Solved thanks to Temploit

Temploit - June 14, 2013, 6:23 am

Why not PHP Code

```
<?php
```

```
Dim NewestVersion As String = System.Net.WebClient().DownloadString("<link>")
?
```

Try this

Code Option Strict On

Imports System.Net

Public Class Form1

```
Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button1.Click
Dim Data As String
```

```
Data = GetPage("http://www.google.rs/")
```

```
If Data <> vbNullString Then
```

```
If InStr(Data, Application.ProductVersion) <> 0 Then
```

```
MessageBox.Show("You are up to date!")
```

```
Else
```

```
MessageBox.Show("New update is available!")
```

```
End If
```

```
End If
```

```
End Sub
```

```
Private Function GetPage(ByVal Url As String, Optional ByVal Proxy As String = Nothing,
Optional ByVal TimeOut As Integer = 4000) As String
```

```
Dim Request As HttpWebRequest
```

```
Dim Response As HttpWebResponse
```

```
Dim ProxySrv As New WebProxy(Proxy)
```

```
Dim Reader As IO.StreamReader
```

```
Try
```

```
Request = DirectCast(WebRequest.Create(Url), HttpWebRequest)
```

```
Request.Proxy = ProxySrv
```

```
Request.Timeout = TimeOut
```

```
Response = DirectCast(Request.GetResponse(), HttpWebResponse)
```

```
Reader = New IO.StreamReader(Response.GetResponseStream())
```

```
GetPage = Reader.ReadToEnd()
```

```
Response.Close()
```

```
Reader.Dispose()
```

```
Catch ex As Exception
```

```
GetPage = vbNullString
```

```
MessageBox.Show(ex.Message)
```

```
End Try
```

```
End Function
```

```
End Class
```
