn Im 21 currently trying to get into college for Computer Science trying to learn more about computer programming and White hat material

Thank You for the opportunity - Brooklyn

Jake Miller - *October 30, 2013, 4:01 pm*

Elaborate on your skillset: Well, i'm at the given moment increasing my DOXing skillset, and learning allot about php and html. I'm familiar with hosting (Gameservers and such). I'm fascinated by DOXing mainly as i like to find information and i've been doing it offsite for a long time. Also i'm reading allot about the program backtrack, i would not call it a skillset yet as i'm not sure how everything work on the program and i can't really do much with it as i'm only just begun using it. I'm and big time gamer, i started playing on the Nintendo 360 in a really young age and moved up in consoles as they were released, i've done allot of contributions in the Gaming-subsection (Only WoW).

WoW Guides.
https://hackforums.net/showthread.php?tid=3207737
https://hackforums.net/showthread.php?tid=3206356
https://hackforums.net/showthread.php?tid=3210851

Tell us why you would be a valuable asset: I'm an really active member and i think i know enough about DOX'ing to share about, i can also help the fellow members of the HackForums community out with gameservers and game related stuff. I consider myself as a really funny and direct person, by that i mean i'm not scared to show myself of and come with suggestion / answers even if i'm not sure they're right.

Elaborate on your achievements and future goals: One of my goals is to master the DOXing skill and start learning Perl and assembly. One of my future goals is also to become active in the market-section as i'm fascinated by online-marketing. I'm also really interested in the Backtrack program and i would love to know more about that program.

Tell us about yourself: Well, i'm 20 years old and currently on cooking-school. I'm from Denmark and i'm born and raised here. I started using computers in a really young age but only recently started being interested in hacking and coding. I'm an helpful and contributing soul. I'm really active in the lounge and i'm allot in the beginner hacking section just not posting that much.

B3A - *October 31, 2013, 11:45 am*

My skillset is on coding part. I know html5 and css excelent. You can review me on that
I could be used as a coder in any task you could ask me
I will be a loyal member with the only goal to be recognized in the team
I am a 18 years old student with excelent coding skills, ppd master and moderating plenty of forums at the moment. I am moderating TDP4 aswell

SIM-5561 - *October 31, 2013, 3:27 pm*

Elaborate on your skillset:I'm a forensic analyst who has always been interested in security and networking. I have recently been playing around with exploiting servers in my pen-test lab and found it pretty rewarding e.g metasploit etc. Started on Win95 and have ended up using everything from Crunchbang to Windows 8. I currently do a little python programming.

Tell us why you would be a valuable asset: Not only am I willing to help other people extensively, I learn new stuff every day - literally. I use encase daily, I program often and I pen-test in my free time. I want to be able to expand my knowledge if I wish to become a paid pen-tester and learn from those around me.

Elaborate on your achievements and future goals: I wrote an essay for my university on WPA2 encryption and how WPS pins were potentially vulnerable due to the way in which they were created (breaking down number of brute force attacks from 1mil to just 3000. My thesis then went on to describe threat models and how attackers don't stick to threat models and think outside the box. My thesis was met with praise by my lecturers and really made all the time I spend working and reading about security, worth it. Future goals are to maybe change careers, become a paid pen-tester.

Tell us about yourself: I'm 24, I am a forensic specialist guy with experience of networking, security and a little knowledge of databases. Thanks for reading.

Fishyboo - *October 31, 2013, 8:03 pm*

Elaborate on your skillset: I have, a good solid understanding of PHP & HTML I am learning the master the ways of Centos (Linux Server Distro) I would consider myself as a fairly good sales man. I am a expert when it comes to things like WHM & cPanel
Tell us why you would be a valuable asset: I can, get things done and done properly as long as they are in my skillset.
Elaborate on your achievements and future goals: To become a professional Linux Administrator and a become a successful business man.
Tell us about yourself:
I am the sort of person, that try's hard works hard and never gives up one I set my mind on something I get the job done. I enjoy learning new things and one of reasons I'D like to join this group is so I can learn more.

Thanks!

Do you have to be a hacker to join Legion?

PsychoSexy - *November 1, 2013, 11:10 am*

(Oct 31, 2013 08:40 PM)Arsenios Wrote: *[CITE]* Do you have to be a hacker to join Legion?
This isn't a discussion thread. PM Anonymous with all your questions.

jamesss242 - *November 1, 2013, 7:14 pm*

Elaborate on your skillset: My skillset includes HTML/basic CSS. I am a marketer and seller. I

spend a lot of time contributing to HF and I am also a very good communicator and team leader. I am always interested in helping out anyone with questions about anything, even if I know very little about the subject. I try my best all the time, and I intend to try my best to be a worthy member of Legion.

Tell us why you would be a valuable asset: I would be a valuable asset as like I said above, I am a team leader and I am good at helping new guys. Since there are lots of students entering Legion in a rapid time frame, I am always willing to help out with any questions or concerns they may have.

Elaborate on your achievements and future goals: My achievements include making $5,000 in 26 hours, that's probably my main one. The next on the board would most likely be making $10k total in less than a few months. I don't have many achievements but to me those seem like big ones. As for goals, I strive to be an active, known and helpful member on HF. Another goal is to be apart of a group who can look up to me.

Tell us about yourself: My name is James, I am 17. I have done a lot of work in all different subjects on the internet. Coding, Graphics, Marketing, Niche Sites, GPT sites, Site flipping, etc. My main achievements are usually involving gambling since I consider myself a professional gambler. I have longshot goals but I never give up on them and try to achieve them no matter what it takes.

I hope to get into Legion and give the new guys a hand. I've always wanted to be apart of one of Anon's groups and hopefully this is my time to shine :)

Awakened - *November 1, 2013, 10:49 pm*

Elaborate on your skillset: I started programming when I was 13 a long time ago when AOL was the thing. I started with VB6 and at my peak made notable 'Winsock 'crackers' for ICQ/AOL/AIM and Yahoo. I then started to drift into gaming and slowly let go of programming while I picked up graphic designing. I've contributed a lot of graphics to the forums through various members in PM's and their free graphic threads. Lately I've been programming in PHP/MySQL while doing some refreshing with .NET. I also have a basic knowledge of website exploitation but would really like to continue learning.

Tell us why you would be a valuable asset: I've always been a very helpful person and have never asked for anything in return because I'm in it for the bigger picture. I will be able to provide graphics when needed as well as to continue my development in PHP/.NET alongside furthering my knowledge of exploitation (SQLi/XSS).

Elaborate on your achievements and future goals: I feel like I've provided quite a bit of free graphics to members of the forums. I've never asked for anything nor held others accountable for favors. Also, when I was into the whole defacing phase I made a few flash movies that I was pretty proud of. Here's a thread example that still has a working link!

Tell us about yourself: When I was big into the 'AOL' scene in the late 90's/early 2000's my nickname was Zippo. I started out making simple API programs called 'ccoms'. These were programs where you would just type something like ".advertise" in the chatbox and an OCX would detect that the current user inputted a command. Eventually it went from simple API programs like that to media players and eventually I found Winsock. I really felt like that was the peak of my VB6 experience. Now that I'm a little bit older, 25, I really look back and think about how rewarding it always felt to solve problems on my ow, back when there wasn't massive amounts of forums or free tutorials. I still have that same drive now with a passion to progress in PHP as well as continuing to learn more about website vulnerabilities (SQLi/XSS/LFI/RFI, etc.). I'm really looking to be apart of a group of people that I can not only learn from but to eventually pass on what I know or provide any skill set that I posses!

Thank you very much for the consideration!

Budweiser- - *November 2, 2013, 4:35 am*

Elaborate on your skillset: I have extensive knowledge in the field of Python Coding as well as generalised HTML Scripting to help produce high quality websites, I have also focused my attentions and efforts on SEO and helping users get their websites or YouTube Videos indexed higher with the use of backlinks and Tags to help dominate through saturated markets with repsect to the product/service that they are providing

Tell us why you would be a valuable asset: I am a very mature user and take time dealing with people on a personal basis identifying their strengths and weaknesses and helping them improve from their and finding alternatives to problems which they may have.

Elaborate on your achievements and future goals: Will be Attending University (United Kingdom) to study Accountancy and Finance and then progress to become a chartered accountant,

Tell us about yourself:

My Name is Stefan, 19 Years of age, from the UK, fluent in English as well as having a high level language understanding oh Python as well as Coding as a whole with general syntax, wake up at 5 go to bed at 11 , focus on College work and helping people who approach me for help and spend my time helping them out.

Thank you for reviewing my application today, i hope i can be an asset to the Group.

Kind Regards,

Stefan

papabear550 - *November 2, 2013, 6:29 am*

Elaborate on your skillset:

C Programming - C Language is the very first language that I've ever learned and I've created some sort of funny stuffs into it. They're not that great and I know everyone can also do them but I had fun.

Java Programming - This is the first OOP that I've learned but it's very complicated. I'm still using this and creating form applications using netbeans but I'm not that good.

VB.Net - A major transition and it changed everything that I know and removed my beloved curly braces. It's close to english language and good for Rapid development.

C# - This is my current favorite language right now, I've done network applications, threaded applications, servers, and games into it and some win8 applications.

PHP, MYSQL, HTML,CSS JS - my friends when it comes to web development, I'm a fan of .Net but I love PHP more than ASP, maybe because I've been into PHP since my first year college and the fact that I've developed certain projects with it and it's open source.

GAMING - I've been a gamer by nature. I play games whenever I have spare times because its fun and a good way to release all the stress from school.

Tell us why you would be a valuable asset:

I may not be that valuable but this group will develop me to become a valuable one. I'm very much excited in learning new things and new ideas from other people.

Elaborate on your achievements and future goals:

10 Years from now, I would like to establish my own Software Company and implement security features that I'm going to learn from this group. The company will become one of the well known company in our country and will be recognized globally.

Tell us about yourself:

Just a simple guy who lurks around to learn new stuffs. I eat a lot, laugh and enjoy my life. Looking for some inspirations that could help me design and develop something interesting. I'm flexible and we can discuss any sort of stuffs even adult stuffs! :)
Most at the time I see my self in front of the computer and I guess that's a part of my life that's hard to remove.

Marv48 - *November 2, 2013, 9:19 pm*

Elaborate on your skillset: I am not that good with coding, but I am good with some stuff like DOX'ing, PPD, Rat's, Stressers, and am smart at fixing problems in general.
Tell us why you would be a valuable asset:I would be a valuable asset because I have a wide variety of things I know and can do. I am on the forums anywhere from 3-5 hours a day 7 days a week always posting and helping.
Elaborate on your achievements and future goals:I want to be a decent coder soon, I am learning more and more everyday. I am just a good friendly member all around.
Tell us about yourself:I live on the east coast, I am a teenager not a young and annoying one. I play football and am in class till June, I like to be on the computer and play xbox a lot. I try and do whatever it takes to help members out. I have good rep, no scam reports, and have done multiple giveaways.

SIM-570417 - *November 3, 2013, 12:42 pm*

Elaborate on your skillset: Web developer n programmer, pentester, malware analyzer, reverser(im willing to proof my skills)
Tell us why you would be a valuable asset: im willing to help members and contribute to the community
Elaborate on your achievements and future goals: future goals, just selling
Tell us about yourself: live in europe, 19 years old, not a pc gamer, hobbies are training, football, traveling

Jinying - *November 3, 2013, 12:49 pm*

Elaborate on your skillset:
When i first joined the Hack Forums i was browsing over the forums trying to find some hacking tools and saw that a lot of people had some signatures of e Whore books and i had no clue what it was so i finally found out what it was and i downloaded my self a free vwc pack and setted it up on Many Cam i was so happy about it and decided to tell my friend about e Whoring and started we started to e Whore together we made some money out of it and bought us self some things to upgrade our e Whore skills.
It was a really great begin for me and him we started to gain a lot of money and we are still e Whoring till now.

Proof of some payments:Spoiler (Click to View)

Another skill of mine is gaming.

I love to game with my friends and met a lot of people due gaming first game i got addicted to was GunZ I've played it for a couple years and made it to the top ten with my clan will post a screenshot below.
At the moment i play SA MP what stands for San Andreas Multiplayer I've been a admin on several servers.
I also play on the Play Station 3 i mostly play Fifa or GTA V.

Spoiler (Click to View)This is a screenshot of my clan being in the top 10.

I also have my own You Tube channel with uploaded videos of me playing games i only have SA MP videos uploaded now but will upload other games very soon i just don't know what game(s) yet.
Here is a video of me playing SA MP.

Deathmatching
[Video: http://www.youtube.com/watch?v=8JSRLZPSq8A]

I'm always working to improve my video editing skills and i upload videos daily.
You can see more of these videos on my You Tube channel; MrCho98
Those are three skills of me i'm still learning more things and i Photoshop but i'm not so good at it.

Tell us why you would be a valuable asset:

I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff and try to share my knowledge with people.
I'm an very active forum member and i am always in when it comes to projects with people of the group and will do what it get told to.
I can say of my self that i'm very loyal and dedicated to a group I am hard working and motivated to learn.

Elaborate on your achievements and future goals:
My achievements was making some money and i managed to get lots of money from e Whoring and selling PaySafeCards since i joined the Hack Forums I've been making lots of money.
My future goals are having my own huge gaming community and to find out more methods on how to make more money.
I plan to learn everything about coding and programming that is something what interest me.

Tell us about yourself:
You can say that i am a smart fast learning guy i am fifteen years old and live in the Netherlands.
I enjoy hanging out with friends and making new ones mostly in my free time i am with my friends or i am gaming or learn how to Code and Program.
I am making money on the internet i earn it from e Whoring and doxing my favorite hobby is football i am pretty active and good in it.
I am just like every normal kid you can say ?.

gigabit - *November 4, 2013, 3:23 pm*
Elaborate on your skillset: I do know some Python/php/HTML but it's not much I'm also into computer hardware and I'm thinking about learning pretty much solid VB and test to make an anti-virus which will probably be a simpel but effective software and free.
Tell us why you would be a valuable asset: I like to help members out (atleast try) and share all my

knowledge with them.
Elaborate on your achievements and future goals: Making the anti-virus and learn to code in most language and maybe make some product that the community needs.
Tell us about yourself: My name is Jake, I'm 23 years old, I'm interested in computer hardware and software. I'd like to learn to code in most languages and I'm trying to help people that needs help.

Peter - *November 4, 2013, 4:14 pm*

Elaborate on your skillset:

Monetizing: I currently own a minecraft server network which I take in around $3,000 on average per month. I also engage in some PPD and starting to learn CPA. I haven't got a range of experience as I did entail myself into my minecraft server network, which I will be opening a new one with another HF member soon.

Proof of earnings from around 2 weeks ago. If an updated version is required then please ask:

Server Administration: Dealing with my minecraft for the past 1 year, I have had much experience with dealing on Linux based operating systems. CentOS, Ubuntu and Debian. I understand how to correctly setup all the dependencies and install majority of game servers onto a dedicated server and have it fully functioning.

Marketing: I currently own and operating my own business/service irl. I provide a conveyance service to clients. I also have an Advanced Diploma of Marketing which I obtained on a part-time basis last year while completing my Diploma of Law full-time. I am currently the coordinator of the Marketing Division in Complexity and I am in the Marketing Sector of Innovation. I will also be releasing my Crypter in a few days after bug testing and fixes.

Law: I just completed my first year at Law school which I obtained a Distinction average. I had around 2 credits which I fell short on a distinction. I also currently have my Diploma of Law. I operate a small Legal service to clients (Conveyance) and I will soon be going back to working in a Human Rights Law Firm in December.

Tell us why you would be a valuable asset: I would be a valuable asset to Legion because I have a great foundation within Law and a great understanding of the Law in a general sense. I can provide any legal advice on unqualified standard. I also have a good grasp of the Marketing industry and will be able to provide any analysis to Legion members.

Elaborate on your achievements and future goals: Most definitively my achievements have been admitted into Law school and doing very well at a much younger age compared to everyone there. Having left High School early and obtaining two sets of qualifications that will carry me for the rest of my life. I also obtained Dux of my course when completing my Diploma of Law. I have also played representative sport (Rugby League) on two occasions for District level and at one stage to a state platform where we lost.

Tell us about yourself: I'm 18 years of age and currently reside within Sydney, Australia. Like I have mentioned above, I am a student of Law which I have a great driving passion for. I operate my own Legal Service to clients on a regular basis. During the winter, I play Rugby League as a hobby and relief from the stress that is contained within school. I am a mature and self-driven person and I want to learn everything I can within all my interests.

Nothing much more to say, if you would like to know more, please leave me a pm.

rfz777 - *November 5, 2013, 5:56 am*

Seeing some nice applications, hope to see new recruits soon ?

MFFS - *November 5, 2013, 7:22 am*

Elaborate on your skillset:
I'm good in network security (SQLi,XSS,LFI,RFI...), RAT-ing, WiFi security and E-Whoring. Also i know a little bit about coding (HTML,VB).. few days ago i started learning python.

Tell us why you would be a valuable asset:
I am not the best in anything but surely i could help with categories which i mentioned above.

Elaborate on your achievements and future goals:
My goal in near future is to learn python and become better in network and wifi security and sure keep earning some money with e-whoring.

Tell us about yourself:
My name is Marko, friends call me J0kara and i'm 17 years old.
Free time i'm spending on computer.. actually on HF.
Hope i will be part of this great group.

Meechy Đarko - *November 5, 2013, 3:19 pm*

Elaborate on your skillset:I'm very knowledgeable with botnets and RAT's. I'm extremely good with the hardware side of computers, and relatively good with software.
Tell us why you would be a valuable asset: The reason why I believe I would be valuable to the group is because I'm really good with an assortment of things. I believe I'm quite intelligent; I'm a fast learner and I get a grasp on things very easily.
Elaborate on your achievements and future goals: Well, for achievements; I got through my second year of high school and I'm moving on swimmingly through the third. I finally started to piece together my "Franken-Computer" this year also. That's about it for achievements. For future goals? I want to finish high-school and go to college to be either a auto technician, computer technician, or a therapist. More importantly, I want to get married and have a couple of kids; but I know that always doesn't work out, so my alternate plan is to be a notorious ub3r l33t haker.
Tell us about yourself:Well, I'm a 15 year old boy from 'Merica. I'm currently in my Junior year of high-school. I'm good with computers and working with my hands. People say I'm a good person to talk to because I actually listen. I'm an avid gamer, and I'm currently learning Japanese.

S?mbra - *November 5, 2013, 8:01 pm*

Elaborate on your skillset: When I was 15, I played a game called Mortal Kombat Armageddon. It was for the playstation 2 and the game still had around 100+ people on it. I once saw a man by the alias of BlackBox. His name was black instead of the usual red and he kicked and banned players from the game who broke the rules. I thought that was so neat, to do that from your computer. And so I began to delve into the arts. I started with mIRC chat and went from there, slowly decrypting the passwords and after one full year of failed attempts, I joined the mortal kombat lobby from my PC. From there, I first managed to boot off blackbox using a code I had discovered (Yes, I kicked the moderator out of his Ps2 chat.) and moderated it myself. He never came back. Once, I accidentally pasted a code I was working on into the lobby chat and managed to literally boot off hundreds of people instead of the one person I was trying to kick via private chat.

So I guess you could say i'm a little talented at breaking into things.

A few years later, I began developing programs to absolutely demolish hard drives. That was fun

and all, until I discovered RATs. It got too easy after that.

More recently, I have been into white hat hacking and left behind my old ways. Teaching kids on how to protect their computer from viruses and how to determine if they are under attack. I even gave a speech about it in class one day and was applauded.
Tell us why you would be a valuable asset: I could teach those less knowing of less obvious white hat techniques as well as black hat methods I have learned over the years.
Elaborate on your achievements and future goals: Go to college and secure a better job and future. Learn more about graphic design with the help of my brother who already finished college himself for it. I also plan to try my hand at the white hat game.
Tell us about yourself: I'm currently 18 years old with a part time job. About to finish school and once I do, I plan on going into ethical hacking or graphic design. Perhaps both. I enjoy gaming and have enjoyed anything that ran on electricity since I was 12 and got my first computer. Since then, I built a vastly superior one that I use for my day to day life. I consider myself very mature and generous and will be brutally honest with people.

Ego Inc - *November 6, 2013, 5:26 am*
Elaborate on your skillset:
Coding
I've been programming for many years now. I started in PHP but now fluent in many languages mainly PHP/SQL, C/C++, and bash. I also have some experience in assembler (8086 and ARM) but far from fluent. And I can usually figure out what I need to in other languages when I need to use them.

Networking
For 2 years I took ccna/ccnp classes in networking and cyber security and am aiming at my ccna and ccns certs here in the next month or 2. I work as a Network Administrator for a company called Northrop Grumman. I have my Security+ and Linux+ certs because I had to get them for my job, and within the next 2 years I will have to get my . One of my main duties, as I have many, is security reviews and the hardening of the systems on the development network (mainly linux boxes).

Tell us why you would be a valuable asset:
Because I have a broad knowledge set to contribute with and to share.

Elaborate on your achievements and future goals:
Currently I have my Network+ and my Linux+, and I am working towards getting my ccna and ccns certs here in the near future.

Tell us about yourself:
Ever sense I was about 11 or so I have been fascinated with computers and mechanics in general. I guess you could classify me as a hacker in the original sense of the word as in I LOVED learning how things work and being able to learn about the internal workings of things, to know what made them tick. Always been interested in programming, explained that earlier tho, and now I'm a 3rd year CS major. On a personal level, I love to play guitar and piano, and I love anything that I find challenging in some shape or form really.

Animated - *November 6, 2013, 6:28 am*
Elaborate on your skillset: Social Engineering; i social engineered a lot of e-products before ($10 at a time), i know very little visual basics code. Been doing GFX since i was young.
Tell us why you would be a valuable asset: Because i'm always looking to learn new stuff, and i offer my help to everyone if they want something i can give to them.
Elaborate on your achievements and future goals:I'm looking forward to learn Java, and C++
Tell us about yourself: I'm 16, done Youtube before, had a good gaming channel but gave up on it

after reaching 700 legit subscribers.
i love to do GFX, i'm a lead guitarist and i'd like to join your group.

Thanks

Appro?val - *November 6, 2013, 8:55 am*
Elaborate on your skillset:RAT expert.
Tell us why you would be a valuable asset: I have a lot of idea's regarding RAT's.
Elaborate on your achievements and future goals:I want to make money, and have fun.
Tell us about yourself:I'm currently a student studying IT, Digital Art, Resistant Materials, I'm on here in my spare time.

https - *November 6, 2013, 10:47 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

I am a learned person, I know a bit of HTML, I am looking to learn a lot more about coding, my support skills are 8/10, I have been trying to learn PHP for a while now, no success has come of it as I don't have a good tutorial.

eWhoring -
I have been eWhoring for quite a while now, I have a lot of targets on skype that I normally use, I have made quite some money from eWhoring, but my money management skills are poor, I have my methods of eWhoring and I have my unsaturated chats etc.

Graphics -
I have been learning multiple new stuff in Photoshop, I am still learning everyday, I have made quite a few bucketlist pictures and tumblr pictures, they have come off as good, most people rated them 8/10.
You may check my online gallery here http://mylow.us/

One of my pictures!
Spoiler (Click to View)
[img]http://mylow.us/wp-content/uploads/2013/11/anymore.png[/img]

Social Engineering -

I have many methods when it comes to Social Engineering, I have been quite successful with social engineering in real life included on the internet, I have SE'd many things, it is a very occasional thing for me to do though.

Gaming -

I am extremely talented when it comes to gaming in my opinion, I play a lot of games, I sometimes go days on end playing games when I have free time, I have many gaming friends so it never stops.

Advertising -

I am quite skilled in advertising, My main projects are on facebook, I usually get a 1000 likes on

each page in about 2 days, and those are legit likes, I have a big fanbase on twitter included on Skype I have many friends, I get to the point in advertising.

I am definitely willing to learn a lot more!

Tell us why you would be a valuable asset:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

I have a very vivid imagination and I love learning new stuff and teaching other stuff, I am quite humble in my opinion, I am willing to help many members and receive help from multiple members aswell, I am not shy when it comes to learning new stuff, I could be a great asset to all of you.

Elaborate on your achievements and future goals:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

I have always pointed out my dreams and goals from when I was a child, I will someday open up my own business, many franchises will come about with it, the Business will be known across various countries, it is most likely going to be a computer business, I have always dreamed of owning such a business. The business is only going to be one part of my upcoming Enterprise, I am aiming for a global company, someday maybe even bigger than Google and various other Business Giants, I want to be able to help people around the whole world, not for the fame, not for the fortune, but for the pleasure and for the well-being of such people who are worse off than the average person. Someday I also want to be able to write novels and miniature books, I love writing articles and just writing in general.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:

I am a 17 year old male High School Attendee, I love computers, gaming and many other interests. I am a humble person, I am an avid fan of great music, I like to help people out and I don't mind receiving help. I do not tend to get into many problems, I tend to make many friends, hardly any of my friendships are broken because of the ties I keep with my friends, I love the following sports :
*Rugby
*Soccer
*Badminton
*Cricket
*Swimming
*Wrestling

I play soccer with basically all my friends every week, I compete in many different cricket tournaments, I love swimming and hope someday I get to show it off, Rugby is part of my curriculum and I enjoy playing it, It is a sport for the Tough-Minded.

Spoiler (Click to View)This has been added to my application gallery
http://putative.me/apps/legionapp/

The Invoker - *November 6, 2013, 2:28 pm*

Elaborate on your skillset:
Well I'm almost done doing "Computer Science" hopefully going masters as well after my BS.
So basically I got all the computer skills required for almost anything.

In addition to basics in hardware since I took some elective courses in that.

Tell us why you would be a valuable asset:

Well I can be easily adaptable to any surrounding, and I can manage change if any.
Recognize by joining the group I am entirely knowing that I will teach and learn at the same time.
Being positive and nice at all times, what so ever the case is.
I love being resourceful, and tend to be far more efficient. I love to investigate on how to offer solutions and leads to the group.
I am full motivated, since uhmm I never joined an HF Group except one which I did not find my self in.
This group has one leader and this is what I'm searching for, one boss around , and not having arguments :)
I value others time, everyone has the same importance to me. I will never lose focus of that.
Communication is the essence of life, If there's something that should be said, I will speak up. The ability to truly communicate is easily one of the greatest assets for any position.
Smiling and being reliable within the group, building up positive energy here and there.

Elaborate on your achievements and future goals:

Current:

- CCNA 1,2,3,4 (Cisco Certified Network Associate)
- Almost Computer Science BS
- Intermediate CEH (Certified Ethical Hacking)

Goals:

- Masters in Computer Science
- CCNA for Security
- Advanced CEH

Tell us about yourself:

The day would be November 15th, get me a scorpion!
I do retarded and stupid stuff, but i don't regret any of it.
I love to laugh, and i love it when people make me laugh!
You could say im smart, but i don't act like it at all!

I'm friends of many and enemies of few. I forgive && forget.

If you think I'm tripping… MAYBE YOU SHOULD TIE MAH SHOES!

I love to eat, but no matter howww hard i try my a** can't get FAT! :/ (HAHAH) Gym is my 2nd home
I trust people more than i should

m00dy - *November 7, 2013, 10:34 am*
Elaborate on your skillset:

ive been a programmer since i was 15 years old (im 24 years old now) when i was young i used to make exploits to lag or destroy a gmod servers

i know fair amount of knowledge in MANY programming languages such as:

C++, PHP, python, ruby, java, (have few amount of knowledge in assembly)

i was a black hat for many years who would hack into some websites and just upload some shells and use them to DDOS (defacing is for pussies and skiddes)

but now im focusing more into coding tools and anything that i feel as a chellange to my mind

Tell us why you would be a valuable asset:

i would not really call myself VALUABLE but i know myself when im in a group around passionate mature and high quality members i would go and contribute and help with everything i have that i feel helpful

Elaborate on your achievements and future goals:

i dont have that much achievements that would impress everyone else other than me, they are sorta minor achivments that i took them as a chellange and ive done them

as for future goals, im not sure i can count them but imagination is unlimited, for me i have set in my mind to make RATS, viruses, trojans, learning more and more about hacking/network security/ anything i see interesting

Tell us about yourself: im 24 years old programmer, ex black hat guy, now im more into gray hat, im willing to break any chellange i put my mind on, im passionate and in love with most of the things that comes under hacking/coding/ computers, im 24/7 infront of the laptop coding

well i work as web developer so i code at work and i code at home :)

Flooder™ - *November 8, 2013, 5:49 am*

Elaborate on your skillset: I am cisco certified with a ccna. Also I love running botnets. You can say its a hobbie of mine.
Tell us why you would be a valuable asset: I know quiet a bit about everything. From Java, down to the hardware in a computer. I run a software clean up shop on hackforums as well. I do speed optimizing, malware removal, and uninstall issues.
Elaborate on your achievements and future goals: Well I take a few community classes for now to get my undergraduate, then im looking to transfer to a bigger school. I hope to actually run my own shoe store lmao. I love shoes dont judge me.
Tell us about yourself: I work at shoe store and i love it. I get discounts on shoes, and keep up to date on everything jordan! I run my net on the side for some extra money. I go to school for liberal arts. Play some basketball in a rec league. Just doin my thang over here i guess.

01001 - *November 8, 2013, 7:32 am*

Elaborate on your skillset: My name is 01001 and I'm a White Hat Hacker as well as a Security Researcher. I have been in this field from a long time.
Some of my skills are:

HACKINGXSS
SQLI
Brute Forcing
DDOS
Ratting PROGRAMMINGC
C++
C#

VB.NET NETWORKINGForum Development
Website Security Tell us why you would be a valuable asset: Because this group is dedicated to all those who are interested in learning something new and love to help others and my desire is to help others in the situations once I was in.
So, I think I'm best fitted to join this group and I think after joining this group I will learn something new.
Elaborate on your achievements and future goals: Well, I have been listed as a Microsoft Security Researcher (twice) for reporting critical vulnerabilities.
And my future goal is to get listed on all the famous websites like Facebook and google.
Tell us about yourself: My name is 01001 and I'm a White Hat Hacker as well as a Security Researcher and my dream is to fly over a rainbow so high.

Computer Craft - *November 8, 2013, 3:47 pm*

Elaborate on your skillset: I know C++, Java, HTML, Lua, and I am trying to learn Visual Basic. I may be new to this forum but I have been coding for a few years now. I am also very good at networking.
Tell us why you would be a valuable asset: I am able to pick up new coding languages very easily. I am also able to help solve problems with coding issues, networking issues, and help in projects.
Elaborate on your achievements and future goals: Some of my goals are to become a CEH, build a game engine in C++, and make my own bot net.
Tell us about yourself: I am a hardcore gamer, I play everything from Mine craft, to RIFT, to league of legends. I am working on a C++ game engine. Also I like GFX.

Quest™ - *November 8, 2013, 4:10 pm*

Elaborate on your skillset: I am currently attempting to learn to crack hashes using hashcat, ophcrack, and rainbow tables. I am making some progress and hope to be able to crack them quickly soon. I am able to do basic html coding and I am currently enrolled in a cyber security class as well as networking in a tech school.
Tell us why you would be a valuable asset: I am willing to learn more and teach others what I already know as well as opening a help desk for the skills I am able to teach.
Elaborate on your achievements and future goals: My future goals are to attend a college and major in Cyber Security and Maybe Computer Science.
Tell us about yourself: I am 16 and my name is Nick, I currently go to a tech school and take cyber security. I get decent grades but they could be better. I am an honest person and will go out of my way to help others that are having a hard time.

Ixaris - *November 9, 2013, 1:00 am*

Design won't show the knowledge. Ill go straight through the answers.

Elaborate on your skills

I am good at server security/networking. I usually work on some big projects that includes ddos protection, Moreover I have a reasearching mind, I keep learning while I work. Talking about skills. I can actually troubleshoot all kind of server problems. I like to work on servers full day. So every day its a new thing I learn.

Tell us why you would be a valuable asset:
Just to say, Noone can question me up on what I know. Whatever things I know I understand it completely. Its a dedication towards work, and I do gurrantee that.

Elaborate on your achievements and future goals:
I have created a ddos protection guide for hackforums. And yes everyone appraised it.

Link - https://hackforums.net/showthread.php?tid=3730346

Also currently I am providing DDOS protection to websites as a service (Its free because its in beta)
Link - https://hackforums.net/showthread.php?tid=3849260

I am developing it further and also will be useful to everyone :)

Tell us about yourself:
I have a mindset to help people, Yes there are some people who criticize a lot . But they cannot stop me from doing it. I hate betrayers and the people who try to just earn money for everything. Yes Ofcourse you need to earn money but it isn't everything. People should help each other and it is my main motto. I am sorry about my English. But yes its on the learning track, I should not say but it is understandable but its not that good I agree. There may be some mistakes but I am sure it will be improved. Because Dedication is guranteed.

Regards

Fresh - *November 9, 2013, 1:04 am*
Honestly one of the best groups I have been in on HF, hope to see some new HQ members!

Kansas - *November 9, 2013, 9:27 pm*

Kansas' Legion Application

Elaborate on your skillset:
I'm a coder that focuses all of my efforts towards the web. My languages that I am fluent in and am not afraid of being asked to prove it are HTML/CSS/PHP/JavaScript/jQuery/SQL/Mod-rewrite.

When I first started learning to code I realized that if I was going to be doing this, I should go ahead and learn it right the first time. With each and everything I learned and looked into the security and performance side of it and took mental notes. This taught me to keep my scripts tight and leave no holes.

After awhile I realized that I needed to get into graphics and tap into my creative stream if I was ever going to make this hobby into an income some day, and that drive inspired me. I dove into graphics and kept everything web-literate inside of my designs, it was tough, but necessary

[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]

Tell us why you would be a valuable asset:
My goal in life is to assist people, regardless of age, ethnicity, race, etc, to become web-literate. It's something very important, but people don't realize it yet. The internet is one of the most valuable tools ever created, and people don't know how to properly take full advantage of and use it. I never turn down anyone asking for help, you can ask anyone that has came to me in the past for help.

On top of that I'm willing to sacrifice my time for friends and associates. My life doesn't revolve around money, and I'm not going to ask anyone "How does me doing this for benefit me?" if they

ask for anything.

[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]

Elaborate on your achievements and future goals:
My main achievement in life is teaching myself 7 coding languages and becoming keen with website management without any outside support. That took a hell of a lot of pushing through, there was times I wanted to quit, but I kept going, and I'm so glad I did.

My future goal in life is to be happy. By that I mean doing what I love to do, not just some desk jockey, working to make someone else's dreams a reality.

[IMG]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/IMG]

Tell us about yourself:
I'm a nice person, but I value my dignity. No matter how big or small the problem, I'm going to resolve it correctly, despite how long it takes, its the principle of it all.

I'm not a religious person, but my family is. I live by the moral code - "Do to others as you would want them to do unto you". I don't care if you've scammed me for over 2 grand, I'll be mad, of course, but I'm not going to go back around and scam it right back, what would that do for me? Cause more problems. I will work towards a peaceful resolution to the best of my abilities, as per my moral code.

Friends mean a lot to me.

Pentatonic - *November 10, 2013, 11:27 am*
Legion looks like a good group! Good luck to all the participants.

My top achievment is, that I have connected to an external NASA's sever using telnet back at 1996. Nothing special, I was able to extract some employers informations and some galaxy pixtures..

Birnie185 - *November 10, 2013, 6:24 pm*
Elaborate on your skillset: I have knowledge of python, and am currently learning the sockets library, so I can do some network programming. I also have knowledge in Linux, Operating systems, networking, and "hacking"

Tell us why you would be a valuable asset: I could provide some great ideas to a group on their personal programs, and could possibly even help teach people python, or work in collaborative projects.

Elaborate on your achievements and future goals: I aim to be a student at Abertay Uni doing a BSc in ethical hacking(yes it's an actual course). I also would want to sit and pass a CCNA exam in the next few years along with a CCNA in security. Some point in the future, it would be amazing to code a botnet in python, and then possibly migrate it to a windows native language such as C, or any variant.

Tell us about yourself: My name is Birnie, I am 17 years old, turning 18 in 13 days, and as my User Title may suggest, I currently live in scotland.
At the moment I’m at college, which is, if youre not familiar with The UK’s education methods, a shittier version of University.

133720 - *November 10, 2013, 9:34 pm*

(Nov 9, 2013 02:04 AM)Abel Wrote: *[CITE]* Honestly one of the best groups I have been in on HF, hope to see some new HQ members!

Yes.bro. it right!

I hope we are the best group.

Everybody Good Luck

ArizonaIce - *November 11, 2013, 2:05 pm*

Elaborate on your skillset:Im quite good at thinking of ways to get around systems, for example within games I can quite easily figure a way to get infinity money; plus I'm good at social engernering (getting free things and talking my winto/out of things)

Tell us why you would be a valuable asset: Well I have quite a few ideas on how to monitize, but I don't think I can do it by myself without any experience or opinions. I also get very motivated within tasks. And I like to express my opinion (Which is quite useful)

Elaborate on your achievements and future goals:I have made a lot of money online, I like to think that of an achievement because it took a LONG time to get the money flowing in. But in the end it was worth it, I have been able to buy many things I wouldn't of been able to get without it (pedagree Dog, Many o steam games, and a aquerium + many more randome useless things) I am very interested in computers and spend a lot of time on them, I would really like to get into coding, I think it will be a very value asset in the future.

Tell us about yourself:im really just a general teenager; I go out with friends, get average grades and love playing games. Also, I love money :P

byte[] - *November 11, 2013, 3:14 pm*

Elaborate on your skillset: Well to start off, I think I've been coding for about a year and a half now? It is only visual basic, but I'm going to learn either Delphi, Autoit, or C ++ next. I would say my biggest accomplishment is making a FUD crypter in VB and keeping it FUD for about 6 months until recently (ESET picked it up since I had it on my computer).

Tell us why you would be a valuable asset: Well to start off, I would really like to learn more of the libraries. I also feel like if I ever have a problem or even an idea, I could tell one of the legion teachers and see if they could fix it or make it happen. Another thing I would like to point out is, I am friends with one of your members (- Anonymous). We have the same birthdays so I added him on skype and we just became friends. He was also the one who recommended me to apply! ^.^

Elaborate on your achievements and future goals: Future goal would be to sell my crypter. Like I said earlier, accomplishment would be having this crypter FUD for so long.

Tell us about yourself: Well, when I plan to grow up I want to be an automotive engineer. I really love cars, a lot. I am planning on getting a Nissan 240SX S14 and doing a 2JZ swap on it (Toyota Supras engine). I am currently in high school, have 90's in all my classes, and live in Georgia (Don't know if that really matters). I also have always wanted to join legion. That userbar has always looked so nice to me. Anyway, that is all I have to say. I hope you accept my application, but if not, that is also ok.

Zabuza? - *November 11, 2013, 7:44 pm*

Elaborate on your skillset: I'm currently more of a student in black hat/gray hat activities. Now, I am currently learning C++ and Java and can do minor programs with both. I'm decently good with HTML5 as I do take classes in it at my school. Now I also have many other skills though I don't feel the need to include them at this paticular time as I don't feel they're relevant. Now as for white hat knowledge, I'm pretty decent and can fix a screwed up computer, though of course that's not as important.

Tell us why you would be a valuable asset: I feel I'd be a valuable member of the Legion

Community mostly because of my knowledge, kindness, and honesty. Now even though I'm not the best, I'd have to say I am willing to teach everything I know, but more importantly (to me) learn. I'm a fantastic learner, and I would love to learn more, and that only helps me help more people. Now my kindness and honesty are just social skills I have developed over the years, and I'm quite polite and understanding. Now even though it doesn't have much to do with hacking, I feel I'd be nice to have around. See, I love to help suicidal/depressed people who have been through similar times as myself just for the sake of it, and I just love helping. That was one of the things I felt was unnecessary to add to my skills.

Elaborate on your achievements and future goals:Now my achievements (besides sporting and gaming events) would mostly be basic. I've helped people get revenge on those who were terrible to them (even though that doesn't go much for my kindness :P) through things like RATting and DDoSing though I'm not quite sure if I'd consider that an achievement. Now there's a few others, though no giant things like some.

Tell us about yourself: Now I'm a Gamer/Kinda Hacker/Athlete. Ever since I was young I've been brought up with technology, playing games on my PS1 and PC, but also being fascinated with the way they worked. Now I'm going to disclude any of my atheletic achievements as I feel they're unnecasarry. Anyway, as I went through school I'd be fixing things for my teachers. They're screwed up WinXP computers, phones, in later years Smart Boards. Now I'm going to add something personal, and one of my ambitions to hack. In late elementary school and early middle school things happened. I gained suicidal thoughts, I'd cut, and cry myself to sleep. These started with bullying, then self hate, and more. I also really hated how mean I was... though apparently I was very nice. Now I was helped through those times a little, though I'm still stuck in them mostly. I like to help others, and destroy those who cause others pain like mine over the internet by Ratting them and stuff like that, and I'd just love to increase my skills overall.

Thanks so much for reviewing my application, even if it's more juvenile then the others. Whether I make it in or not, thanks.

Sincerely,

~Ceoff ?

Invicta - *November 11, 2013, 8:27 pm*

Elaborate on your skillset:

Advanced Knowledge in malware analysis and removal.

Tell us why you would be a valuable asset:

You never know when you'll need help setting up tools, or removing them.

Elaborate on your achievements and future goals:

Hopefully sometime in the future I'll own a pentesting company. As for achievements, I've done everything I've wanted to so far.

Tell us about yourself:

I'm 16, and currently reside in the United States.

Blax - *November 13, 2013, 2:37 am*

Elaborate on your skillset:

SQL InjectionI learned basic SQL Injection last year. I believe it was a useful time I spent learning it, as I have performed a few successful SQL Injection attacks on a few websites. I still can perform SQL Injection attacks if I will be asked to.

Reverse Engineering & CrackingI have a fair experience with cracking till this day as I am commonly using it for my needed programs. I don't bother buying any shareware programs as I just download their trial version and crack them. Let's say, most of the programs I am using are cracked

by myself.

JackingI have performed successful jacking attempts twice using Java drive-by through Omegle by impersonating myself as a girl, and then I got the victim to get into my infectious link, and then I got his saved passwords on his internet browser. They weren't really useful, but they were successfully hacked. I can do Java-driveby again whenever I am asked.

E-WhoringIf you assume that E-Whoring is money-hacking, then I'm a great money-hacker as I have made 2,000$ in less than a month using a method that me and a friend have created and tweaked together. Also, I have successfully built a permanent-access (as in if it's going to get limited again, I will restore the access every time it happens using my methods) Verified PayPal account for my E-Whoring although I'm under the legitimate age.

Social Engineering Social Engineering has played a big role of my earnings. Specially in E-Whoring. Additionally, I have got some personal beneficials successfully using Social Engineering. I don't know if this makes sense to you, but I consider Social Engineering as if it's my game.

ComputingI have decent computing skills as I have a great knowledge about computers. I own a PC which I have tweaked and overclocked myself. I am always updated with computers news. I am not sure how I can discuss my Computing skills more in this application, but if I am going to be questioned, I guess we'll see.

Gaming My gaming skills are almost perfect. I think they are actually perfect, but I just can't call it perfect as I am not the best in the world. However, FPS games are my real skill. I have played alot of FPS games, like, Team Fortress 2, CrossFire, Black Ops and more. I'm also good at racing games like Need For Speed, Grid, etc.

Tell us why you would be a valuable asset:
I believe I would be a valuable asset as I can teach some stuff that I know but maybe some members of Legion don't. Not everyone has the same skills, but since we are a group, we all should share our skills with eachothers. In my opinion, sharing with other members is what a group is meant to be.

Elaborate on your achievements and future goals:
I have got many achievements I am looking forward to. I want to become a professional coder and soon learn C++. Once I become a professional coder, I will start coding hacks for games (like: aimbots, trainers, etc.) and will sell them for a worthy amount as they shall be HQ.

Tell us about yourself:
My name is Dan, I'm 16 years old. I live in Alexandria, Egypt. I chose to focus on learning English from school, courses, movies, internet and online chatting as I have always been dreaming for the day I would go to America and also for different communication sites. I'm obsessed with hacking and I'm always interested in learning more and more about it. As much as I am obsessed with hacking and computing, I also have a social life. I believe that's all what you would give concern about myself.

Thank you for reading my application. I wish my application attracts you enough to give me the honor to join Legion. Good luck to all other applicants!

Chr0m3 x MoDz - *November 13, 2013, 10:45 am*

Elaborate on your skillset: High level c# and c++ coder mainly for xbox 360 homebrew / mod tools.
Tell us why you would be a valuable asset: I'm not really sure it depends on wether anyone in this group does anything to do with xbox modding.

Elaborate on your achievements and future goals: Achievements I have made quite alot of tools / homebrew for the 360, Goal Is to one day get a job doing something with high level coding.
Tell us about yourself: My name is Jeremy I am 19 and live in Australia got my first xbox back in 2009 ever sine then have been modding / coding was usb for a bit then I got a JTAG on my bday in 2011 then I started making iso modifications and things last year i worked my way up to homebrew and actual applications. Not sure what else to say.

Hollywood Undead - *November 13, 2013, 4:07 pm*

Elaborate on your skillset: Near next to nothing.
Tell us why you would be a valuable asset: I'm honestly just looking for a chance to join this group, as it seems like there are a lot of educated members, and I'd be able to get some guidance on where to start in terms of 'hacking' you could say... or really just figuring out what languages would be best to learn that'd fit my needs, and maybe perhaps some tutorials on these languages in the group discussion forum... I think that joining this group would most likely motivate me into making something of myself.
Elaborate on your achievements and future goals: I don't really have much in the range of achievements... but for my goals I'd love to become proficient at a language or two, and increase my skillset.
Tell us about yourself: I'm a 16 year old kid and I spent most of my time on the PC (recently mainly playing League) but I'm started to get tired of that and I'd really like to do something with my spare time other than sit around playing games. I'm not very self-motivated, although with the support and guidance of other members I'm very likely to advance.

I realize that you guys are most likely looking for more advanced members than myself, but I'd really appreciate the chance of joining the group as I know I'd benefit from it, and I'd definitely try my best to help and support everyone else in the group the best that I could. Just looking to be a student.

WOLGA - *November 14, 2013, 4:42 pm*
Elaborate on your skillset: Finding mistakes; logical thinking and coding.
Tell us why you would be a valuable asset: I can find mistakes.
Elaborate on your achievements and future goals: I have made 2 methods of encryption, my current future goal is to learn GFX
Tell us about yourself: I am from the US of A and I like to think.

Aboft - *November 15, 2013, 4:50 am*
Elaborate on your skillset: My skillset is more of a mediocre level of success. Although, I am more ignorant than anything anymore. I used to code simple projects just for fun but never had anyone help me to be able to advance with my works. I understood python, batch, and a tiny bit of HTML before I gave up, and now I don't hardly remember any of it.
Tell us why you would be a valuable asset: I believe I would be a valuable asset to Legion because I'm quite creative and easy to teach. Although, I may not be going into the group complete and utterly blind, I still need some refreshers and guided into the correct path.
Elaborate on your achievements and future goals: My goal has always been to code and run a well structured website that would acquire a great attendance to where I then could partake in some profit and earnings instead of having to work some menial occupation. However, I would at least wish to understand how to properly code any type of tool or website so when I finally attend in college I would have some insight to make my time there shorter.
Tell us about yourself: Well there's not much to say without being conceited. My personal life is either music, I play the viola and violin in professional groups at only 16, and computers. I wanted to be in some type of computer-based group within HF to expand my knowledge, but never found a

suitable group. Also, I take great pride and treasure into my education and always try to learn whenever I get the chance. Being surrounded by ignorance for years persuaded me to become educated in most subjects to be able to excel further than most peers of mine.

I do understand if I am not accepted, and I thank you for reading.

Yakz - *November 15, 2013, 3:39 pm*

Introduction:

Hey there! Kush here,
I present to you my application for 'Legion'.
I hope you enjoy reading this application and if you may have any concerns or questions after reading this, feel free to PM me.
I would also like to say how glad i am that we all got the chance to apply for 'Legion', And to all applicants best of luck!

Elaborate on your skillset:

Marketing

I completely love this and consider it as one of the most valuable skills to posses.
I always loved marketing because it was so amazing to see a product or service go from ground to top.
To me, apart from the money that you can earn, seeing your product rise and customers happy is a reward itself.
I love to communicate with people and communication is what matters in this branch.
I won't go any further about this but if you did like to hear more about how i feel about marketing and customer relations,
go here..
A healthy customers relationship

Past products:

iControl RAT
Cloud API
Worked with Grim API and Stresser
Anonhustlers (Booter)

Outside HF:

Belgium hosting
Luxarweb , Luxarhosting

HTML & CSS

Very basic but yet crucial to understand if you wish to get anywhere in the web-development sector.
I myself understand HTML&CSS completely and use this on an daily basis.

ASP.NET (MVC) C# using Visual Studio

This language is in my opinion not as easy to learn like HTML, ..
It takes patients and a good understanding on how the WWW cooperates with us (users of the WWW).
All by all it is a very efficient language and saves you allot of time when combined with VS.

Stresstesting , RAT

I'm very familiar with both and fully understand how these 2 work.
I'm good with the back-end side of stressers because I've worked with them allot in the past.
For ratting i did Mostly promoting, selling and customer support for iControl (web based RAT me and my old partner used to own).
This thought me allot about how Remote Administrator tools function but this is by far not as useful as any other skills IMO and was never priority for me.

Graphics

This is something i used to do when i was younger as it was the first and easiest thing to begin with as a complete newbie to this world.
I wouldn't say i'm a pro but i'm perfectly capable to create my own graphics when needed.

Social Engineering

Very good memories on this one!
This method actually got me my first Gaming accessories, i always found it hilarious when the package deliverer arrived and my mother was like 'Wut?'
All by all very fun to do and useful if you want some free stuff to keep or sell.

E-Whoring

Not my favorite, all by all nasty but comes in handy when your low on money i tend to only E-whore with pictures and no nasty webcam methods.

Gaming

Been an active gamer for 7 years now i play a large variety of game types such as:
- Roleplay
- MMORPG
- FPS
, ect..

Producing & mixing

I've been producing and mixing for a few years now (mainly mixing)
Gear:
- 2x Pioneer CDJ-850

- 1x Pioneer DJM-850-W DJ-mixer

Languages

I'm pretty good at languages, i talk:
- Dutch
- English
- French
- Arabic

And i'm going for Spanish soon.
Languages are important if you want to have a wide clientele.

Game-servers

I'm good at both hosting and managing certain gaming servers.
I've had multiple servers on certain games such as GTA SAMP , CSS , RSPS , ..

Tell us why you would be a valuable asset:

I will support group activities and participate in them,
I will also help every member whenever i can simply because that's what i wish to see in a group, a tight group where fellow members don't bother helping a fellow member out.
I'm in for changes and new adventures and thrilled to meet
new people and learn from them and share my knowledge of course.

Elaborate on your achievements and future goals:

Achievements

I have achieved a few things in my life, I just recently passed Business management and expended my web development skillset.
I created a DJ booking agency where dutch artist can arrange transport, ..
I also learned allot on this forum in particular and i think that's an achievements as well.
I'm still learning and will always keep on learning new stuff until the day i die.

Goals

I have set a few goals;
Finish my classes that include the current things:

Visual Studio
IIS (Internet Information Server)
ASP.NET (MVC)
C#
RAZOR
SQL Server
LINQ
WEB API

HTML en CSS
jQUERY en jQUERYUI

Also a gaming channel, currently bought my HD game capture and i am waiting for it to ship.

Tell us about yourself:

My name is Jonas,
i live in Belgium and participate in karting and love partying and producing.
I've been on Hackforums since 2012, my first group i was ever in was Eminence as i remember and after that Terror.
I went inactive a few months ago mainly because i was busy with my main school + extra web development classes.
I catched up with everything and have the time again to be active on HF.

Ending

I would like to thank everyone that took the time to read my application.
Any question or critic is accepted.

Regards, OG Kush.

Acroz - *November 16, 2013, 6:34 pm*

A quick word of advice, elaborate on your hacking skills, not your ub3r cod skills.. we are NOT a gaming group whatsoever.

Just a tip:)

Stresstesting , RAT

I'm very familiar with both and fully understand how these 2 work.
I'm good with the back-end side of stressers because I've worked with them allot in the past.
For ratting i did Mostly promoting, selling and customer support for iControl (web based RAT me and my old partner used to own).
This thought me allot about how Remote Administrator tools function but this is by far not as useful as any other skills IMO and was never priority for me.

Graphics

This is something i used to do when i was younger as it was the first and easiest thing to begin with as a complete newbie to this world.
I wouldn't say i'm a pro but i'm perfectly capable to create my own graphics when needed.

Social Engineering

Very good memories on this one!
This method actually got me my first Gaming accessories, i always found it hilarious when the package deliverer arrived and my mother was like 'Wut?'
All by all very fun to do and useful if you want some free stuff to keep or sell.

E-Whoring

Not my favorite, all by all nasty but comes in handy when your low on money i tend to only E-whore with pictures and no nasty webcam methods.

Gaming

Been an active gamer for 7 years now i play a large variety of game types such as:
- Roleplay
- MMORPG
- FPS
, ect..

Producing & mixing

I've been producing and mixing for a few years now (mainly mixing)
Gear:
- 2x Pioneer CDJ-850
- 1x Pioneer DJM-850-W DJ-mixer

Languages

I'm pretty good at languages, i talk:
- Dutch
- English
- French
- Arabic
And i'm going for Spanish soon.
Languages are important if you want to have a wide clientele.

Game-servers

I'm good at both hosting and managing certain gaming servers.
I've had multiple servers on certain games such as GTA SAMP , CSS , RSPS , ..

Tell us why you would be a valuable asset:

I will support group activities and participate in them,
I will also help every member whenever i can simply because that's what i wish to see in a group,

a tight group where fellow members don't bother helping a fellow member out.
I'm in for changes and new adventures and thrilled to meet
new people and learn from them and share my knowledge of course.

Elaborate on your achievements and future goals:

Achievements

I have achieved a few things in my life, I just recently passed Business management and expended my web development skillset.
I created a DJ booking agency where dutch artist can arrange transport, ..
I also learned allot on this forum in particular and i think that's an achievements as well.
I'm still learning and will always keep on learning new stuff until the day i die.

Goals

I have set a few goals;
Finish my classes that include the current things:

Visual Studio
IIS (Internet Information Server)
ASP.NET (MVC)
C#
RAZOR
SQL Server
LINQ
WEB API
HTML en CSS
jQUERY en jQUERYUI

Also a gaming channel, currently bought my HD game capture and i am waiting for it to ship.

Tell us about yourself:

My name is Jonas,
i live in Belgium and participate in karting and love partying and producing.
I've been on Hackforums since 2012, my first group i was ever in was Eminence as i remember and after that Terror.
I went inactive a few months ago mainly because i was busy with my main school + extra web development classes.
I catched up with everything and have the time again to be active on HF.

Ending

I would like to thank everyone that took the time to read my application.
Any question or critic is accepted.

Regards, OG Kush.

If you get denied I quit life dude xD

Acroz - *November 18, 2013, 3:48 am*
Again guys, please don't elaborate on your gaming skills, it is NOT reviewed! We want to see what you can do hacking wise, not gaming, please.

Freddy Kru?ger - *November 18, 2013, 5:22 am*
I was in this group and it was like family to me, considering applying again since I regret leaving.

The Witness - *November 18, 2013, 5:40 am*
Elaborate on your skillset:

Introduction; I feature a range of skills for myself but I will list the most of them and will tell you why in my own words These will be listed and I will explain them in a few sentences to get you to understand abit more. Here Is the list I thought of for myself;
Hacking - I have done some hacking before today, I used to find weak spots on websites in the good old days and exploit them, I would say about 2-3 years ago that was really popular, Then SQL Injection I used to also use a tool to find vulnerable websites at one point. Therefor I wouldn't be a letdown to the hacking side in Legion.
RATs/Botnets- I have owned rats and botnets before today, RATS are really easy to used and I used to use them and transfer them to use with my bot net which I used to create. RATS are really simple such as dark comet, and cyber-gate, I tended to use Cybergate quite allot, only because of experience it all just depends. My field is growing and i'm learning more and more day by day.
Marketing/Online Selling – I am a really good member when it comes to selling products and when it comes to gaining money via online in any possible way. I will do this to my best ability and get my money's worth. I am really good at sales and managing money online.
College Computer Networking Course (Diploma) – I am currently studying on how to build computers, how networks work computer systems and much more at college. This will educate me on the way things work network and setting things up.
Stress Management/ Giving good advice – I put this because sometimes people need help and life advice, I'm also here for this in anyway and I'm only a private message away I could or would try to help you with any needs possible in any single way for anyone but most importantly for you. I am an open person and I want to be here for everybody possible.
EWhoring – I have some experience with this and I am really good at manipulating people for money especially online predators. This can be very hard you need to know enough but I effectively do know as much as I do need to know for this to be able to give this a go, I have been a success with this before today.
Social Engineering – I have been able to do this a couple of times, I did this for my razor keyboard which I currently use if you want proof of this give me a shout, I tend to do this quite a lot for items, I currently have a iPhone 5 from doing this. This was awhile back but I have some background on this and know about it.
Making Money Online – Similar to marketing but I find ways and share them with members who I deem worthy this will be for the entire group. I will post anything to help them in this group and be a giving member. I tend to do this way more because it will give me more advantages and profit.
Network Security – This is a big one for me I am really good at network security especially because I now do this at college on my diploma course therefor I would be really ideal to be in this group to offer all my services and anything I can really offer for you guys in my future. I try my best to be helpful as possible for you and mostly for me.

Tell us why you would be a valuable asset:

I could say many ways I would try to benefit this group Legion, I will give you a few true statements how and why, I would benefit the legion with;
- Free Paid Methods I make would be free to all group members.
- My advice 24/7 – I would tell you what I thought anytime of the day.
- Friendly Support – I will be here for you to talk to friendly.
- Respectful – I would respect all group members just like family.
- Loyal – I would never say I did something when I didn't do it at all.
- My tutorials and any help with hacking SQL injecting and such.

These are a few I picked out which would be happy to do for this group in particular. I would make sure that I keep very active and I would make sure I stay active in the group section. My main goal is to gain trust, show members how loyal and helpful I really am, and being in this group would allow me to become the full potential I want to become, this would give me more motive and motivation. I would make sure I spend as much time as possible thinking of things for the group then not for and I also would love the chance to become in a group and speak to other members in a group. Show my support and show my gratitude also. I am very active so you wouldn't see me offline for more then what say 6 hours a time. I would but it to the top list to help group members first than anyone else because, that is what should happen and that is what I would do all of the time. I would spend my time helping anyone out and share any methods with any group members I would be honoured in this group.

Elaborate on your achievements and future goals:
My current goals for live is to become very far have a very decent life role job and be able to earn enough income for all of my own personal needs in life really. I know one important one of them is to become in groups become helpful deem myself worthy really and just show how much of a good and loyal but also decent member I can be towards you personally. This means effectively a lot to me becoming worthy. I want to set my life to a good path and make sure that I don't fall back in anything and make sure I do well in my current college course and such. Dream big think big but you have to do big which I aim to do.

Tell us about yourself:
Abit about me, Well there isn't a grateful lot It would be rather to long for me so let's say I've been through hell, I've suffered anxiety attacks for about 10 years now, It's been here all my life it's made my family and my life really like hell if I am really honest, I tend to sit and be abit of a gamer then an outdoor person this is due to my illness but also because I'm not a big fan out outdoors. I tend to work better alone but if it comes to groups I would like to help out a lot more. I currently go college 3 days a week. I am off weekends and tend to do a lot of computer work around the house to fix things for the family and such, so any problems PC wise give me a shout! I also missed a lot of schooling I recently sorted my own life out I thought I needed a better path to making money a job and life really, so I made a big step sorted myself out and that's basically a quick paragraph or so for you to summarise how and what it's been like for me personally.

Extra;
I would like to thank you for reading this and spending your time on my application this mean's a grateful lot for me.
-Illusionist

TheGrayAviator - *November 18, 2013, 5:51 am*

Guys, with all due respect, Legion is not about gaming, it's about computer hacking.
If gaming is the only skill your possess, your application will be rejected.
So please bear that in mind, if you would like to be considered for an interview.

?nonymous - *November 18, 2013, 9:07 am*

Student wave #6 invited! ?

DO NOT post about your gaming skills as you'll be instantly rejected from now on.

Everyone who didn't get accepted this round can go ahead and put more effort into a new application explaining their hacking-related skills.

PsychoSexy - *November 18, 2013, 12:07 pm*
^^ You do realize you've used my GFX?

D??????????????ark - *November 18, 2013, 1:56 pm*

Introduction
My name is Dark and I am a rather new member on here but I have alot of experience in many different fields of work, some of with include C++, Graphic Design, some HTML5, Cracking, Jacking ,eWhoring and overall Computing.

Elaborate on your skillset
C++ and Java: This, I have learned via the popular computer game "Mindcraft". As a younger teenager I would go on mindcraft and play with friends. Frequently watching youtube videos of new mods and plugins for the game and its servers. Quickly I got interested in learning all I could about this new language that is C++. I produced my first mods adding mobs and items to the game which gave me alot of drive and ambition, when a mod wasn't working for me I would search and search until I finally got the code written perfect with no bugs.

HTML5: Last year during summer I decided with two of my friends to go to a computer course in the local college, we learned a ton of stuff but I excelled more so in HTML5, we learned to code some apps, some websites in the course. All on the PC's in the college. Some people thought it was odd that I spent about 2 weeks of my summer learning coding in more detail but I found it so interesting.

Cracking: For a short period of time I researched the methods of cracking on HackForums, preferably steam cracking. I also ended up coding my own Sentry config, sadly I have lost it. Most of this cracking was just for fun and not for selling via HackForums market, but as mentioned before, I love learning about new ways to Hack or code.

Jacking: Again, for a short period I was very into jacking with my friend on hackforums, I know him already from xbox but we got into jacking for a while, we spent our days looking for new methods of jacking and even mixed a bit of social engineering in there to possibly get the accounts over the phone. We did have alot of success, but we also had alot of fails, but the fails drove us to try harder and harder to succeed.

eWhoring: This was my second most effective way of income when I was a little younger, I had (and still have) a few very private packs that work a charm for the weird men of the world. I raised over 400$ in eWhoring, which may not seem alot to some members but I was happy with it. Only recently did I find out that HackForums even had a eWhore section.

Marketing: I feel as though I am a decent marketer, currently I am running a business on HackForums that is selling Steam gifts at 50% of the original retail price. I use my own method for this and it is private, I have had many successful deals already and hope to make more as I get PM's daily. Not to mention, I have implemented a "guarantee" that with my method, if the gift gets removed from your steam account, you can get another copy gifted to you, free of charge to replace it. This shows I can use my brain in the market very well to increase the amount of sales I do.

Graphic Design: And finally, Graphic Design! This is my pride and joy as I am currently studying it in college. I am learning so much in Graphics from this, maybe this thread layout doesn't show my skills but I wanted to stick to a very original theme from the images you posted up. In Graphic Design it takes patients, alot of work, and the ability to communicate and understand taking orders. To work for someone as a Graphic Designer means you must take everything they ask for into account. You cannot leave details out, if they ask for it on a date. You have it on that date! If they ask for it in a certain colour style, again, you have it in that style. If you as an artist don't feel there choice suits the image the best, finish what they asked for and maybe make a few extra ones with different styles just to show them.
I am never afraid to do a little extra work to satisfy someone.
Some examples:
Spoiler (Click to View)

[IMG]http://i1192.photobucket.com/albums/aa327/themodzr/Heinz_zps01ee6a07.png[/IMG]

Tell us why you would be a valuable asset
I personally feel as though I would be a great benefit to the Legion Community, although not an expert in anything, I definatly have alot to share and teach. But more importantly, I have so much to learn from the great members of HackForums. Due to my course I have been forced to improve on my interpersonal skills (communication). This has been such a benifit to me and it has really taught me how to be an overall nicer person, I try to stay friends with the community, not only on HackForums but in my town. I don't have any enemies, I have never been in a fight and I am never the one to bully. I am the one to help the person that is getting bullied, not by fighting but by standing up to the weaker one, the bully. I have been through alot already and I am only 18. I could share but I rather not make this into some sort of pity application. I would rather show my true skills as mentioned above. Overall I feel like I could be a huge asset to the Legion Community because I am willing to learn, willing to teach and willing to be there for anyone who needs help, in ANY situation.

Elaborate on your achievements and future goals
My achievements in life are pretty extensive, I want to travel, just travel the world and enjoy what is out there for me to see. As mentioned before, I am doing a Graphic Design course in my local college, I am only in my first year but am enjoying it immensely! My goal for years was to be a graphic designer, back in the old "Call Of Duty 4" days, I would edit, make montages, youtube backgrounds etc for people, never asking anything in return, just enjoying the fact I was learning something new and how I could enjoy what I myself had created when I was finished making the background, montage etc. It became a huge hobby for me and still is. Currently I am going through a phase of finding methods, for example my steam method to get games is working so well, I am making huge profit and am getting decent sales with no problems at all so far! I am using this money to eventually put back into some sort of business venture, although I am not sure what I will be using it on quite yet. But in turn this shows my drive to learn, create new methods and make more money. I can sit all day, talking to friends and just having a good time, not to mention playing some Counter Strike: Global Offensive with some friends, overall in short term goals, I just want to make some money, save it for a bit and chill with my family and friends. At the age of 18 I am taking life slow and enjoying it! As for long term plans, my only definite one is travelling, I strongly believe making goals that far into the future can be a negative, it limits you from doing new things, enjoy new moments and making new friends.

Tell us about yourself
Sadly, the final section of this application, not much on HackForums do I get to share so much about myself, and I quite like it! Well, firstly, I am 18 years of age. I come from the land of

leprechauns, Ireland! I am studying Graphic Design in college and have been doing so for the past 3-4 months. I live a pretty chill life, I enjoy my friends and families company and enjoy college. I feel a small bit like I am repeating some stuff on this application but I can't find a way around it as my course at the moment is a huge part of my life, and the same goes for HackForums and how I love to learn. As mentioned, I have done computer courses over summer just to learn more, and plan on doing more next year.

I feel as though this is the end of my application and I hope you have all enjoyed it, I tried my hardest on it and everything I said was coming from the heart. I hope I could even be considered for joining LEGION.

<3

XBatt - *November 18, 2013, 2:15 pm*

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your skillset:

Coding
My main coding experience in coding is python as I have made my own set of tools which are some what useful for example, a port scanner, base64 encoder/decoder and more. I also have experience in Java and lua where I mainly solved mathematical problems on the Euler project. I did attend a 5 day programming course on both Python and Java at a university and am also joining a project of 20 guys to make future software.

Pentesting
I want to pursue a career in Pentesting or Network Security as that sounds better! I have bought various books such as the gray hat hacking handbook and some Kevin Mitnick books which help keep me motivated! I mainly practice pentesting in my local network by setting up XP on various old computers and exploiting them. I am still learning however although I do thoroughly enjoy it! I have had fun cracking wireless networks in my local area, using my raspberry pi as an FM transmitter and taking over a radio station frequency in a range of 100m which scares the shit out of people when I put on some freaky stuff! It's pretty fun.

Hardware
I have always enjoyed Hardware, taking apart computers and putting them back together breaking Hard Drive pins and getting really pissed, then trying to fix them with complex ideas like tin foil but never get them to work. I have a fair amount of knowledge about hardware and I do enjoy knowing what actually happens inside a computer. I have done things which have taken my hours upon hours like taking apart my laptop to get to replace the fan, however to get the fan you must take EVERYTHING apart even the god damn motherboard, took around 6 hours of frustration.

Cryptography
Cryptography, ah where do I start. I've got a friend who is really interested in cryptography and we have started a security company. We make various algorithms and are trying to make an algorithm completely decryptable! At the moment we are making an anonymous chat service with direct links between users and it's looking pretty cool so far.

Operating Systems
There are a lot of skills in which I can go into but I would spend hours and am not in the mood.

Operating systems - I do a lot of experimenting with operating systems mainly windows and linux. Recently I've been experimenting with the way windows boots up and the new boot system in windows 8 UEFI. After hours of frustration I ended up going back to home sweet home of windows 7, but I have a basic understanding of UEFI however complicated it is....

I do have a skill set with all the other skiddish stuff but I won't go into that. I may not have a massive skill set but I wish to join Legion to learn due to it's incredibly high knowledgeable members!

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Tell us why you would be a valuable asset: I would be a valuable asset to this group because I am motivated, hard working individual looking to expand my skill set. I an active poster on HackForums and am always looking for interesting projects to join. I specifically want to join Legion because of it's great members, I see them posting great tutorials and I can learn a lot from these guys and maybe become a teacher myself one day!

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your achievements and future goals: In the future I hope to become a Pentester, study computer science at University and pass a few certifications like CEH. I also want to get involved in marketing somehow, because I do like enjoy marketing.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Tell us about yourself: I am passionate about computers looking to learn and become hopefully change the digital word some way or another. I have always been a computer geek ever since I was young, I remember I pirated my first game when I was 8 and felt so over joyed!

Thank you for reading my long application, didn't even get enough space to put everything but that would take hours. ?

Lo?e - *November 18, 2013, 4:00 pm*
(Nov 18, 2013 01:07 PM)Parazyd Wrote: *[CITE]* ^^ You do realize you've used my GFX?
LOL i found that quite funny too ?

ShadowRi5ing - *November 18, 2013, 4:10 pm*
Elaborate on your skillset:

-Reverse Engineering
-Complex Website and Server hacking
-Coding C, PHP, Batch, Bash, JavaScript, HTML5, and Ruby.
-Server Administration
-Technical knowledge on tor and the tor network.

Tell us why you would be a valuable asset:

First of all, my writing skills are unquestionable and I'm grammatically infallible. I am amazing at explaining website hacking methods and quite well at extending on currently known web vulnerabilities. I know vulnerabilities for almost any system and can find new ones quickly if i don't. I could be a massive asset by being able to write perfect tutorials on web vulnerabilities and some reverse engineering and will even be able to help many legion members.

Elaborate on your achievements and future goals:

Achievements:
-Was a security consultant for Zappzter

-Complex web application developer for RuneWeek.com
-Wrote the world's second most popular tutorial on the MS IIS Tilde Directory Enumeration vulnerability. (Third result on Google)
-Wrote a extended tutorial on XSS with some unheard of methods.

Goals:

-Keep expanding on my knowledge.
-Have a better understand of 32 bit PCASM.
-Learn Gui4Cli.
-Write many, many more tutorials.
-Make a major impact in the IS field.

Tell us about yourself:

I wish not to disclose my age or name, I hope you of all people should respect that. I am a very serious individual when it comes to IS and hacking, however, and very fun and entertaining. I have been researching the IS field since i was in the 7th grade. I am a Bitcoin and Altcoin nerd and love the "Let's Talk Bitcoin" Podcast. I am a big fan of Palringo IM and hope to soon make my own tor Group IM client. I hope you consider my application.

byte[] - *November 18, 2013, 6:35 pm*

Elaborate on your skillset:

Ratting:
I think I have been ratting since 2011. I started out with cybergate, switched to darkcomet, and now I am using blackshades stealth. I don't consider ratting a skill, but it is still something that a lot of people do not know how to do. I also can help people who are just starting to rat to portforward and set up their no-ip.org accounts.

Crypters:
I used to always buy crypters of HF since I did not know how to make them, but one day I decided I've had enough of spending money on other peoples programs. At the time, crypters were becoming really popular, so I looked up some crypter tutorials on Google. I swear I was the biggest skid there was. I copied and pasted all the code, had no idea how coding (let alone crypters) even worked. The first time running it, I was so shocked when the detection rate was around 7/35. I started replacing everything that I thought looked like it could be replaced to FUD the crypter, and when I scanned it was 6/35. I kept replacing everything for months over and over, and I got to a point where I though "WHY THE HELL DOES THIS NOT WORK?". I completely forgot about the RunPE. I also met a user by the name of Scarfac3_ at this time. I told him about my problem, and sent him my RunPE. He spoonfed me and fudded the RunPE for me. I scanned it the stub and it was 0/35. I scanned the crypted file and it was 4/35. I thought "Ok now what's wrong?". I told Scarfac3_ about my problem again, and he said it was the way you are storing your resources. I started looking more about resources and I found out I could change the name of what it was stored as. I did that and it became 2/35. Honestly I was so excited that I had came this far. In the mean time, I was getting help from Tweety to convert my crypter to codedom. Once I did that it got many more detections. I replaced the crypt function and added a fake form in the main sub and it became FUD. I think that was the best day of my life. Couple months later, more AV's caught on to embedded resources. I looked up different ways to make my bytes look legit. I stumbled upon a byte

to bitmap class on HF. That made it FUD again. I got a huge sense of relief. A month later, my RunPE got detected again. Thanks to Scarfac3_, it was a piece of cake to FUD. Now a couple months later, I am still FUD.

Spoiler (Click to View)
TL;DR... I started as a huge skid, learned more and more, now I have an FUD crypter.

Booters:
Well, most people know how to do this, but I'm gonna put it here anyway. Booting started in 09 when my friend hit me off for 20 seconds for the first time ever. When he said it worked we flipped out. He didn't tell me how to do it, so I looked up DDOS programs on google. Of course, LOIC popped up. My home connection is about 20 mbps upload, so it was enough to knock off a home connection. Fast forward 2 years. We bought 3 NFO vps's with about 800-900 MBPS upload speed and uploaded some shells to them then made our own booter that sent a webrequest to those 3 shells.

Coding:
I think my whole crypter scenario explained a lot of this. Most people will say the exact opposite but, I just LOVE to use vb for malware. Of course I can use it for other purposes, but I still prefer making malware with it. I am currently going to start a silent bitcoin miner (shouldn't be hard. Just add the miner to the resource, make it drop somewhere, and run it with shell). I would also like some ideas on what to make. I'm not really feeling making a rat with vb though, maybe c#, or I'll go and learn AutoIt or C++.

Tell us why you would be a valuable asset:
I could teach people about how crypters work, give the members in the group a free crypt every now and then, help them with their fudding, help them with a bug they have in their program, share ideas that I have for money making (loopholes with Youtube advertising, bitcoin botnet mining) etc.

Elaborate on your achievements and future goals:

My achievements would be:

The day I got my crypter FUD
The day I first hit someone offline
The day I set up my first booter
The day I set up cybergate and darkcomet
The day I first ratted someone
The day I became.. ANONYMOOOSE! (Jokes.)

My goals would be:

To sell my crypter and make a lot of money from it.
To buy a Nissan 240SX (S14) with the money and do a 2JZ engine swap.
To tour the world and visit the places I've always wanted to go.

Tell us about yourself:
Well, I am currently in high school. I plan to grow up and become an automotive engineer. I really love cars, a lot. My favorite car would have to be a Toyota Supra or a Nissan R34. As stated in my

goals, I plan on buying a 240SX and doing a 2JZ swap on it since Supras are so rare. I guess I know a bit about cars (definitely more then what my friends know). If there is one thing that makes me happy, it's burning rubber and engine sounds ?. Thank you for reading my application. I hope you accept me, but if not, that is ok.

Gonna be honest. This is my second app and took me 3 hours to make. Would be disappointed if I didn't get in

Titanium Man - *November 18, 2013, 7:19 pm*

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your skillset:

I started making Template and Code modifications to begin with and I learned SQL with css for the purpose of adopting Web Designing as something which I enjoy. Coming to MyBB, I have a very decent knowledge of coding in MyBB. Some of my works can be found below.

Code .buttons {
  background: #D02626; /* Color of the button */
  border: 1px solid #6E0000; /* Color and width of border */
  padding: 3px 12px; /* Height and width of button */
  color: #fff; /* Color of the font */
  font-weight: bold; /* Makes the text bold */
  font-size: 12px; /* Size of the font */
  font-family: Tahoma; /* Font used on the button */

}
Code Edit
{$lang->postbit_quick_edit} {$lang->postbit_full_edit}
<script type="text/javascript">
// [b]<!--[/b]
    if(use_xmlhttprequest == "1")
    {
  new PopupMenu("edit_post_{$post['pid']}");
    }
// -->

Ratting has been the first thing i'v learnt to do with "Hacking". But I do find the art of spreading it too many victims or getting a certain person to download your Infected server is some type of skill. It involved Social engineering sometimes but others just websites and automatic spreading. I try to SE anything I can. I spend most of my time trying to SE Larger things but fail. SEing is helps me with my other skills such as "Hacking" and "eWhoring". I try to improve my social capability's by eWhoring and persuading others.

I started GFX back in last 3 years and dropped due to lack of interest. Then I resumed learning GFX, back in June 2012 and since then, I have used my knowledge of GFX for making MyBB Themes & Forum Userbars. I started with using Paint.net & GIMP and then switched to Photoshop CS6 and finally continued with Photoshop and I have been using it till now.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Tell us why you would be a valuable asset: I think I would be a valuable asset to the group simply because of how hard i'm trying to improve my self across hackforums. I'm all ways trying to learn and teach. I would like to spread my wisdom across the forums and the groups name, because I want to get the groups fame to its maximum potentially.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your achievements and future goals: In the future I hope to become a IT Technician, study computer science at University and pass with good certifications. I also want to get involved in marketing somehow, because I do like enjoy computing.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Tell us about yourself:
I am passionate about soccer looking to learn and become hopefully involve way or another. I have always been a computer geek and enjoy RAP and Electro music.

Thank you for reading my long application. ?

(Nov 11, 2013 08:44 PM)?CEO?? Wrote: *[CITE]* at this paticular time as I don't feel they're relevant.
I'm going to disclude any of my atheletic achievements as I feel they're unnecasarry.
"Disclude" should be disclose. "Atheletic" is actually spelled Athletic. "Unnecasarry" should be unnecessary. I wouldn't accept members who cannot spell.

As noted on the first page: Quote:Mind your grammar and appeareance.
Once again, "appeareance" should be appearance.

?ain - *November 18, 2013, 9:14 pm*

Elaborate on your skillset:
I am a fast learner, first of all. I figure that's more important than anything else.

RATting, and Botnets:

This isn't a skill, but the spreading and profiting of it is something I'd consider a skill. I was making a large amount for a short period of time, until I lost my portforwarding ability.

I know many ways to spread, and was getting a few hundred every day, and a large portion of that was without a crypter. If you have a crypter or anything else, I can guarantee ways to get a ridiculous amount, daily.

I am very skilled in the set up and use of either type.

SQLi:

I am currently learning this, very basic as of now. Again, fast learner. I am learning SQL from W3, and learning the usage of it from your eBook.

Coding:

I have a very basic knowledge of Python and Java. I hope to learn more, and possibly have you guys to help and push me to do and learn more.

Marketing:

I have recently started in the field of marketing, and have been making slow but steady profit.

Tell us why you would be a valuable asset:

RATs are a very tricky thing, and I could help people in every which way about them. I am very resourceful, and know a lot of little tips about a lot of little things (those are always the most important), and am willing to share my knowledge. After all, shouldn't that be the point of hacking? To gain knowledge.

Elaborate on your achievements and future goals:

I have finished my eBook pertaining to spreading, with or without a crypter, and how to profit greatly from it.

I have nearly set up enough different things to start my own social network shop.

I will soon be getting a botnet, and hope to get a solid crimepack or sJDB to get a large enough amount of slaves to start my own botshop.

I have successfully helped a large number of people with spreading, and am planning on doing more.

I have made, as of now, almost $200 in about a month. A lot of this is methods that are generally to be talked about, so if you have questions regarding as such, please contact me on my Skype, which will be listed below.

One of my main future goals is to host my own VPN, and possibly a few other things. I hope to get a larger botnet as well, and also possibly set up my own putty booter.

The very main goal is to master SQLi, Java, Python, VB.NET, C++, and Linux. Then, to code my applications.
Tell us about yourself:

I'm 16, in highschool. Teaching myself coding through eBooks, trying to make money online, and learn about investments to make a steady profit in the long run. I hope to get a pentesting degree once I am competent enough, and to become a computer scientists licensed in many different languages. I believe myself to be a fast learner, and am willing to learn anything of value. If you have more questions, contact me on Skype: share.lf@outlook.com

?Mephobia - *November 18, 2013, 9:33 pm*
Elaborate on your skillset: A programmer studying computer science at a University. Attempting to get my BCS. So I am pretty skilled. I am also a skilled marketer. I own 1 product with a total of 1,800+ customers, and I recently released another product. In the past I used to spend a lot of time hacking. Since then, it has died down and I do not hack anymore. I know a lot about it, and I know a lot about whitehat as well. I'm good with RATs, keyloggers, you name it.

Tell us why you would be a valuable asset: I have some great knowledge I can share with people. I am also code people snippets to do custom things and make APIs/Wrappers for whoever.
Elaborate on your achievements and future goals: I have been running a product for over a year now, and am still getting sales everyday. I plan to learn more about moneymaking and investing in the future, but right now I am at college working on my BCS degree.
Tell us about yourself: I'm a freshman in college. I love to play video games and browse the internet. I am very mature compared to about 90% of people on this forum, possible more. I know more than you think. I do not think an extravagant explanation is needed for this application as you can just look at my profile, thread, rep, and so forth.

