@Trukfit, people intelligence isn't measured by their grades.

This was in my freshman year in high school. I was 14 for the entire year, but I just turned 15 a few days ago. To the other person I asked, I didn't have any AP courses available to take.

I was running a 4.0 GPA when I lived in the US. The US system is shit easy. Now I'm in the International Baccalaureate (the most rigorous and difficult high school diploma program in the world) and I'm struggling to pass AP math and chem :x

Congratulations and keep the good work up, it'll get you far :)
