TOS: Spoiler [\(Click to View\)](#)

You may not steal maps from other servers.

You may not purposely flood your server with players, or attempt to deny service to others.

Using fake info with our hosting panel will result in account suspension possibly without a refund.

Well done, Nice pricing that's for sure, reliable, great Host, nice person to interact with. Thumbs up from me.

I may be mistaken but could 1GB RAM and 100 mbits speed really host 20-30 players at the same time?

We use Spigot, which is a very optimized version of Bukkit. It holds more then normal Bukkit. To answer your question, we might want to revise that to 15-25, but mostly yes.

Still taking orders, 2GB left! Hurry and order :)

Krew - June 30, 2013, 5:24 am

His servers are terrific! 1GB easily holds 25 players, and the only lag that appears is when I worldEdit 20000 blocks.

xhflhkeuhwguu34 - July 10, 2013, 3:08 pm

It is not cool when you chargeback! I've completed all pending orders, opened a scam report, and disputed a chargeback.

C-Only - July 10, 2013, 3:15 pm

xhflhkeuhwguu34 - July 11, 2013, 12:27 pm

200th post, congrats. We'd love to have you!

We've installed WHMCS for use! Also, in related fixes, the login form now works for the billing system.

If you're wondering, WHMCS is not nulled and you can verify it through their official license validator.

Still selling this, will be purchasing a sticky shortly once we receive funds.

Thanks for the feedback. I'm aware of the Twitter issue, and we're working on it. I'll look this over and make the required changes. Thanks!

SmallChunk is now Rammy. We have ceased offering Minecraft servers. Existing customers will continue to have their servers hosted.