Hope it is ok, but I am going to PM you to talk a little about Legion.

vitalitasia - *November 19, 2013, 3:17 pm*

Elaborate on your skillset:
Ratting
My first "hack" was with a RAT. I used it to shut off computers in class when I was 11. Since then I was addicted to extraordinary ways of using a computer. I continued playing with RATS, on LAN-partys I infiltrated some of the computer of my friends. I grew up, and now I only use RATs to gather informations.

AutoIT
I write software with AutoIT since 4 years, but only on the side. From time to time I do some bigger project, but my skill can still be improved. I published my AutoIT keylogger and RAT here in Hack Forums, open source. I still have some projects in mind that I will definitely will do in the near future (software for controlling different machines via USB and perhaps a PHP-RAT).

HTML/CSS
8/10 HTML, 5/10 CSS.

SQLi/XSS
I know theoretically how these work. I read most of the tutorials here on HF, but I don't want to worry about trouble that I could get because I try these methods. Take a look at my future goals.

Patience
I'm very patient. I can work on one not working piece of code for hours, without going crazy (maybe a bit).

Social Engineering
If necessary, I can manipulate people. This works for me in reallife, I never had the need of SE

someone here.

Graphics
I can do some basic stuff, but I'm not a designer. It's enough for my needs.

Tell us why you would be a valuable asset: I'm very active here on HF since an half year. I'm always as helpful as possible, I would try my best to contribute to the group. The reason why I want to join the group is that I want to learn as much as possible. That way I could teach others sooner or later.

Elaborate on your achievements and future goals: No special achievements

Goals:
Setting up a safe website where people can test their hacking skills and practice several methods completely legally. I already saw similar pages, but they were too difficult for beginners and didn't give hints on what method to use. I would make a page where you learn everything by doing it, completely legal. I would need the help of the group for this project.
Improving my skills in different fields.

Tell us about yourself:
18 years old
LaVeyan Satanist
Already living in my own flat
Going to finish my school in a half year

Just A Lion - *November 19, 2013, 3:39 pm*

Elaborate on your skillset: My skillsets are VB, Java, Graphic Design, Photography, Doxing, Account Recovery, HTML, CSS, Warranty exploitation

Java, I can't code stuff from scratch but I used to code stuff for both minecraft and runescape private servers (as of which I owned my own private server)

VB, I have coded fake programs in the past for spreading, one that got spread round a bit on youtube was fluicity's hacking tool (as my nick name is fluicity) you can youtube it but most vids have been removed there is like one left.

As well as that I also made a Arma 2 OA Key stealer which steals keys and sends it to your email

and i've also made some stuff in software development class

HTML & CSS & PHP, Currently studying these in software development

Warranty Exploitation, I made around $500 in one week on BF3 Release, with my own method and by myself, but i hired a few other people and sold there keys for them after teaching them and let them know i was keeping $5 per key and made up to around $1500 in the end. (2 weeks)

Tell us why you would be a valuable asset: I want to become a student in this but I know quite a bit

already, I will be a valuable asset because I am fast at learning alot of things and I am very flexible, I will also be a dedicated member to the group and spend a lot of my time in the sub-forum
Elaborate on your achievements and future goals:
Well as I said i've made a lot of money from just one project of my warranty exploitation I also made quite a bit of money from Doxing & Account Recovering (Runescape accounts to be exact)
One of my other achievements was I was one of the first people to spread using private server's with my own method, my method was that I had a encrypted .bat file on the client files (back when there was barely any .jar servers). the run.bat file opened the client but also renamed a .class file to a .exe then ran the .exe and 10 seconds later renamed it to a .class again, i obviously used cls to not note the user what was happening and it also happened in a sub folder so you wouldn't see files moving about.
Tell us about yourself:
Well i'm currently 18 and in the military but I have around 3 months time off then I will be on here every night mostly if I don't have exercise (like night patrols and what not) my names Dylan / Flu / Lion and I'm into Greyhat/Blackhat. I've been very fast at learning stuff to do with computers from the age of around 12.

-Max - *November 19, 2013, 8:06 pm*
Elaborate on your skillset:

I am an avid programmer, especially in Python as it is my favorite language; however, I know a few other languages as well (C and PHP to name two). I am also skilled in vulnerability analysis, especially web apps, web developers really need to learn how to sanitize input, it is so easy, and sad that they don't. Other skills: MySQL, MongoDB, Flask Web Framework, Linux, and that's all I can think of.

Tell us why you would be a valuable asset:

I believe that my programming knowledge could really be valuable in your group, I am capable of creating complex tools and scripts that could not only be valuable for the group, but also for the HF community.

Elaborate on your achievements and future goals:

Here are a few of my projects:zCoin - A Peer-to-Peer Crypto Currency that takes a different approach to the concept: https://github.com/Max00355/zCoin
ByteMail - A Peer-to-Peer email protocol I designed. https://github.com/Max00355/ByteMail
LanderDB - A zero-config DB engine that uses JSON to store data in flat files. https://github.com/Max00355/LanderDB
Ernie - A small programming language interpreter I created one weekend, it is fully functional as well! https://github.com/Max00355/Ernie

For more of my projects check out my Github: https://github.com/Max00355/

In the future I hope to continue to create software that is not only challenging, but different than what you see on HF, and even on the internet as a whole.

Tell us about yourself:

I am a 17 year old attending highschool. As you probably already know, I love to program and create things. I am interested in tinkering with software source code, to learn how they work and how I can replicate it myself, which is how I have always learned new programming skills. All these skills I have I hope bring to the table if I am accepted into this group, and help to improve the

community overall, and maybe learn something new along the way.

alfalfa - *November 19, 2013, 10:04 pm*

How does one become a student?
Thanks.
An application for the honorable place of Student within Legion. Elaborate on your skillset:

I can vary easily adapt to most programming languages and have alot of experience with many (although if I stop for a while I become rusty)

I am familiar with software based computer terms (however not software).

I have found several PHP 0days, although none of which where very impressive they demonstrate a skill in terms of auditing code for vulnerabilities.

I can audit a website for various vulnerabilities through Google dorks and URL modification.

Tell us why you would be a valuable asset:
I would be a valuable asset as I do not require spoon feeding and will thrive through any kind of teaching. I will be VERY very comfortable with teaching a subject I have been taught and I will master it to the best of my potential.

Elaborate on your achievements and future goals: Unfortunately as I am new to the hacking scene I do not have any notable achievements although I mainly hope to learn the art of auditing for Buffer Overflows.

Tell us about yourself : I am mature but not humorless. I am not homophobic or racist and I respect apposing views, in fact I care solely on the information supplied.

Thanks for reading and please consider me.

nonA? - *November 20, 2013, 5:15 pm*

Elaborate on your skillset: Im good for figure out bugs and niches what can use for blackhat purposes, also have skills to doxing,spreading. And good knowledge of botnets(HTTP)

Tell us why you would be a valuable asset: I have skills to handle risks and figure are those worth of that risk, im good student and good teacher(for things to what i can teach)

Elaborate on your achievements and future goals: Archievements? Future goals are simple: Using all my brains & skills and time to become Blackhats blackhat.

Tell us about yourself: 22year old "normal" guy from Scandinavia, my job is learning and teaching much i can related to hacking&computers. Im very social sometimes maybe oversocial? and i have damn good nervous for teaching & learning and ofc doing work what is related to hacking.

Yakz - *November 20, 2013, 5:29 pm*

Take your time in writing your application, instead of posting it in one day you should take your time and post it when you're fully satisfied.
You'll have to wait for the wave results anyways so why not take your time?

Good luck applicants!

(Nov 18, 2013 02:56 PM)D??????????????ark Wrote: *[CITE]* Spoiler (Click to View)

Introduction
My name is Dark and I am a rather new member on here but I have alot of experience in many different fields of work, some of with include C++, Graphic Design, some HTML5, Cracking, Jacking ,eWhoring and overall Computing.

Elaborate on your skillset
C++ and Java: This, I have learned via the popular computer game "Mindcraft". As a younger teenager I would go on mindcraft and play with friends. Frequently watching youtube videos of new mods and plugins for the game and its servers. Quickly I got interested in learning all I could about this new language that is C++. I produced my first mods adding mobs and items to the game which gave me alot of drive and ambition, when a mod wasn't working for me I would search and search until I finally got the code written perfect with no bugs.

HTML5: Last year during summer I decided with two of my friends to go to a computer course in the local college, we learned a ton of stuff but I excelled more so in HTML5, we learned to code some apps, some websites in the course. All on the PC's in the college. Some people thought it was odd that I spent about 2 weeks of my summer learning coding in more detail but I found it so interesting.

Cracking: For a short period of time I researched the methods of cracking on HackForums, preferably steam cracking. I also ended up coding my own Sentry config, sadly I have lost it. Most of this cracking was just for fun and not for selling via HackForums market, but as mentioned before, I love learning about new ways to Hack or code.

Jacking: Again, for a short period I was very into jacking with my friend on hackforums, I know him already from xbox but we got into jacking for a while, we spent our days looking for new methods of jacking and even mixed a bit of social engineering in there to possibly get the accounts over the phone. We did have alot of success, but we also had alot of fails, but the fails drove us to try harder and harder to succeed.

eWhoring: This was my second most effective way of income when I was a little younger, I had (and still have) a few very private packs that work a charm for the weird men of the world. I raised over 400$ in eWhoring, which may not seem alot to some members but I was happy with it. Only recently did I find out that HackForums even had a eWhore section.

Marketing: I feel as though I am a decent marketer, currently I am running a business on HackForums that is selling Steam gifts at 50% of the original retail price. I use my own method for this and it is private, I have had many successful deals already and hope to make more as I get PM's daily. Not to mention, I have implemented a "guarantee" that with my method, if the gift gets removed from your steam account, you can get another copy gifted to you, free of charge to replace it. This shows I can use my brain in the market very well to increase the amount of sales I do.

Graphic Design: And finally, Graphic Design! This is my pride and joy as I am currently studying it in college. I am learning so much in Graphics from this, maybe this thread layout doesn't show my skills but I wanted to stick to a very original theme from the images you posted up. In Graphic Design it takes patients, alot of work, and the ability to communicate and understand taking orders. To work for someone as a Graphic Designer means you must take everything they ask for into account. You cannot leave details out, if they ask for it on a date. You have it on that date! If they ask for it in a certain colour style, again, you have it in that style. If you as an artist don't feel there choice suits the image the best, finish what they asked for and maybe make a few extra ones with different styles just to show them.

I am never afraid to do a little extra work to satisfy someone.
Some examples:

[spoiler][IMG]http://i1192.photobucket.com/albums/aa327/themodzr/Typography_zps8177d647.png[/IMG]
[IMG]http://i1192.photobucket.com/albums/aa327/themodzr/Heinz_zps01ee6a07.png[/IMG]

Tell us why you would be a valuable asset
I personally feel as though I would be a great benefit to the Legion Community, although not an expert in anything, I definatly have alot to share and teach. But more importantly, I have so much to learn from the great members of HackForums. Due to my course I have been forced to improve on my interpersonal skills (communication). This has been such a benifit to me and it has really taught me how to be an overall nicer person, I try to stay friends with the community, not only on HackForums but in my town. I don't have any enemies, I have never been in a fight and I am never the one to bully. I am the one to help the person that is getting bullied, not by fighting but by standing up to the weaker one, the bully. I have been through alot already and I am only 18. I could share but I rather not make this into some sort of pity application. I would rather show my true skills as mentioned above. Overall I feel like I could be a huge asset to the Legion Community because I am willing to learn, willing to teach and willing to be there for anyone who needs help, in ANY situation.

Elaborate on your achievements and future goals
My achievements in life are pretty extensive, I want to travel, just travel the world and enjoy what is out there for me to see. As mentioned before, I am doing a Graphic Design course in my local college, I am only in my first year but am enjoying it immensely! My goal for years was to be a graphic designer, back in the old "Call Of Duty 4" days, I would edit, make montages, youtube backgrounds etc for people, never asking anything in return, just enjoying the fact I was learning something new and how I could enjoy what I myself had created when I was finished making the background, montage etc. It became a huge hobby for me and still is. Currently I am going through a phase of finding methods, for example my steam method to get games is working so well, I am making huge profit and am getting decent sales with no problems at all so far! I am using this money to eventually put back into some sort of business venture, although I am not sure what I will be using it on quite yet. But in turn this shows my drive to learn, create new methods and make more money. I can sit all day, talking to friends and just having a good time, not to mention playing some Counter Strike: Global Offensive with some friends, overall in short term goals, I just want to make some money, save it for a bit and chill with my family and friends. At the age of 18 I am taking life slow and enjoying it! As for long term plans, my only definite one is travelling, I strongly believe making goals that far into the future can be a negative, it limits you from doing new things, enjoy new moments and making new friends.

Tell us about yourself
Sadly, the final section of this application, not much on HackForums do I get to share so much about myself, and I quite like it! Well, firstly, I am 18 years of age. I come from the land of leprechauns, Ireland! I am studying Graphic Design in college and have been doing so for the past 3-4 months. I live a pretty chill life, I enjoy my friends and families company and enjoy college. I feel a small bit like I am repeating some stuff on this application but I can't find a way around it as my course at the moment is a huge part of my life, and the same goes for HackForums and how I love to learn. As mentioned, I have done computer courses over summer just to learn more, and plan on doing more next year.

I feel as though this is the end of my application and I hope you have all enjoyed it, I tried my hardest on it and everything I said was coming from the heart. I hope I could even be considered for

joining LEGION.

<3

[/spoiler]
Good luck on getting in man! That userbar would look so sick with your avatar, name, and sig!

Exotic™ - *November 20, 2013, 6:23 pm*
[IMG]http://i.minus.com/ieq6viOQ6szdE.gif[/IMG]
Elaborate on your skillset: Well to start off, I have many skillsets. I am outstanding at Social Engineering. Almost everyone
I speak with on voice chat or Skype. I can convince To do almost anything. I am excellent at EWhoring, this would be my
second best trait. I made over $300+ on my old paypal account. Sadly it was limited, due to all the money coming in.
I can make money, with Ewhoring and Social Engineering. These have to be my very best traits. I also, am
very talented with Graphic designs. I am starting up a GFX shop real soon.
I know my way around and I could easily make money.

Tell us why you would be a valuable asset:

I would be a "very" valuable asset, because I have been into "Hacking" and programing for a while now. I have always been
Very interested in what I could do to help earn money. Over 8-9 years of just working hard on trying to make money
With many different exploits and guides. I became a part of the Anonymous / Legion a long time ago, however I am not the
Best at what others can do. I have an amazing skill set and I could easily get the job done and get it done right. I
Wanted to become a part of Legion for a very long time now. I have been in quite a few Operations from time to be.
I am currently working on building my botnet, I do not go around booting kids either. To be honest, I can't stand
That type of work. I hate when I see these skids going around claiming they are big and bad and how they can DDoS.
When I am thinking to myself, you have a $20 booter, what's the worst you can do? So anyway, I support the
Operations and I supported Anon for a very long time now. I would be an excellent asset to the group!

Elaborate on your achievements and future goals:

I would have to say my best achievement by far is when I started doing operations and making
Money off the back. I made $300+ Ewhoring, I have started up a botnet. I have been a part of "Legions"
Operations for a very long time now. I have earned respect by many people. So overall, just being the
Best at what I do. I know how to cover my tracks, and make money along the way.

Tell us about yourself:

I am 15, I am in high school and I act pretty mature. I have never DDoS'ed people who didn't

Deserve it. I have always been into legion operations and such. I am very active, I take MMA and boxing in real life. I have an amazing family, and I have worked my very best To do what I can do today.

(Nov 20, 2013 08:29 PM)Furroh Wrote: *[CITE]* Considering the fact we can't edit them. How do we put more effort?

PM the group owner for permission to edit your application.

Bogatyr - *November 20, 2013, 10:29 pm*

Elaborate on your skillset:

My skillset includes the following:

Knowing the concept of SQL Injections, exploiting them and other vulnerabilities such as RFI, MITM, RCE and others. Intermediate knowldge of PHP,CSS, Javascript, and I am extremely motivated to be perfect at C# which is my favorite language.

I have 2 years of experience of Web Development(mostly javascript). Knowledge of Metasploit Framework. Social Engineering skills, they are not one of the greatest out there and neither they are the worst. Overall, I believe i know a little bit of everything. There is no particular area that i am perfect at.

Tell us why you would be a valuable asset:

Well, i think i would be a valuable asset because I like teaching others if there is such possibility and working together as a group which is what i heard Legion is about.

Elaborate on your achievements and future goals:

My short term goals:

Finish working on a crypter(C#)

Start a VPN service

Long Term:

Get better at coding in .NET Framework.

I definitely want to graduate from college.

Start an actual business.

Learn as much new information during my life time as possible.

Tell us about yourself:
My name is Nikolay. I speak fluent Russian and English. I have been on Hackforums a year ago but all the sudden, i had so many events going on at the same time that i had to quit Hackforums and hacking world overall. Now i have free time again which I am willing to spend on developing my hacking/coding skillset. All the members of Legion seem to be very intelligent and professional and that is why want to join this group, i want to learn from them.

Rainbow Dash ?'s Legion Application

Elaborate on your skillset:
Coding
My coding capabilities are not too vast at this point in my life. Currently, I am learning C#, along with Java in school. I'm taking a class called Computer Principals, and currently we are in our C# unit. Next semester, I will be in a class called Intro to Java, and as you can guess, I will be learning Java. Outside of these classes, I am studying these languages as much as I can, trying to get ahead a bit. I've also studied HTML5 and CSS a little bit. I know the basics of HTML/HTML5 along with CSS.

Computing
I know my way around any Windows system fairly well. Nothing too above average, I know way more than enough to get by though. I also know a bit about Linux systems, I've been playing around with some distributions of it here and there. I'd love to learn more.

Graphics
I know how to use Photoshop (Any version), quite well. I enjoy graphic design, and have more than average knowledge in it. I'm not the best at it, but I enjoy it thoroughly. I'd love to expand my knowledge in this subject.

Hacking
This is the subject that I am lacking in the most. I'd love to be able to be apart of this group and learn as much as I can, and then in the long run be able to share my knowledge with others that are seeking information and knowledge such as I am. I can't really offer much in this area at the moment, but if I can seize this opportunity to join this group and learn, I'll be able to give back to the

group for what it will hopefully give me knowledge wise.

Overall
Overall, My skillset is not too vast, but I'm looking to expand it. I have basic/intermediate skills in most areas. I'm applying because I'm looking to learn.

Tell us why you would be a valuable asset:
Why I would be a valuable asset
Honestly, I don't think I'd be much of a valuable asset currently. With this opportunity to join, to learn, I believe that in the long run I'd be able to give back to this group for what it may give me. I'm a respectable member, I'm mature, and I hold myself to a higher standard than most.

Elaborate on your achievements and future goals:
My achievements and future goals
Currently, I don't have much in the way of a list of achievements. None at the moment. Although, I do have goals. My future goals are to learn and develop skills that I use to possibly start a career and also try and build my life on top of it.

Tell us about yourself:
About me
I'm a 16 year old male, Currently in High School. I'm extremely interested in computers and they're apart of my daily life. I'm also a musician, I play Alto and Tenor saxophone. I've played them both for a total of 6 years. Last year, I made one of the best decisions of my life and joined my schools Marching Band. I can honestly say that it's one of the best choices I've ever made because I have developed many skills that I wouldn't have without it, such as knowing how to work well with others, and a sense of independent importance. I've become friends with so many talented young and nice people. We won 3rd overall in our competing class in the state this year, and we were the smallest out of 20+ bands that competed in our class.
That's a little bit about my personal life. I consider myself to be an intelligent person, I love learning new things, I strive to be the best that I can.

Thank you for this opportunity, and thank you for reading my application.

Acroz - *November 21, 2013, 5:19 pm*
Interesting. Glad more hacking related applications are arising :D

If you need to ask a question, please feel free to contact me. I will NOT accept/deny your application. Only Anonymous has permission to do so.

Doxicity - *November 21, 2013, 7:35 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skill-set:
My skill-set lays within the technology, hacking, and social sections within the forums.
I've always had an interest in technology, specifically computers. My interest is primarily hardware. I started working with computers at a young age, when I put my first gaming computer together with my dad about 3 years ago. Since then, I have become more interested with computers. Last year I took a computer repair course offered at my school, and this year I am taking the second party. I acquired my CompTIA 701/702 certification at the beginning of this year. At the beginning of next year, I will be going for my 801/802 certification. After I pass those, I hope to study more about security and networking. I can work well with all aspects of computers and technology. Within the

first few days of having my Android phone, I had rooted it, and was overclocking it, and tweaking other aspects of the phone. I hope to work with technology as a future career.

Another party of my skill-set is the hacking section of the forums. When I first joined the forum, I was most interested in learning about keylogging, and keylogging people on the games I played. When I soon learned all there was about keylogging, I discovered the RAT section. RATs were such an advancement to keyloggers, the possibilities were endless. I began using RATS for simple purposes, such as screwing with my slaves, or taking game accounts. I soon started spreading on a higher scale, and I achieved around 1150 slaves through torrent spreading. I hope to soon start RATing again, but for monetizing purposes. I own many of the popular RAT controllers, but my favorite is Imminent Monitor, and I am excited for the soon-to-be recoding. I now spend my time in the RAT section helping other users with their problems, and I ran a help desk, which has been inactive since the beginning of this month. I'd probably be able to start the help desk again, under the name of Legion. When I'm not helping users within the RAT section, I'm helping users within the beginner hacking section. Many users join this forum, and post in that section confused, with many questions. I try to help every user who posts their, and guide them on the right path on HF. Most of us joined this forum, new and un-experienced within these topics, with questions and wanting answers.

My final skill-set is within the social sections of the forums. Some may not consider this a skill-set, but I feel this illustrates my good traits. I'm a friendly user who enjoys having conversations with other users of the forums. I've meet a lot of good friends on HF, who I hope to remain friends with for time to come. HF is just like Facebook, or any other social media site, with a community, and plenty of people to talk to, but it's much more. HF contains users who have similar interests, and makes it easier to get in contact with those who you have similar interests in. Whether it's a thread in the lounge, adebate in the SRPP section, or advice in the Innuendo section, I enjoy conversing with the many members of HF.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I would be a valuable asset to Legion, because I can apply my skill-sets, and contribute to Legion. I can apply my knowledge of computers and technology within the sub-forum, and out of the sub-forum. I am always willing to share what I know with other members, and accept new knowledge from other members. I can also apply my knowledge of the RAT section and other hacking sections to members of the sub-forum, and out of the sub-forum. I am very active within the RAT section, and consider my self a reputable member within that section. I can dedicate my help desk under the name of Legion. I can release tutorials for members of the sub-forum, and others alike. I can use my social skills and start conversations with the many members of Legion. I can start various discussions on different topics within the sub-forum for members to discuss and debate on. I can give advice to any members of the group, who just need someone to talk to. I can be active within any group discussions, and give my opinion, and such. I will be active in any group events, or requirements within the group.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
Graduate high school with my Advanced Regents Diploma.
Attend a good college, hopefully either Caltech or NYU. My mayor being Computer Engineering.
Get a career which makes me happy, while still having a comfortable salary, preferably six figures.
Find a wife who I love, and start a family, with two dogs.
Remain in contact with my close friends from high school after I graduate.
Become interested in sky diving as a hobby, and actively do it when I become 18. Sky dive in Dubai.
Start air brush painting as a side-job/hobby in the future.

Live my life to the fullest every single day, and never regret the choices I made. Ultimately live a happy and full life.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I'm 16 years old, and a junior in high school. I live on Long Island, NY. The most important aspects of my life are: Family/Friends, Future, Technology, and Gaming. My family and friends have always been there for me throughout my life, and I always want to be there for them. They come before anything, and are most important to me, and I would never do anything to look them wrong. I've always been interested and planning my future. I hope to finish high school with my ARD, and with a high GPA. I'd soon afterwards like to go to college, specifically Caltech or NYU, majoring in Computer Engineering. After I complete high school, I'd like to live on Long Island. I'll find a good career, which I will be happy with, while also supporting me and my future family comfortably. I hope to find a wife, who I can start a family with sometime in the future. I currently have 3 Mastiffs, and I hope to have 1 or 2 with my future family. I hope that I'll never regret the decisions I made in my life, and I'll die happy. Technology is currently my biggest interest, and I'm always reading up on new things. For example, for those of you who didn't know, DDR4 RAM will be introduced to the market soon, allowing 16GB of RAM to be found on a single stick. I've always loved working with technology, both hardware and software, it is my passion. I plan to make a career out of technology, even if I die trying. I've been gaming since I'm young, my first console was a Nintendo 64. I used to be a big Xbox player, until I was introduced to League of Legends, and I started playing computer games. In 2010, my dad purchased parts for my gaming computer, and we built it together. I'm still using that gaming computer/case as of today, but with upgraded and updated parts. I spend a lot of time of my day on my computer, playing games, talking to friends, and on Hackforums. I joined Hackforums Christmas of 2011. I had joined looking to learn about keyloggers, and start playing with them. I stayed to learn more about the different aspects of hacking, and programs. I soon became engulfed in the wonderful world of RATs, and I still am today. The RAT section is my most active section on Hackforums. My largest Hackforums milestone will be the day I get the RAT award, and I don't plan on leaving until then. I also stay on HF, because it's just like any other social media site. It's a place to hang out with other members, have conversations with them, and meet new friends. I enjoy the many different aspects and sections of Hackforums, and it's my most visited site since 2011.

Fintastic - *November 22, 2013, 12:22 am*
Elaborate on your skillset: Hacking isn't really my thing. I think I'm good in SE, human manipulation and making money. My moneymaking methods are most likely same than others, eBay and SE. I make something like $800 per month nowadays, but in future I'll make more because I just got my adsense working on Youtube. I'm making something like 100€ per month on Youtube without any boost and I'm trying to make more, because I've now copyrights claims on my popular videos and one video is going to be released soon :)

Tell us why you would be a valuable asset: I'm ready to share my information about everything, because when other people share their information too that will boost my earnings and their earnings. I think it's better to earn 2k in a month than 1k etc. Everybody knows that e-book bazar's moneymaking methods are 100% bullshit, and when people share their information for free nobody gets disappointed.

Elaborate on your achievements and future goals: Well, I don't know what my achievements really are, because in my opinion those could be like hitting 10k per month, but as I said before I'm making

now something like ~800 bucks per month. I maxed my earnings in February but when my real PayPal got banned I haven't made so much money on eBay. My future goals are to get my YT channel popular (Now 1.5m views/2.2k subs) and that way earn "free" money. I'm trying to improve my SE skills too to make more money that way.

Tell us about yourself: Well I think you aren't interested about my life story so just put it short; I'm 18 years old boy from Finland. I'm interested on sports and gaming. I'm in high school right now, actually now it's the last year so I'll go to army after that. I'll be in tank force which is exciting and I'm waiting for it, I'll go to peacekeeping also if my girlfriend lets me do it, because she's scared that if something happens.

Ascendon - *November 22, 2013, 11:32 am*

Ascendon's Application Form
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your skillset:
I am a Network analyser and a Penetration tester. I love to hack into websites for all sorts of reasons. e.g money, prestige, justice.
I am great with technolodgy and I have a wide understanding of how things on the inter-webs work. I love to find answers to stuff and when I don't.. I am even more determined to find it.
I have fairly good marketing skills and I'm good with SEO Businesses. I have never posted a thread on HF about my SEO services because I mostly do them locally. Girls will pay anything to have their Facebook picture liked.
--
Website Hacking:

Sql Injection
XSS
CSRF
SE
Symlink
Upload Exploiting.
--
Basic coding:

Html
Css
C++
Basics in Python
Basics in Javascript
==

Tell us why you would be a valuable asset:
I think I can contribute towards this group and really make an effort into teaching and learning methods of hacking. I am great to be around because I always keep up conversations and I like to be organised and have a plan for everything.
I can put everything towards this group to make it a great and enjoyable place.
Elaborate on your achievements and future goals:
I would like to become a better hacker and understand different methods to gain access for different websites. I would also like to learn more so I can approve for a Job when I am slightly more older. The Job I want will be very hard for me to get without the support of other people.
Tell us about yourself: I am 14 year old. I spend about 20 hours per week on HF and the computer because I have school in the mornings. I teach people and learn from people how to hack and I enjoy requests when I am bored. I am fun and I don't think I am a squeaker. I am from the UK in

Brighton and if anyone cares I have great grades in every subject.. Apart from French and Spanish.

0x45 - *November 22, 2013, 1:07 pm*

Elaborate on your skillset:
Coding(C++, C, Java(Including Android), php, SQL, JavaScript(Including jQuery and other frameworks), Python)
Hacking(SQLi, XSS, CSRF, using exploits, metasploit, writes BufferOverflow attacks)
https://github.com/nitinrox789 (I am new to github, dont want to make all my work public)
Tell us why you would be a valuable asset:I am a skilled coder, so can work on any projects undergoing in the group. Also, will help develop vulnerabilities into exploits.
Elaborate on your achievements and future goals:Computer Science undergrad is the only achievement I can think of now. Future goals include a Masters degree, more skills, getting signed by a football(soccer) team, a girlfriend etc
Tell us about yourself:Computer Science undergrad is the only achievement I can think of now. Future goals include a Masters degree. I have no ideas and all I do is develop other's ideas. Lame me. I am looking for ideas, which is the main reason why I am applying.

iGnite - *November 22, 2013, 9:30 pm*

BigDickBandit - *November 23, 2013, 5:03 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your skillset:

I am highly skilled in the fields of RATs, marketing, monetiziation. I am in charge of sales and marketing for the jRAT4 product, and I am highly skilled with most RATs on Hack Forums.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:

I carry myself with a sense a pride, and dignity. I assist members in day, teaching them my skillset, and helping them grow their talents. I am a trustworthy seller, exchanger, and businessman. I have many threads showcasing my sales, and I am releasing two new products within the next week.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:

I have successfully applied for Ub3r as of recent, and am awaiting activation. I was in Innovation, for my skills in monetization and marketing. I am looking forward to releasing many new products, including an Ebook, a website, and more from the jRAT line.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I am a businessman. That is how I see myself. I enjoy making deals on this site, and I do them professionally. As for my RAT skills, half of it is usage, and the second part is being able to answer any question anyone asks and being able to teach them how to use their product successfully. I am looking to enter a group because I enjoy assisting other users, and I want to work with members of Legion. I am willing to do business, and assist other Legion members with advertising their products.

^ I want to see more applications like these.

Application Tips

Legion is a hacking group.
But it does not matter if your hat is black, grey, or white. Anything related to cyber security is relevant.
Legion is a place to learn. So be serious about it. Tell what you know, or what you want to know.
These are just tips, if you have a skill that I did not list, but you think will help you get in the group, by all means mention it.
And not knowing anything but are willing to learn, is far better than lying to make yourself look good.

Topics To Avoid

Video Gaming
We're not looking for quick scopers, we do not care about your K/D, how many creepers you've killed in Minecraft,
or how video games have inspired you to hack because you were butthurt when someone was hacking the game server you were in.

Graphic Design
Legion is a hacking group, not a fashion show.

Social Engineering
Besides the fact that it's banned on HF, you're not impressing anyone SE'ing someone on the phone, or online.

E-Whoring
Is not a skill, and in my personal opinion, you have to be sick in the head to do it.

Ratting
Is not a skill, but do mention how much you're willing move on and climb up the hacking ladder.

HTML/CSS
Is not a skill, nor a programming language. But if you show an example of a page you created, it will help you.

BT Mining
Is not a skill and is not impressive.

Topics To Mention

Networking
Is the root of all hacking and it takes less than a week to learn the OSI model.
Spend that short time to learn it so you can put something useful in your application.

Programming/Scripting
Elaborate! If you know VB, what did you develop? If you know Python, what did your script accomplish?

Linux
Will help you immensely. Why? It's open source, it's the most flexible, and most capable.

Hacking
If you've hacked something, elaborate in detail on how you did it.
This shows you may not be a liar, and actually know what you're talking about.
If you haven't hacked anything that's perfectly fine, but prove that you are the most motivated, and serious about learning how to.

Computing/Hardware
Hacking isn't just about breaking into computers and websites.
RaspberryPi, Arduino, and modding electronics in general is impressive.
There's many hacking gadgets out there exploiting access points, RFID's, to creating automatic coffee pots.

Pentesting
Pentesting covers every aspect of hacking. If you're interested in learning it, just say so.
If you mention you are a pentester, I'd expect your application to blow everyone else's out of the waterr.

Security/Forensics
If you know nothing about hacking but know how to track the hackers, you will still benefit Legion greatly.
If you want to learn how too, we'll teach you.

Lastly
For crying out loud, please format your application and make it look nice.

rooted. - *November 24, 2013, 10:14 am*

Elaborate on your skillset:Fluent PHP
Fluent Python
Fluent Perl
Little knowledge in visual basic
Fluent shell scripting
Managing network
Managing servers
SQL Injection (1.2ms complete attack)
Tell us why you would be a valuable asset:
I would be valuable asset because i would share all my knowledge with group writing blackhat & whitehat tutorials and i will teach anyone how to hack site or code stuff, i will also help with servers and networks.
Elaborate on your achievements and future goals:
Have hacked few sites for prices and also coded and developed a few blackhat projects.
Tell us about yourself:
I'm amateur hacking living untied kingdom who is 15 years of age.

Krox - *November 24, 2013, 1:21 pm*

Elaborate on your skillset:
Hacking: RATting, hacking tools, learning Kali Linux, learning pentesting and wireless security tests with Kali;
Coding: basics (still learning) of C#, a little of C++, good with PHP & MySQL, CSS and HTML;
Web side: web scripts setup, a little of web servers (only Linux OS), blog and forum boards, SEO related topics;

OS: I have been working on all the OS from Win XP to Win 8.1, and I've used a few Linux distro;
Mobile: rooting Android mobiles and hacking with them;
Others: basics of Photoshop and Sony Vegas, a good gamer (on MMOs, MOBAs, Real-time strategies).
Tell us why you would be a valuable asset: I'll share all my knowledge and learn everything you can teach me. While learning new things, I'll go find my own ways and post about alternative methods. I'll be available almost every day, depending on my studies though, and I'll accomplish my work every time I have one.
Elaborate on your achievements and future goals: For now I've used tools for hacking into my PC, cracking my own network; I've coded a lot of websites - both with my own scripts or pre-made ones, as vBulletin setups or Wordpress ones, though I'm not controlling any site right now; I've been learning C++, which I have left at the moment to study C#, I've learned PHP and MySQL, which I used along with HTML and CSS and if needed I can show a little example of CMS I was coding (CMS with a custom uploading file system, and I had in plan on adding a file parser, too). I'm willing to learn a lot about mainly security, pentesting, networking and coding. As I said above, I'm using Kali and I'm learning every time something new, and that helps me setting up a better security environment and understanding what the lacks of security are - as how easy is to crack a wireless password with Reaver or how to setup a rogue wifi to steal data. I'd love to learn a lot about networking, as it is the core of hacking; then pen-testing studies which interest me a lot (!); and coding, which will help me to see in deep how a particular software (it'd be a keylogger, rootkit, and any kind of software in general) and to better analyze them. As I said, I've been using lots of pre-made tools, but I want to understand how they work, how to made them by myself, how to boost them and add the features I want to have. Being a better hacker means understanding a lot of things, beginning with networking and hardware knowledge and having the ability to build your own tools, which you will know exactly what they will do, how and why.
Also, I believe it is becoming more and more important hacking and security on mobile, another topic I'd like to study in deep; why? Because almost everybody owns a mobile which contains a lot of the details the owner has, like where he is, where he has been, who's calling, what he's saying, et cetera; but more important is the study of the 2 auth steps: like for Gmail, you use a code generated on your mobile to authenticate, so it's important to keep your mobile safe and not let anybody else access to your codes. Mobile security is something people forget, but it is very important these days and it'll be more and more in the nearest future.
I keep myself updated to the latest news and hi-tech innovations, I read everyday magazines and online news, and whenever I fell I don't know well something or not at all while talking to users, I spend my time acquiring new details and gathering all the information I need.
I am currently studying networking and Windows management from some courses, too.
Feel free to ask any questions if you still want to know more; I may have forgot something.
I'd like a lot being part of a group and working as a team!
Tell us about yourself: I'm a 18 year-old student; I don't study anything related to computers and technology at school, I'm doin' it all by myself! I am studying and learning on my own, putting all my effort in it. I also usually study alone maths and physics. I help a lot of my friends setting up their PCs and I used to help a lot of guys with their websites. I'm in the last year of high school and I'll study Maths and Computer Science at the university next year. In my free time I do sport, too. I live in Italy, and I'd love to move to US to work for a good company - that's why I'm trying to learn as much as possible.
Well, as above, ask me anything if you'd like to know more.

Fillothesilo - *November 24, 2013, 3:41 pm*

Elaborate on your skillset: My skill set is all round. I can range from simple things like powerful DDosing services to coding.
Tell us why you would be a valuable asset:I would be a good asset as i enjoy helping people. I would try and help all of my legion friends out as much as i could.
Elaborate on your achievements and future goals: I have accomplished alot my biggest

achievement so far is earning over 4BTC And just over $2000 in PayPal. My future aspects would be to try and earn a lot more money.
Tell us about yourself:I'm from the United Kingdom, i'm 17 years of age. I'm in my final year of school. When i leave i will be going to college to study motor mechanics. After that i will be joining the army to serve my country.

NathanKBarrows - *November 24, 2013, 4:44 pm*

Skillset
Avant-garde: Always looking at the latest science and technology
Computer science: I am going to start computer science at a local public university this coming fall
White Hat Experience: I have done several internships to IT/Small Game Studios before
Grey Hat Experience: I have hacked some sites/platforms before.(Won't prove specifics, even if requested; Can talk about general theoreticals involved)
Networking: I have network knowledge and want to get some Cisco certifications.
Programming: I have been programming, small things mostly, for 5 years now.(Python mainly)
Philosophy: I love philosophy and philosophical discussions.
Valuable
First to introduce Bitcoins to HF back in 2011(Proof: 1, 2)
Co-own a quadcopter that could cover my area for intel/survillance(Can prove with a picture later on)
Hacking/Information Security Experience(Won't prove specifics, even if requested; Can talk about general theoreticals involved)
Huge network and hdd capacity; Building up a book/academic collection that I wouldn't mind sharing.(Along with other warez)
Achievements and Future
Gained a lot with Bitcoins
Built a small game engine in Python and PyOpenGL
Future: Get into Nootropics
Future: Get a Serious Startup up and running
Future: Get more into hardware
Myself
18 Year Old;
Fit, Into Exercise;
Can speak Spanish, English and French, getting into German and Esperanto;
Serious, can teach a lot of things/skills.
Hegel: Are you a master or a slave?(Master-slave dialectic; Trying to figure it out)

NINJA EDIT: Currently in Fedora 19: Schrodinger Cat; Been using *NIX systems for a while now.(Ubuntu, OpenSUSE, Red Hat Linux, Arch Linux, FreeBSD experience); Also some Forensics, but mostly have to do with Data Recovery, Tracking, and Legality)

RAT Support - *November 24, 2013, 7:12 pm*

RAT Support (Anon.Q) Application
Elaborate on your skillset:
Complete Set-up & Support of RATS.

Tell us why you would be a valuable asset:
Because i can set-up & give advice on most RATS out also i know alot of people other cover all different type's of subjects which can help anyone in legion which may require support
Elaborate on your achievements and future goals:
I currently have a small team to help the RAT section of hackforums with any type of RAT support also my goals will soon to create my own RAT for the team as a freebie like dark comet to contribute to the community

Tell us about yourself:
I am a calm person who is willing to spend time to help others achieve the help they need.

I do have unlimited amount of time to do anything so im never in a rush.

I do not want to give any personal details as i would like to stay fairly anonymous due to this being hackforums ?

Thanks for reading and hope to hear from you soon ?

iGnite - *November 24, 2013, 9:15 pm*

LEGION Group Membership Application
Elaborate on your skillset:
Netbios and WMI - I'm familiar with netbios, and I've no problems executing queries within the WMI framework.

SQLi - I understand the basics of creating queries and dumping tables.

XSS - I understand the basics of non-persistent, persistent, and DOM based cross site scripting.

Wifi Hacking - I'm proficient at using air/mon,odump,eplay,crack-ng.

JTR - I've used John, and cracked a couple hashes.

BT,Kali - I've used many tools within the Backtrack/Kali security suite.

Ettercap - I've ARP spoofed, and used Ettercap in tandem with MSF.

Metasploit Framework - I've used the framework, and have the basic skills to setup an exploit, run the server, and force users on LAN to send requests to the server. (I've also used Armitage)

Cain - I've used Cain and Abel, and sniffed LAN traffic.

CLI - I'm familiar with windows and linux CLI.

Linux - I love linux, and I can use it.

OSI model - I've memorized the OSI model, their data units, and the purpose of each layer within the model.

Tell us why you would be a valuable asset:

I'm a quick learner, and I've the ambition to learn. I like sharing what I know with others, and I'd like the opportunity to work with other hackers.
Elaborate on your achievements and future goals:Achievements - I'm a caring father and husband, I bought a Scion FRS, and built a large timber work bench by hand. I built a computer from scrap parts, cables, and handmade the case out of Plexiglass - and got it working.

Goals - I want to learn and master SQLi, because after listening to Jo McCray @ a DEFCON conference I was hooked. I'd also like to be up to date, and proficient at the easiest, latest, and greatest most legitimate methods of monetizing online.

Future Projects - I'm going to get into iPhone game application development, and I'd like to

program a bot that trolls internet forums in the near future. My epic goal is to build a UAV that can fly and submarine underwater.

Tell us about yourself:
Hobbies - I'm a procrastinating laid back person, and my hobbies are Working out, Woodcrafting, Tinkering with electronics, Gaming, Trolling, GFX, and Programming (Any language from any of the C's all the way down to the lulzy esoteric languages like brainfuck).
Feel free to send me a PM if you have any questions, and thank you for taking the time to review my application.

whathe12 - *November 25, 2013, 6:25 pm*

Elaborate on your skillset:

HACKING
My skills and knowledge towards hacking is very proficient. I've learned the foundation of taking ones computer over as well as manipulating it to my needs remotely and am able to perform most hacking tasks with ease. Whether it be through using a RAT, keylogger, a ware of some sort, I feel that I am competent in achieving whatever goal is set for me to achieve.

The first time I successfully placed someone under a RAT was back when I first joined HF about a year ago. Originally I joined HF to gain the knowledge of how to use a Keylogger from a back-end perspective but soon after browsing through the forums for a while I found the RAT section. After going over multiple tutorials on my phone and whatnot during my free time, I finally set forth to actually RAT someone. DarkComet so far has been my weapon of choice, I know it may not be as modern as the dozens of other RATs on the marketplace but for me it gets the job done, the fact it was free also induced me as it was really my only option starting out. I followed the tutorials and within the day I started I had built my very first working stub. My first victim(s)? My immediate Family. I walked right into my brother's room while he was out for the day, placed my USB flash drive into his PC and uploaded the stub. Soon after I continued to upload my RAT onto my parents computers as well. Why I did this was to never really conduct anything malicious on them but more or so to do a little surveilance on what's going on during the family that I don't know about. After that I decided to go to the mainstream. The People of the internet. My god, I had no idea people were so gullible and also did not have an AV installed on their system. It came of ease to make a video on YT saying oh this generator for this game works and then quickly getting a few targets slaves for a specific game I may be interested in and then harvesting their resources.

I will admit though I am very rough on the edges when it comes to network and website hacking. SQL injections and Defacing websites along with other networking related hacks hasn't really come with much success for me but nor has it really come with any failure as I've tried some small but I've gotten a very minimal grasp on how to actually do it. This is something I feel like will be very useful for me to learn as this will easily further enhance my abilities as a hacker and beyond for SQL injections and defacing I know can be very helpful if you are set forth on gaining some more intelligence on a target and whatnot. I also am aware it's not just all about SQL injections and defacing but there are other aspects which I am sure of myself that I will be intrigued to learn more about.

Shortlist:
Hacking - Being able to go after specific targets with RAT spreading tactics, infected multiple people within a small time frame. Competent with a RAT, Keylogger, whatever RA tool is in hand pretty much.

Cain - Used Cain and Able to monitor my local networks as well as to sniff and retrieve ip's from other people.

Wifi- Been able to do basic network maneuvers such as cracking into a friends WPA network at their house on my laptop using BackTrack.

Monetizing- I've always had a knack for all things money, I've invested in BTC a while back and have gained an 800% increase on that initial investment. Since then I've gain a significant amount of confidence in dealing with money as well as trying out and creating new ways to gain money through different techniques.

Tell us why you would be a valuable asset:[/size] I believe I could be a valuable asset to The Legion as I feel myself as a taskman and a student above all. If given a task or a goal to achieve, I feel as while I doing the said task I am learning about other systems and other information that I may need later down the road. I feel I can be a quick learner and when given the right combination of instructions I think I'm easily inclined to perform better at what I am to do and with time I believe I can only get better and better.
Elaborate on your achievements and future goals: My achievements and future goals are mainly for me to learn more and to pursure a more through education in the different fields that I wish to study in. Mainly about networks and website/forums hacks. I believe that by being apart of the Legion I will be able to be further education and experienced in these fields of studies along with overall increase my knowledge of hacking and computer systems in general.
Tell us about yourself:

I've always had a compassion for video games and computers since I was about 8 years old when my parents first let my have my own AOL account. I do believe that this will be a lifelong passion as computers and technology are only furthering themselves into peoples lives as time goes own. I enjoy being physically active and working out at the gym a few times a week along with playing Football and Rugby. I'm currently in High School and my favorite subject is Math as I've been told Math is essential to get somewhere later on in life as well as the fact I sort've find that math has an underlying tone of fun to it when you finally solve a problem of some sort. I feel that I am a quick learner and I absolutely love learning about things, filling my brain with countless amounts of knowledge.

Zone. - *November 26, 2013, 1:45 am*

Hi! My name is Kryptic. I'm a young and motivated coder, entrepreneur and designer. I specialize in many areas. I will list some of the following and elaborate on each one.
Web Coding (Have designed and developed many websites. The main being my companies website [https://pixel-host.com])
Network Security (From my experience in my own server and web hosting company, I am knowledgeable in Server and network security [especially linux])
VB and C# (Started learning these a while ago myself)
Basic Java (Learning)
Python (Competed in the NCSS python challenge and achieved a "High Distinction" in the intermediate section.
Anything to do with linux and networking admin pretty much ;)

I believe that I would be quite a valuable asset to this group. I have an extensive knowledge of business management and economics as well as advanced server/network management knowledge. I'm willing to teach others my skills and hopefully learn a wealth of information and

develop new skills that I never thought I would have.

Throughout my life, I believe I have made many achievements. The foremost and largest being the success of my company. (Pixel Host) I plan on selling and developing many more products in the future and learning from many others to enhance my skill set.

I'm a 15 year old male who is currently attending a high school in Australia. I was born and currently reside in Australia. Apart from running a business and coding, I have many other hobbies. These include: Design, Tennis, Art, and many others. Above all, I am willing to teach and learn.

Thanks for considering my application. I wish you best of luck with your recruitment. ?

Thanks,
Kryptic

I'd have to agree with this, notice how the GFX takes up about one third of the application?

Guys,
The text, should be the main priority, your actually application.
Then again, I'm not even in the group, I may be overstepping me boundaries here.

MasterTech - *November 26, 2013, 5:18 pm*

i want to apply but don`t have any skills although i have little bit knowledge in coding and monetizing i think i am not able to get accepted here but i want to learn from you guys i really like to be one of the Legion

Emperor? - *November 27, 2013, 3:27 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Elaborate on your skillset:
Rats and Botnets
I am familiar with both, I am more stronger on the RAT side, I am very good at spreading, and setting things up for people. I have as mush time on my hands to help others out. I have a IRC botnet at the moment with many bots. I had a RAT, but it was for getting started with tools as it. I also am good with stresser's and booters, I can set them up with ease for others who need help, same with RATs. I am also good with cracking with Sentry MBA and Buda.

Bitcoins and Litecoins
Now if there is a subject to be wise in for me, it's this one, Bitcoins and Litecoin. I have been

working with Bitcoin for over a year now, and Litecoin for a couple of months, I have made a lot of 'coins' in the past. I had many of them, had over 170+ Litcoin, and over 25+ Bitcoin, I sold them all a while back when rates where good, now I focus on helping others mine. I am soon coming out with a custom coded miner for HF(selling), and I am writing a eBook currently on a guide to getting started with mining.

Marketing
I am very wise when it comes to marketing. I had many successful products and services on the past (different forums), and one day I will get back to it. I am soon going to release a Bitcoin/Litecoin miner soon in the marketplace, and a upcoming e-book for Bitcoin. I have done many successful exchanges, I have had many successful deals.

Social Engineering
I have many methods of SEing, from getting CocaCola bottles to electronics, I currently have a huge SE method pack on my desktop and I planning to give them away. I have SE'd PSP and headphones.

Graphics
I don't usually do graphics, but if requested by a member or friend to design something for them, I certainly will and can do it. I might focus on my graphic skills a little bit more, and I use Photoshop CS5. Experineces from photoshop class from high school.

Monetizing
Another are where I am strong in, I have lots of earnings from PPD and PPC. I am familiar with other forms such as CPA, but I rather stick with my PPD, I use File Ice and File Fire.

Pay Per Download
This is my main part of monetizing. I have made well over $200 with PPD monthly, I have many unsaturated niche's that I currently use, and many work. I am teaching a few members on HF to get started with their niche and to earn with me. If granted in group I will be glad to get Legion members started if wanted.

E-Whoring
Im still trynna but eWhoring is my second skill that i'v learnt over the time of being a "Hacker". I'v eWhored quite a lot of money over the past years. I also do sell a eBook on how to eWhoring like me... But that's offtopic. Some of my profits are in other threads around HF. I don't know the exact amount of money i'v whored. Lets just say i'm a whoreer <3. I try to help out the best I can with teaching people how to eWhore. I'm going to open a free service soon to teach some people to whore like me.

Programming
I am OK with Visual Basic's and a little bit of C+. I can do a little of HTML. I am very good with SQLi and I am soon learning XSS and PHP. Experiences from my microsoft computer classes when from high school.

Tell us why you would be a valuable asset:I think I would be a valuable asset to Legion for many reasons, mainly for helping others out on what I know so I can teach them. I act with mature behavior which is key to most things. I treat everyone the same with respect, the new comers to HF and the high rankers of HF. I am always willing to donate, giveaway, and to make tutorials under the name of Legion. I am on most of the time, whenever you need me for something, I will be there.

Elaborate on your achievements and future goals: My achievements that I have earned so far are

my Help-desk, which is currently the biggest for BTC/LTC. I have mined a lot of BT and LTc, I have many satisfied users that I have helped in the past, I am very happy where I stand right now with monetizing, I have earned and learned a lot and now I want to share with others. My future goal is to learn as much as I can, from programming, money making, marketing, even tho I have experience I would like to know more. And of course a future goal is to be invited to Legion. I got the marketing inspiration from my mother she thought me some pointers.

Tell us about yourself: I just finished school high school 5months ago, since I am off, I have a lot of time on my hands, which mean's ill be on all the time. I currently play basketball for a team called GTI, and if there are moments I am not on, its cause of flying to practices. I am also a very giving person, I always like to help, if there is one thing I like, it is questions, I love answering them to help others. And I will be very active in the Legion SF, and very dedicated to the group.

-Thank you for reading my application

Royal Crow - *November 27, 2013, 9:09 pm*

LEGION Group Membership Application

Elaborate on your skillset:

Vulnerability Exploration - Whenever I get bored I typically game or just go through scripts online and try to exploit them. I usually look for holes in software that is currently traded on script websites and I'm currently sitting on a few 0days that have a few thousand installations in the wild.

Marketing - I've worked with various CPA affiliate networks and have earned a good bit of money. I mainly focus on surveys but I do use dating offers and email submits all the time.

Coding - I code in VB.NET. I would say I program moderately well but it's not my day job but at least I get the job done. I mainly code custom bots for websites or other things.

Rats & Bots - I have experience with both and if you need more information feel free to pm me.

SQLi - I have the basics down. I I can't do too much of the advanced stuff but I'll get there.

XSS - I understand the basics as well as the anatomy of xss worms.

Wifi Hacking - I'm proficient at using air/mon,odump,eplay,crack-ng. I have a spare laptop that runs BT and it torments my neighbor's routers.

Hashcat - I use hashcat to crack md5's or other hashes that I may encouter. I tend to organize all the databases that I have fairly well.

BackTrack - I've used BT for quite a while now.

CLI - I'm familiar with windows and linux CLI.

Linux - I use linux quite often.

Tell us why you would be a valuable asset:

I have experience in a lot of areas and I work great in a team. I find that I'm a great coordinator when it comes down to things.

Elaborate on your achievements and future goals:Achievements - I've made thousands from coding programs/bots and monetizing from the bot's end result. I've created a few popular websites. I've found vulns in popular scripts that net'd me thousands of vulnerable websites.

Future Goals - I'd like to learn a bit more advanced SQLi as well as improve some of my webdev skills. I'd also like to collect a few more interesting dbs before the year is over.

Tell us about yourself:
Hobbies - I work from home so I'm online all the time. I like coding programs to monetize money. I train in bjj 4 days a week. You can find me on the weekends watching football.
Feel free to send me a PM if you have any questions, and thank you for taking the time to review my application.

Used iGnite's template

DeadLine - *November 28, 2013, 5:45 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] Elaborate on your skillset:
Java
Visual Basic
C#
PHP
VBS
Batch
HTML
Delphi
MySQL
Computer architecture knowledge
Networking

Tell us why you would be a valuable asset:

I would be able to help members with their programming needs and questions and share my knowledge about computers.

Elaborate on your achievements and future goals:

Archievements:Ultimate Virus Builder
DeadLine's Survey Builder
Ultimate Logger
HackApps
Goals:Further expand my knowledge
Make Ultimate Logger into something amazing

Tell us about yourself:

I am currently 19 years old. I was born in Belgium. I was always fascinated by computers and when I was 14 years old I started programming because a friend showed me how he could create a program in notepad.

Exussit - *November 28, 2013, 8:34 am*

Elaborate on your skillset:
My skillset is rather broad, ranging from cognitive, to being what is fundamentally second nature to me..
My primary strengths pertain to programming in C# and Java, Networking, Batch Script, working

with Malware in general (inclusive of RAT's and Keyloggers), Hardware components in general, Writing; with the ability to convey it in many acclaimed styles, and additionally I have somewhat decent comprehension of web design inclusive of Html/PHP/CSS and MySQL, and currently am in the midst of pushing my C++ knowledge into further bounds. Graphics are also a composition of my forte, rendering (pardon the pun) my skills with Photoshop and GIMP to be decent, and even some experience with Blender and MAYA.

Tell us why you would be a valuable asset:
I'm not here to boast, I wish to help other members and simply learn simultaneously as a two way street, and advocate what I have to offer from my skillset.

Elaborate on your achievements and future goals:
Throughout highschool, I simply focused on my studies, and yes, the occasional girl or two, but I was not striving to be the absolute stellar student of the whole cohort; I just followed up my dream of becoming a Veterinarian (requires absolute top tiered results), and should that fail, fallback into an IT oriented field of work. Falling nigh of the Veterinarian path, I opted for this, and have been doing nothing but, since. I aspire to be a highly proficient IT technician in a major career, and am currently studying a degree in Software Development to foreground this.
Also, not precisely sure if this would be classified as an achievement, but it's a project I've recently been working on for fun:
Spec Share

Tell us about yourself:
I am a 19 year old male from Australia, who's currently studying in tertiary education with a passion for animals, Computers, English, and fitness. I am working a part-time job, and I currently live with myself, and one other roommate whom has been my good friend since early highschool.

Hacks With Pleasure - *November 28, 2013, 8:53 am*
Elaborate on your skillset:i have a high skill with using keyloggers and spreading the server,meaning spoofing it/exposing it.I can also rat/boot but thats nothing special...
Tell us why you would be a valuable asset:im a nice guy,easy to get along with.i want to have something to aim for while hacking instead of hacking for the sake of it so im a valuable asset because of my skills with spreading the virus.
Elaborate on your achievements and future goals:Im just looking to expand my skills with hacking and when i saw anonymous took down playstations servers,i was like,"shit thats awesome." i wanna become that one day.
Tell us about yourself:Well...im 15 and currently in high school and from scotland.Im into hacking and i race 96 honda civics and motox bikes nearby my hometown.if i were accepted to this i would be happy but if i wasnt then im gonna keep trying harder and harder.theres no way im giving up towards this.:)

hunzar - *November 29, 2013, 9:07 am*
Coding
My main coding experience in coding is either visual basic or visual c# as I have made a set of tools that come in handy, such as a skype resolver with GEOIP and a fully anonymous chat service (P2P) which me and a friend use to talk securely (More about this in the Cryptography section.)

Pentesting
Penatration Testing would be a dream to me, besides the pay the sheer joy of managing to break someone's system or exploiting a certain part of it is a massive drive for me, I've been working towards becoming a CEH or CPT since I was young, buying books such as The Basics of Hacking and Penetration Testing by Patrick Engebretson. I have a Pen testing lab on the top floor in my house, consisting of a separate router, two laptops and a home server. Aswell as this, I often watch

university lectures online on different aspects of Pen Testing to improve me knowledge, I'm saving up to take a CEH test at the moment :)

Hardware
I've always had a great fascination with how things work, When I was eight, I remember having to go to the hospital for nine stitches and a tetanus shot because I took apart my clock and cut myself on a cog, ever since I've been cautious never the less, I'm still drawn to technology and gadgets, Even today I'm taking apart different things and putting them back together incorrectly, I have a RaspberryPI which I use to monitor different things like my Bitcoin Wallet and such which I won't bore you with.

Cryptography
Cryptography has got to be my favourite thing in the world, ever since a school trip to blechly park, I've been unable to resist the draw of codes, I love the idea that you and another person could talk in a way that no-one else could understand, A few months ago, I was looking into the RSA-256 Encryption algorithm and was fascinated! So much so I adapted it and wrote a basic VB program that allowed me and a friend to communicate incognito, With each of our private keys being private (Obviously) a MITM attack would be useless unless you could factories numbers fast, which is currently impossible, Further then this, I've given myself a challenge of using the P vs NP problem in a algorithm to create an uncrackable code.

Networking
Sadly, I am not very good at networking, I only know the basics and I would love to learn, I currently know what I need for different projects I work on and also know the 7 layers of OSI, Other then that i'm a blank in this area.

Hacking:
First of all, I would say I would only ever be a White hat hacker, Gray at most, Although I have never hacked anything (Apart from anything inside of my Pen Test Lab) I know the theory for most attacks in great detail, Such as the Man in the Middle Attack, I enjoy using rainbow tables, Kane and able, and much more, As I stated before, I'm always happy and eager to learn more and I'm more then happy to give away what I know

Tell us why you would be a valuable asset:
I believe that I would be a valuable asset because i'm always awake (Insomnia) which means I can talk and relate to people in any time zones, I'm free most days and i'm eager to learn, I also believe that my P2P Anonymous Chat service could be of use.

Elaborate on your achievements and future goals:
In the future, I would greatly enjoy becoming either a CEH, CPT or a lecturer in Cryptography, I have achieved an A* in computer science at GCSE (aswell as a A* in maths, Physics, Chemistry, English, Music and an A in Biology and history)
and I'm working towards an A* at A Level.

Tell us about yourself:
I am extremely passionate about computers and I'm very nerdy in my overly abundant spare time, I watch university lectures, or study on places like Pluralsight, I've attended Defcon 17 and TechEd twice, I enjoy computer gaming on the PC, not consoles, and I'm writing an ebook on Cex.io.

Thanks for reading my Application, I appreciate it greatly. :D

I'm looking forward to being accepted in the wonderful, prestigious group. Please consider my application, and make your choice wisely. Thank you.

Stapleton - *December 2, 2013, 7:25 am*

Elaborate on your skillset:

Web Designing and Programming is something I enjoy. In my short tenure of being a HF Member, I've helped multiple users with MyBB, as well with advice. Coming to MyBB, I have a very decent knowledge of coding in MyBB. Some of my works can be found below. In addition that, I've experience in Coding with phpBB, SMF & IPB. I'm good at fixing and patching vulns. I have experience with server management as well other coding languages like SQL and css.

1. https://hackforums.net/showthread.php?tid=3893914
2. https://hackforums.net/showthread.php?tid=3902322

My hacking skills are related to Website Hacking. I started learning how to exploit SMF 1.0 Boards via old, unpatched bugs and the first SMF Website I had defaced was a Gaming Forum. Shortly after that, I learned to use vuln scanner to add with SQL Injection which I used with vBulletin 0day exploits. It was fun to run scripts to make Admin accounts. And, I had some experience in defacing MyBB sites via Template Vulns which allowed to execute php scripts. I did it for non-harmful uses.
Coming to Graphics, I've to say that I'm not an expert but I like learning. The only thing I'm good is with making signatures. I started with making of Gaming sigs. I usually use Photoshop CS. I've learnt a few things like Abstract Art, Vectors, Air Brush Art, Doping and Transparent background making. Some GTA Sigs I made below:

Spoiler (Click to View)

[img]http://cdn4.iconfinder.com/data/icons/pretty_office_3/128/packing.png[/img]
Computing and Hardware are another of my favorite subject. I like knowing more about Hardware, Setups, Programs, Builds and Interior. I used to dismantle my CPU and take a look at things and fix them back. I've even modded Windows XP, tweaking shells and patches with self extracting I386 Components.

[img]http://cdn1.iconfinder.com/data/icons/nuvola2/128x128/filesystems/folder_games.png[/img]
Who doesn't play games? I have a PS3, PS2 and Xbox. I not only game, but mod games on consoles. Cheating is the best part about gaming.

My games:

Forza Motorsports 2,3
GTA San Andreas/SA:MP
GTA IV (Episodes Disk)
GTA V/GTA Online
Call of Duty BO2
Modern Warfare 3
Black OPS
Call of Duty 4
Halo 4
Halo 3
Counter Strike GO
Midnight Club Los Angeles
Need for Speed The Run
NFS Most Wanted
Need for Speed Carbon
Team Fortress
World of Warcraft
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Tell us why you would be a valuable asset: I think I would be a valuable asset to the group simply because I'd like to learn and share. Legion is a great group and accepts potential candidates. I think I'm potential as I try at my best to help and learn at the same time. I've vast experience and I think I could help with my above skillset and get to know people by representing Legion.
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Elaborate on your achievements and future goals:
Future Goals? What everyone wants is a degree from a good university to pursue a career. I want the same. I hope to be a Tele-communication Expert in future and work under the wing of a good company. Besides that, I'd like to purchase my own dream car which I always aspire of. Moving out of the city is my first step to it.

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Tell us about yourself:
I'm an average 16 Year old guy, just like most students of my age. I'm passionate about Computing,

Movies, Soccer, Cars, Military Planes, Thermodynamics and Advanced Wave Communication Technology.
I spend time browsing Hack Forums & listening to Last.fm.

Leonard Hofstadter - *December 3, 2013, 1:47 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
My biggest skill/interest has to be mobile devices, being tablets and mobile phones. I am very handy on any hardware fixing and soon to be starting my own small local business with this in mind. I am currently learning the software of Android and I already know iOS in and out like the back of my hand.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
Knowing the hardware of mobiles and tablets very well I would be able to assist members as much as possible without physically being there. As I am learning the Android OS and already know quite abit I am able to help members in there problems with Android OS experience. I currently have the largest thread in the Android section on the forum with 600+ replies regarding the OS and Nexus 5 device (which is what I own).
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
Nothing of this is forum related. My greatest achievement I must say is overcoming my hear of heights by doing a bungee jump. My future goal is to own my own company doing tech repairs, this is currently in the works!
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
Currently working as a Mobile Engineer. Born and raised in the United Kingdom. 21 Years of age.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Thread in Android Section:
https://hackforums.net/showthread.php?tid=3801822

ddol - *December 3, 2013, 4:01 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your skillset:
Programming -
The programming language that I am most familiar with would have to be between PHP, or VB.net. I've made quite a few tools such as encoding/decoding, RegEX, GoAnime!, and etc. Other programming languages that I somewhat know or familiar with (in order from more knowledge to less knowledge) would be, C#, Java, and Perl.
Tell us why you would be a valuable asset:

I feel that I would be a valuable asset because, I'm very eager to learn more, and post a lot on HF.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
Achievements:
SkypeNET - I am still working on SkypeNET, its a great achievement because I got to work more with C#, and well its great because I interact with other users to make SkypeNET more comfortable with users.
GoAnime! - I loved working with GoAnime!, because I got to discuss about anime with others, and well people were interacting with me.

Future goals I wish to achieve would be:
Expanding my knowledge on programming language - I'd love to learn more on the languages because its pretty much a great experience for myself.
Learning more about Security - I love programming, but there's always a way that a user can exploit the tool in some way. When that happens, its basically game over. I would want to learn more about security to make my tools more secure in a way that its still usable, but keeps away the bad stuff.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself:
I started getting into the computer when I was pretty young. My life was pretty bad, I barely had a friend that time. I wanted to achieve a goal, make my parents proud, and to blow off some time. I was playing these games, and I thought it was great, so I was inspired of course to see how to make games. So then, I searched up how to make games on Google, and say thousands of results. I noticed the internet was a strong thing, and I saw tutorials on how to make games from game engines, or programming. I didn't know what programming was at the time, so I searched it up, and I got interested in it. It looked complicated, so I searched up "Easy Programming" and saw a few tutorials. I saw VB.NET and saw that I can design the GUI and etc. I tried it out at first, and loved it. Ever since then, I've been trying out new things with the computer, and my lifes gone up.

regexks_ - *December 4, 2013, 8:44 am*
Elaborate on your skillset:

With moderate experience in HTML, PHP, SQL databases, Perl, C, Bash scripting, Linux operating systems (both production and development), Windows (both personal and server operating systems), general penetration testing and denial of service (specialization in reflection and amplification methods), I consider my skillset both expansive and useful. I'm always open to learning new things and having the opportunity to participate with others.

Tell us why you would be a valuable asset:

I'm very helpful and I know more than my account profile makes it seem. I can provide massive amounts of DDoS (peaking in the 150Gbps range) and various services that I can elaborate on later into my stay in Legion.

Elaborate on your achievements and future goals:

My achievements consist of various computer certifications ranging from CompTIA to Cisco and future goals involve computer networking and networking administration. Is it too ambitious to want to found a telecommunications company? How about a data center? All things I see myself working toward as a future goal.

Tell us about yourself:

I'm a laid back guy. I like to make jokes and I'm pretty straightforward. I enjoy working with computers and I don't mind spending hours on end in front of one. I like to solve problems and help

others with their own.

I hope you consider me for your group.

Mon£y? - *December 5, 2013, 7:00 pm*
Elaborate on your skillset:

Java Programming; Currently learning, It's fun so far..

VB.Net; I know a little bit of this plan on learning all of it after I finish Java.

PHP, HTML; My favorite languages because it's of how easy it is. Don't know all about it but plan no learning more.

GAMING; I first started gaming before to learn how to code. Now I only play games when I'm bored, very good at most of them though.

Tell us why you would be a valuable asset:

I may not be that valuable but this group will develop me to become a valuable one. I'm very much excited in learning new things and new ideas from other people.

Elaborate on your achievements and future goals:

Expanding my knowledge of coding then planning on working is making my own Company that works with cyber security.

Tell us about yourself:

I'm a smart, nice, guy that loves anything that has to do with technology. I don't think I could live without it. I'm almost always online when I am online I try to learn new things.

CheersFile - *December 6, 2013, 12:31 am*
Elaborate on your skillset:

Graphics:
I've been doing graphics for almost my entire life. I've always been creative and I'm proud of saying so.
I haven't been showing them off too much on this forum, but I will in the near future.

Coding:
I've been coding for quite a while now, but I'm not sure for how long.
Usually, I keep my tools to myself, but I realized it might be good to release some of them too.

Hacking:
I would not really call myself a hacker, but I've been a member of many of those.
I was usually the coder of the group, so it wasn't really hacking.
Though, I have been Ratting and Keylogging too, but that's not really hacking either. I wouldn't call myself a hacker.

Grammar:
Not a lot of you know that I come from Sweden.
But I have an interest for the English language, so I'm trying to keep my grammar as good as

possible.
A lot of people say that I have an american accent, so I think that's a good thing. I'm also learning the british accent at the moment.

Tell us why you would be a valuable asset:
I think I would be a valuable asset because of the fact that I have a lot of experience in coding.
One of the things I love is making people happy by helping them in any way.
I think I could help a lot of people with in-real-life problems, because I have a lot of experience with this.
I've been in deep depression and I was without friends for three years, but I still made it.

Elaborate on your achievements and future goals:
My future goals on HackForums is to become more of a High Quality member.
I want to share my knowledge with all the members on here.
As I said earlier, I also want to help them with problems in-real-life, as I have a lot of experience with that.

Tell us about yourself:
My name is Gustav, and I live in Sweden. I've been facing a lot of problems in my life.
I was looking for help on this website, and I got it. Thanks to HackForums, I got more confident and now I have friends.
People would think I was different because I was programming and doing graphics instead of partying like they did.
They thought I was weird, but I thought they were weird.
For that reason, I ended up with one single friend, but he was against me quite a few times too.
When I ended up here on HackForums, I found a lot of people to talk to.
This is what I am here for - helping other people.

Thornzzz - *December 6, 2013, 10:46 am*
Elaborate on your skillset:

I'm great Java coding, Java Script, HTML and L.U.A coding. I've made things such as Aimbots, IP tracers, speed hacks and flying hacks on Garry's mod. I've made some Hack clients on the popular game Minecraft. I can also jack accounts on Xbox 360, and Playstation 3.
Tell us why you would be a valuable asset:

Why would I be a "valuable asset"? Well, i'm good under stress and pressure. I can finish large projects in a minuscule amount of time. I know how to calm a situation down. I'm able to follow/do anything that is needed to me and follow loyalty of the members that are above me.
Elaborate on your achievements and future goals:

I have a lot of future goals, I will name some at the top of my list. 1.) I really want to get a very nice job in a coding industry so I can sustain a family that I wish on gaining in the future. 2.) I wish to become the best coder I can be. I want to take my potential to the max! 3.) Help as many people as I can on HF. When I first joined HF, I didn't know very much, I just had my coding experience and some members helped me threw my beginning time thus making me who I am now. I wish to do to others what they did to me.
Tell us about yourself:

Well my name is Will. I'm a high school student that is finishing his 10th year of high school. I'm 16 and live in Illinois. I'm currently staff on one of the largest Minecraft server in the world (Woodycraft). In my down time, I like to code Plugins/Mods for Garry's mod and Minecraft. I'm a overall easy going person who just likes relaxing and having fun on HF with friends.

skript jonson - *December 6, 2013, 9:18 pm*

Elaborate on your skillset: My main skills and what I am good at doing is mainly graphic design and white hat help. Thus I do not post a lot in the White Hat Help section I am very experienced with white hat help. Now we shall get to my main skill and passion, graphic design. I have been designing for about 2 years now, I took a interest in it when I was searching YouTube for "intro" layouts. I saw a video about a program called Cinema 4D and decided to click it and thought it was the most fascinating thing ever being able to create 3D animations and text. So I downloaded Cinema 4D and learned the basics of that, I now after using the program for 2 years consider myself advanced in the program. After messing around with Cinema 4D for about a year I picked up on the program Photoshop and started learning the basics and essentials to the program. I took a major interest in graphic design when I got into YouTube. I was a BIG wannabe famous YouTube designer. I spent the majority of my time making YouTube banners for people and myself along with tutorials anything to get myself out there. After a while I gave up at that knowing I would not succeed at it. Then comes HackForums, I came across this website searching on Google "how to spread my darkcomet rat" I always and always saw a post on this website and finally decided to register! After having a very good time on Hackforums for about a week I decided to upgrade to l33t! I then started doing free graphic services and built up my reputation on this website and applied for ub3r, I one rainy night received a PM saying I have been accepted, I literally screamed in joy! The next day I purchased ub3r and finally received it two days later. Then comes me getting into serious graphic design, or paid design. I made my graphic service and have made a successful profit from the service, I would like to say 300-400 within two weeks. I know compared to others who make that daily it is not a lot but to me it was. I started getting not a lot of requested I then one night was thinking about making a eBook of how to be successful with making money called Cold, Hard, Cash. This eBook has earned e about 235 dollars so far and counting. I know make a stable 85-100 dollars daily and will hopefully be making more! Sorry for the long life story thought I would share it though.

Tell us why you would be a valuable asset: I would be a valuable asset to this group in a lot of ways. For one I am a graphic designer, as stated, therefore I could in the future maybe throw together some designs for the group Legion, as the designs I believe are the most important part of a Hackforums group! Without them I do not know where these groups would be. Considering I, and many others base groups and there quality off of there designs indicate weather or not a group is worth applying. Second reason is as I stated, I am experienced with White Hat related topics and I could help people with virus removal, etc. And bring a good reputation to the group Legion. I am valuable in many, many other ways but these are just two, as you can tell, I can get a bit off topic and type more than I would in the most important essay in school.

Elaborate on your achievements and future goals: I plan to achieve in my future over 100,000 dollars in online method's/techniques without any sort of real life help. Also I plan to become one of the most well known graphic designers on Hackforums and have a very high, respectable reputation on this amazing website called Hackforums. My real life goals are to raise a family, go to Wayne State University and receive a Masters degree in graphic design.

Tell us about yourself: I myself, am a freshman in High school at Chippewa Valley High School in Michigan. I am taking intermediate graphic design in school, the only thing I am good at, do not get me wrong, I get A's and B's I just excel in graphic design more than other subjects. I live in a household of 4 people, not including my dog, that would make it 5. I live with my dad, step-mom, sister, my dog, and me. I do not have much more to say about myself, hope you liked my recruitment thread!

sml555 - *December 6, 2013, 9:59 pm*

Elaborate on your skillset: I have been coding in html, css and php for 4 years now, and am learning C. Im studying to become a CEH, and will qualify this February. I can do SQLi (to some extent), XSS (to some extent), LFI and RFI. I am ambitious to learn more.

Tell us why you would be a valuable asset: I can contribute and help fellow members. I am eager to

learn, and will stick around for a long time.

Elaborate on your achievements and future goals: I helped the BCA (Bangladesh Cyber Army) in their war against India, but despite that, I have none. My future goal is to be a great penetration tester.

Tell us about yourself: I am entering university this year, and will be entering in software engineering. I have been in web development for around 4 years now. I'm not too bad at gaming. I play DOTA 2 (used to), and NFS world's Online.

I want to learn some things from the more experienced people. If you want to ask questions to verify, please feel free to drop me a PM.

Best Regards,
SML555

?nonymous - *December 8, 2013, 12:25 am*

Student wave #7 has been invited.

Anyone who posted before this post wasn't accepted if they didn't receive a PM - you may apply again if you can write a better application.

Anyone posting after this will be reviewed for student wave 8. ?

MFFS - *December 8, 2013, 1:02 am*

Elaborate on your skillset:
I'm good in network and WiFi security. Also i know a little bit about coding.. currently perfecting python,
and learning java and android, and hope i'll develop apps in near future.
I didn't make or hack anything big, but if I may say, I'm proud of some things I've done.
I used knowledge of python to make little script,
which helped me in wifi pen testing, also, i pen tested neighbor wifi and get little reword for it, and found a few vulnerabilities of some more known sites in my country,
but i think that all isn't that important for HF and i didn't make any threads about it.

Tell us why you would be a valuable asset:
I am not the best in anything but surely i could help in almost anything,
I know a little something, something a bit more, but nothing is perfectly, i'm ready to learn more.

Elaborate on your achievements and future goals:
As i said above, my goal is to learn and improve java and android and start developing apps. Also my goal for near future is to get accepted in this group :)
and whatever happens I will not give up.

Tell us about yourself:
My name is Marko, friends call me J0kara and i'm 17 years old.
Free time i'm spending on computer, learning, coding, and ofcourse on HF.
This group look great and very professionl, and my friend who was in it confirmed that. I'd always wanted to part of it, so why not give it a try.

Stapleton - *December 8, 2013, 1:05 am*

Guess my App wasn't good enough for an invite.

byte[] - *December 8, 2013, 6:04 am*

(Dec 8, 2013 02:05 AM)Stapleton Wrote: *[CITE]* Guess my App wasn't good enough for an invite.
This is gonna sound stupid as fuck but....
I had a dream last night where I got into Legion >_<
Guess mine wasn't good enough either.

skript jonson - *December 8, 2013, 10:45 am*

Welp, I thought I had a nice, detailed recruitment post. Oh well, will reapply.

Sir Asylum - *December 8, 2013, 10:52 am*

Good luck to all members who are interested in joining Legion.
I wish you the best of luck and i hope to see some good quality members join us.

?

Zabuza? - *December 8, 2013, 10:53 am*

There's some pretty awesome applications in here! I'm so glad so many are so eager to join us ^-^

Acroz - *December 9, 2013, 3:17 am*

If your application was NOT accepted, please submit and use this questionnaire below.

- Was your application formatted and clean?
- Did you elaborate on your Hacking skills?
- Was it detailed and in proper English?

If you submit it in that criteria, you should be reviewed better :)

Stapleton - *December 9, 2013, 4:38 am*

Congrats everyone who made it into Wave #7.

byte[] - *December 9, 2013, 1:28 pm*

- Was your application formatted and clean? Yes, I formatted my application very nicely in my opinion.
- Did you elaborate on your Hacking skills?I explained about my coding skills and about my crypter, so yes.
- Was it detailed and in proper English? I think I used very good grammar, and I went into extreme detail.

Emperor? - *December 9, 2013, 5:06 pm*

Guys that didn't get accepted yet just revamp your apps i know you guys can do better its worth the time

?ain - *December 9, 2013, 5:36 pm*

https://i.imgur.com/3FCThgk.png
Elaborate on your skillset:
I am adept with all RATs, botnets and most malware related activites. I know everything from setup to dispersal and spreading. I am currently learning SQLi, along with starting XSS. I am trying to learn the SQL language, not just for SQLi, but as a whole. I also know a lot about most beginner questions, and even many more advanced questions.
Tell us why you would be a valuable asset:
I am helpful, knowledgeable, and willing to learn. I guess those are the features that are important. I

want to learn more, and I want to share everything I know. Knowledge should be shared, where it is due.
Elaborate on your achievements and future goals:

I have successfully setup every RAT I am aware of, either personally or over TeamViewer. I have used SQLi to hack a simple two sites, I did not deface them though. I put my iFrames in them for a few simple views, but the sites eventually tapered away, I assume they did not get hosting anymore. I have setup both Solar botnet, and Andromeda, and am currently using both. I have helped many on the forums, once again usually in the RATs, Botnets, or helping others in the Beginner Hacking section.

Tell us about yourself: 16, dedicated, and wanting to learn. I feel like joining this group would give me access to learn more, and learn faster, and that's what appeals to me. I feel that this group is dedicated to turning a student into a teacher, and that's what I'm after. I'm an ever curious guy, and picked up hacking as a way to find what I want by my own means. I live in the US, and if you need to know anything else, I'll be glad to let you know.

Hope to hear from you.

Killuminatii - *December 9, 2013, 5:53 pm*
Elaborate on your skillset: Hacking wise, none.
Tell us why you would be a valuable asset: You are the teacher, you tell me. I am willing to work my ass of and learn. That is if you are willing to teach.
Elaborate on your achievements and future goals: I will only post about my HF achievements, wich are none. I never set goals, never set expectations on myself. I do my very absolute best in anything I do no matter what it is. So no, if you are looking for achievemes here on HF there is none. I have been in every group I wanted. My work schedule changes a lot so I can not post a bunch nowadays.
Tell us about yourself: I am 21 years old, mature, have my own business, willing to learn everything and anything, live in Europe. If you'd like to know anything personal please send me a private message. Goodday

Latex™ - *December 10, 2013, 6:24 am*
Elaborate on your skillset:

RAT:
The first thing I learned about "hacking" was ratting on a website that I got from a friend. I used to sit all day trying to get some slaves to mess with them and takes SS of them and just brag on that site. Then one day I searched on google Hackforums and found this site and I started to learn from HF's RAT section and I learned a lot from it. Now I dont do RATing as it is pretty boring to now as I have experienced it before.

E-Whoring:

Second thing on my list is E-Whoring. I found out about this on HF and decided to try it. In first couple of days I earned nothing but later I started making some money by selling pics. Then I found a local site that is completely unsaturated because in my country people dont usually do things like E-Whoring. I earned some money with that and then it became boring to me as you need to do lots of fake camshows.

Web Hacking:

Third skill on my list is Website hacking and so far I only know how to do SQL Injection (Not using Hajiv). That I also learned on HF and I am glad for that. I used it to get some admin logins and to

mess with the websites but I dont screw their database. I am still developing the skill of web hacking.

