Thread: [Instagram Bot/Instagram Likes & Followers - or export the one which I follow actually](#)

itunes1995 - June 13, 2013, 11:00 am

Hey, I still search an free Instagram Bot or somebody who can give me Instagram Likes & Followers.

I use at the moment InstaGet Pro (But you don't get really much likes/follows and so on) and you follow so much. -.-

Oke, with Instaget Pro you can unfollow those who don't follow you, but is just annoying. -.-

So it would be very great, if somebody can help me. :)

Have a nice day. ?

EDIT: Or anybody know, how I can export the ones which i follow acutally? :)

So I would have the ability to export the lists with the names and save it, and with Instaget Pro I can just load a text file, and those, Instaget Pro wouldn't unfollow them. :)

That would be also an option. :)

Thank you for help. :D

you can use instahoot you dont need to follow anyone on your real account and you can choose up to 200 likes on your photo per day

<http://www.gramhoot.com/> thats the website its really easy to use too and it doesn't take your account
