Scammed me out of his keylogger: <https://hackforums.net/showthread.php?tid=210030>

Money: 15\$ PayPal

Ok first of all this guy is a fucking dumb im opening a scam report on this guy because, He over sold his crypter, all the stubs i buy gets detected in less then 24hours, In his crypter text file he said if the Stub gets detected in a week, he will replace it for free. Which he never did. i had to pay him 5\$ two times for 2 different Stubs.

I paid 15\$ for this fucking crypter. I had to format my computer because i had viruses. So i asked him b3fore formatting that i will be formatting my pc so i will need a crypter after i get back. After i formatted my pc, he sent me a new copy of crypter and a Stub. But he forgot to activate my license again because since i formatted my PC. I had lost the license TUX file and he needed to HWID me again. I asked him to do that and he blocked me on msn. Its been 5 days. I PMed him on HF couple of hours ago when he was online. & he ignored my PM. He didn't reply back to me. His support sucks. Plus his crypter dont even work. Only RC4 method works. the rest encryption methods dont work at all. I want my money back. ! he has been ignoring my PMs and blocked me on MSN.

You need to include proof or it never happened.

Tren1050 - April 6, 2010, 6:34 pm

You need pictures, but i can verify his service was awful, stubs detected the day you bought them and the stubs were massive.

0x000011 - April 6, 2010, 6:41 pm

it happens eventually with really popular crypters... i havent been working on those stubs for a while because like i said in thread and in main post of my thread "BUSY WORKING ON NEW CRYPTER"
-new crypter/new stub

my reseller is the one who sold you that and i told him to stop selling just recently because of it i already stated why i was unavailable to update stubs for now... just if you read my thread a bit

The Hack Master - April 6, 2010, 6:52 pm

Ahh well he finally activated.. thanks nyways:) thread closed.
