Thread: [\[FREE\] File Pumper | Boost your file size](#)

?pth?n - June 18, 2013, 9:08 am

Hey,

I was kinda bored and made a file pumper for everyone to enjoy ;)

What it does:

Pumps the files size to the size you would like to have

I plant on doing a normal file pumper, but this one now pumps the file to the size you are looking for ;)

Didn't plan to have it work like that tbh, but after thinking about it I have came to the conclusion that it can be useful in many ways.

If you want to have your file pumped to exactly 2,64MB, you don't need maths anymore because it will just boost the file to that size ?

Working for all file extensions, just don't forget to save it like that aswell ;)

Hope its useful for someone

Have a nice day ?

Aphen

tobi7400 - June 18, 2013, 11:00 am

Do you know what we can use this to? :)

?pth?n - June 18, 2013, 11:05 am

Most are using pumpers when they want to spread a RAT. A bigger file makes it look less suspicious ;)

But basically you can use it for whatever you want :)

bibbastard - June 18, 2013, 4:34 pm

that is an interesting proposition.

Bagon - June 18, 2013, 5:14 pm

Chrome says it appears malicious, explain please?

?pth?n - June 19, 2013, 9:06 am

Chrome says that?

How the fuck...how can your browser say that my file is malicious?

Anyways, download it and run it in a VM/sandboxie if you are unsure. If you reverse engineer it you can check out that its absolutely safe :)

No point for me to infect other HF members ;o

Have a nice day

Murphy - June 19, 2013, 9:36 am

no point in this its fake dude and not possible

?pth?n - June 19, 2013, 9:45 am

I dont know how dumb you are Murphy, but it seems like you don't know anything at all.

There are plenty pumpers already, and I simply made my own simple pumper and decided to share it with the community.

I dont know why fucking trolls like you are trying to rush my thread, but seriously gtfo.

A pumper is possible ofc, and it's not a fake.

You sir, are the fake.

edit: Oh I see, your 14yo - nvm

DeadLine - June 19, 2013, 9:49 am

It's not fake. Chrome flags it as malware but I can assure you that it's perfectly safe to use and does exactly what it is supposed to do.

HiVInfection - June 19, 2013, 9:51 am

Considering your posts and rep, im pretty damn sure that it does its job without any "viruses". If so, they are probably false positives like the chrome incident. Thanks for the pumper, ill be using it!

?~

lillix - June 19, 2013, 10:09 am

This source has been leaked on BCF sir.

?pth?n - June 19, 2013, 2:25 pm

Thank you guys.

And I (dont even suggest chrome..) suggest you to not trust chrome with malicious reports.

I don't really understand why it's giving a false positive here (prob because it changes the file), but I can assure you that its safe.

EmmDude99 - June 19, 2013, 4:19 pm

Current File size: 3.2 MegaBytes

Pump File Size to: 3 TeraBytes

Good program, vouch bruh

--Signature--

lfinger - June 22, 2013, 4:16 pm

Thanks for this it works well! I love it.

Rayfi - June 22, 2013, 4:39 pm

Illuminati lol !

This file pumper is safe ?

?pth?n - June 23, 2013, 1:47 am

Thanks,

and yes, it is safe ;) Run it in a Sandboxie if you wanna be sure.

[irony] Sadly the Illuminati are controlling the whole world, including my spoofer ;) [/irony]

99StewartL - June 23, 2013, 6:01 am

Thanks -- this will come in very useful. Just out of interest, does this just flood the file with useless 'random' (yes a computer can't be properly random) pieces of data?

d3m0r - June 23, 2013, 12:54 pm

Thanks for this I will test it now :D!!

xboxhacz - June 23, 2013, 2:18 pm

i nerver understand how these worked at all

PTU - June 24, 2013, 5:56 am

Works perfectly! Thanks for sharing.

Barnaxx - June 24, 2013, 5:59 am

Thanks for that, i need it!

Ps: For all noobs, it safe and it work.

sdavis18 - June 24, 2013, 7:28 am

how does this work like how to you hit people of

?pth?n - June 24, 2013, 8:12 am

Thanks guys ;)

I had a hard time to understand what you are trying to ask, sdavis18.

I guess you mixed things up, pumper != booter.

Rafaelinio - June 24, 2013, 8:21 am

Nice ill try it later when I have time.

Alterations - June 25, 2013, 10:00 am

Works fine for me Thanks mate! Helped a lot! :D

kees901 - June 25, 2013, 10:09 am

im not sure if this is safe ill run it sandboxed

modey - June 25, 2013, 12:09 pm

not working with me say need framework ?

?pth?n - June 25, 2013, 12:42 pm

Don't worry kees, its safe ;) Hope you came to the same conclusion! :)

And unfortunately I have done it in .vb, so I guess you are not using Windows as OS?

Perhaps I will make a pumper in python somewhen, but don't expect it in the near future :P

skipp3rrMD - July 5, 2013, 1:56 am

fuking net

presko30 - August 4, 2013, 8:37 am

Thanks man! I've been looking for that kind of tool for hours! Thanks once again!

Tokyo - August 4, 2013, 11:59 am

Yay!

Thanks for the pumper ?pth?n!

?

?pth?n - October 3, 2013, 1:53 am

Thanks everyone ?

You obviously need .net because it was coded in VB.

Dr0neCC - October 3, 2013, 2:46 am

Also you can use dd or something else ...

It'll be better if you can add more data to get exactly same size as original binary file with the same md5 (by finding colision)

?pth?n - October 6, 2013, 2:23 am

It'll be better if you can add more data to get exactly same size as original binary file with the same md5 (by finding colision)

You can pump your file to the size you are looking for, but the MD5 hash will be different.

This would be too much effort, since I'm sure that only 0,05% of the internet users are comparing md5..

LUOIdereRentA - April 29, 2015, 9:58 am

Chrome has an option to check for malicious files. Basically all it does it check if the website is a trusted source. To download the file you go into chrome's settings and disable this option. It is completely safe and it most likely flags it as malicious because it has a low download count.

Martarts - May 2, 2015, 12:32 pm

Hey, can I have some help? I made my own pumper (link in sig). I made it in visual studio 2013. And for some reason I get a false positive says something like gen:64378. I never did anything but make it in vs. May you please take a look. Thanks xD

garkolym - May 5, 2015, 2:35 pm

Boost your File with a RAT! nice tool :D

FireDispenser - May 5, 2015, 3:26 pm

Can i please get this method :)

09852438 - April 7, 2016, 6:30 am

Anybody can update the download link?

Healo9999 - September 15, 2016, 8:00 pm

Great File Pumper, useful for when you want to mess with your colleagues.

Example:

Me: Hey dude, check out my powerpoint

"Dude": Sure send it

Me: Pumps powerpoint to 400MB

"Dude": WHy is it so big

Me: Get pranked

But in all seriousness, its a great File Pumper :)

EDIT: Download link is no longer available due to violations of "ToS". Requesting update :)

PELPOL - September 15, 2016, 8:18 pm

What kind of files is it pumping into the software? and this does change the file hashes right?
