It is possible, and allowed for moment, we can't guarantee if it has any advantage though as our system work in a special way.

However we might make it a bannable offense at some point, and we'll try to limit it.

I have this error when I start the bot.

I know there's a part in french, but maybe you will understand anyway :

**** Débogage JIT ****

Pour activer le débogage juste-à-temps (JIT), le fichier de configuration pour cette application ou cet ordinateur (machine.config) doit avoir la valeur jitDebugging définie dans la section system.windows.forms. L'application doit également être compilée avec le débogage activé.

Par exemple :

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

Lorsque le débogage juste-à-temps est activé, les exceptions non gérées seront envoyées au débogueur JIT inscrit sur l'ordinateur plutôt que d'être gérées par cette boîte de dialogue.

EDIT:

It's due to a bug in the length formatting. I temporarily fixed it for now.

I know, but people were saying that you get 1000 views per day.

And lets do a little maths, 4-5 day old, and supposedly "30,967" views delivered.

$30967 \text{ views} / 4 \text{ days} = \sim 7741 \text{ views per day}$

They why is my video, that has only requested 115 views, only got 13..? ahah

I guess people aren't really that active as the site is small.
The 30,967 is a fully correct number and I will gladly prove it.

It's view-exchanging other people watch your videos, and only once per IP. So it should be fully safe.

**** Débogage JIT ****

Pour activer le débogage juste-à-temps (JIT), le fichier de configuration pour cette application ou cet ordinateur (machine.config) doit avoir la valeur jitDebugging définie dans la section system.windows.forms. L'application doit également être compilée avec le débogage activé.

Par exemple :

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

Lorsque le débogage juste-à-temps est activé, les exceptions non gérées seront envoyées au débogueur JIT inscrit sur l'ordinateur plutôt que d'être gérées par cette boîte de dialogue.

As I've checked the YT will count these views that are coming from other views on the system exchange. The referral are other vids.

Correct me if I'm wrong!

Did you link your YouTube account in the tool?

It is a 1:1 exchange, so the credits you earn are completely fair.

Mhm. Your cost for views is just ridiculous. It makes your service worthless to anyone without referrals.

2,195 videos watched overall, all with an account added and I've not been able to boost a video over 301, even with high-retention.

301+ takes around ~10 days to update with the real view count once it has been reached due to recent changes in how the counts are checked and updated on YouTube, atleast for views through our site.

I'll be sending you a PM in a moment.

YTMonster weren't very active back in the days, and recently with the relaunch of it so-called YTMonster 2.0 we've spiked our userbase big time. Since January 10, 2015 (the day we released 2.0) we've had over 5,000 new registrations.

Due to obfuscation. We're working on getting it whitelisted as soon as possible. :)

Wondering why most of the times, my clipboard will change from what I copied, to "Fag"? lol

It only tends to happen when YTMonster is running :P

That is due to how the commenting system works. It should replace your clipboard back to normal once the comment has been posted.

Hi,

im running your bot on a vps. Works great.

But if I let it run for like 24 hours or so, the bots stops viewing videos and tells me it is looking for videos then stops working.

When I restart the bot it works normally again.

Is this some sort of bug?

Will ALL the views i earned be counted by youtube? Or is the any known ratio like 2:1 (2 views delivered; 1 view counted)

I blasted around 3000 views to one video but after 72 hours of waiting i havent received any views.

'Thanks for your reply :-)

Artemis is some form of Adware, not sure what this is all about since the software was actually very good.

Grimeta - July 26, 2015, 11:03 am

I tried this about a couple of weeks ago, yes it was infected with adware, np run it on a virtual machine in a sandbox, collected like 4k points in 2-3 days, then tried to use it, it used points but didn't deliver anything at all, no views, no comments...

I don't understand people's greed. Why ruin a promising project (if it ever worked to begin with, but I hear it did) with malware and shit just for some quick cash when you could have stable income from it.

Hi Grimeta,

Most of the services has been having issues for quite long, and our whole team returns on the July 28, 2015 and from there on things should start to get sorted out again.

As for your adware accusation, the application doesn't contain any malware at all, and is just obfuscated for an additional layer of protection.

Used to optimize your video for your main keyword to improve your rankings in the YouTube search results.

The majority of it is developed completely, but adjusting the video score to have better accuracy may take a few days, and will require on-going changes as ranking factors are changed.

Features to come for the video optimizer includes: Beautiful & customizable .pdf report generation

YouTube Video Rank impacting your Video Score

Documentation for the improvement tips

Please let me know if you have any questions regarding our new feature.