Account Cracking:

This is the skill I am learning right now. Currently I am searching for some good configs for SentryMBA. I am thinking about opening a shop after I get some accounts to sell (Steam,Origin,Netflix...). Nothing else to say about this skill as I am still developing it. But I am a fast learner so it will not take long until I learn it.

Selling:

I am also learning this skill too. I am currently selling some things on HF and on other forum witch give me some money (Saving for leet atm). I am a good seller and I want to improve this so I can make lots of money by doing it.

Coding:

I used to learn coding few months ago. I learned HTML and Python. Made some websites using only HTML but I lost them when my system crashed on my PC. I coded little programs in Python like a Doxing program. Currently I am working on a project in VB.net that I will release on HF.

GFX:

Last but not least is my GFX skill. Since day one when I got my first PC I was interested in GFX. I can use Photoshop very good and I am still improving in it. I was working for a clothing company but then the owner scamed all the designers and we never got paid. Nothing else about this skill.

Tell us why you would be a valuable asset:
I think I would be a great student and member and I can help other members by creating giveaways and contests. I would work hard to become a valuable member of the group and to earn respect from other members.

Elaborate on your achievements and future goals: I dont usually set goals but right now my primary goal is to get money for buying leet and the next one will be to get a business going on HF and other sites. And a long term goal that I have for years is to buy me a High End PC.

Tell us about yourself:

I am a 18 year old web surfer that like to do lots of thing and put lots of time in them. I am from Bosnia and Herzegovina and it is hard to make a living in my country and that is why I want to learn different skill on the interent to make money by using them. I am curently using the name "mewle4" but when I get leet I will be changing it to "latex_op" because "mewle4" is easy to dox and you know what that means. Thats all for now. Hope to hear from you soon and I hope I will be recruited. Thanks again and have a good day or night.

D??????????????ark - *December 10, 2013, 8:29 am*
That's odd, my app seemed to be up there with the better ones that have been posted, was really expecting an invite :(
Well done to everyone who did get it. <3

King Cobra - *December 10, 2013, 2:01 pm*
Elaborate on your skillset: As stated in the requirements, I am not going to exaggerate my skillsets in hacking, but I will tell the truth. When I joined HF almost a year ago, I primarily joined it due to the

forums of Hacking,as the name implied it is a forum to learn how to hack. I starting studying how to hack and how to not get caught whilst doing so and my main skillset which I have elaborated on is to do with RAT's. I grew very fond of RAT's and started to use them on friends and random slaves which I easily manipulated using my own techniques. I enjoyed doing this a lot and easily memorized a lot of things to do with RAT's and started setting up a few friends RAT's.

Another Skillset of hacking which I know is how to e-whore. Although this may not classify as "hacking" as it is listed in the Hacking Subforum I thought it may qualify. I gathered a lot of resources and knowledge by carefully reading through many e-books, but eventually stopped e-whoring as I found it took an awful lot of time up and I could easily make money in other ways.

My last Skillset of hacking is using and setting up Keyloggers. Keylogging was the first type of Hacking I ever did and the first ever Keylogger I used was called "Vulcan Logger" however it does not exist anymore to my knowledge. I had a lot of fun using this on people and was amazed how easy keyloggers were to setup once I had constantly started to use them.
Tell us why you would be a valuable asset: I believe that I would be a valuable asset to Legion for a few reasons.
Although I am not the brightest of hackers, I believe that by joining this group I will be able to elaborate on the Skillsets in which I have already started to develop on and that I will be able to share many personal tips and tricks with members that I have never told anyone before.

I also believe that as I am a young member, I would be able to learn from the slightly more advanced people and hopefully eventually become a teacher of Legion and begin to help new members when they join.
Elaborate on your achievements and future goals:

I do not currently hold many achievements other than being able to successfully RAT People and obtain slaves using methods that I found myself.
However, I do have many goals which I wish to do such as hopefully learning how to hack on a more professional level, just like the leader of the group, Anonymous. I did not know that the services like he offers such as Grade Modification was even possible until I saw him, and my aim is to try and acquire a similar skillset to him
Tell us about yourself:

When looking overall at my personal life, I am quite a bright student whom achieves top grades in all my class. I am often rated one of the cleverest in my Year Group as I try to learn how to do things that a normal person of my age couldn't do such as fixing iPhones and being able to modify firmwares on Android Devices. Alongside this, I do play the Piano and have a achieved a grade 5.

I also have recently started to find parts as I would like to build my first PC in the coming months.

That is all I have to say for this application. I hope my application is worthy of being accepted, and best of luck to all other applicants!

Acroz - *December 12, 2013, 10:07 pm*
Pretty good applications so far, really enjoy reading them :)

hamzaisgay - *December 12, 2013, 10:22 pm*
Elaborate on your skillset: rating i enjoy ratting people over skype and so on, i do e-whoring really good at it, i have about 5-6 ebooks purchased im using methods from it, and i can sql inject websites.
Tell us why you would be a valuable asset:
i could sql inject a website, and deface it, with the skills i have, in our team, illumanti|legion, i think i

can be a benificial man , to help with the team, as it is all rounder and there are people who have abit of everything, im different i have 1 thing i am good at, meaning i am good at it.
Elaborate on your achievements and future goals:
my future goals, is to be part of a big clan gang such as legion|illumanti to get recognised and hopfully a 1 clan gang can take down a big website and so on, #hacking is what were here for, also #patnership #friendship and main important to get the $ coming.
Tell us about yourself: i am a 15 year old named cody, i am nothing special than any other 15 year olds, i come home, hop onto hackforums, and learn more and more each day, i am currently learning c++ and getting a source to invest it, and get customers viewing my crypters/keyloggers/hacking tools.
since i have 5 reputation, i highly doubt this will be read, but i have high hopes i will join this team, i have the strength needed and required to join this team, i also am very benificial to this team, i hardly do anything other than the computer meaning i have heaps of time for it. thank you if you do read my application.
regards, cody.

niseguy - *December 14, 2013, 6:18 pm*
Elaborate on your skillset:
C#: I've just finished my third semester of computer engineering tech. The first language we were taught is C# and I am pretty competent with it.

SQL: This semester we started on SQL I've done a bunch with queries, Joins, Union, Database creation and lots of other stuff.

Web Languages: I have a mid range understanding of a bunch of web related languages so I'll list them all here. Javescript, jQuery, Ajax and JSON. I also know HTML and CSS but I'm not sure they really count.

Assembly: This year I really got into assembly language. I got to play around with a micro board, and built some really cool libraries.

Electronics: I'm not sure if you have an interest in this one but I can designing and build circuits, I'm not super good I guess but I'm always expanding my knowledge base.

Tell us why you would be a valuable asset:
As you read above I have a bunch of good raw skills, I just need some guidance on how to use them. Ive been apart of HF for a while now and I've played around with RATs, but Im more interested in XSS, SQLi and other web hacking and exploits.

I think with the right advice and guidance I could become a real asset to Legion.

Elaborate on your achievements and future goals:

This April I will be finished with my program, and out looking for a coding job. As far as hacking goes, I haven't done anything really to brag about yet.

As far as personal achievements go I played football a couple years ago, back in high school, we placed 2nd in cities both years.

Tell us about yourself:
Well like I said at the beginning I'm taking a 2 year computer engineering tech course. The course has a main focus on actually coding which means we loose out on a lot of the CS theory but I don't mind that because I'd prefer coding to talking about coding.

I'm a pretty athletic person, that being said exams kicked my butt this year so I'm excited to get back in the gym. As far as personality wise I'm pretty laid back, and dependable.

Junkie™ - *December 14, 2013, 11:52 pm*

Elaborate on your skillset: My main skill set is programming. I have taken several college level programming courses. My focus is Visual Basic. I might not be the most experienced but I think that receiving a formal education in coding has helped me to pick up good practices that some self-taught programmers might miss out on. I'm more likely to give you well organized modular programs than something that is great but hard to read.

http://pastebin.com/6W6HhpKW

Basically what this program does is get data from a user and writes the data to a text file. It also calculates goals and points and knows the difference from one season to the next. I recommend looking at the code since it will give you a better idea of how the program works. It's not very impressive but I spent some time making it crash proof. I plan to add to what I learned in making this program so that I can make something great for HF.

Tell us why you would be a valuable asset:

I am always willing to teach and to learn. A good teacher must be able to learn. I think that my programming skills will be of use even though I have a lot to learn. I'm serious about what I do and I'm always trying to improve. I have a lot of resources that I get from school that I can also share.

Elaborate on your achievements and future goals:

My biggest achievement currently is making myself go back to college and get a CIS degree. I've really had to push myself in some of these classes but in turn I've learned a lot. My future goal is to improve my programming abilities, make a name for myself as a developed programmer on HF, and to release something useful to the community. Later on I will think about coding for profit. I'll be taking game programming classes in school so that's definitely something I want to excel in.

Tell us about yourself:

I'm 21 years old. I'm just a computer nerd who loves all things computers. My main interests are programming and networking. I hope to get certified as soon as I can.

vitafortis - *December 15, 2013, 6:19 am*

Elaborate on your skillset: Programming. I know other skill sets, but this is the one I am most comfortable with and the one I am the best at. There's really not much to tell as I have been in Legion before and we discussed my Programming abilities.

Tell us why you would be a valuable asset:

Read above. I was previously in Legion and left due to too large of a workload at the time so I felt that my being in the group would only be a barrier to other things at the time.

Elaborate on your achievements and future goals:

I hope to achieve success in all I do, that's really about it. I mean I can go into detail, but I had a previous application somewhere that I can't find that got me in :P

Tell us about yourself:

I'm a 21 year old college student majoring in computer engineering.

Sorry for my short app, I'm still searching for the other one.

taloneyes - *December 15, 2013, 8:19 am*

Elaborate on your skillset: My main skillset is defacement even though I still have a bit of trouble with it sometimes. I also like to do coding. Currently, I am learning Python, Batch, and I'm even poking into Visual Basic. I do not have much experience with... well pretty much everything but I have a mindset that's ready to learn more about it and I heard Legion would be a good group for me.

Tell us why you would be a valuable asset: Well, I am a nice and friendly guy, I am willing to learn and pay attention, and I am also able to try my best to help out others if they request any assistance.

Elaborate on your achievements and future goals: One of my achievements were when I finally understood SQL Injection; which may seem like a small thing but I was really glad I could get the hang of it. I have many future goals, some of which include: Becoming an Internet Security Specialist(It's going to take a long time and I'm going to need much more experience!), to fluently understand at least one coding language, and to become a member of a group on HackForums.
Tell us about yourself: I am 15 years old, I am a freshman in high school. I enjoy spending time with my friends and gaming a lot and I really enjoy computers and observing current events happening around the world. I tried out for the wrestling team at my school last year and I made it, but on the first day of practice I broke my leg; I decided to stick to computers after that. I like guns, girls, and food. This is pretty much all about me, nothing new really happens in my life.

xSploit™ - *December 15, 2013, 11:17 am*

Elaborate on your skillset:
Webdevelopment
I'm an experienced web developer, I know PHP, HTML, CSS and small bits of Jquery. I've done a wide variety of projects ranging from HTTP Bots to my latest project, a stealer.
https://hackforums.net/showthread.php?tid=3920979
Graphic Design
Before I did any hacking or web development I was extremely interested in graphic design. I made anything from thread layouts to website templates and mostly stayed away from signatures and focused more on the web aspect of graphic design. I did this for around 2 years before I began webdevelopment but having the design element already down helped greatly when building websites.
Programming
I've looked into quite a few languages e.g. Java, perl & .NET but never really kept on with them, I do however do quite a bit of AutoIt and have built quite a few applications in it.
My most recent being a HTTP Bot which isn't yet finished.
https://hackforums.net/showthread.php?tid=3810768
Hacking
Being a web developer means understanding how websites work and how the backend works, so I have a very good understanding of testing and securing exploits in web applications. I have a complete understanding of all RATs and popular malware, and as said above I even made my own HTTP Bot.
I'm currently running a website with my partner, that will host a wide variety of projects that include all kinds of malware and security related help. The site is under development but we hope to have a big discussion forum and a list of tools that my partner and I have built that will aid in all kinds of hacking related activity once complete.
http://wiztec.org

Tell us why you would be a valuable asset:
I'm always looking for somewhere I can contribute too and I think this group would be a great opportunity to do this. I enjoy sharing what I know with other members of the community and would also like to work together with people to expand my current skill set.

Elaborate on your achievements and future goals:
I do a lot of projects based around programming, hacking and webdevelopment so my main goal at the moment is to get my own site running with my partner, which I can host all of these projects on and have one place that has everything I've built.
http://wiztec.org

Another side project I'm working on is a stealer, which is something I've wanted to do for quite a while and I think could become very popular. http://stealer.wiztec.org
Hoping to have it finished for release within the next month.

Tell us about yourself:
I'm a 17 year old guy based in Ireland. A lot of people know me as Leon my irl name. I spent most of my time the past few years on runescape forums but have finally gotten out of that for good and hope to keep active on HF. I enjoy contributing to the community and rarely get in any kind of disputes with people.

Superkawaii - *December 15, 2013, 11:43 pm*
are you guys still accepting students with no experience ? it would be sweet for a seasoned group to start teaching a classroom of n00bs

even accepting money would be cool to show whose serious and dedicated

bonsai - *December 16, 2013, 6:17 pm*
Elaborate on your skillset: Coding; HTML, PHP, vb.net (learning python) | Hacking; Been ratting for 2 years +, good knowledge on staying secure while doing so also.
Tell us why you would be a valuable asset: I firmly believe that I would be one of the most dedicated members in this group, when I am not at school I will probably be online, if I'm at school I check my phone every few hours.
Elaborate on your achievements and future goals: I plan on owning my own company based off of internet security in the future.
Tell us about yourself: As of right now I'm 15 years old, my names Chris and I like to work on computers!

Lime Whips - *December 16, 2013, 6:28 pm*

Elaborate on your skillset:

I know how to remove a RAT,I have BT5,I know how to bruteforce,I can remove almost any virus except a rootkit

Tell us why you would be a valuable asset:

I have been interested in computers seance I was 8 and I am a very fast learner.

Elaborate on your achievements and future goals:

I have been trying to learn Python and in the future I hope to get a job in computers.

Tell us about yourself:

Well like I said I have been interested in computers seance I was 8 I am a really fast learner when it comes to computers and I have always admired the Legion group.

DecryptionKey - *December 16, 2013, 6:34 pm*
Elaborate on your skillset: Student Programmer with knowledge in C++, VB.net, VB 6, Java, (very basic) Java script. Can accomplish basic SQL injections although still reasonably new to defacement.
Tell us why you would be a valuable asset: I devote almost all my time to computer related activities and the majority of that time to developing my skills as a programmer and hacker. Although I have only recently migrated to HF from random google searches, much of my time has been spent on educating myself.

Elaborate on your achievements and future goals: Once I graduate from school I plan to join/own a software firm specializing in Anti-Virus. Not because I hate viruses or the system in which they're planted, but because I can't resist a challenge, especially one that is constantly evolving beyond recognition.
Tell us about yourself: I am a naturally friendly person who spends most of my time behind my monitor. I love video gaming, programming and being left to my own devices for the sake of innovation. In my eyes, the only way to survive is to be continually moving forward hence my love for creation and constant need of challenge

Creating - *December 17, 2013, 8:18 am*

Elaborate on your skillset:
My skill set is based on elements of social engineering, and exploitation. I use these skills in Doxing, and website defacement (though defacement, I have only been successful only a few times by myself).

Tell us why you would be a valuable asset:
I am able to work in a group setting, and I have legitimate history being affiliated with hacking groups earlier in life. I have started one, and helped finish several established "Anonymous" affiliated operations that were successful in the past, which was before the anonymous name was hated by most.

Elaborate on your achievements and future goals:
As I said before, I was highly involved in the Anonymous name a year or two ago. I helped OPAnaheim by releasing the first legitimate Dox on the police chief, which got me several articles published across the internet. The dox itself went viral among members of twitter, etc, and here is a link to one of the more important articles concerning it. If you would like to see examples of my Doxes that will have to be done privately.

Also, when the company 'Early Flicker" was trying to trademark the anonymous logo, I was the first to stand up and start the operations OPAnonTrademark and OPEarlyFlicker. I was the official correspondent and did doxes, released DB's, talked to press, etc.

I plan to go to college to become a Security Engineer, and something related to the computer science & engineering field.

Tell us about yourself:
I love learning about the depths of the internet and it's people. Using it's information to aid in test of our political struggles has always been a pastime for me. I love learning from others, and teaching others information that I all ready know. It has all ways been a cool feeling to be a step ahead of everyone, without them even knowing. I have been interested in computers and programming since I was around 9 or 10 years old, and it will forever be my passion.

Zen - *December 17, 2013, 11:13 am*

Elaborate on your skillset:
Monetizing:
I feel my main selling point would be in monetizing. I have been interested in online money-making for roughly a year now, and this was the main reason I joined HackForums. From my time here I have collected methods that in total have made me $5,000. While not much, I am very eager to learn new methods as well as improve in areas I already have experience in.
The two methods that have earned me the majority of my online funds are as follows:

Pay Per Download/Cost Per Action:
I joined HackForums with the intention of learning how to make money, and PPD was one of the very first methods I tried. When I was first starting out I was only making a measly $5 a day, however, with time, effort, and patience I was able to slowly work my up to $10, $20, eventually $50 a day on FileIce. At my peak I was earning an average of $750 a month, until my niches died down in traffic. In total, I have made around $3,500 with PPD/CPA. While recently I have invested the large majority of my time into marketing, I am still earning small amounts of $5-$10 a day on autopilot from PPD/CPA.

Marketing:
After spending a reasonable amount of time on HackForums I was soon drawn to the idea of creating a product. I had always wanted to create and sell something that could earn me money, and HackForums seemed like the perfect place to do it. I have sold a total of 5 products, all of which have been eBooks. My latest 2 eBooks alone have netted me over $1,200 profit in the small amount of time I have sold them. Currently, I spend much of time working on improving my products, providing support to my customers, and attempting to spread my product to a wider audience.

Coding/Programming:
While limited, I have had experience with moderate amounts of programming in the past. The majority of it was for monetary gain, for me to be able to code applications and websites for a profit. However, I enjoyed it immensely, even if it was not always profitable. I have had experience with...

HTML/CSS
I learned this with the intention of being able to create more convincing websites for my PPD niches.

VB.NET
This too I began to learn to be able to increase my profits in PPD, to create more convincing and visually-appealing applications. This was the very first programming language I learned.

Python
I began learning Python soon after learning HTML/CSS. It seemed like a simple yet effective language I could add to my programming skillset.

Tell us why you would be a valuable asset:
I feel that I would be a valuable asset due to the fact I have an open mind, and am a fast learner. These two together allow me to pick up new and foreign techniques or skills with considerable speed and ability, which in the past has allowed me to pursue my interests, whether they be monetizing or programming related. I am also an incredibly active member here on HackForums. It is where I spend much of my free time, and I contribute as much as I can while still favoring quality over quantity in the content I contribute. I also feel that by joining Legion, I can spread my knowledge of monetizing and marketing to other members, as well as learn from others and expand my knowledge on the subject.

Elaborate on your achievements and future goals:
I feel my greatest achievements lie in the 2 main monetizing methods I have elaborated on, PPD and Marketing. With 1 single PPD niche I was able to earn roughly $2,000 over the course of 5 months, on full autopilot. With my most recent eBook, Cash River, I have generated roughly $500 in revenue, in only 2 weeks. In the future, I hope to maintain my current products as well as create new ones, and hope to learn from other marketers to better improve my sales as well as my work mentality.

Tell us about yourself:

I am a 15 year old student currently living in the United States. I have been born and raised here, and stem from American and Chinese heritages. Apart from online monetizing and programming, my interests include playing Squash, Basketball, Graphical Design, and playing online games with friends.

Thank you for taking the time to read my application. Best of luck to other participants.

Regards,
Kreature

Prime - *December 19, 2013, 1:55 am*

Elaborate on your skillset:
Coding:
VB.NET/HTML/CSS/PHP

Webmastering:
Mostly for monetizing.

Networking:
Currently studying this at school; installing, managing and securing a network.

Linux:
I've spend a lot of my spare time in Linux the last 2 months and still learning.

RAT's:
I have a lot of experience in this because this holded me busy the first 1-2 years after I joined HF.

Social Engineering:
Human manipulation

Tell us why you would be a valuable asset:

I am a dedicated member who's willing to help fellow members. By sharing my knowledge and learning at the same time this could be a valuable
asset for the group as for me. I am eager to learn and really motivated. I'm most of the time online on HackForums so fellow members can always contact me for help.

Elaborate on your achievements and future goals:
I want to expand my knowledge
A huge known product line

Tell us about yourself:
I am 19 y/o and I am a person who's always eager to learn. I am most of the time online but I also have a life outside. I love to play/watch football in my spare time.

Kirian - *December 19, 2013, 2:46 am*

Elaborate on your skillset:

Social Engineering:
I haven't been doing this for long, but I am experienced with doing it. I have done this when I was jacking YT accounts, Skype Accounts, and I am able to gather enough information to make myself look like my victim. I have SE'd a few items, and if I get in, I can share my methods with some other member's that are interested in getting into it. This is a new thing to me but I have proven myself to be well experienced & have enough information for when people want to learn to do the same thing as me.

Hacking:
I'm no professional hacker but don't get me wrong. I am a little bit experienced, and this group is about learning more. The type of hacking skills I am experienced in is RATTing, DDOSing, Little bit of SQL Injection. Call me a script-kiddie as much as you want but if I got into the group I could write more detailed tutorials on doing this, seeing as Beginner's are always asking the same question, over and over, and I could provide tips & tutorials. This would be good for the community & would help a lot of noobs out. I am experienced with doing all this and could give the group a better name.

Tell us why you would be a valuable asset:
I think I would be a valuable asset because I would make the group a bit more active than it is at the moment by making tutorial's for Beginners & hopefully Advanced Hackers. I think I would really commit to the group and I would always respect other members of the group if they respect me too. I am usually helpful towards other people and always give my true opinion on things. I like to be honest, and there's no point in lying. If you are offended by my honest opinion, I'm stating the truth.

Elaborate on your achievements and future goals: My future goals are to graduate high school & hopefully join the Army for Combat and Security, when I've done that for 4 years, I'm going to try get an important job for Computer Science or Web Development, or whatever I will be interested by then.

These are all the commitments I've made to HF:
https://hackforums.net/showthread.php?tid=3904579
https://hackforums.net/showthread.php?tid=3904042
https://hackforums.net/showthread.php?tid=3870016
https://hackforums.net/showthread.php?tid=3666073
https://hackforums.net/showthread.php?tid=3596365
https://hackforums.net/showthread.php?tid=3601209
https://hackforums.net/showthread.php?tid=3575685
https://hackforums.net/showthread.php?tid=3421061

Tell us about yourself: I am a 13 year old from Australia. I mainly browse HackForums, and I like making new friends and posting a lot. I like to skateboard, learn new things & and I consider myself adventurous. I like to share my knowledge with people that want real opinions and I expect them to share their knowledge furthermore. I currently am starting to learn how to make money online and I want to pursue this a bit more, currently I am only making a few cents a day.

Good luck to everyone else! Hope I get in!

A?.ntichrist - *December 19, 2013, 5:44 am*

Elaborate on your skillset: Linux: I am a proud Linux user and ain't afraid to show it. I have been using Ubuntu, Fedora, Mageia and Backtrack (currently running Kali on my second Laptop to do some penetration testing on the networks I can get my hands on--> Neighbours, Campus, etc.) for the last couple of years (5 years to be precise). The customization features on Linux distributions are vast and that's what I enjoy most beside the fact that it's more secure than any windows PC.

I definitely know how to use the mighty weapons implemented in the Backtrack/Kali distro.
Hacking: Well since I wasn't allowed to use my Computer for 1 year due to an attack on the pharmaceutical company Sanofi I am still in the process of catching up on recent events. Since I almost destroyed an entire batch in the process of discovering their security loophole I was almost charged 125,000 € (yep grands). I had to sign a non-disclosure agreement and I got a criminal record now. It was a big thing, they thought I was a spy hired by chinese companies so they forwarded this to their head office in France. As part of my penalty I had to program an E-Learning software for them in my vacation time. And unlike most people I had to hire 2 lawyers to help me out on this matter. This incident earned me the nickname Lantus-Hacker, (Lantus was the name of the plant where all of this happened) [I'm actually not allowed to talk about this]
Tell us why you would be a valuable asset: I think I would be a valuable asset due to my scientific insight. I adapt fast and I got an eidetic memory, used to do memory sport in the past (mainly with numbers since they helped me to perform mental calculations with really large numbers). I also like to share my knowledge with other people.
Elaborate on your achievements and future goals: I have actually no clue what I want to achieve in the future. Maybe get into a working relationship with another human being. My GF left me not long ago cause "I didn't spend enough time with her". Oh and I will apply myself more in the CCC (Chaos Computer Club)
Tell us about yourself: I am a 20 year old physics student from Germany who recently worked as a chemical technician and enjoys listening to baroque, barbershop and metal. I play the violin and the guitar, collect comics and Magic cards. I have played video games excessively in the last 2 years since I've got nothing else to do [no PC]. In fact I was one of the top players of DCUO on the EUPC server[I know Legion is not about gaming but I thought it would be worth mentioning].

Tuxedo - *December 20, 2013, 1:34 pm*

Elaborate on your skillset:
SQLi
One of my hacking capabilities are mySQL injections. I find them interesting and quite easy to complete to a certain point,
I must admit, I'm still a beginner though very eager to learn. I'm looking to expand my current knowledge within this subject, and make it my main field of hacking.

RAT'ing
I have extensive knowledge in remote administration tools, with the setting up of various tools and using crypters.
I'm quite good with the spreading of different files, and believe I would be a good asset to Legion within the field of this.

Network Security
I recently had work experience at an IT company that consults for the Government (in AU), it was an amazing experience to see how everything works as one and really
opened my eyes to the different jobs within IT. Short of that I plan to study Network Security at University, and I'm currently doing Information Technology in School
which has an entire section dedicated to networking and networking security.

Coding
I'm able to do HTML, CSS and VB.NET fluently along with a little bit of C#. I can help users at any time with
most problems, although I've taken a long break from coding so may be a little rusty especially with

the C#.

Tell us why you would be a valuable asset:

I'm hoping to gain greater knowledge within the field of hacking by joining Legion, I will be a fantastic asset
by being able to provide my extensive and thorough knowledge of computers to anyone within Legion or out.
I believe I will be a good representative for Legion as I generally have a positive attitude and can be

quite friendly most of the time. I'm looking to learn, and Legion looks like the best place for that.

Elaborate on your achievements and future goals:

Hoping to join the Air Force and study Information Technology: Network Sec at Uni through it.
I can't really say much more, though I do hope to extend my knowledge within Hacking as one of my future goals.

Tell us about yourself:

My name is Tuxedo, I usually just go by Tux or Tuxxie. I'm a 17 year old from Australia, yes the land of down under, and I've always had a love for anything to do with technology for many years.
In the past few though, I have been learning different languages and extending my knowledge with more advanced implementations of computing. I consider myself to be generally a
very approachable and friendly user, thus believing I would be a great representative for Legion.

For your consideration and action,
Tuxedo

Acroz - *December 21, 2013, 10:44 am*
A lot of new HQ applications. Should start reviewing them soon :3

iNuke - *December 21, 2013, 12:01 pm*
Elaborate on your skillset: At this moment I don't have a lot of skills. I know basic things like RATs, JDBs, etc. I tried SQLi and followed some tuts about SQLi and other exploits like that. I have some gaming skills as well. Lately, I've been in the crypto currencies, I guess I know a few things about it now. It's not a lot but I want to learn more, and I'm motivated.
Tell us why you would be a valuable asset: To be honest, I wouldn't be a valuable asset, because I know almost nothing related to hacking. I'd like to be a student. I am really motivated to learn a lot of things about hacking, and to become better in this world. I want to learn more, and I'm motivated.
Elaborate on your achievements and future goals: I don't have any set goals right now. I just want to learn more, and I'd like to meet some "teachers" from Legion to see what they can offer me. I want to learn more, and I'm motivated.
Tell us about yourself:I am a French user, but I am able to speak English. I love new technologies and everything related to computers. I want to learn more, and I'm motivated.

Sorry for the LQ application, took the time I had.

Keep this group up Anonymous!

error121 - *December 21, 2013, 7:11 pm*

[img]http://www.forumrunner.netau.net/files/legionlogo.gif[/img]

Application for Legion Recruitment.

[img]http://www.forumrunner.netau.net/files/legionsep.png[/img]
Skills

#~Web Application Hacking

-SQL Injection
I know Quite Good SQLi techniques.
I know Union Based, Error Based/ Double Query Based, SQLi in MySQL Server Perfectly.
I also know blind based Sql injection, but not that good.
I also know Union Based, Error Based/ Double Query Based, SQLi MSSQL, Postgresql Server Perfectly.

-XSS
I know Intermediate Cross Site Scripting.
I can bypass medium XSS-WAFs
Not a pro at this, Still learning

-Web Application Firewall Bypassing
I've bypassed many WAFs,
again, Not a pro at this, Still learning

#~Ratting, Social Engineering etc.
-I have good Social Engineering skills, which helps me alot while carding and ratting.

#~Monetizing Techniques and SEO
-I know Carding. I am not a pro at this but, can help other members to learn carding
-I also provide SEO services.
-I know good monetizing techniques.

#~Programming
-HTML5, CSS3, JS2, PHP, SQL
I am pretty good at web development and designing.
i also know a little c++, perl, python etc.

[img]http://www.forumrunner.netau.net/files/legionsep.png[/img]
I would be a valuable asset as:

Well, I think I would be a valuable asset to the group because I have a strong personality, strong willed person, and I Strive for nothing but the best. I don't like to rest, I always share and gain knowledge, I don't have ass anything I do, anything I do is done with top quality, I won't settle for less. I am a very easy guy to talk to and won't let the group down, simple as that.

[img]http://www.forumrunner.netau.net/files/legionsep.png[/img]
Achievements and future goals:

Well me and my team have found vulnerabilities in many cms such as WordPress ...(mainly 3rd

party)
For the future I am looking to setup a network pentesting lab and start my liFe as a bug bounty hunter :)

[img]http://www.forumrunner.netau.net/files/legionsep.png[/img]
About Me:

I am 17, male, from India.
I am currently intrested in bug hunting..
currently my 3 high profile bugs are under consideration.
I like to listen dubstep music. My day starts and ends only just sitting front of the computer screen. :)
I am a friendly guy. but don't like to talk much...cuz I think..
"Action Speaks Louder than Words"

Thanks...!
Hope you like my skills and add me to this awesome group

(R)e1gn - *December 21, 2013, 8:30 pm*

Elaborate on your skillset: My skillset persists of the following. First I believe i am semi-decent at ratting i have fair knowledge of setting up rats etc. I have much experience in linux from setting up attack servers etc. The thing i am best at is the stress testing industry from making booters to making an api to power booters.

Tell us why you would be a valuable asset: I believe I would be a valuable asset as i can assist the members/people asking legion for help with their stresser related problems Elaborate on your achievements and future goals: My achievements have been making a private api i have made gone up to 20 gbps and my future goals are to make an api to sell on hackforums which will be coming soon.

Tell us about yourself: I am the average computer "Hacker" as what they call us. I am a greyhat as I don't like doing everything blackhat but I do enjoy blackhat things and i have seen this group and thought it was one of the most high quality groups I've seen

•Lucifer - *December 21, 2013, 9:55 pm*
Vouch for this user
Spoiler (Click to View)[img]http://i2.minus.com/isU0c0DNykL6U.png[/img]

EziNet - *December 21, 2013, 10:19 pm*

Elaborate on your skillset: Cryptology, Mining, php, HTML & Marketing. Little bit Hacking also

Tell us why you would be a valuable asset: I think I would be a valuable asset to the group simply because I'm trying my best to become HQ and kind to others. I'm always trying to learn and teach new things, i do lots of Giveaways and i offer Many HQ service here.

Elaborate on your achievements and future goals: My goal is become successful business man and

make my family proud.

Tell us about yourself: I'm 22 Years old and I'm currently studying in computer and economy. I do trading and i offer exchnage service.

Computer Forensics - *December 21, 2013, 10:46 pm*

Elaborate on your skillset: My skill sets are learning as much as I can on the forum weather it be hacking or coding and being able to assist people who require help or need it.
Tell us why you would be a valuable asset: I think I could be a good mentor and helper to some people who need ideas or some guidance to a subject or information about one.
Elaborate on your achievements and future goals:I achieve a calculator in python,php,and java-script I have been studying e-books and staying active in that forum.
Tell us about yourself:I enjoy learning the vast variety of things on the furoms. like coding languages,understanding the functions of a program and what it does and how it works.And I enjoy helping the members in the forum community.

Spoiler (Click to View)[img]http://i2.minus.com/isU0c0DNykL6U.png[/img]
o.O what's your problem??
i didn't got u.. :/

Krox - *December 22, 2013, 4:55 am*

Elaborate on your skillset:
Web: HTML, CSS, PHP, MySQL, Boards and scripts setup, VPS setup
Coding: studying C#, basic knowledge of C++, web languages
Hacking: RATs, Armitage, Metasploit, wifi hacking (reaver, airmon-ng,..), ettercap, karma, cain and abel
Mobile: android hacking

Tell us why you would be a valuable asset: I want to learn and share everything I know and learn by myself, while working with a great team, where I can talk with students and teachers with more experience than me and acquire a huge knowledge. I'm a great student, I do enjoy learning new things and I'll put all the effort I can in studying with you.
Elaborate on your achievements and future goals: Past achievements: coded many websites, hacked with kali and still learning how to use it properly
Future achievements: becoming a great pentester, learning how to code hacking tools, study cryptography

Tell us about yourself: I'm 18 years old, I'm about to join the university where I think I'll study either Maths and computer science where I'll be able to study cryptography and how to optimize programs and networks, I do sport, and I study a lot everyday. Some of you know how much effort I'm putting to join Legion!

-3?? - *December 22, 2013, 5:08 am*

(Dec 22, 2013 03:50 AM)error121 Wrote: *[CITE]* o.O what's your problem??
i didn't got u.. :/Carding isn't allowed on this forum and it's extremely illegal.

betarunner - *December 22, 2013, 6:03 am*

Elaborate on your skillset: As for coding, I unfortunately only know HTML,CSS, PHP, and some Java. As for physical systems, I built my first custom computer a year ago. As for Linux, I am still a

beginner but I am constantly trying to improve and master my skills with the system. I learn very quick, so improvement will take little to no time. Last but not least, I have been removing viruses from my computer since I was 11, and successfully each time I might add. I fixed the computers at my work, and I am the only person that has fixed my computer since I was 11.
Tell us why you would be a valuable asset: My ambition to succeed in learning these teachings could pay off for you in the end. I am a valuable asset simply because of my drive to go further and improve my skills.
Elaborate on your achievements and future goals: All my notable achievements are listed in the skillset paragraph. As for my future goals I plan to become a computer security worker, or go down the route of being a software engineer or web designer. I want my skills to far exceed anyone else's though. My other future goal is to be the best at what I do.
Tell us about yourself: I am a hatchling, an 18 year old female about to enter college with a major in computer science with an emphasis on system security. I am a perfectionist. I tend to overdo things and over think things. I am typically a very courteous and kind person, but my bad side is the exact opposite. I am bad about telling about myself, so I shall stop here.

error121 - *December 23, 2013, 2:36 am*
(Dec 22, 2013 06:08 AM)Epsilon? Wrote: *[CITE]* Carding isn't allowed on this forum and it's extremely illegal.
Yeah I know...
but carding is just a part of my skillset... :)
I never discuss a single word about carding in this forum :)

?The Fallen - *December 24, 2013, 11:23 am*
Elaborate on your skillset:
Rats and Botnets
I am familiar with both, I am more stronger on the RAT side, I am very good at spreading, and setting things up for people. I have as mush time on my hands to help others out. I have a Plasma HTTP botnet at the moment with many bots. I have Plasma RAT, and Blackshades, currently as my RATs. I also am good with stresser's and booters, I can set them up with ease for others who need help, same with RATs. I am decent at cracking but I am no master at it.

Marketing
I am very wise when it comes to marketing. I had many successful products and services on the past (different forums), and one day I will get back to it. I am soon going to release a RAT soon in the marketplace, and a upcoming e-book on how to maximize profits with slaves and make money with them. I have done many successful exchanges, I have had many successful deals.

Doxing
I am decently good at Doxing, but I am no expert. I can get basic information on people such as name, address, phone numbers, emails, and SSN.

Social Engineering
I have many methods of SEing, from getting headphones to electronics such as a ps3, I currently have a huge SE method pack on my desktop and I planning to give them away. I have SE'd PSP, headphones, ps3, and some other electronic gadgets.

E-Whoring
I am fairly familiar to e-whoring and I am good at it. My first day doing it I made around $110 and my progress had been picking up towards the end of months. I have many methods of e-whoring and I still use them currently. I don't ewhore as much as I used to because I am not in need of money currently.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff, and pass my knowledge on behind me to the people that need help with it. I would encourage others to try and learn and become in a high quality group like Legion itself.

Elaborate on your achievements and future goals:
My achievements that I made aren't the greatest but they are decent. I managed the master RAT's and Keyloggers since I joined Hackforums. I have learnt monetizing, eWhoring, keyloggers, rats, and many others. I am always trying to help others that need my help. I'm always passing on my knowledge of what I have to other members. My future goals is to have my own stresser. It is currently being made as I'm writing this application. I'm planning on going to college also for coding when I graduate High School.

Tell us about yourself:
I am 18 years old, I'm in 12th grade. I am usually on hackforums for at least 4 hours a day, as I'm now on winter break. I'm always on at least once a day here. I love to play Runescape and Xbox live with friends, and go out and have some fun. I just bought a new dirt bike with my own money I had saved back for one. I'm pretty popular in High School, I'm going to college after I graduate High School. For sports I play Football, Wrestling, and Baseball for my High School team. I am pretty much a laid back person that likes to have fun with his friends.

TheAndrew - *December 25, 2013, 11:31 pm*

Elaborate on your skillset:
Gamer: (RPG, strategery and shooters)
Softwares:
Photoshop:3 years experience. I know to create banners, logos and more other things in photoshop.
Pro Gold Show(video maker): about 2 years + 1/2
Programming: 2 little games in Firefox OS store and some achievements at competitions. I know school programming C++/HTML/CSS and i'm begginer in JS
Linux Ubuntu: 1 year experience

Tell us why you would be a valuable asset:
I think I'll a good member because i want to learn as much as I can. I always want to help others and I never give up when I want to do something.

Elaborate on your achievements and future goals:
I want to finish the high school and then the Computer Science. I want to work as a security developer.

Tell us about yourself:
My name is Andrew I am 19 years old and I am from Romania. I like to learn hacking thinks but not to damage other peoples work - if they are good guys. I try to learn lots of things about security and hacking.

Kansas - *December 25, 2013, 11:33 pm*

Has been awhile since the last wave of recruits, I'm sure they're going to take the next wave soon. I've seen a lot of HQ applications posted since last wave, can't wave for the next wave.

Acroz - *December 26, 2013, 9:14 am*

Now looking into applications.

DO NOT post about your gaming skills as you'll be instantly rejected from now on.

Everyone who didn't get accepted this round can go ahead and put more effort into a new application explaining their hacking-related skills.

Orochimaru - *December 26, 2013, 9:41 am*

Elaborate on your skillset:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Website Construction
HTML, Hosting, managing and construction.
Example website I made: http://virtualmarkets.org

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Coding
HTML, Python and VB.NET/VB6 (Am now learning C/C++)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Graphics
I can do a little bit of Photoshop (Logos, Userbars, Signatures and GFX Threads which you can find most of at legacyforums.vacau.com)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Computing
Windows 7/8, Malware Removal, iOS and iDevice, Virtual machines (VMware, etc)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Marketplace
I can manage my money and make some off the internet with services like currency exchange, crypting, setup and more. I'm experienced with CPA and PPD as well, i've been making quite a bit of money.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Hacking
Botnet, JDB, Exploit, Jailbreak, Infections, Rootkit/Bookit Ring0-Ring3, Cryptography, SQLi, Spreading, Vulnerabilities.

Tell us why you would be a valuable asset:
I will share all the methods and hacking related guides I come across/create with the community, all the tutorials I make will be representing the legion group, I will always wear the userbar and I will help whoever needs help in the sub-forum, I will post as much as i need to and take part in the Legion giveaways, contests and competitions. Since Legion will be the only group I would be in, I would contribute everything to that group, I will share all my knowledge and hopefully help as many members as I possibly can as well as bring more reputation to the group.
Open this spoiler for some tutorials I've made and I could share!

Spoiler (Click to View)
Some of these guides were from while i was in Legion.

How to setup Darkcomet: https://hackforums.net/showthread.php?tid=3633110
Beginner Virus Removal Guide: https://hackforums.net/showthread.php?tid=3472081
Manual SQL Injection: https://hackforums.net/showthread.php?tid=3643497
How to setup a Niche: https://hackforums.net/showthread.php?tid=3719528 (for spreading worms, rats, etc)
I have a TON more tutorials and a LOT more ideas in mind ready for if i'm accepted!

Elaborate on your achievements and future goals:
I have achieved a lot in my past months on HackForums, all the things it taught me, I don't think I can learn them anywhere else, all the people I met, all the experiences I had, I achieved my first

online business from hackforums, the first website I ever contributed anything to was hackforums, I achieved a nice post count, but I believe in quality over quantity. My future goals will be to have a nice group I can contribute to, and maybe get some awards like the sticky man, I want to become a well known, and high respected member on the hackforums community most of all.

Tell us about yourself:
I'm 16 years old, my name is Alex and I love going on my PC, my first interest was hacking, I started since i was 8 years old, but back then I was just some loser using club penguin trainers and I was interested in Habbo retros and hacks, then by the time I became 12 I took a break from computers, but once I got a new laptop when I was 15 I started taking an interest in PC gaming. From there I wanted to know how to make my PC faster, so i did some research and got interested in the manipulation and management of computers, computing basically. From there I started practicing some coding languages and started up a forum by the time I was 16. Finally I got an interest in hacking, I started off DoSing websites that pissed me off like a little immature kid, then I got into RATs and infecting people, I first did it for the fun of it, then I understood that it got boring viewing their webcams and putting on scary popups, I started taking their passwords and using them, then I got too many passwords, so I started selling them, I soon brought my business to hackforums, where I learned SO much, I learned about rootkits and kernel infections, ring0 to ring3, about social engineering, SQL injections and much more, from now I'm practicing up on TCP binding kernel infections, packet manipulation, and encryption/decryption. Now I'm almost 17 and here I am, applying to join Legion once again, I used to be in this group earlier but I had internet problems and when I returned I was out of the group, so i decided to take a break and let things pan out and I think i'm ready to try and join again.

I used to be in Legion and those were some of my best times on HackForums, I hope to be given another chance at learning even more new things and being a part of the Legion community!

Happy Holidays,
Orochimaru

Paradoxmoney - *December 26, 2013, 11:34 am*
Elaborate on your skillset: Able to use code such as HTML,PHP and CSS . I have learned how to use information and data acquired from ratting to help spread faster through out the web and i have come up with many great ideas of different tools that with the write people would work.In my time of using them, I also learned how to remove them. I can definitely help people remove an infection quite easily if anyone has some malicious software on their computer. I am very creative when it comes to most things and i believe that i could come up with a large variety of great products that i could share with the group and i could provide a lot of ideas to the group for products and different hacking methods revolving around ratting. I sell promotional video uploads on to a wide audience YouTube channel, which is a large money making scheme.

Tell us why you would be a valuable asset: Because I have a strong personality, strong willed person, I can help in many situations. If anyone has any questions or needs any help, it is my number one priority to help people out. I can help people avoid being scammed and tell them exactly what they need to do to do certain things in good detail and I always make sure that people understand what I am saying. I can see when a person needs help and can always do it or point them into the right direction.I can provide online support , since i stay much active .

Elaborate on your achievements and future goals: Enjoy the community as much as possible, contribute everyone who needs

Future Goals

*I want to become a better Coder, Graphic artist, and Marketer.

*I always wanted to get in Legion

*Become Respected on HackForums

*Advanced knowledge in pentesting.

Achievements

*I've created a few small websites

*Support Users,

*Multiple Operating Systems knowledge & Manage Servers

*Understanding of most types of DDoS attack.

Tell us about yourself: I am one of the most enthusiastic people when it comes to learning about computers, I have been obsessed with computers since I was 12 years old, I was once seeing my father programming a robot with a computer, and that is where I thought that computers were just purely, awesome . I play Football, Wrestling, and Baseball for my High School team. I am pretty much a laid back person that likes to have fun with his friends .I am really outgoing and really nice to people who are respectful. I volunteer at an animal shelter and I own two dogs

Thank you for reading my application. I hope you enjoyed reading it as much as I enjoyed writing it.
-*-GOOD LUCK ALL-*-

Nina Dobrev ™ - *December 26, 2013, 11:37 am*

Elaborate on your skillset: HTML (still semi working on), Python, learning Java
Tell us why you would be a valuable asset: Eager and willing to learn.
Elaborate on your achievements and future goals: Future goals - doctor and able to continue my pursuit in technology.
Tell us about yourself: I am a double major now Biomedical Science and Computer Engineering. No minor..lol I know I'm not the most impressive applicant but I'm willing to learn and doing so now.

Steven Paul - *December 26, 2013, 11:54 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Social Engineering: I am a Oldschool Social Engineer. One of the best. This is a claim, that I am not afraid to make. I was one of the most active users on the SE scene and I was frequently sharing methods and ways to social engineer companies for products. Not only did I SE for products but for passwords and more. I am one of the best at human manipulation, you will ever find. Test me. If there is a tough company, I'll crack them.

Hacking: I do know how to "skid" hack, I know all about rats, crypters, keyloggers, stealers and I have used them from times to times. I have also made a booter back in the time, but now I don't do much hacking. But when I do, i do it big. I care for quality rather for quantity. Which means that

when I rat someone, I don't just rat anybody. I rat Runescape suppliers and sell there RSGP. I rat, Alibaba Merchants. I rat, DHGate Merchants.

Tell us why you would be a valuable asset:
My Human Manipulation skills are worth it. You will never regret putting me in the group. How are you going to have a victim open a rat? You need to be convicing. SE'ing can you help alot. Example when DDosing and you need to get the IP of a server. You could SE your way through CloudFlare and get the IP adresss. Where normally you would have to find an exploit, the SE will work for all sites.

Elaborate on your achievements and future goals:
Succesfully SE'd all the hard companies:, Apple, Texas Instruments, Sony and furthermore.
Professional at lying to people. I can make exuces up real quick.
I want to become better at hacking in the future, especially website hacking.

Tell us about yourself:
I am Steven Paul from Hackforums and I am 15 years old, I live in Denmark. I guess, I like to lie too much! I currently have alot of sparetime where I could assit members. I guess that's me!

+ Recommendation from the Legion member Ixaris (after getting serveral questions)

Hidden™ - *December 26, 2013, 3:56 pm*
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
I consider myself to be a good marketer. I can accommodate and put myself in other people's shoes if I have to. It gives me a unique way to communicate. Other than that I used to code in Java and a little Visual Basic but my attendance at a Military School has blunted my knowledge of both languages a bit.

Tell us why you would be a valuable asset:
I feel like if the group ever needed a donation or a community project type of deal, I could spear head and help alot with it. Promoting / advertizing is one of my specialties and I feel like I could give the group a good name.

Elaborate on your achievements and future goals:
As of right now, I have a certificate in customer satisfaction, and I attend a Military School which I feel makes me a bit more focused than most people.

Tell us about yourself:
I am sort of a rouge, I like to keep
things loose and I am a money lover. Very easy going and easy to talk to.

Note: My reputation was reduced because of a conflict with Omni regarding my threads being junked without telling me. So I would

basically make a sales thread or giveaway and almost instantly, the administration would take it down and when I complained and asked what was going on, they banned / rep-fucked. Never have I scammed anyone or treated any members unfairly.

Teh Afro - *December 27, 2013, 12:55 pm*

Elaborate on your skillset:
I have knowledge of marketing, malware, basic application security, web design and construction, as well as marketing.

Malware
I have extensive practical knowledge of different forms of malware such as, RAT's and keyloggers. I fully understand how they work and have helped multiple users in the past to setup and test their's.

Basic Application Security
I have a general knowledge of how to secure a program for example to stop it being cracked and how to spot flaws in the security of said given program.

Web Design And Construction
I have prior knowledge of web design and construction as I've created quite a few personal small sites and landing pages. I mostly work with just pure HTML and CSS but I have ventured into other areas. At the moment I'm attempting to learn PHP so I can setup more complex sites.

Marketing
I sell a total of 8 E-Books, have 5 social media services and plan on releasing a new RAT and Turbo program within a few weeks. I spend a lot of my time finding new ways to earn money and help others make money.

Tell us why you would be a valuable asset:
I believe with my knowledge stated above I could help out other students in the group with any of their problems. I also feel I could be a valuable asset in Legion. Although, being a student I am more interested in what Legion can offer me, which I know is an extensive amount of knowledge in an array of different fields.

Elaborate on your achievements and future goals:
I'll quickly state some of my past achievements of this year.$15000 made online.
Screenshotting application released.
Custom PC built.
HTML & CSS fully learnt.
Multiple sites published.
Launched several products and serives.

Here are some of my goals.Get onto the college course I've applied to.
Learn PHP.
Learn Python.

Expand my services and products.

Most of my goals are financial and educational goals. I have smaller "sub-goals" I guess you could call them but I don't find them to be important enough to be listed here.

Tell us about yourself:
I'm a 15 year old from the UK, I enjoy learning about new things, marketing, gaming and a lot of other things. My main focus is on marketing on this site but I'd love to learn more in the security sector of IT. I feel I could learn a lot from Legion hence why I'm applying. There's a lot I could say but I'd rather not disclose it all publicly.

I hope to hear back from you soon.

Thank you. ?

King Doom - *December 27, 2013, 11:36 pm*

Elaborate on your skillset:

Social Engineering:

Social engineering has been a passion since I was young, I would always talk someone into doing whatever I wanted. I've SE'd virtual items such as account information, all the way to physical items such as headphones. Basically if a company has a support number, I can get almost anything I want.

Marketing:

I've been marketing on various websites for several years and have acquired a decent amount of knowledge on how to make a quick buck. I've sold various products and blackhat services over the past several years and have made a pretty impressive profit.

Jacking:

I have many methods/techniques to gaining access to various accounts on various websites such as the following:AOL
Yahoo
Paypal
Most Phone Companys
Most ISPs
etc.

Rats and Botnets:

I first learned about rats in 2009, and have been using them ever since. I've used many different kinds of rats and have become very skillful with most rats. I've owned many botnets through the years, some as small as 1 bot, others as large as 22K. After I gave up botnets I moved to linux based servers, as I find them a more reliable and effective source of DDoS rather than a botnet.

Security:

I have a VERY vast knowledge when it comes to securing things. Such as, accounts, websites, etc. I've been hired for security by several small/medium sized online businesses. I mainly focus on the security of accounts, such as paypal, skype, aol, yahoo, etc. I've also had little experience helping secure websites and dedicated servers.

Tell us why you would be a valuable asset:

I believe I can be a valuable asset to legion for many reasons. I can share my methods/techniques with other members of the group, and mentor them if needed. I think my knowledge could be very beneficial to every member in the group. I can provide guides on how to secure your account's on various popular websites i.e aol, skype, paypal, amazon, etc.

Elaborate on your achievements and future goals:

I've achieved many online goals in my time on the internet. I've achieved small goals such as make $100 online, to owning my own stresser, to owning a huge botnet. My main goal is to further improve my social engineering skills and try to integrate it with my future career.

Tell us about yourself:

Most consider myself as 'young', but age is just a number. I'm 18 years old, and have a passion for social engineering. I graduated high school a year early and I'm about to start college. I'm a very dedicated/honest person, and I'm not afraid to be brutally honest. I speak my mind, I'm not afraid to tell you what I think. I'm a very relaxed/chill person that easy to get along with, but I'm the type of person that treats people how they treat me. If you come at me disrespectfully, then expect me to be disrespectful to you.

Gabrielix - *December 28, 2013, 3:10 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Yes, hello.

Elaborate on your skillset:

I'm experienced with all forms of UNIX. I've used everything from HP-UX to Tru64 to Linux to MINIX3. In fact, if it is UNIX or has some form of POSIX in it, I've at least played with it.

I've got experience with web-application vulnerabilities; LFI, SQLi, XSS, the usual suspects.

I'm a competent enough Perl coder. I've also dabbled in Fortran, C, Python, Ruby, the Lisps, etc.
I am experienced in rooting and backdooring UNIX-like operating systems. I can get in, escalate, and backdoor everything, and then disappear, and you'll never find me in any logs.
Tell us why you would be a valuable asset:
Because I'm elite as fuck.
Elaborate on your achievements and future goals:
I don't brag about specific things. I don't have any future goals other than to have fun and end the whitehat tyranny.
Tell us about yourself:
I don't talk about myself. However, I can tell you that this is my first form, and I have at least four more to go before my final form.

xXxKingOfChaosxXx - *December 29, 2013, 2:25 pm*

Elaborate on your skillset:Somewhat okay with XSS. Very good with Rats. Use DC myself. Ehh... I'm learning PHP & JS. I know Quite some batch as well. A hard worker, and I love to help & learn.
Tell us why you would be a valuable asset:
I'd love to help. You let me knowwhat to do, and I'm there. So basically almost like an intern xD
Elaborate on your achievements and future goals:
I have defaced a few websites, nothing major. I plan to become as good as I can get. Studying to become a programmer.

Tell us about yourself:
Well, I'm actually 15, not 27. OCT 1 is my Bday. I'm in 10th grade. Live in the U.S. Male. Love sports and tech. (as you can see) And if you want to know more, ask me! SKYPE: XxAvenged_ChaosxX -- And my -REP is for bullshit. I did nothing wrong on purpose anyways. Posted on wrong forum and said microsoft was gonna lose million.

?ain - *December 29, 2013, 4:52 pm*

Elaborate on your skillset:

RATs:
I know everything I can learn about RATs.
I can assist in portforwarding, stabilizing a botnet of slaves, and spreading of slaves.

Botnets:
I know how to set up many botnets, including, but not limited to, these:Di Botnet
Madness
Smoke
Umbra
uBot

Solarbot
Andromeda v2 and v2.0.6
War bot
Plasma HTTP
Many more.

I can do this either on hosting or on a VPS with your own personal hosting.

SQLi, XSS, and (like it's still userful) LFI/RFI:
I am becoming adept at these methods of penetration. I'm not saying I am a master of them, because I am not, by any means.

Monetizing & Marketing:
I can assist in either blackhat monetizing, or proper ways to make money, including:Dropshipping (Properly)
Email Marketing
Sign Up monetizing (because that seems to be where all the craze is)
PPD/CPA

I have also helped many people in the writing of their ebooks, by assisting in grammar and formatting, and much more.

I've also assisted many people in the fields of PPD/CPA.

Kali, and more particularly, Metasploit:

I am not a master of this, by any means. I am hoping to partially become a student of this field, and to help others with what I do know.

I've accomplished a lot with these tools, the most recent being ghost scripting a malicious PDF to become FUD. The PDF was a simple one made by an embedded .exe, and I extracted the javascript and encoded it.

I have also been successful in many Office documents exploits, including .docx (Not the common Office 2003 one, either, the Vb6 exploit, which I am trying to learn to encode and such) and also an .xls exploit of the same nature.

Tell us why you would be a valuable asset:

I am a great, willing learner, and wish to learn more. Every bit I learn, I will share with whoever I can, to assist in any way possible.
Elaborate on your achievements and future goals:

Achievements:Defacing many sites by SQLi, XSS, and bruteforcing.
Encoding several MS Office and other exploits
Getting my botnet to reach over 1,000
Coding basic malware
Helping over 20 people set up RATs/Botnets
DNS flushing a slave's WLAN to get 8 high target slaves (Was harder than I predicted)
Helping many spread properly, and not by saturated methods
Made $200 online

Goals:Become a master of SQLi and XSS

Learn VB.NET/VB6/Python/C languages/Java/Web dev languages (Javascript, PHP, etc) and more.
Make at least $3,000 online, and create a steady income
Code a survey locker, advanced worm, and crypter.
Code a personal botnet.
Learn the basics of at least every sort of penetration method and advanced stages of select ones
Discover my own exploit
Perfect more Office exploits, and sell them.
Join Legion. It'd be a great learning experience.
Tell us about yourself:
I am a 16 year old guy, trying to learn everything I possibly can. I have browsed these forums for a long time, and have come to learn almost everything I can. I have found myself in the position of helping many people, and rarely finding myself learning anything new. I have recently started learning programming languages, even though I accidentally started on Python 3, and am taking a step back into two, and I am also about to advance into the intermediate stages of VB.NET. I really just crave to learn everything I can, and see this as a prime opportunity to learn more.

APPLICATION IN TEXTSpoiler (Click to View)ALVICI'SAPPLICATION
Elaborate on your skillset:
CODING - My obsession for code has started a while back when I first took a course in Computer Science. For the first year of the course, we were taught Turing and a few coding concepts that are used throughout different languages. Besides the downer of learning a useless language, the experience of taking the class was really helpful as it taught basic concepts and algorithms that a programmer should know. Currently I am in the second year of the class which is now teaching us more advanced algorithms and concepts along with Python. So far, I am far ahead of what's being taught in the class and end up helping my peers understand what's being taught which is helpful for me too because when explaining to others a concept, you eventually understand the concept more yourself. In the near future I will be taking the CCC (Canadian Computing Contest) which is a contest that has 5 questions/problems to answer within 3 hours. Aside of what's happening in school, I have managed to teach myself Ruby and of course HTML/CSS because who doesn't know HTML/CSS. I've also been snooping around the Grade 12 Computer Science class and have picked up a bit of information on Big O Notation which is quite useful for making efficient code. In the next year of Computer Science we will be learning Java along with more advanced concepts which will be fun. So basically I take Computer Science seriously as it is my favorite class as of the last 2 years.
Tell us why you would be a valuable asset:
Well, from what I told you in my elaboration on my skill set, you could easily tell that I take Computer Science seriously. Taking that in note, I love learning and teaching about the subject which makes me a valuable asset to Legion because it would help keep the activity of the sub-forum flowing. Aside from that, I am not a biased person and I would be a mature addon to the group. If

you are worried about activity, I wouldn't stress it as I would my activity would be high due to the fact that the group is based on my likings.
Elaborate on your achievements and future goals:
In the near future, as stated in my elaboration, I will be taking the CCC (Canadian Computing Contest). This contest is ran by the University of Waterloo and if one scores high in it, the advantage of the persons acceptance to U of W will be very high. This is basically what I am taking the contest for, I want to score high enough to the point where my advantage of acceptance is high when I apply for Waterloo. I will be taking the Junior CCC this year and the Senior CCC next year with the goal of achieving a high score on both. This goal should be reached easily because of my preparations for CCC in the past few months. Aside from the CCC, I am obviously looking to Major in Computer Science and Pure Math. After all my schooling is done, I am hoping to work as a Research Professor in a University close-by which means I would have to get my PhD in Computer Science.
Some minor goals on the way would be to develop my knowledge in Networking, Cryptography, and Website Development.
Tell us about yourself:
My name is Andrew. I am 16 years old, although I sound like im 20. I live in medium-sized city and have a passion for coding. Aside from that, my hobbies consist of Coding, Photography, and Graphic Designing. I have taken a course on each one of them because I like learning new things. Besides that, I am a nice guy to talk with, and I'm craving to learn and teach about Computer Science.

Elaborate on your skillset:
Programming Spoiler (Click to View)
I am famliar with the following languages: vb.net, c++, c(currently learning very beginner), java -- I have been away from the scene since 2010 so my skills are rusty in all areas. Let's be clear, I am by no means a 'leet' programmer, I just read the books on them and followed the activities and projects

at the end of each chapter. I did this in order that I could read and mod code for my own purposes. I did in vb.net read a book afterwards on OOP with vb.net so i understand the concepts of OOP. With c++ for me it got a little bit confusing at the chapters on pointers and referencing. Here is some source i wrote in c++ as a friend challenged me to solve this word puzzle programatically. The whole program is written in those functions save for the algorithm to check every different variation of the words. I tried, it was my first ever c++ program and i feel a fairly valiant effort. Here for your criticism anyway source and picture of challenge:
i changed the image to add the coordinates of the char array.

http://pastebin.com/05pd21hv
Full project zip (the project file contains a .txt references file with every youtube video and every forum post and every blog i used for any function i got stuck on or wanted to make. For instance copying every line of a .txt file to a string vector. Or copying a string into a char array or char vector and visa versa.
http://www.filedropper.com/bruteteecnewest

What it does
makes the picture into a grid (2d char array)
grabs all of the grid
checks if the letters in the grid match any of the words in
a text file.
if they do add them to a string vector
this will create three vectors(arrays) of strings with matching words
{this where we stuck}
after that its supposed to test every combination of the three vectors but i couldn't do that. OH well perhaps someone here can!
In which order can we iterate the three vectors to get every combination possible ergo brute force the puzzle.

Linux Spoiler (Click to View)
(primary OS for approx 2 years) Ubuntu + BT. A screen shot of my old linux desktop is provided below. I put a lot of effort into customizing my desktop from gnome-look.org, when it turned on and logged in it said through the speakers "SYSTEM ACTIVATED" and other stuff. I really enjoyed kitting out my linux desktop and hope to make another one in the future, perhaps sometimes soon.

Tell us why you would be a valuable asset:
Spoiler (Click to View)
I thrive on finding difficult challenges and overcoming them. I am somewhat obsessive over the challenges that i take on. I think all hackers must be a little bit obsessive. I have a lot of free time i

can dedicate 16 hours per week to legion. That is the same as a part time job. And I hope that you conclude from what i have presented to you that I am skilled also. I am in it for the learning and so although i have a blackhat background, I can be useful in a whitehat nature and i am very curious to join with like minded people who wish to develop their skills. In summary, I would be as happy in a white hat camp as i was happy several years ago in a black hat camp.

Elaborate on your achievements and future goals:
Spoiler (Click to View)
Achievements are stated above. Future goals: As being self taught in everything computer related above office qualifications. It would be nice to find a place in the legitimate corporate area. Junior programmer, phone line tech support. Anything really, even typing. So my aim is as an unknown, unskilled, uneducated programmer to do the following.

I watched a speech by richard stallman. During that speech the journalist asked him a question relating to new programmers. He said something toward the connotation of thus:
People always give new people and students that are learning menial tasks that will never be used and the students can't care about. The best way for them to learn would to join a Open Source project, that way they are making a component of something real, are gaining real world feedback, and there is far greater chance that the student will enjoy what they are doing. Which is of course paramount. So my aim for the future is to go to the open source movement and build a name there by helping to develop software free of charge, for the learn. Perhaps eventually for recognition and a job offer.

Tell us about yourself:
Spoiler (Click to View)
Hearting computers for more than a decade. Past forum admin, 'hacker', try-to-be-programmer, obsessive problem solver. Incredibly resourceful dark horse.

Had to remove many of the photo links because of a 15 photo limit.

Things upon which I could improve.

Html, javascript,php.
{
i have no concept or idea of adobe dreamweaver, neither photoshop
}

perlOrPython(string Brain)
{
Need to learn a scripting language. Have dabbled in python before, would be willing to learn scripting. Perhaps even lua.
}

(Jan 2, 2014 05:57 PM)Amanda? Wrote: *[CITE]* Your suppose to ask for permission to edit your application.
Well then I guess I didn't make it in this recruitment.
Aside from that, it doesn't mention that in the OP, and I wasn't about to dig through 104 pages to find extra rulings that may have been added but were never updated to the OP. :/ So I guess forget about my application, I just wanted to learn more at a faster rate and was told that the best thing to do would be to take my chances at becoming a part of Legion. But considering how much I've already fucked up in this thread I guess that isn't going to happen anytime soon if at all. It's whatever though, I guess I'll just continue teaching myself and see if that takes me as far as I want

to go. Thanks for the responses.

Neo???? - *January 2, 2014, 11:16 pm*

Elaborate on your skillset:
Hacking:
SQLi - I understand the basics and some advanced of creating queries and dumping tables.

XSS - I understand the basics and some advanced methods of non-persistent, persistent, and DOM based cross site scripting.

Rooting - I've rooted many servers in my time. I know many advanced methods.

JTR/hydra - I've used JTR and hydra, and cracked a few hashes.

BT/Kali - I've used many tools within the Backtrack/Kali OS.

Linux - I love linux, its my favourite OS.

Pentesting - I know basic pentesting methods, although id like to learn a lot more.

Botnet/Ratting - Ive been around the Botnet scene for a while now and i know a lot.

-PHP- HTML:
I Can Use basic and Advanced Html/Php.
I am able to fully complete a website.

-Design:
I can use Photoshop.
I can make HQ thread posts and Signatures.

Tell us why you would be a valuable asset:

I think I would be a valuable asset to the group because I am Friendly, Outgoing. When a Project is started, I will always Complete it.
Anything I do, I will do my best at. I help Members of the HF Community.

Elaborate on your achievements and future goals:

My future goals for hack forums would be to gain knowledge and share it with others. If I learn Something new, It will be shared with the Community. Another Future goal is to be accepted into Legion, and become a Legion Student.

Tell us about yourself:

Ok, to start off, I'm a sophomore in high school(18 Years of age). I'm from Sydney, I play football and I play soccer. I'm on the computer about 4-5 hours after school. I'm all yours on the weekends. I also Love skateboarding and Helping People at whatever issue they may have.
Once you get to know me, you will like me.

I hope you take my application into consideration.

~Neo

Im gone brah - *January 3, 2014, 6:16 am*

Elaborate on your skillset:Structured Query Language Injection,Cross-site-scripting (various methods), Iframe Scripting,LFI,RFI,Arbiarity file upload, fingerprinting, Basic html and PHP, Basic Python,

Anonymity, Learning cryptography, How the queries and commands works in SQLi, Double encoding for SQLi, Cookies and seasons, Inject a .htaccess into a picture to

make the auth appear on another site. [Not much knowledge at all in --> New to code and command injection], I know how to dumb diffrent databases.

I have a few really powerfull exploits"PRIV8 ones". Basic knowledge in rooting and Linux. Been reading about Struts 2 vulns and old versions are most likely vuln against diffrent remote exploits.

Symbolic Links, Studying Payloads atm as well, Malware removal (Nothing fancy). Low level explotation "A bit BoF and stuff"

Tell us why you would be a valuable asset:

I've been in this group twice before, and I want to leave my past and disband it.

I want to learn new things, and as well train others. I can provide legion a IRC with both SSL and .onion domain for the IRC server.

SSL means "End-to-end encryption", To ensure the tor exit node doesn't sniff your traffic. The irc doesn't keep any logs as, I host it on a rooted server wich

clean all the logs automaticly.

I'm just a normal guy, who are intressed into various topics of hacking and hopefully.. I'll keep that personality for a long time.

I'm mainly hacking to test my limits and my skillset, I've learnt much after I left legion the first time and I hope I can still be a good guy in there and keep

teaching other members and as well be taught something new.

I'm sorry for my behaviors in the past and hopefully I'll be able to make them right.

Elaborate on your achievements and future goals:

My achievements and future goals would be to be a better coder, to understand the source code of a website much better and by that I would be

able to hack things much proper without staying to look for other hints and marks.

Basically I want to get jynx3 as well ("The rootkit"), It is a very good rootkit and private as well.

I would be able to make my own 0days and who doesn't want to do that? Everyone ofcourse, with a interrest into hacking.

Tell us about yourself:

Hello, call me Zayne.. I've been a old member of legion, I was one of the first members after the revamp in legion.

I'm a regular guy who hack things on my freetime, I'm also training on my free time.

So yeah, that's me and I don't really know how to express/explain myself here but I'm sure many members already know things about me and will learn more.

,Regards

- Zayne?

Creigh - *January 3, 2014, 6:29 am*

Elaborate on your skillset:

Well currently I am on A+ ceritified and have also been working with computers most of my life. I

have had over a year of training in the military to be an IT and would love to gain a decent skillset from this group.
Tell us why you would be a valuable asset:
Well currently I would not be very valuable. I would be able to help users with some Windows questions / troubleshooting along with some basic CCNA type stuff. I would love to learn a lot from this group and then expand what I learn from the group and turn it into something more/better "Hacking in its true meaning".
Elaborate on your achievements and future goals:
Well currently my achievements have been:
-About 40 hours of college and 3000+ hours of training
-A+ Certified

My future goals:
-Batchlors in CCNA/Networking, EH, or Computer Science or Engineering
-Net+
-Sec+
-CCNA Certified
-EH Certified
Tell us about yourself:
Well I work for the Military as an IT. Been in about a year now and just fresh from long ass training. I have a fascination with networking, exploiting, and computers in general work and the more knowledge I can down the happier I am. I am fairly young "older than HF normal crowed though" and hope to continue to work towards a degree here in the near future. I would really love to find a group of knowledgeable people to learn from and to share my knowledge. I am currently stationed in Japan and I love it over here.

Teh Afro - *January 3, 2014, 7:42 am*
So can I ask who are the mentors for this group and who accepts/declines users who apply?

(Jan 3, 2014 10:19 AM)Teh Afro Wrote: *[CITE]* When I asked he said it was the mentors who did that. ?
And that's why only Anonymous or Amanda should post in this thread and answer the questions regarding the recruitment. Sorry if this member gave you a wrong answer. You should only except an acceptable answer from Anonymous and Amanda from now on until they say otherwise.

Niggz - *January 3, 2014, 12:00 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
Web Hacking
Out of all my skills, this is probably my expertise. I am familiar with all kinds of different techniques

for web hacking such as SQLi, CSS, CSRF, Buffer Overflow, PHPi, Input Validation Attacks, URLi, HTTP Session Hijacking, Reverse Engineering HTTP Cookies, and Exploiting ports 80 and 443. I know a lot about NT ipc$ because it caught my interest when I was young in hacking. But it turned out that many firewalls block the attack. The same happened with wu-ftpd. I am constantly improving on my hacking skills and wouldn't mind some help learning techniques that I don't understand.

Social Engineering
This is the only kind of hacking that I use in my daily life outside of the cyber world. In real life I sometimes use this to get secrets out of someone or to get someone to admit to me the truth. But, inside the cyber world, I use it to completely psychologically manipulate people. I can use it as many different techniques in many different situations. For instance, if I call customer support of sony and claim to be the CEO of the company while I ask for confidential information of the company. The customer support would be like "If you are the boss then what is the passcode". I would then use intimidation and say "If you do not get me the fucking information I will fire your ass and kick you out onto the street, Get me the fucking information NOW!". Scared for his/her job, customer support would be forced to put me through, gaining me the confidential information/files.

Coding
I have been coding and programming since I was 12 years old. I am fluent in Visual Basic and Batch. I can understand intermediate HTML and C++. Languages I am just starting out with are python and CSS.

My Work:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group because I love to learn and I love to teach what I have learned to others who need it. I know that I would be there at as soon as a could when a member needs help with anything or doesn't understand something. I will stick with Legion until the end, even through the tuff times. And I can guarantee that I will always be active on the groups sub-forum.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
I have many goals in my life as I am writing this. One of my goals that correlates to HackForums and this group is that I want to learn everything that there is to know about exploitation of all current vulnerabilities on the web, maybe even discover a few. Another goal that is is not correlated to HackForums or this group is my basketball career. I want to be the best at the sport in my school. I am pretty good as we speak, but I am an overachiever and want to constantly get better at everything.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:
I am a 14 year old 9th grader that currently live in the US. I given name is Jake but I go by that or my current username. In real life I am ironically very social and popular even though I am an active HackForums member. As said above, I am an over achieving basketball player who wont stop until he gets to the top. And even when I am at the top I still keep going and improving because there is no way I can give up. My advice that I could give to anyone is to never give up. If you follow that philosophy then you can be the best at anything that you set your mind to.

N0x- - *January 3, 2014, 12:26 pm*

Elaborate on your skillset:
TBH im still trying to figure out what i would like to pursue as a skillset.
Tell us why you would be a valuable asset:
I have a fresh mind ready to put dedication and hard work into learning,Helping and even teaching if i can.
Elaborate on your achievements and future goals:
My future goals are to Figure out my Skillset and become the best at it :p
Tell us about yourself:
I am 17 years old, I live in the United States.
I spend most of my time browsing these forums doing nothing so i figure its time to start learning and find my place here on HF.
I used to play alot of sports but not anymore i am mostly into gaming now.

Sm?ke - *January 3, 2014, 12:57 pm*

Heres a video I made for this group a while back.
[Video: https://www.youtube.com/watch?v=MNvwLvv_u4M]
Elaborate on your skillset: I have decent skills in the following categories, Graphics, Ratting, IRC bots, Monetizing, Marketing, PPD, Spreading, And some other things ?. Also I have a little bit of knowledge in network system administration, I was going to take it up in college but I decided not too.

Tell us why you would be a valuable asset: I would be a valuable asset to the group because I can and will bring a positive attitude and I will share all of my knowledge to anybody who needs help. I also will always be active in the subforum, I will host giveaways in the name of "Legion". My goal will to be as HQ as possible and share my knowledge as well as to extend my own.

Elaborate on your achievements and future goals:I don't have too many achievements that I can name as of now. But for future goals I would say they are the following, I plan to move out and get my own place(I'm only 18), I plan to go to school and get a degree in something that I'm going to love, I also plan to be successful with my life and make the best out of it. Also I want too start my own business in the sometime future and make some steady cash.

Tell us about yourself:Well to start my name is Smoke, I have been on HF for a good while now. I came here to learn how to boot kids offline since that was the thing in halo 3. I am a great business man on HF, Also I am a very trustworthy member. I've never had a problem with any transactions I have done. I try to stay as HQ as possible. I'm a very laid back guy, I am always just chillen. I strive to learn and keep my mind on its toes, And I think I would fit perfectly in the group!

The Witness - *January 3, 2014, 2:14 pm*

Thank-you for your time I hope I become part of this group.

Nimbus. - *January 3, 2014, 2:19 pm*

Elaborate on your skillset: I can social engineer very well. I Taught my self how to social engineer microsoft xbox live codes then i made a code shop earned about $500. Also mentored people on how to do the method for 50$ and made over 2300$
Tell us why you would be a valuable asset: Im always here or near a pc to help. What ever you need i can try and do it.
Elaborate on your achievements and future goals:I came too hack forums when i was 12 years old. i had around 40$ in my Paypal at the time. I had bought Black shades in plan of being an amazing hacker and making allot of money on runescape. I didn't know what i was doing i had a macbook pro

and didn't know it was compatible only with windows. So i found an old desktop windows xp booted it up and had my rat set up. But then i didn't know how hard it was too actually get slaves. I also didn't know how costly crypters were. I then met noodlebot™ who helped me set up my rat and crypted it for me. In order to show my gratitude i bought l33t so i could +1 him.

After spending all my money i left hf for about 1 month. I came back with 20$ i received from helping my uncle. I did a bunch of stuff on my own built the 20$ to 500$ in a few months. I was so happy then hell rained on me. I had bought a booter from a user he gave me a free source with no apis or members and no domain nor hosting. i had invested another 70$ on a crappy API i lost about 140$ i had gotten my money back for 70$ and the api went to waste. After this i went back to runescape and RAT'ing .

I bought foxxy jdb for 70$ and a crypter from boomshotkapows partner whitch 1 week later was backdoored so i lost some money on that. Then cloud9™ and i got into a fight he was banned off of hackforums. Right before he got banned he sold the project to kohsti he had kohsti ban me lost 70$ in that i wasnt too mad as i made about 100m from Rating runescapers. Whitch is about 300$+. Shortly after this my account was deleted during the l33t database i lost all my reputation and started over. Omni was nice enough to give me my l33t back. I then went on to what i had leftover i bought a new desktop which i got a giftcode with of 50$ and was scammed by dunya for the giftcode but he refunded me a few weeks ago. I then found a great method on getting xbox live codes i used the method sold codes on ebay made about 230$ then put it into an ebook and make around 600$+. After that i met a major gambler on craigslist he sold me an iphone 5 i risked it and i traded him 100m 2007 gp for it :). i bought a few things in real life i have about 120$ left over. My future goals are too learn as mutch as i can. I wanna learn about blackhat. whitehat, greyhat.
Tell us about yourself: Im 14 currently. I came to hackforums when i was 12. I was here in plan of being a pro hacker. But i learned the true meaning of hacking . I stopped playing video games when i came to hackforums too learn as mutch as i can i have made around 3000$ Over my time here. I dont really consider my self a skid as i dont rat anymore . But i love to learn i started playing video games again and this is my setup https://imgur.com/QKQh0w2 https://imgur.com/eqIjEiF

Firex1 - *January 4, 2014, 3:50 pm*

Elaborate on your skillset: I am a Senior Computer and Electrical Engineer at University and I really love learning about ways to earn money on the side. Over the past few years, I have learned a lot on this site, but I haven't had the private resources of a group that would give me the extra push. I understand the basics of RATing, Crypting, and Monetizing slaves, but want to continue learning on this topic. In the past, I have learned to flip products on other sites and I have learned in general how to sell a product online. I am very good at Social Engineering. I have also learned that it is important to have the full package when selling a product; A clean layout, a quality product, and excellent customer support for before and after the product is sold. This has taught me to respond very well to feedback (positive and negative) in order to improve me product.
Tell us why you would be a valuable asset: I would be a valuable asset because I am a quick learner. I may not get something right the first time, but I never make the same mistake twice, and I don't give up on something until I have it perfect in my eyes. I may not know everything yet, but I want to join the group in order to expand my knowledge and grow as an individual.
Elaborate on your achievements and future goals: Over the past year, I have learned a lot on this site when it comes to earning. I have made between $1000-$2000 which has helped me buy things that I have always wanted, but never wanted to spend money on. (Music Headphones, Gaming Headphones, Scuf Controller, Ub3r) A lot of my money recently has been invested into new methods in order to earn. I am always trying to expand my knowledge. In the future, I want to turn that 4 digit number into a 5-6 digit number from online earnings.
Tell us about yourself: I am a 21 year old senior at a University. I study Electrical and Computer Engineering, and I am very interested on having an income on the side out of college. When I get interested in a topic, I tend not to put it down. I enjoy Call of Duty and Halo gaming, but only in the

competitive aspect. I am always looking for the next challenge in my life.

IllGate - *January 4, 2014, 4:18 pm*

Elaborate on your skillset: I have a very well rounded base in Ethical Hacking on my personal time. I have A+, Network+,security +, CCNA, and ethical hacking certifications. General Pentest/security auditing,
social engineering/doxing, botnets,malware(my focus), CODING(vb6,python,autoit,html5,css,minor php,minor C++(my net focus language), and minor shell code scripting. My main skillsets and interests revolve around malware analysis and FUDing processes.

Tell us why you would be a valuable asset: I have good broad understanding of a multitude of information security related disciplines. I'm a quick learner and effective teacher. I have years of experience and always looking to expand upon my skillsets.

Elaborate on your achievements and future goals: I want to expand on what I've already learned and develop myself as a well-rounded hacker. I'm hoping to be affiliated with a hacker group so that I may have collective source of experienced hackers to grow and learn with.

Tell us about yourself: I've been "hacking" back since the AOL and CompuServe days. I have been immersed in computers my entire life. My involvement lessened in my high school and beginning of college. Ironically, I played a lot of MMOs where I "BOTTED" and found game exploit. I actually had a very lucrative gold/account selling scheme on WoW for close to three years. My interest in improving my hacking skill-sets has been my main focus for the past 3 ½. In these 3 ½ years my skills have grown exponentially. I'm looking to meet some more "like minded" individuals to learn and grow at what I love doing.

X25519 - *January 5, 2014, 8:57 am*

Elaborate on your skillset: I am a web developer and general programmer. I code in many web development languages, C, and a small amount of Python. I have developed 2+ websites as a job profession.
Tell us why you would be a valuable asset: I would like to meet and discuss with other people who understand the same things I do, and I can help around with people having problems with coding.
Elaborate on your achievements and future goals: I plan on graduating high school. Going to a technological university for computer science, and start my own business.
Tell us about yourself: My name is Helmut. I'm 15 and I'm a sophomore in high school. I am into computing, and want to have it as a profession in the future. I'm very mature as I was raised around adults, and I'm very well-mannered.

ASSHOLE DICK - *January 5, 2014, 9:40 am*

Elaborate on your skillset:

My skillset is very broad, based on different aspects of social engineering and manipulating people. I have "hacked" a couple of YouTube accounts and Facebook accounts using my abilities to manipulate people into doing what I want. I can code a little in C++ and I'm currently about to start learning SQLi, PhP, CSS & HTML. I also do a lot of graphic design and I'm currently in a modern apprenticeship learning about Photoshop, Illustrator, Typography etc. Learning to code in HTML and

other web based programming languages will be helpful towards this as once I have done a design I can implement it onto an actual website using the skills I have gained from coding. It will also go on to be useful for carrying out SQL injections which is what area of hacking I plan to go to.

