Thread: [I keep loosing my victims after they turn off their computer](#)

**ManOnFire** - June 20, 2013, 9:32 am

I am using Dark Comet and i rated this Nigerian Scammer but everytime he turns off his laptop i loose him What am i doing wrong  
his firewall is off and the rat is not cryped

**#Reliant** - June 20, 2013, 9:44 am

When you are building your RAT/Crypting it make sure you make start-up enabled.

**GanDino** - June 20, 2013, 9:49 am

Have you checked the start up option on your RAT?

**Angryflash** - June 20, 2013, 10:15 am

Make sure you have startup on and in the %Temp% folder for best results. Test it on yourself. If it asks if you want to run a program when you start or if you just don't show back up on the rat choose a new startup place.

**perdevoter** - June 20, 2013, 6:28 pm

I had this problem with a Dark Comet RAT too, but I just setup a new one and it worked. And I realised I was just forgetting about the start up option as mentioned.

**Impress.** - June 20, 2013, 10:50 pm

Make sure you enable start up in the DC

if you crypt it then disable startup in DC and enable it in the crypter

**PoisonKnife** - June 21, 2013, 3:17 am

It could be that your slaves doesn't have administrator rights on the computer.

**bwk322** - June 21, 2013, 9:44 am

For me sense I wanted my stub to be crypted the Person who was doing it for me said it couldnt be Start Up Enabled so I just go on there files and Drag it under start up

**Impress.** - June 21, 2013, 9:45 am

Well then you're slave wont come back but the most crypters have "startup function" next time ask for TV when he crypts ur file.

EDIT wasnt for you but for this guy bwk322 sorry
