Thread: [How To Crash Small Websites \(NOOB FRIENDLY\)](#)

Tooth Fairy - April 7, 2010, 6:35 am

Ok so your friend or your enemy has made a little shitty website for whatever maybe a private server or anything.. And your feeling devious and want to crash it .

TOOLS:

>>Port Scanner<<

<http://www.mediafire.com/?sharekey=7fcc5e5c82ff2dcbe62ea590dc5e5dbbe04e75f6e8ebb871>

>>rDos<<

<http://www.mediafire.com/?sharekey=7fcc5e5c82ff2dcbe62ea590dc5e5dbbe04e75f6e8ebb871>

>>HotSpotShield Proxy!<<

<http://hotspotshield.com/>

Step One: First we need to find the websites IP Adress. This is very easy todo.

Ok so say they URL is <http://www.yoursite.com> ok now that you have your URL open Up Cmd todo this press Start>Run>cmd Once you have CMD open you type ping <http://www.yoursite.com> press enter and you will get the ip of the website. (YOU MUST REMOVE HTTP:// AND ANY /'s)

EXAMPLE:

[img]http://i25.[censored].com/2w68nys.jpg[/img]

Step Two: Now we must test to see if port 80 is open (it usually is).

This is very easy todo to Ok open up the port scanner you downloaded.

Once in the port scanner type in your Victims ip that you got from step 1.

It will ask you todo a range scan or a full scan (SELECT REANGE SCAN!) It will ask for conformation you have to use a capital Y or a capital N! Now enter 79 for lowest port and 81 for highest hit enter than hit cap Y.

[X] = Closed

[X] Vulnerable = Open

EXAMPLE:

[img]http://i27.[censored].com/23u67h1.jpg[/img]

Step Three ALMOST DONE:

The final and easiest step (IF PORT 80 IS CLOSED PICK A NEW SITE!)

If port 80 is open your on your way to crashing!!

Ok open Up rDos that you download.

Enter your victims ip that we got from step 1.

It will ask you for the port to attack use port 80 that is why we scanned to make sure 80 was open! If it is closed it will not work.

Hit enter.. *=Flooding -=Crashed Or didn't connect!

EXAMPLE:

[img]http://i28.[censored].com/bhzlp0.jpg[/img]

Thanks for reading i hope this helps :)

If you liked my post then,

Scan the software too .

I don't take grantee for the virus proof links .

TheBlackMarket - April 7, 2010, 6:44 am

Thanks for the sharing mate.

Tooth Fairy - April 7, 2010, 6:46 am

My pleasure :)

...:SHARPEYE:... - April 7, 2010, 6:47 am

Wow... a batch DDoSeR... How does it work.. is it really DDoSing? ?

Mr Kewl - April 7, 2010, 6:48 am

thanks For sharing i think i have read this before

Tooth Fairy - April 7, 2010, 6:49 am

Try it :)

deziredforums - April 7, 2010, 6:50 am

lol its not batch its jst using the cmd window and its not a ddoser

its a doser

...:SHARPEYE:... - April 7, 2010, 6:51 am

(Apr 7, 2010 06:49 AM)???????x ?™ Wrote: [\[CITE\]](#) Try it :)

My virus scan said, threat found, and deleted it!

...:SHARPEYE:... - April 7, 2010, 6:52 am

its a doser

No its a batch... If it wasn't why the hell would it be using the shitty cmd window... ?

deziredforums - April 7, 2010, 7:04 am

because thats a thing you can use in c# and vb.net

...:SHARPEYE:... - April 7, 2010, 7:10 am

(Apr 7, 2010 07:04 AM)deziredforums Wrote: [\[CITE\]](#) because thats a thing you can use in c# and vb.net

hmmm.. well it still ends up detecting a virus so what the hell! Is this guy trying to infect us, or is that part of the code? I want answers!

chroniccommand - April 7, 2010, 7:37 am

Well let me ask you this. How will using a program to cluelessly DoS a server teach you anything? It will help more if you learn how a DoS works and what it's doing.

kikof - April 7, 2010, 7:41 am

nice tutorial thanks for share ;)

Gino90 - April 7, 2010, 8:29 am

nice post bro, thanks for sharing

GameOver* - April 7, 2010, 9:10 am

hmm.. good job dude! thanks for share! ?