Tell us why you would be a valuable asset:

I would be a valuable asset to Legion because I'm never afraid of a challenge, I like to be challenged, is one way of putting it. On new years eve I was faced with a challenge of trying to crack the HackForum prestige algorithm, which I done with relatively good success and accuracy. The thread can be found here.
I think I would also be a valuable asset as I'm in general a nice guy, as you will be able to see from my reputation nobody has given me a negative (touch wood) the reason for this is simple and to the fact that they have no reason to as when I'm dealing with people I like to be as nice and friendly as possible, I also love helping people, as you can see from this thread I'm setting up a teaching service for graphics come this summer:

Elaborate on your achievements and future goals:

I have achieved a lot in my life, but the biggest thing would be the ability to work in a team and get things done fast, although I sometimes like to go solo, working with well people has always been a speciality of mine. Which is why I plan on, after completing my modern apprenticeship, moving into a flat with my best friend and fellow graphic designer Kieran where we will hopefully start up a freelance graphic service! If all goes well and the sea is a calm one then we hopefully want to move to California and do graphic design for some big companies.

Tell us about yourself:

I'm a 15 year old Scottish boy with a passion for computers. Since most of my old classmates were not at my level of comprehension in both terms of grammar and computing so I decided to take to the internet four years ago, where I learned a lot of different skills that would have not been known to me today if I hadn't ventured onto the endless abyss that is, the internet. Which is where I met my best friend and partner in graphic design, Kieran. We worked as a team and now have an extremely high understanding of most graphics based programs such as Photoshop, Cinema4D and Illustrator. Since I'm on my computer a lot I don't really go out much, but I make up for that by being on the computer and meeting new people and learning, which is one of the things I love most. I'm a really friendly and funny guy according to other people. I love a challenge and aspire to be the best in everything that I do.

Thank you for reading.
Kind regards;
-Toki

Subpar - *January 5, 2014, 12:21 pm*
After a little bit more studying up I decided to re apply.

Elaborate on your skillset: I am able to RAT, I'm sure JDB's wouldn't be too hard to set up, I know how to kind of host a website/manage it.
Tell us why you would be a valuable asset: I would just love to join the Student program and hopefully learn a lot more on keeping myself anonymous. I'll help out as many of the members as I can as well to the best of my ability.
Elaborate on your achievements and future goals: I've ratted a few people through SE... Future goals is to know of a decent sized HTTP net ;)

Tell us about yourself: I'm a laid back guy, very nice, I don't troll or do any of that. Been working with computers for 5+ years now.
I really hope you consider my application, I do believe I would be a valuable asset with helping out the new members :) Thanks for reading and have a good day everyone.

ipkzwpdbxy - *January 6, 2014, 12:10 pm*
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]
Elaborate on your skillset:
I don't really have a specific skillset, it's very diverse. If I find something I need to learn or use to achieve something, I figure out how and then I follow through. So I guess my primary skillset is problem-solving. And when I have my mind commited to something, I ALWAYS follow through with it. It can be a bit of a pain sometimes but oh the satisfaction afterwards is worth it. But some of the more specific skills I have in my arsenal is some SQLi, general knowledge in pentesting, metasploit, some basic coding in ; Ruby, Python, C++. And like every other person on HF, I am quite experienced with remote administration tools and similar tools. I'm also quite handy with graphic editing with a range of programs, Sony Vegas, Photoshop and basic knowledge in after effects. I'm also very interested in languages, I speak Swedish, English and German fluently, I also speak a bit of Spanish and right now I'm learning Icelandic. I guess I'm also a very technical person, I see how things can work together to achieve something.

Tell us why you would be a valuable asset:
I'd be able to help out with a lot of things and generally do some problem solving around the group, contribute with what I know and master, and what I don't know I will find out our figure out how to best serve the individual/purpose.

Elaborate on your achievements and future goals:
Well, all of it isn't documented but I generally try help out my fellow man in the best way I can. There's a thread I made showing how I made an electric guitar from scratch. I guess that shows that I have ambition and that I follow through.
(I'm not sure whether being accepted for Ub3r is an achievment, but nonetheless I am, I just haven't felt the need to purchase the upgrade yet)

Tell us about yourself:
I think you get the general picture of me by reading what I've written above here. But I'll share some personal facts.
I'm a "if you're nice to me I'm nice to you" person, if you're not nice to me, then you can be damn sure I'm going to treat you the same way. I have a burning passion for technology, music, computers and problem-solving. I'm easy to get along with and I'm a teamplayer, working for the greater good and not just for myself. I'm not likely to disappoint anyone, if I take something on I do it wholeheartedly.

If you feel that my application is missing something, feel free to let me know!

Thanks for taking the time to read my application, cheers.

xVulnerable - *January 6, 2014, 4:51 pm*
Elaborate on your skillset:

Malware - I am very experienced in Network Security flaws such as Viruses, worms, and Trojan horses, Phishing and DDOS. I know how all they work. I am really interested in malware, I can easily know if a computer is infected or not and i can easily remove almost any malware from a computer manually.

I'm an expert when it comes to RATs. I can setup a RAT in minutes and i have very good troubleshooting skills in this topic. I am in the Brotherhood RAT team and have my own RAT Help Desk.

SQLI - I can hack a vulnerable website's database using SQLI.

Ewhoring/Social Engineering - I use my Social Engineering skills to help me while Ewhoring. I have managed to get a good amount of cash with Ewhoring.

Coding - I am currently learning VB.NET, i currently sell a survey locker which is a product i coded myself.

Doxing - Doxing is easy, I am able to collect enough information on someone online and produce a dox on the person. Doxing doesn't require much skill really. Anyone can be doxed, it's very hard to be undoxable.

Monetization - One of my favorite quotes: "Work smart not Hard". I'm 17 with no job, i use my monetization skills to make enough money online to not having to go to work. I use both Whitehat and Blackhat methods (no carding or any of that stuff) some of which is selling products and services on HF, hacking RS accounts and Ewhoring.

Tell us why you would be a valuable asset:

I believe i would be a valuable asset as i am a very active user and i would produce HQ tutorial threads under the name of Legion. I am very helpful and willing to share my knowledge with everyone.

Elaborate on your achievements and future goals:
1.Improve my Monetizing skills to be able to earn money online in a stable way. (As in having a better income)

2. Improve my programming skills to a professional level.

3. Keep improving my hacking skills though the rest of my life. I am in love with this topic, there is no limit for how good a hacker can be.

Tell us about yourself:
I'm a 17 year old guy from Malta, currently attending college. I'm a hacking addict, i really love to learn about hacking. I spent most of my time on my laptop, browsing hackforums while multitasking on other stuff. Although i'm a computer addict, i'm also very sportive. I play tennis and i believe i'm pretty good at it. I joined HF about a year and a half ago. I first registered on the site to be able to view some threads but i wasn't active. About 6 months later i decided to start learning on RATs and that's when the journey began..
I also like to play with my PS3, getting PS4 in about a week and half. I literally spent a whole day on my laptop, except when i go to sleep, school and go out.

Thanks for reading my application.

Regards, xVulnerable.

acidreeflux - *January 7, 2014, 6:48 am*

Elaborate on your skillset: My skillset is quite vast and ever growing I have some knowledge in ratting using sniffers and crackers such as cain and shark; I am learning some computer languages (c+, c++, html). I have been rooting and jailbreaking since the first iphone came out years ago. Also I have been using, misusing, breaking, and rebuilding pc's since I was about 10 which has led to a deep understanding of electronics that has developed into an insatiable love for metal silicon 0's and 1's =]

If theres a shortcut, a detour, or backdoor ill find it... Pretty much sums it up

Tell us why you would be a valuable asset: I would be an asset to such a team because I am a team player, I work hard and can be completely devoted to expanding my skills. Also I believe I have a few characteristics or qualities that have been greatly surpassed in the human genome, loyalty and respect, the basis of all that is stable

Elaborate on your achievements and future goals:My achievements would have to include becoming a small time producer, keeping up with my website and improving traffic, and keeping my status and reputation here on HF. Future goals would be to better myself financially, launch my new web idea and android application, maybe delve a little into ewhoring been reluctant to try but I am willing to give anything a shot.

Tell us about yourself: Myself ... Im 23 I was raised in a city near New Orleans Im self taught on mostly everything I know, but as anyone in the field of technology knows a good mentor is sometimes the only way to unlock that hidden potential and that is what I plan to do, to let everyone know that your past actions cannot determine the person you are today those are decisions made in real time that add up to be your individual personality choose to be a part of something bigger to work hard to change the future and make a difference

SupItsDillon - *January 7, 2014, 8:04 am*

Elaborate on your skillset: My skillset is quite large. I have quite a bit of knowledge in Ratting and making virus'. My strength is coding in HTML and PHP. An example of my work is at spoofer.supitsdillon.com. It is a basic spoofer which has the choice to spam your victim. I also know a bit about using Bruteforce to get into facebook and twitter accounts. I have two websites, supitsdillon.com and dillondev.org.uk , which both run on PHP, HTML and CSS, fully coded by me. One last thing is that I can produce and edit videos. I have a YouTube account with 70 subscribers and 6,796 views. I have been hacking and coding from at least 6 years old.
Tell us why you would be a valuable asset: I would make a valuable asset because I have a wide knowledge base and I also listen to everything I am asked. I can apply tasks to myself and get them done maturely and sensibly. I don't mess around that much, and I also am described by some as my friends as a very entertaining person, so if someone is down, come it me :)
Elaborate on your achievements and future goals: An achievement for me is probably making my websites. Another could be said when I hacked an Facebook account when I was only 7 years old. A future goal would be to elaborate on more hacking types of things, for example being to DoX better.
Tell us about yourself: Well, my name is Dillon and I am from England in the UK. I am 13 years old, nearly 14 and was interested in technology since I was 3, that was when I got my first laptop, which ran windows 97. I have no outside life (literally) and spend about 5-7 hours on my PC a day.

[img]http://www.whitbywhites.co.uk/wp-content/themes/LondonLive/thumb.php?src=http://www.whitbywhites.co.uk/wp-content/uploads/2011/05/thankyou.jpg&w=340&h=192&zc=1&q=100[/img]

???????????? - *January 7, 2014, 12:05 pm*

Elaborate on your skillset:
C/C++/C#, HTML, PHP
Tell us why you would be a valuable asset:
I have a Challenge Accepted mentality. If you want something done, it's best you do it yourself. For example, my web based crypter: http://micropenguin1.cloudapp.net/Test/

Elaborate on your achievements and future goals:
My goal is to be at the forefront of computer science. I want to develop applications that will help progress this field. I also want to learn a lot more about the Windows kernel and possibly reverse engineer a few parts of it.
I am currently majoring in Mathematics and Computer Science. However, everything that I have learned about Computer Science, I have taught myself. Classes are just review.
Tell us about yourself:

I enjoy taking things apart and building new things out of them. I spend a lot of time online and reading a bunch of informational text. That's pretty much all you need to know about me.

Moji - *January 7, 2014, 5:56 pm*

Elaborate on your skillset: I am currently learning the language HTML, it doesn't really look hard so shouldn't take long to know it "well". I am also starting to learn Java in my free time, but I don't know if I want to continue it.
I am starting to learn SQLi from some very detailed tutorials I have recently found.
I have fairly good doxing skills I guess, I was thinking about opening a doxing service soon but I don't know if my skills are able to match those on here.
Like most on here I have access a stresser, but I don't really count that as skill so ignore that.
I can BruteForce things like MC accounts, but again that's not really a skill.
--
Tell us why you would be a valuable asset: I honestly don't think I could be considered a "valuable asset". Everything I can do, most people on here can. Apart from being a dedicated quick learner, I can't offer much. Sorry.
--
Elaborate on your achievements and future goals: I haven't really achieved much "hacking related" apart from Brute Forcing a small amount of things, doxing and SEing.
My goals are to extend my knowledge of hacking become a "decent" hacker, I am VERY interested in most things to do with the subject and just love technology/computers in general!
I know I don't really know much now, but I am a quick learner and think I would really benefit from become a Student of Legion!
As I learn more I will gladly give back what I can to those who have helped me extend my knowledge and help me become better at the things I am interested in.
--
Tell us about yourself: I am currently 16 years old and live in the Highlands of Scotland. I spend a fair amount of time on my computer at night, but during the day I am usually out with friends. I am currently looking for a part time job and I start college on the 27th of this month, I will be doing "Digital Media Computing (Level 4). So I have around 20 days free time to learn more about hacking, after that I will be on less but not by much as I'm usually on at night anyway.
Thank you very much for reading my application, I hope you consider me to become apart of Legion!

Rap!st - *January 9, 2014, 11:00 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] Elaborate on your skillset: Program languages. HTML(5) Very well experienced in this language. Know 99,9% of it.

CSS Also very well experienced in this language. Know 99,9% of it.
PHP I know more then the basics of it and can code some nice stuff. Lets say 60%
MySQL I know how to use and edit it. Still learning to use selecting queries. 70%
Java Developing a RSPS atm. I can't fully write it from an empty notepad but I know how to add and edit things the way i like it. 70%
Javascript Javascript is a pain in the ass to write. I know how to create basic stuff and how to import excisting scripts. 60%

See the percentage at the end of the lines as a way to show off my knowledge regarding the languages.

Hacking relatedRemote administration tools. I'm known with the usage of different remote administration tools. I know how to spread them and I know how to help people setting up their RAT.
MySQL injections. I successfully used a MySQL injection on a website once. I can't say I'm experienced at it but I'm still deeping myself into this.
Pentesting.I've tried this a few times without that much succes. I'm still planning to deep myself into this.
Others.I know how routers work including portforwarding.
I know how to setup and use a VPS with Windows or Linux as OS.
I'm also still learning how to create programs in C.

Tell us why you would be a valuable asset:

In my opinion I would be a valuable asset because I'd like to share my knowledge to others, I'm willing to learn and take advise from others and I'd like to help people with their problems. I'm always open to increase my knowledge and support others with their needs.

Elaborate on your achievements and future goals:
It has always been one of my goals to increase my knowledge regarding the magic of hacking and everything around it. I made this application since I'm highly convinced on the fact that I would learn alot from other Legion members. I'd love to share my knowledge with the other members. I'm also a supporter of conviviality and dislike unrespectfull people.

Tell us about yourself:
I'm a friendly helpfull guy willing to share my knowledge with others. I'd love to help and support people with their problems and I enjoy increasing my knowledge related to Hacking.

Thanks for your time!

lickurdig - *January 9, 2014, 12:15 pm*

Elaborate on your skillset:

Monetizing
• Selling products
• ad.fly
• Marketer on eBay
• Exchange
• PPD
• Blackhat

GFX
• Basics Photoshop

• Signatures
• Avatars

Other
• PHP
• RAT
• HTML
• SQL

Tell us why you would be a valuable asset:
I think I would be a valuable asset to legion because, i know i'm a unique member and i have what it takes to join Legion. I can create signatures, websites, layouts and definitely bring in new monentizing strategies to the table. I would love to be able to be a part of this group as well to learn and share things with the members of our group.
My personality is good in my opinion, and i aim for the top, i'm also pretty easy to work with and i love working together.

Elaborate on your achievements and future goals:
My future goals as of now are to find a job and go to school after the next summer. I plan to own a company and grow from there. A few of my life achievements: When I first started my company on internet, i drew out the nice designs and made a very good looking website, i was working hard and tried to have as much fun as possible.

Tell us about yourself:
My name is Zack, 19 years old. I'm from The Netherlands and I'm one of the chillest 420 people you will ever come in contact with. I'm a fast learner and i am willing to learn new things. I enjoy buying, selling, anything that has to do with money gain actually. I'm smart, and willing to do what It takes to join / learn from Legion. I have no school or work at the moment. I am always here to help and if you need something or there is something you don't understand, i'll be happy to help you out. When i joined HF i have made it a goal to stay active and strive for the best on this forum.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Thank you for taking my application into consideration ?

takemyl1fe - *January 10, 2014, 12:20 pm*

Elaborate on your skillset:
Pascal
Vb
Html
P.s I have basic knowledge on these.
Tell us why you would be a valuable asset:
For now i can do nothing, but i'm a fast learner so later i will be able to help out with everything needed.
Elaborate on your achievements and future goals:
I've just built up some Websites and forums,hacked some facebook accounts with keyloggers, not much
I want to gain as much knowledge as possible and beat Illuminati.
Tell us about yourself:
I'm a 19years old gamer. I have 2 lives, the first is the real life, the second one is the Pc Life, when i say pc i mean internet/gaming etc. i can learn really fast and i want KNOWLEDGE

Niggz - *January 10, 2014, 2:50 pm*

I just want to give everyone applying a tip.

Unless you put real effort into your application, you will not make it in the group.

(Example) My Application:
https://hackforums.net/showthread.php?tid=3542998&pid=36945876#pid36945876

Vaksar - *January 10, 2014, 3:23 pm*

Elaborate on your skillset:LFI,RFI,SQLi,XSS,RCE,different types of payloads, bit linux, cookie management, ecb,DNN hacking,LDAP injection, Cross Site Referral Forgery,Directory Traversal,Symbolic Link, various of other methods, html, bit php and python and SafeSeh. Also BeEF.
I know a lot more, but I don't really know what to list and how to format it.
Tell us why you would be a valuable asset:I've been owning groups myself and in my own opinion it went great.
I could help with mandatory projects and other things, I would love to teach other students/teachers various of web-hacking methods & tricks. Also I respect everyone who shows respect backs to me, I would never think of betraying someone and isn't that something unique? To show pure loyalty!
Elaborate on your achievements and future goals:I want to simply learn more about kernel exploitation and want to write my own payloads/bof's. But that requires a high skill to even write low level exploitation zero days and as far as I'm aware of, I'm not able to do it yet.
I would also want to learn new methods such as:
Format string exploitation, trapdoor permutations, tweakable encryption, deterministic encryption: SIV and wide PRP, RoR patching, CBC padding attacks, attacking non-atomic decryption, diffie-hellman protocol attacks, the merkle-damgard paradigm, elgamal public-key system, Mass Assignment Abuse, xslt processor remote inclusion, security middleware office: netscape suite, lotus notes/domino, security middleware: sap interconnections, subIP: atm, frame relay, VLANs, 802.11b, Remote XSL Inclusion, Server-side Includes Injection,, Dangling Pointers, FTP Bounce Attack, Server-side Javascript Injection (SSJS), UMTS, MPLS, DSL
Tell us about yourself:
Hello, call me Evil or Phil, doesn't matter to me.
I'm pen-testing things on my future and if you're wondering why I've been gone for a while that's because I wanted to leave and learn new things.
So basically I left for two years for practice and then first now I got back, with a huge storage of knowledge compared to how it was before.

I'm a regular guy, who's hobby is to hack/learn new things. I'm such a poor writer excuse me for that.
I'm trying to improve everything I know basically. To get a certain level of knowledge.
But I guess I don't have much more to say.

Regards
-Phil

The Skid - *January 10, 2014, 3:46 pm*

Elaborate on your skillset: I know some some lua, quite a bit of java, alot about networking and SQLi and PHP
Tell us why you would be a valuable asset: I couldnt exactly be a "Valuable" Asset but I could provide information for others and I am a very helpful person.
Elaborate on your achievements and future goals: I currently am on pause for my PHP development but I have made a few websites. My most popular(Not popular out of my state)Is my towns robotics team website. www.buzzrobotics.com. I Am currently working on my own website which will have my portfolio and a website service.
Tell us about yourself: I am 16 and my name is Kyle I come from the state of Connecticut and I

used to develop PHP(I Plan on starting again) I Have alot of free time on my hands and I like helping people.

King Cobra - *January 11, 2014, 4:04 am*
This should clear up a few issues. Said by the boss himself!

Pyrozo - *January 11, 2014, 12:51 pm*
Elaborate on your skillset: I spent half a year hacking World of Warcraft accounts, making enough money to pay for my computer; My skillset in doing this was pretty damn good social engineering and photoshop (Making Fake Passports/Drivers Licences) I grew very bored of this and wanted to persue a different kind of hacking and have since been learning lots on hackforums, even from small things such as XSS and SQL Injection to learning how to deface a website.
Tell us why you would be a valuable asset: I suppose i'm just a nice person who could help out on projects, be a friendly face on skype and share what i have to offer i suppose.
Elaborate on your achievements and future goals: Currently finishing off my last year of school where i will go to college to study computer science, law and also graphic design.
Tell us about yourself:Well, My name is Isaac, im from England, i spend the majority of my time inside learning as i find it hard to do so at school, i'm very social and pretty much always am on skype talking to somebody or another, I always look at the subforum of people looking for help so i can see if theres anybody i can help, and learn from the other peoples answers.

If any of you wan't to discuss any of this with me on skype, go ahead : Valyrox11

Nakamoto. - *January 11, 2014, 9:42 pm*
Elaborate on your skillset: I would not say that I currently have a skillset related to hacking, I have done some penetration testing in the past but I do not know enough to call myself an expert hacker. I am wanting to get in as a student. I feel I could do well as a student and can go far with the group.

Tell us why you would be a valuable asset: I am a fast learner and will retain what I learn, I have never actually had any one teach me how to do anything, and I feel my learning capabilities can benefit the group.

Elaborate on your achievements and future goals: As I have previosly mentioned, I do not know a whole lot so I will not say I have any real achievements. I do however have goals, I am currently doing online schooling for Computer Science and plan to do network security as a career. Legion is a group that can get me a step ahead and in the right direction.

Tell us about yourself: I am 21 years old and I have an affinity for technology. I currently work for Dish Network as a DNS Technician, but plan to pursue network security as a career path. I am a very friendly person and I learning incredibly fast.

splantoon - *January 12, 2014, 4:45 am*
[img]http://image.noelshack.com/fichiers/2014/02/1389530721-sans-titre.png[/img]

Sm1th???? - *January 12, 2014, 11:51 am*
I love this group. Good luck to any members that apply.

Pavilion - *January 12, 2014, 3:52 pm*
Elaborate on your skillset: Social Engineering, I typically have a good use with words.
Tell us why you would be a valuable asset: I believe I could be beneficial to the group by providing my SE skills. I have a lot of time to contribute to the group as well.

Elaborate on your achievements and future goals: Right now I have a goal of acquiring money from the use of the internet.
Tell us about yourself: I am 15 years of age with a decent amount of free time. I spend a lot of time learning new things on the internet. I have an interest in psychology and and persuasion. I would like to acquire new skills if someone was willing to teach me, although at the moment my only skill that would be beneficial to this group is SE.

VladHQ - *January 12, 2014, 4:59 pm*
Elaborate on your skillset:
I have a huge amount of skills. The one I am proud of the most is PHP. I have participated in a huge amount of projects, and I am most proud of my search engine I made in PHP, SQL, and Python. I have RAT'ed before, but I realized it's a little bit creepy, and stopped doing it. I have experience of Visual Basic, HTML, CSS, JavaScript, PHP, SQL, and C. I have attempted making my own booter a long time ago, but I had a lot of issues and abandoned the project. Currently, I own several Apple and Android devices, and have modded and rooted and jailbroken every single one of them. I had my own Drawing app made in Obj-C for the iOS, but I stopped working on it. I am a A-B student in school, with a 3.5 GPA. I am also very good in math.
Tell us why you would be a valuable asset:
I will provide a lot of help with PHP, and participate in desired projects. I can develop projects and release them to the community under the Legion name. After all, I do it for the fun, I enjoy making and creating new things.
Elaborate on your achievements and future goals:
I have made a lot of projects, and that is one of my main achievements. Good grades in school, is also a valuable asset for me. My future goal is to become a general surgeon and go to a very good university. After I become a doctor, I would develop a budget and finish up my search engine, and hopefully become successful.
Tell us about yourself:
I am a 16 year old guy living in the America, originating from Ukraine. I love developing. Anything and everything using anything. I am creative in developing new stuff. I am not as creative in design, but there are other people for that. I have a lot of hobbies and they vary a lot. I have a lot of friends, I am on the swimming team, and I maintain a healthy lifestyle. I like sushi and a lot of American food. I will literally eat anything as long as it doesn't contain pork/pork sub-products. I don't have a specific religion, but I do believe that there is a supernatural spirit out there defining everyone's faith. I love the Jordan brand. I wear Jordan only clothes, and as other would say, I am stylish. I am not dating anyone at the moment, because I busy most of the time, and wouldn't find time for a girl just yet. I am a Sophmore, I have challenging classes at school, and I am liked by many.

Thank you for reading this wall of text.

byte[] - *January 12, 2014, 8:51 pm*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Elaborate on your skillset:

Ratting:
I think I have been ratting since 2011. I started out with cybergate, switched to darkcomet, and now I am using blackshades stealth. I don't consider ratting a skill, but it is still something that a lot of people do not know how to do. I also can help people who are just starting to rat to portforward and set up their no-ip.org accounts.

Crypters:
I used to always buy crypters of HF since I did not know how to make them, but one day I decided

I've had enough of spending money on other peoples programs. At the time, crypters were becoming really popular, so I looked up some crypter tutorials on Google. I swear I was the biggest skid there was. I copied and pasted all the code, had no idea how coding (let alone crypters) even worked. The first time running it, I was so shocked when the detection rate was around 7/35. I started replacing everything that I thought looked like it could be replaced to FUD the crypter, and when I scanned it was 6/35. I kept replacing everything for months over and over, and I got to a point where I though "WHY THE HELL DOES THIS NOT WORK?". I completely forgot about the RunPE. I also met a user by the name of Scarfac3_ at this time. I told him about my problem, and sent him my RunPE. He spoonfed me and fudded the RunPE for me. I scanned it the stub and it was 0/35. I scanned the crypted file and it was 4/35. I thought "Ok now what's wrong?". I told Scarfac3_ about my problem again, and he said it was the way you are storing your resources. I started looking more about resources and I found out I could change the name of what it was stored as. I did that and it became 2/35. Honestly I was so excited that I had came this far. In the mean time, I was getting help from Tweety to convert my crypter to codedom. Once I did that it got many more detections. I replaced the encryption method and added a fake form in the main sub and it became FUD. I think that was the best day of my life. Couple months later, more AV's caught on to embedded resources. I looked up different ways to make my bytes look legit. I stumbled upon a byte to bitmap class on HF. That made it FUD again. I got a huge sense of relief. A month later, my RunPE got detected again. Thanks to Scarfac3_, it was a piece of cake to FUD. Now a couple months later, I am still FUD, selling a crypter on HF.

Spoiler (Click to View)
TL;DR... I started as a huge skid, learned more and more, now I sell a crypter on HF.

Monetizing:
Well, like I said in the above paragraph, I am currently selling a crypter. I have made a decent amount of money from it, but I won't disclose how much exactly I have made. I have a couple ideas on how to make money, mostly with the use of ads and bots.

Booters:
Well, most people know how to do this, but I'm gonna put it here anyway. Booting started in 09 when my friend hit me off for 20 seconds for the first time ever. When he said it worked we flipped out. He didn't tell me how to do it, so I looked up DDOS programs on google. Of course, LOIC popped up. My home connection is about 20 mbps upload, so it was enough to knock off a home connection. Fast forward 2 years. We bought 3 NFO vps's with about 800-900 MBPS upload speed and uploaded some shells to them then made our own booter that sent a webrequest to those 3 shells.

Coding:
I think my whole crypter scenario explained a lot of this. Most people will say the exact opposite but, I just LOVE to use vb and c# for malware. Of course I can use it for other purposes, but I still prefer making malware with it. I am currently going to start a silent bitcoin miner (shouldn't be hard, just encrypt ufasoft miner and run it in a runpe). I would also like some ideas on what to make. I'm not really feeling making a rat with vb though, maybe c#, or I'll go and learn AutoIt or C++.

Tell us why you would be a valuable asset:
I could teach people about how crypters work, give the members in the group a free crypt every now and then, help them with their fudding, help them with a bug they have in their program, share ideas that I have for money making (loopholes with Youtube advertising, bitcoin botnet mining) etc.

Elaborate on your achievements and future goals:

My achievements would be:

The day I got my crypter FUD
The day I first hit someone offline
The day I set up my first booter
The day I set up cybergate and darkcomet
The day I first ratted someone
The day I became.. ANONYMOOOSE! (Jokes.)

My goals would be:

To recode my crypter in c# or c++
To code a native rat in c++.
To buy a Nissan 240SX (S14) with the money and do a 2JZ engine swap.
To tour the world and visit the places I've always wanted to go.

Tell us about yourself:
Well, I am currently in high school. I plan to grow up and become an automotive engineer. I really love cars, a lot. My favorite car would have to be a Toyota Supra or a Nissan R34. As stated in my goals, I plan on buying a 240SX and doing a 2JZ swap on it since Supras are so rare. I guess I know a bit about cars (definitely more then what my friends know). If there is one thing that makes me happy, it's burning rubber and engine sounds ?. Thank you for reading my application. I hope you accept me, but if not, that is ok.

?lex - *January 13, 2014, 1:52 am*

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img]

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
Coding - I can code in VB.NET and C++ (not much) so far. I started coding 3 years ago, but I lost motivation in it. But, now I started again, and I'm proud to say that I'm working on my new crypter that is coming out soon.
Hacking - If I said that I was experienced enough, I'd lie. I know a little about SQLi and XSS and now.. still trying to learn Pentest.
Website Development - I'm coding my websites. My domain was tolevski.net and design.tolevski.net but it's down for maintenance.
Graphic Design - I... may be not the best designer of Hack Forums, but I'm trying really hard to improve myself. I can only work with Photoshop at this moment. Once I finish learning it, I may start with Cinema 4D.
Social Engineering - So far, one of my best skills. I'm very good in human manipulation and I can easily extract some important informations from a guy/girl.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I am very friendly, and very knowledgeable of most of the things going on around. If a user talks to me, I will respond with respect, and generally have that teachable attitude. I'm always trying to give my best, when hacking or doing something else, not related to hacking, and I'm contributing a lot.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I currently own a Graphic Design website which I hope can bring me some cash to travel a lot. My passion is traveling. I want to visit places.. I'm currently attending college (Criminal Justice)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
As I mentioned before, I'm a student enroled in Criminal Justice. This is my first year attending this college and I'm very happy here! I've always wanted to catch the bad guys, aha! My name, as you can see is Alex, 19 years old guy, East LA.. My hobbies are Football and Basketball main. I play in a small basketball team in my city. It is nothing special, but it's good to fill up my free time, instead of sitting on my computer.
After I finish the college, I want to work, and travel.. I have planned pretty much everything and I hope my life gives me a chance to do the same. I'm pursuing the happiness all the time. I want to work while I study, because I don't have enough money to do what I want, and eventually.. what I need.
I think this is enough..

Acroz - *January 13, 2014, 2:00 am*
Pretty well written applications.

Next wave should be invited within the week.

phuqer - *January 13, 2014, 5:55 am*

Elaborate on your skillset:I have some experience in penetration testing. I am currently working on writing a book on penetration testing that I hope to self publish. I am working on improving my knowledge of python as well as ruby. I have a very solid understanding of Linux as well as most Windows based OS'es. Networking is not one of my strong points, but I do know the basics of TCP/IP, this is definitely an area I can improve on. I have been into IT/security for a very long time. I have been working professionally in IT since 1995. I have been into security since 2001 when I got my first taste of buffer overflows via a defacement spree. I've grown a lot since then, so I don't do that anymore.

Tell us why you would be a valuable asset: I am constantly learning. Not only do I like to learn, but I also like sharing the knowledge I have gained. I have always been a firm believer in sharing and passing on the information you have. From a group standpoint, this is one of the better ways to improve the overall skills of the group.

Elaborate on your achievements and future goals:I graduated with a BS in information security in 2010, and I am currently working on finishing up my MS in Applied IT. I recently finished a graduate certificate in cyber security. I have also passed a bunch of IT related certifications in the last couple of years as well. CEH, 2 MCSE's, VCP6, RHCSA, MCSA 2012 to name a few. I am hoping to work on the OSCP course and exam at some point this year and finish the CISSP. I am a bit older, but also experienced, which can be beneficial.

Tell us about yourself: I have a full time job working as a principal engineer for a major DoD contractor. I have a great deal of experience both within the normal constraints of IT as well as the security realm. . I enjoy most aspects of security and IT in general. I also play on 2 hockey teams in my area and I love jiu jitsu. I don't play a whole lot of online games these days as I devote most of my time to my family, work, and school.

HIGH PAID FELLA - *January 13, 2014, 9:15 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

Ratting

This is the first thing I've learnt on Hackforums. I did this at the start back in '12. Ratting is not a big deal, but I can help people if they got problems with this. Ratting is a part of "Social Engineering" for me, to manipulate people and with this I got many accounts hacked. But I'm a Gray Hat hacker. Last time somebody was planning a vacantion with his wife and kids so I just uninstalled him.

Social Engineering

This is my job, mannipulating people and confusing them. Let them believe you aren't trying to get them etc. SE'ing helps me with "Ratting" and "E-Whoring". I can learn people how to improve there SE skills. "Their trust is the key."

E-Whoring

This is one of my most powerfull tools to hack. I can easily get money out of this because of my SE skills.
Can't say much about this.

Graphics

This is what I do much and I like much. I'm very creative and make good work. I helped a lot of people with my free GFX service (https://hackforums.net/showthread.php?tid=3277575)
I do this everyday, it gives me a good feeling offering the service to the HF community. I help people out with this and want to learn much more.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I would be a valuable asset because I'll help out people and learn more things. I try to improve myself everyday and be a better person for everyone. Just want to be a part of the great group and want to be a good student.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:My goal is to start a GFX Shop and make a cheap DDoS Protection for HF. We only want the money to be able to pay everything. We don't want to make big cash with it. More to do something for the community and show off my good heart.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I'm Marouane known as Asterea. I'm 14 years old and I'm from Beglium. But born in Morocco, I like to learn more and help other people. I'm active in the Gaming section, GFX faction and want to be more active in the Hacking section soon.

Good luck to everybody else! ?

Guede - *January 13, 2014, 3:20 pm*

Elaborate on your skillset: Server exploitation, Advanced PHP programming skills as well as Java & Beginner in C++

Tell us why you would be a valuable asset: I'd be a value asset, because I'll help, teach, the members of your groups programming languages (if they wish), I will also teach them some basic to advanced penetration testing as well as server exploitation to a legal degree.

Elaborate on your achievements and future goals: Learned PHP (2 years) to a very high skill, as well as Java (4 years), I pretty much fluently know the language, my future goal is to learn C++ fluently, as I know PHP & Java, I've considered ordering books that are about $250~ each.

Tell us about yourself: I've got a very mild personality, I find it hard to black hat because of my morals but I do server exploitation & perpetration testing as a security tester (White hat people hire you). I'm very easy to get along with and I'm a normal college student to be honest.

Olympic - *January 13, 2014, 4:30 pm*

Background:
After familiar i sing myself with computers at a young age, it was a strong factor for interests in hacking and learning about security from watching films or book.
Elaborate on your skillset: Rats and Botnets
I would say i am extremely experienced with Rats more than Botnets as Ratting was one of the first things I did at a young age, and spreading came naturally to me. I had a great time making friends who also rat and helping them out when they needed also requesting help if I couldn't figure something out (I mostly could figure it out myself). Right now I don't have a Botnet or use botnets but I did have a IRC botnet which contained a fair amount of bots.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Social Engineering
I've came to the conclusion that social engineering is one of my many natural talents that I strive in, I can get almost anything for free with very little risk. With the understanding that Social engineering is disallowed on Hackforums I always keep it outside of Hackforums and either don't talk about it, or do it elsewhere.
I've been collecting different methods of SE and planning to make a very large selection and make even higher profits by selling them.
My methods contain ways to gain thing such as Runescape coins to electronics.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
E-Whoring
E-Whoring as i remember was one of the first genuine types of hacking I got into, I quickly picked up that there are a lot of desperate people over the internet ready to spend anyway. I saw the business opportunity and immidietely grabbed on it to it and used it to my full potentials. My highest goal of E-whoring is making roughly £200 in one night, all due to my strong SE skills.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Programming
Regretfully I only know one language enough to be able to code from it and that's C++. I picked up C++ while trying to make my own game at a minor age. Programming was very interesting and that's all I could focus on and that's what I wanted to do, I would spend hours trying to fix silly little mistakes from my code and I can remember the pure joy when it actually worked. Being a confident C++ programmer I can hopefully help those who need help and try to improve their skills and teach them methods of overcoming theirs problems. It would also be a great help for me to join Legion as I want to start learning other languages and none of this can be accomplished if I don't get some help

myself. I would like help others while at the same time retrieving help myself.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
One of my favorite and loved habits are helping other people, as once being a newbie myself I know how it's like being stuck and no one there to help you, I am confident that I can help out those people and make a change. I am confident enough to say I will fit in immidietely in Legion with the terrific community Legion provides. I have respect for other people and I am never one to put anyone down. I will help anyone from the community that is down and help them succeed in their goals as I wish to succeed in mine. I am a very active user and will continue being this way as being on the computer is my number one hobby and will always be. Which means I have a lot of time on my hands to help out others.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals: My goals are to finish school with good score, so i can in future be a doctor. Thats what i want to be.
On hackforums i'd like to get accepted into every group. Don't have alot of goals actually.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: I am 23 years old from Lebanon but born in sweden. Love to be on forums like hackforums, else im just outside with friends to play football or such things.
I enjoy coding my own rsps etc. Thats like all. Security is an illusion.
-Thanks

K0FIN - *January 14, 2014, 2:59 pm*
Elaborate on your skillset:

0x01- Pentesting

-> I am skilled at applying the methodology of hacking to a target and exploiting vulnerabilities found to gain access to said targets. I have experience in information gathering, enumeration, vulnerability assesment, exploitation (executing exploits on vulnerable computer systems / web applications, writing exploits for different types of vulnerabilities), etc.

0x02- Programming

-> I can write code in Python, x86 Assembler, Java, some C and C++, HTML/Javascript.

Tell us why you would be a valuable asset:

I believe I could benefit anyone and everyone on HackForums who is interested in hacking in regards to exploit development and pentesting, along with programming. I am willing to help anyone who wants to learn something they believe they can learn from me and I do it for free.

Elaborate on your achievements and future goals:

0x01- Goals

My future goals include gaining certain IT security certifications, such as CEH, Security + / Network +, OSCP, OSCE, OSWP, and MSCE. I am writing a large script in Python that I hope to eventually develop into a framework that is designed to assist pentesters during pentests by applying methods as described in the Penetration Testing Execution Standard. I also aim toward helping members of this forum and people outside the forum as a goal, and finally becoming a member of your group is also a goal.

0x02- Achievements

Most achievements that are hacking related are on a grey hat basis. I have performed successful pentests on friends and one companies network, and I also helped a network administrator at my old college secure our network more (after exploiting SMB2 with Metasploit over the wire).

Tell us about yourself:

0x01- About Me

I am about ready to leave the United States Army as a former 13F10 Forward Observer and return to studying computer science and completing my desired certifications while working for a long time friend doing Android development. I live and breathe hacking, computing and learning how things work is my passion. And finally, I love teaching people how to do cool stuff with computers (like break code and execute remote shells and stuff! :))

Ryoma - *January 14, 2014, 4:24 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

Programming:

I am an experienced Python programmer who has developed variety of applications such as a YouTube rating bot, a Skype spammer, and others as well. I specialize in Selenium WebDriver, which I have used to develop my YouTube bot. I am currently developing a BitCoin faucet bot.
Here is some of my past work:
https://hackforums.net/showthread.php?tid=3523588
https://hackforums.net/showthread.php?tid=3460223
https://hackforums.net/showthread.php?tid=3886221

Doxing:
I also have some experience doxing as well. I have been learning for a while and hope to gain more knowledge on this as time comes.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I would be a valuable asset to Legion because I enjoy helping others and giving back. Throughout my time on HackForums I have helped several people. Here are some of my tutorials and giveaways:
https://hackforums.net/showthread.php?tid=3856498
https://hackforums.net/showthread.php?tid=3933884
https://hackforums.net/showthread.php?tid=3500453
https://hackforums.net/showthread.php?tid=3885730

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals:
I have sold my YouTube rating bot here in the marketplace. I also would like to achieve more sales

on my future work. I want to learn more about coding and broaden by knowledge with different languages. I also hope to make a living someday as a successful programmer.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I am a 14 year old freshman in high school. I enjoy programming, performing magic, basketball, Xbox, and hanging out here on HackForums.

G??gle - *January 15, 2014, 11:39 am*

Elaborate on your skillset: To be honest, I don't have much hacking skills. Sure I know all the terms, tools, know what all of them do and stuff, I know quite a lot of the theory, but I never really put it to practice.
Tell us why you would be a valuable asset: I like to share my knowledge with other people and help them when they have questions. The reason why I want to join the student program is to use the theory I already know, learn more (Because I obviously don't know everything, just the basics) and help others with what I know.
Elaborate on your achievements and future goals: As I said on the previous question, to help others. But another goal for me would be to learn a lot more about this subject.
Tell us about yourself: I'm a 16 years old Belgian dude who likes to help others. Unlike others I use Mac in stead of windows (I can run windows on this computer tough.
I recently learned java and I'm coding some java based tools with it.
If you have any questions feel free to PM me or send me a message on skype. (BarackOLlamaHF)

Digital™ - *January 15, 2014, 1:09 pm*

Elaborate on your skillset: I work as a remote technician. I like to create and build things in many different ways. graphics, audio and some coding in vbs and dw. I have a qualification in music tech and very experienced on both windows and mac platforms. I can rat and javadb along with wifi hacking, basic mitm attacks, have experience with bt/kali but all for security research or with permission.
Tell us why you would be a valuable asset: Because I am loyal, honest and always ready to offer help. I like to be elaborate with my answers and can assist, manage and create in most subjects.
Elaborate on your achievements and future goals: My biggest achievement in life was when I scrapped watching the TV and using social media site for learning new skills via tutorials e.t.c and then actually 'using' social media sites. I wish to continue to learn and develop and continue to offer help to other wishing to do the same.
Tell us about yourself: I am completely addicted to creating new things or trying to make things better. I am guy in 20's with swedish girlfriend who is very tolerant with me and HF but is pulling a face right now as she is ready to watch a film... gtg PM if you want more..

Antvvan - *January 15, 2014, 7:06 pm*

Elaborate on your skillset: I have GREAT coding skills. With SQL. I can help many members if they ever need help coding something.
Tell us why you would be a valuable asset: I can help the community with anything they need. I can teach them how to code or anything at no cost at all
Elaborate on your achievements and future goals: I have achieved far to many things. (Not to brag) but one goal is to make people who need to learn to code EXPERTS. :)
Tell us about yourself: I am 16, I have been coding since i was about 13 or 14. I have been around a bunch of people who have down SQL for years and taught me as well. I hope i can join LEGION to help members learn what they desire.

Shape - *January 15, 2014, 9:05 pm*

Elaborate on your skillset: I am a moderate hacker. I am very familiar with rats, jdb's, keyloggers, and some other minor stuff. I am not the best hacker, but I would love to learn everything I can and I am a great learner. I also am familiar with vpn's and always use one, however, that's not really hacking :P
Tell us why you would be a valuable asset: I would be a valuable asset because I am a great learner and could become one of the best. I can help assist people that are below me in skill level and help them achieve what they wish.
Elaborate on your achievements and future goals:I plan to learn a lot more about hacking and spreading malware, and getting passed website security. I would also be interested in help protect against such things and learning how to protect myself and fellow hf members of this.
Tell us about yourself:I am 18 and currently go to High School, however, I am able to access online almost any time. After school I hangout with a friend for a few hours, and then usually come home and spend all my time on HF or doing something on the computer. I do just about everything on the computer and I really hope I get the opportunity to learn from the best. However, there is so many great applicants that I am sure I won't qualify, but I wanted to apply anyways.

Thanks for reading

.christian - *January 16, 2014, 4:31 pm*
Elaborate on your skillset:
I joined HF about two years ago when I was getting into using RATs, was inactive on the forums for quite a while and now I am back. Since I have been back I have expanded my skillset quite a bit. As I stated I have experience with RATs, along with RATs I have experience with HTTP Botnets. I ran a plasma botnet and would mine LTC with that. The experience I gained from this was incredible because of the different ways to spread. I used Java Drive By's, e-Whoring, Social Engineering, and a couple other technique. I have experience with crypters and booters as well. I am currently teaching myself C++ aswell. The experience I gained from the HTTP Botnet as I stated above is a crucial part in my application.

Tell us why you would be a valuable asset:
I feel I would be a valuable asset because I am a hard-worker and know how to get stuff done. I am determined to learn and ready to seize an opportunity that is in front of me. I will make the best of my time and apply myself to all situations. I have a general range of knowledge around what "hacking" involves, but would like to expand that knowledge. I am ready to learn, and ready to expand Legion.

Elaborate on your achievements and future goals:
Achievments: Success with HTTP Botnet using it as a mining client and mining LTC, setting up stable domains for the use of my JDB, e-Whoring and using social engineering to convince people into certain tasks I wanted them to do. Future goals:In the future I would like to myself being a software engineer or majoring in something with computer science. I want to be at a point where I can use the resources that I have learned from a a group like this to take advantage of opportunities to the fullest. I see myself in a good position, but after the necessary work required to get there.

Tell us about yourself:
My name is Christian. I live in Kansas and love playing soccer. I travel around the United States and play soccer. I have been involved with computers from a very young age and currently build computers for friends and "customers". I am a junior in high school and love learning new things. I am hard-working and apply myself to many different situations. I also love cars. I drive a Nissan 350z with many aftermarket mods. I am a pretty cool dude once you get to know me ;) I would like to thank you for your time in reading this application.

davie890 - *January 18, 2014, 5:09 am*

Elaborate on your skillset:No skills at the moment I would like to learn.
Tell us why you would be a valuable asset: I would not be a valuable asset because I am unknowledgable about everything code related.
Elaborate on your achievements and future goals: I want to work as a computer network and security tech expert. I am hoping this "student program" can get me there because I have no idea where to start. School requires calc+ which I am trying to avoid.
Tell us about yourself: I don't know what to major in and I would hope to become one of you student. I am done wasting my time on games and applying to see how far this can get me. 18

rSync - *January 18, 2014, 3:28 pm*
Elaborate on your skillset:

This is the field where many users post everything they ever heard about or just did 'Hello world!' stuff (if we speak of coding). I just won't type in here whatever I know as beginner (beginning level of skill). I am very skilled in HTML/CSS coding and developing web sites all sorts of excluding flash sites witch I do not like to see, not even thinking about to develop them. I am very skilled in administrating forums, skilled in administrating web sites of all types. I know how to manage servers very well (only linux OS), not bad in securing them. Ideas, I also consider great ideas as skill. Considering PHP and JAVA (javascript), I am not professional but I can manage it also. There are many other things witch I do and know to do but I don't feel need to write them here. For example 2 years ago I was RAT/Keylogging/Crypting/Coding vb.net/vb6/Java Drive By/etc..etc.. I stopped with hacking and focused on security and web coding. For about 2-5 months, I was dealing with website hacking as well.. xss, sqli, lfi, etc, etc.. Man, I can't even remember what I used to do in my life because I have tried everything..

Tell us why you would be a valuable asset:

I definitely think I would be kinda valuable to the group. I could share experience with another group members, teach them as well as learn from them. I deem that teamwork is one of the best and most successful methods of success and developing.

Elaborate on your achievements and future goals:

I made various websites in my life, forums, blogs, personal websites, corporate, etc.. I had few hosting companies (to call them that way) but they weren't part of this forum for a obvious reason. I have great skills in web hosting / servers. For future goal... What can I say.. I am always for the business. I am planning to start web hosting once again and I will develop few websites about various stuff (won't reveal secret now ;))

Tell us about yourself:

I don't want to express private details this much public. I can just say that I am an optimist who is always for business and money earning. Simply, web is my passion.

...

If you are wondering, why didn't I put some more effort in this application to stylize it (font color, size, alignment, listed skills, etc, etc..), I need to let you know my opinion on this - For a group application, it don't matter. I saw that people are trying to stylize application so hard, but when I read it, it contains no powerful knowledge at all! I think that the real knowledge and desire to enter, support and contribute to the group really matters more than post style. And if I am not ub3r, l33t, if I am regular member, it doesn't have to mean that I do not posses knowledge and that I do not have skill. That's the way 70% members from here are thinking. If you accept me to the group, you will

see my knowledge and desire to make effort in it, desire to teach and learn. Post style matters only in noob-friendly tutorials and sales threads. Yellow or blue, never mind, its only important that it's visible to read.

Thank you for reading.

Understalker - *January 18, 2014, 3:29 pm*

We will be inviting soon. Be patient. ?

Saphir? - *January 21, 2014, 11:29 pm*
Elaborate on your skillset:
Penetration Testing. I'm certified with a CISCO CCNA Security Certification. I've also worked on and with multiple companies and organizations to secure and test websites. I am the Co-Founder of a Web Penetration Company. I also do a lot of Social Engineering, my latest achievement was hacking into the Comcast Employee Chat System.
Tell us why you would be a valuable asset: I know what I'm doing, and I'm willing to share my knowledge and experience with other members.
Elaborate on your achievements and future goals:
Some Achievements:
Rooted/Defaced/Hacked Multiple Forums and Sites.
I was the Co-Developer and One of the Creators of the VBulletin 4.2.1 XSS 0day.
A lot of smaller sites and smaller exploits, which aren't very important.
Latest Achievements:
XSS'd TTG. Access'd 3 of their Main/Storage Servers, and dumped the entire database. That is currently on sale.
Hacked the Comcast Employee Chat System.
Tell us about yourself: As much as I'd love to tell you "about" myself, I'd rather not give away who I am. All I'm going to say is, I'm older, and experienced. I currently work for a Web Penetration

Company which I co-founded.

Cheers

Raptor. - *January 22, 2014, 2:01 am*

Elaborate on your skillset: When it comes to hacking, I don't really have a skillset. That's why I figured I'd apply for the Student Program offered here in hopes of actually learning a skillset. I don't know any programming languages enough to list them here, however I am generally able to get the gist of whatever a piece of code is trying to accomplish by looking at it.
Tell us why you would be a valuable asset: I dedicate myself to whatever I am a part of, and I have enough spare time on my hands to follow through on projects, should they be within my abilities.
Elaborate on your achievements and future goals: I am studying Commerce this year at university (the equivalent of college in the U.S.) and plan to either transfer into Law in the second trimester or to go back and do a separate Law degree after the completion of my Commerce degree.
Tell us about yourself: I'm an 18 year old male from Australia, I enjoy gaming, and I have an interest in pretty much everything that regards computers, and I'd like to expand my skills and knowledge appropriately.

SHADOW REALM - *January 22, 2014, 2:57 pm*

I think you guys should tighten up with who you let be teachers lol. Look @ what an ADMIN said in my signature

+ He didn't know how to setup a VPN server rofl. This is one of the main reasons why everyone thinks your horrible and just an overall joke

Lets see all the other jokes in there

I said I corrected Acroz on her mistakes, such as the botnet one.

Yes Sl0w is a student, please aim to correct higher members rather than recently added students.

If what you say is true, he will be dealt with.

Crake - *January 22, 2014, 11:21 pm*

Elaborate on your skillset: I am a web developer making a steady income via freelance work. I focus primarily on front-end technologies (HTML5, javascript, jQuery, PHP, etc) but I also have experience developing backends in the LAMPP stack and the LAMN stack (Linux Apache MongoDB Node.js). I'm addicted to learning and spend most of my time reading articles to pick up random arbitrary bits of information that, while probably useless in day-to-day life, help me to establish a better picture in my mind of the world in which we live. I've worked full-stack for 3+ years, so I have a foot in the door with systems administration as well as penetration testing (on my own web applications). I've also done C++ and C# development, though those are by no means my dominant languages. However, my rule of thumb is if you want me to write a given app in a given language, I can always do it for the right price. I'm learning DOXing but generally speaking given a few pieces of seed information I can retrieve the significant info on someone. I'm also very talented (if I may say so) at flipping commodoties. That is, I know when and where to buy a product and when/where/how to sell it. I make around $200 per week when flipping, but I rarely do it for lack of time, interest, and the fact that I'm usually occupied with web development.
As for strictly hacking-related activities, I am good at exploiting PHP applications, and exceptional at XSS (helped largely by my background with web technologies). I know how to set up VPNs, how to stay anonymous on the web, how to make a backdoor that will run on any UNIX system, etc. I've done some RATing mostly to help my friends recover parents' passwords, etc, simply because I don't feel comfortable exploiting purely blackhat techniques for personal gain. When it's for the good of the community, sure, but I prefer to keep my own professional affairs strictly "whitehat"

Tell us why you would be a valuable asset: I always have an eye for deals, and can provide discounted server hosting offers I find to other members, as well as provide instruction on systems administration to those that need it. I always will help someone in need as my time permits, and to the level I deem appropriate. Not limited to systems administration, of course, I will always do my

best to give a friend advice when (s)he needs it. I'm a comedian (perhaps a poor one, but nonetheless) and as such may provide a bit of comic relief and pleasure to Legion's fine community.

Elaborate on your achievements and future goals: I am the youngest person in the US to be offered an internship by Intel (I was 14 at the time: they only decided to wait to hire me for legal reasons, but I will begin in 4 months). I'm also in the 99th percentile among my peers (according to standardized state testing as well as IQ tests), and learn incredibly fast. I wrote a web-wide game last year in the course of a month, and now operate a company centric to that game including two employees as well as myself. I've done open source contributions to Adobe's "brackets" web IDE (modifying a regex to better match file names) and won my first science fair when I was 5. In the future (long-term), I wish to work at a large company in Silicon Valley (preferably Google) as a web developer. I want to dedicate my life to my work, and be remembered for contributions I made to the field.

Tell us about yourself: I'm 15; I make $400 to $2k a month; I speak English and a little French; I want to visit NYC; I'm a Physiomonistic Pantheist; I have depressive disorder; last year 8 people I care about died; I am a hopeless romantic suffering intense heartbreak; I really have no clue what to say here.
Really, there isn't much to me. I work for fun, I try to make as much money as I can, I love to debate intelligently and that's about it. I'm kind of a simple guy.

We are Legion

PM'd you a short list of members for you.

Dragon Hawk - *January 23, 2014, 4:41 am*
Elaborate on your skillset:
Programming
Programming is my passion, I just love doing it. Mostly I code in PHP language using Zend framework but I sometimes also use .net and java as per the needs.

Ratting
I am back to HF after a while, but before leaving I was into ratting and all, even wrote a detailed tutorial about setting up a RAT. Here is the link https://hackforums.net/showthread.php?tid=323768

Server Administration
I used to have a hosting business which gave me quite a lot of experience in managing servers

Team Work & Leadership
I own 2 startups here in India because of which I have developed some leadership qualities as well as got experience in working with a team

Tell us why you would be a valuable asset:
I would like to help other members in the fields which I have experience. I just love to share what I know so that everyone can benefit and doesn't makes same mistakes that I did

Elaborate on your achievements and future goals:
Currently I own 2 startups, one is an online radio station which has live rj'ing done by professional rjs. Other is my IT firm through which I am now able to generate approx 2k-2.5$ revenue each month. I consider it as an achievement.

My future goals are to start some revenue stream from my online radio, and increase revenue from my IT firm to 10 times in next one year.

I also, have some more startup ideas in mind which I want to start soon :)

Tell us about yourself:
Ahh this one is a little difficult...
I am a guy who wants to do something big in his life(everyone does) so that he can be remembered for his contributions in the world. I love to program and just about everything related to computers fascinate me. I am always trying to increase my knowledge and try out new technologies.

Tokyo ? - *January 23, 2014, 11:13 am*
Elaborate on your skillset: My Social Engineering skills are top notch, I can manipulate people in

order to attain information that I deem fit for the "occasion". So my strongest point? Social Engineering. I am also very good at graphic design and will probably incorporate some sort of GFX RAT or keylogger that I can use on targets whenever need be. I also know how to remove Keyloggers, RATs, SQLs, etc. I'm a grey hat. I love to stay professional and I take pride in all the hacking work I do, whether it be blackhat or whitehat. I want to HELP people as much as possible, considering the thing happening in the news lately really get on my nerves.

Tell us why you would be a valuable asset: I would be a great asset to have because of my professionalism as well as my Social Engineering skills and my desire to do what is best for the people within our communities. I am always willing to learn new things as well as teach whatever knowledge I have to anyone that needs it.

Elaborate on your achievements and future goals: I have earned over $500 from my Social Engineering skills, I will probably do some scripting for HF. My future goals are to join a solid hacking group that I feel comfortable in and can learn from. I want to be able to take down websites and really make a difference in the world today based off of my hacking skillset.

Tell us about yourself: My name is Kurious, I really got into hacking about 3 months ago and have been going from forum to forum trying to find groups to join and learning off of various people. I am passionate about the work I do and want to help others in any way I can, even if it means going on the offense.

Crake - *January 23, 2014, 12:35 pm*

I will probably do some scripting for HF.
You guys should accept this kid just because he's hilarious.
Spoiler (Click to View)
Some people may not see the humour in the second part. Ask Omni about making an HF app and you'll see why it's funny

Odoyle - *January 25, 2014, 8:03 pm*

Elaborate on your skillset: My skillset is that of programming in a multitude of languages. I know Java, C++, Minimal C, Python, PHP, Brainfuck, VB, SQL, and others. I can also pick up new languages fairly quickly. I have developed a fairly good sense of communication with potential customers.

Tell us why you would be a valuable asset: I would be a valuable asset because I am enthusiastic about all things tech. I am extremely eager to learn anything new as well as teach others what I know.

Elaborate on your achievements and future goals: As I already stated, I know a multitude of languages and have been fairly successful in freelance jobs. I took the AP CS Test last year and scored a 5. (This was the highest score and got me out of two classes in the college that I will be attending) I am hoping to have a successful career as a developer after college.

Tell us about yourself: There really isn't much left to say about me. I am a denizen of the internet and of computers in general. I strive to learn more and more each day and continue learning about different subjects. I currently manage several websites and do freelance work.

Thank you for reading my application to your wonderful group. I hope to hear back soon and be part of this group.

King Cobra - *January 26, 2014, 5:57 am*

We've been really patient now, can someone at least post a date?

drzfinestplaya - *January 26, 2014, 6:51 pm*

Elaborate on your skillset:
Monentizing - run a centos videogame server with a mysql database and a mybb forum.
Programming - c#, java, c++, html, css, php.
Os - windows, linux.
Graphics - able to recreate graphics
Tell us why you would be a valuable asset:why not?
Elaborate on your achievements and future goals:to learn about computer hacking to increase my server security and vunerabilities.
Tell us about yourself:i work 2 days a week so most of the time im on the pc increasing my knowledge about computers

Aura - *January 26, 2014, 6:57 pm*

(Jan 23, 2014 01:15 AM)?ibitximer Wrote: *[CITE]* Give me a list of all the students teachers and so called admins and I will tell you who should get removed
Did you say anything bad about meh ? ?

lathrissa - *January 28, 2014, 6:24 pm*

Elaborate on your skillset:
1.) I can monitor packets sent back and forth from bridged connections.
2.) I can find and flood IPs that are connected to me.
3.) I can listen very well
4.) I can do the worst graphics design in history. Yes, it takes skill to suck as bad as i do.
5.) I can mainly do the simple and basic things.

Tell us why you would be a valuable asset:
I would be a valuable asset because i can listen and do as told. I am a quick learner. I am loyal and dedicated. I dont complain about everything that is said or done.
Elaborate on your achievements and future goals:
I am looking to learn more about coding (c++) because i honestly have no knowledge in that field whatsoever. I am also looking to learn more about penetration "testing" ;) I would also like to get to know some of the people in this group personally and become a part of something hear on hack forums.
Tell us about yourself:
I am probably the most mature 16 year old you will ever meet.
I am active in school (A student until it comes to stupid teachers)We all have them.
I am active on youtube and learning more about graphics design.
I am learning more about c++ which is easy because i know nothing at this moment
I am looking to head to college in the near future to become a Computer Support Specialist
I would like to expand my knowledge by joining Legion and getting to know the people in it and the skills they have.
Hacking is something i love to do. Although i don't know much about it i am anxious to learn more.
I am from Kentucky (Yes i do sound like a redneck for those who are wondering)
I am looking forward to hearing the final decision, thanks a ton for considering my application :D

Natas - *January 29, 2014, 5:02 am*

Elaborate on your skillset: HTML, Php, .Net I am a rat expert I know a lot about a lot of stuff such as sql and pretty much a at least a little bit about any thing hacking related.
Tell us why you would be a valuable asset: I am wanting to help people and become apart of a community or " a group " I am have a lot of hacking related knowledge with I am willing to share I am also interested in meeting new people and just becoming apart of the community.
Elaborate on your achievements and future goals:
I have doxed some really important people who know one else can I no thats not any thing to neat but I thought it was lol. And I have made a lot of tutorials and have helped many people viva team viewer with rating related questions Ive done a lot of hacking related stuff that is not allowed to be discussed here as well.

Tell us about yourself:
I am from the U.S I am 18 I been doing this stuff for years now I dropped out of school when I was 16 and picked up my computer and learnt so much its incredible. I stay on my computer hours and hours on day and I am always looking to learn and I will always be wanting to help as well. I am not new to this I been in user groups before and I am just wanting to let you know I will be worth your time and will be a great member if given the chance.

Bet - *January 29, 2014, 5:31 am*

Elaborate on your skillset:
I don't really have any skills in regards to hacking as of yet, although, I am starting to get involved with Ratting, SEing, Doxing and a bit of coding. I am a complete beginner to all of these, although am a very fast learner and want to develop and learn more about these topics which i believe Legion can help me with.

Since this application was last posted, I see myself improving with the skillset of doxing, although I really want to improve, seeing as I enjoy doing it.

Tell us why you would be a valuable asset:
I believe i would be a valuable asset mainly because I have the desire to learn. I love and enjoy learning all types of new things, quickly adapting to them all. I am also a very friendly and easy going person. I try my best to help anyone I can in any field I am experienced in. I could also help contribute anything to the group, as far as my skillset goes.

Elaborate on your achievements and future goals:
In the future, I want to develop my current skills to a high level (DOXING, SEING, CODING, RATTING), as well as learn all new ones, even the ones I have absolutely no knowledge on. It would be great to meet new people as well. I have plenty of achievements non-hacking wise (since i'm new to it) although will not go into depth with them (PM for them)

Tell us about yourself:
I am 16 years old, currently living in Victoria, Australia. I am a nice and friendly person, quite smart and mature for my age. I am currently doing Coding, Web Design and Development, Computer Applications, Physics, Maths, English at school, and love all types of challenges. I also LOVE learning anything and everything as stated above.

Any questions or queries regarding me or my application, feel free to PM me. Thank you for this opportunity and good luck to all other applicants.

Toasties - *January 30, 2014, 7:30 pm*

Elaborate on your skillset:

I can exploit some websites and pop a shell.
I can also reverse engineer software to bypass serials.
I am learning C# code at uni.

Tell us why you would be a valuable asset:

I think that i would be valuable to the community helping to find and exploit bugs.
I can also help with some coding.

Elaborate on your achievements and future goals:

Recently i finished a program that detects what part of our network is down and resets required modem. For now i hope to grad from uni and understand code better than English! hahah one day -_-

Tell us about yourself:

So yeah i am from a tiny island called New Zealand. Most of you are probably like... wheres that. its a little island on the east of Austria. infant two islands. Not much to say, i like computers. electronics and cars. Hope to meet some new legion guys :D

?nonymous - *January 31, 2014, 6:25 am*

Student wave #8 has been invited.

Anyone who posted before this post wasn't accepted if they didn't receive a PM - you may apply again if you can write a better application. ?

Anyone posting after this will be reviewed for student wave #9.

+Reckless - *January 31, 2014, 8:54 am*

If we have previously been accepted, but had to leave due to personal reasons limiting time and availibility, do we have to re-apply?

And if so may we copy the exact same app?

HIGH PAID FELLA - *January 31, 2014, 9:27 am*

(Jan 31, 2014 09:54 AM)Fl????. Wrote: *[CITE]* If we have previously been accepted, but had to leave due to personal reasons limiting time and availibility, do we have to re-apply?

PM Anonymous and if you were a good addition at the time, he will re-add you again.

vitafortis - *January 31, 2014, 9:34 am*

(Jan 31, 2014 10:27 AM)Asterea Wrote: *[CITE]* I understand this because it's confusing. You wasn't denied but I prefer you to write a new and better one.
Who are you to say what he should do? >.>

Agree with the above poster, PM Anon and see what he says. I had to leave previously due to time constraints, he told me write a basic app, and then I was accepted with the most recent wave. Like the guy above me said, if you were a good addition, then Anonymous will react accordingly.

Jefe - *January 31, 2014, 5:01 pm*

Elaborate on your skillset:

Social Engineering
I'm currently still learning in this field but to some extent I've been par-taking within SE for a long time, due to my past experience with gaming within computer gaming communities. I've been working on this skill set for some time now and feel that I'll eventually become very well at this.

Researching
Now, this doesn't seem like a "good" skill set to most but it actually is a very good, and useful skill-set.. Basically, I personally am very persistent when it comes to researching information about various subjects.

Web Design
Also in this field, I am still learning..- although I am in the basic stages of fully understanding PHP and almost fully understand HTML 5. I'm also learning quickly in MySQL.

Tell us why you would be a valuable asset: I believe that I could be a valuable asset because I'm persistent when it comes down to it, I am willing to learn something that I don't understand. I personally feel that I am active, maybe more active than the majority of the people located on this forum, I attempt to stay active in different sections of the forums as much as I can, and on other services/forums.

Elaborate on your achievements and future goals:
Achievements
- Learned Pawno, HTML, and little Java
- Quit McDonalds
- Activity is over-kill

Future Goals

As Listed above I want to be able to master Social Engineering, and Web Design mainly because this two traits could honestly assist me in life over-all, not just on hack forums or in any group, another goal of mine related to the computer is to become extremely active and well known on hack forums. I could make a complete list about my real-life goals but I don't think that you'll be interested in them, I would think that you would be mainly interested in my goals related to hack forums.

Tell us about yourself: I am 16, I live in the United States, I am currently a Sophomore in high school, I spend most of the time on hack forums or anyone service. I would completely consider myself to be understanding and patient, I am willing to attempt and learn completely new things that come to me, I am always interested in new challenges that face me in the near future (Joining a group). You can consider me as a person that always attempts to move up in the world, I personally am not a stagnate person, I cannot.. would not be able to always live in the same time of environment.

Zulaf - *January 31, 2014, 6:04 pm*

Elaborate on your skillset: I currently have minor network experience along with Website hosting, Serving hosting, Server Administration, and soon enough learn how to code C++ and etc.

Tell us why you would be a valuable asset: Overtime, I will be able to bring a leadership aspect to the group but also input complete honest opinions on decisions. As I become more experienced in computer science, I plan on creating high quality programs but focusing on its efficiency. I put 100% on every task given and I believe ill be a valuable student.

Elaborate on your achievements and future goals: I'm currently a Junior in High School with a decent GPA. I plan on majoring in Computer Science and hopefully one day get a PhD in that specific field. On the cyber aspect of future goals, Hopefully I could become a highly respected user on HackForum's and many other communities.

Tell us about yourself: I'm a 16 year old Junior in High School. I currently take classes focusing on the Computer Science and Network Engineering. I plan on taking similar classes Senior year but also majoring these topics in college. I'm extremely loyal to groups I put time in and give my all when given tasks. I'm typically quiet and able to keep things to myself.

SHADOW REALM - *February 1, 2014, 5:06 am*

Elaborate on your skillset:
RFI
xPath Injection
Adobe PDF exploits
Metasploit
Zenmap
IRC
DD0S
SQLMap
intext:-rwxrwxrwx c99
Tell us why you would be a valuable asset:

Why wouldn't I be, I pop 3 boxes every day year

Elaborate on your achievements and future goals:

Slammed home the flame botnet arrest
Hacked DB's
FBI honeypot?

Prooved that most of the students and all of the admins are retards

Tell us about yourself:

I love the botnet life

Sur Justice - *February 1, 2014, 7:17 am*

Elaborate on your skillset:

My skillset is not that incredibly big, and I am not going to expand it to brag. So I will be honest here. I know alot about website coding, I sometimes code sites for comagnies and sometimes just for the fun of it. I am a really good seller, I think I can sell almost anything I have, every Amity product you see on HackForums and even the ApiBuilder has been in my hands. I have made a lot of money of off hackforums.
I know about Linux servers setup, ddos scripts, php, mysql, mysqli, pdo, html, css, etc. And I am learning other coding languages like c++, c#, Java right at this very moment.
I have a special way of SEing I know what to say people when, and I can comfort almost anyone.

Tell us why you would be a valuable asset:

Why I would be a valuable asset is a great question, I like to see my self as a person that tries to keep HackForums High Quality and try to give out as much as possible.
I am here to help people with thier problems if they have any, and I am in skype chats of HackForums just to talk and have a nice time. I want HackForums to be remembered as a great forum that it is. And I want to play a role in that great forum under the name of Legion.
Why Legion? Because first of all it is the best group name I have heard, I know there are a lot of teachers out there in legion that could teach me things I could never come up with.
I would be a valuable asset because one day I hope to be one of those teachers I hope to be able to help the group rise even more.

Elaborate on your achievements and future goals:

My achievements so far insclude me knowing all about web programming, and knowing how to help anyone with anything.
My future goals are simply said, I want to have the ability to code whatever I think without having to look on google or whatever. By that I mean that if I would want to code lets say a crypter, that that would be no problem for me and I would not even mind doing it.
I want to be able to help rise up the computer evolution to the next level and make sure everyone gets the best out of their computer at any given moment in time.

Tell us about yourself:

I am SurJustice, not to be mistaken by SirJustice. I am 16 at the moment of writing this post, but in 9 days I will turn 17. I am eager to learn new things. I like hanging out with my friends, either from HackForums or in real life.
I play the drums, got kicked out of my band a view months ago, but I found a new band. I don't play a lot of games, as I don't really like playing games. I think that playing games and sleeping are actually a waste of time. Because in my opinion in that time you could make yourself more knowledgeable, help people or earn money.
I work at a local restaurant, I started there like half a year ago and it already seems like they can't miss me. I have been promoted 3 times during this working period.

This was my application, hope to hear back from you.

-SurJustice

Craze Z - *February 1, 2014, 9:08 am*

ABOUT ME
Name: Craze
Age: 17
Location: United Kigndom GMT +0

SKILLS I am a quick friendly individual who strives for the best outcome of every opportunity. I like to learn who things and while learning help others gain knowledge from myself. I sell many products on HackForums from Virtual items such as Habbo GB's to E-Books. I have my own ways of marketing these products which in the end have helped me conquer the market and get me a lot of money.
Another skill which is important in every person is the skill to share. I share a lot of things with the users on HackForums and I believe that my generousity would help this group.
I use to RAT when I was still new to HackForums however after gaining a lot of knowledge and to be honest, getting bored of it,I gave it up and moved on. I can offer RATing help throughout the group to anyone who needs it. I believe I would be a valuable asset because with only some of the many skills I have proudly mentioned in my application.

Thanks for reading my application and I look forward to hearing your response.

Understalker - *February 1, 2014, 12:42 pm*
why is so many instinct ppl applying
Talking about your Marketing / Gaming skills won't really help in a "HACKING" based group.

Expand on what you know so far, what you want to know, and how you plan on helping the group overall.

FUK YEW - *February 2, 2014, 1:56 pm*
Keeping it simple, I don't think my ability to use GFX would benefit me towards hacking.

Elaborate on your skillset: I'm skilled at doxing, pulling SSNs, credit reports, DoBs, last 4 #'s of credit cards, finance overviews. Full family, old addresses. You name it.

Currently 'fluent' at: SQLi, XSS, LFI/RFI. I'm particularly good at DNS hijacking, general social engineering such as Comcast ISP doxing and Verizon.

Tell us why you would be a valuable asset: Pretty much everything above, I can teach others/share my knowledge.
Elaborate on your achievements and future goals: Listed on the Microsoft Hall of Fame twice for SQLi on msn.com subdomains.

Security Audit for 2 rather large Minecraft Hosting companies.

I've pulled databases of countless sites and have quite the collection of DBs.

Tell us about yourself: I'm 19, born in Europe, English is my first language. Hacking for the past 6 years. Currently doing a Bachelor of Science in Computer Science. I'm obsessed with having as many dbs as possible in my hands.

Cicada - *February 2, 2014, 10:07 pm*

Ill try to make this more organized.
EDIT: I didn't see a rule that I can not edit my post. Edited skill sets and future goals
Elaborate on your skillset:Mid-Level SQLi
Low/Mid-Level XSS
I don't really label ratting as a skill but I've done a lot in the past
High-Level Doxxing and Recon
Low/Mid-Level Metasploit/Server-side exploiting
Mid-Level Wifu(Wifi cracking)
Low/Mid-Level Network scanning
Low-Level Packet stealing/analyzing
Low/Mid-Level Python
Low-Level PHP
Mid-Level Visual Basic
HTML but who doesn't?
Mid-Level Social Engineering
High-Level Listening
High-Level Voicing my opinion

Tell us why you would be a valuable asset: Honestly, I believe I would be valuable because I have the ability to work alone or in a team. I also have a thirst for knowledge and affinity for trying new things. I am always trying to think outside of the box, coming at things with new approaches. I have been to the white-hat side of things, black-hat side of things, and everything in between during my lifelong quest to be the best I can be in the hobby I love. I'm not the kind of person that gives up just because they fail, don't learn something fast, or requires effort on my part to do. If there is something I want to do, I'll try my hardest to get there. If you noticed that a lot of my skill sets appear to be low-level, that is because I try to dip my feet into anything I come across so that I can look at things from all angles. I can be laid back and also professional when I'm needed to be.

Elaborate on your achievements and future goals:There are some legal implications/breaking of HF rules to some of the things I would consider my achievements so feel free to ask me in a PM. Some proof might also be able to be provided. My future goals probably align with most people here. I love computers and I always have, hacking has been my style for as long as I can remember. I just want to learn as much as I can, do whatever fun stuff I can with what I learn, and hopefully make a career out of it. I think this group can teach me a lot and I hope I can give back. I really want to learn a lot more about sever-side exploitation. I have a general understanding of TCP/IP but I want to dig deeper into packet inspection and things like that.

Tell us about yourself: I grew up with a dad who cracked software. He taught me to code HTML when I was young and I always thought that was the coolest thing in the world. I used to do a lot of game hacking (some MMOs and Halo 2). I was the kid that provided the class with lists of proxies to get on myspace and had a new list ready for when the other lists got caught. I have taken part in some older Anon operations. I do some gaming these days but I have cut back to allow more time for things like this. I could go on and on about my personality and stuff but I guess it will all boil down to that I like getting into things and places I shouldn't be.

Squishy - *February 3, 2014, 9:18 pm*

[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Stress Testing Stress Testing has always been a special thing for me ever since I found out about Hackforums. I've always and still am amazed at how the internet works and that people can use it to harm, or to help. I can of course produce DDoS attacks, or harm others in violent ways, but I choose not to. I prefer to use my skills and knowledge as a building tool, a blueprint in order to help people.
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] How could I help Legion? Since the internet has

become a learning tool for me, I can expand the knowledge of the people within Legion, helping those who want to learn or do not fully understand something. I can help protect and secure networks, or even help mitigate an ongoing attack.
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Goals Goals, I can understand is something important to all of us. We learn and improve, and if we do not improve, we do not live. Goals for me is to help out Legion as much as I can, making others proud to have me in their group. Self-goals are things such as,; starting a DDoS Protection / Mitigation company, and to start a very large Stress Testing tool.
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] Me?I like to stay different from everyone else. Having a professional mood and understanding when it is needed, but with people I am friends with, I'm extremely loose, yet not offending. I am 15, a Sophomore in one of the famous and safe schools in Southern California. I'm Korean, and speak fluently in both English and Korean.
[img]http://i.minus.com/ieF7N7WNk5zde.gif[/img] I hope that the group leaders approve of me, and that I can learn, teach, help, and live the life of being an honorable member of Legion.

Acroz - *February 3, 2014, 10:04 pm*

(Feb 1, 2014 12:54 PM)Expel?™ Wrote: *[CITE]* Gaming:
I play a variety of PC games like Minecraft and the server HC, I also play different games such as League of Legends and World of Warcraft, not very important with this group but why not add it?
Instant Denied. Do not elaborate on gaming. Read main post before applying again.
(Jan 31, 2014 06:01 PM)REsPECT Wrote: *[CITE]* Gaming
I understand that this is a common trait in most applications but I don't see why not adding this. I personally am far from being the best playing at games but I am not the worst, I work very well within teams when it comes to games. I'm adding games to my collection as much as I can.
Instant Denied. Do not elaborate on gaming. Read main post before applying again.

Bet - *February 3, 2014, 11:16 pm*

Elaborate on your skillset:
I don't really have any skills in regards to hacking as of yet, although, I am starting to get involved with Ratting, SEing, Doxing and a bit of coding. I am a complete beginner to all of these, although am a very fast learner and want to develop and learn more about these topics which i believe Legion can help me with.

Since this application was last posted, I see myself improving with the skillset of doxing, although I really want to improve, seeing as I enjoy doing it.

Tell us why you would be a valuable asset:
I believe i would be a valuable asset mainly because I have the desire to learn. I love and enjoy learning all types of new things, quickly adapting to them all. I am also a very friendly and easy going person. I try my best to help anyone I can in any field I am experienced in. I could also help contribute anything to the group, as far as my skillset goes.

Elaborate on your achievements and future goals:
In the future, I want to develop my current skills to a high level (DOXING, SEING, CODING, RATTING), as well as learn all new ones, even the ones I have absolutely no knowledge on. It would be great to meet new people as well. I have plenty of achievements non-hacking wise (since i'm new to it) although will not go into depth with them (PM for them)

Tell us about yourself:
I am 16 years old, currently living in Victoria, Australia. I am a nice and friendly person, quite smart and mature for my age. I am currently doing Coding, Web Design and Development, Computer Applications, Physics, Maths, English at school, and love all types of challenges. I also LOVE learning anything and everything as stated above.

Any questions or queries regarding me or my application, feel free to PM me. Thank you for this opportunity and good luck to all other applicants.

ha4x0r - *February 6, 2014, 3:33 pm*
I will apply soon, good luck I see many applications.

Umari - *February 6, 2014, 6:34 pm*

Elaborate on your skillset: I don't have much skill, I will admit, but the thing is, if I learn something, 99% of the time, I will remember it, I mainly want to join to learn, so then I can take what I learn, and help others.

Tell us why you would be a valuable asset: I don't think too highly of myself, but I'm a good typist, and listener, and I am very active when I feel like I belong somewhere, and since I have always agreed with Anonymous and their ideals, I thought this would be a good place to learn.

Elaborate on your achievements and future goals: I hope to get somewhere in the computer security field involving Linux operating systems and servers.

Tell us about yourself: My name is Derrik, and I am from America. I haven't been on HackForums for long, but I hope to make a name for myself somewhere, so I can feel like I belong somewhere, which in reality, is what everyone wants. I used to skateboard, but after a knee dislocation injury a little under two years ago, I have since stopped. I enjoy bike riding on trails, or out in the woods with my girlfriend, and old time things like castles and knights and living off the land by hinting and cooking over an open fire all interest me. I am some what of a pyro, but I keep it safe. My biggest pet peeve is poor grammar, especially from people that are older than me, my first thought when I see bad grammar is "Really? You claim to be [enter age here] but you type like a 3rd grade dropout?". I'm not hard to get along with, and I treat people how they treat me, sometimes worse, they piss in my cereal, I shit on theirs (metaphorically speaking).

Eeluminati - *February 6, 2014, 9:17 pm*

Elaborate on your skillset:

RAT's and Keyloggers (Click to View)
I have been familiar with RAT's and Keyloggers for about 24 months now, educating myself on them with the big Runescape hacking phase in early 2012.
I have only really used Cybergate and Darkcomet though, but they have always done the job for me. I know how to set them up and remove them. I haven't really looked to
learn anything new besides possibly programming one. Unlikely though.

Crypters (Click to View)
As of now, I have just been buying crypters to use. This past week though, I have been working with another member (Neanderthal) to make our own crypter in Visual Basic.
I have really just been asking him questions and leeching off HF and Google to find things, but we're planning on making it the best we can for our own personal use and some cash. I am very thankful for him
willing to help me with this, as he is experienced in this field. I won't bother making a coding section since I know very little.

E-Whoring (Click to View)
I originally found out about E-Whoring on another forum but I haven't done this it a while although I still know how to do it. Pretty basic skill, and great to work on your social engineering skills for beginners.

SQLI (Click to View)
To be honest, wasn't that hard to learn over a week and an easy way to access a websites database that is vulnerable. I learnt SQLI on Hackforums reading tutorials, which still helps me out every now and then.

Just so I don't drag on for too long, I only listed these. I also have experience in shell booters, doxing, monetizing and malware removal.

