I keep writing "goose s" like that old tv show, and it keeps getting changed when i refresh the page, is the word censor haunted. ?

It keeps happening to me in lounge for some odd reason.

See the words in the " ". when i typed it, it changed after refreshing..

The word bum.p is censored. There is no issue.

If thats changed, how do we discuss something if it has the word bum.p inside it?

GooseBumps without space? why does it matter just space it

Ghost? - June 16, 2013, 5:41 pm

Just use rn for m :)

It's because it has "b.ump" in it.

Gooseburnps

Isn't it a book too?

It's because the word b.ump is censored. No biggie. Just replace a letter or two.