Tooth Fairy - April 7, 2010, 9:55 am

My pleasure :)

cybr - April 7, 2010, 10:20 am

Is it a strong DoS? Also, nice tutorial.

Tooth Fairy - April 7, 2010, 10:36 am

Thanks for the comments :)

sector89 - April 7, 2010, 12:35 pm

Simple tutorial, few computers can be DoSed by one computer but its a starting place so good job.

Dreamstate7711 - April 7, 2010, 1:21 pm

Are you ment to wait for the Green Stars to stop or something? Sorry i'm a nub to this but i've been interested in ages.

I try the website whiles the DDOSER thing is still running but it works fine..

-mothered- - April 7, 2010, 2:30 pm

Now this looks like something that's definitely In my league.

Thanks mate, nice share Indeed :)

heatrepeat - April 7, 2010, 2:55 pm

I guess it's a start.

Thanks for this!

Breakbeat Junkie - April 7, 2010, 3:18 pm

Thanks, I'll try this :D

Tooth Fairy - April 8, 2010, 4:36 am

Thanks for your vouches.

I am going to make more TUTs .

Mario - April 8, 2010, 4:40 am

cmd window is used it almost every programming lauguage bro :P

paw - April 8, 2010, 6:01 am

Thank you so much mate! Simple but very useful:D

V3xD - April 8, 2010, 6:20 am

why are you kids so fucking stupid this doesnt dos the fucking website it only dos's your own connection basically, + if you go under the hopspot shield like a retard then all your doing it making your proxy lag even worse..

???? - April 8, 2010, 6:55 am

Thanks for the tutorial, I'll try it later!

Tooth Fairy - April 8, 2010, 7:22 am

(Apr 7, 2010 02:30 PM)mothered Wrote: [\[CITE\]](#) Now this looks like something that's definitely In my league.

Thanks mate, nice share Indeed :)

Thanks ?

Its a complement for me from your side as I think you are a pro in these fields.

tipledown - April 8, 2010, 8:23 am

ver nice share ...thanks alot :Smile:

Tooth Fairy - April 9, 2010, 4:24 am

My pleasure :)

chroniccommand - April 9, 2010, 6:30 am

What exactly is this teaching anybody?

ROTFL2 - April 12, 2010, 4:53 pm

Virus found for me Norton detected the Ddoser.

xSilv3r - April 18, 2010, 8:41 am

dosen't work with me it says that it did but the website didnt change Help please

This site : <http://195.81.227.234/index.php>

tipledown - April 18, 2010, 8:56 am

thanks man ?

.
.

Metal_Head_Alchemist - April 18, 2010, 9:00 am

I will try this, thanks for the noob friendliness i would have been screwed without it

Tooth Fairy - April 18, 2010, 9:57 am

I am delighted to help :)

xSilv3r - April 18, 2010, 10:47 am

so can someone make this website crash please ? <http://195.81.227.234/index.php>

random87 - April 18, 2010, 10:52 am

Thanks but nothing new :)

Tooth Fairy - April 18, 2010, 10:54 am

<http://195.81.227.234/index.php>

Try it yourself dude, that is how you learn?

MarV™ - April 18, 2010, 11:23 am

can you have troubles using this ?

Tooth Fairy - April 18, 2010, 11:24 am

No .

Bitcoins - May 2, 2010, 8:41 am

Here's What i get i waited 35 min can someone help
[img]http://i44.[censored].com/168tq2c.jpg[/img]

29e5ww - May 3, 2010, 1:46 pm

my AV says it a high threat idk if someone could help me i would be thankful

ZachHacks - May 3, 2010, 5:02 pm

thanks helped alot =)

joszhua13 - May 3, 2010, 6:37 pm

D0es this w0rkin on low bandwidth websites only?

Fireren - May 3, 2010, 6:45 pm

Interesting tut, I'll try it out thanks.

Tooth Fairy - May 3, 2010, 8:10 pm

I am delighted to help :)

STALK3R™ - May 8, 2010, 6:40 am

nice tut, thanks a lot

jandea - May 8, 2010, 7:31 am

Hur durr free virus.

dotatoad - May 8, 2010, 7:35 am

ooo looks cool im trying it

John_Larry - May 8, 2010, 10:16 am

what this methoed do is only bluck your proxy from browsing the site which you are crashing.
simply change your proxy then you will get nothing crashing

Fussy goblin - May 22, 2010, 4:22 am

I tried this on a small site. It went down for me but nobody else??..