Tell us why you would be a valuable asset:

I wouldn't say I'd be really valuable, but I am really applying to learn from people with more experience than myself. I have pretty average knowledge and experience in a lot of things, and I want to step it up. I just want to be a student to gain a broader understanding so I am able to assist others. If it's required, I'll just post very clear tutorials for basic things people in Legion need. I'll be a very active member and remain high quality whilst being a member. Everything I currently know is from a lot of reading on forums and websites. A LOT of reading.

Elaborate on your achievements and future goals:

Thinking about it, I don't really note my achievements I have accomplished in relation to hacking. I have made at least $2000 in my internet/hacking time, probably more but I'll stick to that. Most of it's from Rating accounts and E-whoring grandpas. I defaced a forum with like 10 daily users, I felt like a baller. When the crypter I am working on is complete this will be a big achievement for me.

For goals, I really want this crypter to turn out well. I will be really happy with myself if I am able to make it success. I wouldn't mind learning more advanced monetizing methods, as it feels like what I do at the moment takes a lot of work, but I guess hard work is what's required for good earnings. Another goal is to join Legion, as it seems like a very knowledgeable group of experienced hackers, which I want to eventually consider myself as.

Tell us about yourself:

I am Australian. I preferred to be called Zel or Eeluminati, either one is fine. I am currently studying Engineering design, Graphic design and Architectural design in all the CAD products (autoCAD, Inventor, Revit) and Photoshop + Illustrator for graphic design. I like doing graphic design on Hackforums for some money, as it isn't too boring and people tell me they like it. I see myself as a pretty relaxed individual. I meet required dates, I keep my promises and I am a loyal person who you can trust. That pretty much sums up my application. Any feedback is required, good or constructive. Thanks!

That pretty much sums up my application. Any feedback is appreciated, good or constructive. Thanks!

Mula B - *February 7, 2014, 1:10 am*

Elaborate on your skillset:I am good at; Retros,
Basic C# Coding,
Basic php Coding and
Basic .css and html
Tell us why you would be a valuable asset: I would be a Valuable Asset in such cases where you may need a Simple C# code or a html or php. (Like i said its basic not advanced pr0)
Elaborate on your achievements and future goals: To be honest, My goals and Achievements in life is to get a nice job, nice car and have a wife and make money online, Also i want to own one of the popular habbo retros.
Tell us about yourself: Well I'm a 15 year old who has a couple of friends, I know more about IT then my High school/College tutor ever does, I love being online and talking to people because Online people dont care what you look like and for that, The Internet molded me into who I am, Without the Internet and the Anonymous Group my eyes would still be shut The Anonymous have told the truth and fore that I am greatful; On another thing I'm in Cadets and I love to be online... obvs

DeCieVe™ - *February 8, 2014, 11:40 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your skillset: One of my best and most important attributes or 'Skillsets' in my view would have to be my ability to bypass system. When it comes to hacking I would have to say i have many different skills that would allow me to be a helpful member within Legion, I am obviously able to do the average Skiddy activities, DDosing, Doxing, and things similar, yet I have some certain skills i'll list below.

Social Engineering
I would say this is one of my best talents, I have used my ability to manipulate people's minds and change the way they think since I was around 7. Social Engineering has been something I've not only used to 'Get free stuff online' or 'Get a full refund from Amazon' but has been something I have used to make my life easier, controlling people and changing their mindset Online and Offline.

System Bypassing to make money
This isn't a feature that I would say has an exact name for it, I considered calling it 'Money Making' but that's slightly different. Throughout the majority of my life I have been able to make large sums of money at young ages from bypassing systems. At the age of 12 I made $300 in a single day using the Adsense system and got paid $700 within a month. And i still continue to learn and earn by abusing the systems to my own advantage, I see this as something that is a good attribute for any person.

Leadership, Control, Dedication
As you're asking for my skills, I will list this as one of the things I'm best at. Leadership has been one of my many talents that I have always treasured. No matter what it is, I have always been extremely capable of organizing and creating large groups or inventing methods, and keeping them how i want them. Not only that, I find Control as a huge aspect of why my leadership skills have helped me, I have always been able to keep control of any situation, and I have many reasons to why i'm good at this that i'll list later. Dedication is my final asset, no matter what it is, anything I am or feel a part of, I work my hardest to help, whether it's donating large sums of money, or spending years learning.

There are smaller things I'm able to do, but I can assure you my talents are unlimited, I can learn anything if I'm given the chance to do so. Learning is something I'm interested in.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:I feel I would be a valuable asset as I am always eager and ready to learn, and put full dedication into any instruction, group, or even situation i'm placed into. Legion has always been a group I've taken huge interest in and I would be honored to be a part of it.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:As i stated before I feel my social engineering and manipulation skills are something that have helped me to get to the places I am today. Since I was about 5 I have dedicated my internet life to making money online and learning how to hack, one of my greatest achievements was probably starting TrapR4T, my current hacking organization that is based around removing those who abuse power or authority. Yet i have had many successful things take place within my life such as my Money Making methods, where i made over $50,000 in 7 months using a private method. My future goals are to increase my knowledge of hacking, and make a decent amount of income so i can expand and improve not only my life, but those around me.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us about yourself:My Internet name is DeCieVe, I live in the United Kingdom, I have spent my entire life learning to hack, and create income online and have a huge passion for computing. The internet is much easier for me as I have a certain problem that means I miss emotions such as guilt, being the reason I am able to do what I do without a problem. I have run several large Networks going from Economy to Hacking and I am extremely interested in becoming a member of Legion.

iVision - *February 9, 2014, 5:23 am*

Elaborate on your skillset: C/C# and a bit of x86 ASM. Relative knowledge in programming, especially Network (Programming and Attacks). With relative I mean compared to this forum, not saying I'm the best but I consider myself not as a new coder or something.
Tell us why you would be a valuable asset: I can mentor, teach, explain things and help developers achieve their goal, look at a problem in a different perspective, tell them what to do before their ultimate great program.
Elaborate on your achievements and future goals: Not sure to be honest on my achievements, every solved problem is an achievement. I don't really have a goal, although I cannot wait to go study (Technical) Computer Science (Embedded systems, robotics, developing etc..)
Tell us about yourself: I like to work hard, learn new stuff, help people. I'm relaxed person and like to play guitar, not sure what else to add.. Uhm I'm 16 years old, I already learned most things they teach you at the first year of Computer Science (I've been told by someone who does it right now :P). Also I am amazed by physics and science.

Regards,
Ps: Will I get a message even when denied or how does this work? Never been in a group but looking forward to learn new things and maybe work with someone on a project.

.jpg.exe - *February 9, 2014, 7:09 am*

Elaborate on your skillset:

Ratting
I Have recently been reading a few free E-books on how to RAT people and hopefully. Soon I will purchase a new PC and Then I hope to start a Botnet
of my own. I am still currently learning about RAT's so I apologize if i have used the incorrect termanology

E-Whoring
I've tried E-whoring many times and only made little amounts. I understand how its done and know it can be a great source of income if you put time in and effort into it. I personally think there are much quicker, Time efficient ways of making money.

Social Engineering
Social Engineering was probably one of my first skills I Picked up from joining Hackforums. I feel I am very good at Manipulating vulnerable people into thinking I'm helping them when they are really falling into my traps.

Web Design
I have a basic understanding of HTML and CSS. I have self taught myself these skills and would be very happy to learn more.

Graphic Design
I Have a good Understanding of Photoshop and all of the tools, Filters etc. I am very confident with making Logos, Banners, Userbars and much more. I have tried to learn After effects so I can produce HQ Motion Graphics but I get very confused with all of the options etc. This is a Self taught skill.

Radio
I know this is Useless on this forums but I am very confident with online radio stations. I have managed and DJ'd on Many online radio's and Know how a online radio station functions etc.

Tell us why you would be a valuable asset:
I feel I would be a valued asset to this group as I treat everyone with great respect and try to help everyone as much as I can If I understand the area they need help with. I also think I would be a great member for the Group as I'm always happy to learn new skills. with every Job/Project I'm given I will always put 100% into everything I do.

Elaborate on your achievements and future goals:
In the future there are many goals I wish to achieve. One of these is to create my own Radio Station and hopefully launch it as a Real Business. I would love to do this now but I am a College student and cannot afford the upkeep of it. I would also love to move over to the US.

Tell us about yourself: I'm a 16 year old from the United Kingdom. I'm a college student currently studying Computing. I have always enjoyed Hacking and other Black Hat strategies. I enjoy Outdoor sports like; Football and Tennis. I also love kayaking and other Watersports and would like to hopefully buy myself a Jetski.

Thank you for your time and I Hope you consider me into Legion,

xVulnerable - *February 9, 2014, 5:22 pm*

Good luck to all applicants make sure you put real time and effort into your applications!

roke29 - *February 10, 2014, 1:06 am*

Elaborate on your skillset:
Regarding security area I can say I'm a newbie, I know things about anonimity, cracking wirelesses and stuff like that. I'm looking very much to develop myself in this are.
I'm a very good designer in PS/Illustrator/Indesign. I can prove that since I have even work experience in the field.
Programming skills: Basic Java/C++.
Markup Languages Skills: HTML/CSS
I'm a good problem solver. Though I don't have knowledge about security I'm a fast learner and I can prove that. I am able to absorb as much info as I can to develop myself in this area. I am really interested to learn about pentesting, to learn more about anonimity, networking and basically to discover more about how the things go around the internet.
Tell us why you would be a valuable asset:
I have to offer my design skills at first, knowledge about computers and operating systems as far as I know. I also can offer to the group access to web/psd/office templates. I can offer help with what I can and with my methods of getting free vpses or stuff like that.
Elaborate on your achievements and future goals:
In the future I wanna become a Software Developer and a Security Analyst as well. I'm now working on getting my diploma in Computer Science.
Tell us about yourself:
Fun, outcoing, willing to improve and to make friends, a good team-player, lazy sometimes, with a great desire to gain knowledge. I would be very happy to be a legion student and I will always try to help anyone as much as I can. You can learn more about me just by adding me into the group.

LE: Social engeneering I don't even bother to talk about since it's something that all ppl seem to say but I still haven't found someone that takes advantage of it like a pro. I have some SE skills that I use for personal purposes. If someone is willing to learn more about this I can learn the way of persuasion since I also have experience in convincing people to believe what I say. I am a debater way more than I'm a programmer and I know how to always show solid proof in order to trick people to know what I know.

g????™ - *February 11, 2014, 9:12 am*

Elaborate on your skillset: I have many skills, such as coding I know; PHP HTML SQL VB. I also have been Ratting for a few years I know that's basic but its a skill i can SQLi (learning still) http://runerealm.co.uk I can do complex hijacks of account I'm a very well set Dox'er & i root a lot of servers recently to mess about with.

Tell us why you would be a valuable asset: I would be a valuable asset to the group because I can bring good rep to you I can be Online 24/7 to answer questions I am a very active member of the forum I post at least 6 times a day, and I'm a very professional and calm and funny character.

Elaborate on your achievements and future goals: I have got a very good and successful stress testing service I have made properly the most successful Skype resolver program on HF Here.

Tell us about yourself: I am a very funny and calm person I do not rise to pathetic argument I am also very professional I admit to my mistakes never lie and I get told I'm sweet and caring of most girl ;) but again I am calm and professional and a funny person.

Rasbora - *February 11, 2014, 8:36 pm*

Elaborate on your skillset:
My skillset is mainly focused on one thing, which would be Server Stress Testing. I am not to bad at other things as well, mainly network-related, I am definitely not an awful webmaster, now my way around UNIX. I am pretty knowledgeable with how websites run, and coding-wise I am a novice at best in PHP (Of course I understand CSS / HTML, however they are not really programming / scripting languages). If there is one thing I enjoy it is booters, I have a VERY good idea of how basically any DoS method out there works, coming back to my networking related skills, Denial of Service is definitely my field of expertise.

Tell us why you would be a valuable asset:

I aim to exceed anybody's expectations, set peoples hopes high and then go higher, that is my attitude with any of my products, as it is with this usergroup. I am very active, and can surely bring some knowledge about numerous things in (Once again, mainly SST related). Should anyone have any questions about anything, how to setup an attack server, website, help with anything web-related, I can assist them without hesitation. I would definitely be something that would only represent the highest of quality to Legion.

Elaborate on your achievements and future goals:
My goals are set for long-term success. I plan on enrolling in networking courses very soon, and eventually would like to start my own datacenter / ISP. (I have never taken any sort of computer / IT course in my life, so actually sitting down and learning is going to be a great experience).

Tell us about yourself: There really is not much to say. I am mainly here for learning, however I would love teaching what I know to others and helping people out. I am definitely not afraid to speak my mind, and exposing corruption is something I am rather good at. There is a video of me on the internet of where I was stuck inside some girls closet for 4 hours which many people can't say about themselves.

Well, he is Anonymous' minion. Browny points count with him. WINK WINK, YEAH ACROZ

Devsoft™ - *February 12, 2014, 10:08 am*

Elaborate on your skillset: PHP, MySQL, HTML(5), CSS(3), JavaScript, Jquery, AJAX - everything web-development based. Also experienced in web-site security, secured payments, and more. Since I know how to code them, I also know how to "hack" them.

Tell us why you would be a valuable asset: I am an active member, who not just takes, but also contributes back. I am also pretty friendly & communicable.

Elaborate on your achievements and future goals: My goal is to continue being successful and improve in both spheres (web-development & hacking).

Tell us about yourself: I am successful web-developer for 5 years, and I will continue doing it, by improving day by day. I actually like to help other people if I am able to, and also I enjoy Releasing stuff, instead of keeping them private. Thank you for reading!

Zulaf - *February 12, 2014, 2:38 pm*

(Feb 12, 2014 03:59 AM)SHADOW REALM Wrote: *[CITE]* Like how your word isn't worth anything rofl
I don't understand why you're questioning the administrator of legion.

#Success - *February 12, 2014, 2:38 pm*

Elaborate on your skillset: Well my skill set hacking related would be the fact that I have extensive knowledge in CSS and HTML. I have been learning and practicing with those two languages for three years now so I feel confident with those two. I don't know if those two things can be considered as one of the skill sets you are you looking for but they are the two that i can actually say is a skill of mine.

Tell us why you would be a valuable asset: Why would I be of value to Legion? I feel like I would be a valuable asset to Legion because I feel like I have knowledge that other people can benefit from, and if accepted I would be more then happy to share it with my fellow group members.

Elaborate on your achievements and future goals: My achievements in life that I am most proud of would probably be my achievements in academics. I am a junior in highschool who has had the chance to enroll in college early as a part time student while still going to highschool. My grade point average is a 3.8, and it continues to rise, because my knowledge only increases as the days go by.

As for my future goals i really just want to be successful. It doesn't have to be me making millions, because the odds of that happening are pretty slim. I just want to be successful enough so that I can live a comfortable life not having to worry about financial troubles.

Tell us about yourself: I think to start off I'll tell you how I came about finding HackForums. It was December of 2012, and like everyone else that joined HackForums I wanted to be a hacker. So I signed up, and posted a few noobish threads. Then for some reason I just stopped signing on to the forum. I was gone for close to a year. I don't remember why I came back I just did and I saw HackForums for what it really was which in my opinion is a great community full of people with a lot of the same interests as me. Now a little about myself my name is Travis, and I am 17 years old. Like I said already I am a junior in high school currently doing dual enrollment so I am in High school full time and college part time. Grades are my top priority in life I try my hardest in everything school, sports you name it. If I know how to do I will do it, and I'll do it to the best of my ability and wont half ass anything. I am a very open minded person who is willing to try anything. A lot of my friends consider me to be a very kind and caring person. You could say it's true I love to help other people and teach them new things. My only real goal in life at the time is for me to grow up and be successful.

Darkwin - *February 12, 2014, 6:55 pm*

I've applied to the student program more than 3 times and i'm never accepted which leads me to ask, What exactly is asked of an student?

Isn't that exactly what your doing now? Yes I'm now also however I'd just like to point out that Anonymous or any other legion member could take care of this themself.

Rapist?

Karnaugh - *February 13, 2014, 10:07 am*

Hello,

Social Engineering skills count to join this group? I'm not talking about getting free products to your home, I am talking about actual human manipulation.

Mad76e - *February 13, 2014, 10:29 am*

(Feb 13, 2014 11:07 AM)Genovese Wrote: *[CITE]* Hello,

Social Engineering skills count to join this group? I'm not talking about getting free products to your home, I am talking about actual human manipulation.

I use SE in my hacking sometimes. Of course it´s important for one's success rate. The more you know about a person / company, the greater the chance of finding the person's credentials

(Feb 12, 2014 07:55 PM)Darkwin Wrote: *[CITE]* I've applied to the student program more than 3 times and i'm never accepted which leads me to ask, What exactly is asked of an student?

Hi. I have not viewed your app, but here is a couple of tip to you all

"Tell us why you would be a valuable asset" Well why do you want to join, and what you can do for Legion aswell for yourself. Do you have a passion for something you can write it here

Elaborate on your achievements and future goals What do you want to do in the future, is it to work as an pentester or something, write it here. Tell us if you're accomplished something that you're proud of, and explain why

Tell us about yourself: 4-5 lines about who you are. Now with that said, no novel writing and not 2 lines, OK

GOLDEN RULES
Do not elaborate on your gaming skills or GFX. Damn hacking has nothing to do about how good you are @ gaming ffs

Here are 2 good apps.. Take a look
https://hackforums.net/showthread.php?tid=3542998&pid=36400305#pid36400305
https://hackforums.net/showthread.php?tid=3542998&pid=36402764#pid36402764

Remember
Legion is a hacking group. that's why the mentors/teachers will test your skills in a PM (No worry, we just ask basic stuff. You will need to know basic stuff. Fail = you're to far behind)

My personal thoughts
Ratting, E-Whoring, Graphic Design, Video Gaming = NOT hacking in my eyes, however Ratting may contain a element of intrest

Ray Reddington - *February 13, 2014, 1:04 pm*
[img]http://feb.imghost.us/DQ3C.png[/img]
Elaborate on your skillset:
1) Programming: C#. I've been coding in C# for about 7 months now. I say I am at an intermediate level. I code independent projects now and then but mostly code realistic projects in class.

2) Social Engineering: I'm quite good at social engineering. I often trick people in my school to get what I want, especially with teachers. I also used this skill through the phone with several companies such as Microsoft.

3) Basic Photoshop skills: I have some skills with Photoshop. I have created ID Replicas over time that were sold to fellow friends to use for some plays and shows that actually fooled many people to thinking they're real.

4) RAT'ing and eWhoring: I don't know if this counts as a skill but I RAT and eWhore now and then. I have a method I am working on for eWhoring that might become very successful that could lead to hundreds or even thousands of dollars a day so I guess that counts as a skill.

Tell us why you would be a valuable asset: I would be a valuable asset by being an active and providing member. I am on my computer almost everyday and will have time for others. I'm a nice and chill guy to talk to if you ever need me.

Elaborate on your achievements and future goals: My achievements include making lots of money ever since I joined HackForums, using some of the skill I learned from here. I have many future goals. A big goal is becoming successful in my desired line of work, Computer Science. I work towards this goals by taking a couple online courses from MIT, Stanford, and Microsoft Virtual

Academy. These online courses include Cryptography, Networking, and Programming. I plan to use what I learn from these courses to also help, benefit, and give to my fellow HackForums community.

Tell us about yourself: My name is Michael Alan Westen. I am 15 years old, 16 in April. I always had a thing for computers since I was just 10. I knew more about computers than my whole family at that age. Ever since then, I spend as much time as I can adding to my knowledge of computers. I am also on a soccer team because I love soccer too so I'm quite a busy dude. I love to dedicate my time to things I love, especially if it will benefit me and/or others. I do what I can for those who need it, such as my community, on and off the internet. When I was 13, I joined HackForums. It was such a big step-up because my knowledge expanded like I never knew it would. I learn new things everyday thanks to the wonderful community. I always saw groups and wished I would be apart of one because working and learning independently gets boring sometimes. I always wanted to work together with others. I also take a couple online courses from MIT, Stanford, and Microsoft Virtual Academy. These online courses include Cryptography, Networking, and Programming. In the summer, I plan to begin some projects when I am much more experienced in the programming field. I love to take on challenges. I always finish what I start. I hate leaving things unfinished. Like I said before, I would love to work with members who share the same hobbies as me. However, there aren't many people in my school who share the same hobbies as me. I have one or two friends from my Computer Science class but that's it. I would love to know I have a group to rely on if I ever need help with something that I can't figure out or just to have some friends to chat with that share my interests. A dream that I always had was to work on a project, together, with a group of people and make it successful. The word success means a lot to me. I see myself very successful in the future because making money for doing what you love is an actual career. I'd like to work somewhere in the fields of being a Computer and Information Systems Manager or Software Developer. I'm still young but I see a bright future. Making money while having a career is just a bonus. You do what you love with the bonus of getting paid for it. THAT is a dream come true. I plan to go for an internship this summer (they do have internships for high school students). Like I said, I love to challenge myself and actually putting myself in the field with experienced workers. That's why I would like to join a group now to know how it feels like to work with a group.

Delevingne - *February 14, 2014, 5:20 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Remote Administration Tool
RAT-ing was one of the first things I started to learn when I joined HackForums. It was pretty easy but not really active doing that anymore.
But I still think about spreading methods and sell them on HackForums. I also have been BlackShades Adminisrator for ~2 months.

Server Stress Testing
Server stress testing is something intrested me a lot, I've been Co-owner on Elyxa-stresser and currently Support on BigBangBooter.
I was also co-owner of avrBooter, wich wasn't a success.

Graphics
I've doing GFX-work for a long time, and still doing much design work. I still improve everyday and learn other things.
I mostly make thread-designs for random people, but mostly for friends. I never charge friends money.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
I got too much free time, and I can share what I know till now. I wanna learn more and more and have the time and potentional for it.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
My future goals are to learn more about programming, and more about computers.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I am 16-years old and come from The Netherlands. Most people know me from the name "Dalo" without "Sec". Most of my time
I spent on HackForums browing random threads. I have too much free time wich bores me to dead.

Thank you,
- DaloSec -

Rap!st - *February 14, 2014, 6:14 am*

Elaborate on your skillset:

Program Languages I'm familiar with different coding languages such as HTML(5), CSS, PHP, MySQL, Java and Javascript. I'm still keeping myself busy to improve my knowledge regarding several
other languages such as C# and Batch scripting. I kept myself busy studying these languages for atleast 5 years and I'll definitely continue with this.

I'm currently using these languages to offer people my Web-Service which includes editing / creating websites and coding scripts / systems such as a secure login system or leaderboard as example. I'm also able to solve or prevent errors related to pieces code in a website / system. I've also got some security experienced regarding this with as example a Login system which should prevent itself for SQL Injections, Session Hijacking ,Network Eavesdropping , Cross Site Scripting and Brute Force Attacks.

Hacking related A long time I kept myself busy studying hacking related subjects which I really enjoyed. I'm familiar with installing, configuring, modifying and spreading of different Remote administration tools. I successfully used different kind of MySQL injections to grant myself access into someone's database. I've also successfully defaced a Runescape Private Server once which was really nice to do. Pentesting was the latest subject I also kept myself busy with which I don't fully constrain yet but I'm planning to soon. I'm also in The Empire hacking section where I expect to learn alot.

Different then many others I like to know how something works and how it could be executed instead of only knowing how to execute something. As example I prefer to know what a Distributed denial of service is and how it works then simply buying a license on a booter website.

Computer related.
I've had alot of errors and issues myself regarding the usage of a Computer including finding and deleting Malware as example. Due to these issues and errors I'm well known
how to fix the most common problems on an useful way. I can portforward on almost every router lately which can be really useful in case someone needs help with it. I've had several kinds of Virtual Private Servers with different operation systems such as Windows and Linux which really expanded

my knowledge regarding the basics of Linux.
I know how to use the command prompt properly which makes it alot easier and smoother while using an Operating System like Windows as example.

Loyality and Communication
I see Loyality and Communication as an useful skillset since It's required and / or useful in almost every situation. I always try to get the best out of something for both sides. In my opinion Loyality is needed to reach your goal on a proper way instead of unnecessary escalating a situation.
I'm highly convinced that a well maintained relation always leads into success, fun and trust for both sides.

I'm highly convinced that Being mature and having a proffesional appeareance will mostly lead into success.

Tell us why you would be a valuable asset:

I can't say with certainty that I should be accepted since I'm not sure how The Legion thinks about me, my skills and my appearance. also I'm not sure if The Legion thinks I'm a valuable asset for their group. well do I try to be and do I hope I am. The reason I think I could be a valuable asset and could be accepted to The Legion is because I'd like to have a chance to proof myself towards the other members, I want to share / increase my knowledge and experience with the rest. Also I'd like to enjoy communicating with the members to create a nice, professional and fun relation with the others. I'm daily active in several sections related to my interests, and I'm always willing to help people if I'm able to.
I'm not a proffesional hacker at all. I have skills in several subjects however I think I could and should improve them. I'd like to improve my skills by learning from other Legion members and I'd like to learn some different subjects related to Hacking where The Legion would be a great help! I'm already in the Hacking section in The Empire where I'm also trying to improve my skill set daily.

Elaborate on your achievements and future goals:

Achievements Having the hacking skills I've got at the moment which are stated above is already a nice achievement however I'd still like to improve this. Also being able to fully understand how a Remote Administration Tools works as example was one of my achievements. As I've said before I'd like to fully know how it works instead of blindy executing a program. Gathering all these hacking information is also something I see as an achievement since it help me to increase my knowledge related to the art of Hacking. My first website defacing was something that really motivated me to go on with hacking subjects. getting someone ofline by ddosing him was really funny and instructive.

Future goals My first goal related to Hacking is joining The Legion in order to learn from other members and share the knowledge I've got with the members who ain't got experience related to these subjects. Another goal of me is being a proffesional and experienced hacker who knows what he's doing and being able to earn some money with this. The best user example I can give is Anonymous ofcourse. To be more detailed about hacking goals, I'd like to be experienced in SQL injections, retrieving database access and fully understand Pentesting. Since learning new languages such as Ruby and C++ will be really helpfull with things like this I'm planning to learn these aswell.

Tell us about yourself:

I'm a 17 years old man from The Netherlands. I enjoy browsing the internet and increase my knowledge in different areas. Solving problems and helping people is something I like to do. I'm a patient guy who wants to know everything about a subject where I'm busy with at that moment instead of trying / executing things blindly.
I enjoy watching movies and series which I do quite often lately. I use to play games alot such as Call of duty and Battlefield but I recently quitted gaming to focus myself on new subjects like my Web-Service, designing and studying other program languages.

The reason I am who I am today.
I think the reason I am who I am today is hard to explain. One of the biggest poignant reason is that I've learned from my own and from others mistakes. I've currently had 17years of time to think about who I wanted to be and which path I'd like to choose which is also a big reason for who I am today.

Where do your priorities in life lie? What is most important to you?
The most important thing in my life is becoming a happy and successful person. I'd like to have a huge knowledge regarding the subjects related to my interests to use this daily. I'm willing to work and spend time in these goals in order to reach them.

What caused you to stay active and be part of the community on Hackforums after first joining? As stated before, I'm a person who likes to increase and share my knowledge. I'd like to communicate in a friendly community in order to reach my goals. Since Hackforums is a great source for information which also has plenty of skilled and loyal members I decided to stay and work on my reputation here. (I don't mean the Rep system)
One of my goals is joining a skilled, nice and known usergroup from the first day I joined Hackforums to share / increase my knowledge and having fun with the members. This is also a reason I'm applying for The Legion.

Komodo - *February 14, 2014, 5:06 pm*
Elaborate on your skillset:My skillset is Ratting, Coding, Crypting, etc. I have skills in development aswell.
Tell us why you would be a valuable asset:I believe i would be a valuable asset, because i help many people daily, and would be a great part of the team.
Elaborate on your achievements and future goals:My achivments as for right now, are getting accepted into Ub3r and possible this group. I have started development on a new Rat, developed using .Net . I hope this might be successful, and might start work on a Crypter in the future.
Tell us about yourself:I am a Hacking Helper, i help multiple people daily, and unlike others i will help you any way i can for free. I love being on HackFourms, and helping people. HackForums is like my second home.

Apex™ - *February 15, 2014, 9:39 am*

Going to be brief with this.

Elaborate on your skillset:

- RATing
  - Moderately proficient with RATing.

- Cryptography
  - Well-rounded with crypters.
  - Entry-level knowledge with decrypting.

Social Engineering / DOXing
  - I can SE pretty much any information out of someone, given the appropriate time to do so. And with that, I can effectively DOX someone.

- SQLi
  - Have successfully broken into multiple databases using SQLi.

- Programming
  - Lua
  - Python
  - Batch
  - Learning Objective-C

- Moderate Knowledge of Operating Systems
  - Backtrack 5
  - Ubuntu
  - Windows
  - OS X
  - iOS
  - Android

- e-Whoring
  - Simply put, I know how to eWhore, I just choose not to do it. It's not exactly my cup of tea.

Tell us why you would be a valuable asset:

Thing is, I probably wouldn't be; just yet anyway. I'm "moldable". I pick things up very quickly. And as a Legion Student, you can MOLD me into as valuable of an asset as you see fit.

Elaborate on your achievements and future goals:

My achievements aren't anything extravagant. Learning all of my skill-sets as a whole is to me; personally, a pretty decent achievement. I, as a 16 year-old know a whole lot more than the average ADULT when it comes to computers. I also have a CIW certification that I actually had to go to school for (got me 3 college credits). I've built two custom gaming rigs, and lord knows how many computers I've taken apart and reassembled, all of which were still fully functional afterwards.

As for future goals, I'm just looking to learn to gain more and more knowledge throughout the span of my life. To better my self as a whole. There's not really a specific goal I have in mind.

Tell us about yourself:

- Computers. Whether it be Hardware or Software, I live and breathe computers. All the money I make is from doing computer repairs from home, or e-Commerce.

- Everyone in the internet either calls me Apex, or Prophet. A sort of "nickname" I suppose.

- I'm 16, with the maturity level of a 20 year-old. If you don't believe it I suppose you'll have to find out for yourself.

- I absolutely enjoy utilizing my skill-sets to assist others. Which is why you'll find that I'm the most active in the "Beginner Hacking" section of the Hack Forums. However, my altruistic nature is not limited to just these forums. It's pretty much anywhere I go. If I can help, I"ll be glad to lend a hand.

Jason™ - *February 15, 2014, 5:38 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset: As many of the members here know much about ratting, graphics, and much more I like to think of myself as learning each day that I am on and each time that I talk to members. Browsing the forums and talking to members for hours a day seems to bring a lot of knowledge to me. For example; while browsing the forums the other day I came across Acroz hacking services thread where (he/she) will mentor the buyer on how to hack something or a specific service. I purchased a service from (him/her) and am currently learning about what I purchased. Learning new things like this daily is what I am here for, but as well as using my current skills. I run a website which is my main thread and it is a Social Networking Services section. Though I have a coder do most of the background work, I also do plenty of work. I am currently working on getting some SEO done, I deal with customer support, problems, advertising etc. I believe I am pretty good at SE. I am very good at talking to people which also comes in as a good factor for my website and customer support. As for the graphics section of the forums, let's be honest I can't do graphics at all it is just not a skill that I am good at. I play games here and there on the side, but nothing too much. I'm definitely looking forward to learn much more as each day goes on!

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset: I believe being in Legion is something that would be very good for a person like myself. Learning new skills every day, mastering others, working with people and much more is something that I really do love to do. Hopefully some day with all of the skills that I learn / learned / learning, I will be able to help others and teach them as I am being taught now. I believe having me would be a valuable asset because I am not applying to join this group just to join a group. I am applying to get something out of this, learn, and help others who might need help as well. I believe improving and learning is a big thing in life, and is something that I would really like to do.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals: As mentioned many times in this post, my current achievement is having my website up and running. Having hundreds of customers that are satisfied with my services and people that keep coming back to purchase more shows that my hard work and effort has gone into play. After working at it for a long time and trying to get a website and services like I have now it has finally came together a month or so ago and was ready for sales. This was a big achievement for me. Some of my future goals which have also been stated a few times in this thread is to keep learning new skills and improving my current ones. By doing this, I will hopefully be able to expand my knowledge and start more projects like my current website. Another goal of mine is to be able to teach people future skills that I have learned or being taught, because I feel many of them are important and more people should be taught and learn more about them.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: My name is Jason, as you can probably tell from my username. I live in the East Coast united states, and I enjoy family and friends (this includes online friends). My brothers and sisters play sports, but I'm just not into sports. I like online, gaming, browsing, and learning new things. That intrigues me more than playing a sport. My family seems to understand this as they do support me, and do not force me to play a sport. I run a Social Networking Services website and have been a successful owner of many servers. I plan to use my knowledge and skills to help others and expand new things in my life, I haven't figured out what but when I do I will work hard and strive towards that certain thing. I browse various sections of the forums; Social Networking Services section, the lounge, and basically anything that has been recently posted on lately.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Thank you for taking the time to read my application, Jason.

Peanuthero - *February 15, 2014, 7:23 pm*

Elaborate on your skillset: I am a networking technician. I currently manages my business offshore hosting. I sql html php code. I know a lot about network. I have two Cisco and CompTIA certification. I can do complex intrusion in some big network. I can setting up big network, Botnet, Webhosting and anything like that. Tell us why you would be a valuable asset: When someone in the group need help with anything about network i can help him without problem. Elaborate on your achievements and future goals: I had a lot of private server and a lot of project i done in my life. And every of those have work perfectly fine. My future goal its to have my own big offshore hosting. Tell us about yourself: Im 19years old. I live in moldova. Im a very serious person i dont realy like to troll or anything i dont love to lose my time.

Mt. Everest - *February 17, 2014, 11:04 am*

Elaborate on your skillset:
I am wanting to start learning C# and C++ to code my own crypter. I do not have any particular skill set as of now and would not want to lie about it. I want to learn and will be purchasing a few books in the near future to aid in my goal. I am going to be very dedicated to learning these languages and would love to have some help in this goal.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
As of now I do not feel I would be very valuable but, maybe in the future after I learn these languages I could be helpful and valuable for helping other people with the language. I am a fast learner and can pick up on things rather quickly. I am very concentrated when learning and very dedicated to my projects. I seek for quality not quantity meaning I like my projects to be completed to the highest standards before releasing and even then I like to release into beta stages.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
My future goals is to start a whole line of programs. My first goal however like I stated above is going to be a crypter. I do not like to set too high of goals just because I have been disappointed many times in my life and hate the feeling. I like to stay somewhat reasonable for my skills and set higher goals as I go.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I am 18. I have a kid and a GF. I dropped out of school when my son was born to help out with him and havent went back. I tested for my GED and got higher than college scores. They are offering me a program to go to college and they will pay for my entry fees as well as most of my books. I am a vivid gamer and will be purchasing a computer specifically for this Thursday. I have made almost all of my money online and have been very dedicated to making money to support my sons needs. I love learning and love to learn new things. My enthusiasm for computer knowledge is beyond

explanation and is my one desire in life to learn more about. I feel that we havent even scratched the surface of what we can accomplish with the technology we have today.
Thank you for reading :)

Axon™ - *February 17, 2014, 10:01 pm*
Elaborate on your skillset: My main Skillsets are Programming, Hacking, and Social Engineering.

Tell us why you would be a valuable asset: My ability and eagerness to learn and help others is an extremely valuable asset. My intentions here on Hack Forums are to better the quality of the site, its members, and myself. I wish to propel myself head on into challenges to overcome them and raise my self esteem knowing that with that set in mind, I can achieve my goals.

Elaborate on your achievements and future goals:Many of the achievements that I have completed were personal goals for myself. I have completely self taught myself the following languages based on my interest to learn them. I have completely self taught myself C#, PHP, perl, Java, C, JavaScript, and minor amounts of C++.

Tell us about yourself: I have recently joined Hack Forums on a new account a few months ago. There were multiple reasons as to why I swapped over on accounts. The main one was to have a clean slate on my reputation with all the burned bridges I had. I wanted to step up, be the bigger person and move on to help others more. So I created "Axon". The reason I chose the alias Axon™ was to help promote my service while show others that I custom code things, help community members, and that I am a very High Quality member. It would be a true honor to become a member of "Legion" And I hope that the reviewer of my application takes me into full consideration. Thank you for reading this and good luck to any other use that applies as well!

Any other information can be submitted upon request! Thanks again

Pink. - *February 19, 2014, 9:41 am*

Not today my sir. Anyway, nice brony award ?

Eeluminati - *February 19, 2014, 10:17 pm*
Wow this is such an amazing group. I would love to be a part of it.

TSX - *February 20, 2014, 11:34 am*
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
I am a beginner Python programmer and am pretty adept at learning new skills easily. I started out with programming at the age of 13 and been hopping around from language to language never fully mastering any as the situation sees fit. I started out programming Java for Runescape private servers, then eventually moved on to Visual Basic to create fake programs and web browsers etc. I also learned to set up basic forums and websites as well. I'm more of a jack of all trades, master of none.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I would be a valuable asset to Legion because unlike others who can be too prideful to take constructive criticism or advice I like to take in all opinions and use them to better myself not only as

a person, but a programmer as well. Also, I would try and participate in every group event and contribute as much as I can. Also, the little income I do receive I would try and use it in some way to benefit the group (i.e: buy hosting and give it to members for free and other ways as well). Besides monetary value, I enjoy to engage in the community and help others in any way that I can. Another way in which I can be an asset is that I like to bring different, new things to the community and introduce people to new, unorthodox ideas.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
I don't have many online achievements as I've always been the one who likes to sit and learn and never got far enough to contribute. However, one of my achievements was when I was younger I was a co-owner of a Runescape private server back when Runescape was a really popular game and it's servers as well. The server did pretty well and had 24/7 hosting at the time using a private windows server when it wasn't common. I would say that server paved the way for new features in servers that not all servers had at the time and we started. My future goals is to further develop my knowledge in Python and release a software that can change the way we use computers. As of now it's only an idea and I don't have all the details figured out yet so I won't go too into detail but the program is supposed to make computers easier to use and promote the learning of programming languages among kids.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself: I am a 17 year old Junior in highschool who works part time at a local fast-food restaurant and I spend my spare time online on HF trying to learn more than what I already do. I enjoy sports a lot so I'm frequently watching baseball games on tv. Apart from all that I like to play my ps3, watch netflix (seen nearly every tv show possible), or just browse in The Lounge. I am a community type of person and I enjoy lounges and intertwining myself in conversation or debates with other members. I'm usually always on my phone so I'm easily reachable and never go offline.
I look forward to seeing if I'm allowed to be a part of this group. Thanks for the opportunity!

Bluxy - *February 20, 2014, 1:15 pm*

Elaborate on your skillset:
< Webmastery & Basic Security />
I like to think of myself as a MyBB guru. I have used the MyBB forum software for over 4 years now and in that time I have developed a solid brick of knowledge by doing so. I am fascinated by the simplistic software it is unreal! Along side running community forums powered by MyBB, you have to learn many aspects such as security. I have always been on top of security; neither of the past forums I have ran have ever been hacked or exploited. I take security very serious, as I hope everyone does. With security comes more sub-routines such as DDOS protection, finding a secure website hoster, and researching website server specification. Not to mention I study Higher Computing Studies at school which has gave me enough knowledge of networking etc. To enhance my knowledge on security I hope to join as an apprentice under the Legion usergroup.

Programming
Over the years I have learned my fair share of website and software programming. In actual fact, I am leaving school next year to become a software engineer which will enable me to develop iOS applications, learn more advanced PHP and MySQL etc. My enthusiasm is for programming is unreal and I for definite know that this is what I want to do when I am older.

Good Computer in General Knowledge
Like I mentioned above, I study/have studied a continuous computing course ranging at different levels of difficulty. I now have a good base of knowledge which enables me to tell the difference between different servers by looking at their server specifications such as random access memory (RAM/main memory), backing storage, and so forth. Not to mention I can describe what spooling, file management and much more is in detail!

Tell us why you would be a valuable asset:
Why I would be a valuable asses to the Legion usergroup
I believe I would be a valuable asset to the Legion usergroup because I feel I would be an easy to teach student. Not only that, but I can provide tutorials within the MyBB/forum software and programming sectors. It would be my pleasure to share my experience and knowledge with the group.
Elaborate on your achievements and future goals:
Future goals of mine
To mingle with the Legion usergroup members and get to know most of you. Another goal of mine is to learn and hopefully not only elaborate on my current skills, but learn new ones. Hopefully the Legion usergroup is capable of that, which I most definitely think you are.
Tell us about yourself:
Here's a bit about me
There is not much to tell really. I am sixteen-years-old. Currently living in the United Kingdom. And am enthusiastic about learning new skills to broaden my mindset. I am currently in my second last year of school, hoping to leave and become a software engineer.
And that is that! ?

AnonSasquatch - *February 20, 2014, 3:28 pm*

Understand that the short length and lack of design of my application does not reflect my skillset. I do not believe in creating an application that is gilded, but utter waste underneath that gilded layer.

Elaborate on your skillset:

I am a very experienced coder, coding in tons of programming languages ranging from PPC ASM to C# to C. I am experienced in SQL injection and XSS attacks. I am responsible for an exploit that caused a $1.2 million dollar loss by Microsoft (PM me for more details, refuse to publicly disclose it). I have been social engineering since I was 12, and have been into doxing and related activities for the past two years. I also can reset any @AOL/@AIM email address within minutes.

Tell us why you would be a valuable asset:

I can provide vulnerabilities, assist in hacking, doxing, etc..., and much more. Providing my skillset, especially with programming in mind, I can automate processes that may not be easy to do by hand.

Elaborate on your achievements and future goals:

At the moment my achievements are the following: exploit in Microsoft (specifically Xbox) that caused a multi-million dollar loss. I have a zero day in AOL that'll allow me to reset any AOL, and it is only known by me. I can assist your hacking requests if they have any emails associated with AOL which will save lots of time. My future goals include obtaining a Bachelor's degree in Computer Science from a reputable college (I'm a senior in high school atm).

Tell us about yourself:

Hello, I'm Cory and I'm an eight-teen grey-hat 'hacker'. At the age of 12 I got into modding, social engineering, and coding. From there I've broadened my skillset and can find vulnerabilities easily. I've coded numerous applications for the Xbox 360 homebrew scene, and have generated over $5000 in revenue from modding on the Xbox 360 and hacking requests, just in the last year.

I also created an XBOX API for use of Xbox LIVE related projects.

Tell us about yourself: I am honest and I hate being scammers and being scammed.
I have a helping nature, and I spend way too much time on HF.
I also have an amazing PC setup, basics in my sig

Moji - *February 21, 2014, 6:46 pm*

Elaborate on your skillset:
Programming

I am currently taking a course in college that covers the basics on Programming, we are learning the languages Processing and Arduino. I am extremely keen on learning more on Programming as I find it extremely interesting and enjoyable.

Hardware

This is also a part of the course I am currently taking in college so my knowledge on this isn't the best, but is always expanding and I enjoy learning about how things work and looking inside them. Especially computers.

Sound and Video Editing

This is also part of the current course I am taking, I enjoy it but not as much as Programming. I enjoy the Sound Editing more than the Video as it requires a lot of time and concentration and I find it fun to play about with sounds.

Doxing

I am not going to say I can produce a High Quality 100% accurate Dox with little to no information to begin with. I know a reasonable amount on Doxing and where to find accurate information fairly easily.

Tell us why you would be a valuable asset:
I enjoy learning new things about my interests, which is anything to do with computers, but I also enjoy sharing my knowledge with others. I will help people in and out of the group as much as I possibly can. After all, knowledge is free. ?. I am always expanding on my knowledge in different

ways, wether it be reading a book on computers, looking at others work to see how it is done and to see if I can make it help better and many other ways.

Elaborate on your achievements and future goals:
I have learnt more about Programming, Editing and a little on Money Making over the past few weeks. I have always wanted to become a Software or Game Developer, it has always been my dream. I wish to keep expanding my knowledge in Programming Languages and hope one day to become a successful Developer
---
Tell us about yourself:
I am a quick learning, keen to learn new things that interest me. I am normally a friendly person, but if you treat me like shit you will receive it back.
Thank you very much for reading my application, good luck to all applicants ?

x$ploit - *February 22, 2014, 2:13 am*
Elaborate on your skillset:
Research, and the ability to adapt/learn quickly.
Computer networking (intermediate-advanced)
Computer hardware (advanced)
Computer software (advanced)
Information security (intermediate)
Penetration testing/ethical hacking (novice)
Lock picking (intermediate)
Social engineering (intermediate)
Linux (intermediate-advanced)
Programming:
Python (intermediate)
Ruby (novice)
Web design:
HTML5, CSS, javascript, jquery (advanced)
Those are just some of them related to the tech and infosec world. There is a lot more. I have over 6 years experience in the tech field and I am constantly learning more.

Tell us why you would be a valuable asset:
I constantly am striving to share my knowledge as well as gain more by researching and being observant. I go on hackforums at least once a day normally unless I'm out late with my girlfriend. I have been researching/job hunting a lot lately but once I feel I have gained adequate knowledge I will begin writing many tutorials and guides to prove to my self that I know things as well as to help others. I am an extremely fast learner. I enjoy researching computer security and I am constantly striving to learn more and more. I am currently earning money through my freelance webdesign company to get the Student V2 certification (http://www.elearnsecurity.com/course/penetration_testing_student/). Once I achieve that I am planning on earning my OSCP from offensive security.

Elaborate on your achievements and future goals:
I have completed 2 really nice IT related internship/training programs.
I have a letter of recommendation from the CEO of cisco.
I have built a relatively large professional network.
I have gained a nice amount of knowledge about anything I'm interested in. Yet I still need more.

As for future goals, I plan to get my masters in IT Security, and eventually open my own security consultant firm.

Tell us about yourself:
I am only 18 and I have over 6 years experience in the technology field, 4 years research/hobby and 2 years working/freelancing. I'm always researching online, in the library, bookstores etc. I also enjoy free online MOOC courses provided by websites such as coursera. Pretty soon I will be taking the Offensive Security PWK course and earning the OSCP certification for penetration testing, as well as getting my A+ certification paid for by my previous employer. I am planning on achieving my masters in IT Security through an online college once I get the money for it. I enjoy spending time with my girlfriend, niece and nephew, as well as going on longboarding trips and other outdoor activities such as camping.
I research many different subjects, I enjoy learning about chemistry, biology, physics, computer science, psychology, communication, and much more, knowledge is power. I appreciate many of natures gifts such as opium and mushrooms as they are form of enlightenment. I enjoy meditating, and esoteric arts such as alchemy (which is basically spiritualism mixed with basic chemistry). I recently made my own steam distiller and have been making alchemical elixirs from many different herbs.
I spend a lot of time in my room researching, but I also spend a lot of time out of the house with my girlfriend or other friends. I am highly interested in politics and have been working on an ideology that is somewhat a mix of Marxism and democracy. I'm not a huge gamer but I do enjoy a good game once in a while if I need to get my mind off things, the reason I don't play much is because I find it to be a waste of time, same as watching TV, they're just not things I enjoy doing too much.
I've been studying lock picking a lot lately and have gained a lot of knowledge in it very fast. My old roomate let me try out my skills on his house and I was able to open every single door, including some of the more advanced Schlage locks he had in his house (schlage makes very hard to pick locks). I am eventually planning to start an all in one security firm which means the firm would take any way possible to get into the company and find sensitive information, that would include pen testing the computer infrastructure, dumpster diving, breaking in, social engineering, spying, etc.
My personality type is an INTP, introverted, innovative, thinking, perceiving, http://www.personalitypage.com/INTP.html. That being said it's kind of hard for me to connect with people with out the psychological skills I have gained from research and practice. INTP's are generally very intelligent, we often go on tangents of thinking until we can find an answer to our own question. I have a new idea for a book I'd like to write about what it means to be human, and it's going to cover many of the things I have found in research, as well as thought of/created. I constantly strive to find why things the way they are, and how they could be improved.
I also take a lot of supplements such as nootropics (piracetam, oxiracetam, pramiracetam, noopept), huperzine A, choline, ginko biloba. All of those are cognitive enhancers. I don't use them on a chronic basis but I do use them quite often if I want to get things done as efficiently as possible.

Thanks for reading this small summary about me, I hope you're having a nice day.

Psychedel?c - *February 22, 2014, 3:06 am*
Elaborate on your skillset: I'm heavily into C++ and Java considering they are valuable skillsets in application/applet and game development. I'm currently learning C++ and some console languages but I'm pretty much familiar with Java so far.
Tell us why you would be a valuable asset: I learn very fast and am pretty much open to any new languages. I'm also a pretty mature and professional individual when it comes to business or any other type of social interaction.
Elaborate on your achievements and future goals: I currently have a GPA of 3.9 while excelling in math and computer science. As for my future goals I'm focusing towards getting into a nice Technical collage and get a masters degree in computer science.
Tell us about yourself: My name is Vincent I'll be 16 soon and have been interested in computers and technology since I was 9. I always like to solve problems, find the right piece of the puzzle. Thats why I've always love the Idea of development and hacking, controlling the system always sounded so cool to me. So this is my application for the Legion usergroup. Hope you consider me, if

not I understand. Thank you very much. -Vincent. Btw I don't do drugs even though my username might imply that lol.

Leonard Hofstadter - *February 22, 2014, 7:37 am*

Elaborate on your skillset

Android

This is what I live for, Android. There is not much Android which I do not know. From simply upgrading the stock OS a HTC Desire to to flashing a custom kernel on a Galaxy S4. I love every aspect about Android and learning a few new things can be interesting too. I am starting to work on Android Software just recently and find it very interesting. My knowledge would be great being passed on. My strongest part of Android would have to be hardware and also everything BUT flashing. At this moment in time I am getting taught the ins and outs of flashing devices, this is something that will help me on a day to day basis and really looking forward to completing it so I can share the knowledge.

I currently have the biggest thread in the Android section too, lots of great information available in here.

[Nexus] Nexus 5 - General Discussion - Accessories - 4.4 KitKat by Leonard Hofstadter

iOS

I have just bought myself an iPad and Jailbroken it. I am starting to learn iOS quite a bit in my day to day life now, this is a big step seeing as I have only owned Android devices. I am able to sort out ANY hardware issue on every iDevice, be it a loud speaker on a iPod Touch 1st Generation to the LCD on an iPhone 5s. I am able to repair most error codes that will appear on iTunes, some can be very tricky and some simply cannot be fixed. But would do my very best to find a positive outcome. But as I am still learning the iOS tricks of the trade, sometimes I will make an error :)

Hardware

Over the past year I am grown fond of hardware in consoles and electronics in general. If you put any gadget infront of me, it will be fixed. I have been doing my own hardware repairs and selling them on, I have made lots of money doing this and only seems to be getting more often. I have bought iPhones and Consoles and sold them to forum members, they were broken when first purchased but with my knowledge I have repaired and sold. I provide a 90 day warranty with every product I sell too. I have only had 1 return of a 360 where I changed the laser and then the HDMI port broke, completely unrelated to my repair but I still gave the customer a new console. I cannot wait to get my hands inside of a PS4, rip it apart and see the guts. Only time will tell.

Tell us why you would be a valuable asset

I would be able to bring great knowledge to the group itself and can let any member know my knowledge with ease. I am great on the forums and try to get involved with as much as possible, 100% of my work produced is to the highest of quality either it be an application or a simple shopping deal.

Elaborate on your achievements and future goals

To be 100% honest, online, not much. It is in real life the achievements mean the most to me. I can say I have not had many as it happens. I can say I recently passed my exams for Business and ICT Management and never thought I would do that, so that is great for me. I was scared of heights until a few months ago after I completed a Bungee Jump I lost my fear!
Here are a few photos from the event.
Spoiler (Click to View)

Tell us about yourself

My name is Nikki, I am 21 and from the UK. I am currently working as an RMA Technician at a big UK chain called CeX. I am a huge fan of the hit TV series The Big Bang Theory. Generally I am quite laid back, but that is not to say I am easy going. When stuff needs to be done, I am on it, no questions asked.

(Feb 22, 2014 08:43 AM)Aur? Wrote: [CITE] Great to see you applying for Legion Leo ! ?
Thanks dude. Time will tell, hopefully better then last time.

Slim Shady. - *February 22, 2014, 9:47 am*

Elaborate on your skillset: I am very good at social engineering mainly, I don't have any coding experience or anything like that. I am interested in learning how to, though.
Tell us why you would be a valuable asset: I am a trustworthy individual, and I never lie, I also care a lot about keeping everything professional and being mature in every situation.
Elaborate on your achievements and future goals: I scored above the 90th percentile on the SAT (US College Entrance Exam) as only a sophomore, and my future goal is to become a Special Agent for the F.B.I and do counter intelligence or cyber security.
Tell us about yourself: I am a sophomore in high school, I am going to be taking College Dual Enrollment classes next year, I plan to go to college to get a Masters or a BA degree in Computer Science with a minor in Psychology or criminology. I like to play video games and social engineer mostly.

LOVE - *February 22, 2014, 11:00 am*

Elaborate on your skillset:
I've been working with security of websites for a while now, as a side job. I am interested by all that it involves.

Tell us why you would be a valuable asset:
I've built up a serious customer base. I will be able to get Hackforums members small jobs, medium jobs, and huge jobs. This can be helpful for us all, and the most important is of course not the money, but the experience. Also, I have built up lot of experience in searching for security holes, and fixing them. This could be valuable for a lot of the members.

Elaborate on your achievements and future goals:
Well, my biggest achievement inside the security market will be the work I've done for the danish state. My own company is the official security responsible for the danish state "Hedensted

Kommune".
My current goal is to make security work for a country and not only a state.

Tell us about yourself:
I'm a guy named Daniel. I love computers, and what you can do with a computer. I wanna know it all, and therefor I am constantly learning. I can do a lot of different things, like graphic design, programming in lot of different languages, securing and hacking websites, and lot of others. I love how you can control everyone just by using a computer.

Acroz - *February 22, 2014, 4:39 pm*
Student Wave #9 has been invited.

If you where not accepted, you may re-apply.

Any application after this is subject to review for Student Wave #10.

Understalker - *February 22, 2014, 4:40 pm*
Student Wave #69 has been invited.

Best of luck to you all.

Spoiler (Click to View)Jk, congratulations to those who were invited.

Kyle HF - *February 22, 2014, 5:48 pm*
Elaborate on your skillset: Regarding my skill set i don't claim to do something i can not do or claim to own something i don't, im sure most people who know how i work will agree with me that i myself are perhaps one of the best social engineers in the og community or social media community not taking anything away from other members. i have currently managed to gain access to official Warner Bros Records documents regarding information to there social mediums, as well as learning how to approach recovering accounts or obtaining important information regarding accounts i am trying to gain access too. https://gyazo.com/2eb2452da2bb4169bb2a239bfbe3a830

Tell us why you would be a valuable asset: Its been said that i have probably the most social media power in the community, how ever im sure bringing this to the legion group would be a great asset.

Elaborate on your achievements and future goals: Regarding my future goals, im looking to be able to make a sustainable living from online work as well as growing a reasonable fan base along the way.

Tell us about yourself: Im currently 18 years old, have alot of hobbies away from the internet, and im a easy guy to get along with although my work might suggest im a brawler.

Mon£y? - *February 22, 2014, 8:56 pm*
Elaborate on your skillset:
Coding - I am currently learning HTML, PHP, Java, and Python.

Hacking - I have just started on this. I've have done a couple of SQLi before still learning though. I've uploaded a shell on a hosting company's website before.

Mining - I'm very interested in the cryptocurrencies. I've recently started to in a couple of them.

Rats - I've ratted in the past didn't get very many slaves, going to buy a rat from Hack Forums this time and start again.

Tell us why you would be a valuable asset:
I would love be be a member of Legion to learn from other and share what knowledge I already have.

Elaborate on your achievements and future goals:
I plan on starting a hosting company in the near future. Not 100% sure what i'm going to do in college yet, that is why I am wanting to join this group.

Tell us about yourself:
I have always loved computers ever since I was young. Not very many people that I know in real life know exactly what I do when I'm online. I don't really trust very many people. I'm not the riches so I don't have a very good computer but I just really want to learn. I'm currently saving up for a really nice desktop which hopefully I will have by the end of the summer. I try to use proper grammer online especial when posting threads. I'm here on Hack Forums because I want to learn as much as I can.

TheSonOfTheDevil - *February 23, 2014, 2:25 am*

Elaborate on your skillset: I can currently do botnet, exploit, deface website and coding well name it and i can most likly do it..
Tell us why you would be a valuable asset: coz I'm a heartless person that has nothing to loss and love to infect computer's and make there life worse then mine, guess what im trying to say is I'm willing to do what it take to get big.
Elaborate on your achievements and future goals: for achievements would say ether taking down over 100+ game servers or making flash irc. Now for goals don't really have none just go with the flow..
Tell us about yourself: I'm a strait forward person and do not fuck around.

CloudRick - *February 23, 2014, 4:41 am*

Elaborate on your skillset: My skillset are advertisement, PHP/HTML programming. I am also pretty good at FPS games but that was a while since I played.
Tell us why you would be a valuable asset: I will be an valuable asset because I will be able to provide dedicated servers / virtual private servers for really cheap prices. I will also be able to contribute and help fellow members.
Elaborate on your achievements and future goals: My achivements are cheapest dedicated servers in world, and my goals is to strive after even cheaper prices on the machines.
Tell us about yourself: I have am done studying and can now focus more on my company, I am and kind and great helper and will contribute good to the group.

Cherry. - *February 23, 2014, 5:26 am*

Elaborate on your skillset: I like Modding on Xbox Live, i currently own 2 Modified xbox 360's. I can deface websites and trace hackers. Im getting better at SQLi Injection attacks and im trying the SQL challenges posted on Hackforums. I also own a botnet, i've had experience owning a stresser. I also like ratting, also i like doxing people.
Tell us why you would be a valuable asset: I would love to be part of a Hackforums group and help Hackforums out with problems. I also host alot of giveaways because i like giving back to hackforums members.
Elaborate on your achievements and future goals: When im older i would like to be a IT teacher, im currently 14 years of age. I know alot for my age as i've been told.
Tell us about yourself:

Im 14 years of age.
I like helping people in the General hacking section and helping people to remove their viruses from their computers. I know quite alot about defacing of websites. I can code in html, vb.net and i also know some C#. I enjoy coding little programs for people. I've had expierance setting and hosting a stresser.

FilmGuy - *February 23, 2014, 11:14 am*

Elaborate on your skillset:I'm experienced at doxing, I also enjoy SE'ing, With that said Im still trying to improve on my skills everyday!
Tell us why you would be a valuable asset: I would be a valuable asset because I am here to learn and to Help, I'm also very personable.
Elaborate on your achievements and future goals: I have just been accepted to college for next year! thats a nice accomplishment for me, And id like to go into Business and or computer security fields later on in life.
Tell us about yourself: I'm 17, Im from PA,USA, Im an avid member of my youthgroup and design all the graphics we use for new series!

iSnitch - *February 23, 2014, 3:51 pm*

Elaborate on your skillset: My best skill would be marketing and because of that i made over 1000€ already online in just 2 months. Other skills i have is: CSS & HTML (Basic), PHP, MYSQL, C++
Tell us why you would be a valuable asset: I would like to expand my knowledge and to do that i would help other members and learn something from them.
Elaborate on your achievements and future goals: My goal is to master C++ and PHP so i can do everything i imagine in my head.
Tell us about yourself: I am still a student going in IT school, will go on university that has something to do with IT and thats what i really wanna do in my life beside GYM. I'd like to make a nice income online enough to impress and encourage other people to show them it is possible.

Littlerooostturr - *February 23, 2014, 6:08 pm*

I'm a visual learner that never gives in, I have a lot of trust in myself and can trust the team I would be working for, in the future I want to acquire a great set of skills in all areas of the field, I really enjoy watching the best tutorials that HackForums has to offer.
I have basic Python and very good Social Engineering, honestly.

I have ideas, like everyone else, I want to make them happen and I believe with your knowledge and guidance I can and want to help you achieve your ideas.

Komodo - *February 23, 2014, 8:16 pm*

Elaborate on your skillset:
My skills fall in many categories. At the moment i am a supporter for multiple things. Some of the things i support are VPNS, Rats, Crypters, Hacking Help Desks, Booters, etc. If had to pick what i am best at, i would have to say Helping. I do not know what other categories to classify myself as. I help many many people a day. Some of my Skills include Rats, KeyLoggers, Basic Coding, and more. I am not that active, but i do glance at the White Hat Help Section every now and then, to help people, and to learn a thing or two. That is pretty much what i am the best at.

Tell us why you would be a valuable asset:
As i have said above, i own a Hacking Help Desk that i am hosting for Empire, and a Booter. I believe that i am a valuable asset because of the people that I help, and my online time. I help multiple people a day, and would love to be in this group.

Elaborate on your achievements and future goals:
My achievements and future goals, are for the most part short termed. My focus for the moment, is mainly based on helping people on my Help Desk, and my Booter. I do help people on other threads that are not mine as-well. Some other things i would like to do would be, getting better at Coding, and learning new skills.

Tell us about yourself:
I am a very simple person. I like to help people, and I am almost never rude to members. I try my hardest to help people, whether that be through Posts, Skype, PM's, or TeamViewer I always am willing to help. When I start on something, I do not quit until i believe that I have helped to my best ability.

HIGH PAID FELLA - *February 24, 2014, 8:36 am*

Elaborate on your skillset:
Ratting & Botnets

This is the first thing I've learnt when I was learning hacking, I had a in real life friend and I was so fascinated about his hacking skills he said to check out HackForums. I did and now I'm here. I've got many slaves (+300) but I prefered in those times to do it Grey Hat because once I saw a man he was booking a journey to a family park with his kids and wife so I just uninstalled him. I have many spreading methods and can help people with any problems, also for botnets.
I've many methods how to earn money with these and how to get them.

E-Whoring

I don't E-Whore that long but it works like a charm, because of my SE skills I can get much money of it, I can help people with this and learn them some tips and tricks.

Social Engineering

This is one of my best skills. I can do this because I can lie and manipulate very good, I hacked a hacker once because of it but that's off-topic. It helps me with my other skills like "Ratting" and "E-Whoring". I can help people with SE and it can give some nice opportunities to get nice stuff.

Tell us why you would be a valuable asset:

I would be because I can help everyone who that wants and will be a proud and active member of the Legion! I always try to improve and learn much more things. I'll share my wisdom to the other members so they can improve. I want to be a student too because I have to learn much more and want to get into SQLi, XSS, RFI, LFI and I'm also learning web development then going towards things like C#, C, C++ etc.

Elaborate on your achievements and future goals:

My future goal is to start up a product line on HF and being a very known salesman, I'm currently doing this with some other members and will start soon and want to get into the things I listed above.

Tell us about yourself:

Hello, I'm Marouane and I'm 14 years old (please, don't judge me on my age, I'm just honest.) and I live in Belgium. I'm from Morocco actually but whe moved when I was a little kid. I'm on HF to learn and to help other members. I'm also active in the R.A.T. section and like to help some noobies. I

have also other skills like GFX where I didn't talk about. I want to keep on HF for some more years and I enjoy this place a lot!

King of Diamonds - *February 24, 2014, 1:20 pm*

Elaborate on your skillset: My current skillset is the linux operating system and basic knowledge of rats. Currently i want to learn more about Website hacking, and anything to the extent like that. Also, I know java and am able to help with anything in that field. And to elaborate on more of what i would like to know. I would like to learn more about networking. That really intrigues me and makes me want to learn more, But i barely know where to start.

Tell us why you would be a valuable asset: I am willing to put the time forth to learn and be a valuable asset to the group, While learning about the aforementioned topics. I'll also be able to help anyone with java if needed.

Elaborate on your achievements and future goals: My future goals in life arent related to these topics sadly, I want to study nuclear chemistry, But related to this topic is to, for a lack of words master different sub topics of networking.

Tell us about yourself: Currently i am a sophomore in high school taking Ap Computer science course. Im also playing for a travel ice hockey team as the starting goalie. Sports are just fun to play, yet on my free time i am an electronics nerd. built my computer, and game all day ?. But I've been coding java on and off for a couple years now. Currently am studying the bukkit API for my MC server, so i dont need to over pay these devs for custom plugins.

Xorex - *February 24, 2014, 6:52 pm*

Elaborate on your skillset: I have a lot of skills, mainly revolved around the Internet. My main interest is about hacking, security, and coding. I know a lot about, VPNS, Booters, Rats, Keyloggers, and I am an amateur in C#. I also have a fond interested in SQLi, though I don't purse it as much as I would love too.

Tell us why you would be a valuable asset: I would be a valuable asset, because I know a lot about what I said above. I spend most of my time in the beginner hacking section, helping people. I love helping, and love learning. I can be a big help, since I have a couple of tutorials in the hacking section, and also I would like to learn some more.

Elaborate on your achievements and future goals: My current achievement right now is mainly helping people. I became really active in the Beginner Hacking, and it's great. I love helping people start out, and it's great. My goals on Hackforums, are to start a helping desk/group of my own. I want to help people, and help people learn about the World Wide Web. There's so much to it, then simple websites. My other goals right now, are mainly in life, and some in coding. In life, I want to become a Computer Scientist/work in Forensics. In coding, I'm learning to make a crypter, that will hopefully be successful.

Tell us about yourself: I am a very helpful person, and will help whoever whenever. I don't discriminate, and try to help my best. I follow orders very well, and hope I can be a valuable asset.

Craze Z - *February 25, 2014, 11:00 am*

Name: Sammy - Craze
Country: United Kingdom
Timezone: GMT +0

Elaborate on your skillset:
Social Engineering:
I am heavily into SE'ing items. I use a lot of photoshop to create my receipts, or create fake proof of purchase.

Selling/Marketing:
I am quite experienced in selling products. I take commerce at school, where we learn how to start and run a successful business. I am running a fairly successful business online right now, selling social media boosting. I also run a business in real life, buying things online in bulk (iPhone Cases) and then selling them at school.

Website Hacking:
I am highly interested in exploiting websites, although I am not very experienced. I know how to carry out a SQL injection, and I am learning how to carry out cross site scripting.
RAT'ing:
This month I learned how to set up a RAT. I have had a few successes using it. I used to have an average of 120 bots online. I used a JDB to infect them. Unfortunately, Darkcomet is not very stable, and malfunctioned for me. I lost all of my bots. I will get back into RAT'ing when I buy plasma RAT.

Doxing:

Doxing is very new to me, I have been learning about it for roughly two weeks. I can do basic doxes, name, address, aliases etc. I am unable to do financial information, but I will try and learn that in the future.

eWhoring:
Although I do not enjoy it,(who likes watching pedos jack off xD) I am rather skilled at it. I have made a little over $1000 from it last year. I am starting to get back into, and I am looking to make a custom VCW.

Graphics:
I have started graphics very recently, I am enjoying it a lot! I can create userbars, thread designs and signatures.

Tell us why you would be a valuable asset:
I would be a valuable asset in Legion because after finishing all my exams I have a lot of times on my hands which means I could bring all of my above skills to the group to help teach and learn at the same time. I am very willing to help out with group projects and by being an active user.

Tell us about yourself:
My name is Sammy and I'm from London. I'm 17 and currently studying Business with professional Accounting. I recently had my Under 17s Brentford Elite trials which went really good and I am 1 step closer to becoming a professional football player. Other then that my other hobbies are playing video games, chilling with friends irl and taking the piss out of package on TS.

Thanks for reading my application and I look forward to your response.

Kane306 - *February 25, 2014, 3:39 pm*
Elaborate on your skillset:
Alright so one of my skills is helping out other people, I enjoy helping out anyone who asks, I don't really mind how long it takes to help them out and I always try my best when i do, another one of my skills is working with Botnets and RATs, a big skill of mine is the fact I can listen to people and learn quickly, I don't slack off and I enjoy learning new things and meeting new people.

Tell us why you would be a valuable asset:
I personally think I'd be an valuable asset because I enjoy helping out people and I am always kind to users, I never cause arguments between people and I do not have an arrogant attitude, I also am very active on my computer from around 6-12 hours a day, so about 8 hours on average, I'm also a very positive person so I would be very sociable around anyone, I also learn things very quickly and I appreciate what I am given.

Elaborate on your achievements and future goals:
My achievements are learning a few coding languages, I have and am still studying a bit of web development like jQuery/HTML/CSS and more, I have also coded a few programs in VB.net, I know that isn't much of an accomplishment but at the end of the day at least I have tried something new out and I have enjoyed it. One last accomplishment of mine is becoming official support for Dendroid and Coiner. My future goals are to learn more coding languages and become fluent in at least one, another goal is to have successful business on HF, I also wouldn't mind meeting new people and improving on my speech skills in person.

Tell us about yourself:
Well my name is Kane, I'm from the UK and I enjoy supporting others and I'm always there for my friends, I enjoy listening to music and watching anime and sometimes playing some games, my favorite music genres are Metal and Old school rap, my favorite artists/bands are Enter Shikari, Deftones and a few rap artists like Souls of mischief and DMX, my favorite anime shows are the Dragon Ball series including Z and GT, I also enjoy Deathnote and Full Metal Panic, my favorite games are the Fallout series and King of Fighters series, I'm always up for new things and I'm optimistic about things so i'm a positive person.

Hyptonix - *February 25, 2014, 11:26 pm*
Elaborate on your skillset: Throughout the years I have been seeking and sharing knowledge from coding, to networking. I taught myself basic HTML to coding in C++.

Tell us why you would be a valuable asset: I feel I would be a valuable asset as I can share my current knowledge as well learn from others. Wisdom and knowledge is power.

Elaborate on your achievements and future goals: Currently a full time student, employee, parent, and husband. Currently working on my masters in comp sci. and looking to graduate around this upcoming June. I am also working on a bachelors in Business. Looking to be able to gain as much knowledge as I can and hopefully look back one day and can say that I was around that era and was a part of that scene.

Tell us about yourself: I think this question was answered pretty well with the previous answer to the previous question. If you feel I should elaborate more, feel free to let me know and I will. ?

Shanks - *February 26, 2014, 1:29 am*

Elaborate on your skillset:
I have a lot of experience with Doxing, SE which I use for Account Recovering, I have been doing this over the past years.
I have been working with different Hacking Softwares, doing different stuff.. Some can be discussed on Hackforums, some Not.
I work a lot with Security, even though I have some stuff I have to clean up here for my own good..
I can help people setup RATs , Help with Security, SE/Doxing, Account Recovering, Socks, Botnets, Spreading - Exploits , Contacts.. , Coding (Even though I don't code much but I have

friends who can help you), Crypters.
I don't know what I can list here that you Guys will find interesting and not put me in a risky situation - because this is public lol.

Tell us why you would be a valuable asset:
I would say, I'm a guy that you can do all kind of business with, a Guy that you can chat with and trust.. To have both of those sides have been very appreciated by other people.
I'm only almost all the time, if you ever send me a message without reply within 10min I give you a cookie.. Also I help and learn, I answer.. I question.
"Valuable things stated in skillset.

Elaborate on your achievements and future goals:
Of course I have some achievements, a though I wished for more.. but the life is long and we'll see what it has to offer me.
My goals for this Year Online:
Learn more Programming Languages.
Get a couple of IOS/Android Games on the market, hopefully some earnings from this.
Increase my Botnet even more, get into other use of them ?
Get more good Contacts online (I like having people around me, for help or w/e.. I like working in teams)

Tell us about yourself:
I live in Sweden, spend to much time at the computer.. I guess ?

Spoiler (Click to View)This took me a lot of time to write, not sure why lol..
Well hope you understand that I couldn't talk about all my activities here.

-Shanks

Ventures - *February 26, 2014, 5:09 am*
Elaborate on your skillset: As a web developer and designer, my skills include HTML, CSS, JQuery, Javascript, Database management, and Hosting experience (have run a hosting company before). I do prefer design over development, as I believe that appearance is generally judged first. Without giving the correct impression to the audience, the information you have will not be taken to heart.
Tell us why you would be a valuable asset: I spend anywhere from 5 - 12 hours a day coding and designing websites. I have fiddled with over 30 different mini-projects, created four functioning websites of different work caliber (as samples for clients), and continue to research and redesign concepts that I have created before. On one particular project, I had made 7 different versions before deciding on the correct navbar to use.
Elaborate on your achievements and future goals: Achievement-wise, I feel that I have gained a lot of personal and professional experience in web design. I continue to fine-tune my skills and I hope to one day become a full-stack developer. As of now, my PHP skills are quite limited, but I'm working on it. I also plan on picking up NodeJS and Ruby on Rails in the near future.
Tell us about yourself: I am a first-year in college struggling to pay rent and utility. I spend the majority of my day coding when I'm not in class in order to make a small side-living to support myself. I am truly passionate about design, and when I have a project, I take it on with enthusiasm. My schedule will not conflict with my activity as I post quickly and concisely.

Slim Shady. - *February 26, 2014, 2:00 pm*
Elaborate on your skillset: I am very good at social engineering mainly, I don't have any coding experience or anything like that. I am interested in learning how to, though.
Tell us why you would be a valuable asset: I am a trustworthy individual, and I never lie, I also care a lot about keeping everything professional and being mature in every situation.

Elaborate on your achievements and future goals: I scored above the 90th percentile on the SAT (US College Entrance Exam) as only a sophomore, and my future goal is to become a Special Agent for the F.B.I and do counter intelligence or cyber security.
Tell us about yourself: I am a sophomore in high school, I am going to be taking College Dual Enrollment classes next year, I plan to go to college to get a Masters or a BA degree in Computer Science with a minor in Psychology or criminology. I like to play video games and social engineer mostly.

WealthyHustler - *February 27, 2014, 6:12 pm*

Elaborate on your skillset:
(*The things listed I have an intermediate to advanced knowledge of.)
Knowledge of:

Networking:
IP Addresses
Routing
Forwarding
ARP
TCP
UDP
Firewalls
Computer disassembly/Reassembly

Web Application Security:
Cookies
Sessions
HTML Code and markup errors
XSS
SQLI
RFI
LFI

Programming:
basic c++
python
java
perl

Network Security:
Footprinting
Exploitation of services
Understanding of all malware types
rootkit creating
knowledge of buffer overflow
knowledge of DoS and DDoS
Cracking passwords
bruteforcing
breaking in windows computers with nulled sessions
*I also operate Linux. I have tons of experience in Linux's OS's. I work with Windows OS's at work.

Tell us why you would be a valuable asset:I believe I would be a valuable assest in thisI believe I would be a valuable asset in this community because I feel I am at the right level where ethical hackers look at themselves to be. I try my hardest at everything I can do. Although, I will admit I do

not know everything; nobody does. I am mature and handle situations properly. Lastly, I am friendly and try to be aspiring to others. I feel I could make a great impact in this group.
Elaborate on your achievements and future goals:Although this sounds crazy, it's true. Since I was 13 I have been fascinated by network security. I have 5 years of self-taught information that I constantly keep learning. I have came a long way from a skid, to an intermediate hacker. I have learned a lot of programming, exploit coding, and networking on my own. Throughout my whole educational parts of my life I have received scholarships and high grade point averages. I truly dedicate myself when it comes to education. We are only what we put ourselves out to be. Lastly, the main thing that runs me is integrity.
Tell us about yourself: I am a college sophomore male. Right now I am currently going for my Associates in Cyber Security. I currently work in Information Technology and I try to learn something new every day. I am hardly ever playing games or anything like that. My ultimate goal is to make a difference in this world by being the way I am, learning new things, and lastly, teaching my skills to people.

Thank you for taking the time to read my application.?

Nightmare™ - *February 28, 2014, 7:08 pm*

Elaborate on your skillset:
I have many skills that fall into different categories. Some of my skills are experience with Rats, Crypters, VPNS, Booters, and Basic Web Development. I have been using all of these tools for a while now and have become very familiar on how they work. I have had lots of experience with helping people learn how to use them as well. I am always making posts helping people understand more about these tools and making recommendations to them. I also do know a decent amount of coding and I am decent with website development. That is what I am best at.
Tell us why you would be a valuable asset:
My most valuable asset would have to be that I help many people a day. I am always making recommendations to people on how they can improve or how to use a certain tool. I am also adding these people on Skype or going on Teamviewer with them to make sure I can help them as much as possible.
Elaborate on your achievements and future goals:
My achievements would have to be my ability to help people. Like I said I am always helping many people out and I am never quitting on them. My goals would have to be to get a lot better at coding and to make my own booter. I think it would be a really good goal to set for myself and I think I can do it.
Tell us about yourself:
I am a helpful person and I never give up on people. If I can not help them on the forums then I add them on Skype or I get on Teamviewer with them and I make sure I help them out. If I still cannot help them I will spend a lot of time researching until I figure out the answer. If I still cannot find the answer I will refer them to another member that I believe can help. Whenever I start on something I never quit.

JackedHF - *March 1, 2014, 6:12 am*

Elaborate on your skillset:

Ratting - I can almost setup any type on botnet etc irc, http, or rat. I have worked in the field for very long time infecting users with my own unique spreading methods i have created my self over the past few years, and im currently debating to setup botnet and sell bots :)

Networking - I mostly work with servers and my friends network as he run a small hosting company which i manage his servers and make his servers secure and always up to date. I am able to use my knowledge on this forum to help users with there servers or router issues.

Web-based Exploitation - I am pentester, i can do most webbased attacks and hacked few hosts and booters that have paid for my services, i am also debating to open service on hackforums for my hacking skills.

Server Exploitation - I can upload shell on most sites, and root or gain entry to the server via root, and i would normally just sell the server on i would been requested to hack the server for customer.

Teamwork & Support - I am very chilled back person who doesn't rage at user that doesn't know what he doing i will try to help my very best with his issues, i don't mind working in support as i basically work behind my computer for 6/5 hours day.

Coding - I have been coding web based for long time now this means i have learnt very easy ways of hacking site through php and code as worked with it allot, i have learnt php,html,css,xml,perl,bash,python (still learning) now i'm moving on to more program based files :)

Tell us why you would be a valuable asset:

I would be valuable asset to the Legion, i would share my methods and ideas with the group to expect same back and to expand my knowledge :)

Elaborate on your achievements and future goals:

I have fair amount of achievements, but most blackhat which i will not discuss here. my future goals are to run group of my own become most trusted member on hf :)

Tell us about yourself:

Im not going to much detail here, but im in college going to do my GCSE soon, and im from the uk.

Vexane - *March 2, 2014, 4:27 pm*

Elaborate on your skillset:
I'm fluent in HTML, CSS, PHP, jQuery, and JavaScript. I'm also pretty good at graphic design and marketing.
I've also had lots of experience in desktop programming languages, but I've never perfected any of them.

Ratting: I have experience with NetWire, GhostRAT, DarkComet, PlasmaRAT, jRAT, njRAT, LegacyLink, Imminent Monitor 3

Web Exploits: I used to be interested in SQLi but I felt like every website had patched this, so I got bored and walked away from it.
I also worked with XSS for a while, but I don't know how you would "steal cookies" and such. I've found a few vulnerable sites, but never got to do anything with them.

Tell us why you would be a valuable asset:
I love teaching anyone I can as much as possible. I also have a motivation to learn because I like seeing what I can do with whatever knowledge I can put together!

Elaborate on your achievements and future goals:
I hope to become a mobile app developer (iOS preferably) and hopefully a graphic designer (freelance)

Tell us about yourself:
I'm a 14 year old freshman who's always been interested in technology. I found Codecademy one day, and learned Python for about a year. After a while, I got bored with it (due to the fact you can't make Windows applications naively) and moved onto C++. After a couple months with that, I realized it was really hard to get started with the Win32 API and after that I moved to C#. I stuck with C# for a while and released a few application to the public and then found web development. Even to this day I'm web developing, but I'm slowly transferring to iOS app development. Other than that, I'm pretty boring.

-Hyperion - *March 2, 2014, 8:29 pm*

Elaborate on your skillset: I know C++,C,Python,Ruby and Java. I have a vast knowledge of pen testing and malware. I also have a degree in micro computing and PLC's. I know a lot about computers and network info structure as well as running a business. Just finished a class on data recovery.
Tell us why you would be a valuable asset: I would be a valuable asset because I can help others users with my specialties and contribute with my skills to this group in a way that would benefit the group and myself.
Elaborate on your achievements and future goals:Have run my own computer business since '10 successfully and built a clientele. Have my degree and graduated from a vo-tech as well as putting myself through several online courses. Built a Sous-Vide machine with arduino and programmed it as a PID controller.
Tell us about yourself:I am 20 live in the USA and I like playing LoL as well as building electronics projects.

SIM-1676753 - *March 5, 2014, 8:30 pm*

Elaborate on your skillset:
Programming:
I learned Visual Basic for about 2 months going into C#. After about a year, I decided to learn C++. I'm currently learning C++ and have been doing so for the past week.

Web Constructing:
I know my way around HTML and CSS as well a little knowledge in PHP. I've made websites for myself for the fun of it.

Graphics:
I can make minimalistic thread designs with color schemes that match and look overall good.

