Thread: [How To Hack WIFI Networks On Windows Platform](#)

Vaxorr - June 20, 2013, 3:07 am

hey guys i will show you in this video tut. how to hack WEP secured wireless password's its very easy N you will need 2 programs for that job
the programs

1) Commview For Wifi [direct link](#)
[normal link](#)

AirCrack-NG for Windows Platform : [direct link](#)

Video

hakun21 - June 28, 2013, 1:06 am

thanks man this is very helpful . in advance ;)

Gonzo. - June 28, 2013, 1:12 am

Thanks man, i already knew it.

Gonzo.

Tommy? - June 28, 2013, 1:28 am

Commview doesn't work on Windows 8 I don't think.
Just saying.

featz - June 28, 2013, 7:38 am

thanks dude, very helpful and easy to understand for beginners.

DA H4CK3R118 - June 29, 2013, 7:24 am

Awesome very easy to do and follow the tut however does this work with all networks?

SourMan - June 29, 2013, 7:39 am

Nice tut, I still rather use my BT 5 to crack WEPS :3 takes less time to capture packets also

prince76 - June 29, 2013, 7:51 am

Any way to hack Wifi using Windows phone ? or from android phone (without rooting)

MFFS - June 29, 2013, 7:55 am

(Jun 29, 2013 07:51 AM)prince76 Wrote: [\[CITE\]](#) Any way to hack Wifi using Windows phone ? or from android phone (without rooting)
Of course not.

Hacking wifi on windows is very slow, everyone should use backtrack, much faster.

prince76 - June 29, 2013, 7:58 am

Thanks for your response mate. But can we use backtrack to hack wifi with WPA2 encryption also ?

SourMan - June 29, 2013, 8:00 am

(Jun 29, 2013 07:58 AM)prince76 Wrote: [\[CITE\]](#) Thanks for your response mate. But can we use backtrack to hack wifi with WPA2 encryption also ?

Theoretically you can crack any WPA encrypted Passwords as long as u have a wordlist. In reality ur chances of cracking a WPA is very slim. :(

Vaxorr - June 29, 2013, 8:01 am

(Jun 29, 2013 07:58 AM)prince76 Wrote: [\[CITE\]](#) Thanks for your response mate. But can we use backtrack to hack wifi with WPA2 encryption also ?

Ya bro u can hax it with reaver if it haz wps inabled ?

(Jun 29, 2013 07:24 AM)DA H4CK3R118 Wrote: [\[CITE\]](#) Awesome very easy to do and follow the tut however does this work with all networks? No this works with WEP s3cured networks only

prince76 - June 29, 2013, 8:05 am

Thanks for the help guys , appreciate that. I have seen some apps on Google play store for hacking wep wifi ?

they don't work ? I mean I don't want to root my Sony Xperia L and at the same time want to hack my college WIFI.

Vaxorr - June 29, 2013, 8:15 am

(Jun 29, 2013 08:05 AM)prince76 Wrote: [\[CITE\]](#) Thanks for the help guys , appreciate that. I have seen some apps on Google play store for hacking wep wifi ?

U must root it for that as they r some wifi sniffers for rooted android and i heard that u can install backtrack5 in android

666Karma666 - June 30, 2013, 4:23 pm

As I always say, why complicate your life with windozzz? hahaha

Vaxorr - July 1, 2013, 4:00 am

reaand - July 28, 2013, 5:51 am

Only wep :D and not WPA/WPA2 ok. but thanks

? Ace of Spades ? - July 28, 2013, 7:32 am

good tutorial man. but it s works only in WEP networks. but great share....

JamieSissons121 - July 29, 2013, 10:04 am

Thanks for the great post mate, I will be using this

#AfterDark - July 29, 2013, 10:48 am

Thanks alot for the tutorial. This only works for WEP Networks no WPA/WPA2.

But very nice share indeed.

crazy luz - July 31, 2013, 12:13 pm

thanks it's util for hack wifi source

Vaxorr - July 31, 2013, 5:51 pm

thanks all for the feedback hope you like the tutorial guys

hacking - July 31, 2013, 6:22 pm

will try this later if it works or not. thank you for the share.

Candywarhol - August 1, 2013, 10:23 pm

since comview for wifi updated to 7.0 capture is different and capture all network any idea how to capture a single target? thanks

-X- - August 31, 2013, 2:17 pm

Thanks for this I will try it later on :)

Vaxorr - September 1, 2013, 4:31 am

(Aug 1, 2013 10:23 PM)Candywarhol Wrote: [\[CITE\]](#) since comview for wifi updated to 7.0 capture is different and capture all network any idea how to capture a single target? thanks

Yea i have noticed that but i think you can .

Press left click on your target wifi and choose copy mac address and choose the rules tab and chops by mac addres or something like that and paste the mac address of the wifi and chppse booth and press add rule.

ramsayzzz - September 7, 2013, 7:34 am

very very helpfull!!this is for wep protection..but for wpa2 ???

Vaxorr - September 7, 2013, 10:32 am

(Sep 7, 2013 07:34 AM)ramsayzzz Wrote: [\[CITE\]](#) very very helpfull!!this is for wep protection..but for wpa2 ???

Google how to hack wireless networks on backtrack

LuukM - September 7, 2013, 12:48 pm

Thanks dude, gonna try this out.?

Vaxorr - September 7, 2013, 1:18 pm

if any one wanna help feel free to PM

Vaxorr - September 8, 2013, 3:20 pm

2000 views .. Thanks Guys For The FeedBack Really Apprecite it

(Jul 28, 2013 07:32 AM)Zaolas™ Wrote: [CITE](#) good tutorial man. but it s works only in WEP networks. but great share....

i forgot to say you can use this for WPA also if u provided a wordlist in aircrack

Destroyer1 - September 19, 2013, 5:22 am

Thanks man. Very useful. Would recommend.

FordKnoxz - September 19, 2013, 9:14 am

Good tutorial! this really helped me out of my problems :)

Hackbegin - September 19, 2013, 9:20 am

Thank you for your time, it is a very nice tutorial indeed! I learned a lot hope it will work

Vaxorr - September 19, 2013, 10:33 am

you are welcome bro thanks for the feedback

Vaxorr - September 22, 2013, 2:14 am

shall i add more explanation to this tutorial ?

shall i add more explanation to this tutorial ?

f14stelt - September 22, 2013, 2:45 am

Thank for you post!! VERY GOOOD :D!! Thank!!!