Tell us why you would be a valuable asset:
I feel I will be of great contribution to the group and will do the best I can. I will give Legion a good name as I will give my name a good name. I am a positive member with a drive to learn and succeed. I try to be as helpful as I can and assist members who need assistance. I make high quality posts and threads as an active member and will continue to do so.

Elaborate on your achievements and future goals:
I've made $230 programming private bot for a person to use in-games. I will continue on trying to make money for myself. I haven't gotten into e-whoring, but I will try it one day.

Tell us about yourself:
I'm a member dedicated to learn. My interests are to hang around with my friends. I also like to program and post in the lounge. I dislike people who write with misspelled grammar and spelling. I consider myself a mature member, not ditching when times are rough. I have good grades and know when to admit I am wrong.

?XiS - *March 6, 2014, 9:08 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:
The first main skill that I developed on was mobile phones. I became interested in mobile phones as soon as my dad got an iPhone. After I jailbroke it, I was intrigued by all the tweaks and the free apps that could be gained by exploiting the phone. This gave me an incentive to experiment with android phones, and I used my dad's old Xperia X10 to experiment. I was looking for different ways to exploit the phone, and search for new ways to get free apps and develop my own android tweaks.
The first computer based hacking skill I learned was SQLi injecting websites. I first used scanners to find vulnerable sites, and I used Havij to inject the websites. However, after that, I learned how to create my own dorks and how to be inventive with them, and also taught myself how to manually inject a website using a tutorial from HF.
I found defacing websites a challenge, and it gave me a buzz, so every day I looked for new ways to exploit websites and deface them. Some of my friends taught me a couple of exploits that would allow me to deface random websites, and at the time, I found this exciting. However, I then learned that having their website defaced could be a pain for the webmaster. I stopped defacing websites and opened a few of my own websites (i don't want to public state them) and started monetising them and earning quite a lot from them using private AdSense methods. I taught myself how to hack specific websites by finding vulnerabilities in the server, and in turn, rooting the server.
I also learned a few methods on how to hack a variety of accounts, including facebook and hotmail accounts.
At the time, it seemed like a good idea to learn how to use armitage. For this reason, I installed the Backtrack OS, and taught myself how to use it to its full potential. However, due to school reasons, I had to revert back to Windows OS, and haven't used another OS since.
I have nearly perfected my HTML skills, and as I am currently on a one week break from school, I hope to become more profound in this area, and know everything there is to know about html.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I would be a valuable asset as being in this group would encourage me to stay active and post more. It will also incentivise me to post tutorials explaining my knowledge within different aspects of hacking, and to help more members. I would be able to help members in a variety of different areas, and I will try my best to answer any questions that they may have.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your achievements and future goals:
My proudest achievement would have to be earning a couple thousand £s using AdSense. Not because this was a large amount of money, but because I was quite young when I did it (15).
Hacking a couple of (targeted) facebook accounts was also quite a proud achievement for me, as it was a test of my skills.
The Snapchat Bomber that me and a friend created was a good achievement as I received a lot of positive feedback on that thread.
In the future, I hope to create my own web browser as a challenge, however I have not had the time to do this yet. Hopefully I will be able to finish it in the Summer holidays. I also hope to create an Instagram web client. In the upcoming days, I will also be releasing an ebook explaining the method I used to earn with AdSense.
In a couple of months, I also want to create my own computer using a variety of parts, however I do not know how to do this at the moment, and would have to seek help on how to do this - other members may be able to help me.
In real life, I hope to continue my success academically, get good grades and go to a good uni. I also want to get a proffessional football contract.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
I'm 16, and I live in the UK. I am VERY good at football, and have played for academy teams in the past (Watford and Arsenal), only hindered by the fact that I broke my shoulder. At the money, I am only playing for a local team to get back to full fitness, hopefully getting a contract at a professional club within the next year. I am currently studying for my A-Levels, and the subjects I am doing are : Physcis, Economics, Maths, Further Maths. I received 10A*s at GCSEs, and I hope to continue to a University such as Cambridge or LSE, to study for either an Economics degree, or a degree in Computer Science. I am a hard working, and fairly intelligent person, and I try hard in whatever I am doing, and I will not stop until I achieve my goals. I would love to be a part of Legion, as the art of hacking intrigues me, and a lot of the members of this group could be beneficial to my hacking knowledge over a wide range of different aspects.

Tracked - *March 7, 2014, 8:23 pm*

Elaborate on your skillset
SQLI | Doxing | Social Engineering: I'm in no way a pro at SQL Injections, but I have successfully hacked a couple dating websites & forums, there security was very week though. For the Doxing, I do have my own service, I do have a couple vouches & have done many successful doxes, and only started with a username, or something small. I have to use a lot of my social Engineering skill when I used to E-Whore, I would use different chat sites & at one point used Facebook. I'm very calm under pressure & can talk like one hell of a businessman.

Tell us why you would be a valuable asset
I'm improving on my SQL Injection skills & Doxing skills. I like to learn new things, so if i'm needed to learn anything different I would be more then happy to. I always give 120% especially if it's something I want & believe in.

Elaborate on your achievements and future goals
I was actually very happy & felt achieved when I successfully hacked my first website, it was a Indian dating website haha. For my future goals, I really want to start programming in c++, I started learning Java but had nothing to do with it. I also want to get my Doxing service going & learn more in SQL Injections, and eventually start a SQLI service. Another thing that would be very cool to learn is graphics, it would be cool to make signature/avatars etc.

Tell us about yourself
I think i'm a pretty average guy, I love talking to new people & helping others out. I can't say i'm 100% sure on what I want to do with my life, but I like where i'm at now & want to improve on it. I do want to be a Firefighter, but like I said i'm still not 100% sure. I have been told before that I should do stand up comedy, I guess i'm funny. I do like to joke around, but i'm very mature when I know it's time to be. I don't really drink or smoke, it's not really my thing, considering I was around it a lot while growing up.

SoLilyKweez - *March 7, 2014, 8:36 pm*

This is a student application.
Elaborate on your skillset:

Great English Skills -
I believe that I type very well and very clearly which is a necessity for communication online.
I've been told my English skills are one of my best aspects online due to me being able to clearly

direct the message I'm trying to give.

Graphic Design -
Graphic design is one of my most favorite things, and I'd be willing to use it to help any of the members in or out of the group.
I typically post most often in the graphics section of the website and try and help new, aspiring artists better their skills.

Listening -
I know this may sound cheesy, but I consider this a skill because I very seldom see it in people these days.
When it comes to HF, before I pass any judgement on anyone, I always listen to their side of the story and the other side.
I make sure to keep in mind that none of their profile stats matter, only their words and how they use them.

Debating -
When it comes to nearly any topic, depending on my current knowledge on the subject, I can nearly always rile up a very great debate on it.
I'm currently in Reliance and take part of several debates there while also giving my input into the Debates section when I browse through it.

Leadership Skills -
Not claiming I'm applying for leader here, but any time someone is needed to step up to the plate and lead a member/and or members in the right direction I'll be there.
I've been an admin on several websites, ran my own site, moderated an ex-staff member of HF's website when it was up, and help with several user groups on other sites.
I've never got the chance to own a user group on here nor show my experience as a leader for anything directly here, but I believe I'd do quite well at it.

Adaptable -
I'm great at taking new changes and turning them into an environment that I found myself quickly comfortable in.
I'm also very eager to learn all that I can.

Gaming - I've been a huge gamer since I was around 3.
I used to stay up at night on the computer playing Diablo 1 and just destroying lol.
I typically play Halo, I can compete pretty heavily when it comes to it and I love playing with friends.

Instruments / Music -
I can play the guitar pretty well, I sing, I can drum, I produce electronic music and I remix.
I love music and it's one of the most major things in my life.

Tell us why you would be a valuable asset:

I believe I'd be a valuable asset due to the fact that I'm a quick learner, I've got time to give into the group, and I'm a person that can get along with everyone so joining a group where I'll be learning alongside others will be no problem for me.

Elaborate on your achievements and future goals:

I'm majorly known for being a graphic artist and have made a lot of cash off of that profession especially from my userbars. I'm an A student in school. I intend to go to college and as for a site

goal my only goal honestly is to recover from my RF.

Tell us about yourself:

My name is Jacob. Well, I'm 16 and I play le trumpet in the marching band. I also enjoy playing guitar. I produce eletronic music in the genres of dubstep and trance.

Uhm, my favorite colors are ordered like this. Purple > Light Blue > Blue > Neon Green > Green > Black > Red > then anything else. :p

I'm an avid art designer. If you want to see some of my work just ask and I'll show you some. :)

My birthday is in the month of October on the 20th. :3 I love being that close to Halloween because it always means I get to go haunted house hopping.

Let's see... I'm a democrat. I believe in the choices of the nation to be decided by the people, for the people.

I'm also an Atheist, and no I will not go around criticizing your beliefs, possibly cracking a small joke or two occasionally about them but nothing worse than a good ol' Jew joke.

Well, if you need to know anything else just come and ask and I'm sure I'll answer just about anything. :)

Nina Dobrev ™ - *March 8, 2014, 11:19 am*

Elaborate on your skillset:
Graphic Design
I'm really good with making signatures and avatars. I've helped Sparky to make one thread design. I've also assisted Trapstar in making graphics for him as well. I love photoshop so I try to dabble in a little of everything with it.

Languages
I've become quite adept at HTML and the various things that make it work. At this point I could probably make a website.
I'm also a little familiar with CSS, and Java.

iOS
I'm really good at navigating the apple products because I love to use them. Haven't actually jailbroken a phone because I actually like iOS >_> lol.

RATing
I'm become quite good at anything related to this. Port forwarding as well as making and spreading the servers. Doing this has also taught me how to Social Engineer people to get them to download the RAT, even using skype. As much as it isn't hacking, I enjoy watching what other people do...weird but fun, sometimes. Lol.

Troubleshooting
Typically only have to do this for my aunt/family because they really are mostly computer illiterate, lol. I help to figure out what's wrong with the router, as well as any internet connectivity issues. Helping to troubleshoot with emails, or just why the computer has decided to stop working in general. I'm usually good at finding the source of the problem. I've been told I'm entirely too observant sometimes.

Dedication
I am extremely dedicated to learning new skills to add to my skill set as well as being able to help others from the skills that I've learned. I'm currently being taught by one of the Legion Teachers at the moment. Who has been extremely helpful.

Tell us why you would be a valuable asset:
I am a very willing dedicated student. I'm willing to learn whatever is being taught. I can help out with the things that I'm already familiar with as well as helping other members with the things that I am familiar with. I have the readiness to learn, and I'm a diligent individual. I'm a huge nerd so I love to learn new things.

Elaborate on your achievements and future goals:

Future goals include finishing up school and finishing up my doctorates to become a surgeon. Double majoring in something related to computers because I never realized how much of a whole new world it is. Now I do and I'm ready to learn all of it.

Achievements, I received an award in college as well as recognition for my leadership skills. I am typically the leader in all the groups that I'm in. I'm also a good follower but I'm typically alpha. Lol. I received an award for helping people. They call it the Good Samaritan Award in my county. And it was a county affair which made me feel really good.

Tell us about yourself:

I'm a 21 year old med student who spends the majority of my time on my computer and I try to know everything I can about everything. I'm a nerd, I love science of all kinds. I enjoy helping people, which is what brought me to the healthcare field to begin with. Lol. I'm a paramedic as I'm going through school. The greatest thing is knowing that I just saved someone's life. That's who Nina is. I spend the majority of my time helping people and saving everyone else's life, and I enjoy every bit of it.

Define© - *March 8, 2014, 12:50 pm*
Elaborate on your skillset:
I have a wide range of skills including server management and programming (PHP and C#). I have skills in these areas mainly because I am very enthusiastic and love learning about them. I have a huge interest in security of computer systems in terms of exploiting web applications and penetrating vulnerable server apps such as FTP and SSH. I also have an interest in how to protect against certain vulnerabilities within PHP such as basic sanitization of user input in effort to avoid SQL injections and XSS, and also other well-known attacks such as LFI and CSRF.

Tell us why you would be a valuable asset:
I would consider myself valuable due to what I have to offer as stated above. I have noticed that a lot of members in the group offer a wide variety of high quality services in the marketplace section and I believe I can contribute to a lot of them.

Elaborate on your achievements and future goals:
I would like to become a very helpful, well respected member of the forum that is well-known to be a nice guy that will help you with anything.

Tell us about yourself:
I’m currently a student studying computer science at university and enjoying every part of it, well,

studying can get a bit tedious, but I'm sure you all know that. I would describe myself as a well relaxed and kind guy that likes to pop jokes once in a while.

Acroz - *March 8, 2014, 2:40 pm*

-Hyperion - *March 8, 2014, 3:42 pm*
Elaborate on your skillset: Pen testing, Malware removal, DOXing, RATing,SEing, Virtual boxes, Networking and basic computer hardware. I also know a lot about mechanics, plcs and robotics(what I went to school for)
Tell us why you would be a valuable asset:
I have real world experience and patience with clients as well as a vast thirst for knowledge. I also research a huge amount and work on a problem until it is solved. Running my own business has given me a real advantage as I am forced to stay on top of the latest malware and security. I have access to several company only tools and own a lot of actual hardware for pen tests etc. It has also given me something a lot of people are lacking. While they might have the know how they do not have the hands on.
Elaborate on your achievements and future goals:
Have successfully run my own computer business specializing in malware removal and pen testing since '10. Have an associates degree in and went 4 years to a Vo-tech for micro-computing and PLC's. Also certified in electronics and mechanics(PID Control, hydraulics, wiring, Solid works etc) Am an expert in malware removal and pc tuning. My company specializes in pen testing, phone

repair, computer building , micro controllers programming and malware cleanup. Have done countless classes and studied constantly. Including pen tester labs, coursera classes on computer basics, programming and networking, android app development, offensive security. Have taken part in several hacker challenges from hak5. I plan on building my business even larger and getting certfied through offensive security.
Tell us about yourself:I am 20 and enjoy running my business.I like building electronic projects. I enjoy playing around with robots and arduino(just built a PID controlled sous vide machine). I love to watch anime and cook. I also have recently got into SDR enjoy it so far. I have a huge music collection I am always re arranging and enjoy tinkering with motors etc.

Ascendon - *March 8, 2014, 5:36 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Elaborate on your skillset:

Website Hacking

I enjoy hacking websites now and then. I am very experienced and I am able to think around filters and such. I have been doing it for around 5-6 months now and I have improved greatly. Most of it has been school work but I have been trying to learn more each day.

My skills are below + more.

SQL Injection
XSS
LFI
RFI
CSRF
Server-side Includes Injection
Arbitrary File Handling
Arbitrary Code Execution
Directory Traversal
File Inclusion
Full Path Disclosure
Man in the middle
DNS & ARP Spoofing
Arbiarty File Uploading
Direct Dynamic Code Evaluation
WAF Evasion

I have basic knowledge in all around hacking including electronics which I have recently looked into. Ratting and keylogging is no problem and I can easily Social Engineer someone when necessary.

Marketing:

I have marketed quite a few EBooks on Hackforums and all of them have been hugely successful. I have sold resale rights on all of them which gave me profit when they were dying.

I am not rich and I no longer have tons of money but I hope I can think of another way of regaining my cash I earned a few weeks ago.

Tell us why you would be a valuable asset:

I would be a valuable asset to the group by representing it in every high quality informational post I make. I will be a great student and complete set tasks when I am given them. I can work well in groups which will increase the amount of work you get done as a group. I can teach/help members with less knowledge than I have and give them a boost in hacking websites.

Achievement & Goals

Achievements:

1. learnt tons of hacking methods and such in 6 months.

Goals:

I wish to finish Secondary School and get A's on my GCSE's so I can get into Bhasvic which is the best college in my City.

I then wish to move to Ireland and work self employed but have a stable business and earn a decent amount since Dublin is a big place for technology.

I wish to improve my hacking skill set along with other key skills I need to progress into the future.

Tell us about yourself:

I am a young boy at the age of 14 who is in the 9 year of secondary school the UK. I live with my mum. I see my dad once a week. I have 3 brothers and 1 sister. I go to school in the morning at 7am and arrive back at 4pm. I then do homework untill 6pm and then do whatever untill 10pm-11pm.

Every other weekend I stay up till 3am/4am.

I am fairly intelligent and I am not shy in the slightest bit.

The internet is a dark place

(Mar 8, 2014 03:40 PM)Acroz Wrote: [CITE] Denied. Do not elaborate on gaming.
Seriously? I elaborated on all of my skills and you deny because of a single remark of gaming? Wonderful.

Eeluminati - *March 8, 2014, 6:26 pm*

(Mar 8, 2014 07:24 PM)Ethereal. Wrote: [CITE] Seriously? I elaborated on all of my skills and you deny because of a single remark of gaming? Wonderful.
It IS posted all throughout this thread.

Anything about gaming = denied.

SoLilyKweez - *March 8, 2014, 6:36 pm*

(Mar 8, 2014 07:26 PM)Eeluminati Wrote: [CITE] It IS posted all throughout this thread.

Anything about gaming = denied.
I'm aware of that, but I don't understand why it really should affect a student application. Gaming is why I became interested in hacking in the first place.

Im gone brah - *March 8, 2014, 6:42 pm*

(Mar 8, 2014 07:36 PM)Ethereal. Wrote: [CITE] I'm aware of that, but I don't understand why it really should affect a student application. Gaming is why I became interested in hacking in the first place.
You were cognizant about the facts before you applied. Endeavor again, and more luck may be thrown.?

mastrmind - *March 8, 2014, 8:20 pm*

Elaborate on your skillset: I have a good working knowledge of php and java.
Tell us why you would be a valuable asset: Because I know a lot of stuff about the two language and have been working in a very reputed company(pm me for the company name) solving real time industry based problems.
Elaborate on your achievements and future goals: I haven't achieved much on hf apart from helping some fellow members with coding and creating a booter in php.
Tell us about yourself:I am 25 years old professional programer having good hands on knowledge of software development and problem solving techniques.

Acroz - *March 9, 2014, 2:33 pm*

All students have now been invited. If you haven't received a PM from me, you didn't make it. Additionally it's a shame to see so many not putting any time into their applications...

Next wave of students will be invited in some days.

Syracusia - *March 9, 2014, 5:56 pm*

Elaborate on your skillset: Coding, Web Crawling, Exploiting, DDoS
Tell us why you would be a valuable asset: I have many years worth of networking experience.
Elaborate on your achievements and future goals: Create more tools for the public.
Tell us about yourself: I am an experienced network security developer.

xVulnerable - *March 9, 2014, 7:10 pm*

Congratz to everyone who got accepted, make sure you give reason to not get kicked.

FroStorm - *March 9, 2014, 8:29 pm*

Elaborate on your skillset: Some of my skills include but are not limited to:
Making money
Mainting a proper business and product line
Basic Hacking such as SQLi, Doxing, etc
Mentored by Acroz
Innovative thinking

Most of these aren't 'hacking' skills, but Acroz is doing his best to teach me.

Tell us why you would be a valuable asset: I can help people within Legion, like Anonymous and Acroz with things such as marketing, product lines, and other things. I can also help remove people from the internet.

Elaborate on your achievements and future goals:
I plan on starting up many more projects, I am working on a crypter at the moment. It should be done in the next week or so. I also plan on starting a VPN some day. I'm not sure how recent that will be but it will happen.

Tell us about yourself:
My name is Thomas, I'm 24 from Sweden and love marketing and business. I just recently got in the hacking scene but plan to expand my knowledge to a much larger base.

01L 5P1LL - *March 9, 2014, 8:55 pm*

Elaborate on your skillset:Knowledgeable in various topics regarding Linux,WLAN technologies and Attacks,Security involving Encryption and Secure Encrypted Communications, and techniques to stay anonymous. This is just a very broad outline and I can explain in more detail through PM if need be.

Tell us why you would be a valuable asset: Although my skill set may appear small compared to other applicant's, each one of my skills compliments one another and will be very useful in the future. Unlike other applicants I am very involved in each of them so I can actually accomplish something useful when needed. As you will soon learn I am dedicated to my craft and do my best in making sure i do my part when it comes to group projects. I am constantly thinking of projects where group effort is needed. I enjoy helping other members understand topics that I am knowledgeable in. This will prove very useful in the continued growth and overall knowledge of the members within the group.

Elaborate on your achievements and future goals: One future goal I have is to aid in the completion of a group project as well as expand my skill set to develop tools that would prove useful to the group.

Tell us about yourself:Unlike other members I do not sugarcoat anything. I will not lie to you and put something on my skill set that I can't do proficiently. I am not one of those people that say they know how to code and when the group actually needs a coder for a project they cannot deliver or they deliver very poorly. A lot of people will stick their toes in many pools but very few can actually dive in and swim. If I don't know something I will not beat around the bush and come up with excuses, I will tell you I don't know but I will find out and I will learn. I stay involved and that's very important when being in a group. I have spent a lot of time looking for a group with knowledgeable individuals to share my skills and ideas with and I am looking forward to working with everyone in the group.

cyberducky - *March 10, 2014, 3:35 pm*

Abide's Legion Student Application

Elaborate on your skillset:
I have a wide variety of skills related to security. My interest in hacking first hit me when I jailbroke my brother iPhone. I thought the concept of tweaking a phone and unlocking new abilities was astounding. The first thing I ever did malicious to another iPhone was 2 years ago. I created a code that could be executed through and image file in a text message. I failed at attempts of creating a keylogger for an iPhone, however I was able to set off an alarm when someone looked at an image I sent to them via text message. I would prank kids in my class, and their phones would blare a mp3 file of my choice. I have also attempted to code in iOS but I am too used to android development and kind of gave up on iOS. My android developing stage began when I rooted my samsung galaxy s3. At this time, I was learning java and I had found out that android is based around java. I made nooby applications like a flashlight and a file browser, however I still have issues creating games on android. My first ever hacking related skill I learned on the PC was SQL Injection. At the time I was a script kiddie and didn't manual inject. I went through my Havij stage then later on moving onto sqlmap. Now I can manually SQLi via my browser using an SQL addon. After I learned SQLi I moved onto the world of DDoS and Botnets. The main reason I got into this was because my friend had an impressive botnet which he would use to hit off websites. He taught me how to set-up and IRC botnet using udp and other methods. I also was interested in stressers around this time but never found them to be as powerful as linux bots. With my old botnet I used to be able to take down instagram temporarily and that was a huge accomplishment for me. Linux bots is what also got me into RATing. I was tired of buying bots or stealing them from friends so I decided to start RATing so I

could use slaves to DDoS. In my life I have only been able to hit around 13k slaves, and I have also used some for LTC mining (the ones with shit internet speeds). I later bounced around the blackhat world joining random hacktivists. I defaced webpages and began using new exploits on websites that I had learned. Joomla and WordPress exploits were some of the first web exploits I learned. As my knowledge advanced I began to learn about 0 day exploits and the potential of adding them into browser addons. I created XML scripts to scan for bank information, but I never had the balls to actually steal money from people (just being honest). I got the XML knowledge from creating android applications and my java knowledge advanced as well. I began to create JDBs around this time because java is always full of exploits. I would buy random domains, advertise them and have a silent JDB on them to get slaves for my growing botnet. I also got into doxing, and I am able to gather information on almost anybody who has made a mark somewhere. Just recently I have begun to get into malware analysis, however I am a noob at it. I am familiar with all the basic web languages, and spend some of my free time helping people setup websites. I am mostly whitehat now a days. Other skills that I forgot to mention are graphic design and writing.

Tell us why you would be a valuable asset:
I feel that I would be valuable for multiple reasons. The first is that I can spread my current knowledge to others. I would also like to learn what I do not know in order to help gain knowledge in more advanced forms of security. On a side note, it would also be nice to chat with other security enthusiasts as well. I aim to become one of the most active people in Legion.

Elaborate on your achievements and future goals:
Most of my achievements have been forgotten in my mind. I lose track of time on the computer as 5 mins turn into 2 hours. I have created a lot of things, I have failed at a lot of things. I haven't done anything ground breaking in the security world, but I aim too. My main goal is to just gain knowledge. I want endless knowledge in security and I am certain that Legion will guide me to accomplishing that goal.

Tell us about yourself:
I am 16 and I live in the United States, more specifically Florida. I am a socially awkward nerd surrounded by brainless southern people. I was not born in florida, and I hate where I live. I plan on moving soon. I do not participate in sports because there is nothing to gain from it. I hate most of these ignorant kids at my school, and I wish there were more people who thought like me. I am very creative and always think of something. Nothing else comes to mind at the moment, message me if you want to know more.

Kidney - *March 10, 2014, 6:02 pm*
Elaborate on your skillset: Exploiting shells, Booters, vps, some coding gfx, html
Tell us why you would be a valuable asset: I listen good i am easy to work with i understand and i make friends fast im a outgoing person im mature :)
Elaborate on your achievements and future goals: Millatary, Or to help out the homeless with a job in coding or somthing like that.
Tell us about yourself: I am 19 i am from new jersey, i am a outgoin person easy to understand and learn from i have sharp listening skills i would love to learn more!

10286899 - *March 11, 2014, 5:00 am*
Elaborate on your skillset:
~Social Engineering
~Rats
~Linux
~Amazon
~Doxing (May seem childish but it comes in handy)
Tell us why you would be a valuable asset:

I am very skilled at SE and will gladly teach any members what I know. I can share all my knowledge I have acquired over the years with anyone that asks.
Elaborate on your achievements and future goals:
It's really hard to say as there aren't many things I am striving to achieve relating these matters, mainly IRL things. Will be working on getting my degree in auto mechanics next year.
Tell us about yourself:

Well, I'm 17 soon to be 18. I'm very mature and do my best to help someone in need out. I've been around quite a while and picked up a lot of useful knowledge along the way. If anything I am just glad that I had the opportunity to apply for this group. I haven't been active over the past few years because I was dealing with a lot of stuff in my life, but now I'm back and would love to get involved again.

I hope this application is enough as I didn't put a lot of effort into it like most.

xHipster - *March 11, 2014, 9:39 am*

Elaborate on your skillset: Basic SQLi, DOXing, recovering accounts, basic XSS, metasploit, wifi hacking and social engineering if needed. My focus is to stay under the radar and also avoid as much contact with other people as possible while hacking. By the way, I'm also good in math but that isn't needed most of the time.
Tell us why you would be a valuable asset: I'm not planning on quiting pentesting in the nearby future. I'm also a fast and dedicated learner. If i want something i'll completely go for it. Currently i'm focusing on learning more and more about pentesting. The way i'm doing this is by following a lot of tutorials but also by trial and error in me own lab set-up. I'm happy to share all the knowledge i have with others.
Elaborate on your achievements and future goals: Wrote a lot of advanced bot scripts (RSBot, Powerbot) for Runescape in the past. This was 2 years ago. I have build my first computer when I was 13 years old. I've also successfully into different types of computer systems, websites and wifi networks. I'm doing these kind of things in my own test lab. I'm focusing on staying gray-hat. I don't want to do any damage to systems or people. My goal is to remain quit and not get noticed at any time. Tomorrow i'll have a meeting with the network management team of our school. They might allow me (i have to stick to certain rules) to test the complete school system. This is interesting because all high-schools are connected on a certain level in our district. My goal is to get into the complete school system without them noticing me. So let's hope the meeting turns out to have a nice result.
Tell us about yourself: I'm a 17 years old (male). During the weekend at night i work as a light-technician in clubs spread out across our country. Across our country sounds big but the longest distance to a location where we work at is 80km. To explain this: i creating the light and laser shows at clubs. This includes designing, setting everything up, programming the shows, operating the shows, put everything back in the truck and get home between at usually 4-5 am. Besides this i'm interested in electronics like you might have guessed. It's also a part of my job to fix trials during a show. Working under pressure, fixing electronics is normal. This does not include highly detailed schematics. Beside these things i'm also interested in electronics in general. I love to dissemble things, find out how they work and put them back together.
I'll finish high school next year. Then i'll start studying physics at a university of applied science. Can't wait for that.
This should have been enough information i guess.

Have a nice day and happy hacking!

WACKO - *March 11, 2014, 3:01 pm*

Elaborate on your skillset:
Penetration Testing: This is one of my main skillsets. I know a lot about web exploitation (SQLi, XSS, RFI, LFI, etc.). I spend a lot of my time reading about vulnerabilities and thinking of new ways to exploit things.

Coding: I'm not the best at coding, but I'm still learning, and at a pretty fast pace. I am fluent in HTML, I know a lot of PHP, I know some CSS, and I know a fair amount of VB and am starting C# classes soon.

RATs: I'm not sure if I'd call this a skill set, but I guess I'll throw it in here anyway. I have a lot of experience with RATs. I've been around them most of my life, and thoroughly understand them. I have provided members with setups and assistance when requested.

eWhoring: I've eWhored a few times, and so far I've been very successful. I spend an hour or two here and there, and usually make $50-$80 each time. I can be very convincing, which leads me into my next skillset.

Social Engineering: When I used to RAT for the fun of it, I was very good at it. I can be very convincing at times, which is good for spreading. This skillset has become something I do on the daily.

DOXing: I can DOX fairly well. I don't ever DOX unless I feel it's necessary (Was scammed or something along those lines). I'm pretty good, I can find out most of the person's information.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset:
Well, I think having some more pentesters on the team could be of value, and I can help out a lot with pretty much whatever. I'm on HackForums literally every spare second I have.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: I've done a lot of penetration testing jobs, I recently completed one for a HackForums business (Obviously I can't give out the name of the business for privacy reasons but if you want proof please PM me and I can get proof from the owner himself).
I'm currently in the process of attempting to code my own private RAT in VB, I have the basics down, but I'm having some connection issues. I think I can get them figured out though, I'm still new to coding.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself:
My actual name is "Jack" and I'm currently 16 years old living in Canada in the province of Ontario. I'm out a lot with my friends, but still manage to be on HackForums a lot (I'm awake until 3-4 in the morning usually). My grades aren't amazing, but I think that's because of the lack of sleep. I'm truly dedicated to learning about exploitation, and coding. I save money all year just so I can go to DefCon at the end of it (Maybe I could meet some HF members there sometime). Anyway, I'm looking forward to meeting everybody in the group, please take my application into consideration!

- Sincerely, WACKO (Jack)

HIGH PAID FELLA - *March 12, 2014, 8:41 am*

Elaborate on your skillset:
Ratting & Botnets

This is the first thing I've learnt when I was learning hacking, I had a in real life friend and I was so fascinated about his hacking skills he said to check out HackForums. I did and now I'm here. I've got many slaves but I prefered in those times to do it Grey Hat because once I saw a man he was booking a vacation to a family park with his kids and wife so I just uninstalled him. I have many spreading methods and can help people with any problems, also for botnets.
I've many methods how to earn money with these and how to get them. I can discuss many methods and share my knowledge about many methods I use by myself.

E-Whoring

I don't E-Whore that long but it works like a charm, because of my SE skills I can get much money of it, I can help people with this and learn them some tips and tricks. I can manipulate people easy and can help people with setting-up their E-Whore actions etc.

Social Engineering

This is one of my best skills. I can do this because I can lie and manipulate very good, I hacked a hacker once because of it but that's off-topic. It helps me with my other skills like "Ratting" and "E-Whoring". I can help people with SE and it can give some nice opportunities to get nice stuff.

Coding

I know only CSS and HTML to create websites.
This is why I want to get into coding like C#, C and C++ etc.

Tell us why you would be a valuable asset:

I would be because I can help everyone who that wants and will be a proud and active member of the Legion! I always try to improve and learn much more things. I'll share my wisdom to the other members so they can improve. I want to be a student too because I have to learn much more and want to get into SQLi, XSS, RFI, LFI and I'm also learning web development then going towards things like C#, C, C++ etc.

Elaborate on your achievements and future goals:

My future goal is to start up a product line on HF and being a very known salesman, I'm currently doing this with some other members and will start soon and want to get into the things I listed above.
I also want to learn to code my own software and to get a good living
and to help out my family. Also starting up a helpdesk for new people in the sector.

Tell us about yourself:

Hello, I'm Marouane and I'm 14 years old (please, don't judge me on my age, I'm just honest.) and I live in Belgium. I'm from Morocco actually but whe moved when I was a little kid. I'm on HF to learn and to help other members. I'm also active in the R.A.T. section and like to help some noobies. I have also other skills like GFX where I didn't talk about. I want to keep on HF for some more years and I enjoy this place a lot!

JackedHF - *March 12, 2014, 11:08 am*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:
Ratting
I learnt ratting, when i first joined HF, I wouldn't say ratting is a skill, I would more say spreading and infecting people is a skill, it takes time and unique methods that haven't been shared before.

eWhoring
I read up on e whoring learn few tips but i don't think i would do this unless i was going need lot cash to start a project so this would be back up cash for a service or project, it seems fairly easy, will be willing to share ideas and thoughts.

Social Engineering
SE is one of my top skills as im website designer and developer so i would need these skills to boost people company's, in my services. You can also use it to your advantages say Social Media Boosting and eWhoring.

Websites and Development
I love doing bulidng websites i have notebook on my desk full of ideas and interesting ways to make site flow with ajax and css, but i also have ideas for sources scripts i can sell eg (booters, selling sites stuff like that)

Gaming
When i work with servers i really think of it category not just one way of using server.

DDoS - I mostly like to using severs for DDoS ways to improve DDoS Scripts and make them hit insane rates without using the server bandwidth, hitting extremely hard.

Webservers/MailServers - You can always use servers, for web-hosting and mail-servers witch is used for web-hosting you can always sell web-hosting for cash witch can always turn in to nice little bit of profit :)

Gameservers/VoiceServers - Another you can use servers witch this doesnt require to much ram is hosting voice servers and gameservers.

Website Hacking

I can do SQL Union,Error Based, Blind, i can also do Cross Site Scripting with LFI & RFI which our out of date now i will be looking up some new ones very soon when i get some free time :)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us why you would be a valuable asset: I think i would be valuable asset to Legion, i will be making hacking tutorials and stuff i will be willing to do under legion name, and im determined to do well for the group share my tips/guides/exploits.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your achievements and future goals: I have never really set a goal for my self, unless im determined to do it. If i dont wanna do it, in about week i will give up on it.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Tell us about yourself: I'm 15, 16 in 6 days (Woo!), i can get along with people very well, i dont really like arguing but i like watching them happen i think sometimes it can be laugh and stuff im from united kingdom and yeah not really much to tell about me :)

Grumpy Otaku - *March 12, 2014, 8:28 pm*

Elaborate on your skillset: I have extensive knowledge in the modding of the PS3 console and have made a tutorial on how to do the basics. I have gotten into coding lately and have the basics of HTML and CSS down in 2 days.
Tell us why you would be a valuable asset: I would be a very valuable asset because I am a very determined and fast learner and up for any challenge that is given to me. I can also help those in need when it comes to modifying gaming consoles. I love to share the knowledge I have!
Elaborate on your achievements and future goals: Some of my achievements are making several tutorials scattered through out the internet and also making $120 online. Some of my future goals are to be able to create my own applications and websites with ease. I also plan on going to college for programming I will be taking programming classes in high school because I find it fun just to code stuff in my free time and help others do the same.
Tell us about yourself: My name is Matt I am 14 turning 15 this year. I think I have a higher maturity level than almost everyone my age. I have a select group of friends I am loyal to. I am a very loyal person once you gain my trust. I find any type of coding fun and I also love modding anything I can. I think I am fairly smart I learn things very quickly most of the time, I love to learn new things that is why I am applying for the student program.

Thanks for reading.

Regards,

-Matt / Mr.Drezz ?

King Cobra - *March 13, 2014, 10:18 am*

Some of these applications are well written. Trust me, you need a good amount of skills to join Legion. Anonymous has tightened up now, and doesn't accept randoms! Prove that you are worthy of joining Legion.

Skitlz - *March 13, 2014, 12:59 pm*

Elaborate on your skillset:

RAT's and Keyloggers
Spoiler (Click to View)I have used RATS and Key loggers for awhile now for various activities. I am always looking to spread and get more slaves. I feel I have some good knowledge in this field.

Pentesting
Spoiler (Click to View)Recently, I've been attempting to learn about pentesting. I'd still say I am a beginner, but I really do enjoy learning about it. Joining legion would be great to hopefully get taught some amazing things in this field!

E-Whoring
Spoiler (Click to View)I am pretty sure everyone has experience in this field. It's a good skill to develop as a beginner to speak your way in and out of things.

SQLI
Spoiler (Click to View)Along with penetration testing, I've only learnt this recently. I have injected a few vulnerable sites, and I am happy with my current mediocre experience, but I am definitely looking to learn more.

There are a few more minor things, but I won't list them here.

Tell us why you would be a valuable asset:

I'd hope to be a valuable asset of Legion to represent the group well and prove to others, you can really turn people from beginners in to experts. I am trying my best right now to learn by myself, but with Legion's assistance, you could help me greatly so I can eventually help others.

Elaborate on your achievements and future goals:

Hello, I'm Skitlz, Also known as Jack is the real world, In my life iv'e achieved many great things, Such as becoming a professional basketball player, Donating to charity's and been as nice as I could to all people. My future goals in life are to grow up and become a great man, with a loving family and a successful income,

Tell us about yourself:

Hey, my name is Skitlz! You may have seen me around, as I am a very active member and a leader of Respawn, I always enjoy helping people and learning, it's one of the main reasons I joined Hackforums. I am pretty easy to get along with and love a conversation.

Thanks for reading.

Grimzyy - *March 13, 2014, 4:08 pm*
Elaborate on your skillset: I'm fluent in Web Development languages (HTML, CSS, PHP) I can also do basic Javascript and a bit of ruby.

Remote Administration Tools: I have used Darkcomet and jRat, both have been rather useful and fun to use however I do personally prefer a FUD keylogger as in my opinion they're alot more stealthier.

Web Exploitation : I'm pretty good with SQLi, Broke into countless websites using it, I would like to learn XSS and stealing Internet Cookies and such.

Other : DDoS, Doxing, Computer hardware, any kind of drive bys (JDB ect), Servers, High knowledge of Malware, Linux (Backtrack, Linux, Ubuntu), Shells

Tell us why you would be a valuable asset: I would be a valuable asset to legion as I'd be more than happy to share any methods of hacking with anybody if need be, I'm online everyday so I'll always be online to help people if they need it, If anybody wants to learn something from me then

I'm more than happy to teach them (Teaching some guy html today) and I really want to learn more and get into some more high level hacking and really expand my knowledge.

Elaborate on your achievements and future goals: I have personal achievements, most are blackhat. I want to be a Penetration Tester when I grow up if not that then a web developer as I really enjoy website development.

Tell us about yourself: I'm a 14 year old who has a big interest for technology. Found hackforums one day surfing the internet and from there I started on tutorials and gradually expanded my knowledge, I found codeacademy obviously and from there I began learning programming languages (Completed html & css twice, completed php, 25% on python and javascript) and actually I've coded a simple website with HTML, CSS and bootstrap for this application, it's my first suprisingly but I think you'll like it.

http://blacknesshf.byethost10.com/home.html - This expands alot more on my skillsets, about me and what I want do to when I grow up.

To finish my Application please take a look on the website I made from scratch otherwise you don't know my full application!

Dorrance - *March 13, 2014, 6:15 pm*

Elaborate on your skillset: [img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] MonentizingAdense Exchange, Trafficing, Marketing, PPD,PDA
DoS & DDoSingI know very a lot about Botnets, Stressers, Booters, and how to setup and make DDoSing Scripts
Gamingcompetition, Xbox modification, Genres such as Fighting, Adventure, Action, Shooting
Backtrack & PenetratingExploits on how to backdoor things and inject things to check the vulnerability.
CodingI been coding in C+ for visual basics not a very good at it and I know a little HTML, XSS, and PHP.
E-WhoringI Have done this for 6 months and manipulated people and made profit my SEing skills is involved in this.
RattingI Have known about Rats since 2011 I started using them in 2012 and I know very useful and easy tactics to spread a rat.
Social EngineeringI Have been doing this since mid year 2012 my persuasion skills are high. I have use these tactics for good or getting whats need to finish something. It helps me with Doxing,
E-Whoring, Hijacking things

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us why you would be a valuable asset: I think I could be a valuable asset to Legion by doing such as learning and teach new ways to help others out. And I could give things away that are useful, donate, and make things in the name of Legion. And give good ideas to the Legion group and help evaluate problems to improve in and as a group.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals: I would like to know that when I am done, I could possibly go to college and afterwards work for to have a great job for what I have learnt before, and be a master at it. But a very good thing I would I like to join this group because I can see my career in this group of growing in specific area to learn more. Such as programming, social engineering and rooting to get objects also earn profits.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Tell us about yourself: My name is Matt, I am a sophomore this year in high school. I play the drums during free and bored time and I am a giving, respectful, responsible, and honest person. I am a very dedicated hard working person I continue what I do to thrive and achieve goals. And to improve my ways on things and help the needy if in need or help such as the non money earns to buy or get things. I earn a surplus of YouTube

revenue per month for monetizing my channels and being partnered under a network named Fullscreen. The very first console I had for gaming was a Nintendo 64 and loving James Bond games majority of time The current console I play the is Xbox 360 and play mostly fighting, shooting, action, and adventure games. But most of all I love playing the series Call Of Duty and Halo, my favorite game is Call Of Duty Modern Warfare 2. But a very good thing I would I like to join this group because I can see my career in this group of growing in specific area to learn more.

root@fox - *March 14, 2014, 4:58 pm*

Elaborate on your skillset:
For the most part, I am skilled in "old-school exploitation." What I mean by that is 0day hunting, Buffer Overflow/Fuzzing (Stack, SEH, Heap Spary), and Rooting. I've been coding for a few years now, and currently know Python and C++ in addition to the standard for web coding (HTML/CSS, PHP, SQL)

Tell us why you would be a valuable asset:
I know my shit from advanced SQL injection to managing Botnets. I can do real hacking tutorials that haven't been done before, and can help current users with learning what they want to learn.

Elaborate on your achievements and future goals:
Pen-tested real networks for real companies (If you want the name of the biggest company pm me) In the future, I plan to go to college for and major in business. With that said, I'm looking to run a computer sciences/computer related business. I have a few 0days that no one else has and will haply verify that by showing one of the people recruiting one.

Kirian - *March 14, 2014, 9:50 pm*

Elaborate on your skillset: RATing - RATing is probably the first hacking topic I learned on HackForums. I was interested in learning about what kind of limitless options you had once you gained control of a computer. I was 12 at the time, and I have grown familiar with this topic. From time to time, I usually help out members who need help with this topic like how I learned. I do not think RATing is hacking, but merely a side-topic of hacking, like booting. I think I would be good for helping out new members with this topic as I am capable and experienced.
Social Engieering -I am still a beginner in this topic but I am still capable of SEinng. I have SEd multiple items before from cheap sites. I have once maniuplated a Chinese Phone Site into thinking I was a Phone Reviewer, and they sent me an S1 to review, but I never did it. They later on forgot about it and I had a new phone. I think I could help members in some topics of SEing.

Tell us why you would be a valuable asset:I am a beginner and I would like to share what I know. I am not going to lie and say I'm a very advanced hacker because you guys want honesty. I am wanting to join Legion to familiarize myself with new types of techniques to breaching security and learning new ways to hack.
Elaborate on your achievements and future goals: I don't really have much achievements but in Year 6, I made a presentation about Batch Programming, and made a in-depth review about how it works. I scored a 86% on my presentation and I was very proud of myself. For future goals, I hope to be in the Army for a few years, and go to university for Computer Science and study multiple programming languages and try get a job at Google.
Tell us about yourself: I am a 13 year old who loves Skateboarding, Browsing HF & meeting new people. I am in my 2nd year of High School in Australia which is a little different to the American system, so if I was American, I would be in middle school. In Year 7, I was hopeless at Math, but in my first test for Math this year I got the best score in my class and I got Top Ten best in all of Grade 8. I was proud of myself as I had studied before. My favourite subjects at school are Math & Science as I find this subjects less boring than the rest. I have also been skateboarding for 7 years straight, but I have grown out of it lately as I moved to a beachy part of Australia and there aren't much

skateparks. I usually skate at the beach but I can't skate vert as good anymore and am more of a street skater.

Dolan. - *March 15, 2014, 12:41 am*

Elaborate on your skillset: Not a whole lot more than the average skid. I can use RATs, create websites, and read instructions.

Tell us why you would be a valuable asset: I don't know what you consider to be a valuable asset, but as a student I'm willing to listen and adhere to advice which is a lot more than I can say for others. There's nothing yet for me to offer that hasn't already been offered by everyone else, but I'm willing to put the time and effort into learning.

Elaborate on your achievements and future goals: I once followed an SQLi tutorial and defaced a website, 15 year old me was pretty pleased. When it comes to hacking, I've got nothing worth bragging about. Academically I've been successful for my entire school life, always in the top percentile of grades across the school. Future goals are to complete this year in the top 5% of all other 12th year students in the state, and then get a degree in the IT industry

Tell us about yourself: Born and raised in the rural side of Victoria, Australia. Parents were divorced by the time I was 6, and with 3 siblings money was always tight and luxuries like the internet weren't available. For the next few years I do well at school but I'm missing something in life, sports don't do me any justice and clicking away at the computer without internet got boring real fast. Fast forward to 2010 and I move out of home at the age of 13 to live with my Dad and step mother. Get given a laptop and an internet connection, become the happiest I had ever been. I spent hours of my time simply playing multiplayer games, it was 2010 and I had never played online. I was fascinated with how computers worked and I spent weeks trying to learn how to make websites and skid quality VB applications. All the while I was at a new school with new people, and no new friends. I found HF in 2012 and was amazed at the knowledge of the people, and took a strong interest in RATs, particularly DarkComet. Although this was nothing special and it is just a process of a few clicks, I felt like a god. Early 2013 I had joined Respawn, and developed a case of depression. I used HF to keep my mind of things but depression got the better of me and I had to leave my online life and friends behind. During my year away from HF I was able to overcome depression, but almost lost myself to it on multiple occasions. I stumbled accross a few files on my external harddrive in the last few weeks and I've been making my slow return to HF. So yeah, that's me.

Shanks - *March 15, 2014, 1:16 am*

Elaborate on your skillset:

DDoS'ing:

When you have the word DDoS, I'm quite sure you thinking of any cheap Booter but that's not the case here.

I'm probably the most experienced and with largest Attack powers here on Hackforums, I do use the main attack forms such as icmp syn udp http data, but I have other ways to take down website - Were I usually need 1/10 Of the power someone else would need.. if they could even down it.

My New started service here on HF: https://hackforums.net/showthread.php?tid=4103211

Doxing,SE and Account Recovery:

I started with this when I was quite young, I guess it all started when I was trying to Hack Runescape accounts - like many more people started.

Than this grow till a level were me and my Friend was earning grands a day using this.

When I say SE I don't mean getting Free Xbox One or w/e.. I mean Talking to hosts,Email providers,The target itself etc.

Contacts:

This might sound odd, but the thing I have most is probably contacts.. After all I'm quite a lazy human - But I got friends that all have different skillsets, so if I ever need something I ask them.. and I help them if they want something in return, maybe I will have to question another person to get his question.. I have always been and always liked being some kind of middleman.

Of course I know the basic's such as - RATing, E-whoring etc..
Tell us why you would be a valuable asset:
I'd say my valuable assets is the following listed above on my skillset, hopefully I could learn some things if I get into the group by other members as well!
Elaborate on your achievements and future goals:
I'm not to impressed about my achievements, since they are big but usually end up getting fucked after months.. years of work.
I guess I have had been quite successful with Runescape Hacking as I told above, my friend made 300k Dollar from hacking RS Accounts and I haven't really reached that so.. but I'm OK.
I run 6 Adult websites, Will start earn quite good on them with a greyhat/Blackhat way.

Goals: That sure is to learn some more coding, after all I'm quite bad at it.
Tell us about yourself:
You mentioned that you was only interested in our Hacking skills so I won't spend time writting a long text about myself, since I have already mentioned my Skills above.
Btw, I would like to keep it quite Anon.

-Shanks

HFexC - *March 15, 2014, 4:11 am*
Elaborate on your skillset:

i) Coding in PAWN (Its simple C pretty much.) - I've been coding for about a year in this language, I've learned so many things over these past years that have been extremely useful to me.

ii) Graphics (Pretty good when it comes to photoshop and image manipulation.) - I've been using photoshop for a few years, I must say it's one of the best tools out there. I do 2D and 3D art, I model in Blender and I use Paint.net mostly for 2D isometric graphics.

iii) Social Engineering - Been SEing for MANY years. However, I must admit, I've never SE'd any real life items for myself, only digital things which I could sell and gather money to legally buy higher-costing things. I'd mostly SE from gaming companies like robin hood. And then either give those games to charity raffles or sell them for a few bucks. Cause, come on.. all they do is click a button and generate a key. And no one pretty much earned anything out of it, and if someone did, it would be for a good cause.

iv) General hacking knowledge, I've been around the hacking scene for a few years. (Around 6-7 years.) I can RAT pretty well, I know how to spread, I don't do web-site hacking anymore, I also used to do a few deeply blackhat stuff which I've stopped recently.

v) Emotional support - I've been helping people throughout the forums and I'm also running a helpdesk which got me to help a few people and still am. Well, I'm studying psychology in real life and I'm also volunteering in a greek suicide hotline, where you call to be given help in-case you're driving insane and you're having suicidal thoughts.

vi) Learning - I am a fast learner indeed, I had learned how to play dwarf fortress, if you are aware of that game in one day. Or well, the basics at least. It was one of the most confusing games ever, but I had the patience, to go through the ASCII graphics and learn the game. I am really patient if I know what I'm learning is something I'm interested in.

vii) Monetizing - I monetize online LEGALLY, not using any click-exchange stuff by running my own youtube channel with a female friend of mine and another guy.

viii) Decisions - I prefer to think myself as a person who is able to take split second decisions, after working in a suicide hotline, I've learned to take split-second decisions. You have to advise the person correctly, or else, you might lead him to death.

Tell us why you would be a valuable asset:

To be honest with you, I've always dreamed of being a part of a group on HF, I've been lurking here and there, and I chose Legion, hoping that it'll choose me back. I can say that I am quite a dare-devil when it comes to decision, but I also do take some time to think about them, or well, it depends on the decision. I also learn quite fast and I'm willing to teach people, I will give in most of my time to the group and I will be trying to share in with other people, I will be trying to help people with my knowledge, I was lucky to learn it and my theory is that I should give back to society and I always will, no matter if I'm a part of a group or not.
I also help people as much in real life as well.

I'm quite smart when it comes to anything computer related and I will be studying something to become perfect on it, if needed or not. I am also stubborn when it comes to doing new things and I will keep on trying and trying, no matter how much time it takes.
In conclusion, I can help, will help. I can contribute, I will contribute. If there's anything I can do to help someone, I will do it. I love helping people and I will keep on doing it if I am able to.

Elaborate on your achievements and future goals:

My only achievements which I'm proud for are the below:
i) Helping people out of depression.
ii) Interesting myself within the monetizing section of hackforums and also youtube.
iii) The following threads:
https://hackforums.net/showthread.php?tid=3747968
https://hackforums.net/showthread.php?tid=2908316
https://hackforums.net/showthread.php?tid=3981556
The 2nd thread might seem immature, really, but I hope that I did show to a few people that fighting for a cause might help. I've also helped people of the community outside it, through skype and so on.
iv) I also am happy to achieve getting to know people from hackforums which were kind enough to help me with my real life and helping them back :').

The only thing that I could wish for the future, my goals.. would be to become a well known youtuber, establish a steady relationship in real life and to help more people with their real life problems (emotionally) and help other people on hackforums in any possible way, in general, I want to give back to the community.

Tell us about yourself:

I am 16 years old, I come from Greece, Athens.
I am a dedicated gamer and contributor to hackforums. I love to chat, get to know people, help them, make anything that looks nice (that's why I'm involved in graphics, both 2D and 3D (modelling)). When I see someone doing something wrong, I'll go ahead and say what he's doing wrong. I'm pretty much calm most of the time and that's about it. I'm a big time grand theft auto fan and I've been playing SAMP (san andreas multi-player) for many years now, it's that one game I am dedicated to, and I will be, no matter how old I am. I love working for something that I like, or something that I want to learn. I'll do ANYTHING possible to learn something which I am interested in. I spend most of my time online on hackforums.net, innuedo section, or the gaming section

(mostly League of Legends or the general gaming section), I know I don't have a lot of posts for being here, but then again.. it's quality over quantity, isn't it? Now, learning english has been extremely hard for me due to me coming from Greece, you have to pay to learn english as it's not learned quite well in school, excuse my grammar in this whole application.
Have a nice day!

Darc - *March 15, 2014, 9:24 am*

Elaborate on your skillset:
RATs, I am very experienced with RATs. I know how to use and/or setup almost every RAT on HF. I have helped many members with RATs in the past.

Networking, I have helped many people with port forwarding. I plan on learning more things like All Routing and Switching, Full Web Vulnerabilities, and how to secure and maintain a wireless network in a hostile environment. I'm working on learning more and more everyday.

Marketing, I have learned a lot about marketing with my time here. I plan on opening some shops and selling my products on HF soon. I have learned many techniques and methods throughout the marketing section. I plan on learning a lot more and selling a lot of things in the near future.

Some other helpful skills
-Some small Blackhat things (Offsite)
-Social Engineering
-Computer Overclocking, Customizing, and Hardware
-Making Money (Haven't made that much but looking to making a lot more and finding my own methods)
-Learning SQLi (Still A noob)
-Doxing (Wouldn't consider it a big skill because it isn't that hard)
-I know a few things about CryptoCurrencies. Still learning a lot of things

Tell us why you would be a valuable asset: As of right now. I will be able to share my knowledge and help out any who needs it. I know I will be able to learn a lot from this group and be able to give it back. I can teach anyone my skills and would love to learn more from the group. Knowledge is everything and is never ending. I plan on making a lot of guides and helping every member as much as I can. I also plan on sharing my knowledge throughout the members of Legion and helping out as much as I can.
Elaborate on your achievements and future goals:
-I would love to open up some shops here on HF and sell some products on HF for example a booter or a VPN.
-Learn All of the Coding language
-Master Networking and SQLi
-Become Respected on HackForums
-Open up my own website and keep it running
-Learn as much as I can

Tell us about yourself:
Well, I'm a 15 year old who has tried to soak up as much information as I can from HackForums. I have been to the Networking section to the Python section. I have spent most of my time browsing. When I first joined this Forum I didn't post a lot just browsed for hours. With the money I made off this forum I got l33t and soon enough ub3r. I hope on increasing my knowledge more and more everyday. Knowledge is every to me. I just can't get off HF. There is too much knowledge here to go away. I'll just keep going from post to post and soon enough I realize 4 hours have gone by. I'm also a very social and fun person. I love helping others and love learning new things.

NotCoolBro - *March 15, 2014, 10:12 am*

Elaborate on your skillset: Extensive knowlede into web based exploitation and language knowledge of PHP, ASP HTML and CSS. more limited knowledge into machine based exploitation and penetration testing. Networking and C.

Tell us why you would be a valuable asset: Im a skilled individual who knows his stuff and doesnt mind contributing and helping unskilled users

Elaborate on your achievements and future goals:CEH, GCSE Computing, A Level Computing, A+ cert, hoping to go to uni to study ethical hacking soon

Tell us about yourself: Im a easy going guy who likes hecks.

Storm- - *March 15, 2014, 7:55 pm*

Elaborate on your skillset: Networking, Social Engineering (not getting free stuff kind of social engineering, more talking my way into a machine, rather than hacking it) and Deception in general. Other than that I have what I consider to be a basic knowledge of most common area's of hacking. I can code very well in Bash and Batch (if you consider that a language) but know the basics of almost every other language there is. I also have a very in-depth knowledge of how most Unix systems work.]

Tell us why you would be a valuable asset: I would like to be able to be able to have a better line of communication to those who wish to learn, instead of hacking to sift through PM's every day of people asking me to hack facebook accounts for them.

Elaborate on your achievements and future goals: I have no achievements I believe worthy of note. My goals on this forum in particular are to raise the standard of learning, and to create more HQ guides and tutorials and hopefully inspire others to do the same.

Tell us about yourself: I'm storm-. Hi.

Elaborate on your achievements and future goals: ^

Tell us about yourself: ^

AppetiteforDestruction - *March 16, 2014, 4:28 am*

Elaborate on your skillset: I have some experience with social engineering and ewhoring. A little bit of experience with RATs

I am willing to do my best to learn and once I learn I will be happy to help others.:

My achievements are mainly earning money online, and setting up a RAT:
I am a friendly guy. Music is my one other passion in life.:

Arkantos - *March 16, 2014, 8:25 am*

Elaborate on your skillset: I'm a professional Java & PHP dev, but I know many other languages such as Html, Css, MySQL, Python, JavaScript, jQuery.
Tell us why you would be a valuable asset: I would really contribute to make this group more valuable than it is now by releasing my futur programs with a credit to Legion Group.
Elaborate on your achievements and future goals: I've created a lot of programs such as an OG name checker, Time managment app [web based], tons of Bukkit plugins, web clicking bot and much more!
Tell us about yourself: My name is John, I'm 18 years old and I'm Canadian. I program since I had 10 years old and the first programming lannguage I tried learning is C, but I foud that too hard so I didn't learned all the language, instead, because I was playing Minecraft, I decided to learn Java. I was a dev for my friend's MC server and I've created many original stuff for the server such as money managment from inventory, magic wands, and much more. Now I'm principally doing Bukkit plugins and I've got a bunch of orders that I'm currently coding. I think that's a general summary about me. Thanks for reading it and I hope I will be accepted.

Arkantos.

Elaborate on your skillset:
My skillset:

- RAT-ing
Spoiler (Click to View)
I got much experience with RAT's, I know how to set them up and how to get easy slaves.
I love to help people with a RAT and setting them up.

I've also made a tutorial in the past about how get slaves on a RAT.
This was in the time i just joined HF.

https://hackforums.net/showthread.php?tid=3310398

Atm I'm more in the whitehat activities, but I still know how a RAT works and how I can use it.

- Marketing
Spoiler (Click to View)
I got much marketing skills, I know how to make money online and got marketing lessons on school.

- E-whoring
Spoiler (Click to View)
I got experience with e-whoring, I know how to make money by this and I know how to act like a "E-whore".

- Producing EDM (Not really hacking related)
Spoiler (Click to View)
Well, this is not hacking related but I did want to add this beceause I am producing EDM music for a pretty long time now.
To check out my EDM music click on this link.

Tell us why you would be a valuable asset:
I think I will be a valuable asset beceause I am a nice person and I love to help other people.
I am a friendly guy and I got much experience with my skillset.
I will be able to help people inside the group aswell outside the group.
I will represent Legion well to others.

Elaborate on your achievements and future goals:
My future achievements and goals are to meet more people on hackforums and help more people.
I also want to learn more about producing music, another thing I want to learn is coding.
So I can start my own crypter in the future.
But I know it is hard to learn coding and you have to begin at the begin so it will be hard and I have to put much time into this.
But somewhere I know I can learn it so my motivation is allright.

Tell us about yourself:
My name is FlashPoint, You may also call me Ramon.
I am 15 years old and i love to hang arround with friends, I also like to produce music or to make money online.
I am a friendly person and I like to help others, I got much experience in blackhat aswell whitehat activities.
I live in holland a small country in west-europe.

I think this is enough information about me, I hope you know me some better now.

Acroz - *March 16, 2014, 1:49 pm*
All students have now been invited. If you haven't received a PM from me, you didn't make it. Additionally it's a shame to see so many not putting any time into their applications...

Next wave of students will be invited in some days.

CatSoup - *March 16, 2014, 1:52 pm*
Elaborate on your skillset: Java and CSS programming.
Tell us why you would be a valuable asset: I am a programmer and can make hacking tools such as

turbos, bruteforcers, ect.
Elaborate on your achievements and future goals: I want to graduate college majoring in Computer Science and find a job in game development.
Tell us about yourself: I am a programmer. I also know how to dox (ssns, address, family, ect). I am also a huge gamer and that consumes my life mostly. I am a peoples person and can serve people as well as interact well.

Thanks for reading.

Spratty - *March 16, 2014, 2:27 pm*

- My Skill set -

Online Money Making
Spoiler (Click to View)
Over the last maybe 3 years (Since I was only 12 Years old) I have been exploring ways of making money online.
I have tried and succeeded at many things including CPA, PPD, CPC and even providing my own products.
I have provided many different products in the past,
For example: Webhosting, VPS', At one point I owned a booter and a VPN.

Graphics Design
Spoiler (Click to View)
Although at the moment I am not the best graphics designer I still love to practice graphics design.
This is why I refuse to purchase thread designs, Logos etc.
I believe in the fact that the more you practice the better you'll be.

Website Creation
Spoiler (Click to View)
In my free time I love to create websites.
It's one of my #1 hobbies.
I am still learning the in's and outs of much Website design however I love to develop websites,
To see what they can become with a little bit of work and to see how popular I can make them via social media and SEO.

Ratting
Spoiler (Click to View)
I don't have a lot of experience with ratting however I am able to set up a Rat.
I would love to learn what more I could do with a rat.

- Why would I be a Valuable asset? -
I think I would be a valuable asset to Legion because I love to help people out.
If someone need's help with something that I may have even the slightest bit of knowledge about I will do my best to help them.
Being helpful is in my nature and it's just how I was brought up and taught to be.
I may also be a valuable asset because I love learning from other. Not only will this keep me active in the SF but it'll enhance my personal knowledge.

- My Achievements and future goals -
This is going to be a hard one for me because I never like to act too up myself.
One of my achievements has to be when I had my first £1000 Month, That was a happy day for me.
Another achievement would be when I achieved a B in Physics (The subject which I personally find the hardest).
This would be a massive achievement for me, The fact that when no matter how rubbish life got for myself and my family I never gave up and I never said "Fuck It" When things got tough. I pushed onward and upward.

My goals would have to be as follows:
To create an online empire so when I'm older I can work from home never leaving my family at home for a day. I would like quite a small family.

Another goal would have to be to get all B's in my Exams coming up in the next few months.

- About me -
Hi there, My name's Josh, Or I'mAGod.
I'm a 15 year old lad from the East of England.
I'm quite a helpful boy and will always help when requested.
I have many hobbies, Many originate around the computer however many off the computer too.
One of my main hobbies off the computer is reading and I often get through 3-5 books a week.
I don't get out much as I literally live 15 Miles away from most of my friends.
I quite enjoy learning (I know, Many people would hate learning especially school) However I quite like school.
Even though I'm failing a few subjects I still try my hardest to be the best I can.

Cherry. - *March 16, 2014, 2:40 pm*

Elaborate on your skillset:

Remote Administration Tools | Coding | eWhoring | SE | Doxing | Account Recovery

Tell us why you would be a valuable asset:

I think I would be a valuable asset to Legion, because i like helping members of hackforums and teaching them about my skills. I also like getting tips from other people and i can maybe help Legion members with stuff they might not know.

Elaborate on your achievements and future goals:

By the end of 2014 i want to be earning around $50 a day atleast. My achievement is in one day i got $250, it was an amazing day for me. I also have many more like when i hacked a 16k youtube account and sold it for $80.

Tell us about yourself:

Hello, im 16 years old. My allies is: Cherry, i can code in html, vb.net,c++,and c#. I have won a doxing contest, i was the only person who got the write information, 14 other people got the fake information. I am pretty good at getting peoples accounts for them, my mates skype has been jacked a couple of times and i got it back for him. I have many hobbies like football, gaming etc.

Even though i hate school, i like learning new things... I have made over $200+ in a week from eWhoring without a vcw, just selling pictures to pedos. Then i went on a different account and blackmailed them and got another $50 to my name. I try my hardest at new things like PPD and CPA are new to me, im still trying to earn a way earning $10+ using CPA and PPD, but that's hard but i refuse to give up. I have a good amount of bots on my remote administration tool and my botnet, i know how to spread and a long time ago i made a method on hf and gave it away how to get tons of slaves and it got over 300+ replies. So yeah that's me guys, im going to end this here. Wish me luck. ?

Repentant - *March 16, 2014, 4:12 pm*

Elaborate on your skillset:
Marketing
Stress testing Field
HTML, CSS, & some PHP
Bruteforcing [FTP/SSH/Website Logins]
Rooting Servers
Social Engineeering
Doxing

Tell us why you would be a valuable asset:
I will be a valuable asset, because I am willing to help other members the art of hacking, Protect eachother, and help eachother last but not least be a High quality contribution to the group.

Elaborate on your achievements and future goals:

Rooted alot of servers, Doxed over 100 people, social engineered about 50 items & Bruteforce over 200 website logins.

Tell us about yourself:

I enjoy spending my time on the computer, learning new things each and every day, and I love helping other members, I got nothing else to say anymore but adding me to Legion Group will be a great choice in your behalf. #Long Live Legion Group ! ?

WreckfullTM - *March 16, 2014, 5:49 pm*

Elaborate on your skillset:
Ratting
I am very experienced with ratting when it comes to spread, setup or port forward. I have been previously into the RAT group long time ago but now it doesn't exist anymore, I helped a lot of people who had problems with setting up their rats or port forward their router. Also I have created a self guide about the Paradox RAT so many customers who purchased Paradox RAT received that guide for free of course and I was giving out free support just to contribute somehow to this community by helping and teaching some guys how to do that. I have written a lot of tutorials in here but I don't know how they got deleted. Anyway I have just these left.

[GUIDE][CHECK][NOOB - FRIENDLY][TIPS & TRICKS][TEST INSTALL]

Causevd's - RAT Support [RAT Setup Port Forward Spreading Tips]
[TUT]How To Setup DarkComet RAT 5.3.1 + PortForward - NOOB FRIENDLY[TUT]

Also what I do is everything HQ and I am trying to make it looks more noob-friendly so everyone can understand and in details with pictures and maybe included video after all.

E-whoring
I've been active in the past 4 years by doing e-whoring and I can say that I've been earning quite a lot the past 1 year, I was earning $300 per week but since that method got leaked and everyone started to use it wasn't that profitable anymore. I have posted some cool packs into the ewhoring section just to help other members to earn some money from the private packs that I had and make them happier in some way. I am willing to post soon some kick-ass tutorials which are still not revealed and are already done. I am just waiting for the right time.

PPD
I've been learning quite a lot about PPD since these new methods came out so I am skilled in PPD a lot. I've been using various of methods and improving many niches which brought me very good profit. I am exploring many other ways on how to earn more money. I can newbies with PPD and teach them how to become successful.

Tell us why you would be a valuable asset:
Because I want to help to everyone by giving some ideas, no matter what, or if it comes to setup some RAT or to teach something else I am here and willing to help in any kind.

Elaborate on your achievements and future goals:
Since I am a retired ewhorer I may come back to start again because I really need quick money and I know that I have been very successful. But the problem is that when I see some of those pedos it really makes me sick. Also other achievements are to learn to code crypters, stressers and any other tools that are related with hacking, but mostly about crypters in any language no matter if it's C#, C++, Delphi, Python, VB.Net etc .. But my goal is to earn $500 per month but doing PPD or CPA.

Tell us about yourself:
I am Dimmy a.k.a causevd, 21 years old, student. My passion is to make a lot of money on internet and I am confident that I can make a lot of money on the internet than to apply for a real job. I love any kind of music, open minded to learn coding, calm person who loves to watch basketball, also basketball is my hobby

Expels - *March 16, 2014, 9:16 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]

Elaborate on your skillset:

My Skillset:

RAT-ing:
Spoiler (Click to View)I'm new to RAT's , but I feel I learned quickly and understand them quite well. Spreading isn't a problem, I haven't been working with my RAT recently because I have either been helping other members set them up or browsing the forum giving tips to others. I plan on making a tutorial on Darkcomet and Imminent Monitor 3 to help the community more understand a bit more or to learn a few tips. In the tutorial I plan on adding

-How to download the RAT
-How to portforward
-How to use DUC
-How to create your first stub
-How to test if it is working
-How to crypt it
-How to spread it

I have seen a variety of tutorials made by fellow members but none the specify each individual thing in one thread.

I plan on making this tutorial within the next week or two.

Marketing:
Spoiler (Click to View)I understand how to advertise and sell a product. I'm currently working on writing 3 e-books and getting them stickied. I understand and make good money online. (Not as much as Anonymous) and plan to teach to community how to earn while making money myself. I don't teach lies either, I actual spend time writing methods instead of copy/pasting junk into microsoft word.

Also I can usually sell someone on my products, with real information and not lies.

E-Whoring:
Spoiler (Click to View)This is something I'm not extremely fluent in, but can make a quick buck and make someone think I'm a girl. I usually go to teen-chat rooms and get pedos and earn $10 - $50 off of them via skype and a VCW along with Social Engineering. This also goes along with RATing as you can social engineer them into downloading your noodz.exe and selling their personal accounts or mining with their PC.

Tell us why you would be a valuable asset:
I think I would be a valuable asset because I'm a good friendly person that is willing to listen and assist people whether I have broad knowledge on the subject or not. I'm friendly and won't cause arguments or issues, and am willing to help people in or out of the group. I'm also good at listening and can learn from others and use that knowledge to help more when they aren't available, and use it to expand my personal skillset.

Elaborate on your achievements and future goals:
My personal achievements are earning $600.00 in one month this was when I first started earning and that was a really BIG thing. Also another was creating my first e-book, I spent good time writing that and getting everything setup I put a lot of effort fourth and toward a good cause. My Future goals are to keep good grades in school and do well for the rest of the year. I'm also interested in learning coding so I can get a nice program set up, free of cost for HF users to be a part of and use. I understand learning coding is a long process and takes time and effort and I'm willing to put that fourth to help the members of this forum and to further benefit myself and my personal skillset.

Tell us about yourself:
My name is Sam but you can call me Expels. I'm a 14 year old in Ohio in the United States of

America. I'm quite helpful and act mature. I usually work on the computer, yet stay active with my friends. I often hang out with friends over the week-ends as I'm busy during the week. I haven't been able to get outside as it's so cold out, but I personally love talking to the members on HF during the cold winter. Sometimes they give me a good laugh, have an interested story, or teach me something new I didn't know before.

ComplexTM - *March 16, 2014, 10:52 pm*

Please don't let my application be effected by me being not upgraded, I plan to upgrade soon once I understand the site more.

Elaborate on your skillset:

Website Hacking

I enjoy hacking websites now and then. I am very experienced and I am able to think around filters and such. I have been doing it for around 2 Years now and I have improved greatly. I'm hoping to improve my knowledge even more by grabbing this opportunity.

Other Skills:

SQL Injection
XSS
LFI
RFI
CSRF
Server-side Includes Injection
Arbitrary File Handling
Arbitrary Code Execution
Directory Traversal
Arbiarty File Uploading
Direct Dynamic Code Evaluation
WAF Evasion
File Inclusion
Full Path Disclosure
Man in the middle
DNS & ARP Spoofing

Tell us why you would be a valuable asset:

I would be a valuable asset to the group by representing it in every high quality informational post I make, tutorials and help around the forum, I will be a great student and complete set tasks when I am given them. I can work well in groups which will increase the amount of work you get done as a group. I can teach/help members, and show proud among Legion inside and outside of the group.

Achievements & Goals:

I recently got accepted into a fantastic university for my upcoming career and have also started to make a decent bank online, ranging from off-site methods and private products. In the future, my goals are to be a successful business man, Run some outstanding products and create a great family with a stable in-come, and last but not least improve my skill in Hacking.

Tell us about yourself:

I am a mature man, who strives for precision in any task I get thrown at. I am 21 Years of age and am currently in University, I am a very experienced Hacker and hope to join Legion to expand my knowledge, I enjoy conversations, helping others and making tutorials. I hope you give me a chance.

Grumpy Otaku - *March 17, 2014, 12:41 am*

Elaborate on your skillset:
SE-ing
Spoiler (Click to View)New to Social Engineering have secured multiple PSN accounts and made a few dollars from e-whoring. Still learning and gaining confidence. But on the contrary I am very good at getting people to download and run my RAT and have gotten many good slaves with cams

RAT-ing
Spoiler (Click to View)Have taught a few people how to RAT and how to spread and have come up with a very efficient way to spread myself which I have not released.

Beginner coder
Spoiler (Click to View)I have recently started to code in HTML and CSS which are the basics I'm not going to lie, I struggled a bit when I was first learning CSS but got past it very quickly. I plan on moving into PHP, Python etc when I get better.

Game console modding
Spoiler (Click to View)I am very experienced in this topic and have been doing it for over 1 year. I have made a tutorial on the basics of how to do so and always help people. I plan on making tools when I learn C#, C++ etc

Online monetizing
Spoiler (Click to View)I have semi new in this topic but I have made $140+ online is just under 1 month. I know it is not much but it's a start, I plan on growing this and a certain few people and I plan to be making money online in the near future.

Tell us why you would be a valuable asset:
I would be a valuable asset because I am very open minded and always willing to try new things. I am also more than happy to share the knowledge I have. I am very serious when it come to certain activities and I am a fast learner only need to be told once maybe twice how to do something before I can do it on my on.

Elaborate on your achievements and future goals:
Some of my achievements are securing accounts, making money online, RAT-ing and spreading with ease. Some of my goals are to make more money online, to learn all aspects in coding no matter how many years it takes, and a long term goal is to be a professional web developer or programmer for tools, games, anything.

Tell us about yourself:My name is Matt I am 14 turning 15 in a few months. I am a quick learner, I am intelligent, I have a good work ethic an am always more than happy to put all of my effort into projects that need to be done. My preferred profession is coding and programming I also would like to learn how to find vulnerabilities in websites to take them down etc. Yes I know this is a short

application but I do not do much that I think Legion will accept so I left that out and some of the stuff is black hat which I won't discuss on the forums.

zekar - *March 17, 2014, 4:25 am*

My skills/
I have years experience on botnets from irc to p2p through http ones. I have coded a personal http botnet before.
Made my own Rat too.
I also have setup service in the marketplace, anyway I can also say I am good with backdooring, downloaders and with scripts

I think I might be helpful for this group as i am going to help very much with botnets and with most kinds of scripts there's many which I can do

As I said before, I have coded a http botnet with .net binary
and a remote access tool.
I want to be better and better, learn more and more.
To be more skilled.

I'm 17 years old Male, speaking about own self is not good as seeing the self actions your self I am sure you will like me being in the group. I want you to check my feedback
I have like 3 negative feedbacks. You know why? for just being honest. you will find this when you check their feedbacks

-zERAiT - *March 17, 2014, 7:01 am*

Elaborate on your skillset:

Programming:HTML
CSS
PHP
MySQL
Visual Basic
I've been programming for a while now, I started back in the days with Visual Basic.
After that I wanted to gain more knowledge about programming website's, so I started my journey with HTML and CSS.
After getting control over HTML and CSS , I started producing more dynamic websites with login forums and stuff with the use of PHP and MySQL.

Hacking:

- Social Engineering & DoXing
I started gaining interests in hacking to, so I've been reading a lot about Social Engineering and started with it myself.
Every individual which I was talking to I tried to DoX, never really posted this public but it was good for learning purpose.
After that, I gained more knowledge about Human Manipulation and Social Engineering, I even gathered WarRock Emulator files with the use of Social Engineering.

- E-Whoring
Well, I started doing this because I needed some money.
Since I already obtained some knowledge around Human Manipulating and Social Engineering this packed out pretty well.
Made a lot of money while doing it.

- RAT-ting
A thing we can't forget, RAT-ting. It's populair under us and I learned it to.
My first RAT was Darkcomet, after I gained experience with it I expended my knowledge over multiple RAT's and even bought some of them.
Nowadays, I'm helping other members on how to set up their RAT properly.

- SQL Injections
After I obtained knowledge about the above elaborated skillset, I tried to hack my own websites.
I learned SQL Injections, I did a lot of challenge's around here on HF and tried to obtain as much knowledge as possible.
Nowadays I am still experiencing with SQL Injections, and even wrote my own SQL Injection Tutorial which can be found by CLICKING HERE.

- Cross Site Scripting(XSS)
In the times I joined HF, Cross Site Scripting was a pretty populair way of website penetrating around HF.
Since I heard a lot about it, I started obtaining knowledge about it myself.
Besides, I already had knowledge with HTML, so Cross Site Scripting was really the hardest way of web penetrating for me.

- Remote File Inclusion(RFI)
A pretty uncommon way of web penetration but still deadly if you may find a vurnable.
I only found 2 website's which were vurnable for this penetrating methode, but was succesfull to upload my shell on both of them.
I made a tutorial about Remote File Inclusion to, which can be found by CLICKING HERE.

- Cross Site Request Forging(CSRF)
I am still a beginner with this methode, but currently learning this. I heard a lot about it, and it's a very populair methode nowadays.

- Networking
I'm currently studying Networking on school.
I already know how to set up a network with DHCP (Domain Host Configuration Protocol), NAT (Network Address Translation), DNS (Domain Name System), shared profiles and more.
I learned this on the Windows platform, and did it on CentOS and other Linux platforms to.

- White Hat
I've been busy removing Viruses / malware etc. from computers in town.
It's my money making method, I am not only doing it for the money.
I am learning a lot from doing it tho, and I just like to remove viruses and see were they're hidden and find possibilities on how to remove them properly.

Tell us why you would be a valuable asset:
I think I'll be a valuable asset because I am a friendly, and helping person. If others don't understand something, I'll make some time to learn it to them.
With the above elaborated skillset I do have experience, and I am willing to teach more people about it. I am also willing to write tutorials in name of Legion if it's needfull.
Besides, I'll represent Legion well.

Elaborate on your achievements and future goals:
My future goals are to expand my knowledge in the field, and help others out gaining knowledge about it tho.
I am also going to learn more about the C language's since I am running a community which runs multiple Private Servers.
If I obtain more knowledge about the C language I could help them with their problems.

As I already said above, I am willing to learn more and help others out.
In the future I want to work at a company which prevents that websites / servers are getting hacked by other hackers.

Tell us about yourself:
My name is MaskedMyS, but you could call me Job to. It's my real life name but I prefer MaskedMyS. I am a 19 years old boy which lives in The Netherlands.
I currently have a gap year due to happenings at home, after this year I'll pick up my study in the IT.

I am doing sports around 3 times a week, I am Snowboarding one's a week and going to the gym twice a week.

As I already said multiple times above, I am a helpfull and friendly person which likes to socialize with people.
I also do have Skype and Teamspeak installed so if you ever want to have a talk with me, feel free to contact me.

Thanks for reading my apply.?

Kind Regards,
MaskedMyS

Elaborate on your skillset:
I have experience mainly with servers. Whether it is Windows or Linux (CentOS), I have a lot of experience running, managing, and securing servers. I have a degree in Information Systems Security, this is where I learned a lot of my hacking techniques. Sometimes it takes a hacker to catch a hacker. I know how to setup and manage IRC networks, botnets, VPN's, VPS's, etc etc. I have experience with RAT programs as well as Crypters. I have been out of the game for a little while, but I am looking to get back into a group to share my knowledge and expertise.

Tell us why you would be a valuable asset:
I feel like I have a lot to bring to the table. I am a dedicated and loyal person. Once you have my loyalty, I will never look back. I can assist in securing or setting up servers for seeding and I am always looking forward to learning new things. I want to learn everything that I can that can further improve the group as a whole.

Elaborate on your achievements and future goals:
I want to create something big with a team. I want to make differences. I want to learn everything there is, more than what I already know with my degree. I want ot be apart of "the bigger picture".

Tell us about yourself:
Like I said, I am a very dedicated and loyal person. I am honest, and trustworthy. Sometimes, my honesty gets me in trouble, because people don't want to hear the truth. I am responsible, and I have a background in a lot of different areas and fields. I am self disciplined and I am not some teenager punk living with Mom and Dad, I am an adult out on my own. If you want someone you can trust, and count on, and come to with problems, I am the right person. Thank you for your consideration.

Nex+ - *March 17, 2014, 2:25 pm*

Elaborate on your skillset:
I'm an excellent marketer, I write and create my own eBooks for Monetizing Techniques. Here is just a preview of an eBook that I made and the profits I pulled from it. I'm always here to help people when they need help with a RAT or Keylogger or anything that i can help with. I've basically mastered RAT's now and working on creating my own Keyloggers. I've recently did the stock market with investing, to try it for the first time and I tripled my profits with investing. I have been doing gaming since I was a little kid, I'm decent at games like Call Of Duty and Madden. I am also learning coding in Visual Basics. I mastered eWhoring, I have made well over a few thousand dollars from it. When I'm in need of a quick buck I usually go to it.

Tell us why you would be a valuable asset:
I think I would be a valuable asset to the group simply because I'm trying to improve myself across the whole forum. I'm always trying to learn new stuff, and pass my knowledge on behind me to the people that need help with it. I would encourage others to try and learn and become in a high quality group like Legion itself.

Elaborate on your achievements and future goals:
My achievements that I made aren't the greatest but they are decent. I managed the master RAT's and Keyloggers since I joined Hackforums. I have learnt monetizing, eWhoring, keyloggers, rats, and many others. I am always trying to help others that need my help. I'm always passing on my knowledge of what I have to other members. My future goals is to have my own stresser. It is currently being made as I'm writing this application. I'm planning on going to college also for coding when I graduate High School.

Tell us about yourself:
I am 17 years old, I'm in 12th grade. I am usually on hackforums for at least 3-4 hours a day. I'm always on at least once a day here. I love to play Runescape and Xbox live with friends, and go out and have some fun. I just bought a new dirt bike with my own money I had saved back for one. I'm pretty popular in High School, I'm going to college after I graduate school. For sports I play Football, Wrestling, and Baseball for my High School team. I am pretty much a laid back person that likes to have fun with his friends.

BandWagon - *March 17, 2014, 5:26 pm*

Veld - *March 17, 2014, 6:05 pm*
Elaborate on your skillset: I consider my self skillful in various categories such as Social Engineering, Marketing, and basic understandings of "hacking". I am striving to learn more, I just need a chance to be in the learning process.
Tell us why you would be a valuable asset: I am very hard working and do things with quality rather than finishing the job as fast as possible. I am open to learning with joining this group.
Elaborate on your achievements and future goals: I have made over $5,000 from "Black Hat Methods". I plan to contribute to Legion whether it being Black Hat as long as it is for good intentions. I hope to make lots of money as well as give back to others what I have learned if I am chosen to be a student.
Tell us about yourself: I am young and motivated. I live in North America and I am online about 8 Hours + a day striving to make the character that I have developed at the moment better.

Thanks for the opportunity ?

Pred?tor - *March 18, 2014, 9:33 am*
Elaborate on your skillset: I'm good with computers in general. Not a master of anything, but I can do a little of everything. Though, where I truly succeed is Social Engineering (Not the shitty PID fraud stuff, but actual people skills.)
Tell us why you would be a valuable asset: I'm willing to learn and participate actively in your student program.
Elaborate on your achievements and future goals: Simple, to learn as much as possible to better myself and help others in the future.
Tell us about yourself:
I'm Predator. I'm chill, calm, and quick to learn. Honestly, this application means nothing. I could put anything to make myself appear as a good/bad person, etc. However, I think it's for you to decide based on my posts/history on HF whether or not you want me or not.

Thank you.

Acroz - *March 18, 2014, 11:02 am*
God damn these are some fine looking applications gentlemen.

Kiwi™ - *March 18, 2014, 11:54 am*

Elaborate on your skillset:
I am a social engineer that specialises in account jacking and marketing. recently I have been doing LOTS of learning around the account jacking scene and have even managed to bank myself $7,000 through offsite jobs.
Tell us why you would be a valuable asset:
I think I would be a valued asset as I could give lots of my knowledge away to the group and write some very HQ tutorials of several hacking sub-topics.
Elaborate on your achievements and future goals: .
My biggest achievement although it doesn't sound great, is doxing a celebrity. My future goal is to move my skills into more serious hacking

Tell us about yourself: I'm 15 and am from England, I enjoy sports and leisure activities such as Parkour and Gymnastics. I am currently in full time education and am taking my GCSE's

JackedHF - *March 18, 2014, 12:51 pm*

Elaborate on your skillset:
I can do most things regarding computers, well i work with Linux and windows every day of my life as i work with several hosting company and having windows and Linux as your main computer i work with every sec of the day as i am coder as well working with servers i can code web/servers sides of coding. I also have some other skill set's like i can seo boost your site/page/YouTube/social page. I can also root/exploit sites and gain entry to almost any site if i spent my time hacking it i can easily hack it.

Tell us why you would be a valuable asset: I would be valuable asset as i am on 4-6 hours a day sharing my knowledge marketing few things i have lot spare time on my hands now so i will be willing to help hack-forums members out with there problems, or issues. I can also help set up pretty much anything, i am very quick learner and willing to learn to support a project or provide help.

Elaborate on your achievements and future goals:
I don't really have any goals, would need to be determined to start project. I have made over fair amount money via pp/btc/ltc. I can setup anything i want.

Tell us about yourself:
I'm from united kingdom, doing my GCSEs now and i have lot spare time on my hands i am 16, i am pretty chill person as long i am not in bad mood.

FractumSeraph - *March 18, 2014, 12:52 pm*

Elaborate on your skillset:
My paranoia concerning security has made me learn everything I can about security. This could be anything from not using a crappy password, to ensuring that if I see a packet floating around somewhere I know EXACTLY what it is, what it's for, where it came from, and where it's going.
I run pen tests against my network weekly, I run various scenarios such as "Okay, someone from China is trying to force their way in." "My neighbor is trying to get in through my wifi." and "My evil cousin just got administrative access to my computer for Christmas."
I lock down and secure my network in a way that while I am still able to use the network to do whatever I need to do, it is a secure network.
So Network Security would be my strongest area, and I can guarantee that I've at lease familiarized myself with everything covered on HackForums aide from programming, which is what I am currently working on. I know enough to edit code, but not build it myself.

Tell us why you would be a valuable asset: I know plenty about security, and I am more than willing to instruct others, in fact I enjoy doing so, and often find myself doing it without realizing it. I am

constantly learning more, and the more I am able to learn, the more I am able to teach. I am always able to be contacted, and never in a position in which another cannot receive any help from me.
Elaborate on your achievements and future goals: I have won many metal and certificates regarding computer security and networking, with my most recent one being a gold metal in Network Security last week, from BPA. I am also an Alumni at the National Technical Honor Society.
This is my senior year in high school, so by this time next year I will be in college for Network Security. I am working as IT at the moment, however I hope to become a network administrator at some point.
Tell us about yourself: I am 18 and a senior in high school. I'm from the Mid-US and I'm nearly always on a computer. Whenever possible I go out of my way to avoid conflict with others, if I ever do have a problem, I will resolve it peacefully to my best ability, and very rarely is this not possible. I am able to do this because I am able to stay calm, I am able to keep a hold on myself.

The Commander - *March 18, 2014, 5:50 pm*

Elaborate on your skillset:
Programming -
I was very interested in programming a few years back but I never got into it for some reason till I went to college, I began learning Visual Basics and once I had got the hang of it I moved onto C# and C++.
I am not a master of programming in any way but I love to learn about each language and have some sort of knowledge in them.

Website Development -
I have been developing websites for around two or maybe three years now, before I used to use programs to generate the code but now I just open up notepad and begin to type the code up.
I would say website development is my strongest point, may it be actually creating a website or a forum site.
I enjoy just creating a website from scratch and when its done get a few people to review it, then I delete it and start a new one.

Games Design -
Games design is not a strong point for me as I only learned it due to it being in my college course.
I have no real interest in it but I can create games to an extent and we are not talking about the next Call of Duty title.

Graphic Design -
My skills in this area are of a standard level, I can create logos, banners, thread designs and so on.
I am in no way a master of all the tools in Photoshop but I am learning them all.

Marketing/Advertising -
I have no idea why I am good at advertising and marketing but I seem to know what to say on the spot when people ask about a product, I have helped a few friends make money from just saying how I felt on the method.
The advertising part is the bigger one for me, I have been good at advertising websites and services in many areas. Most people think spamming is the Answer but it is not the way to make good business.

Tell us why you would be a valuable asset:
Well I personally love to find new projects to keep myself going and being a member of this group could also get members in a motion to help me with these and further their knowledge in areas I know that they do not and the same for me from them.

Its all about learning, I want to learn different things and I am sure others want to learn different things also.

Elaborate on your achievements and future goals:
My current plan is to complete this year of college and receive my award for Website Development and Digital Imaging.
My future goals is to go back to college and begin on a Networking/Security course which I have applied for and should have an interview for soon enough.

Tell us about yourself:
Well I am from Scotland, United Kingdom, currently I am studying a Website Development and Digital Imaging course at college as I stated above and I enjoy the world of hacking, it fascinates me just how much can be done in a short period of time and cause so many problems. I like to help out people in the Beginner Hacking section (view my post activity) and I just generally enjoy learning new ways of hacking reading eBooks. What can I say I love to learn and I think if I was in Legion it would give me an opportunity to learn from some of the best hackers on this forum and maybe one day I will be helping new people.

Fumes - *March 18, 2014, 7:00 pm*

Elaborate on your skillset:Rats, Keyloggers, somewhat with virus removal, and parts.
Tell us why you would be a valuable asset: I wouldn't really be, the main reason I want to join, is to learn
Elaborate on your achievements and future goals:I have no achievements, but my futures goals are to be able to code in multiple languages
Tell us about yourself:I'm not ub3r on HF, that's about it.

#Success - *March 18, 2014, 7:13 pm*

Elaborate on your skillset: Well my skill set hacking related would be the fact that I have extensive knowledge in CSS and HTML. I have been learning and practicing with those two languages for three years now so I feel confident with those two. I don't know if those two things can be considered as one of the skill sets you are you looking for but they are the two that i can actually say is a skill of mine.

Tell us why you would be a valuable asset: Why would I be of value to Legion? I feel like I would be a valuable asset to Legion because I feel like I have knowledge that other people can benefit from, and if accepted I would be more then happy to share it with my fellow group members.

Elaborate on your achievements and future goals: My achievements in life that I am most proud of would probably be my achievements in academics. I am a junior in highschool who has had the chance to enroll in college early as a part time student while still going to highschool. My grade point average is a 3.8, and it continues to rise, because my knowledge only increases as the days go by. As for my future goals i really just want to be successful. It doesn't have to be me making millions, because the odds of that happening are pretty slim. I just want to be successful enough so that I can live a comfortable life not having to worry about financial troubles.

Tell us about yourself: I think to start off I'll tell you how I came about finding HackForums. It was December of 2012, and like everyone else that joined HackForums I wanted to be a hacker. So I signed up, and posted a few noobish threads. Then for some reason I just stopped signing on to the forum. I was gone for close to a year. I don't remember why I came back I just did and I saw HackForums for what it really was which in my opinion is a great community full of people with a lot of the same interests as me. Now a little about myself my name is Travis, and I am 17 years old. Like I said already I am a junior in high school currently doing dual enrollment so I am in High school

full time and college part time. Grades are my top priority in life I try my hardest in everything school, sports you name it. If I know how to do I will do it, and I'll do it to the best of my ability and wont half ass anything. I am a very open minded person who is willing to try anything. A lot of my friends consider me to be a very kind and caring person. You could say it's true I love to help other people and teach them new things. My only real goal in life at the time is for me to grow up and be successful.

Mula B - *March 19, 2014, 4:11 am*

Elaborate on your skillset:Well, I currently have some PHP and HTML skills, I am practising on these skills due to work experience and college.
Tell us why you would be a valuable asset: I could help with market sales and web development - I don't sell themes but I have a really nice website layout.
Elaborate on your achievements and future goals: My Achievements, I hope I can include grades; regardless - level 2 English and maths - level 1 IT and my goals are to be a web-developer and such and be well a bit like AeonHacks
Tell us about yourself: I'm 15, I am 16 in exactly 3 months this day, I intend to get good grades and work for myself, that is an ambition of mine - I BMX with my friends - I mainly focus on my website ATM and I buy stuff for my fellow friends; such as Domains.

imperlin - *March 19, 2014, 4:36 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
Elaborate on your skill set:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Gaming
- competition / competitive
- Monster Beast PC
- team player
- RTS games like - LoL, HoN, HoS, DOTA2 and many more
- video gameplay and sometimes editing as well

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Monetizing
- eBay marketing
- Adsense exchanging
- eBook marketing
- general HF product selling
- VPN services
- VPS services

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Web construction
-able to use simple code such as HTML,PHP and CSS
-great with organizing , and appearance

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]graphics
I used to owe my own graphic shop around here.
- Professional of photoshop
- Clean/fresh thread designs
- logos, banners etc.
- Click here for a tiny portfolio

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us why you would be a valuable asset:
Well, I think I would be a valuable asset to the group because I'm mostly doing graphics etc, but I'm a logically person as well. I'm doing what ever it needs to finish anything and do not do anything

stupidity. (trying to do nothing stupidity, sometimes you have to because you're boss says so?)

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Elaborate on your achievements and future goals:

Currently I achieved to rat lots of slaves and with those slaves I were mining a nice amount of BTC that I could sell for a nice amount of $. Rest of ratting I love to troll them but, mostly I'm focusing on the $ part of it. Right at the moment I own my own VPN service and it's nice with speed and I make a nice amount of sales already and earned with it a few 100's of $.

My future goals for hack forums and in real life would be different always. Currently I'm in my study: "Communication & Marketing" and I'm working in the company: "UDC". If I could give a example of what I'm doing there: "We are organizing music/dance festivals around the world". A example of a big festival we organise is: Tomorrow-world and UMF. So my goal currently is finishing my study and continuo my work and continuo my HF life as well here. I have made over fair amount money via pp/btc/ltc. I can setup anything i want. I'm looking to start new projects etc. and I think "Legion" can help me with these things and start everything in the name of "Legion" to raise even more.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]Tell us about yourself:
My name is Sidney, I'm 18 years old from Holland. I am a relaxe person but trying to very logical in everything I do. HF is kinda like my time user when I have spare time etc. and that' very often. In my real life,I like to go to the "Gym". I could consider myself as a weird person. Bodybuilding, gaming and reading HF isn't a logical combination but hey!, It works and it's fun.

More information about myself would be that I love to eat "sushi" but that isn't related to the HF part but hey! Everybody loves sushi!. Rest info would be that I'm a happy and friendly person.

Orochimaru - *March 19, 2014, 8:33 am*

Elaborate on your skillset:Website Construction (HTML, Hosting, managing and construction. Example website I made: http://virtualmarkets.org)

Coding (HTML, CSS, Python and VB.NET/VB6)

Graphics (I can do a little bit of Photoshop like logos, userbars, signatures and GFX Threads)

Computing (Windows 7/8, Malware Removal, iOS and iDevice Jailbreaking, Rooting, Virtual machines and linux servers)

Marketplace (I can manage my money and make a lot online with services like shops, crypting, setup, etc. I'm experienced with CPA/PPD, and have been earning a lot of cash off my forum and ebooks as well.)

Hacking(Botnet, JDB, Exploits/kits, Jailbreak, Infections, Rootkit/Bookit Ring0-Ring3, Cryptography, SQLi, Spreading, Vulnerabilities.)
Tell us why you would be a valuable asset:
I will share all the methods and hacking related guides I come across/create with the community, all the tutorials I make will be representing the legion group, I will always wear the userbar and I will help whoever needs help in the sub-forum, I will post as much as i need to and take part in the Legion giveaways, contests and competitions. Since Legion will be the only group I would be in, I would contribute everything to that group, I will share all my knowledge and hopefully help as many members as I possibly can as well as bring more reputation to the group.
Open this spoiler for some tutorials I've made and I could share!

Some of these guides were from while i was in Legion:
How to setup Darkcomet: https://hackforums.net/showthread.php?tid=3633110
Beginner Virus Removal Guide: https://hackforums.net/showthread.php?tid=3472081
Manual SQL Injection: https://hackforums.net/showthread.php?tid=3643497
How to setup a Niche: https://hackforums.net/showthread.php?tid=3719528 (for spreading worms, rats, etc)
I have a TON more tutorials and a LOT more ideas in mind ready for if i'm accepted![/spoiler]

Elaborate on your achievements and future goals:
I have achieved a lot in my past months on HackForums, all the things it taught me, I don't think I can learn them anywhere else, all the people I met, all the experiences I had, I achieved my first online business from hackforums, the first website I ever contributed anything to was hackforums, I achieved a nice post count, but I believe in quality over quantity. My future goals will be to have a nice group I can contribute to, and maybe get some awards like the sticky man, I want to become a well known, and high respected member on the hackforums community most of all.

Tell us about yourself:
I'm 16 years old, my name is Alex and I love going on my PC, my first interest was hacking, I started since i was 8 years old, but back then I was just some loser using club penguin trainers and I was interested in Habbo retros and hacks, then by the time I became 12 I took a break from computers, but once I got a new laptop when I was 15 I started taking an interest in PC gaming. From there I wanted to know how to make my PC faster, so i did some research and got interested in the manipulation and management of computers, computing basically. From there I started practicing some coding languages and started up a forum by the time I was 16. Finally I got an interest in hacking, I started off DoSing websites that pissed me off like a little immature kid, then I got into RATs and infecting people, I first did it for the fun of it, then I understood that it got boring viewing their webcams and putting on scary popups, I started taking their passwords and using them, then I got too many passwords, so I started selling them, I soon brought my business to hackforums, where I learned SO much, I learned about rootkits and kernel infections, ring0 to ring3, about social engineering, SQL injections and much more, from now I'm practicing up on TCP binding kernel infections, packet manipulation, and encryption/decryption. Now I'm almost 17 and here I am, applying to join Legion once again, I used to be in this group earlier but I had internet problems and when I returned I was out of the group, so i decided to take a break and let things pan out and I think i'm ready to try and join again.

I used to be in Legion and those were some of my best times on HackForums, I hope to be given another chance at learning even more new things and being a part of the Legion community!

Thank you,
Orochimaru

Tokyo ? - *March 19, 2014, 6:08 pm*

Elaborate on your skillset: General Computing (WHH, Computer Security)
Computer Customization
Marketing & Sales (E-Book Developer, Business Manager, Social Media Boosting)
Video Production & Editing (Film, Advertisements, YouTube)
In-Depth Tracing/De-Tracing
Coding (HTML, C/C#, Minor Leveled Java & PHP)
Web Design & Development
Graphics & Visual Arts

Tell us why you would be a valuable asset:

I would be extremely active for Legion, not only would I produce HQ content to represent the group, I will also help members whenever I can and would love to take part in the Legion Student Program. I believe I am worthy of taking this program on, due to the fact I am always wanting to learn how to do new things. I am constantly asking questions and trying to attain as much information as I can to become better at the subject and to perfect my skills as well as broaden my skill-set. I have been on HackForums for almost 3 months, and have joined 2 groups in that time span as well as creating my own unofficial video editing and production group. I am apart of Complexity's Web Design & Development Team, I am also in The Brotherhood where I am in a tight nit group of talented individuals that make up the BH Computing Sector. Each of these 2 groups I classify as very prestigious and I am very grateful to be apart of them and represent them in the most high quality ways possible. My passion to assist and help people is one of my best traits, I will do anything I can to help a user get out of the struggle in the various fields they are in. I can do this by creating tutorials, help desks, services, as well as just general chatting and helping them via PM. This being said, I still have much to learn.

Elaborate on your achievements and future goals:

HF Achievements:Join Complexity
Join The Brotherhood
Create a guide on the "Ethical Hacker" (Find It Here!)
Create a guide on "Windows Security" (Find It Here!)
Open a VFX Help Desk (Find It Here!)

Recent Life Achievements:Get an apprenticeship as a Computer Security Specialist (Due To Start In July)
Start & Run my own business sector for company "Vemma"
Finished my first employed job
Become self employed

Future Goals:Become employed as a Computer Security Specialist or I.T position
Produce an E-Book Series Devoted to Marketing & Sales
Produce an E-Book Series Devoted to Computer Security
Advance in manual virus/malware removal
Become more familiar with hacking in general

Tell us about yourself:

My name is Cam, I'm 17 and have always been fascinated with computers and graphic design/video editing. I have recently opened my own VFX help desk in the Video Editing sub forum and hope to help new editors achieve their goals whether that be IRL editing, COD montages, or

advertisements for products/services here on HF. As far as computers go, I am very active in the Computing sub forum, preferably the white hat help section and the PC customization sections where I help users get the best out of their money as well as fix any issues they possibly have. I am also very interesting in the marketing aspects here on HF, I am more than likely going to start getting into the marketing section and develop products or even set up a new project I have been working on for a while now. I am a top notch salesman/business man and have actually been an entrepreneur for a while now considering I am apart of a company called "Vemma". I am making $600 (roughly) a month off of selling products and getting people to join my business, this money is going to my college fund in order for me to pursue my career of going into Computer Science or I.T. There are no limits as to how far I can go considering whatever work you put into it is what you will get out of it. I have always been interested in buying and selling products as well as one day becoming self employed, which I have been able to do with Vemma. I hate having to work on scheduled hours, considering the human mind is too great to be contained. I am very outgoing as well as always trying to look on the positive sides of situations, I also love helping others and making lives easier for the community around me.

Beretta - *March 20, 2014, 5:34 am*

Elaborate on your skillset:
Ratting
Where do I begin? I've been a member of HF for 3 years soon and I must admit, the reason I joined the forums was to rat mainly Runescape accounts and simply sell the gp for cash. Although I have stopped using rats because most products here just don't have the stability and reliability to even bother trying to monitor others, I still am familiar and do know how to get my way around things.

Social Engineering

I must say I am quite well in manipulating people to do what I say. I mean since I was a kid I would get free items from others and they wouldn't even realise. ?

Runescape basically taught me this skill, since little I would gather friends to convince others to give us their passwords. At school I am basically known as the go-to guy if they need help regarding online things.

Coding

Although i've never really studied a code language thoroughly, I know basics of cmd and what not. May I add I am a great listener and worker, I will listen to what others have to stay and I will adapt and work easily.

Tell us why you would be a valuable asset:

Besides the fact that I am always free and down to do anything. I have time to help anybody in the best possible way, basically I put others before myself in situations. I offer my brain for others to use to gain knowledge. I am not applying to be in the group for the userbar, I really do want to use the time wisely and soak up as much knowledge aswell as helping others.

Elaborate on your achievements and future goals:

I havn't really achieved anything online but I play football and do have medals, although this wouldn't matter. I have a couple things in mind, firstly I would like to finish school (1 year left) and plan to get into a university course in IT or something close to that. Something smaller though that I plan is to have a successful legitimate service or product where customers have nothing to

complain about unlike other products where they're just milk cash out of customers before they disappear.

Tell us about yourself:
My name is Ash, I was born in Jordan and moved to Sydney, Australia a little over 10 years ago. I am 15 years young about to be 16 on april fools. I enjoy staying at home and surfing the web from the second I get home till I fall asleep, although on weekends I am out and about with mates having a blast ha.

• ????c???? • - *March 20, 2014, 10:24 am*

Elaborate on your skillset:

I know a lot about securing websites though various different methods, and I can efficiently secure the MyBB system in multiple different ways. I am knowledgeable in some HTML and CSS, but there is still a lot of room for improvement. I know a couple of methods on how to scan websites for vulns using backtrack/kali and also a couple of methods on how to crack wifi, but I am still learning, hence why I want to learn more.

Tell us why you would be a valuable asset:

I love to learn, plain and simple. Not only would I be a good student but once I learn enough I intend to share my knowledge with other users, just check my threads and posts for proof of that. I release a lot of tutorials on stuff I know about and I intend to do the same for other topics of interest.

Elaborate on your achievements and future goals:

I intend to gain more knowledge in security, network security and web security and I intend to get some credible qualifications in those subjects in order to hopefully secure employment in that sector.

Tell us about yourself:

You will notice I have kept this short and sweet, it is the best way imho. I am 20, and I run a gaming forum, but I won't go into that. I also just set up another forum for activities that I cannot share here due to the rules :p I have a girlfriend etc, just your normal average guy who wants to learn.

I would appreciate if someone could PM either with a denial or acceptance, just so I know the status.

Idolize - *March 21, 2014, 2:46 am*
Elaborate on your skillset: Doxing, Sqli, Xss, SE, pentesting.
Tell us why you would be a valuable asset: I can learn and teach people and be a HQ member of the Legion group, I will also stay very and active and gives me a goal to become more of my self.
Elaborate on your achievements and future goals: To learn more in depth with hacking and teach people, stay very active and be HQ.
Tell us about yourself: I'm a web designer, I work for a company who is partnerd on a resterrant chain and I love making people smile, I go to a engineering collage, I'm from the UK. All my grades are from C's to A*'s.

Dangero - *March 21, 2014, 2:23 pm*

Elaborate on your skillset:
My skillset :
- RAT-ing
I have much experience with RATíng , i know how to set them up, with the portforwarding and how to get easy slaves.
I also like to help people with RATíng

- E-Whoring
I got alot of experience with E-whoring i know how to make money with E-Whoring, setup the vcw and act like an "e-whore"

- Monetizing
I have alot of experience with PPD & CPA & PPI wich is my favorite.
I don't use ppd or cpa but only ppi and i know how to easily make money with each of them.
I also love to help people with PPD , CPA and PPI. (At the moment i'm already mentoring some people with PPD and learn them to make money with it)

Tell us why you would be a valuable asset: I'm a very friendly member.
I am willing to share my knowledge with the people in and outside the group and help them out with whatever i can.
Also i want to learn alot of new stuff.
I will represent Legion as well to others.

Elaborate on your achievements and future goals: My future achievements are to learn how to code.
So i can either make an crypter or something similair (Some plugins for minecraft etc.)
And i want to learn some new monetizing ways and blackhat stuff.
I'm almost willing to learn everything needed.

Tell us about yourself: I'm Dangero you can call me Tristan.
I'm 15 years old, i like to hangout with friends and go longboarding with them.
I'm a friendly person and i want to help people out and learn new stuff, i live in East-Holland a country in West-Europe

Keiron - *March 22, 2014, 6:29 pm*

Elaborate on your skillset:

Experienced in Java Programming
A Little experience in MYSQL, PHP, HTML.
Advertisement
SQLi - Lost my touch but still have some experience, looking to expand my abilities and start up doing this stuff again.

Tell us why you would be a valuable asset:
I think that I would be a valuable asset due to the fact that, I'm quite experienced in Java

Programming, I own a semi-popular RuneScape Private Server which peaks 500 players, if anybody in the group needs help with RSPS work, I can be there to help them with maintaining how busy I am with my own server I still find ways to help other people with theirs I think about other people before myself, if anybody needs help on starting up or even when you're already up, I can be the help, I can help on advertising tips, tips on how to be unique and due to the fact that I've gone through all this and I know all my messups I've done in the past I can also give advice.

Elaborate on your achievements and future goals:
Owning one of the leading PRE-EOC Runescape Private Servers peaking 500+ players, looking to expand in the future and hopefully come to the top.
Mostly my achievements are Runescape Private Server related.
For my future in all, I would like to go to university for IT and do programming.
I want to expand my abilities and do more things than just Java programming but it's hard to start up on your own.

Tell us about yourself:
My name is Keiron I live in Wales(United Kingdom), I'm an experienced Java programmer and have been developing RuneScape Private Servers since 2009 after a friend inspired me to do so.
I'm 17 years old and my hobbies are Xbox, Laptop, Football(Soccer in the US), I'm a very busy person when it comes to coming on the laptop due to the fact that I own a really popular RuneScape Private Server, it has 400+ players on daily. In my free time I like to play League Of Legends with my friends or even play Xbox with my friends, I play competitive Call Of Duty and I have 29 Trophies on GameBattles(GameBattles Username; Keiron) I used to be in a professional Competitive team called AMP which disbanded when the leader went rogue. I used to be rank 600 on GameBattles
But now I'm rank 2K due to the fact that I haven't played Competitively in 8 months due to the fact that Call Of Duty: Ghosts destroyed my motivation to do so, I don't rage at games at all and I'm always calm, I'm an overall nice person, the type of person if I were to backstab someone such as scamming I would give it back and feel like crap afterwards, I think about everybody before myself.

Tell us about yourself: I have a 18 inch cock and they call me mr.2x4
Accepted. I'll invite you shortly. ?

Brule - *March 23, 2014, 6:27 am*

Hello, I read above that instead of using hours to make this, I should just keep it short, and I will so. Let me know if you want the detailed version. Other than that, read on.

Elaborate on your skillset: Marketing
Advertising
Doxing
Coding (C++,C# & Java)
VPN's.
Proxies.
Security & How to stay protected.
How to stay anonymous.

Booters.
Botnets.

Tell us why you would be a valuable asset: I can take big parts in the Legion & Illuminati selling section, serve high quality products & services.
I can hold giveaways for the group.
Share & obtain knowledge.
I am very friendly, just be nice to me, and I'm nice to you.
Helping Legion to get more sales in the Legion & Illuminati seller section.
Helping people who needs help. Ex: In the Legion Help Desk.

Elaborate on your achievements and future goals: I want to become a professional businessman.
I want to learn & get more knowlegde within topics like hacking & marketing.
I want to get more known with this community, and want to make friends to do business/hacking related things with.

Tell us about yourself: I like to make money.
I like to help people regarding questions or anything else.
I like to do programming and hacking in general.
I'm pretty new here, but I think I've came a long way compared to how long I've been here.
I am willing to spend alot of time on this, if I get accepted.
Making people happy & making smooth deals just feels great.
I will only serve high quality.

Statement - *March 23, 2014, 9:00 am*

Elaborate on your skillset:
• VB.NET
I've started coding in VB.NET when I was 9 years old. Today I'm able to code different applications, ranging from silent miners over malware builders to crypters (not very deep into this so far).

• Java
I'm not coding in Java for very long, I started half a year ago. I'm currently coding several Android applications for the Google Play Store, but did not code any hacking related stuff in Java yet.

• XSS & SQLi
I'm not very deep into hacking yet, but I'm able to use XSS and SQLi on my own. I'm currently learning more exploits and Unix.

• DOXing
I learned this myself, too, and used it on several persons already. From about 10 persons I managed to DOX about 9, so I've got a high success rate on this.

• Monetizing
I'm currently using domain flipping which makes me a real nice amount of cash per month. I use some other methods, too, but they are not worth of writing here. I used to e-whore quite a long while ago, too, and made quite a nice amount. I stopped with e-whoring as it was too exhausting for me and I was looking for easier methos.

Tell us why you would be a valuable asset:

I'm making several free releases to HF, which can be made in the name of the group. I'm currently on some big projects which are going to be releases on here, soon. I could also help out fellow members of the group. I'm a team player, so I'm ready to do stuff with other members.

Elaborate on your achievements and future goals:
I'm not sure if I can tell any past achievements which I made on HF so far. I made it onto the Microsoft Hall of Fame though, as I found two XSS on their website. I made some little releases such as a miner and a few tutorials, but nothing really special. As I told, I'm currently working on bigger projects, so one future goal would be to release these projects. Also, I'm going to upgrade my account in a short while, I need my money for other (more important) stuff at the moment, so this counts as a future goal for me, too.

Tell us about yourself:
My name is Max, I'm from Germany and I'm 15. My age shouldn't be a problem, as I noticed that I'm most likely more mature than some other people here. I'm currently in year 9, that's middle school in Germany though, as we're going to other schools (kinda like high school) after year 10. If everythings goes well, I want to study computer science as soon as I'm ready.
I'm interested in many different topics, you can most likely find me in the hacking and gaming sections though.

Good luck to everyone.

Savage1101 - *March 23, 2014, 3:39 pm*

Siavonens application

Elaborate on your skillset:
I know a lot of things about computers but the problem is that I cannot put them all in specific names. But here are few.
RAT tools
I've had quite a lot of experience with RAT tools and have had my fair share of using it over the years and I've actually had the chance to teach others about it and get them to use RAT tools too.

Key loggers
I've ran in to keyloggers several times and also managed to turn my head around them enough to use them and even to help others to set it up for them selves. But later on I decided they were just not my thing so I abandoned them.

iStealers
Back in the days I got in to stealers with after keyloggers, ofcourse it was a great find, how ever I eventually ended up abandoning it like keyloggers. How ever my skills in stealers remain intact.

HTTP botnets
In this field my skill set is pretty high compared to an average HF user. Meaning that I have no problem finding my way around my botnet in setting it up or even troubleshooting when there's something wrong with it. I've several times repaired my botnet by figuring it out my self and even in some cases I've helped others with their botnets.

SQLi
To be honest I've mostly used tools for SQLi because of the long codes, How ever I have studied to some extend to understand to how it works. But I never properly learned it my self to be able to do it perfectly.

Social Engineering

I've noticed that I'm a very good social engineer and yes I can see how this looks like coming from me. How ever I've noticed that the ways that I'm able to engineer my way around without even trying that hard is pretty damn great.

MySQL

I ran in to MySQL database system when I was running my own private mmorpg game servers. I must say I'm pretty skilled with it, even tho it's really simple to use I still count it as a great skill.

Java Scripting

I've studied Java scripting a little, how ever even before I studied Java scripting I could figure out how to work my way around it. Just knew how to line the command lines so that it would do what I want. It's really hard to explain, but my point is that I know mostly how it works and how to use it so that it would serve your purpose.

Cracking

This is one of the things that I enjoyed doing for a long time until I had to cut it short because of my school. I'm not going to bore you with the details so simply put. I'm very familiar with cracking and I know enough to be able to teach complete noob to level of normal cracker.

Being friendly and helpful

Over the years online I noticed how it's full of angry and bitter people and then I noticed how I'm always nice to everyone. At that point I thought I'm just thinking this my self, but then people who I was in contact with online told me that I'm friendly and helpful and then I saw that it wasn't just my imagination. As cheesy as it sounds, it's true. How ever we all have bad days.

Anonymity

I've had my fair share of experience with anonymity. I know a lot to be able to protect my self against a lot of tracking or tracing attempts. How ever I will never rule out the possibilities that I don't know something that I'm supposed to know.

Being very active

I spend most of my time online daily so that makes me very active in any community that I'm part of.

Virus removal

Over the years I've had issues with viruses and after getting out of the noob zone got my head around it. Now days I help other people to clean their computers and boost their computer powers to maximum performance.

Computer upgrades and Repairs

After struggling for long with bad computer performances, I learned to do computer upgrades and repairs. This meaning driver installing, new hardware or hardware repairing. This how ever does not mean that I know everything about computer upgrades or repairs. But I still know more than average citizen.

Fast learner

Most of the time when I'm motivated or interested in something I study it till my eyes pop out. I usually learn things really fast, or train my self for as long as it takes to master it. How ever this requires motivation that I most of the time find in certain situations.

Tell us why you would be a valuable asset: I have never been good at selling my self to anyone. I'm just one of those guys that you have to get to know to see if you find me useful or not. I simply can't

begin to describe why I would be a valuable asset because I honestly don't know why I would be. I mean I know why but it's all wibbly wabbly and it's hard to explain. I hope you got something out of that. :D

Elaborate on your achievements and future goals: Well first of all I'm going to start learning coding so that I can do the many things that I've always wanted. At the same time I will figure out a way to make some money on the side. I would also find it very important to be part of the legion student program. Over all I want to study bunch of new stuff that I don't know about computers already to complete my skills more.

Tell us about yourself: Well I will try to make this as short as possible. I'm a 19 years old guy. I most of the time try to be nice to everyone to the extend that I'm able to. This also applies to helping people. I'm mostly nice person to talk with and if you need something i never avoid your messages i always answer even if i cannot help. I like helping people that are in need of it. I hate people that know something and don't want to share it with other people. how ever in some cases it is accept able tho. well if u don't want me to make long list, these are pretty much first things that came to my mind.

#Success - *March 23, 2014, 4:38 pm*

Any updates on this I have applied twice, and would love some info on what I could do to improve my application.

Mula B - *March 23, 2014, 5:51 pm*

Elaborate on your skillset: I have basic C#(cSharp) Knowledge and I am programming a little small program for my own use; I have Mediocre knowledge of HTML and CSS due to my work Experience and College.

Tell us why you would be a valuable asset: I would be able to help through website addons to website functions and much more such as; a little program where you can order everything from there.

Elaborate on your achievements and future goals: My achievements are being welcomed into Hackforums, Getting accepted into my Work Experience, getting paid from Work Experience; My goals are to do well in College and become a famous/non-famous but have a successful career and a nice job.

Tell us about yourself: I am 15 with extent knowledge of Computing from games to hardware to websites and styling; I have pretty much no hobbies due to personal reasons which can be provided if you can contact me; but I love being on a computer.

Wrong - *March 23, 2014, 8:04 pm*

Elaborate on your skillset:
-Malware removal
-Cryto Currencies
-Social Engineering
-Doxing
-Coding (Still learning the Languages)
Tell us why you would be a valuable asset:
I'll be a valuable asset to Legion because, I'll share my knowledge in my Main Skill-sets stated above to any Legion member that needs the knowledge about it.
Elaborate on your achievements and future goals:
-I'm going to be reopening up my Booting service.
-Start up Charity's & Donate to those who are in need.

-Create my Own website, and keep it stable.
-Help out as much as possible & share all knowledge in all my Fields.

Tell us about yourself:
My name is Domonic, 15 years old and I'm Currently taking online courses for high school. I am a easy going guy, also I get along with pretty anyone. In my free time, I'm always learning how to do new things & reading about the Stock-Market & Computer programming. Looking forward to be apart of your Student program, thanks for your Time.

Nakamoto. - *March 23, 2014, 9:57 pm*

Elaborate on your skillset:
I would not say that I have a large skillset by any means and I wish to improve on that. If I must list a few then I would go withSocial Engineering, I can be a very pursuave person.
Minor experience with penetration testing.
Fluent in Batch scripting, if that even counts for anything.
I am learning C++
I am a very honest and open minded person. < Thats a skill right?
Marketing, I know a lot about CPA and have even written a few E-Books on it.
Tell us why you would be a valuable asset:
I don't think in the given state I would be an asset, however that is subject to change as I am willing to learn, have the determination and I learn rather quickly. I have a drive to learn more than most other people.
Elaborate on your achievements and future goals:
I would not say I have acheived anything, I am just an ordinary person looking for more skills that I have a genuine interest in. My goals on the other hand are pletiful, I want to pursue a career in computer science and I am currently taking classes to do so, I feel Legion can be very beneficial to me in doing so.
Tell us about yourself:
My name is Adam, I am 21 years old. I started tinkering with computers when I was about 5 years old and have loved using them, repairing them and just modifying them since then. I have not obtained an enormous skill set in the process though due to the lack of being able to keep up. I was born into a family that I would not call wealthy and computers just were not something we could afford. Now I work for Dish Network as a service technician making anywhere from $200 a day to $500 a day and I like my job. I still have a passion for computers and now I have a way to afford the costs of fueling it, and I intend to do just that.

I am applying to join the Student Program so that I can reach my goals at some point, I may not have much to offer now, but that is subject to change with the course of time.

0x45 - *March 24, 2014, 1:51 am*

Elaborate on your skillset:
Coding(C++, C, Java(Including Android), php, SQL, JavaScript(Including jQuery and other frameworks), Python)
Hacking(SQLi, XSS, CSRF, using exploits, metasploit, writes BufferOverflow attacks)
https://github.com/issacnitin (I am new to github, dont want to make all my work public)
Tell us why you would be a valuable asset:I am a skilled coder, so can work on any projects undergoing in the group. Also, will help develop vulnerabilities into exploits. Knows BOF, Format String Vulnerabilities and a bunch of web based attacks
Elaborate on your achievements and future goals:Computer Science undergrad is the only achievement I can think of now. Future goals include a Masters degree, more skills, getting signed by a football(soccer) team, a girlfriend etc
Tell us about yourself:Computer Science undergrad is the only achievement I can think of now. Future goals include a Masters degree. I have no ideas and all I do is develop other's ideas. Lame

me. I am looking for ideas, which is the main reason why I am applying.

I was in the group before, and I was inactive for some time. I was thrown out as a result. Will be active from now. My university exams and projects were going on, which is over as of now.

Haunter - *March 24, 2014, 1:01 pm*

Elaborate on your skillset:
Social Engineering.
DDos.
Attending College For Computer Programming.
Expert at doxing.
Great People Skills.
Great Sales Person.

Tell us why you would be a valuable asset:
Well, I think I would be a valuable asset to the group because I have a strong personality, strong willed person, and I Strive for nothing but the best. Anything I do is done with top quality, I won't settle for less. I am a very easy person to talk to and won't let the group down,

Elaborate on your achievements and future goals:
Well one of my achievements is I managed to set up a IRC by myself and make two separate channels one for Win 32's & Linux Bots and the other for Nixs. I also have a lot of Call Of Duty pros on my friends list and I consider that an achievement because they recognize me as a good competitive player. Some of my future goals is get a good paying job and support my family, and if I get accepted in to this group support you guys as well if needed.

Tell us about yourself:
I am 21 years old, I have a daughter and a wife, currently they are not living with me but I hope they will soon. Anonymous is my best friend<3 and a great sales person. I would rather be at home drinking a warm tea and helping out other Hack Forums members then be at a party. I will contribute my mind, soul, and heart to this community if I were to get accepted.

Tokyo - *March 24, 2014, 6:15 pm*

Elaborate on your skillset:Ratting (Basic Setup & Spreading)
Graphics Design (Upcoming Graphics Artist)
Marketing & Monetization
Social Engineering (Human Manipulation & Trickster)
Doxing
VBS (Not a hardcore coder)

Tell us why you would be a valuable asset:
As a new recruit, I would love to join a group that is based on blackhat & whitehat material. I am innovative, hard-working, and outgoing. I will share all of my skillsets and knowledge to ensure morality. I am ready to learn everything this group teaches me which I am very excited about since who doesn't want to learn new things?

Elaborate on your achievements and future goals:
Achievements:
Spoiler (Click to View)? Earn $1,000 in one month
? Make my first eBook and sell it
? Code a simple program
? Successfully learn how to DOX

Future Goals:
Spoiler (Click to View)? Pentration Testing
? Manhunt
? Learn about new things

Tell us about yourself: Hey! My name is Jack, 17 and I am from the United States of America. I started getting into computers at the age of 7. I love to make money online aswell as read useful information on how to monetize. I always try to upgrade my skillset since that is a bonus of generating profit and ideas. I entered the world of Hackforums on 5-19-2013 as you can see on my profile. I entered this forums earlier but due to forgetting my username for 2 years, I had to make a new account. The reason why I entered this site in the first place was to find "Free DDoSers and IP Pingers" I could use on my friends. But due to exploring a bit, I was able to join the community and become very active.

ProxNasman - *March 25, 2014, 10:12 pm*

Elaborate on your skillset:

Ratting: This is by-far the most easiest thing you can do and it shouldn't be listed as a skill but I have a lot of knowledge about ratting.

Coding: I have not completely learned any languages but I am familiar with Java, Perl, and Objective C .

Web Developing: I have worked and created many websites / forums for friends. I am familiar with PHP & HTML but I don't consider myself a professional or a master at it.

Doxing: I am good at doxing and finding information about a person, I make sure the information is accurate and if it's not then I investigate throughly.

Rooting: I know the basics of rooting but I still consider myself a noob at it.

Social Engineering: I'm very experienced at social engineering, I'm great at manipulating and talking to people. I made about 500$ e-whoring a while back it's not much but it's something.

Marketing: I can say that I'm very good with marketing. I've ran two good shops here (just two) which was a Stresser (was thinking about re opening one again) and a vote shop / vote method for toplist's such as RSPS's and Minecraft Toplist's. What can I say? I love money and I love having the responsibility of having a successful shop, I can probably convince others to buying my product even when it's something that they already own.

Tell us why you would be a valuable asset: I love meeting new people and learning / experiencing new things, I am a fast learner and I believe I can learn a lot by joining this group. I am not the best at what I do however I'm extremely dedicated. I strive for greatness and won't accept anything less. I'm a hard worker and up to learn a lot of new things that Legion has to offer. I'm generous and giving if something needs something then I will try to give them what they need. I treat everyone with respect until they use it as an advantage. I'm currently learning more about different subjects from one of my friends who knows a lot and I can say I've learned a bit.

Elaborate on your achievements and future goals: I had recently made a lot of money selling methods for RSPS's and doing a few black hat activities I guess you can say I've made a few dollars at the start of the year which is pretty good. Although, my highest goal is to make at least 10k by the end of the year. I'm also currently learning about pentesting.

Tell us about yourself: Hello, I'm going to make this short and sweet. I am 16 1/2 I've been around computers since I was 11 starting off with gaming then learning other stuff such as ratting when I was 13 then I moved on to bigger things. I'm here to make money but most importantly learn more about various subjects. I'm a outgoing and caring guy and always defend people if they're being accused of something they didn't do. As I said before I am a fast learner so I believe that I will learn a lot of things if I get accepted in to Legion.
Hope I get a chance to be apart of Legion, good luck to the rest of the applicants! ?

No Effort - *March 27, 2014, 11:35 am*

[b]Elaborate on your skillset:
Ratting
The first thing I ever learned how to do was Ratting. After quickly getting the hang of it I started making my own tutorials on Ratting trying my best to help out other users. I've Ratted countless amounts of people.

How To Make A RAT - Click Me!
How To Portforward - Click Me!
How To Spread Your RAT - Click Me!

eWhoring
Another skill I managed to acquire over time is eWhoring. Although it may not seem like a huge skill since it really isn't that hard to do, I've used it at points (mostly to mess around with my buddies).

Coding Experience
I have coding experience with the following languages; VB, Java, Lua. The programs I use for coding are Dr Java 7, Eclipse, Microsoft Visual Basic 2010 Express, Notepad++

Tell us why you would be a valuable asset: I think I would be a valuable asset because I am active on this daily, I actively participate in #AnonOPs and because I am really good at making Tuts (So I've been told) and I'm a friendly, mature person.

(Mar 27, 2014 10:37 AM)ElloDer Services Wrote: *[CITE]* Seems pretty nice. I may try this later.
(Mar 26, 2014 05:34 PM)EngageYT Wrote: *[CITE]* Very HQ tutorial man! Keep it up the good work :)
(Mar 22, 2014 06:35 AM)express21 Wrote: *[CITE]* good tut im gonna install it right away.
Elaborate on your achievements and future goals: Let me start with Goals. I am currently in Grade

11 majoring in Business & Law, my goal is to get into University after High School and go to Law School and get my Bachelor of Commerce and become a Corporate Lawyer. Another goal of mine is to master every aspect of the art of hacking, and use that to destroy the corruptness in our government.

Tell Us About Yourself: My name is Manny, I'm 17 Years Old. I have been hacking for a little over a year now and I am really active in AnonOps. I'm known by Iconic, although since that was taken I decided to name myself No Effort, and I've started using HF recently, been using 1337forums before finding this one. No one really hates me, if they have they haven't said anything, and I spend most my time hacking, coding, or playing video games.

Best of Luck To Everyone!

The l33t hax0r - *March 29, 2014, 5:53 pm*

Elaborate on your skillset: Currently, I do not have much of a skillset. I am currently learning a lot. I am learning C++, Java, and Batch. Currently, the only thing I am good at is RATing, and Social Engineering. I am also trying to learn pentesting, and how to deface websites.
Tell us why you would be a valuable asset: Well, I know I do not know much right now.. But I will eventually know a LOT more than I do currently. I need some sort of leaders, and teachers to excel. I have a lot of stuff to learn, but I know with help, I can easily achive them.
Elaborate on your achievements and future goals: Again, I do not have many achievements, but I do have many goals.Learning the coding languages I listed.
Successfully get over 100 bots.
Deface one website.
Much more
Tell us about yourself: My name is Andrew, I am a freshman in high school. I like to debate a lot, and spend most of my time in either the SRPP section, or beginner hacking section. I love to learn things, escpesically anything related to coding, hacking, or anything computer related really.

I hope to be accepted, and to be able to learn from HackForums best.

Good luck to all other applicants!

IDontTryMuch - *March 29, 2014, 8:59 pm*

Elaborate on your skillset: I am not very skilled when it comes to hacking, which is the main reason i am applying. I would like to be a student and learn as much as i can. I know about Rats, keyloggers, but anything else my knowledge is not the best on.
Tell us why you would be a valuable asset: I would try to learn as much as i could, host giveaways in the name of legion, and even help other members when/if the time comes.
Elaborate on your achievements and future goals: Achievements: Getting ub3r
Making over $1k online
Future goals: Join legion as a student.
Make even more online and become knowledged on hacking.
Tell us about yourself: . I enjoy making money online with various methods and techniques. I Enjoy screwing around with people on rats, and would love to learn more hacking techniques. I am a part of many forums, and i am a very active member of HF especially. I hope you consider my application. Good luck to all other applicants.

Raddify - *April 1, 2014, 6:17 pm*

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
I am just going to cut to the chase as I would like to not waste your time.
Elaborate on your skillset:

I am currently trying to becoming a better Social Engineer, which I have been doing by reading Psychology books, I consider myself to be decent at it. I have been trying to read more about how technology works, which might be helping a bit.

Tell us why you would be a valuable asset: I would be a valuable assest because who knows, I might become great at computers and technology and what not, when I learn, I would be able to pass down my knowledge, which could further help others, to earn, one must learn to give. I try to live by that.

Elaborate on your achievements and future goals: My achievements are mostly when I can help people do simple things, if they don't understand how to do it. For example, bypassing network security at my school by helping them set-up a VPN. I want to later learn more in Network Security and Forensics. I also want to have good all around knowledge about computers, how they work, and technology. Knowledge is power.

Tell us about yourself:Well, I am 14, and always wanting to learn something new. I enjoy learning how people go about solving things and doing things, then learning from that. I play soccer,(although that might not matter) I enjoy science and have been wanting to learn more about hacking for quite a while now, yet never was able to pursue it as I always felt like people were arguing about who had the better method rather than helping. I also enjoy socialising and talking to people, regardless of religion and such. I hope you have a great day.

Chaorii - *April 1, 2014, 11:41 pm*

Elaborate on your skillset:
1) Ratting - This is the first skill I have learnt from the community, which is kind of related to ''hacking'' but not really need that much skill on it.
2) Coding - I have learnt different types of coding such as vb, Java, Python and C++ etc. However I don't really know much about them, only the basics.
3) SQL injection - I tried to learn something related to SQL injection, and I understand the basic rules of SQL injection. However I have never done it in action.

Tell us why you would be a valuable asset:
''''New blood'''' like me would be a valuable asset for the community. Although I don't know much about hacking at this point but I am sure that I will keep my passion every minutes every seconds. I am just like a paper with nothing written, everything I learn I will bring into the community and share, I think that makes me will be a valuable asset for the community. Also I am a quick learner.

Elaborate on your achievements and future goals:
I am doing Computing degree at University at the moment, looking forward to do Master degree in the future that related to security.

Tell us about yourself:
My name is Charles, and I am 19, I live in United Kingdom at the moment for studying. I am doing Computing degree at University. I have a huge interest of everything that related to Computer and Hacking.

Feel free to ask me any questions about my application, thanks :)

Infinity. - *April 4, 2014, 2:19 am*

Elaborate on your skillset:

I like to learn anything about hacking, I don't like to stop, when I access any forum related to hacking , I enjoy reading all the tutorials out there.

Hacking.Social Engineering
SQL Injection.
Smartphone Pentest Framework.

Learning Pentesting using this app
Cloning website.
Rating Specific targets (People I know irl)
Basics of Reverse Engineering.
Android Game Hacking.
Coding Basic knowledge of C#.
Basic knowledge of Java
Learning Android App Development nowadays <3.

Tell us why you would be a valuable asset:

I believe in treating others the way you want to be treated and I enjoy helping others. I have given back to the community in my give away contest because I believe by giving back that maybe that can pay it forward or help someone else by giving back somehow.

I believe Legion is a High quality group and I believe I can add something to the group such as helping others, Coding and other things that I can share to better myself and somehow help others whenever I can. I will be a positive influence to the group if I am accepted to join this HQ group.

Elaborate on your achievements and future goals:

Achievements:Successfully pentested my android phone and my friend's using Smartphone Pentest Framework in kali linux.
Social Engineered one of my friend's mail id and changed the password.
Hacked a guy that is on my Lan network and read his facebook Inbox
Ratted a hot girl of my class , Best achievement so far.
Hacked Flappy Bird game from play Store and made my score high as fuck and be cool infront of my friends
Hacked Sperm Race game and again my friends fall for me.
Android hacker for life.

Future GoalsBe in Legion and learn many awesome things there is about hacking
Make a commitment to myself about being a hacker and not let Legion down.
Hack my College's main server and change my Attendance
Keep targeting specific people Whom I want revenge from and make them my slaves.
Be successful in hacking a certain android game (PM me if you can help).
Tell us about yourself:
19 from India.
Loves messing around with computer and other cool toys.
Doing Engineering.
Playing BBall to get my body some shape.
Android Hacker.
Hacking enthusiast.
PM me if you want to know me more by asking questions.

test what - *April 4, 2014, 4:23 am*
Elaborate on your skillset:
Ratting: I have been learning this for a while and have finally mastered ratting. I do setups for ratting and teach people how to use it and try to teach others my knowledge.
Penetration Testing and Forensics: Document grinding and finding very special and rare security measures in the system.
Defacement: I'm able to deface a website, with SQL injection and then upload a shell towards the

website.
SQL injections : I have been learing this for a while and am able to take on big or small websites.
Brute forcing: I have a few programs to bruteforce targets such as rdps, internet passwords and so on.
Decompiling: I am able to decompile .zip and .rar codes as far as my knowledge could go as of yet.

Tell us why you would be a valuable asset:
I'm a learner and a teacher meaning, what i learn is not kept as a secret but is yet shared among the group and the community.
Loyalty and Respect is the major role in the group to make sure all of us have respect to one another.
Elaborate on your achievements and future goals:
- Learn to be commitment among the group, and have loyalty to each other.
- Grade modify
- Become a successful decompiler and be able to decompile any code.
Tell us about yourself:
I'm dave from southern eastern of Sweden at 22 years of age.
I'm very nice and a mature guy to talk to and not ignorant.
I keep conversations going and flowing, and meeting all different and new people to have a long journey with.
Loyalty and Respect.

Kevin?? - *April 4, 2014, 9:19 am*
Elaborate on your skillset:
Cyber Security - Currently going to school for this. I'm still fresh to it but I know the ins and outs. I'm currently using my current project (Critical Stresser) to practice what I learn and apply it to the project.

Php - Again I've used my projects to continually learn more about Php and get a grasp onto this language. I've gradually improved over the course of the past 4 weeks as I've dug deeper into coding. I enjoy it to say the least.

Business - My passion. I've been taking numerous business courses and just the general idea of it intrigues me. I currently run the business side to Critical Stresser as well, and focus on everything from marketing methods to providing efficient and quality customer support.

Tell us why you would be a valuable asset:
I have the maturity to provide constructive feedback along with helping others when required. I don't [believe] I have one of those egoistical mentalities often seen on HF. I find myself to be more understanding when put into difficult situations compared to others. I've always played a more passive role on HF but ever since becoming more active and involved my activity has clearly surged. I enjoy hanging out on HF and I have absolutely no problem stepping out of my comfort zone when it comes to different subjects. I value having general knowledge in all aspects so I can have a general idea when speaking to anyone about any matter.

Elaborate on your achievements and future goals:
One of my original goals consisted of creating and running a network stresser on Hackforums and focusing on providing a quality product and a loyal customer base who enjoyed the product. I average about $100 in sales a day and most all of the profits go into upgrading servers, hiring support, improving security, and purchasing more advertising.

My future goals [on HF] consist of expanding myself into new products. I want to eliminate any complaints that any of my customers have with my stresser as customer satisfaction is my goal. I

have intentions on creating a lineup of new products (ie VPN, Crypters, etc.) primarily so I can gain more knowledge in these areas. I'd also just like to meet new people I can talk to about HF related things and continue learning.

Tell us about yourself:
My name's Kevin and I'm currently in the military, going to school, and and investor. I plan on getting out of the military in a year or so and finish up school while starting my own business. I love all aspects of business (investing, real estate, franchising, etc.) and I believe I've found my passion in life. In my spare time I enjoy watching sports, (Basketball, hockey) and usually stream movies as well. I'm used to multitasking homework, watching shows/games, and just browsing the internet simultaneously. I've recently began becoming more active in HF and I would like to have myself be apart of a group.

Cyber Power - *April 5, 2014, 7:10 am*

Elaborate on your skillset: Hi I am Cyber Power I am working on network, computer and coding right now I am putting my focus on Java in coding. And soon I'll set-up my new server (old one crashed and died) So I can start work on my network hacking skills and website hacking skills. I am not one of those "hackers" who DOX. Doxing is not hacking it more like goggling. Doxing is also not that effective 95% of the time a Doxer dox another hacker he will get so wrong info. But to my skills. I love to just sped my time with my computer and just type and type. I don't like hacking stuff I have nothing to do with. Most of the time my neighbors ask me to help them with there network and I'll love to help all the people on Hackforums, with any of there problem with the computer obvious. But yeah network, website, computer and coding is my skills.

Tell us why you would be a valuable asset: I can help people if they have any problem with computer, network, websites or coding. I am also a guy that loves to just talk to other and have a good time. I hope just because I am 14 you guys look down on me you remember the dude that hacked F.B.I multiples of times. He was 15.

Elaborate on your achievements and future goals: I would love to get in KTH in Sweden on both security and coding. That would been the world to me. And I would also make a famous app on the app store. I also know allot that people here take everything for granted but I don't and I want to help them not to do that, and also take everything with a peace of salt if you know what i mean.

Tell us about yourself: I am not anonymous I don't give anything if you know all my info. I am a whitehat hacker that loves to help people. I am 14 and I am very interested in computers and I am fascinated what happens when I type something and how the computer response to my command. And all those stuff and I'll try my best to get in KTH. And that is basically me any more questions as a reader or recruiter PM me and I'll do my best to reply them as best as I can. Best regards Cyber Power.

Do not post questions or vouches in this thread, this is the recruitment thread.

?

Spoiler (Click to View)
But seriously this was a opinion, just messing around. ?

VirtualMechanix - *April 5, 2014, 10:29 am*

I really like this, I am definitely going to apply for this soon!

ha4x0r - *April 5, 2014, 10:29 am*

Elaborate on your skillset:
Coding, Web Hacking
Spoiler (Click to View)
I have experience with exploit writing and Metasploit usage. I have performed SQL injection attacks manually and have dumped website databases. I have knowledges on the most type of techniques for web hacking, such as SQLi, CSS, CSRF, Buffer Overflow, PHPi, Input Validation Attacks, URLi, HTTP Session Hijacking, Reverse Engineering HTTP Cookies. (Coding) I have been coding for a while now. I started since I wasn't too old that's the time where I learned and still know how to code. I can code in the following web based coding (HTML, CSS, PHP, JavaScript and well know how to design a site) . Programming coding I can code in the following programs (Visual basic, C# and currently learning Java language) .

Virus, Malware Removal:
Spoiler (Click to View)
A good thing I have ability to search where the malware is located which options it has where ever it's hiding I well know to check if you are being infected. I have knowledges on how to track the person who have infected you such as IP address and such as DNS servers that was being used.

Social Engineering
Spoiler (Click to View)

It's something that I use almost everyday. By help of social engineering it takes me to the right road. Social engineering is not something that you only use to make money out of it but by using it by real life that what I do such as social engineering a person should work normally as you are social engineering an item. I'm both good on social engineering I like to process my skills in both real life and the internet stores.

Tell us why you would be a valuable asset: I think I meet the right requirments to join this group. I like to teach others what I have learned and learn by others. I like to be involved around the sub-forum and be active which I guarantee to be active and teach and learn. Whenever someone would want help I'll be more than happy teaching the person by the belong of Legion.

Elaborate on your achievements and future goals: I have many goals in my life, I might not be liking to expose them out but my current goal now is to be a member of Legion learn everything as possible and teach others which is my main goal for this group, be active in the sub-forum and be involved around the members of Legion.

Tell us about yourself: I like to keep myself busy with stuff such as doing an project. I make good money out of the internet and always get what I need nothing that I have to be worrying about. I like what I do and well know to keep myself anonymously while being on the blackhat activites side, one other thing is I never give up and keep doing what I love and everything comes to end to what I wanted.
I have much knowledges when it comes to a goal I want to reach.

I'm happy for your time taken to read my application. ?
I really like to learn from others and teach, and of course bring high quality tutorials under the name of the group.
I also decide to improve my skills much better, and as being said I will bring high quality tutorials under the name of the group hopefully as it makes me a fellow proud Legion member.

ComponY - *April 5, 2014, 10:53 am*

Elaborate on your skillset:
I'm very skillful in a few different areas. First, I'm mainly a web developer. However, I've really wanted to get in to security and other things. I'm now going to school for Cisco Security, and am learning more everyday. I'm new to it all, but REALLY want to learn. That being said, I'm going to do everything in my power to learn.

Tell us why you would be a valuable asset:
As I mentioned before, I really want to learn. I will dedicate myself not only to the group, but time to learn the things I'm being shown. Once I'm done learning enough; I'll be able to help others, and go from there. Right now, I know some PHP, and c#.

Elaborate on your achievements and future goals:
I would love to learn more about security. I want to utilize my time and tools to get the base down, and then take my knowledge with it even further. I'd love to know how to actually secure networks and systems... I'm currently going to school for those things right now, but I'm only in my second term. So I'm taking basic classes now, but knowing security in advance will help me with my future classes. From there, I'd love to pass them with high grades, and learn as much as I can.

Tell us about yourself:

I'm 18, freshman in college, and just really intrigued by knowledge now. After high school, I found myself more mature mentally, and physically. I'm now ready to learn, and just better myself for my future. I want to be successful, and I want to get things done. I play rugby, and go to class at night. During the day, I just web develop and do various jobs.

T e s s e r a c t - *April 5, 2014, 1:36 pm*

[img]http://#/vDbM0A.png[/img]

Elaborate on your skillset:
Coding, Web Hacking
Spoiler (Click to View)
I have experience in using Kali Linux for pentesting and backtrack with phishing user profiles from Facebook. I have used SynFlood to take down website and I have performed SQL PHP scans to manually hijack websites. I know how to program in Visual basic, C# and currently am learning Ruby. I have recovered hacked facebook accounts from my fellow peer with a password of lebron9 for Facebook phished by some Chinese guy and locked us out of the account. Networking is not my strongest field, I'll definitely admit, however I am willing to learn.

Virus, Malware Removal:
Spoiler (Click to View)
This is without a doubt my strongest field in computer security. I have removed probably over half a million trojan horses, infections, and multiple accounts of viral infection removal. I am quite active in the White Hat section and the Computing section in general specializing in Windows. I create tutorials for Windows primarily, system modifications and management tutorials, and some computer protection and security threads such as the newer MalwareBytes that has just been released. Some of my threads from a while back to now:

https://hackforums.net/showthread.php?tid=4103541
All My Other Threads
I know a lot when it comes to the filesystem, active directory and registry hives, permissions, privileges, essential startup files, privileges, logon rights, services, server roles and management and basically everything and anything Windows is what I know. I like helping people a lot and I am very resourceful too, I've helped friends, family and HF members with PC issues varying from deep system infection to other computer issues. I am excellent in manually inspecting and analyzing malicious and suspicious activities in a machine and determining whether or not certain components (file system, registry, processes) are safe or dangerous. Not only this, but I am currently the team captain of the Cyber Patriots Program within my school and teach freshmen, sophomores, juniors and seniors how to secure the Windows Operating System ranging from Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows Server 2003, Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2 & the Linux Distro Ubuntu 12.0+. We analyze the differences between each edition of Windows and newly added security measures and

vulnerabilities to ensure maximum protection of the Windows OS, from system policies, IT's policies to company policies and ensure each user is obedient towards the policies and much more. This is all based off of my experiences, and past experiences include tons of troubleshooting and always fixing the issue up, I am an expertise in viral removal throughout the Windows OS and it is safe to say I know my stuff. I am very willing to learn about networking and anything s, because security is just another hobby of security and will take advantage of anything I can. I know my more than my fundamentals in computer security.

Social Engineering
Spoiler (Click to View)

Fortunately this is another one of my excellent strengths. I have extraordinary social engineering skills, and telling you this is already a vulnerability to my SE ability. I do not want to discuss this any further. Lets just say that there is a lot to my user title. I have spoofed 2 AP scores and they have been accepted my a college I have applied to. AP scores are a form of getting college credit for courses (thus saving money on requirement courses), I have spoken with the counselor face to face, and still managed the entire operation successfully. You can read more here.

Remote Administrators Tools, Keyloggers
Spoiler (Click to View)

Using my SE skills, I have used several keyloggers, and I have programmed my first Keylogger within Visual Basic. I have gained access to my friend's sister's computer and planted the keylogger and it programmed itself to hide within certain subfolders within the root directory and then open itself as svchost.exe while his sister opened Internet Explorer, it also began my keylogger. I programmed it to send me information approximately every 15 minutes of keyboard strokes and it has been completely successful and non detectable by ESET Smart Security. Of course, I was doing this for fun and it has been a blast. Pentester here. I personally do not use RATs and prefer physical confrontation of a system to break in and manipulate, leaving no traces behind. I never trust remote controls. I am the remote control. Also, RATs tend to contain many backdoors and are untrustworthy in my personal opinion. I also have an elaborate plan to change all my grades within my classes by phishing my teachers online grading sites.

Tell us why you would be a valuable asset: I believe I meet the right requirements to join Legion. I like to teach others what I have learned and learn by others, as you can tell by my tutorials. My knowledge is expansive, and I am always supporting other members across this website as well. I am an over all, good hearted and knowledgable individual within computing and pentesting.

Elaborate on your achievements and future goals: My goals include forming an industry and remaining at the top of the food chain, perhaps something in relation to technology. I would always giveback before I recieve, which is one of my mottos. I see HF as a relaxing community that offers knowledge and I have always had my eye on Legion.

Tell us about yourself: I always say I am busy, and I always am occupied with something. I eat healthy, I sleep, and I workout periodically. I can be materialistic, and enjoy life to the fullest extent. I am stress free and do not believe in being stressed; my friend has white hairs and hes my age (17), which is a bit gross. He stresses too much, and I maintain stress at a minimum. I am a fighter and a man of action, I rarely speak however, I just do.

Thank you for reading my application, I hope I have not disapointed you in any form and if I have please feel free to PM me.

I shall bring high quality tutorials, and I am a high quality user. Read my reputation if you'd like, I am a good white hat-ee, and perform ethical actions on every matter. ? Have a great day.

b?xxy - *April 6, 2014, 2:28 pm*

Elaborate on your skillset:

I am not a super computer hacker. I'm not really a hacker at all to be completely honest. I just know a lot of tricks, and have studied for a while how these things work, such as SQL Injections, and Brute Force Attacks. I am currently working on coding java programs. My goals are to learn as much as I can in the cyber world about Hacking/Computer Security as for that is the field of study that I will be going into when I graduate.

Tell us why you would be a valuable asset:

I will be a valuable asset to Legion because I am very quick, and good at learning and fixing mistakes that I need. I am very familiar with computers, and pretty much know how most things work. Also, I am very friendly but at the same time I can be professional while helping people out.

Elaborate on your achievements and future goals:

My future goal is to major in Computer Security, and learn everything about it. I have built a few computers from scratch for people which is always fun. I have been coding many java programs in the past and some of them have turned out to be useful.

Tell us about yourself:

Well, I am usually an outcast in pretty much all societal topics. Yes, some people have been wondering, I am a girl so please note any, if any, thing I post sounds a little bit weird just please excuse/disregard that. I am currently 17 years of age, and I really love Computers. I am going into Computer Networking and Security when I graduate out of the infamously known 'high-school'. I like to look at things in a sort of a different perspective of other people. My principle (Stolen from World War Z) is the scenario of nine out of ten people agreeing on something, then it is my duty as the tenth person to disagree and then fine, and fully investigate the opposite hypothesis. If the original hypothesis is to be true, then that should come out in the investigation. If the nine people are wrong, then they will have been saved from a potentially fatal and dreadful mistake. I am not like other people, and I really hate being compared to other people. Also, stereotypes bother me, as for not any two people can be exactly the same nevertheless hundreds of thousands. My love for music is greater than my love for life simply because my music is my life. I listen to most kinds of music but my favorite music particularly would have to be most "Emo" Metal bands or, as I hate it when people say this because it is not a real genre "Sreamo". I am also a HardCore gamer, but you have asked to not elaborate on gaming skills so I will then leave it at that. [/color]

Tabs - *April 6, 2014, 4:51 pm*

Elaborate on your skillset: very well at doxing and ddosing
Tell us why you would be a valuable asset:i hack netflix account minecraft accounts that are og and more! i could get the group more recognition by seling the accounts.
Elaborate on your achievements and future goals: to one day join legion
Tell us about yourself: i love to hack, go on hf alot, and alot!

Pchild - *April 6, 2014, 7:41 pm*

Elaborate on your skillset:I will be completely honest when I write this, I do not have much of an expertise on anything. I have experience with RATting/Keyloggers, Mining crypto-currencies, worms, and crypters. In no way can I code or make any of the previous programs I mentioned. I do know Java from taking two years of computer science classes as a high school student at the college level. I have taught myself Vb.net through playing around in Visual Studio and also following hours of tutorials. In no way can I create or make any of my own "Hacking" programs/tools. I have not had any luck in learning how to make crypters, RAT's, Silent Miner programs, and such. That is a little about my "coding"and "programming" area. I do have some knowledge in the website security area. I can bruteforce wordpress websites as well as scan them for vulnerabilites. I know this isn't much nor is it impressive in any way as anyone can use the tool WPScan and Kali Linux. I do have to say though for the most part I love looking up tutorials and learning as much as I can about hacking tools and Kali Linux. I am currently learning about SQL Injection and Cross Site Scripting. After getting involved into RATting and such, I have learned about spreading methods, as well as Social Engineering. I have not only examined how these "hacking" tools work, but over time from using Rats, keyloggers, silent miners and simular tools, I have learned how to remove them. Not only am I experienced in the area of removing those types of viruses, I am also experienced with all types of malware. I am the one guy at school that people bring their computers to and say "I have a virus". I would say I can remove most viruses that people ask me to remove and am pretty knowledgeable in this field. I still today persist and work hard to learn all field of White/Black hat activity and believe that joining Legion would help me make the connections necessary to achieve my goals.

Tell us why you would be a valuable asset: As I just mentioned above I would work very hard while apart of this group as I see this as a huge learning opportunity. Unfortunately with my current skill-set, I can not offer much to bring into legion; but I assure you all that if I get accepted, I will give my all into learning anything that will make me a better attribute to the group. I see this opportunity as one where I can make positive connections and learn valuable information to help me reach my dreams of making programs and tools to release to the public here on Hackforums. Through the group legion I will be a student. I will learn from anyone willing to teach me and then take that knowledge I have received and teach the members that join after me.

Elaborate on your achievements and future goals:
So far I unfortunately don't have too much to brag about here. The only programs I have made in Visual Studio are useless and just pretend to do something. I made a "ddoser" that just shows a fake progress bar and looks like it works. I made a fake runescape botting client that loads the game but actually doesn't play the game for you. All these types of programs that I make are just fakes and only have a GUI, no functionality whatsoever. I believe that by joining Legion, I can use the knowledge obtained to make these functional as well as give back to the community spreading the knowledge I have learned as well.

Tell us about yourself:
I will start off with my name as well as my username. My name is Preston Child****. I starred out the last part of my name as i'm not sure who else may read this post. Don't want anyone trying to look me up and all that. That is also how I got my username! My first letter of my first name as well as the first part (Child) of my last name. My friends at school as well call me that. It's pronounced P-Chill-ed. Like if you were to say Pee, and then the word Chilled. Not Pee-Child like a little kid child. Sorry, got a little sidetracked there; but continuing on I love to play Ice Hockey as well as basketball. I played basketball ever since I was small and did Ice hockey as well. I stopped Basketball to continue Hockey in High School. I am now off to College at a University in Texas. I also live in Texas. I have been on Hackforums for quite a while and just recently wanted to get more active. I upgraded my account a few days, maybe even a week ago to L33T. It's one of the best purchases I made here as I love posting and helping people out when I can. I have had a dream ever since I came to HackForums. My dream is to release a free/paid program on HackForums that will benefit and give back to the community. Most likely i'd make it free as the people in this community have

given so much to me, I feel as if I should give back as well. Through my journey if I get accepted into Legion, I hope to learn almost everything there is to know in the field of Network Security, Website Security, Hacking, Ratting, Pentesting and so forth. I see this opportunity as a huge learning experience for me as well as a potential benefit for future Legion members as I plan to teach them what I learn.

Thank you for taking the time to read my application and look forward to hearing a response. Have a wonderful day/night.

Agent_47 - *April 6, 2014, 9:17 pm*

Let's not consider reputation or membership into this. I don't think me not being upgraded should count.

Elaborate on your skillset: My skills include: Coding, Malware Removal, Ratting (Everything besides Dark Comet), and Persuasion.
Tell us why you would be a valuable asset: I would be a valuable asset because I could contribute to the group and help with anything I have knowledge about.
Elaborate on your achievements and future goals: Let's start with my achievements so far. I've coded some things I'm proud of such as a custom anti malware tool and a very advanced injector. In ratting I've gotten 33 slaves so far, which I'm proud of. Last but not least I persuaded somebody that has scammed on another forum into letting me see there Skype. So pretty much he's a well known scammer on that forum. My future goals. Well, I would like to learn a different programming language, such as Python, Lua, or C++. I also wish to expand my knowledge on ratting. To clarify, by that I mean learn how to use a few rats I don't quite understand yet, and in the future code my own rat.
Tell us about yourself: Well, my name is Sean I'm 21 years old from a small town in Ohio. I'm not a kissass and won't praise somebody because they're good at something. I first started learning about programming and ratting in 09 when I joined a forum. I think it was called Superman Hacks. They had tons of programming tutorials that helped me along the way. I only discovered this website a few months ago and will post some of the things I've made soon. Thanks for reading.
Regards,
Agent_47.

mrtwothree - *April 7, 2014, 8:51 pm*

Elaborate on your skillset: Im studying computer science in college at the moment. Have taken and completed courses in Java/JavaScript/Python, Im self taught in ruby, and am currently learning C++. Basically anything to do with programming I enjoy and learning more is what I live for. I have been using the forum to educate myself in web hacking and RAT/Botnets as of late. I would love to learn more in those areas but I feel like the only way to do that is to code my own RAT so I am being patient as I learn C++. I feel my skillset is growing everyday and will continue to do so the rest of my life. I will not stop educating myself.
Tell us why you would be a valuable asset: Most importantly, I am incredibly hungry for knowledge and ambitous when it comes to progress and accomplishing my goals. I am the type of individual who shares what he can and is loyal. I dont play games and I know what I want in life. In the past I have made mistakes that have gotten me in a lot of trouble, and cause me to grow up quickly. Because of this I dont play games and I dont waste time. I want to be a part of something that I can contribute to and I know Legion is just that. I can absorb and utilize the information given to me by its experienced memebers and use it to be productive. Im looking for a chance to learn and continue to grow. Also I am willing to contribute with my work that is done on the streets, I can have help with funding and other afk money making project. I have hustle and I enjoy grinding; its what I was put on this earth for. I am the type of person that would make your family better because I would treat it just as that, a family. It would be in your good interest to give me a chance. I assure you of that. Im not trying to be cocky, I am just trying to express my seriousness.
Elaborate on your achievements and future goals: I want to finish my bachelors and recieve a degree in CS and go to graduate school. I would like to get certified in a range of security areas. CompTIA Security+, CEH, among others. My degree is most important at the moment. I would like to be proficient in C++ and be able to code quality programs. Most importantly I want to create something that will change the landscape that is the internet, I want to leave an imprint somehow, to contribute something big I can be proud of for the rest of my life. That is what I dream about, changing the world with some piece of technology.
Tell us about yourself: Im in my 20s, grew up in a big city in a lower-class neighborhood. I worked hard to be able to go to college but got up in a lifestyle that was common in my "neighborhood". Due to this I got in trouble young and had to deal with some serious consequences. It changed my perception on life and my goals as well. Ive been working hard to change my life ever since. Family, health, and education are my priorities in life. I read a lot, work out, and learn. That is what makes up my days currently. I life in a big city so entertainment is simple for me, all I have to do is sit on my front steps and watch people. Matter of fact sitting in those steps with my laptop or a book, a good beer, and a newport, and some friends is a daily occurence. That what makes me happy.

Thanks for the opportunity, it would be a honor to be a part of what you guys are doing. Seriously, Im ready. You wont regret allowing me to be a part of it.

Errors - *April 7, 2014, 9:01 pm*

[u]
Elaborate on your skillset:

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Monentizing
Adense Exchange, Trafficing, Marketing, PPD,PDA
DoS & DDoSing
I know very a lot about Botnets, Stressers, Booters, and how to setup and make DDoSing Scripts
Gaming
competition, Xbox modification, Genres such as Fighting, Adventure, Action, Shooting
Backtrack & Penetrating
Exploits on how to backdoor things and inject things to check the vulnerability.
Coding

I been coding in C+ for visual basics not a very good at it and I know a little HTML, XSS, and PHP.
E-Whoring
I Have done this for 6 months and manipulated people and made profit my SEing skills is involved in this.
Ratting
I Have known about Rats since 2011 I started using them in 2012 and I know very useful and easy tactics to spread a rat.
Social Engineering
I Have been doing this since mid year 2012 my persuasion skills are high. I have use these tactics for good or getting whats need to finish something. It helps me with Doxing,
E-Whoring, Hijacking things
[u]
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us why you would be a valuable asset:
I think I could be a valuable asset to Legion by doing such as learning and teach new ways to help others out. And I could give things away that are useful, donate, and make things in the name of Legion. And give good ideas to the Legion group and help evaluate problems to improve in and as a group.
[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img] Elaborate on your achievements and future goals:
I would like to know that when I am done, I could possibly go to college and afterwards work for to have a great job for what I have learnt before, and be a master at it. But a very good thing I would I like to join this group because I can see my career in this group of growing in specific area to learn more. Such as programming, social engineering and rooting to get objects also earn profits.

[img]http://i1.minus.com/ibcTGUKsMysb3t.jpg[/img]
Tell us about yourself:
My friends call me Mete, I am a juniorthis year in high school. I play basketball during free and bored time and I am a giving, respectful, responsible, and honest person. I am a very dedicated hard working person I continue what I do to thrive and achieve goals. And to improve my ways on things and help the needy if in need or help such as the non money earns to buy or get things. I earn a surplus of YouTube revenue per month for monetizing my channels and being partnered under the networks Fullscreen and Vultra(Bentpixels). The very first console I had for gaming was a Nintendo 64 and loving Donkey Kong games mostof time. The current console I play the is Xbox 360 and Xbox One. I play mostly FPS Titles but lately have found myself playing more RPGs,Indies, Fighting, and Simmulation titles. But most of all I love playing the Call Of Duty and Halo series, my favorite game is Call Of Duty Modern Warfare 2. But a very good thing I would I like to join this group because I can see my career in this group of growing in specific area to learn more. This is one of the few groups out there that I feel I can actually grow mentally in as opposed to just parading around with the title.
Thank you for your time.[/align[/u][/u]]

TheBlackHatterr - *April 7, 2014, 10:21 pm*

I'm going to fill out the application how I want and you're going to read it and before you say it's going to be trash bitch don't kill my vibe.

I can successfully wiretap literally anyone/organization and prove this easily. My Social Engineering skills are second to none. I am a far superior detective and poses analyzing skills resulting in me being able to solve cases that conventional police departments can't.

I'm openly asking you anonymous to test me on these skills ask me to wiretap an organization and you will be surprised on the information I can attain.

King Cin - *April 7, 2014, 11:12 pm*

(Apr 7, 2014 10:21 PM)TheBlackHatterr Wrote: *[CITE]* I'm going to fill out the application how I want and you're going to read it and before you say it's going to be trash bitch don't kill my vibe.

He is way too busy to test someone for a recruitment.

Reptilian - *April 8, 2014, 4:55 am*

Elaborate on your skillset:

My skillset is very wide. I am most experienced in network security. I am a Linux lover. I have experience in: Metasploit (used to use Armitage), Ettercap, SSLstrip, easy-creds, Hamster, ferret, nMap, the aireplay/aircrack/airodump suite, MDK3, powersploit, dnsspoof etc. Basically every "big" tool provided in Kali Linux and Backtrack. I would call myself a pentester. I know how WPA(2) and WEP work. I know how to crack them. I know how to use Hashcat. I know how WPS works and how to exploit it. I own an Wi-Fi Pineapple which I like to use in public places. I have a lot of experience in RATting. I know how to properly use Darkcomet, Blackshades. I know how to operate the following software and I know how they work: VPN, socks5, crypter, no-ip. I am highly interested in cryptography. I have Truecrypt installed on all of my machines. I know how MySQLi and XSS work and I know how to find and exploit these vulnerabilities. I know how to find a lot of personal information about a specific target (doxing). I also have a fear share of experience in Social Engineering and Tor but I won't go in dept about this for obvious reasons.

I have less experience in: Reverse engineering and e-whoring.

Tell us why you would be a valuable asset:

I know for a fact that I could be a valuable asset to Anonymous since I could help a lot of members. I have no problems creating in-dept professional tutorials. Users can ask me anything hacking related.

Elaborate on your achievements and future goals:

I am learning about new vulnerabilities every day. I follow and visit certain hacking related websites every day to further enhance my skillset. I love learning more and more about hacking and pentesting. I would like to learn more about decompiling and reverse engineering. I want to learn about every sub-part of hacking. I want to fill my brain with knowledge.

Tell us about yourself:

I wasn't going to create a big and "awesome" looking post like some others in this thread did just because that isn't me. My information is displayed properly here and is easily readable. I'm a nineteen year old student who loves computer security. I am currently in IT school and wish to be a system administrator for a big tech company later in life. If possible, I would like to become a fully paid penetration tester (kind of like Mitnick). I know this chance is very small, yet I can dream.

I hope that I have informed you enough.

Yours sincerely,

Aprex

UnknownManage - *April 10, 2014, 7:15 pm*

Elaborate on your skillset:I am able to do a little bit of HTML Coding. I am also I can invest in stuff if it worth my time. I also am opening my own stresser.
Tell us why you would be a valuable asset: Well I am looking for a group that I can learn a lot from. I also can benfit a bit in HTML coding I know that really basic but it at least something used on a daily bases.
Elaborate on your achievements and future goals: My goal are to become a really good helping person to HF Community. My main goal is to earn as many Achievement on HF as possible. I am also on all the time.
Tell us about yourself: Well I am a really nice guy I do not jump off the wall when someone try to piss me off. I stay calm until they have either pushed it to far. I have the most up most respect for the people till they do me wrong. Like I said I think my skill set will benefit the group in some way.

Recruitment closed while we update the criteria and details. ?

Vinnie - *June 25, 2014, 9:46 am*

Recruitment has reopened under our new regulations. Good luck to all.

Eeluminati - *June 25, 2014, 9:51 am*

Good luck to all applicants.

Remember, if you've been denied in the past, now is a good time to learn and apply.

Mad76e - *June 25, 2014, 12:14 pm*

Interesting.. Things develop in the right way i see...

Maybe in the future, still have to much to do!

Good luck to all applicants.

ha4x0r - *June 25, 2014, 12:15 pm*

I will be applying soon, good luck with everyone else.

Free Mason - *June 25, 2014, 12:18 pm*

HF UID: 2076744
Age: 21
Area of knowledge: Abusing DNS for host identification
Skill level from 1-10: 7
Provide proof of knowledge: I have helped my friend code and perfect his booter. I have also helped him with a twitter, instagram, and gamertag turbo. I have some knowledge and am always learning on my own. I feel this group will only make me stronger.

Turtle???? - *June 25, 2014, 12:25 pm*

HF UID: 2181647
Sector: Programming
Any certifications: None
Skill level from 1-10: 7.5

Proof of work or knowledge: I've coded a fully working game for the Microsoft hosted WUMPUS competition, and my team received 2nd place for implementation and 3rd for GUI. I have all of the source code, which I obviously won't post here, but I will post a video of what the game looks like: https://www.youtube.com/watch?v=OZoVY3p8jLA.
The objects I worked on were Highscores and GUI, the other members of my team worked on other objects. I also have created a game (with a similar group of friends) known as LightRunner, which is on the Google Play store if you wan't to check it out. I only started coding a year in a half ago; I was a freshman in high school, took APCS, fell in love with it, so I have a lot to learn but I would quantify myself as an adequate programmer. On my days of Runescape i made some basic simba scripts to avoid the botnuke, nothing fancy though. Right now I'm starting up a company, and I am working on creating a website which will require extensive amounts of coding in differently languages (HTML - maybe CSS, PHP/JS). That's my current project, and hopefully I'm accepted into Legion, I feel like theres a lot to learn from this group.

Thanks for the opportunity Vinnie boy.

SIM-1567847 - *June 25, 2014, 12:36 pm*

HF UID: 1567847
Sector: Computer Forensics (I also have knowledge in evidence removal and anti-forensics)

Red S?x - *June 25, 2014, 1:09 pm*

HF UID: 1864779
Age: 19
Area of knowledge: Abusing DNS for host identification
Skill level from 1-10: 8.5
Provide proof of knowledge: I'm an admin alongside a partner for a booter being sold in the Server Stress Test section.

HIGH PAID FELLA - *June 25, 2014, 1:12 pm*

I'll apply in the future when I have got some more experience.

T e s s e r a c t - *June 25, 2014, 2:24 pm*

HF UID: 1627994
Age: 17
Area of knowledge: Computer Forensics
Skill level from 1-10: 7
Provide proof of knowledge: Being a part of a Cyber Patriot competition, there were forensics questions asked to see which users altered what files last and since the answers are on virtual machines, softwares such as The Sleuth Kit were not a viable option. All recent activities performed on that computer by black hats had their traces wiped after, making my job harder during the competition. I had to discover what users changed another's password as well - and all was done through viewing detailed logs within Event Viewer. For Forensics, I had used multiple applications such as accesschk, AccessEnum, Advanced Prefetch Analyzer, AlternateStreamView, analyzing SAM hash codes. I had to view browsing history that was deleted and I recovered the history needed to answer the questions and score points. I had to discover all the Last Opened Files within the computer as well, and had discovered deleted user accounts's information from prior competitions too. I recovered all their data for safe keeping. Also during a Windows 8 virtual machine, users had also been misbehaving and had left not races behind. I had to discover which

users had deleted files and framed certain users for using Metasploit on the company machine. This is my experience in forensics.

I have uploaded the 3.4 GB Windows Server 2008 Virtual machine here, and it needs to be decrypted with this password: Mg7tdjSsCU

Also I have uploaded the Windows 8 Enterprise edition (if I can recall) here and it is 3 GB. Make sure that when it is downloaded, it does not have a network adapter - delete it. Make sure that the computer's time is set to December 10, 2013. One may use VMWare or VMWare Workstation to open these files. VirtualBox has yet to be tested. If one of these instructions are followed incorrectly, the virtual machine will purposely self destruct with extreme prejudice. Beware.

Proof of work or knowledge: Studying right now and can confirm things via PM if needed.

Hexley - *June 25, 2014, 9:24 pm*

Hello Anonymous,
I would just like to take the time and let you know ahead of time, I have many products that you can display on #.net for free, and they are not at all resource intensive.

HF UID: 1375129
Sector: Programming -> Networking -> Web security
Any certifications: Currently a developer for a marketplace.
Skill level from 1-10: Programming: 10, Networking: 8, Web Security: ~7.5
Proof of work or knowledge:
OnionNet - Tor based rock-solid webserver, written in a universal language. Fully encrypted & blazing fast.
Spusic - Type a name of a song--bam, iTunes grade music file/album with all metadata.
Spata - iPhone Application, search a song name or album or artist, very general, and you will receive a good quality file. The catch? You don't need to be on a data network or have WiFi. This is a huge exploit in the entire phone system.
Sprat - Highly effective Mac OS X based RAT, soon to be open source.
Spoofiy - The only free & anonymous SMS/Call spoofer, not an API or anything. (Carrier detection, VOIP technology, Spoofing capability, and all written in PHP)
Tennit - Basic "return-fire" DDoS strategy for TOR networks, when packets begin flooding and a pinpoint host is detected, the packets are denied and sent back to the firry.
If you would like to see these in action or the source for any of these, do NOT hesitate to send me a

personal message.
Spoiler (Click to View)
HF UID: 1375129
Age: 17
Area of knowledge: Advanced Blackhat Activities
Skill level from 1-10: 10
Provide proof of knowledge: The above form.

Mahdy - *June 25, 2014, 10:02 pm*

We are not just a hacking group, we are a hacking family. This is one of the most prestigious groups to join, so apply today! Make sure you are honest with your skill set, because there is a chance you will be tested. Legion's administrators; Escrow & Dubitus™ are two of the most knowledgeable people on HF, in the hacking area. You will love this opportunity.

Th3PonyWizard - *June 26, 2014, 2:09 am*

(Jun 25, 2014 10:02 PM)Mahdy Wrote: *[CITE]* We are not just a hacking group, we are a hacking family. This is one of the most prestigious groups to join, so apply today! All members will be tested. I don't know where you heard otherwise.

Antigen - *June 26, 2014, 7:44 am*

HF UID: 1431113
Sector: Web security
Any certifications: Nope, I don't have any for Web Security, but if it's necessary I can show you my certificate of Degree in Computer Science(still pursuing) and Diploma in the same.
Skill level from 1-10: 5

Proof of work or knowledge: I was in Legion for about 3-4 months, I had to step back from it as because of a IRL time problem. I took a leave from HF for the same time. For proof, I've got 2nd place in a real time hacking capture the flag contest conducted in the Legion SF about the time I was in(Hackers on steroid if I remember correctly). You can go check that thread and the hoster also had a database of who finished the contest in time, I was placed 2nd or 3rd(and of course Anonymous was the first one ?). I hope it's not pruned yet.

I've skills on various fields not limiting to hacking, I'm very passionate about Coding and white hat security. I got 80% my posts in both hacking section and White hat security. I wrote a couple of

tutorials in respected fields also. I kind of lost a good amount my touch in Hacking field as I turned to Security and Coding lately, but still I've that passion of hacking inside me.

HF UID: 111726
Sector: Programming
Any certifications: System Administrator for my county's public library system and a System Administrator for a plastics manufacturing company. I also maintain a custom ERP software (Java-based) I wrote from scratch which handles 99% of the manufacturing company's daily office operations and allows the owner to work from home.
Skill level from 1-10: 10
Proof of work or knowledge: I can provide pictures of my public library golden nameplate and screenshots of my ERP software if requested. I also programmed a fully-functional Dejarik game in C#/XNA when I was a Junior in high school. I have since lost the source code.
Additional information: I would like to be a larger part of the HF community, mainly of an HF group.

Antigen - *June 26, 2014, 10:17 am*

Sorry it's off topic.
(Jun 26, 2014 08:37 AM)Sajuuk Wrote: [CITE] One of the most prestigious? None of the groups on this site are prestigious.
Because you think so ? Have you been in to every group to comment on them ?

Quote:Has it changed? Why does Legion's owner's username still represent the group?
Why does that bring a problem ? Owner can do whatever he wants with his own group.

Quote:Real hackers don't represent a hacking group they're in by including themselves in it via wearing a, wait for it, userbar that shows that you are in "one of the most prestigious groups" on HackForums. Everyone on HackForums makes fun of the group Anonymous, yet we have a leader

of "one of the most prestigious groups" on HackForums whose username is... yeah.
loling at your reasoning, especially the one "Real haxers never team up", also the one who knows hacking shouldn't use the name "Anonymous" ?

Quote:Okay everyone, watch what happens after I post this. If you haven't seen it before, see it for the first time now before I get a warning for this post and it gets deleted.
You see nothing happened mate, because nobody care about what you think you know.

Sajuuk - *June 26, 2014, 10:48 am*

(Jun 26, 2014 10:17 AM)Antigen Wrote: *[CITE]* Because you think so? Have you been in to every group to comment on them?
One has to be in a group to comment on it at all?

(Jun 26, 2014 10:17 AM)Antigen Wrote: *[CITE]* Why does that bring a problem ? Owner can do whatever he wants with his own group.
It's not about his group on that comment, it's about his username.

(Jun 26, 2014 10:17 AM)Antigen Wrote: *[CITE]* loling at your reasoning, especially the one "Real haxers never team up", also the one who knows hacking shouldn't use the name "Anonymous" ?

When did I say "real haxers never team up"? Reread that text of mine you quoted.

(Jun 26, 2014 10:17 AM)Antigen Wrote: *[CITE]* You see nothing happened mate, because nobody care about what you think you know.
Nobody cares about what (you think) I know because 98% of members here are clueless, unperceptive, and oblivious to what actually goes on here. Let me rephrase a comment in my last post: everyone here makes fun of the group "Anonymous", of which anyone can join under any circumstances. Well, seeing as that's a fact, and this group's leader's name is Anonymous, does that mean Legion is a joke group? I mean, everyone makes fun of Anonymous here. It's hilarious when people come here and say "I'm in anonymous you better not fuck with me." If so, I would never have guessed that a joke group would be "one of the most prestigious groups" on HackForums. You see where I'm getting at? This is just based on observations. I used to be in Legion just to see what retarded people there are here who think they can hack or whatever, but since there was/is so much bullshit in the subforum, I asked, ha, Anonymous, to kick me. Surprising?

Aura - *June 26, 2014, 10:51 am*

(Jun 26, 2014 10:48 AM)Sajuuk Wrote: *[CITE]* One has to be in a group to comment on it at all?

It's not about his group on that comment, it's about his username.

When did I say "real haxers never team up"? Reread that text of mine you quoted.

Nobody cares about what (you think) I know because 98% of members here are clueless, unperceptive, and oblivious to what actually goes on here. Let me rephrase a comment in my last post: everyone here makes fun of the group "Anonymous", of which anyone can join under any circumstances. Well, seeing as that's a fact, and this group's leader's name is Anonymous, does that mean Legion is a joke group? I mean, everyone makes fun of Anonymous here. It's hilarious when people come here and say "I'm in anonymous you better not fuck with me." If so, I would never have guessed that a joke group would be "one of the most prestigious groups" on HackForums. You see where I'm getting at? This is just based on observations. I used to be in Legion just to see what retarded people there are here who think they can hack or whatever, but since there was/is so much bullshit in the subforum, I asked, ha, Anonymous, to kick me.

Surprising?
You shouldn't pay attention to people saying that they are in Anonymous. Anonymous is a collective idea that takes form with the actions of hacktivists. "Anybody" can say that they are part of "Anonymous", as in the collective movement, but no one here is part of the REAL Anonymous hacktivist group. This is the difference and a lot of people seems to not get it. Anyway, just my 2 cents. I ain't even a Black Hat ?

Aha! See, if I would've typed some sort of comment that somehow magically qualifies as "abuse towards other members", I'd get a warning, and the post would be deleted. However, when members like you post shit like that, nothing happens. See how increasingly fucked up it's gotten over the years? I deal with shitheads like you all the fucking time. This place is full of 'em. And guess what? I just keep getting warnings. You're no different from the others. The only catch is that you have a big e-weenie due to your oh-so-impressive extremely high reputation count. The whole *@&%&@^!^ group, or what you refer to as "Instinct", also adds to the size of your already humongous fat internet cock.

Why should I care anymore about doing the things I do best: bashing the mother fucking shit out of all the idiots here. The semi-toddler population is like a Hydra, you bash one of them, they leave, and two or more come back in their place.

Aura FFS, The only difference between a black and a white hacker are a morality thing.. You work to patch different security holes, remove malware, secure DNS etc, but we do the opposite. You cant be a white hacker and not know how a black hacker thinks.

If you're insecure google the subject, I think its okay to do that

Trust me, you are qualified :)

Thornzzz - *June 26, 2014, 12:46 pm*

This used to be a really fun group. Hope the users applying like it also. Also Aura and Mad are both noobs at Blackhat.

Mad76e - *June 26, 2014, 12:59 pm*

LOL..

Yeah.. Im to freaking nice and still got a conscience that's why

Theres always someone better out there :)

Damn what happend? I thought you stayed in Legion?

EDIT: Heh.. Lets take that in a PM..

Keep it clean :)

Mutes - *June 26, 2014, 4:34 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] HF UID: 117324
Sector: Computer Forensics or Networking.
Any certifications: None right now, just a college degree in networking.
Skill level from 1-10: Personally, I would say 8 - 9 depending on the situation.
Proof of work or knowledge: I don't have any "proof" of this as my college graduation was in 2011, so I have nothing left over. My degree was in networking, but I took a minor in computer forensics which is where my skill is stronger.
Sometimes short and sweet is all that is needed. You can ask me anything to prove my ability.

t0rch - *June 26, 2014, 11:20 pm*

HF UID: 1459629
Sector: Programming
Any certifications: I'm working towards earning a certificate from MongoDB for developing a python app for mongodb. I should have it by late july early august.
Skill level from 1-10: 7-8
Proof of work or knowledge: I've not really developed anything worth mentioning. I've made a few practice websites. The only published one is private and will not be included in here. However if you'd like screenshots PM me. I am fluent in Python and PHP. And have the ability to create programs in C# as well. I also have some SQLi skills so I know how to prevent flaws. The same with XSS. I've been programming since late 2011 early 2012 somewheres in there. I also have prior knowledge of VB.net but have since stopped using it.

Thank you for the consideration of my application.

BinKill-Ethical ?

Aura - *June 27, 2014, 6:13 am*

I'll give it a try because I told Escrow I would apply this summer as I have more free time and also because I own Anon this one ?

HF UID: 1495835
Sector: Either Networking or Computer Forensics (as it can be considered as White Hat)
Any certifications: None yet. I'm a 3rd year IT student with 11 months of experience as a tier 2 technical support for a big entreprise/company in Canada.
Skill level from 1-10: Depends.Windows : 8 (and I mean a serious 8. Not a 8 and I don't know half of what I'm doing)
Malwares Removal (pretty useless here but meh) : 7.5 (once again, a solid 7.5)
General Computing : 7
Troubleshooting : 8.5 (it's my job, I hope I'm good at it eh)
Networking : 5 (... I know)
Computer Forensics : 2 (as I've never touched it but I can understand some basics concepts)
Proof of work or knowledge: For the skills I listed, I have around 10,000 posts in the White Hat Help and Windows area to proves that I know what I'm talking about when it comes to these domains. Just go in these sections, pick 3 random threads and I can guarantee you that I'm in at least 2 of them, if not the 3.

Should I fill a "Tell us about yourself" or not ?

Jamela - *June 27, 2014, 3:39 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] HF UID: 2326851
Sector: Networking.
Any certifications: About to start on a six months basic course, where I will learn everything from A-Z to basic-advanced, after that, I'll be running on a main course which will be on around four years, so pretty much getting an IT-infrastructure certificate.
Skill level from 1-10: Well, I do obviously already have quite some knowledge in the area, but I do not have a perfect knowledge.
I would be able to study some of the other members of Legion, that has little to no knowledge about the area, but I can not study a person highly familiar with the subject, in the future I will be able to; hopefully.
Proof of work or knowledge: I do not have any sort of proof, as I am running my basic course soon, I will gather some copies of my work, and possibly share them with the community, not only studying members of the community, but also learning myself a new way of explaining the course I am getting, which would be amazing for me, to also master the subject.

I hope to see myself in Legion, being able to study students regarding some of the areas in Networking, and also assisting with Remote Administration Tools, as my school will also be around the hacking scenario a lot (from what I heard, at the meeting on the school, where we were told about our basic course, what we will learn, and in the exact order, which I will write in the next line.

My schedule for my six months basic course:
[b]One week with starting up knowledge.
Two weeks with open-source.
One week with E-learning.
Five weeks with Network.
Two weeks with PC knowledge.
One week with multiple OS types, such as the different varieties of Linux, and also the basics such as Windows.
Three weeks coding/programming.
Four weeks with mini-projects.
One week internship searching.
Two weeks with "mini" exam.
One week with project planning.
One and a half week with project finals.
Half a week assessment and transition.

I hope I somehow interested you in my area, and hopefully I'll get a chance to share, and learn more with the Legion.

Regards,
Jamela.

roke29 - *June 27, 2014, 4:41 pm*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] HF UID: 1560453
Sector: Programming
Any certifications: Mathematics-Informatics College Degree. 1st year of Computer Science programme passed.
Skill level from 1-10: 8-9
Proof of work or knowledge: I know how to code in Java,C++,SQL as proof I think the most relevant is the latest project that I've worked on. If you need it I can show it to you.

Basically in programming I know variables,loops,types , OOP, polymorphism, interfaces, encapsulation, associations, 4 types of patterns, different searching, sorting, merging algorithms,

how to code GUI, exceptions, architecture, testing with JUnit, working with JPA, recursion, divide et impera.

Beside coding in those 3 languages I know web-development HTML/CSS, a bit of Javascript and JQuery when needed. I'm also pretty good skilled in the design field working in PS, Illustrator or Indesign.

Other skills: I am a very good debater co-founded and coordinated a club of debate for almost four years, still offering advice when and where I can. Besides debate I tried drama as well which was a very pleasant experience for 3 years in a row and which developed my skills and abilities when talking in front of people or presenting something. I traveled a lot in my country and I worked actively with different NGOs both as a volunteer or possesing a coordinating position even as a VP for a good while.

Vinnie - *June 27, 2014, 9:35 pm*

I'm going to start giving the networking and computer forensics members a notice of when I'll be having a look at them. Be on point and punctual or you'll be wasting your own time.

I should definitely work on certifications but the only one I could grab easily are CompTIA A+ and Security+. And apparently they aren't that recognized anymore. Plus now you have to renew them yearly and I'm asking if its worth it to get them and pay every year for them as I'm not in University yet you know. I should study for CCENT and CCNA too.

Vinnie - *June 27, 2014, 10:03 pm*

Yeah, I got my Comp a+ networking a+ and security a+ at the age of 17 and they have to be renewed every 3 years I believe? They were extremely easy, I didn't even need to revise for them.

Aura - *June 27, 2014, 10:03 pm*
(Jun 27, 2014 10:01 PM)Vinnie Wrote: [CITE] That may be the case but he's proved himself in other ways but there isn't any need to get into that as it's completely off topic.
I agree with that lol. I proved myself in many domains but I still ask really noobish questions about hardware sometimes as I know hardware, I know how to troubleshoot it but I'm not as deep into it as I am in malware removal and Windows for example.

Sajuuk - *June 27, 2014, 10:04 pm*

(Jun 27, 2014 10:01 PM)Vinnie Wrote: *[CITE]* That may be the case but he's proved himself in other ways but there isn't any need to get into that as it's completely off topic.

Do you happen to remember how he proved himself worthy of joining Null? In my visits here, everyone tells the new-to-programming children to read the documentation. Goodies made a thread about a problem that was specifically documented on Stackoverflow in a question form and was the number one (first) result that came up on Google when I searched up his problem for him. That made me realize something.

Now when you say he's in Null now, what?

EDIT: You tell me not to get off-topic, yet look at yours and Aura's posts.

Aura - *June 27, 2014, 10:04 pm*

Someone told me I could grab the A+ without even studying and I guess he's right. For the Security+ however I don't know. I took a partial test of 15 questions and got 13 on 15, lol. And apparently its yearly now. It used to be every 3 years but it got dropped. Let me validate that lol.

Edit : Never mind you're right. Its every 3 years. Dunno who told me it was yearly. I guess I'll give a shot to the A+ one this summer. Just have to find where I can take the exam.

I got my A+ with ease and no classes. Although, it's part of my major now that I have to take the A+ class (even though I have the cert) so i'll actually have to do a bit of work for it -__-

Security+ and Network+ aren't much harder, but I don't have them. You should go for A+ and Network+ then get some MS certs, man! You know your shit already (obviously). A guy from my CCNA class last year makes $150/hr as a private contractor and all he does is windows server administering. He took CCNA for the Lulz and the knowledge, but he has MS certs out the ass.

Niely

HF UID: 2200849
Sector: Programming/Web-security
Any certifications: Finished 3th year Human Science successful (90% informatics 3th trimester).
Skill level from 1-10
5.5
I don't call my self a Morris, but I'm pretty good in what I do. The problem is, I still have much to learn. Why a 5.5? Because I learn pretty fast and I know I've got capacity. The only thing I need is a good source (like a pdf or good reply) and two days and I fully understand it!
So, I know some stuff, I learn pretty fast, but still have a lot to learn!
Extra
Known programming/coding languages:HTML (advanced)
CSS (advanced)
XML (sitemaps)
JavaScript (average - advanced)
PHP (Basics)
C++ (Basics)
Visual Basics (Basics - Average)
SQL (Basics - SQLi)
Batch (Average - Advanced)
...
- Defensive techniques
I'm not an Aura, but I'm able to protect myself well. Paid Anti-virus, MBAM Premium, Zemana

Anti-logger free, Anti-Exploit, know when infected, sometimes use a simple VM to test files if I really don't trust). Sometimes find & report infected download links on HF. :)

- Cross Site Scripting hacking
Not advanced at all, I know how to test on XSS vulnerabilities but that's it. :)
Should learn it in the future though.

- Abusing DNS for host identification
Never done.

- Evidence removal and anti-forensics
Don't know on what scale you guys mean this.
But, I never store cookies/use the remember me function; Know how to use a VPN/Tor network; Often check (Local)AppData; Know encryption.

- Breaking wireless security via hacking
Don't do this that much actually, but I can crack Wi-Fi using Reaver if needed (and when I get a good network card).

- Remote root vulnerability exploitation
Never done.

- Data retrieval with SQL Injection Hacking
Basics, I'll learn WAF-bypassing too soon! :)

- Windows 2003 Server & Vista DNS Cache Poisoning Attacks
Never done.

Proof of work or knowledge:
I made some simple HTML/CSS/JS sites. (http://leethaxors.tk), Nothing much, I used it to test JavaScript effects.
http://icode4u.tk (/forum) is another one, It looks pretty unprofessional right now, but we'll re-style it from scratch soon! :)
I'm also planning making a small .onion sites for downloads etc. But I need to do more re-search about it first. :)

Small video about a BASIC SQLi (will learn WAF-bypassing etc. soon):
Spoiler (Click to View)
[Video: https://www.youtube.com/watch?v=1HKmR9NHZVk]
https://www.youtube.com/watch?v=1HKmR9NHZVk
(Sorry for low quality, was fast done and made).

Small tool I made in vb.NET (not ready yet, I'm also making other tools like port-scanner, browser,...):
Spoiler (Click to View)
[img]http://i.minus.com/iyh8UHPfdaFSA.png[/img]
(Image is a bit blurred).

Some tool I'm making in C++, about administrating your system (need to add like 4-5 things until I can put it online):
Spoiler (Click to View)
[img]http://i.minus.com/im8wFF3NmESMz.png[/img]

(Again, some things are blemished). =)

Some security tools/I use together with/mixed with my security:
Spoiler (Click to View)
[img]http://i.minus.com/i0fl94BGymUti.png[/img]
(Will replace Comodo Firewall with Z0neAlarm soon anyway).

An easy basic XSS:
Spoiler (Click to View)
http://youtu.be/CkhFU7RjHQs (only one video allowed).

I've also made a tutorial:
https://hackforums.net/showthread.php?tid=4178212
(I personally think it's an okay one, besides the grammar/spelling mistakes).
I also often help people out in the Beginner Hacking Section, hope I can help people in White Hat, programming, and whole computer section soon too! :)

I'll post some more proof later on! :)

I've got all day time now for 2 months, so I'm able to learn and do a LOT more!

I hope I can become a part of Legion soon! :)

Kryptize - *June 29, 2014, 4:01 pm*
I'm not gonna spend any time doing fancy graphics for this application.

HF UID: 2335023
Sector: Web Security, Networking, or Programming would all be nice.
Any certifications: No official certifications.
Skill level from 1-10: Probably around 5-6
Elaborate on your skill set: I can code and design websites. I am fairly fluent in both HTML, CSS3, MySQL and PHP languages. In the past, I have owned a hosting company and am fairly experienced with the linux server management side of things and networking. I'm in the process of learning C++ and C# and am quite fluent in .NET.
Proof of work or knowledge: If you would like proof, I'd prefer to share in private, as it has some personal info in it.

Winners - *June 29, 2014, 6:00 pm*
HF UID: 2253049

Sector: Web Security & Pen Testing, Social Engineering, Doxing & Tracing, Programming

Any certifications: No legal ones at the time being. Bachelors in computer science though.

Skill level from 1-10: 8

Proof of work or knowledge: I'd only be willing to share this with you in private.

Short and to the point but if you want someone who can help you complete most orders, knows the

material, and has invested time into "real" hacking, get with me. ?

Anonload - *June 30, 2014, 10:05 am*
HF UID: 1447041

Age: 19

Area of knowledge: Doxing, Anti-Doxing, HTML, Android chief, Basic SQLi

Skill level from 1-10: In Doxing : 7
In Anti-Doxing : 6
In Android chief : 8-9

Provide proof of knowledge:

I made guide on Doxing : https://hackforums.net/showthread.php?tid=4299598

As I told I am android cheif I featured 1 ROM all with Xperia for HTC and Debloated 1 ROM also for the HTC.

I can proove my these ROMs but I can't link them here publicly bcoz It's on XDA-Android Community.

I worked on those two ROMS like 1-2 years and I do have 600+ Thanks meter there..so shows almost all.

yes if you ask me via PM I will give you the links.
I am daily increasing my Knowledge on Doxing and Anti-Doxing as well..I keep on reading the thread . till now I read like 250+ thread on Doxing so I have almost 80% knowledge in this as well.

I do have good knowledge of Anti-Doxing as well and knows Basic SQLi.

I know little bit started of Anti-Forensics.

Patrick Star - *June 30, 2014, 12:54 pm*
HF UID: 581765

Sector: Computer Forensics

Any certifications: ACE (starting work on EnCE)

Skill level from 1-10: Overall, I'd have to give myself an 8. There are a lot of sections within Computer Forensics.

Proof of work or knowledge: I'd rather share my proof in private as most of it contains my personal details and other information. But, I will post the type of items that I can show. I just recently graduated from a university that offers Digital Forensics (was Computer Forensics but then changed names to accommodate cell phones, GPS devices, etc.) and can offer a picture of my diploma. I can also show you mock reports that I had to create on cases which were then given to my professor and he cross examined my report as if he was a defense attorney and I had to back up my findings. I have two on my computer and I should have a third somewhere else but they are pretty lengthy due to the evidence I found.

Please contact me if you are interested in see my proof.

?Solace - *July 3, 2014, 6:05 pm*

HF UID: 1199068
Sector: Programming, although I'm going to university in september for a BSc in Computer Science, Networking stream (The university specializes in network security).
Any certifications: None as of the moment. Planning on getting an OSCP when I can afford it. Definitely a couple more within the next couple of years. I want my CEH.
Skill level from 1-10: I'd give myself a 7.
Proof of work or knowledge: Feel free to contact me about what I've worked on. I've been programming in Java for almost 3 years.

- Defensive techniques
I know a bit about proxies and VPNs. I guess you could count crypto currency as a method of staying in the shadows. I'm fairly knowledgable about all of them.
- Cross Site Scripting hacking
I've never really gotten deep into XSS, although I'm aware of how it works and why it works.
- Abusing DNS for host identification
I'm experienced with DNS poisoning. Usually just for pranks with friends, but I know how it can be used maliciously.
- Evidence removal and anti-forensics
I've experimented with a couple of different methods of securing my own systems against forensics. Overwriting data in hard disk sectors, encrypting hard disks, and of course using the good old magnet.
- Breaking wireless security via hacking
I've been doing this since I was 15. I'm assuming WPA/WPA2/WEP. If you mean protocols such as SSL/TLS, I can break those as well.x
- Remote root vulnerability exploitation
I've been learning about these heavily lately. Exploiting vulnerable services on open ports to gain system access, then escalating privileges when needed is immensely intriguing.
- Data retrieval with SQL Injection Hacking
I have decent experience with SQLi. I've experimented with defacing websites found through google dorks, as well as dumping their databases through tools such as sqlmap.
- IPV6 Exploitation
I've played around with the THC-IPV6 toolkit, I love it.

- Xbox Hacking
I host modded lobbies over xbox live on an RGH console.
- ARP Cache Poisoning
I could talk for days about this one. I find it the easiest and most enjoyable topic when it comes to black hatting.
- RATing
I don't use RAT's anymore really. They're fun to play with, but kinda skiddy. Also since the NO-IP/Microsoft thing got intense, nobody should be using them for a while.

BlaznWildabeest - *July 4, 2014, 9:03 pm*

HF UID: 1407474
Age: 17
Area of knowledge: Programming such as web and mobile development, stack-based buffer overflows, using tools in Kali/BlackArch Linux
Skill level from 1-10: 6-7
Provide proof of knowledge:
Chronologically:iOS jailbreaking pioneer (1st gen iPod Touch). First programming experience was using Ruby and Perl in mobile terminal as well as manipulating hex code to achieve high scores in games. Also ran the mobile-designed metasploit on the iPod.
Joined HF and setup RATs such as Cybergate and Darkcomet, used spreading methods such as torrents of popular MP3s
Joined robotics and got into light web development and programming robots in LabView.
Watched MIT OpenCourseWare lectures on python, which would later be used for Heartbleed and buffer overflows.
Dual booted Arch Linux and installed the BlackArch repository, using programs such as Nmap, Metasploit, and Wireshark for educational purposes.
Currently working on a minecraft server as a plugin developer. Coding plugins in Java, collaborating with YouTubers to give it coverage during its release.

You should learn some router security :P I know you know windows like the back of your boyfriend's head, but you've already mastered that. You need an actual challenge.

Aura - *July 5, 2014, 2:58 pm*

(Jul 5, 2014 02:51 PM)Vinnie Wrote: *[CITE]* Yeah I suck at it, I think, well at least that's what I think, I prefer subjects like computer forensics and networking.
I would rather do that than web ? My ASP.NET class last semester just killed me of boredom ... And I think I'm pretty good at networking, it was originally what I was supposed to be in at my internship (networking team) but got changed last minute. I'll reread your networking tutorial tonight to get back into it ?
Goodies while you're there, send me these A+ study material to see if I should really study for it or if I take the exam right away ?

Aura, if you want to learn more about routing without having the hardware, you can load up an emulator for it. One of the more popular and free ones is GNS3
http://www.gns3.net/

Cyber Saint - *July 9, 2014, 11:13 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img] Introduction:
Hello leaders, owners and readers of the Legion Recruitment thread. This is my application to the group and I thank you very much for talking the time to review this application and hopefully consider me as a member of this group.

HF UID:
2150941

Sector:
Programming

Any certifications:
With time, I will go for some certifications. I hope to have the opportunity to take several university courses in the coming years. Certifications are surely something that would help me out in this application but I'd rather stay truthful and just simply state that I do not have any at the given moment.

Skill level from 1-10:
I'd say my skill level is 7. I could be a lot better programmer but I work hard at it. I'm not the kind of person that does half ass applications or anything of that nature. As we speak I am reading and practicing to become a better programmer daily.

Proof of work or knowledge:

As some proof I would like to show you a few of the applications that I have developed. All of these applications are indeed functional. The computer that these programs/projects were stored on is no longer functional and I managed to find these applications screenshots from the time of providing

proof of applications to the group known as Polymath.

Spoiler (Click to View)
Here is an anti-virus application that I developed a while ago (C++)

I also set up a product key system for an experiment back when I developed this a few months ago (March?)

Here is an application that I developed for my school. This one was developed in Visual Basic 2010 back in early 2013? I no longer work in VB.NET and I focus primarily on Java and Android development currently.

I would have loved to provide more of my programming work, but I have a wide variety of friends that I have done programming work for in the past and I'm sure if they saw this post they'd be willing to vouch for the fact that I know what I am doing. Maybe the amount of proof I supplied is simply too little, therefore I would just like to thank you for this opportunity.

Have a good day!

Additonal: I know C++, Python, C# and Java. PHP is something I worked with when I was around 13 and I'm no longer really involved in the use of it. I'm currently exploring Perl which is old but still powerful.

Pumpkins - *July 9, 2014, 11:32 pm*
HF UID: 885071
Sector: Dabbled in pretty much all four due to curiosity. Programming is probably my strongest seeing as I've done it almost my whole life.
Any certifications: Computing AS & A2. Computer programming course in university starting September. :3
Skill level from 1-10: I don't want to sound big headed but I think I'm decent at programming, although definitely room to improve. I give myself 6-8.
Proof of work or knowledge: Here's a remote admin tool that I programmed (not me using it ?). I removed a lot of my recent threads but if you want to see some code from me then just PM :)

Eeluminati - *July 10, 2014, 12:29 am*
(Jul 9, 2014 03:53 PM)Suffixed Wrote: *[CITE]* He has done programming work for me before and definitely knows what he is doing, vouch for this individual.
Vouching for users only decreases their chances. Just putting that out there.

Exclusive - *July 11, 2014, 1:56 am*
HF UID: 590894
Sector: Programming.
Any certifications: No, I don't have any degrees from college as of yet although I have almost taken it upon myself to not apply for any as I have the expertise already acquired for my entrepreneurial efforts.

Skill level from 1-10: 7 (I believe that 8+ involves more knowledge in C++ and cryptography than I have acquired; they're not in my interest although I started studying Algorithms)
Proof of work or knowledge: I would prefer not to list my efforts directly as it may impose a negative effect I and my partners do not with to have. If you have interest in my application contact me directly and I will provide you with project examples I currently have and additional upcoming work.

Antigen - *July 11, 2014, 2:14 am*

I guess nobody looking over recruitment and this is a dead thread. I ain't seen anybody get in to Legion from this recruitment thread.

Aura - *July 11, 2014, 3:30 am*

(Jul 11, 2014 02:14 AM)Antigen Wrote: *[CITE]* I guess nobody looking over recruitment and this is a dead thread. I ain't seen anybody get in to Legion from this recruitment thread.
I've seen a few people so far but not a lot. Only a few are worthy to get in now, it's not the same requirements as before ?

Antigen - *July 11, 2014, 3:43 am*

(Jul 11, 2014 03:30 AM)Aur? Wrote: *[CITE]* I've seen a few people so far but not a lot. Only a few are worthy to get in now, it's not the same requirements as before ?But I'm afraid I've seen many members worth qualifying "old" requirements.

(Jul 11, 2014 02:14 AM)Antigen Wrote: *[CITE]* I guess nobody looking over recruitment and this is a dead thread. I ain't seen anybody get in to Legion from this recruitment thread.
This thread isn't dead.
We've invited quite a few people the last two days and expect more to be invited over the course of the next week.

Antigen - *July 11, 2014, 4:49 am*

(Jul 11, 2014 04:43 AM)?nonymous Wrote: *[CITE]* This thread isn't dead.
We've invited quite a few people the last two days and expect more to be invited over the course of the next week.Thank you for your response. Good luck to all fellow applicants.

Forezza - *July 11, 2014, 4:52 am*

HF UID: 2057910
Sector: Web security
Any certifications: I personally don't think certifications help you as much as practical work in this field. So nope, don't have any as I think I would benefit from spending my time more wisely.
Skill level from 1-10: This is more of a question about personality than the actual skill level of a hacker. People are not going to pretend they have 10m long e-cocks and say a 10 in an application, but they also want to make themselves look like they know their shit. So I could just go with the flow and chuck a 7 or an 8 here claiming that I know what I'm talking about but that means jack shit. I'd rather take the practical test and you can see my skills in practice.
Proof of work or knowledge: Most of my web security work is not public. The main reason being is that I'd rather not implicate myself into things publicly.

Im gone brah - *July 11, 2014, 12:41 pm*

(Jul 11, 2014 03:43 AM)Antigen Wrote: *[CITE]* But I'm afraid I've seen many members worth qualifying "old" requirements.
The requirements aint the same, as the old Legion.

Vinnie - *July 11, 2014, 12:49 pm*

Several members have been tested and a few of them have been invited, the ones invited didn't lie

on their applications saying that they would rate themselves 8/10 when it comes to let's say networking. The ones that got through were honest and made it in.

Oh and we're not the Legion from a few months back, we've changed, slightly.

Ultimate Keyboard Master - *July 11, 2014, 1:04 pm*
Yeah sure i'll join this group. Let's hack stuff lol

420™ - *July 11, 2014, 3:32 pm*
Well, I guess I didn't make the cut. Oh well. I really needed to learn more anyways.

Pumpkins - *July 11, 2014, 4:32 pm*
(Jul 11, 2014 12:49 PM)Vinnie Wrote: *[CITE]* Several members have been tested and a few of them have been invited, the ones invited didn't lie on their applications saying that they would rate themselves 8/10 when it comes to let's say networking. Oh and we're not the Legion from a few months back, we've changed, slightly.
Will we be notified if we get denied?

420™ - *July 11, 2014, 8:28 pm*
(Jul 11, 2014 04:32 PM)Zakary Wrote: *[CITE]* Will we be notified if we get denied?Probably not. I applied, and I'm pretty sure that I got denied.

Vinnie - *July 11, 2014, 8:36 pm*
If I don't message you then yeah, for now. Temp.

Mahdy - *July 11, 2014, 8:46 pm*
You will not be notified if you get denied. You will only be notified if you are accepted. If you do not receive anything from anyone, you are denied.

Also, remember for next time guys: We review these applications carefully. All because someone does not get back to you right away, you cannot be negative and say "Oh I got denied because no one answered me." That's not the type of attitude and mindset we want in the group.

Best of luck to everyone who joined & got accepted.

Sicarius - *July 11, 2014, 11:35 pm*
Looking forward to having some fresh meat in here ?. Congrats to all those accepted.

Distroy - *July 18, 2014, 12:20 am*

Skill Set -

Ratting - I came to HackForums to actually learn about Ratting as that was the only "Hacking" Method I knew back than, so Ratting is my main skill.

Social Engineering -

This is my second "Method" I learnt here on HackForums so i'm rather skilled in this, since Social Engineering does help in Ratting.

Tell Us Why You Be Be A Vulnarable Asset -

I believe think I would be a valuable asset to the group because, I Strive for success in all my work I get requested to do, and i'm a pre chill guy.

Age - 14

Area Of Knowledge - Ratting, Social Engineering.

Skill Level 1-10 - 7

Proof Of Knowledge - I rather not post my work online for everyone to see as it is illegal, so I would like to provide proof when I get trust in the group C: Which is not very hard to get.

Thanks for reading my application C:

53CUR1TY - *July 18, 2014, 12:44 am*

HF UID: 880519
Sector: Networking
Any certifications: CCENT - Studying for CCNA - Computer Engineering major
Skill level from 1-10: 5-8; skills vary depending on specific areas; still learning
Proof of work or knowledge: I can send a screenshot of my course list if need be. I'm currently undergoing several networking based classes for my major.

Mad76e - *July 18, 2014, 2:19 pm*

Ohh?! Youre back? Damn.. Well i "Might" apply "IF" the activity arise

Zabuza? - *July 18, 2014, 10:55 pm*
Don't apply if your "skills" include Ratting or Social Engineering.

-Dartz - *July 19, 2014, 9:20 am*
HF UID: 130576
Age: 18
Area of knowledge: None, but I'd love to learn.
Skill level from 1-10: 1, no doubt.
Provide proof of knowledge: I have no knowledge

This isn't a troll application, just being honest. With a lot of time on my hands, I think this is one of the most ideal ways to learn. To be honest, the public tutorials / the hacking section is just filled with RATs and shit like that. I hope even if you don't accept my application, you consider me.

Thanks for the opportunity. :)

Tirus - *July 21, 2014, 2:43 pm*
[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
HF UID:
1980205

Sector:
Programming and Web Security

Any certifications:
Sadly, no.

Skill level from 1-10:
8.5

Proof of work or knowledge:

| Tirus | RAT Help Desk | Free RAT Suport |
Bypass VPN Ban
Infinite Loops
How to run / setup NTO SQL Invader
String Based SQL Injection
Configuring Hashcat
Pernicious | Help Desk | Hacking | Programming | Linux | Security |

About me:
My name is Tirus, you can call me Jason, either or. I started hacking back in 2010 when I use to play Call Of Duty, I wouldn't really consider it hacking but I started hitting people offline with Cain and Abel and a web stresser, from there I learned how to RAT and how they work and then I learned about keyloggers, the development of them. From there, I started to learn Python. It was a terrible start due to the fact that Pythons syntax is very strange compared to other programming languages which makes it very ineffective when trying to program in other languages, anyway, I learned how to program in Python then I decided to move onto PHP, HTML, CSS, JS and then I learned Java which is where I am currently at now, I am starting to develop plugins for Minecraft which varies from poison plugins to useful plugins for server owners. I started web hacking around last year where I learned SQLi(blind, union, error), LFI, XSS, RFI, SSI. I also have a vast experience of Linux, paticullary server administrating due to the fact that I've ran a Minecraft server (managed) one and kept it up and running. I also helped the development of multiple VPN companies and managing those as-well. I am not the best, I don't claim to be, I never will be the best; but my knowledge grows everyday which I am very grateful for that. I enjoy learning new things. I also enjoy helping members out, if you check my "Post activity" located on my profile you'll see I have the most posts on beginner hacking section due to the fact that I truly do enjoy helping out members and sharing my knowledge which I am grateful to have.

To summarize things up, I want to let you know; I'll prove my worthy to be into such a prestigious group and I'll prove my worthy. I also want to thank you for reading my application and I wish all the other applicants the best of luck in this group.

Buckle your pants, this will be a long one. (Click to View)
Let's start off at the beginning.
Back in 2011, I made a mod for the game Terraria, called "TooManyItems", which is practically a clone of the Minecraft version.
Between July 2011 and January 2012 (rough dates), it received over 10,000 downloads, which was about 1/8th of the community at the time.
In Feburary 2013, I continued development for another popular mod on Terraria (which is still available today), known as N-Terraria. I didn't do much, except for clean the code and UI.

On this site, I have made many tools for people. Including my SSH Bruter, my SQLi scanner, and a plethora of websites.
I made both anoncloud.pw and anonfiles[WARNING POSSIBLY INFECTED].pw, which I sold to Enronitis (who is now selling them), along with piratecoffee.org.

I also participated in a Ludum Dare. Click here to see.

It's hard to provide proof that I know how to program, but there it is. Feel free to question me about anything, and I will try my best to answer.

Using the in-built firewall is not to my expected standard, unfortunately ?

I'm really ? with setting up Suhosin and modifying the configuration files for increased security level and lower cracking rate for PHP, and mod_security plus modifying configuration files to increase security level for Apache.

I often use grsecurity more than SELinux if this is added because it's more compatible towards the rest of security modules provided for the kernel. But if in dire need of more complex policy setups.. then I go with SELinux. But either way, I'm good with both modules (although you can use only one ?).

Unfortunately, I'm not good or interested in patching PaX to a kernel because it's not somewhat my type.

Regarding networking, I haven't mastered this part yet but I did learn and make a damn good use of TCP wrapping (xinetd) for the network.

If this counts as an extra, I'm also familiar with the functions of PAM for authentication.

Nevertheless, thank you Sonder for the reply. Here goes my application ?

Provide proof of knowledge: Give me a server and I'll provide extensive proof of my knowledge ? (tried taking videos but camcorder doesn't work)While I think lacking knowledge regarding Networking (TCP is good, but Routing? Blackholing? Migrating DDoS? Checkpoint switches, Cisco routers and config) is a punch, you're definitely far on the required level in my opinion (I'm not in Legion), your skillset is rare as fuck in HF as well.
Although if you know how to limit daemons and service's resource consumption (ram and stuff, so it won't take 100% cpu), you know how to secure yourself against 50% of DDoS attacks already (ARME ones)

You will be notified, if you get accepted. Same goes to everyone else.

potatopete54 - *August 11, 2014, 6:46 am*
@Sonder, pretty much I use iptables for inbound/outbound network routing. And ouch, I hate null routing as much as poop. I'd redirect the overflowing traffic to another IP which isn't under my jurisdiction so <3

Regarding Cisco, I am still studying the courses (by those cbtnugget site tuts) and have yet to take a certification. Like I said, networking is not my strongest skillset but it's somewhat that I aspire to master at in the very future.

And regarding your last sentence, almost all experienced sysadmins call it as optimization (heheh). I mainly limit daemons/processes or show them who's boss by either using chown or.. my favorite.. kill -KILL pid in dire situations where I notice some shit going on under the process ID :P

Also about the DoS attacks, I'm already looking into the different kinds of attacks (slowloris, xml-rpc, layer based attacks, etc) and some of the best suggestions I get is to move to nginx which I strongly despise of.. ?. But as of now, I'm focusing on finding a solution for blocking specially crafted Perl scripts which can overwhelm the amount of requests which is being sent to the apache web server (special-DoS) :)

*I'm a-lot missed up here and there in networking but that's not the main area of knowledge I presently mastered upon. It's just some bonus knowledge I add in ?

Turtle???? - *August 16, 2014, 12:41 am*
HF UID: 2181647
Sector: Programming
Any certifications: None
Skill level from 1-10:
Programming: 4
I'm an aspiring programmer who has had a good, solid 2 year exposure too it, but programming is such an expansive subject it would be impossible to call myself "professional." I'm still learning and am a student, but in my 2 years of learning, I started by taking APCS in my highschool as a freshman. I came in not even knowing what Hello World was, but I ended up with a 5 on the AP Exam. Furthermore, I competed in a competition called "Hunt the Wumpus" where I took on the GUI and Highscores object out of our group. The game turned out like this, as displayed here: https://www.youtube.com/watch?v=OZoVY3p8jLA, and it certainly appealed to the judges at Microsoft (Hunt the Wumpus is a Microsoft sponsored Game Development competition). I have also monkeyed around with the app development in the Google Play Store and created some games. Furthermore, I have an internship with a company in which I helped developed the app and also am currently doing a lot of statistical modeling and data crunching, as well as some basic website development and implementation, but all of this is with a bit of help.

Social Engineering: 2 (this is more of an asset, in no way am i using this too benefit my application, this isn't really a skill but an interest)
This is something that I am just starting to learn and build and interest towards. I have a growing knowledge on how to DOX people, etc. This isn't any special in particular.

Defensive Techniques: 2
Again, this is more of a burgeoning interest than something i'm "pro" at, however, I know a lot about staying secure and also dealing with nuisances that try and take down my services like my stresser, etc.
Proof of work or knowledge: I provided a youtube video about showing the final product of the game that we created. Other than that, I can provide source code (if interested) to the Wumpus project and can show some other programs that I made and some fun projects I tackled in my APCS class. I've done some reading on computer security/hacking techinques as well, such as Steal This Computer 3, so I have a thorough theoretical knowledge.

I hope to gain a lot of knowledge if accepted into this group, and it would be an honor Anon ?

I've been doing web-app security for some time now and I feel like I've got quite good at it.
I know how to find and exploit most of the common vulnerabilities related to unsanitized user input and similar flaws.
I've been a member of team intra and Pernicious Developers before and I'm used to work in groups.

Below is some of my threads and other work related to Web Security.

Tiny Webshell
Node.js and Server-Side Javascript Injection
PHP Audit - The art of finding 0days in webapps Part 1
PHP Audit - The art of finding 0days in webapps Part 2
[0day] DyMy User Agent MyBB Plugin SQL injection
[0day] MyFlags MyBB plugins SQL Injection
[0day] Wordpress HD Webplayer 1.1 SQL Injection

root@fox - *August 19, 2014, 1:43 pm*
HF UID: 1577992
Age: 15
Area of knowledge: Reverse engineering Windows & Linux binaries
Buffer overflow exploitation (Stack, heap) - I can complete a wargame style challenge as proof
Code auditing PHP & python application that run on servers
I know how to exploit SQLi, XSS, RFI, and some other public web vulns
Skill level from 1-10: 6ish
Provide proof of knowledge: PM me for some of my 0days :)

SoulHarvester - *August 19, 2014, 5:38 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
HF UID:339290
Sector:Computer Forensics
Any certifications:Unfortunately no
Skill level from 1-10:7
Proof of work or knowledge:
I have been cracking a lot of accounts I am not even sure if it is worth mentioning but that is one proof I currently have. I have had a successful shop with sold rdps which can be found here: https://hackforums.net/showthread.php?tid=4376306.
Introduction: Hello my name is Guild I am 19 years old and I have been addicted to computers since I was little. I remember almost the first windows 95 with the grey screen and the internet modem beebing to get a connection. Ever since I have been into computers. I always liked the forencics department it always seemed the proper challenge for me. It is tricky into being into a forensics section. I always was against using antiviruses. I always liked to track them down my self searching the %appdata% and deleting keys.It always helps me do more. I always liked defense but being a forensics man is not always playing defense it also offense. At the the age of 16 I started checking the ratting section. I myself know I have a lot to learn everyday I learn something new such as crypting,botnets,installs,mining and a lot of other stuff such as reverse proxying. I found those things very exciting I knew I was talented I could do it and can do it. After two years I stopped with the ratting stuff and started testing the monetizing section. It was always cool to make money as I myself have been an independed guy from when I was little. It is awesome (personal opinion) to make your own money. I discovered PPD/CPA which are and where my favourite ways of making a good income. It was easy for me to begin PPD/CPA because I could easily manipulate people to install my files. So this wasn't something to me. At the first week I managed to get 10.000 download from my file and generating a massive income. (Will post proof of my number of download due to they were made from ge.tt). https://i.imgur.com/kZXpNht.png it can be found here my profile. Note I can show it via screenshare even if I have too because you might think I did some inspect element (I haven't).Anyway I am not here to brag about anything I am just interested into joining this unique and exclusive group so I can share my knowledge into a lot of sections such as
Hacking/Pentesting/Forensics
Ratting/Keylogging
Money Making PPD/CPA mostly
Cryptocurrencies
Social Engineering (a bit)
Cracking
HTML
And a little of visual basic

[b]I really hope into being accepted into this group I am not sure if should post anything else I think it is enough. I am looking forward for your answer. Thank you for reading it.

General_Menace - *August 21, 2014, 5:11 am*

I don't see a point to making an application look amazing, after all it's the content you're looking at not the design.
HF UID: 1127240
Sector: Networking and Computer Forensics
Any certifications: Check my signature for updated certifications - they are likely to change often due to my line of work. I also have some smaller certifications - passing computing courses, I have several high distinction/distinction certificates from courses that I took in high school.

Skill level from 1-10: Depending on the topic covered, my rating may change however I would rate myself a 6 to an 8
Proof of work or knowledge: I work as a security administrator and a network administrator double role for a medium to large company. I would rather not reveal the company name however I have released a couple of papers for the company that I can supply if you require them (mostly privilege escalation in Windows systems, one exploit works on 1000s of computers worldwide). As I don't wish to provide any personal information on this site, I will not post public links to courses I have completed or certifications gained. If you require, I can send you images of my completed certifications and courses. I have a mostly Microsoft background with most of my knowledge being in Windows 7. With regards to networking, I am currently under control of over 1000 PCs on the one domain, this involves hundreds of switches as well as tasks such as configuring RADIUS and et cetera. I hope to bring to the table a mostly enterprise based experience and hope to expand my knowledge on penetration testing and perhaps continue my development of exploitations - both tools and design. I started work as a programmer and have fairly high levels of knowledge in C++, Java and Visual Basic. I have also developed various different tools and automation for tasks in scripting languages such as Powershell and BATCH. One of my developed tools is fairly largely used and is a hybrid of both Powershell and BATCH, once again however, it is used for enterprise use (adding users to a domain, segmenting them, creating mailboxes etc. all in one for multiple users). All up, I plan to further my knowledge and work on my current and future exploitation attempts and successes.

I know I'm not very active at the moment, that is mostly due to the amount of work I've had and I'm only just getting some free time - that's why I have been posting recently. I hope to be more active more often from now on though, trying to reduce my workload. Also, not sure if it counts but I am fluent in Japanese, English and Dutch.

PaddaIsAFaggot - *August 21, 2014, 11:44 am*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
HF UID: 2379110
Sector: Web security | Networking | Programming
Any certifications: I don't have any certifications but i have learnt everything to the max, and used the methods on sites to test for server exposure.
Skill level from 1-10: 6-7 (lot more i can learn and which i will learn)
Proof of work or knowledge:Web Development - I can develop the most simple to most advanced sites. I can also create simple but unique design that will grab the attention of visitors. I currently developed ticket system, Botnet IRC API, Hosting auto-buy, API Scripts/with key & stop function & lot more will can be discussed via private message or skype.
Server Management - I have lot experience in server management, as i currently running small hosting company (http://www.dahost.pw), I would say I'm advanced in Linux server management as i currently work with servers on a daily bases for customers and for my personal own projects. I can create simple scripts to start simple modules, so i can create fully function backend with PHP to create easy interface for running small company.
Booter/Stresser Management - I have lot experience running booters and stressers, i am currently supporting 4 booters with there backend support. I'm also good support ticket manager as i dedicated my time in to my response back to customers and i will always stay polite even at the newbies questions.
Botnet & RAT - I can setup IRC & HTTP Botnet, I can also develop custom IRC Attack Methods that have been proven to hit fairly hard with small amount bots.
I have knowledge also setting up RAT's for users who need help with port-forwarding or no port-forwarding, i can also crypt server.exe with winrar and make it complete FUD.
Marketing - Marketing is something you cannot rate or give a level. It's proven by the service or the product with support, the higher support and service uptime the more feedback you will get and more people will gain interest in the company

Computing/Hardware - I currently know few bits and bobs about hardware, I do little works in my home town for other people, and improve computers or they ask me what the best desktop/laptop or tablets for them, i recommend them the best tablets i normally make £20-30 everytime i help someone out.
Pentesting - I have basic knowledge, in pen testing finding vulnerable servers and files to exploit via Linux, I normally does service for cheap cost.
What i have done and what i am working on :
Vital Stresser
Inspire VPN
Inspire Booter
Inspire Hosting
DaHost
Minecraft Server
Inspire Botnet Setup
Inspire Hash Cracking API
Vital Booter
Vital API
Server Manager API (Short description: use an api based interface to control server which can be linked to ajax buttons or general html button.)
Multiple Support Payment API (BTC,PP,LTC,OMC ETC)

Current Services -

https://hackforums.net/showthread.php?tid=4407021
https://hackforums.net/showthread.php?tid=4406991
https://hackforums.net/showthread.php?tid=4402647
https://hackforums.net/showthread.php?tid=4405761

Thank you for taking the time to read my application, good luck to all users who apply :)

0x03a8 - *August 21, 2014, 12:05 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
HF UID: 1751197
Sector: Web security | Programming
Any certifications: none to be honest
Skill level from 1-10: I don't think this is something you should ask of me, how about you see it for yourself?
Proof of work or knowledge:CodingPHP
HTML
SQL
CSS
Batch
Java (learning plugin dev for minecraft)
Python (learning with raspberry pi)
DDoS
Cryptography
Pentesting (basic / average)
Coding - I started coding around 4 years ago, of course not 24/7 coding, I've played a lot of games and started out with Batch, after about a year I started coding more and more, getting into web languages, learned myself PHP, HTML and SQL. Last year I noticed my lack of skill making websites because I was lacking the skill to make it appealing to users. So i started to learn CSS as well. I'm currently working together with spoofable on making a company website to sell VPS's,

WebHosting, VPN, Booter. My Hash cracking API is implemented in the company website as well.
DDoS & Hacking - I have quite a bit of experience with DDoS, I started getting into hacking about a year ago, before that I did some cracking of Minecraft accounts (12k or so) and I still have 300k of mc usernames, Sold some, used some. After a while I got a bit bored with it and created an account on HF, not that I did a lot with it though, it took me a few months before MPGH got boring and I went over to HF, started posting more and more, helping out people in the beginner hacking section.
https://hackforums.net/postactivity.php?uid=1751197.
I started to get into DDoS later and currently own a big amount of scripts to harvest lists & attack. Of course I've also done a lot of research regarding the use of it, the OSI model and the works of the different types of connection. I'm hungry for knowledge and I love to learn, some people complement me on how skilled I am but I know that there are way more people even more skilled then me. It's hard to know if you're good enough, my lack of CSS & JS skill make it hard to put out my full potential. A good example is this thread, I started the project only to improve my CSS & JS, the video is terrible quality. All back-end was fully coded by me and 90% of the front end as well. https://hackforums.net/showthread.php?tid=4111113 the only reason it didn't work out well was because of the CSS (which I've improved on). I'm aware DDoS isn't really looked for in this group, however, I see it as a part of networking due to the methods and the way packets are sent across the system.
Pentesting - There isn't too much to say about this, I cracked a few RDP's, used NMAP on some servers and ran some vulnerability scans. For the rest I haven't done extremely much compared to some others but I'd love to improve on this field as well. I have a bit of knowledge of vulnerabilities, exploits and have worked a bit with metasploit and meterpreter.
Sidenotes - For the rest am I currently working with Spoofable (app above me), on the same projects as he is.

Other ProjectsHash cracking service
Inspire Hash Cracking API
Vital stresser Backend

Notable Threads (be sure to check the thread dates so you have an idea of when I posted it)
https://hackforums.net/showthread.php?tid=4307047
https://hackforums.net/showthread.php?tid=4402647 (I do support and administration here)
https://hackforums.net/showthread.php?tid=4397548 (cryptography challenges)
https://hackforums.net/showthread.php?tid=4225392
https://hackforums.net/showthread.php?tid=4175592 (not up anymore)
https://hackforums.net/showthread.php?tid=4204427 (CSS tutorial)
https://hackforums.net/showthread.php?tid=4405761
https://hackforums.net/showthread.php?tid=4407021 (I do backend with Spoofable)
I also have a hash cracking ebook if you want it, send me a PM
https://hackforums.net/showthread.php?tid=4406991 (Hash cracking API I coded)

I think you should remove the skill level from the application, it's nearly impossible to give a good answer.

j10max - *August 27, 2014, 5:10 pm*

HF UID: 1443989
Sector: Programming
Skill level from 1-10: 8, (I am quite advanced in the knowledge of the programming Java and other languages such as PHP, CSS, HTML, VB & C++ but not as ranged)
Provide proof of knowledge:
I have not provided any open-source projects to the community due to time constraints over the

past years through college, however due to recent openings I am able to do so with this [Legion] community to help overs.
Provided project examples down below:
IO.
Recently I decided to start a new project called "IO", featuring a Minecraft hacked client which injects code through RunTime using the open source libary/mod Forge. To code this, I have used Java methods and classes such as "Reflection, Polymorphism, Injection, Interfaces, LinkedLists...".
Updates from 22/07/2014 backwards shown here : https://twitter.com/PhoenixCubed
.
PasswordLocker.
This program was coded to suit my needs of semi-secure password storage on my local computer.
Source code: https://dl.dropboxusercontent.com/u/70584246/src.zip
.
Phoenix 1.0.
Last year public project which became very popular with Minecraft players who wanted an advantage over others.
However, it was fairly badly coded compared to "IO" which is my current project.

I would love the opportunity to join your group, looking for programmers like me

Sajuuk - *August 27, 2014, 5:28 pm*
HF UID: Why is it needed in this application?
Sector: Programming
Any Certifications: No. I'm still taking college-level courses, though.
Areas of Programming Knowledge: C, D, C++, Object Pascal, ASM (x86, Z80, 6502/65816, and ARM), and Python.
Skill Level from 1-10: Eight.
Proof of work or knowledge: Check my posts. And I don't provide the public with anything of mine which I consider to be my private code.
Contributions: PM me for the threads if needed.
Anything Else: Yes. I just started taking two computer-related classes this year: computer science and web development (or web technologies as my school refers to it as). I've been programming in

several languages for over seven years. I also began web development five years ago. I now use HTML, CSS, and JavaScript to design websites. Not that is an area of knowledge which makes me more eligible, but it counts, I assume.

Turtle???? - *August 28, 2014, 8:45 pm*

Good luck to all applicants. Please put some time into your applications, it's a great group!

Tor - *August 30, 2014, 5:53 pm*

Pretty nice stuff in here.
I might apply as well . Just need to make sure I have the time

Forezza - *August 31, 2014, 5:12 am*

I find it quite interesting that you're not looking for anyone in the area of cryptography or have anyone that is active in it. I personally don't really want to be in this group (I applied a while ago but doesn't really fancy me any more). I find it interesting how a hacking group doesn't have anyone that specialises in one of the most vital areas of hacking.

Not saying the group is shit or anything, but when I had a go at a Legion member a while ago for not knowing anything about cryptography (he's since learned quite a lot and probably knows who I'm talking about) I was told that the group has people who specialize in the different aspects of hacking.

That's my mini rant for the day.

Im gone brah - *August 31, 2014, 8:45 am*

That coursera course was great to learn an overview of cryptography although it doesn't really give you much insight into the common sort of things you'll see on HackForums. It's the same concept as academics learning all their life and still being shit at what they do opposed to the people that do something as their job that really know what they're doing and how to put it into practice.

Orchid - *September 1, 2014, 6:24 pm*

Good luck to all that apply, this group deserves good members.

Age: 15
Skill level from 1-10: I don't rate myself. I let other people do it for me.
Provide proof of knowledge:
Hmm, this is a toughie. How about this. You can PM me any question related to the area of my knowledge, or give me a quiz or something. Also, you could read my 3 tutorials (lol).
Area of Knowledge:

I probably won't list everything I know here, because all of us probably know more than this page is capable of displaying.

1. Web penetration (the normal shit)- Cross-site Scripting
- Cross-site Request Forgery
- Cross-site Frame Scripting
- Mostly anything related to/used in conjunction with XSS

- File Inclusion
- Remote File Inclusion
- Local File Inclusion
- Local File Download

- Arbitrary File Handling
- Deletion
- Uploading
- Overwriting

- Code Execution
- Remote Code Execution
- Remote Command Execution
- RCE through PHP Wrappers

- SQL Injection
- Union-based
- Error-based
- Double-query based

- Blind (Time & Boolean) based

- XPath Injection
- UpdateXML-based
- ExtractValue-based

- Misc
- PHP Object Injection
- Writing extremely-hard to read PHP scripts
- Finding FPDs
- Format String Exploitation (I know the concept, not how to do it.)
- PHP Script Auditing
- Basics of Cryptography
- Social Engineering
- Doxing (lol)
- Linux Privilege Escalation (meh)

2. Programming- Web Languages
- PHP
- HTML
- CSS (average)
- MySQL
- Javascript (average)

- Others
- Python
- C / C++ (basic)
- ASM x86 (very basic)

3. Misc
- Photoshop
- Them fucking Osu skills yo.

I hope I can meet knowledgeable people here ^-^

I do know what I'm talking about, and for years I've been through the university system to know what they're like. Even the guest lecturers from large firms complain about academics and there is a valid reason for this. All they do is study, there is very little practical work involved.

How bout using your brain - *September 2, 2014, 7:10 am*

Yes this is true. But somebody who has a masters degree or PhD is more likely to work in research later than in the industry. They are trained for research and research does in general not involve much practical aspects.
So obviously they can not do the practical things, just as the people who do the practical things will not be able to do the theoretical research. Both depend on each other, both are trained for different goals, complaining about one of them makes no sense to me as both are needed.

Then again if you are a PhD and end up being a programmer, you have done something wrong along the way.... and it is quite logical that somebody who was trained to be a programmer will do a better job in that case.

HF UID: https://hackforums.net/member.php?action=profile&uid=2358613
Sector: Web Security / Unofficial sectors; (I have knowledge in many aspects of IT)
Any certifications: I've taken MS Certification Classes Training through MS cert II.
Skill level from 1-10: 7
Proof of work or knowledge:
Well, I don't have proof of anything, if you go through my posts you'd see I know a lot, in a wide variety of topics such as networking, web dev, general IT aspects and more.

SIM-2015410 - *September 18, 2014, 8:39 pm*

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
MeshCollider's Application

HF UID: 2015410
Age: 16
Sector / Area of knowledge: Programming, and a broad knowledge of hacking.
Any certifications: No formal qualifications. I am entirely self taught, but very competent.
Skill level from 1-10: Perhaps a 7? I wouldn't classify myself under a particular skill level - I am intelligent and learn quickly, so I believe that if I was in an enriching group like Legion, I could move closer to a 10 extremely quickly.
Proof of work or knowledge:
As you can see, I am in the specialists group. I am a specialist in coding and currencies. I believe I am competent enough to join the ranks of legion as one of the "best of the best" on Hackforums.

I am on the Omnicoin Team because I was invited due to my coding ability. I am developing the java implementation of omnicoin and an android wallet for omnicoin (https://hackforums.net/showthread.php?tid=4385233)
I coded a DOX formatting tool (https://hackforums.net/showthread.php?tid=4380396)
I also offer a coding service in exchange for OMC (https://hackforums.net/showthread.php?tid=4372749)
I have coded a number of other small software projects for members, and I am extremely active in the Java section on HF helping people (have a look and see!). I occasionally help out in the other sections because I am competent in almost all the most popular languages (c#, c++, java, python, etc) but the other sections already have a lot of people helping so the Java section is where I can be the most help. I am also currently writing a mega tutorial on Java to replace the mediocre sticky currently in the Java section. In the past, I have had experience with web development, app development, game development, plugins, and of course software for windows. I have good knowledge of computer science, networking, etc. I started coding when I was 11 and have come a long way. I work hard and learn fast.

As well as my coding ability, I also have a broad and reasonable knowledge of hacking/pentesting. This includes web attack vectors such as SQLi and RFI/LFI, exploitation such as buffer overflows, Malware such as RATs, crypters, keyloggers, rootkits, etc, social engineering, cracking (account cracking, and basic software cracking - I am currently learning ASM to improve my skills in this area), and more. Honestly, I am not exceptional in any of these areas, I do not have much experience in real life situations, but have a great knowledge base. That is primarily why I wish to join legion. I really enjoy hacking and learning, and so I would love to join the group where I can learn a lot more and help others learn a lot more. I have written the biggest hacking tutorial on HF: https://hackforums.net/showthread.php?tid=4329505
I know it is not very detailed, and I know it classifies RATting and Doxing as forms of hacking, but I primarily wrote it as a learning resource for beginners to get started and to introduce them to as many areas as possible. At the moment I am expanding on all the topics into more detail in a hacking ebook I am writing. Please have a look at that tutorial if you haven't already, and see what kind of knowledge I already have. Please have a look at my threads list, almost all my threads are tutorials on hacking. Please have a look at them and use them to judge my skill level. A lot of people enjoy my tutorials because I believe I write well and make them clear and easy to understand, so I would really love to be able to make them even more detailed and accurate at the same time. I a smart guy, and I always want to learn more. As a 16 year old, I am doing university mathematics, and got an A+ in my first paper. I read whatever I can find, so I have already read many many ebooks and tutorials on hacking. Hackforums has helped me grow so much in my knowledge of hacking, and I want to go further. I want to help bring hacking back to Hackforums.

Here are some of my other hacking tutorials (Click to View)
https://hackforums.net/showthread.php?tid=4124763

Age: 15
Skill level from 1-10: I don't rate myself. I let other people do it for me.
Provide proof of knowledge:
Hmm, this is a toughie. How about this. You can PM me any question related to the area of my knowledge, or give me a quiz or something. Also, you could read my 3 tutorials (lol).
Area of Knowledge:

I probably won't list everything I know here, because all of us probably know more than this page is capable of displaying.

1. Web penetration (the normal shit)- Cross-site Scripting
- Cross-site Request Forgery
- Cross-site Frame Scripting
- Mostly anything related to/used in conjunction with XSS

- File Inclusion
- Remote File Inclusion
- Local File Inclusion
- Local File Download

- Arbitrary File Handling
- Deletion
- Uploading
- Overwriting

- Code Execution
- Remote Code Execution
- Remote Command Execution
- RCE through PHP Wrappers

- SQL Injection
- Union-based
- Error-based
- Double-query based
- Blind (Time & Boolean) based

- XPath Injection
- UpdateXML-based
- ExtractValue-based

- Misc
- PHP Object Injection
- Writing extremely-hard to read PHP scripts
- Finding FPDs
- Format String Exploitation (I know the concept, not how to do it.)
- PHP Script Auditing
- Basics of Cryptography
- Social Engineering
- Doxing (lol)
- Linux Privilege Escalation (meh)

2. Programming- Web Languages

- PHP
- HTML
- CSS (average)
- MySQL
- Javascript (average)

- Others
- Python
- C / C++ (basic)
- ASM x86 (very basic)

3. Misc
- Photoshop
- Them fucking Osu skills yo.

I hope I can meet knowledgeable people here ^-^
Challenge accepted. ???

HF UID: 995153
Sector: Penetration Testing, Security and Development
Any certifications:
Skill level from 1-10: How does one realistically judge himself and said skills within the world or on HF?
Proof of work or knowledge:
Coding:HTML
HTML5
CSS
PHP

Mysql
Python (Basics)
C++ and C (Learning)
Skills and Knowledge of:Web Hosting(From Collocation, Networking , Dedicated to VPS and Shared)
Linux System Administration
Apache/Nginx/Lightspeed
CentOS/Debian/Ubuntu
Adobe Suit
Visual Studios
Kali Linux
Metasploit
WHMCS/Cpanel/Solusvm/LAMP/LAMPA
OpenVZ/KVM
Cloud Computing
Computer Forensics (Fairly basics as learning it now)
Basic SEO

Security Knowledge:MySQL Injection
XSS
Web Application Hacking
Reverse Engineering (Very Basics)
Session Hijacking
Cryptography
Networking Fundamentals
Scanning And Enumeration (The simple thing no one has put on the Applications)
Malware - Trojans, Backdoors, Viruses And Worms (Knowledge of the History and what they are and do)
Denial Of Service Attacks (not sure if you would call this anything worth while since the whole 1337 leet hazors took over the web with web based booters/stressers)
And finally I need to learn more about Stacks and Heaps for Buffer Overflows.

Reason for wanting to join:Learning more (Knowledge is power you can never learn enough)
Meeting new peope
Having fun
Making money?

This is about it might if missed a few things. But this is about it, Hope I can get accepted and meet new people.

knowledge of buffer overflow
knowledge of DoS and DDoS
Cracking passwords
bruteforcing
reverse engineering websites

*I also operate Linux. I have a lot of experience in Linux's OS's with Kali linux and Ubuntu. I work with Windows OS's on a daily basis.

I believe I would be a valuable asset in this community because I feel I am at the right level where ethical hackers look at themselves to be. I try my hardest at everything I can do. Although, I will admit I do not know everything; nobody does. I am mature and handle situations properly. Lastly, I am friendly and try to be aspiring to others. I feel I could make a great impact in this group. Although this sounds crazy, it's true. Since I was 13 I have been fascinated by network security. I have 8 years of self-taught information that I constantly keep learning. I have came a long way from a skid, to an intermediate hacker. I have learned a lot of programming, exploit coding, and networking on

my own. Throughout my whole educational parts of my life I have received scholarships and high grade point averages. I truly dedicate myself when it comes to education. We are only what we put ourselves out to be. Lastly, the main thing that runs me is integrity.
I am a college sophomore male. Right now I am currently going for my bachelors degree in Business law, as well as Marketing. I'm currently self employed gathering public information for lawyers, employers, house owners, and private contractors, as well as developing software privately which I try to learn something new every day. I am hardly ever playing games or anything like that. My ultimate goal is to make a difference in this world by being the way I am, learning new things, and lastly, teaching my skills to people.

Thank you for taking the time to read my application.?

I'm someone that enjoys it if a post looks nice.

I suggest you look up the definition of spamming, because this isn't spamming.
I only reply to this in the first place because it's a subscribed, thread.

I should probably remove it because clearly people don't like me posting here

Jolyan - *October 8, 2014, 8:13 am*

HF UID: 309301
Age: 29
Area of knowledge: Forensics, Networking, Server Administration, Pentesting, Psychology/Social Engineering
Skill level from 1-10: 8
Provide proof of knowledge:

I will elaborate below:

Spoiler (Click to View)
Programming: Mysql
PHP
VB.net
ASP.net
Python
Powershell
Bash

Forensics:
Upon request, I can show reports or I can answer questions during an interview

Networking:
Gained experience during my job at a large telecommunications company (I can explain more during an interview given the sensitivity of the information)

Windows Server Administration:Windows 2003 - 2008 R2 administration
Windows 2003 - 2008 R2 Enterprise Domain Controller
Windows 2003 - 2008 R2 Exchange
Windows 2003 - 2008 R2 DNS
Windows 2003 - 2008 R2 Maintenance and troubleshooting

Linux Server Administration:Ubuntu server setups, pretty much anything you can think off (from VPN servers to webservers to mailservers)
Debian, same as above
Have experience with several sub-distributions such as Backtrack (now Kali)

Pentesting:
I've got experience pentesting large domains for various companies using nessus, nmap, metasploit and tools found in Kali (pretty much any tools) - I do not have much experience pentesting websites, but I do have basic knowledge of XSS and SQLi. I know how to sniff out (specific) traffic using TCPdump or wireshark. I can crack hashes faster than most people, not because of more firepower but because I use my brains ;)

Psychology:
I've gained this knowledge through various channels needed for my jobs and can teach them to others.NLP
Interrogation techniques
Body language (reading people)
Negotiation techniques

I will only disclose personal information (not all of it) during an interview, I'm a careful person.

Tell us why you would be a valuable asset: I've been using a PC since I was 4, I know my stuff. I've got more experience than most people I know around - I'm sure I can teach a thing or two to others.
Most of all, I have contacts in real life that have needs and deep pockets, I don't need to keep everything for myself - I can share.
I would appreciate to get to know some other people to share experiences, thoughts and work together (so far, I've done everything alone but have grown tired of it).

Elaborate on your achievements and future goals: I've worked myself up from the living on the street to a level that I am very satisfied with (job-wise, life-wise, but also financially).
I'm always eager to learn new things and to teach others.

Tell us about yourself: I'm in my late twenties, have traveled a lot, speak several languages fluently and I'm known for my skills, loyalty, persistence and charisma.
I haven't been too active on this forum but I believe it is time I give something back to the community.

Legion Group Application

HF UID: My Profile
Sector: Web Security / Networking
Any certifications: Currently taking Microsoft Certification Training II

Skill level from 1-10: Web Security - 7/10 Networking 9/10
Proof of work or knowledge:
Well, I specialize in networking. I've studied everything I could for about two years, I mostly know about how things work router to server wise, client to server, etc. I know a LOT about Denial of Service, and how to utilize resources to be able to do so. The inner loops of spoofing, amping, loading scripts, and creating a dedicated attack server is something I know a lot about, and can explain to any user in detail of how to do so, how it works, and what effects it can have.
Give me any specific questions, I can answer them in full detail on anything you want to know about said topic. If you look at my post activity, I have over 250 posts in the Beginner Hacking section as I love to help people who want to learn more, or advance their knowledge in hacking and general computing. I'm 16 years old, and I know what I'm doing. Please consider me to join Legion as it's probably the best fit group for me.
My main skill points:Networking- My main skill and knowledge is in this area
Java Programming
SQL Management
PHP development
Server Management
Social Engineering (I can usually talk anyone into whatever, with this said I can do a lot of damage to specific targets)
SOME C programming

(PS- I made the little graphic breakline, I like to organize things lol)

Because Vinnie is running it now??

Commander 11:11 - *October 13, 2014, 7:31 am*

Do you still accept applications for new members?

CrazyStealer - *October 13, 2014, 9:28 am*

I assume they still are. Even after the leadership change.

COwBUll - *October 14, 2014, 7:19 am*

HF UID: 2394449
Age: 17
Skill level from 1-10: 7.80
Provide proof of knowledge:Go ahead and Ask anything,i can show code whatever. if needed i can make public one of my worm
Area of knowledge: Creating Computer worm. i use language C++ and Little bit asm(Assembly). My worm that developing is Encrypted with AES-128,256 Encryption technology.Can create any kind of worm from mass mailing (love latter) to carBerp(bank hijacking) worm. I have coded my own botnet which is IRC C&C,Advanced encryption,Anti-traceBack(.data segment strings Are encrypted).Few sophisticated Info stealing worm, Doc Stealing worm,Advanced Exe Infection worm are my creation.

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]
Tri?ngle's HF UID: 2423635
Tri?ngle's Applied Sector: Computer networking / Web Security
Tri?ngle's Current skill level from 1-10: 8/10 (5+ Years of Experience)
Tri?ngle's Current certifications: CNS (Bachelor of Technology, Informatics and Security)

Proof of knowledge in Computer networking: I cannot provide proof of work but I could however provide proof of the certificate I have received and I could also answer any following questions that you may put in front of me. I would also be more then glad to go through a trial-process and be put through tasks during the recruitment and or after the recruitment. I have been working with Computer networking for the past five years and I have also been in the IT field for the past three years and have managed/helped over a hundred clients with problems such as Network configuration, Network setup and or repair and also Virus and Spyware removal over a client called VNC which stands for Virtual network computing and it's a basic client used to remote access an individuals computer to help them with any problem that they might have. I also have been managing a complex hosting infrastructure for the past six years of my life over the Internet.

Extended proof of knowledge for Web Security 8/10: Since I have worked at many businesses and

have learned about cyber-security within school, I have a great extent of knowledge within this field. I've personally pen-tested many websites on HF and also other forums that I have been on for Vulnerabilities, Keyloggers, and anything related to Threats on an business or Individuals website. I also work a lot with Network security which is basically the exact same instead I monitor attacks from malicious sources such as a DoS attack and or even an SQL injection which is basically an injection-technique to dump databases of a website and completely take-over everything which most people have been doing recently.

Other knowledge in Computer programming 8/10: I have stated above that I am knowledgeable within Computer programming but I have not studied anything there for I do not have understanding in some languages just like others may have on this forum. I have understanding in simple languages such as HTML (7/10), CSS (7/10), Java (8/10) and a little bit of Python but I am still learning from an Internet book that I have purchased on the Internet. I will however in the next months become very good within the following-languages that I have listed and I am sure I could catch up to the standards of this following group. We can now move on to why I think I should be accepted to this group and work with some of the others.

Conclusion of the following written-application above: Now I am not going to sit here and make up another paragraph and make a bunch of promises on what I could do for this group. I cannot promise anything like that but however I could let all of the leaders and members of this group know that I would be a great asset to this group. I will be learning a lot from this group and others and I also will be more then glad to teach others in the group that may struggle in something that I am good with which will allow all of us to reach success and learn off of each-other. I wish all other soon to be members, learners of this group the best of luck and I hope to see others on the other-side if I get accepted to the following group.

You can not join Anonymous. Nobody can join Anonymous. Anonymous is not a club, a party or even a movement. Anonymous has no leaders, no gurus, no ideologists. In fact, it does not even have a fixed ideology. All Anonymous are people who travel a short distance together - much like commuters who meet in a bus or tram: For a brief period of time we have the same route, share a common goal, purpose or dislike. And on this journey together, we may well change the world. Nobody can speak for Anonymous. Nobody could say: you are in, or you are out. Anonymous is all and nothing simultaneously. They exist yet they do not exist. Do you still want to join Anonymous?

Im gone brah - *October 16, 2014, 5:09 am*

He only lost a little less than $100,000 (due to Amoref Harris' had his private key/login credentials) and still has $300,000+ while he's still getting emails.
